DYAR, or **DYER, Mary A.,** Quaker, d. in Boston, 1 June, 1660. She was the wife of William Dyar, who removed to Rhode Island in 1638. In September, 1659, of four persons ordered to depart from the jurisdiction of the colony of Massachusetts on pain of death, Mrs. Dyar, who was a follower of Anne Hutchinson and had shared her exile, obeyed. In October she returned on purpose to offer up her life. She and others were arrested, sent to prison, and were arraigned under a law banishing Quakers from the colony on pain of death. When the sentence was pronounced she exclaimed: "The will of the Lord be done," and returned to the prison "full of joy." Three were led forth to execution. Mary Dyar was reprieved; yet not till the rope had been fastened round her neck and she had prepared herself for death. Transported with enthusiasm, she exclaimed: "Let me suffer as my brethren unless you annul your wicked law." Her reprieve had been granted at the request of her son, and on condition that she should depart in forty-eight hours and should not return. Against her will she was again conveyed out of the colony, but returned, and was hanged on Boston common on the charge of "rebellious sedition and obtruding herself after banishment upon pain of death."

DYCKMAN, Garrett W., soldier, b. in New York; d. in New York city, 21 May, 1868. He began his military career in the Mexican war, entering the army as a captain, and participating in the siege of Vera Cruz, the battles of National Bridge, Contreras, and Cerro Gordo, where he was severely wounded, and the capture of the city of Mexico. At the close of the war he was brevetted colonel for bravery and meritorious conduct, and on his return was elected register of the county of New York. During the civil war he served as lieutenant-colonel of the 1st New York regiment, and afterward became its colonel. He was a candidate, in August, 1859, for the gold snuff-box in which the freedom of the city of New York had been officially given to Andrew Jackson forty years before. See BURNETT, WARD BENJAMIN.

DYE, William McE., soldier, b. in Pennsylvania about 1832. He was appointed from Ohio to the U. S. military academy, where he was graduated in 1853, served in the 8th infantry on frontier and garrison duty, was promoted 1st lieutenant in 1856, and captain, 14 May, 1861. After being employed on mustering and recruiting service he became colonel of the 20th Iowa regiment, 25 Aug., 1862, served in Missouri and Arkansas in 1862–'3, receiving the brevet of major for gallantry at Vicksburg, and led a brigade in the Red river campaign of 1864, for which he was brevetted lieutenant-colonel on 28 May. He commanded a brigade at Mobile bay in September, and, after taking part in several expeditions, was acting assistant provost-marshal-general of Kansas, Nebraska, Colorado, and Dakota in 1865. He was brevetted brigadier-general of volunteers, 13 March, 1865, for services during the war, and colonel in the regular army on 9 April for gallantry in the Mobile campaign. He was promoted major of the 4th infantry, 14 Jan., 1866, served in various garrisons, and on 30 Sept., 1870, was honorably discharged at his own request. He entered the Egyptian service late in 1873, and served as assistant to the chief of staff in the Abyssinian expedition, where he was wounded. On its return he was charged by an Egyptian officer with assault and battery, and was to have been court-martialed, but his resignation was accepted before the trial. He subsequently received $5,000 from the Egyptian government in compensation for his wound, and afterward returned to this country.

DYER, Alexander Brydie, soldier, b. in Richmond, Va., 10 Jan., 1815; d. in Washington, D. C., 20 May, 1874. He was graduated at the U. S. military academy in 1837, served in garrison at Fortress Monroe, Va., in the Florida war of 1837–'8, and on ordnance duty at various arsenals in 1838–'46, was chief of ordnance of the army invading New Mexico in 1846–'8, during a part of which time he was on the staff of Gen. Sterling Price, and was engaged at Canada, Taos, where he was wounded 4 Feb., 1847, and Santa Cruz de Rosales, Mexico, receiving for his services the brevets of 1st lieutenant and captain. He was afterward in command of North Carolina arsenal. At the beginning of the civil war Capt. Dyer was active in promoting the efficiency of the ordnance department. He invented the Dyer projectile for cannon. He was in command of the Springfield armory in 1861–'4, and greatly extended the manufacture of small-arms for the army. In 1864, as chief of ordnance, U. S. army, he was placed in charge of the ordnance bureau in Washington, D. C., with the rank of brigadier-general, and he retained this office till his death. In March, 1865, he was brevetted major-general, U. S. army, for faithful, meritorious, and distinguished services.

DYER, Charles Gifford, artist, b. in Chicago in 1846. He was graduated at the U. S. naval academy, then in Newport, R. I., and saw some service in the civil war, but resigned his commission on account of impaired health, went to Europe, and studied art in Paris under Jacquesson de la Chevreuse. He entered the Royal academy at Munich in 1871, and has spent most of his professional life there and in Paris, with the exception of six winters in Rome, four summers in Venice, and prolonged working-tours in Egypt and Syria. Among his more important works are "St. Mark's, Venice, with Armenian Chapel," "On Linden when the Sun was Low," "Venice at Birth of Day," "Morning on the Riva, Venice," "Historical Still-Life of the Seventeenth Century," and "Among the Domes of St. Mark's."

DYER, Charles Volney, Abolitionist, b. in Clarendon, Vt., 12 June, 1808; d. at Lake View, near Chicago, 24 April, 1878. He was graduated at the medical department of Middlebury college in 1830, and began practice in Newark, N. J., in 1831, but removed in 1835 to Chicago, and soon became acting surgeon in Fort Dearborn. He was successful in his practice and business adventures, retiring from the former in 1854, and becoming agent for the "underground railroad" in Chicago. One instance illustrates the courage of Dr. Dyer: In 1846 a fugitive from Kentucky was caught in Chicago by his master and an armed posse, bound tightly with ropes, and guarded while a man went for a blacksmith to rivet the manacles that were to be put upon him. Dr. Dyer, hearing of the arrest, went hurriedly to the Mansion house and to the room where the victim was confined, burst open the door, cut the cords, and told the fugitive to go, which he did before his captors recovered from their surprise and bewilderment at such unexpected and summary proceedings. A bully, with brandishing Bowie-knife, rushed toward the doctor, who stood his ground and knocked down his assailant with his cane. Sympathizing friends subsequently presented the doctor a gold-headed hickory cane of gigantic proportions, appropriately inscribed, which is now in the library of the Chicago historical society. At an anti-slavery convention in 1846 at Chicago, Dr. Dyer was chairman of the committee for establishing the "National Era" at Washington, an organ of the Abolition party, established 7 Jan., 1847. Dr. Dyer had a genial nature, which manifested itself in ready witticisms and pleasant conversation, except when he chanced to come in contact with shams, impostors, or hypocrites, for which he had a most profound contempt and abundant words to express his detestation. In recognition of Dr. Dyer's sterling integrity and the great service he had rendered the cause of anti-slavery, President Lincoln, who knew him well, appointed him in 1863 judge of the mixed court at Sierra Leone, for the suppression of the slave-trade, after which appointment he passed two years travelling in Europe.

DYER, David Patterson, lawyer, b. in Henry county, Va., 12 Feb., 1838. He removed to Missouri in 1841, and was educated at the common schools and at St. Charles college, studied law at Bowling Green, and was admitted to the bar in March, 1859. He was elected district prosecuting attorney in 1860, and in 1862–'5 was a member of the legislature. He recruited and commanded the 49th regiment of Missouri volunteer infantry during a part of the civil war, participated in the campaigns against Mobile in 1865, and in 1866 was chosen secretary of the state senate. He was a delegate to the Chicago national Republican convention in 1868, and in the same year was elected to congress from Missouri, serving on the committees on territories and agriculture, and was U. S. attorney for the eastern district of Missouri in 1875–'6.

DYER, Eliphalet, jurist, b. in Windham, Conn., 28 Sept., 1721; d. there, 13 May, 1807. He was graduated at Yale in 1740, studied law, and was admitted to practice in 1746, after which he was town clerk and justice of the peace in Windham. He was many times member of the legislature between 1747 and 1762, and was the original promoter of the project to establish a Connecticut colony in the valley of the Susquehanna. In 1753 he was a member of the committee to purchase the title to the land selected for the proposed colony at Wyoming, and in 1755 was agent to petition the general assembly in its behalf. The French and Indian wars interrupted the plan, and in August, 1755, Mr. Dyer was lieutenant-colonel of a regiment sent to reduce Crown Point. He was colonel of a regiment sent against Canada in 1758, and in 1762–'84 was annually elected an assistant. As an active member of the Susquehanna land company, he was sent as their agent, in 1763, to England, but failed in his effort to obtain confirmation from the crown of the title to the Wyoming region. On his return he became comptroller of the port of New London, and in September, 1765, he was the first of the commissioners sent to the stamp-act congress from Connecticut. Afterward, with a majority of the Connecticut assistants, he withdrew from the governor's house rather than assist in his taking the oath to carry out the provisions of the act. Col. Dyer was elected judge of the superior court in 1766, and held that office till 1793, serving during the last four years as chief justice. He was a delegate to the 1st Continental congress in 1744, and was re-elected to each succeeding congress, with the exception of those of 1776 and 1779. He became a member of the state committee of safety on its formation in May, 1775, and in December, 1776, declined an appointment as brigadier-general of militia. Yale gave him the degree of D. D. in 1787. John Adams said of him: "Dyer is long-winded and roundabout, obscure and cloudy, very talkative and very tedious, yet an honest, worthy man; means and judges well." He published a pamphlet entitled "Remarks on Dr. Gale's Letter" (Philadelphia, 1769).

DYER, Heman, clergyman, b. in Shaftsbury, Vt., 24 Sept., 1810. He was graduated at Kenyon in 1833, having supported himself by taking charge of the preparatory department, and afterward entered the Protestant Episcopal ministry. He taught in Pittsburg, Pa., in 1840–'3, and then was made professor in the Western university of Pennsylvania there, becoming its president in 1844. He removed to Philadelphia in 1849 in the service of the American Sunday-school union, and afterward became secretary and general manager of the Evangelical-knowledge society. He became editor of the "Episcopal Quarterly Review" in New York in 1854, and in 1862 declined the bishopric of Kansas. He was made a member of the board of missions in 1868, and in 1871 of its Indian and Freedman's committees. In 1875 he made a tour through Mexico with Bishop Lee, which resulted in the establishment of a bishopric there. In 1880 he was forced by failing health to retire from active work. He received the degree of D. D. from Trinity in 1843. Dr. Dyer has published "Voice of the Lord upon the Waters" (New York, 1870), and "Records of an Active Life," an autobiography (1886), and edited a series of evangelical biographies.—His wife, **Catherine Cornelia,** author, b. in Ludlowville, N. Y., is the daughter of Arad Joy. She has been actively engaged in philanthropic work, has travelled widely with her husband, and contributed much to current literature. She has published "Henry and the Bird's Nest" (Philadelphia, 1852); "Sunny Days Abroad, or the Old World seen with Young Eyes" (New York, 1870); "Brief History of the Joy Family" (1876); "Records of the Dyer Family" (1884); and, with Marcia A. Hall, "Christmas at Fern Lodge" (1860). She has also edited her husband's autobiography, noticed above.

DYER, Sidney, clergyman, b. in Cambridge, N. Y., 11 Feb., 1814. He was chiefly self-taught, but studied for a time in the Amity street classical school in New York city. At an early age he was thrown upon his own exertions, and, after serving in the army in the Black Hawk war, became, in 1836, a student of theology. He was ordained as a Baptist clergyman in 1842, and shortly afterward served as a missionary among the Choctaws, soon becoming secretary of the Indian mission board in Louisville, Ky. He removed to Indianapolis in 1852, and in 1859 was called to Philadelphia as district secretary of the American Baptist publication society, which office he has since retained. Mr. Dyer has travelled extensively in the United States and Canada, and is a voluminous writer. His earlier poems, which appeared in various magazines, were collected into a volume entitled "Voices of Nature" (Louisville, 1850). He has also published, beside occasional sermons, "Psalmist for the use of Baptist Churches" (1854); "Songs and Ballads" (New York, 1857); "The Drunkard's Child" (1866); "Great Wonders in Little Things" (Philadelphia, 1871); "Black Diamonds" (1873); "Home and Abroad" (1874); "Hoofs and Claws" (1875); "Ocean Gardens and Palaces" (1877); "Elmdale Lyceum" (1879), and other works. He is also the author of several cantatas, including "Ruth" and "The Winter Entertainment." Among his popular verses are "The Beautiful Ladder," "The Songs my Mother Sung," and "The Grave of Ben Bolt."—His daughter, **Mattie,** author, b. in New York city, 23 Nov., 1842, was educated at a female seminary in Indianapolis, Ind., and was afterward a teacher in the Ladoga female seminary. In 1860 she married James H. Britts, of Ladoga, Ind. She began to write for various literary journals at an early age, and has published "Edward Lee" (Philadelphia, 1865); "Harry Henderson" (1880); "Honest and Earnest" (1881); "Boys and Girls of Deep Glen" (1882); "Better than Gold" (1883); "Earl Armstrong" (1885); "Chrissie" (1886); "Marcia, an American Girl" (Chicago, 1886); "Nobody's Boy" (1887).

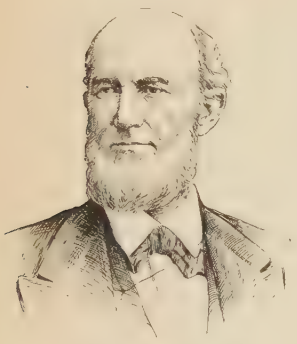
DYMOND, Alfred Hutchinson, Canadian journalist, b. in Croyden, Surrey, England, 21 Aug., 1827. He was educated at the Friends' school in Croyden, and engaged in mercantile pursuits in early life. In 1857 he joined the staff of the London "Morning Star," ultimately becoming its manager, and retaining that office till the amalgamation of the paper, in 1869, with the London "Daily News." In that year he came to Canada, and during the nine succeeding years was one of the editorial writers on the Toronto "Globe." At the general election in 1874, following the downfall of the Macdonald government, Mr. Dymond was elected to the Dominion parliament for North York, and represented it until his defeat in 1878. In 1880 he was appointed the executive officer of the Ontario agricultural commission, and prepared its report (5 vols., 1881). In April, 1881, he was appointed by the Ontario government principal of the institution for the education of the blind at Brantford, an office which he now (1887) holds. He is the author of a work opposing capital punishment, "The Law on its Trial" (London, 1865).

DYOTT, John, actor, b. in England in 1812; d. in New Rochelle, N. Y., 22 Nov., 1876. He early became a favorite at the Theatre royal, York, England, and made his first appearance in this country on 2 Sept., 1844, at the Park theatre, New York, playing Iago to the Othello of James R. Anderson, another English actor. For the next quarter of a century he did good work as leading man, chiefly in New York city, appearing there at the old Chambers street theatre, the Broadway theatre, and Wallack's theatre in Broome street. He was a fair Shakespearean scholar, and was known as a correct reader. Among his best-remembered parts are Iago and Sir Giles Overreach. About 1866 he retired from the stage and assisted his brother in editing a newspaper at New Rochelle, N. Y., succeeding to the chief editorship on the death of the latter. His wife was at one time a member of the Wallack theatre company.

DZIEROZYNSKIN, Francis, Jesuit, b. in Orsani, Poland, in 1779; d. in Frederick, Md., in 1850. He entered the novitiate of the Society of Jesus in 1794. After his ordination he was made professor of theology in the University of Polotzk, and continued there till 1820, when he was banished by the Russian government and came to the United States, where he landed in 1821. He was appointed superior of the Jesuits of the United States in 1823, and was active and successful in extending the influence of his order throughout the country. He founded, during his superiorship, the College of St. John in Frederick, Md., and gave great impetus to education in this and in other ways. On the expiration of his term, in 1830, he was appointed professor of theology in Georgetown college, and in 1834 he took charge of the Jesuit novitiate of Frederick. He was created provincial of the Jesuits in 1840, and during his term of office founded the College of the Holy Cross, Worcester, Mass.

E

EADS, James Buchanan, engineer, b. in Lawrenceburg, Ind., 23 May, 1820; d. in Nassau, N. P., Bahama islands, 8 March, 1887. He early showed a great interest in machinery, and at the age of ten constructed models of saw-mills, fire-engines, steamboats, and other machines. In 1833 he settled in St. Louis, where, besides being variously employed, he acquired considerable knowledge of civil engineering and cognate subjects. He constructed a diving-bell boat in 1842 to recover the cargoes of sunken steamers, and soon afterward designed larger boats, with novel and powerful machinery, for pumping out the sand and water, and lifting the entire hull and cargo. Many valuable steamers were set afloat and restored to usefulness by his methods. He disposed of his interests in these inventions in 1845, and then established in St. Louis the first glass-works west of the Ohio river. In 1856 he made a proposition to congress to keep the channels of the Mississippi, Missouri, Ohio, and Arkansas rivers clear of snags, wrecks, and other obstructions for a term of years, but this offer was not accepted. In 1861 he was called to Washington and consulted by the president and his cabinet in relation to the practicability of using light iron-clad vessels on the Mississippi and its tributaries. Soon afterward he designed and constructed eight iron-clad steamers, fully equipped, within 100 days. These were employed in the capture of Fort Henry in February, 1862, a month earlier than the conflict between the "Merrimac" and "Monitor." Subsequently, in 1862, he constructed numerous other iron-clads and mortar-boats, which proved of great value in the campaigns of Grant and in the capture of Mobile by Farragut. From 1867 till 1874 he was engaged in the construction of the steel arch bridge across the Mississippi at St. Louis. The central arch of this bridge has a clear span of 520 feet, and has been pronounced the finest specimen of metal arch construction in the world. This structure ranks among the noted bridges of the world. On the completion of this enterprise, Mr. Eads turned his attention to the deepening of the Mississippi by means of jetties. His plans, which were strongly opposed by the chief engineers of the U. S. army, to whom the government naturally looked for official advice, were submitted to congress, and finally a bill was passed granting him permission to attempt the improvement of the South Pass. Four years after he began work the U. S. inspecting officer reported that the maximum depth proposed had been secured throughout the jetty. This was a great triumph for Mr. Eads, as it was a practical demonstration of his theories. Subsequently he outlined one of the grandest plans that hydraulic engineering has ever undertaken, having for its object the extension of the deep water from the Gulf of Mexico to the mouth of the Ohio, into the very heart of the Mississippi valley. This magnificent channel was to be made permanent by practically putting an end to the caving of its banks. In 1880 congress reported in favor of the adoption of the jetty system, as devised by him, and appointed a commission, of which he was made a member. A large sum of money was appropriated by congress for the work, and along a small portion of the river the improvement was constructed. Congress afterward discontinued its appropriations, but enough had been done to establish the entire practicability of the plan. More recently Mr. Eads proposed a ship-railway to be constructed across the isthmus of Tehuantepec, and after failing to induce the government to attempt the execution of this work, he formed a private company, for the incorporation of which a bill was passed by the U. S. senate in 1887. Such an undertaking was shown by him to be entirely feasible, and he considered it far more economical than a canal. It was Mr. Eads's purpose to devote the remaining energies of his life to the prosecution of this scheme. He also examined and reported upon the bar at the mouth of the St. John's river, Fla., the improvements of the Sacramento river, the harbor of Toronto, the port of Vera Cruz, the harbor of Tampico, the harbor of Galveston, and the estuary and port of the Mersey, in England. Mr. Eads was president of the St. Louis academy of sciences for two terms, and in 1872 was elected a member of the National academy of sciences. The degree of LL. D. was conferred upon him by the University of Missouri. In 1881 he addressed the British association for the advancement of science at York on the improvement of the Mississippi, and also upon the Tehuantepec ship-canal. Three years later he received the Albert medal of the Society of arts in token of its appreciation of the services he had rendered to the science of engineering. Mr. Eads was the first citizen of the United States upon whom this medal has been conferred. Occasional technical papers on bridge construction and the application of the jetty system to rivers were contributed by him to engineering journals.



Jas. B. Eads.

EAGLE, Henry, naval officer, b. in New York city, 7 April, 1801; d. 26 Nov., 1882. His father was from Dublin, Ireland, and was major of an Irish brigade in New York, and during the war of 1812 assisted in preparing earthworks near Fort Greene. The son entered the navy as a midshipman on 1 Jan., 1818, and was commissioned as a lieutenant to the West Indies in 1827. After service in Brazil and on the Pacific coast, he was made commander in 1844, and superintended the construction of the Stevens iron battery at Hoboken, N. J., to which he devoted several years, acting as inspector in New York in 1846. He commanded the bomb-vessel "Ætna" and a division of the squadron during the Mexican war, and was civil and military governor, and collector of the ports of Tabasco, Mexico, in 1847–'8. In September, 1855, he was commissioned captain. He was the bearer of important communications from Brooklyn to Washington at the outbreak of the civil war, volunteered for the command of the gun-boat "Monticello," made the first naval attack of the war, and silenced the guns of Sewell's Point battery, Va., 19 May, 1861. Subsequently he com-

manded the frigate "Santee," of the Gulf blockading squadron, and during his service a boat-expedition from that vessel captured and destroyed the privateer "Royal Yacht," in the harbor of Galveston, Texas. He was promoted commodore in 1862, and on 1 Jan., 1863, was placed on the retired list. In 1864 and 1865 he was engaged as prize commissioner, and in that year became light-house inspector, which office he held for one year.

EAKIN, Samuel, clergyman, b. about 1742; d. in 1784. He was graduated at Princeton in 1763, and ordained by the Second presbytery of Philadelphia in 1770. From 1773 till 1777 he had charge of Penn's Neck Presbyterian church in West Jersey; but, as most of the parishioners were tories, he was obliged to withdraw on account of his zeal for American liberty. He was the idol of the soldiers, and whenever there was a military drill, or an order for a march, he was present, and by his fervor excited the patriotism of the troops to the highest degree. It is said that he never entered the pulpit without imploring the Lord "to teach our people how to fight, and give them fresh courage and perseverance to overcome their enemies." He was said to be the most eloquent preacher, after Whitefield, that had ever been in this country.

EAKINS, Thomas, artist, b. in Philadelphia, 25 July, 1844. He was graduated at the high school of Philadelphia, and went to Paris, where he received his art education at L'Ecole des beaux arts under Gérôme. He also studied in the atelier of Bonnat, and with the sculptor Dumont. After returning to Philadelphia, he was appointed demonstrator of anatomy, and afterward professor of painting and director of the Pennsylvania academy of fine arts. For several years he was teacher in the Brooklyn art guild, and lecturer on anatomy and perspective in the art student's league of New York. He is now professor in the art student's league of Philadelphia. He has painted many small pictures of domestic life in the early days of America, of American sporting and athletic games, studies of the American negroes, etc., which have been exhibited in the Paris salons, the National academy, New York, the Water-color society, American art association, and elsewhere. Among his noted pictures are "Dr. Gross in his Clinic"; "William Rush carving an Allegorical Figure"; "A Lady Singing"; "The Chess-Players"; "Mending the Net"; "The Writing-Master"; and "The Zither-Player." He sent "The Chess-Players," several portraits in oil, and the water-colors "Whistling for Plover" and "Base-Ball" to the Centennial exhibition in 1876.

EAMES, Charles, lawyer, b. in New Braintree, Mass., 20 March, 1812; d. in Washington, D. C., 16 March, 1867. He was prepared for college at Leicester academy, was graduated at Harvard in 1831, and studied law in the Cambridge law-school, and with John Duer in New York. But ill health prevented him from practising his profession, and in 1845 he accepted an office in the navy department in Washington. A few months later he became associate editor of the Washington "Union," and was appointed by President Polk to be commissioner to the Sandwich islands to negotiate a treaty. In 1850 he returned and edited the Nashville "Union" for six months, after which he again held charge of the Washington "Union." After several years of journalism he was appointed minister to Venezuela by President Pierce, and remained there until 1857, when he resigned and returned to Washington, where he practised his profession until his death. During the last five years of his life he attained a high reputation as an admiralty lawyer and for his knowledge of international law. He was a fine linguist and scholar, and possessed remarkable conversational power.

EAMES, Jane Anthony, author, b. in Wellington (now Dighton), Mass., 21 Jan., 1816. She is a sister of the late Henry B. Anthony, and was graduated at the young ladies' high school in Providence, R. I. In 1839 she married the Rev. James H. Eames, who was for many years rector of the Protestant Episcopal church in Concord, N. H., and died in 1877. She has travelled extensively in Europe and the east, and has published "A Budget of Letters" (Boston, 1847); "My Mother's Jewel" (New York, 1850); "The Christmas Gift" (1851); "Sarah Barry" (1852); "Home" (1853); "Another Budget" (Boston, 1854), and "The Budget Closed" (1864); and has compiled memorials of her father, Hezekiah Anthony (1885), and of the Rev. Dr. Eames (1878).

EARLE, Parker, horticulturist, b. in Mt. Holly, Vt., in 1831. He is one of the largest practical horticulturists in the country. He was chief of the horticultural department of the International exposition at New Orleans in 1885, has been president of the Illinois state horticultural society, and is now president of the Mississippi valley and the American horticultural societies. He has contributed frequently to the columns of standard agricultural periodicals.

EARLE, Pliny, inventor, b. in Leicester, Mass., 17 Dec., 1762; d. there, 19 Nov., 1832. He was a descendant of Ralph Earle, who, with nineteen others, successfully petitioned Charles I., in 1638, for a charter to form themselves into a body-politic of Rhode Island. In 1785 he became connected with Edmund Snow in the manufacture of hand-cards for carding cotton and wool, and in 1786 he established himself in the business. Among the many obstacles encountered by Samuel Slater in the introduction into the United States of the manufacture of cotton by machinery was the difficulty of procuring card-clothing for his machines. After unsuccessful applications to several other persons, he went, in 1790, to Mr. Earle, who, although it was a new and untried work, agreed to make the cards. He succeeded, but to achieve that success he was obliged to prick the holes for the teeth with two needles fastened in a handle. This led him to the invention of the machine for pricking "twilled" cards, by which the labor of a man for fifteen hours could be performed in as many minutes. This machine was in general use for years, until it was superseded by the machine that both pricks the leather and sets the teeth. He was a member of the Society of Friends, and, apart from his inventive genius, made extensive attainments in science and literature.—His second son, **Thomas,** lawyer, b. in Leicester, Mass., 21 April, 1796; d. in Philadelphia, Pa., 14 July, 1849, was educated at Leicester academy. In 1817 he removed to Philadelphia, where he engaged in mercantile pursuits for a few years, but subsequently studied law and practised his profession. He became distinguished also as a journalist, editing in succession the "Columbian Observer," "Standard," "Pennsylvanian," and "Mechanics' Free Press and Reform Advocate." In 1837 he took an active part in calling the Constitutional convention of Pennsylvania, of which he was a prominent member, and it is supposed that he made the original draft of the new constitution. He lost his popularity with the Democratic party by advocating the extension of the right of suffrage to negroes. He was the candidate of the

liberty party for vice-president in 1840, but the nomination was repudiated by the abolitionists, whom that party was supposed to represent. Mr. Earle subsequently took little part in political affairs. He devoted his time principally to literary work, and published an "Essay on Penal Law"; an "Essay on the Rights of States to Alter and to Annul their Charters"; "Treatise on Railroads and Internal Communications" (1830); and a "Life of Benjamin Lundy." At the time of his death he was engaged in a translation of Sismondi's "Italian Republics," and in the compilation of a "Grammatical Dictionary of the French and the English Languages."—Another son, **Pliny,** physician, b. in Leicester, Mass., 31 Dec., 1809. He was graduated at the University of Pennsylvania in 1837, then studied in the hospitals of Paris, and visited institutions for the insane in European countries. In 1840 he became resident physician of the asylum for the insane at Frankford, Pa., where he remained two years. From April, 1844, till April, 1849, he was physician to Bloomingdale asylum, New York. He immediately afterward visited insane hospitals in Europe. In 1853 he was appointed visiting physician to the New York city lunatic asylum, and in the same year delivered a course of lectures on mental disorders at the College of physicians and surgeons, New York. In 1863 he became professor of materia medica and psychology in Berkshire medical institute in Pittsfield, Mass., the first professorship of mental diseases ever established by a medical college in the United States. His lectures there were limited to the one course of 1864, owing to his appointment as superintendent and physician-in-chief of the state hospital for the insane in Northampton, Mass. He held this place until October, 1885. In 1871 he visited forty-six institutions for the insane in Europe. Dr. Earle was, so far as known, the first person that ever addressed an audience of the insane in any other than a religious discourse. His introduction of lectures on natural philosophy at the Frankford asylum, in the winter of 1840–'41, was the initiative to a system of combined instruction and entertainment, which has been widely adopted, and is now considered essential to the highest perfection of an institution for the insane. In the winter of 1866–'7, at the hospital in Northampton, he delivered a course of lectures on insanity before audiences in which the average number of insane persons was about 250. His annual reports during the last ten years of his superintendence at Northampton hospital contain a series of articles on the curability of insanity, which have been published in book-form, entitled "The Curability of Insanity; a Series of Studies" (Philadelphia, 1887). Dr. Earle was one of the founders of the American medical association, the New York academy of medicine, the Association of medical superintendents of American institutions for the insane, and the New England psychological society, and has been president of the two last named. He has published "A Visit to Thirteen Asylums for the Insane in Europe" (Philadelphia, 1840); "The History, Description, and Statistics of the Bloomingdale Asylum" (New York, 1848); "Institutions for the Insane in Prussia, Germany, and Austria" (New York, 1853); and "An Examination of the Practice of Blood-Letting in Mental Disorders" (New York, 1854), besides frequent contributions to medical periodical literature. He has published "Marathon and other Poems" (Philadelphia, 1841).

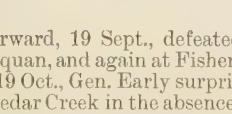
EARLE, Ralph, artist, b. in Leicester, Mass., 11 May, 1751; d. in Bolton, Conn., 16 Aug., 1801. He was a descendant of Ralph Earle, an early settler of Leicester, and his father, Ralph, held a commission as captain in the Revolutionary war. He had no collegiate education, but painted portraits in Connecticut in 1775. Soon after peace was declared he went to England, studied his art under the instruction of Benjamin West, and was elected a member of the Royal academy. He returned to the United States in 1786, and continued to pursue his profession in different parts of Massachusetts, New York, and Connecticut. Among his works are two portraits of Dr. Dwight (1777); four historical paintings, believed to be the first of that class ever executed by an American artist—"The Battle of Lexington," "A View of Concord," "The Battle of North Bridge, Concord," and "A View of the South Part of Lexington." These were engraved and published by Amos Doolittle, of New Haven, Conn. Mr. Earle also painted portraits in England and America, several landscapes, and a "Niagara Falls," which was exhibited in all parts of the country and subsequently in London.—His brother, **James,** artist, b. in Leicester, Mass., 1 May, 1761; d. in Charleston, S. C., 7 Sept., 1798, had no collegiate education, and little is known of his early life. He married Mrs. Caroline Georgiana Pilkington Smyth, mother of Admiral William Henry Smyth. He painted portraits in Charleston, S. C., and died suddenly of yellow fever when he was preparing to return to England.—His son, **Augustus,** artist, b. in 1793, was admitted as a student in the Royal academy, London, in 1807, and some of his pictures were in two of the public exhibitions prior to that date. He had an insatiable love of adventure, and was known as the "wandering artist." From 1815 till 1832 he travelled extensively through North and South America, Australia, New Zealand, and the East Indies. In Madras he painted portraits and executed original drawings, which he afterward arranged for a panorama, and exhibited. His health failing, he returned to England. When in New York, he spent most of his time in the house with Thomas Cummings, the well-known painter of miniatures. He visited all parts of the Mediterranean, travelled in Africa, and finally sailed on a four-years' voyage of discovery, from which he never returned. "A Narrative of a Nine-Months' Residence in New Zealand in 1827, together with a Journal of a Residence in Tristan d'Acunha," was published by Augustus Earle, draughtsman to his Majesty's ship "The Beagle" (London, 1832).—Ralph's son, **Ralph,** artist, d. in New Orleans, La., studied in London in 1809–'10, and after his return to the United States married a niece of Andrew Jackson, and painted a full-length portrait of the general.

EARLY, John, M. E. bishop, b. in Bedford county, Va., in 1785; d. in Lynchburg, Va., 5 Nov., 1873. He joined the Methodist conference of his state in the great revival of 1801–'2, and became an itinerant preacher about 1807. He soon attracted attention by his fervor and eloquence, and was specially successful in conducting religious exercises in a revival. He successively filled the offices of secretary of the conference and presiding elder, and was repeatedly a delegate to the quadrennial general conference. In the agitation that resulted, in 1844, in the division of his denomination into the Methodist church north and south, Mr. Early took an active part, and was elected the first book-agent of the latter. Though sixty-nine years of age, he was elected bishop in 1854, and served his church with great zeal and fidelity for nineteen years. He was largely instrumental in founding Randolph-Macon college, Va. Bishop

Early, though a vigorous writer, published only a few sermons, addresses, and occasional pamphlets, some of them relating to the disruption controversy. He received the degree of D. D.

EARLY, John, clergyman, b. in the County Fermanagh, Ireland, in 1814; d. in Georgetown, D. C., in 1874. He came to the United States when eighteen years of age, and entered St. Mary's college, Emmettsburg, Md., as a student, finished his studies in Georgetown college, and in 1834 entered the Society of Jesus. He was ordained priest in 1844, and, after passing some time in Georgetown college as professor of belles-lettres, was sent to Philadelphia on his first mission. He was next appointed president of Worcester college, Mass., where he remained several years. In 1852 he went to Baltimore and built the fine college and church of St. Ignatius. Subsequently he was transferred to the presidency of Georgetown college. During the civil war he converted the college and its grounds into a hospital and camp for National soldiers, but without a day's interruption of the course of study.

EARLY, Jubal Anderson, soldier, b. in Franklin county, Va., 3 Nov., 1816. He was graduated at the U. S. military academy in 1837, appointed a lieutenant of artillery, and assigned to duty at Fort Monroe, Va. He served in the Florida war in 1837–'8, resigned from the army in July, 1838, and began the practice of law in Virginia. He served in the legislature in 1841–'2, and was commonwealth attorney in 1842–'7, and again in 1848–'52. During the Mexican war he was major of a regiment of Virginia volunteers, serving from January, 1847, till August, 1848, was acting governor of Monterey in May and June, 1847, and after the disbanding of the army returned to the practice of law. At the beginning of the civil war he entered the Confederate service as a colonel, commanded a brigade at Bull Run, and in the battle of Williamsburg, 5 May, 1862, was supposed to be mortally wounded. He was promoted brigadier-general, and in May, 1863, commanded the division that held the lines at Fredericksburg, while Lee was fighting the battle of Chancellorsville. He also commanded a division at Gettysburg. In 1864 he was ordered to the valley of the Shenandoah, where his operations were at first successful. In July he crossed the Potomac, gained the battle of Monocacy, and threatened Washington, but was obliged to retreat. Toward the end of the month a portion of his cavalry advanced into Pennsylvania as far as Chambersburg, which, by his orders, they burned. He was afterward, 19 Sept., defeated by Sheridan on the Opequan, and again at Fisher's Hill three days later. On 19 Oct., Gen. Early surprised the National forces at Cedar Creek in the absence of Gen. Sheridan; but the latter, having arrived in the afternoon, rallied his army and gained a decisive victory, Gen. Early losing the greater part of his artillery and trains.



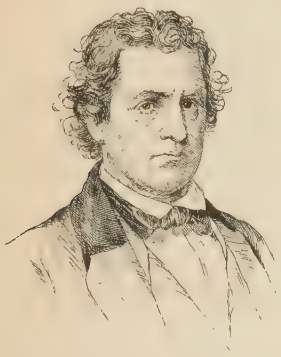
In March, 1865, he was totally routed by Gen. Custer at Waynesboro, and a few days later he was relieved by Lee from the command in the valley; that general saying in his letter, 30 March, 1865: "Your reverses in the valley, of which the public and the army judge chiefly by the results, have, I fear, impaired your influence both with the people and the soldiers, and would greatly add to the difficulties which will, under any circumstances, attend our military operations in S. W. Virginia. While my own confidence in your ability, zeal, and devotion to the cause is unimpaired, I have nevertheless felt that I could not oppose what seems to be the current opinion without injustice to your reputation and injury to the service." After the close of the war he spent some time in Europe, and on his return resumed the practice of law in Richmond. He subsequently took up his residence in New Orleans (alternately with Lynchburg), where, with Gen. Beauregard, he became a manager of the Louisiana state lottery. He is president of the Southern historical society, and has published a pamphlet entitled "A Memoir of the Last Year of the War for Independence in the Confederate States" (Lynchburg, 1867).

EARLY, Peter, jurist, b. in Madison county, Va., in June, 1773; d. in Greene county, Ga., 15 Aug., 1817. He was graduated at Princeton in 1792, and with his father settled in Georgia in 1795. He studied law in Philadelphia, and practised successfully at the Georgia bar. He served in congress in 1803–'7, where he opposed the African slave-trade, and was prominent in the trial of Samuel Chase, one of the judges of the supreme court, appearing for the prosecution. In 1807 he became judge of the state supreme court, and retired in 1813, when elected governor of Georgia, in which office he served for two years. He was afterward a state senator.

EASTBURN, James Wallis, clergyman, b. in London, England, 26 Sept., 1797; d. at sea, 2 Dec., 1819. His father and family came to the United States in 1803. The son was graduated at Columbia in 1816, studied theology under Bishop Griswold in Rhode Island, and while thus engaged undertook a new metrical version of the Psalms, which he did not live to complete. At the age of eighteen he wrote the hymn "O Holy, Holy, Holy Lord!" and was a contributor to various periodicals. He was ordained, 20 Oct., 1818, and went to St. George's, Accomac co., Va. After less than a year's ministry his health failed, and in November, 1819, accompanied by his mother and brother, afterward bishop of Massachusetts, he sailed for Vera Cruz. He died on the fourth day out, and was buried at sea. Mr. Eastburn wrote several fugitive poems, some of which are very graceful, and published, in conjunction with Robert C. Sands, "Yamoyden," a romantic poem, founded on the history of King Philip, the sachem of the Wampanoags (New York, 1818).—His brother, **Manton,** P. E. bishop, b. in Leeds, England, 9 Feb., 1801; d. in Boston, Mass., 11 Sept., 1872, was brought to the United States in infancy. He was graduated at Columbia in 1817, studied theology in the General Protestant Episcopal theological seminary in New York, was ordained in 1822, and for the next five years officiated as assistant minister in Christ church, New York, whence, in 1827, he removed, to become rector of the Church of the Ascension. On 29 Dec., 1842, he was consecrated assistant bishop of the diocese of Massachusetts, then embracing also Maine, New Hampshire, and Rhode Island, and two months later, on the death of the venerable Bishop Griswold, became bishop

of the diocese. On his death he bequeathed his property to domestic missions in Massachusetts, to the endowment of the Protestant Episcopal theological school at Cambridge, and to the American Bible society. He edited, with notes, Thornton's "Family Prayer" (New York, 1836), and published "Four Lectures on Hebrew, Latin, and English Poetry," delivered before the New York Athenæum (1825); part of a volume of "Essays and Dissertations on Biblical Literature" (1829); "Lectures on the Epistles to the Philippians" (1833); and "Oration at the Semi-Centennial Anniversary of Columbia College" (1837).

EASTMAN, Charles Gamage, poet, b. in Fryeburg, Me., 1 June, 1816; d. in Burlington, Vt., in 1861. He early went with his parents to Barnard, Vt., was educated at Royalton academy, Windsor, and at Burlington, and was graduated at the University of Vermont in 1837. While a student he wrote editorials for the Burlington "Sentinel." He founded the "Lamoille River Express" at Johnson, Vt., in 1838, established the "Spirit of the Age" at Woodstock, Vt., in 1840, and purchased the "Vermont Patriot" and removed to Montpelier in 1846. He was postmaster at Woodstock and Montpelier for several years, and a member of the state senate in 1851–'2. He published a volume of poems delineating the rural life of New England, marked by a high degree of metrical finish (Montpelier, 1848), was a contributor of poetry to reviews and magazines, and read poems at the University of Vermont and at Dartmouth and other colleges.



Charles G. Eastman

EASTMAN, Harvey Gridley, educator, b. in Marshall, Oneida co., N. Y., 16 Nov., 1832; d. in Denver, Col., 13 July, 1878. He opened a commercial school in St. Louis in 1855, and four years later the Eastman national business college at Poughkeepsie, N. Y. Beginning with one pupil, the college in a short time included 1,600 students, occupied five large buildings, and employed more than sixty instructors. In 1871, and again in 1873, Mr. Eastman was elected to the New York assembly, and he also served three terms as mayor of Poughkeepsie. Many public improvements in that city were due to his energy and liberality.

EASTMAN, John Robie, astronomer, b. in Andover, N. H., 29 July, 1836. He was graduated at the Chandler scientific department of Dartmouth in 1862, and in 1877 received the degree of Ph. D. from that college. In February, 1865, he was appointed professor of mathematics in the U. S. navy, with the relative rank of commander, and assigned to astronomical work in the U. S. observatory in Washington. He has accompanied various astronomical expeditions throughout the United States, and in 1870 was sent to Syracuse, Sicily, to observe the total eclipse of the sun that took place on 22 Dec. of that year. Besides being a member of various scientific societies, he has since 1879 been a fellow of the American association for the advancement of science, and was its general secretary in 1883. The results of his astronomical investigations have appeared in the yearly volumes of the U. S. naval observatory, which from 1872 till 1882 were edited by him.

EASTMAN, Julia Arabella, author, b. in Fulton, N. Y., 17 July, 1837. She became a successful teacher, and, with her sister, Sarah, opened in 1880 the Dana Hall preparatory school for students entering Wellesley college. She has published juvenile story-books, among them "Short Comings and Long Goings" (Boston, 1869); "Beulah Romney" (1871); and "Young Rick" (1875); also many articles and short poems in newspapers.

EASTMAN, Macarthur Eastman, capitalist, b. in Gilmanton, N. H., 8 June, 1810; d. in Manchester, N. H., 3 Sept., 1877. While engaged in the manufacture of woollen goods at Roxbury, Mass., he acquired an interest in a patent spinning-jenny, which he introduced into England, and in 1856, after the beginning of the Crimean war, he secured the patent of a breech-loading cannon and sold it to the British government. At the beginning of the civil war he contracted for the manufacture of a large number of carbines, and subsequently furnished fire-arms to the United States and foreign governments. In 1869 he planned the direct ocean cable, an enterprise which required a capital of $6,500,000 in gold, and which was met from the first by a powerful corporate opposition. He secured the needed legislation after nearly five years of effort, and the cable was laid, the American end being landed at Rye Beach in July, 1874.

EASTMAN, Ornan, clergyman, b. in Amherst, Mass., 27 March, 1796; d. in New York city, 24 April, 1874. He was graduated at Yale in 1821. After completing his theological studies at Andover in 1824, he was for a year an agent of the American board of commissioners for foreign missions, and then entered the service of the American tract society in Boston, where he remained from 1825 to 1828. In the latter year he was transferred to New York, first as general agent for the Mississippi valley, and from 1832 as finance secretary, which office he continued to fill till he retired in 1870.

EASTMAN, Philip, jurist, b. in Chatham, N. H., in February, 1799; d. in Saco, Me., 7 Aug., 1869. He was graduated at Bowdoin in 1820, studied law, and was admitted to the bar at Paris, Me., in 1823. He practised law at North Yarmouth, Me., in 1823–'36; at Harrison, Me., in 1836–'47; and at Saco in 1847–'69. He was a member of the Maine senate in 1840–'2, a commissioner to locate the claims of settlers on the northeastern boundary of Maine under the Washington treaty in 1842–'3, and for five years subsequently commissioner for Cumberland county. He published "General Statutes of Maine," as chairman of a legislative committee for that purpose (1840), and a digest of the first twenty-six volumes of the "Maine Law Reports" (1849).

EASTMAN, Sanford, physician, b. in Lodi, Seneca co., N. Y., in 1821; d. in Riverside, San Bernardino co., Cal., 8 Jan., 1874. He was graduated at Amherst in 1841, spent a few years in teaching and agricultural pursuits, then studied medicine, and was graduated from the medical department of the University of Buffalo in February, 1851. He began to practise in Buffalo, and was in 1858 appointed to the professorship of anatomy in the university, to which was added in 1867 that of clinical surgery, which position he resigned in 1870. He was health-officer of the city in 1861–'7, and in 1871 a member of the Board of state charities. Later in the same year he removed to California.

EASTMAN, Seth, soldier, b. in Brunswick, Me., 24 Jan., 1808; d. in Washington, D. C., 31 Aug., 1875. He was graduated at the U. S. military academy in 1829 and assigned to the infantry. After frontier and topographical duty he was assistant teacher of drawing at West Point from 1833 to 1840, served in the Florida war in 1840–'1, and afterward on the western frontier. From 1850 to 1855 he was employed in the bureau of the commissioner of Indian affairs to illustrate the national work on the "History, Condition, and Future Prospects of the Indian Tribes of the United States" (Washington, 1850–'7). He then returned to the frontier. He was retired with the rank of lieutenant-colonel on 3 Dec., 1863, on account of disability from exposure in the line of duty, and on 9 Aug., 1866, was brevetted brigadier-general. Gen. Eastman was elected a member of the National academy of design in 1838. He was the author of a "Treatise on Topographical Drawing" (1837).—His wife, **Mary Henderson,** author, b. in Warrenton, Fauquier co., Va., in 1818, married Capt. Eastman in 1835, and resided with him for many years at Fort Snelling, Minn., and at other frontier stations. Her portrayal of Indian life is the fruit of long observation and familiarity with the Indian character. She has published "Dacotah, or Life and Legends of the Sioux" (New York, 1849); "Romance of Indian Life" (Philadelphia, 1852); "Aunt Phillis's Cabin," a reply to Mrs. Stowe's "Uncle Tom's Cabin" (1852); "American Aboriginal Portfolio," illustrated by her husband (1853); "Chicora and other Regions of the Conquerors and the Conquered" (1854); "Tales of Fashionable Life" (1856); and numerous stories and sketches in magazines.—Their son, **Robert Langdon,** b. in Maryland about 1840; d. in Washington, D. C., 9 Nov., 1865. He was graduated at the U. S. military academy in May, 1861, and, being ordered at once to the seat of war, was engaged in the battle of Bull Run. From that time he was on duty with the Army of the Potomac, rising to the grade of captain, till he was prostrated by disease contracted in the service. After the battle of Malvern Hill he was ordered to West Point, and, though suffering from illness, performed the duty of assistant professor of drawing and of ethics until it was impossible for him to continue.

EASTON, James, soldier, b. in Hartford, Conn.; d. in Pittsfield, Mass. He was a builder by trade, and removed from Litchfield, Conn., to Pittsfield in 1763. He raised a Berkshire regiment in 1775, served at Ticonderoga, 9 May, 1775, and was the bearer of the news of that contest and its results to the Provincial congress. He was one of the earliest to advocate the invasion of Canada, commanded a regiment under Montgomery until 1776, and received the thanks of congress in that year. His further service in the army was prevented by the enmity of Benedict Arnold. He sacrificed his fortune for his country, and died in poverty.

EASTON, Langdon Cheves, soldier, b. in St. Louis, Mo., 10 Aug., 1814; d. in New York city, 29 April, 1884. He was graduated at the U. S. military academy in 1838, and was assigned to the 6th infantry. He was promoted to be 1st lieutenant, 23 July, 1839, and held the commission till 15 April, 1851, becoming assistant quartermaster, with the rank of captain, 3 March, 1847, and quartermaster, with the rank of colonel, 2 Aug., 1864. He served in the Florida and Mexican wars, and during the civil war. He was chief quartermaster of the Army of the Cumberland from 15 Dec., 1863, till 4 May, 1864, and of the armies commanded by Maj.-Gen. Sherman from 4 May, 1864, till 27 June, 1865, being present during the operations of the campaign from Chattanooga to Atlanta, and subsequently at the capture of Savannah. On the march from the latter city to Goldsborough, N. C., and thence to Washington, D. C., via Raleigh and Richmond, Gen. Easton acted in the same capacity. After the close of the war he was stationed in Mississippi and Missouri. He was brevetted lieutenant-colonel, colonel, and brigadier-general, 17 Sept., 1864, "for distinguished and important service in the quartermaster's department in the campaign terminating in the capture of Atlanta, Ga.," and major-general, 13 March, 1865, "for meritorious service during the war." He was promoted to be colonel and assistant quartermaster-general, 6 June, 1872, retiring from active service, 24 Jan., 1881.

EASTON, Nicholas, governor of Rhode Island, b. in 1593; d. in Newport, R. I., 15 Aug., 1675. He came from Wales, in 1634, with his two sons, to Ipswich, Mass., and afterward lived in Newbury, Mass., and Hampton, N. H. He was one of the first settlers in both the last-mentioned towns, and, having had trouble with the authorities, removed to Rhode Island in 1638 and built the first house in Newport. He was governor of the united colonies of Rhode Island and Providence in 1650–'2.—His son, **John,** was governor of Rhode Island in 1690–'5, and wrote a "Narrative of the Causes which led to Philip's Indian War" of 1675–'6, which was edited and issued by Franklin B. Hough (Albany, 1858).

EATON, Asa, clergyman, b. in Plaistow, N. H., 25 July, 1778; d. in Boston, Mass., 24 March, 1858. He was graduated at Harvard in 1803, and while pursuing theological studies officiated for two or three years in Christ church, Boston, as lay reader. In 1805 he went to New York, and in July of that year was admitted to orders by Bishop Benjamin Moore in Trinity church. He returned to New England soon afterward, and entered zealously upon clerical duties in connection with Christ church, Boston. This position he resigned in 1829, owing to continued weakness of voice, and engaged in the free church city mission with gratifying success. In 1837 he became connected with St. Mary's school, Burlington, N. J., and labored there for four years. Thence he returned to Boston, where he occupied himself in various church works. He also accepted the charge of Trinity church, Bridgewater, which he held at the time of his death. He received the degree of D. D. from Columbia college in 1828. Dr. Eaton's principal publication was a "History of Christ Church, Boston" (1828).

EATON, Cyrus, educator, b. in Framingham, Mass., 11 Feb., 1784; d. in Warren, Me., 21 Jan., 1875. He was a son of Benjamin Eaton, a Revolutionary soldier. He received a common-school education, studied the classics by himself, and removed in 1804 to Warren, Me., where he was for forty years a teacher. He served for thirteen years as town clerk, and was five years in the Massachusetts legislature. He became totally blind about 1845, and devoted himself to literature, with the aid of his invalid daughter. He was elected a member of several historical societies, and received the degree of A. M. from Bowdoin in 1848. He published "Annals of Warren" (1851); "Woman," a poem (1854); and "History of Thomaston, Me." (2 vols., Hallowell, Me., 1865).

EATON, Dorman Bridgman, lawyer, b. in Hardwick, Caledonia co., Vt., 27 June, 1823. He was graduated at the University of Vermont in 1848, and at Harvard law-school in 1850, where he took the first prize for a legal essay. He was in that year admitted to the New York bar, and

became the partner of Judge William Kent. He was for several years chairman of the committee on political reform in the Union League club. Mr. Eaton travelled in Europe in 1866 and in 1870–'3, giving particular attention to the status and probable development of the civil service of various countries. After his return President Grant appointed him a member of the civil service commission, and he held the place of chairman till the commission expired through the failure of congress to make an appropriation for its support. He visited Europe in 1875; and in 1877, at President Hayes's request, went to England to secure material for a historical report upon the British civil service. He was the first of the commissioners appointed by President Arthur under the act of 1883 re-establishing the civil service commission, resigned on 28 July, 1885, but was reappointed by President Cleveland, 5 Nov., and resigned in April, 1886. Mr. Eaton has been prominent in the civil service reform movement in the United States. The first society for promoting it was formed at his residence in 1878, and he has contributed largely on the subject to periodical literature. Mr. Eaton delivered the annual address before the Yale law-school in 1882. He drafted the law for creating a metropolitan board of health in 1866; that establishing the present New York police courts; and also the national civil service act of 1883. Mr. Eaton has received the degree of LL. D. from the University of Vermont, and he has published "The Independent Movement in New York" (New York, 1880); and "Civil Service in Great Britain" (1880) and edited Kent's "Commentaries," with Judge William Kent (1851–'2), and "Chipman on Contracts Payable in Specific Articles" (1852).

EATON, Edward Dwight, educator, b. in Lancaster, Wis., 12 Jan., 1851. He was graduated at Beloit college, Wis., in 1872, at Yale divinity school in 1875, and studied in the universities of Leipsic and Heidelberg, Germany, in 1875–'6. He was pastor of Congregational churches in Newton, Iowa, in 1876–'80, and in Oak Park, Ill., in 1880–'6, and on 29 Jan. of the latter year was elected president of Beloit college.

EATON, George Washington, clergyman, b. in Henderson, Huntington co., Pa., 3 July, 1804; d. in Hamilton, Madison co., N. Y., 3 Aug., 1872. He was graduated from Union college in 1829, and from 1831 till 1833 was professor of ancient languages in Georgetown college, Kentucky, acting as president for six months. He was professor of mathematics and natural philosophy in Hamilton literary and theological institution, Hamilton, N. Y., and in 1837–'50 filled the chair of ecclesiastical and civil history there. After the incorporation of the institution as Madison university Dr. Eaton was its president from 1850 till 1861, and at the same time professor of systematic theology. He was also professor for some years of intellectual and moral philosophy. From 1861 till 1871 he was president of Hamilton theological seminary and professor of homiletics. He received the honorary degrees of D. D. and LL. D. Dr. Eaton was early ordained to the Baptist ministry, and was a strikingly original and eloquent preacher.—His brother, **Joseph Haywood,** educator, b. in Berlin, Delaware co., Ohio, 10 Sept., 1812; d. in Murfreesborough, Tenn., 12 Jan., 1859, was graduated at Hamilton literary and theological institution in 1837. He was elected to a professorship in Union university, Murfreesborough, Tenn., in 1841, and in 1847 became its president, continuing in that relation till his death. He was ordained as a Baptist minister in 1843, and was a preacher of uncommon ability. He had received the honorary degree of LL. D.—Joseph Haywood's son, **Thomas Treadwell,** clergyman, b. in Murfreesborough, Tenn., 16 Nov., 1845, was graduated at Washington college, Lexington, Va., in 1867, and has served as pastor of Baptist churches in Lebanon and Chattanooga, Tenn., Petersburg, Va., and Louisville, Ky. Besides having written several pamphlets, Mr. Eaton is the author of "My Angels" (1874); "Sermons to Children" (1887); "Marriage and Law" (1887).

EATON, Horace, governor of Vermont, b. in Barnard, Vt., 22 June, 1804; d. in Middlebury, Vt., 4 July, 1855. He was graduated at Middlebury in 1825, and at the Castleton medical college in 1828. In that year he began to practise in Enosbury, and remained there until 1848, when he was appointed professor of chemistry and natural history in Middlebury, and held the chair till 1854. He was a member of the legislature, lieutenant-governor in 1843–'6, superintendent of public schools in 1845–'50, governor of the state from 1846 till 1849, and a member of the State constitutional convention of 1848.

EATON, Isaac, educator, b. in Montgomery, Pa., in 1724; d. 4 July, 1772. He was for twenty-six years pastor of the Baptist church in Hopewell, N. J., and was the first teacher among American Baptists to open a school for the education of young men for the ministry. The house in which Mr. Eaton taught still stands in the village of Hopewell. Among his pupils were many who subsequently became eminent as ministers, physicians, and lawyers. One of these was the Rev. James Manning, the first president of Rhode Island college, now Brown university.

EATON, John, educator, b. in Sutton, N. H., 5 Dec., 1829. He was graduated at Dartmouth in 1854, was principal of a school in Cleveland, Ohio, in 1854–'6, and superintendent of schools in Toledo in 1856–'9. He then resigned, studied for the ministry at the Andover theological seminary, and was ordained by the presbytery of Maumee, Ohio, on 5 Sept., 1861. Meanwhile, in August, he had been commissioned chaplain of the 27th Ohio volunteers, was made brigade sanitary inspector, and in November, 1862, was appointed by Gen. Grant superintendent of contrabands. A month later he became general superintendent of freedmen for Mississippi, Arkansas, West Tennessee, and Northern Louisiana, and served as such till 27 May, 1865. He was commissioned colonel of the 63d U. S. colored infantry on 2 Oct., 1863, and received the brevet of brigadier-general of volunteers in March, 1865. Subsequently he was appointed assistant commissioner of the bureau of refugees, freedmen, and abandoned lands, and after thoroughly organizing the bureau resigned to edit the "Memphis Post," where he continued from 1866 till 1870, serving as state superintendent of public instruction in 1867–'9. He was appointed U. S. commissioner of education in March, 1870, and remained in that capacity until August, 1886, when he resigned to accept the presidency of Marietta college. The bureau of education at the time of his appointment had but two clerks, not over a hundred volumes belonging to it, and no museum of educational illustrations and appliances; but when he resigned there were 38 assistants and a library including 18,000 volumes and 47,000 pamphlets. Gen. Eaton represented the department of the interior at the Centennial exhibition held in Philadelphia in 1876, he was chief of the department of education for the New Orleans exposition and organized that vast exhibition, was president of the International congress of education held

there, and vice-president of the International congress of education held in Havre, France. He received the degree of Ph. D. from Rutgers in 1872, and that of LL. D. from Dartmouth in 1876. Gen. Eaton is a member of many learned associations, and has published numerous addresses and reports on education and the public affairs with which he has been connected.

EATON, John Henry, politician, b. in Tennessee in 1790; d. in Washington, D. C., 17 Nov., 1856. He received a thorough education, studied law, and was admitted to the bar, beginning to practise in Nashville, Tenn. He was elected to the U. S. senate as a Democrat, and served till his resignation in 1829. He was a personal friend of Andrew Jackson, and was appointed by him secretary of war, holding the office from 1829 till 1831. Three years later he was made governor of the territory of Florida, and held the office till 1836, when he was appointed U. S. minister to Spain, remaining there till 1840. He published "Life of Andrew Jackson" (Philadelphia, 1824).—His wife, **Margaret L. O'Neill,** b. in 1796; d. in Washington, D. C., 8 Nov., 1879, was the daughter of William O'Neill, an Irish hotel-keeper in Washington. After the death of her first husband, John B. Timberlake, a purser in the U. S. navy, she married Mr. Eaton in 1828. She possessed great beauty and fascination of manner united to a persistent will and high ambition. The appointment of Mr. Eaton to the cabinet gave her a social position that she had long desired, but, owing to reports unfavorable to her reputation, she was refused recognition on equal terms by the families of the other members of the cabinet. The feud in society caused by this involved the president, who warmly supported his "little friend Peg," as he was accustomed to call her. At this time the estrangement between President Jackson and Vice-President Calhoun had begun, and a belief was awakened in the mind of the former that the latter had shrewdly fomented the general excitement, and it was said took an active part in promoting the crisis. Finally the president demanded of his secretaries the recognition of the social status of Mrs. Eaton, and was refused by all of them excepting Mr. Van Buren. As a compromise it was suggested that her public status should be conceded, while each lady should act as she chose in regard to private recognition. Gen. Jackson wrote a very plain-spoken note on the subject to Vice-President Calhoun, but only elicited from him the diplomatic reply that it was a "ladies' quarrel," with which men could not successfully interfere, adding that "the laws of the ladies were like the laws of the Medes and Persians, and admitted neither of argument nor of amendment." The quarrel culminated in a general disruption of the cabinet in 1831. Mrs. Eaton was said to have shone with brilliancy in the court of Isabella in Spain, and was a social favorite in Paris and London. In 1840 she returned to Washington, where she resided quietly till the death of Mr. Eaton. She was left with a large estate, and the custody of five grandchildren. In 1857 she married an Italian, from whom she was separated after losing much of her property.

EATON, Joseph Oriel, artist, b. in Licking county, Ohio, 8 Feb., 1829; d. in Yonkers, N. Y., 7 Feb., 1875. He was an effective genre and portrait painter, both in oil and water-colors. He was an associate of the National academy, and a member of the Society of painters in water-colors, and of the Artists' fund society. The works that he exhibited at the National academy are "Landscape View on the Hudson" (1868); "Moral Instruction" (1869); portraits of R. S. Gifford (1869) and of Rev. George H. Hepworth (1870); "Dawning Maternity" and "The Last Chapter" (1871); "The Greek Water-Carrier" (1872); and "The Lady Godiva." Among his water-colors are "Vision of the Cross" (1869); "Little Nell and her Grandfather" (1871); and "The Two Pets" (1874). In 1873 he travelled in Europe. His "Looking through the Kaleidoscope" and a portrait of himself were exhibited after his death. His most successful subjects in portrait-painting were children.

EATON, Samuel John Mills, clergyman, b. in Fairview, Erie co., Pa., 15 April, 1820. He was graduated at Jefferson in 1845, studied theology in the Western theological seminary, and entered the Presbyterian ministry in 1848. From that year till 1882 he was pastor in Franklin, Pa. He has held the offices of stated clerk of the presbytery of Erie since 1853; permanent clerk of synod of Allegheny from 1859 till 1870; stated clerk of synod of Erie from 1870 till 1881; trustee of Washington and Jefferson since 1879; and director of Western theological seminary since 1880. In 1871 he visited Egypt, Palestine, Greece, and Turkey. His publications are "Petroleum" (Philadelphia, 1866); "History of the Presbytery of Erie" (New York, 1868); "History of Venango County, Pa." (Franklin, 1876); "Lakeside" (Pittsburg, 1880); "Memorial of Cyrus Dickson, D. D." (New York, 1883); "Jerusalem" (1884); "Palestine" (1885); and "Memorial of Robert Lamberton" (Franklin, 1886). The degree of D. D. was conferred upon him by Washington and Jefferson in 1869.

EATON, Theophilus, governor of New Haven, b. in Stony Stratford, Oxfordshire, England, about 1591; d. in New Haven, Conn., 7 Jan., 1658. He was the son of a clergyman, and was educated for mercantile life. He was sent by the king of England as an agent to the court of Denmark, where he remained several years, and on his return to London became a merchant of high reputation. In 1637 he accompanied John Davenport's party to New England (see DAVENPORT, JOHN), and on his arrival in Massachusetts was chosen to be a magistrate. The Massachusetts planters made strong efforts to retain the party, who were gentlemen of wealth and character. The general court offered them whatever place they might choose, and the inhabitants of Newbury agreed to give up that town to them, but they determined to found a distinct colony. Accordingly, in the fall of 1637, Eaton, with a few friends, carefully explored the Connecticut coast, and finally selected a place called Quinnipiac, where in March, 1638, the colony was planted. In November, Eaton was one of those who contracted with the Indians for the sale of lands including what are now seven townships, the price being thirteen English coats. On 4 June, 1639, he was one of the "seven pillars" selected to form a government for the colony. He was chosen its first governor, and continued in the office till his death. Gov. Eaton was one of the commissioners that formed the "United colonies of New England" in May, 1643, and in 1646 he proposed to the Dutch governor, Kieft, to settle all differences with him by arbitration. On his arrival in New Haven, Eaton attempted to carry on his old mercantile pursuits, but soon abandoned them for agriculture. In person he was handsome and of commanding figure, and, although strict and severe in religious matters, he was affable and courteous.—His brother, **Samuel,** clergyman, b. in England about 1597; d. in Denton, Lancashire, England, 9 June, 1665, was educated at Magdalen college, Cambridge, receiving the degree of B. A. in 1624, and that of M. A. in 1628. Shortly after leaving the university he

took orders in the Church of England, but could not conscientiously conform to its usages, and came to New England with his brother Theophilus in 1637, becoming assistant pastor with John Davenport at New Haven. He differed from his colleague in respect to the principles of civil government, and returned to England in 1640, with the design of gathering a company to settle Toboket (afterward Branford), of which a grant had been made to him. After leaving New Haven he preached for some time in Boston, where an unsuccessful attempt was made to secure his services permanently. On reaching England he found such an improvement in the civil and ecclesiastical condition of the country that he remained there till his death, holding various pastorates. In 1662 he was silenced by the act of uniformity. His publications included "Defence of Sundry Positions and Scriptures alleged to justify the Congregational Way" (1645; second part, 1646); "The Mistery of God Incarnate" (1650); "Treatise of the Oath of Allegiance and Covenant" (1650); and "Human Life" in seventeen sermons (London, 1764).—Another brother, **Nathaniel,** educator, b. in England about 1609; d. in London after 1660, was educated at Franeker, in the Netherlands, and it is said that he entered the order of Jesuits. He came to New England with his brothers, and in 1637 was appointed first professor of the school (afterward Harvard college) that had been established by the legislature in the preceding year. Mather speaks of him as "a Blade who marvellously deceived the Expectation of Good Men concerning him, for he was One fitter to be Master of a Bridewell than a Colledge; and though his Avarice was notorious, yet his Cruelty was more Scandalous than his Avarice. He was a Rare Scholar himself, and he made many more such; but their Education truly was in the School of Tyrannus." His pupils complained of bad food and ill treatment, and in September, 1639, Eaton was fined 100 marks for beating his usher, Nathaniel Briscoe, "with a cudgel," and was removed from his post. He fled to Virginia, leaving debts amounting to £1,000, and was afterward excommunicated by the Cambridge churches. Winthrop says that "in Virginia he took upon him to be a minister, but was given up of God to extreme pride and sensuality, being usually drunken, as the custom is there." He returned to England in 1645, and after the restoration became a parish minister in Biddeford, Devonshire. He was afterward put into the King's bench prison for debt, "where," says Mather, "he did at length pay One Debt, namely, that unto Nature, by Death."

EATON, William, soldier, b. in Woodstock, Conn., 23 Feb., 1764; d. in Brimfield, Mass., 1 June, 1811. His father, a school-master and farmer, removed to Mansfield about 1774. At the age of sixteen the son entered the Revolutionary army, which he left in 1783, having attained to the rank of sergeant. He was graduated at Dartmouth in 1790, and in 1791 was chosen clerk of the house of delegates, where he remained until 1797. In that year he was appointed consul to Tunis, and arrived there in March, 1799. For several years he was engaged in a series of negotiations and altercations with the bey in reference to the annual payment of tribute money, and acted with a boldness and tact that secured to the commerce of his country an immunity from the attacks of Tunisan cruisers. He returned to the United States in 1803, and, after receiving the appointment of U. S. naval agent to the Barbary states, accompanied the American fleet to the Mediterranean in the summer of 1804. The reigning pacha of Tripoli, Jussuf Caramalli, had gained the throne by deposing his brother Hamet. On learning that the latter had taken refuge in Egypt, Eaton sought him out, and with the sanction of the government proposed to reinstate him. In the early part of 1805 he assembled a force of about 500 men, four fifths of whom were Arabs, the remainder being Greeks and a few Americans. After securing the cooperation of the United States squadron, this small army, under the command of Gen. Eaton, marched 600 miles across the Libyan desert to Derne, the capital of the richest province of Tripoli. On several occasions the mutinous disposition of the Arab sheiks and the irresolution of Hamet imperilled the safety of the few Christians belonging to the expedition, but the forces were finally brought to Bomba, where the "Argus" and "Hornet," under command of Isaac Hull, were in waiting. On 27 April, 1805, fire was opened upon the town and batteries. After a bombardment of an hour, which drove the enemy from their guns, the land force, numbering about 1,200, carried the works by storm, and Commander Hull raised the United States flag, which floated for the first time over a fortification on that side of the Atlantic. The guns were turned upon the town, which capitulated after a furious assault from the other side, in which Eaton was severely wounded. A few days later an army of several thousand Tripolitans, despatched by the bey, approached the town, and for several weeks sharp skirmishes took place between the opposing forces. At the moment when Eaton was preparing to fall upon Tripoli by a rapid march, intelligence arrived that Tobias Lear, the U. S. consul-general at Algiers, had negotiated with the reigning bey a treaty, among whose provisions was that $60,000 should be paid for the ransom of the American captives. Hamet retired to Syracuse, and the pacha retained custody of his wife and children. Eaton accused Col. Lear of treachery, and of betraying the interests of the government. On his return to the United States, Gen. Eaton was well received, and honorably mentioned in the president's message, but failed to obtain compensation from the government for his pecuniary losses, or such recognition as he expected. Massachusetts, "desirous to perpetuate a remembrance of heroic enterprise," granted him 10,000 acres of land, and in acknowledgment of his release of the Danish captives he was presented with a gold box by the king of Denmark. In 1806 Aaron Burr endeavored ineffectually to enlist Eaton in his conspiracy, and on his trial in Richmond the latter was one of the most important witnesses against him. Eaton's last years were spent in Brimfield, Mass., which town he represented in the legislature. See "Life of Gen. Eaton" by Festus Foster (Brookfield, 1813), and a memoir by President Cornelius C. Felton in Sparks's "American Biographies."—His son, **Nathaniel Johnson,** d. in Alton, Ill., 29 March, 1883, was graduated at the U. S. military academy in 1827,

but left the army in 1837, and was port warden of St. Louis, Mo., from 1850 till 1877.—William's first cousin, **Amos**, botanist, b. in Chatham, N. Y., 17 May, 1776; d. in Troy, N. Y., 6 May, 1842, was graduated at Williams in 1799, studied law under Elisha Williams and Joseah O. Hoffman, was admitted to the bar in 1802, and afterward became agent and surveyor of the Livingston estates on the Hudson river. He studied chemistry, mineralogy, and botany, in 1810 delivered at Catskill a popular course of lectures on botany, and began lecturing on the natural sciences at Williams college in 1817. His lectures were also delivered in several New England cities, and in 1818, by request of Gov. Clinton, were repeated before the legislature of New York. As a result of his suggestion at Albany, "The Natural History of New York" was published. In 1820 Gen. Stephen Van Rensselaer employed him to make a geological and agricultural survey of several counties and of the regions through which the Erie canal afterward passed, and it was the initiation of such surveys in this country, reports of which were published. Also in 1820 he was elected professor of natural history in the medical college at Castleton, Vt. When Van Rensselaer established the Polytechnic institute at Troy in 1824, Mr. Eaton became its principal and senior professor. He was author of numerous works, including an "Index to the Geology of the Northern States" (Albany, 1818); "Geological and Agricultural Survey of the District adjoining the Erie Canal" (1824); "The Philosophical Instructor" (1824); "Manual of the Botany of North America," the first popular text-book on that science published in the United States (1833); and a "Treatise on Engineering and Surveying" (New York),—His son, **Amos Beebe**, soldier, b. in Catskill, N. Y., 12 May, 1806; d. in New Haven, Conn., 21 Feb., 1877, was graduated at the U. S. military academy in 1826. He took part in the Seminole war, was appointed chief commissary of subsistence of Gen. Taylor's army at the beginning of the Mexican war, and was brevetted major after the battle of Buena Vista. He was depot purchasing commissary in New York from 1861 till 1864, when he was appointed commissary-general of the subsistence bureau in Washington, D. C. After being promoted successively to the rank of lieutenant-colonel, colonel, and brigadier-general, he was brevetted major-general in 1865, and was placed on the retired list in 1874.—Amos Beebe's son, **Daniel Cady,** botanist, b. at Fort Gratiot, Michigan, 12 Sept., 1834, was graduated at Yale in 1857, and studied botany at Harvard in 1860. He became professor of botany at Yale in 1864. He is the author of that part of Chapman's "Flora of the Southern States" (1860) that treats of ferns, and the corresponding part of "Gray's Manual" (5th ed., 1867), and has published "The Ferns of North America" (Boston, 1879–'80)), and various scientific papers.—Amos Beebe's nephew, **Daniel Cady,** b. in Johnstown, Fulton co., N. Y., 16 June, 1837, was educated at Göttingen gymnasium, Yale, where he was graduated in 1860, and the University of Berlin. He was professor of the history of art in Yale from 1869 till 1876, and is the author of a "Hand-Book of Greek and Roman Sculpture" (Boston, 3d ed., 1886), and numerous pamphlets on art and education, including one on "Yale College in 1883," published anonymously, which attracted much attention (New Haven, 1883).

EATON, William Wallace, senator, b. in Tolland, Conn., 11 Oct., 1816. He was educated by private tutors and in the public schools, studied law, and was admitted to the bar in 1837. He soon became prominent in local politics, was elected to the Connecticut house of representatives in 1847 and 1848, and to the state senate in 1850. Shortly afterward he removed to Hartford, and frequently represented that city in the legislature from 1853 till 1875. He was clerk of the superior and supreme courts of Tolland and Hartford counties, and for several years one of the judges of the Hartford city court. For four years he was a recorder of Hartford. During the civil war he was a pronounced "peace democrat." In 1875 he succeeded William A. Buckingham in the U. S. senate, and served till 1881. In 1883–'5 he was a representative in congress.

EATON, Wyatt, artist, b. in Phillipsburg, Canada, 6 May, 1849. After studying at the National academy, New York, and under Joseph O. Eaton, he was a pupil of Gérôme in Paris. In 1872 he studied and sketched in England and France. For several years his studio was in New York city, where he painted portraits and landscapes with figures. He was the first secretary of the Society of American artists. His works include "Farmer's Boy" (1870); "Reverie" (1875); "Harvesters at Rest" (1876); "Boy Whittling"; "Portrait of William Cullen Bryant" (1879); and "Grandmother and Child" (1880).

EBELING, Christoph Daniel, German scholar, b. near Hildesheim, Hanover, in 1741; d. in Hamburg, 30 June, 1817. He studied theology at Göttingen, but devoted himself to geographical studies, and held for thirty-three years the chair of history and Greek in the Hamburg gymnasium. He was also superintendent of the Hamburg library, and collected about 10,000 maps and nearly 4,000 books relating to America. His collection was bought by Israel Thorndike in the year after Ebeling's death, and given by him to Harvard. Ebeling's great work was a "Geography and History of North America" (5 vols., Hamburg, 1796–1816), forming a continuation of Büsching's "General Geography." He received a vote of thanks from the congress of the United States for this work.

EBERLE, John, physician, b. in Lancaster county, Pa., 10 Dec., 1787; d. in Lexington, Ky., 2 Feb., 1838. He studied medicine in Lancaster and Philadelphia, and was graduated at the University of Pennsylvania in 1809. He began to practise in Manheim, Pa., and, after living for a short time in Lancaster, accepted a commission as surgeon of militia, serving at the battle at Baltimore in 1814. He then removed to Philadelphia, where he was appointed physician to the poor. He was one of the founders of Jefferson medical college in 1822, and was given the chair of physic there in 1825, being transferred in 1830 to that of materia medica, and lecturing at the same time on obstetrics. He removed in 1831 to Cincinnati, where he held the professorship of materia medica in the Medical college of Ohio till 1837, and was next called to the chair of the practice of medicine in the medical department of Transylvania university, Lexington, Ky., where he continued till his death. He was a member of many medical and scientific societies. Dr. Eberle was one of the editors of the "Western Medical Gazette" and the "Ohio Medical Lyceum," as well as of the Philadelphia "Medical Recorder," which he conducted from 1818 till 1823. His works include "Botanical Terminology" (1818); "Treatise on the Diseases and Physical Education of Children" (Philadelphia, 1819); "Treatise on Therapeutics and Materia Medica" (2 vols., 1822; 5th ed., 1847); and "Notes of Lectures on the Theory and Practice of Medicine" (2 vols., 1844). Some of these works have been translated into German.

ECCLES, Henry, Canadian lawyer, b. in Bath, England, in 1817; d. in Toronto, 22 Nov., 1863. He was educated in Canada by his father, a retired British officer, studied law, and was called to the bar in 1842. He was elected a bencher of the Law society in 1853, and appointed queen's counsel in 1856. He became very prominent in his profession, was noted for the clearness and simplicity of his style, and was also famous for his power of extorting the truth from witnesses.

ECCLESON, Samuel, R. C. archbishop, b. in Kent county, Md., in 1801; d. in Georgetown, D. C., in 1851. He entered St. Mary's college, Baltimore, and while there became a Roman Catholic. Pursuing his studies in the theological seminary there, he was ordained in 1825, and afterward took a course in the Ecclesiastical college of Issy, near Paris. On his return he successively filled the offices of vice-president and president of St. Mary's college. In 1834 he was consecrated coadjutor archbishop of Baltimore, and succeeded Archbishop Whitfield in the same year. Several new academies for the education of girls were built under his care and placed in charge of the nuns of the Visitation, and the Christian Brothers established a novitiate and training-school of their order under his auspices. Parochial schools were multiplied and placed under the care of the Brothers of St. Patrick, and German parishes were organized under the direction of the Redemptorists. Dr. Eccleson founded the College of St. Charles in 1850, and shortly afterward introduced the Lazarists into his diocese. He presided over five provincial councils, and took the initiative in important legislation, including the law passed by the council of 1840, providing for the transmission of church property from a bishop to his successor, and that of 1843, excommunicating Roman Catholics who should marry after being divorced by the state. During the exile of Pius IX. in 1849 he was invited by Archbishop Eccleson to visit Baltimore and preside over the provincial council.

ECHAVE, Baltasar de (ay-chah'-vay), Spanish-Mexican artist, b. in Zumaya, Guipuzcoa, Spain, in the latter part of the 16th century; d. in Mexico about the middle of the 17th century. He is generally called Echave the elder, as there was another painter of the same name, supposed to have been his son. He came, when very young, to the New World, and, although he had probably begun his artistic studies in Spain, he finished them in Mexico. In the "Profesa" church of Mexico there are several excellent paintings of his, including "Saint Isabel of Portugal," but his best paintings are in the National academy of San Carlos. Among these last, which recall the manner of Guercino, are "The Visitation," "The Adoration of the Three Magicians," and the "Adoration in the Garden." The latter has been compared by some artists to the best productions of Overbeck, especially as regards correct composition. In Santiago Tlaltelolco there were fifteen altar panels on wood by him, dated 1608, some of them very good, but far inferior to those at the Profesa. He also painted some smaller pictures, the best representing the conversation of Saint Antonio Abad with Saint Paul, the first hermit, which, besides the merits of the larger paintings, has an extraordinary delicacy of execution. All his works are more notable for correctness of design than for richness of color, but generally his later works, painted in 1620–'30, are far superior to his earlier pictures, dated from 1603 to 1619. Echave was also notable as a philologist and author. His best-known work is a treatise on the origin of the Biscayan language, "Antigüedad de la lengua de Cantábria," which has been favorably noticed by the learned Larrumendi and Astarloa (Mexico, 1607).

ECHEANDÍA, Manuel (ay-chay-an-de'-ah), South American statesman, b. in Guaranda, Ecuador, in 1783; d. in Caracas, Venezuela, in 1850. He went to Spain in 1789 and entered the College of Vergara. He became clerk in the royal treasury at Caracas in 1800, and by successive promotions rose to chief clerk in 1810, but resigned in that year to join the revolutionists. He served the republic in many important positions till 1814, when he was comptroller of the treasury. The disasters of that year obliged him to emigrate with the army, and he served in the battles which followed. He became captain of the guard of Cartagena, and afterward adjutant-major. In 1815 the republicans were obliged to surrender Cartagena, and Echeandia went to the West Indies to join the expedition preparing to invade Venezuela. He arrived too late, but followed with supplies in 1816. Hearing of the disasters which had befallen the invaders, he stopped at the island of Curazao, where he suffered from a long sickness and the privations of extreme poverty, the Spaniards having confiscated his possessions in Venezuela. He rejoined the republican army in Guayana in 1818, was made commissary-general, and accompanied the army of Bolivar in the victorious campaign of 1819, becoming quartermaster and afterward colonel. He took an active part in the organization of the treasury of Venezuela in 1830, and in the passage of fiscal laws. In 1842 the government accorded him a pension in consideration of his important services.

ECHENIQUE, José Rufino (ay-chay-ne'-kay), Peruvian soldier, b. in Puno, Peru, 8 Feb., 1808; d. in Arequipa, 18 Oct., 1879. He entered the Peruvian army as a cadet in 1821, took part in the campaign of Intermedios in 1823, and fought at the battle of Cochabamba, where he was taken prisoner and sent to the island of Esteves, in Lake Titicaca. After the battle of Ayacucho, 9 Dec., 1824, he was set at liberty, rejoined his battalion, and in daily battles contributed to the pacification of Punas de Iquicha, which was held by the royalists. He twice fought against the fortresses of Callao, which rebelled on 14 Nov., 1830, and on 15 Jan., 1831, he retreated to the Andes and occupied Cerro Pasco. In March of the same year Echenique fought at Junin against Gen. Miller, and on 30 Jan. defended the bridge of Jobero with fourteen followers against 100 men under the same general. He was promoted colonel on 30 April, 1832. When Gen. Santa Cruz occupied Peru in 1835, Echenique refused to join him; but in 1846, during the administration of Vivanco, he again entered the army, and was appointed commander-in-chief of Lima. In that year the civil war was devastating the country, and Echenique left Lima at the head of a small army, with which he occupied Junin and Ayacucho, and later, together with Gen. Castillo, checked the second revolution headed by Domingo Elias, whom they forced to submit. On 14 Dec., 1846, Echenique was promoted general. He was elected deputy, senator, and counsellor of state, and from 1846 till 1851 was vice-president of the republic. He was elected president in 1852. During his administration he fostered the material as well as the moral progress and development of his country. In 1853 he established the navigation of the upper Amazon, which proved beneficial to the towns along its course. In 1854, Elias and Castillo revolted against him, and he was defeated in the struggle that followed, afterward going abroad, where he remained for seven years. He returned

to Peru in 1862, and in 1864 was elected to congress. He was president of the lower house, afterward senator, and twice president of the latter body. On May 2, 1866, he took part in the combat of Callao against the Spanish squadron. Gen. Echenique was decorated with several foreign orders.—His son, **Juan Martin,** b. in Lima in 1841, was educated in Spain, and since 1859 he has taken active part in the politics of Peru. When in 1864 the Spanish fleet took the Chinchas islands, although seriously ill, he sailed from Europe to offer his services to his country, and at his request was placed on board of a Peruvian ship, where he remained till the Vivanco-Pareja treaty. When Gen. Pezet's government was overthrown and war against Spain declared, Echenique again entered the service as captain, embarking in the sloop-of-war "Union," and took part in the campaign of Chiloe and the combat of Abtao. Soon afterward he was sent to Europe to witness the Austro-Prussian war. He was one of the principal authors of the project to abolish the sale of guano on consignment, and was sent as an agent by his government to Europe in 1869, where he negotiated the Dreyfus treaty. He has lately dedicated himself exclusively to economic studies, and holds a prominent place among the statesmen of his country.

ECHEVERRÍA, Estéban (ay-tche-ver-re'-ah), South American poet, b. in Buenos Ayres, Argentine Republic, in 1809; d. in Montevideo, Uruguay, in 1851. He began publishing poems at the age of twenty, spent some time in study in France, and, on his return to his native land, issued "Elvira ó la novia del Plata," which was unworthy of his talent and not well received. He afterward published a volume of short poems entitled "Consuelos" (1834), which established his reputation as a poet. He wrote several poems narrating the heroic deeds of those who risked their lives in defending their country against the tyrant Rosas, and in consequence was obliged to go into exile. His best-known works are "La Cautiva," containing exquisite descriptions of the pampas and the Argentine people, and "Rimas" (1837); "La Guitarra," "Angel caído," "Avellaneda," and "La insurrección del-Sud" (Montevideo, 1849).

ECHEVERRÍA, Manuel Mariano, South American missionary, b. at Quito about 1730; d. there in the latter part of the 18th century. In 1767 he was appointed superior of the missions of Mainas and those on the banks of the Marañon, and on 2 Jan., 1768, at the head of twenty-eight priests, he set out for his post. He worked with ardor, and did much to improve the moral and material condition of the wild Indian tribes. On his return from the missions he was appointed prebendary to the Cathedral of Quito, but died soon after. Echeverria wrote "Descripción de Mainas" (1784), a work which has remained unedited, but is valuable for the information it contains about the villages of the province of Mainas, including Napo and Canelos, the number of their inhabitants, their exact positions, and their natural and industrial products.

ECKARD, James Read, missionary, b. in Philadelphia, Pa., 22 Nov., 1805. He was graduated from the University of Pennsylvania in 1823, and practised law in 1826–'30, was a director of public schools in Philadelphia in 1828, but afterward studied for the ministry and was ordained as a Presbyterian evangelist on 21 July, 1833. He was a missionary in the island of Ceylon, residence in Jaffna, 1833–'5, in Madura, Hindostan, 1835–'6, again in Jaffna from 1836 till 1843, agent of the American board in Georgia in 1844, missionary and principal of the Chatham academy, Savannah, Ga., in 1844–'6, pastor of a Presbyterian church in Washington, D. C., in 1848–'58, and at Asbury, N. J., in 1860–'7. From 1858 till 1872 he was professor of rhetoric and history in Lafayette college, Pennsylvania. When in Ceylon, Dr. Eckard published, in the Tamil language, an essay on "Faith and Justification" (Jaffna, Ceylon, 1834), also, in English and Tamil, the "Hindoo Traveller" (Jaffna, 1836), designed for natives educated to read English. On his return he issued a narrative of some of the missionary operations in India (Philadelphia, 1844), and "An Outline of English Law from Blackstone." He received the degree of D. D. from Lafayette college, Easton, Pa.—His wife, **Margaret Esther Bayard,** b. on Cumberland Island, Ga., 18 Oct., 1810; d. in Sumter county, S. C., 29 Feb., 1872. She was second directress of the Washington, D. C., Protestant orphan asylum in 1858, and gave her husband much assistance in his missionary work in Ceylon and Madura, Hindostan.

ECKERT, Thomas Thompson, telegrapher, b. in St. Clairsville, Ohio, 23 April, 1825. In 1849 he was appointed postmaster at Wooster, Ohio, and as he had learned telegraphy, the wires were brought into his office. In 1852 he supervised the construction of the telegraph line between Pittsburg and Chicago, over the Fort Wayne route, and was offered the superintendency. When the lines under his management were made a part of the Western Union telegraph company, his jurisdiction became largely extended. In 1859 he left this to superintend the affairs of a gold-mining company in Montgomery county, N. C., where he remained until the civil war began, when he removed to Cincinnati. He was called to take charge of the military telegraph office at the headquarters of Gen. McClellan, and in 1862 accompanied that officer to the peninsula as superintendent of the military telegraph, Department of the Potomac, with the rank of captain and assistant quartermaster. In September he was called to Washington to establish the military telegraph headquarters in the war department buildings, and was promoted to the rank of major. From this time till the close of the war he was on intimate terms with President Lincoln and Sec. Stanton. In 1864 he was brevetted lieutenant-colonel, and afterward brigadier-general. The same year he was appointed assistant secretary of war, retaining the office till 1866, when he resigned and became general superintendent of the eastern division of the lines of the Western Union telegraph company. In 1875 he became president of the Atlantic and Pacific telegraph company, and in 1880 president of the American Union telegraph company. On the consolidation of these companies with the Western Union telegraph company, in 1881, he returned to the service of the latter company as vice-president and general manager.

ECKFELDT, Jacob R., assayer, b. in Philadelphia, Pa., in 1802; d. there, 9 Aug., 1872. He early entered the U. S. mint, where his father held the office of chief coiner, and by his capabilities rapidly rose until he was made chief assayer. During his term of office some English sovereigns were sent to the mint for recoinage, and they were reported by him as below the standard claimed. This was confidently denied by the English authorities, who said, "It is impossible; the London mint makes no mistakes." Mr. Eckfeldt maintained that he was right, and subsequently an investigation showed that he was. The excitement in monetary circles that followed resulted in a parliamen-

tary law ordering the closest possible examination of the weight and fineness of all the coins in the world. It was found that those of the United States were more uniform than the coins of other nations, and thenceforth Mr. Eckfeldt's reputation as an assayer was world-wide. The office to which he was appointed during Andrew Jackson's presidency he held until his death.

ECKFORD, Henry, naval architect, b. in Irvine, Scotland, 12 March, 1775; d. in Constantinople, 12 Nov., 1832. In his sixteenth year he was placed with a naval constructor at Quebec, and in 1796 removed to New York, where he introduced important changes in the art of ship-building, and took the lead in this business, his vessels proving superior in strength and speed. In the second war with Great Britain, 1812–'15, he was employed by the government to construct ships-of-war on the lakes, and filled the contract with expedition and skill. After the war he built the steamer "Robert Fulton," which, in 1822, made the first successful voyage by steam to New Orleans and Havana. When afterward rigged into a sailing-vessel she became the fastest and most efficient sloop-of-war in the Brazilian navy. Mr. Eckford was appointed naval constructor at Brooklyn in 1820. Six ships-of-the-line, of which the "Ohio" was the first, were built after his models. The "Ohio," which was one of the old line-of-battle ships, was in her day one of the finest in the world, and Mr. Eckford distinguished himself in designing and building these ships-of-war. The "Ohio" was three times in special government service; twice a flag-ship; and, finally, as a receiving-ship in Boston in 1850, was the scene of many brilliant festive occasions, being visited by thousands from all parts of the world. He left the government service in consequence of disagreement between the naval commissioners, and began building war-vessels for European and South American powers. President Jackson requested him to submit a plan for the reorganization of the navy, which he did, and he was about to establish a professorship of naval architecture for Columbia college, by giving $20,000 to it, having engaged the first professor, when a disastrous affair swept away his large fortune. In 1831 he built a sloop-of-war for Sultan Mahmoud, of the Ottoman empire, and was solicited to enter his service as chief naval constructor for the empire. This led him to visit Turkey, where he established a navy-yard, and there died. Mr. Eckford's house in "Love Lane," now West 26th street, New York, was the resort of the friends and poets Halleck and Drake and Dr. De Kay, two of whom became his sons-in-law. He was a man greatly beloved for a character both forceful and beautiful.

ECKLEY, Joseph, clergyman, b. in England in 1750; d. in the United States in 1811. He was graduated at Princeton in 1772, and ordained pastor of the Old South church, Boston, in 1779. He was an original member of the Society for propagating the gospel among the Indians in 1787, and was for many years one of the Boston association of ministers of Congregational churches when they formed only one association. In 1806 he delivered the Dudleian lecture, which was published. He also published several sermons between 1782 and 1810. The degree of D. D. was conferred upon him by Princeton in 1793.

ECKMAN, Julius, journalist, b. in Rawicz, Prussia, in 1805; d. in San Francisco, Cal., 5 July, 1874. He studied at Berlin, and, after teaching for a few years, came to Mobile, Ala., in 1846. Subsequently he officiated in New Orleans, Charleston, San Francisco, and Portland, Oregon. Dr. Eckman established the "Gleaner" (now the "Hebrew Observer") in San Francisco, and worked zealously to arouse the religious sentiment of the community. He belonged to the strict conservative school, and was noted for his scholarship.

EDDIS, William, loyalist, b. in England about 1745. He came to this country in 1769, and settled at Annapolis, under the protection of Sir Robert Eden, governor of Maryland. He held the office of surveyor of customs, and was intimately acquainted with prominent men of all parties "until the unfortunate misunderstanding which arose between the parent state and the colonies rendered it impossible for every one like him, sincerely and steadily attached to the former, to continue in the country." On 4 June, 1776, Eddis, with others, was summoned to appear before the patriot "committee of observation," and on 11 June, refusing to give bonds for his conduct, he was ordered to leave the country before 1 Aug. He was allowed to remain and hold his office, however, till April, 1777, when he made his way to a British man-of-war and returned to England. He published an interesting collection of his "Letters from America" (London, 1792).

EDDY, Ansel Doan, clergyman, b. in Williamstown, Mass., 15 Oct., 1798; d. in Lansingburg, N. Y., 7 Feb., 1875. He was graduated at Union in 1817, at Andover theological seminary in 1822, and held pastorates at Canandaigua, N. Y., Newark, N. J., where he organized the Park Presbyterian church, Chicago, Wilmington, Ill., and Seneca Falls, N. Y. From 1865 till 1870 he was agent of the American and foreign Christian union at Lansingburg, N. Y. He published "The Christian Citizen" (New York) and "Addresses on the Duties, Dangers, and Securities of Youth" (1836).

EDDY, Daniel Clarke, clergyman, b. in Salem, Mass., 21 May, 1823. He was graduated at New Hampton theological institution, N. H., in 1845, and in January, 1846, was ordained to the ministry as pastor of the 1st Baptist church, Lowell, Mass., in which relation he continued for ten years. In 1850 he made a visit to Europe. In 1854 he was elected by the American or "know-nothing" party to a seat in the Massachusetts legislature, and on the organization of the house was chosen, quite unexpectedly to himself, to be its speaker. In 1856 he resigned the charge of the church in Lowell, and in the interval between that year and the present has been pastor in Boston, Fall River, Philadelphia, and Brooklyn. In 1881 he removed to the last-named place, where he is now (1887) pastor of a Baptist church. In 1861 he again went abroad, extending his trip to Palestine and Turkey. Madison university conferred upon him the degree of D. D. in 1856. Dr. Eddy has published "Young Man's Friend" (1st series, Lowell, 1849; 2d series, Boston, 1859); "The Burman Apostle" (Lowell, 1850); "Europa," a book of words (1851); "The Percy Family" (5 vols., 1852); "Walter's Tour in the East" (6 vols., Boston, 1861); "Hero-

ines of the Missionary Enterprise" (1854); "Angel Whispers" (Lowell, 1853); "City Side" (1854); "Young Woman's Friend" (1855); and "Waiting at the Cross" (Boston, 1859).

EDDY, Edward, actor, b. in Troy, N. Y., in 1821; d. in Kingston, Jamaica, 19 Dec., 1875. He made his first appearance in Albany, then played in Baltimore, and in 1847–'8 in Boston. He came to New York in 1851, and was successively manager of the Metropolitan theatre, Burton's Chambers street theatre, the Old Bowery, and the old Broadway theatre. The last performance in this building, on 12 April, 1859, was for his benefit. Although he aspired to personate leading characters, Mr. Eddy did not succeed in impressing his audiences favorably. His best efforts were in melodrama, and in such Shakespearean parts as Laertes, Edgar, and Macduff.—His wife, **Mary Mathews,** b. in England; d. in New Orleans, La., in 1865, was also on the stage, but retired after her marriage.

EDDY, Ezra Butler, Canadian capitalist, b. near Bristol, Vt., 22 Aug., 1827. He was educated at the public school, and when fifteen years of age went to New York, where he secured employment with a merchant. After a year he returned to Vermont, and in 1851 engaged in the manufacture of friction matches at Burlington. In 1854 he removed to Hull, opposite Ottawa, Canada, and there began the manufacture of matches, adding thereto, in 1856, the manufacture of articles of wooden ware. In 1858 he added lumbering to his other enterprises, and the yearly amount of this business is now (1887) nearly $2,000,000. Mr. Eddy was elected to the Quebec legislature in 1861, and was a representative for four years. When the Ottawa ladies' college was established he was made its president, and held that office for several years.

EDDY, Henry Turner, mathematician, b. in Stoughton, Mass., 9 June, 1844. He was graduated at Yale in 1867, receiving the mathematical medal in his senior year, and then followed the engineering course in Sheffield scientific school, where he held the office of instructor in field-work in engineering. In 1868 he received the appointment of instructor in mathematics and Latin in the University of East Tennessee, at Knoxville, and in 1869 he became assistant professor of mathematics and civil engineering in Cornell, where he received the degrees of C. E. and Ph. D. for advanced studies in pure and applied mathematics. After holding the office of associate professor in mathematics in Princeton for a year, he was called in 1874 to fill a similar chair in the University of Cincinnati, and was appointed dean of the faculty in 1874–'7 and 1884–'5. The year 1879–'80 he spent in study abroad. Dr. Eddy is a member of scientific societies, and was vice-president of the American association for the advancement of science, of the section on mathematics and astronomy in 1884. He has contributed numerous papers to scientific and technical journals, and has published "Analytical Geometry" (Philadelphia, 1874); "Researches in Graphic Statics" (New York, 1878); "Thermodynamics" (1879); and "Neue Constructionen aus der graphischen Statik" (Leipsic, 1880).

EDDY, Hiram Clarence, musician, b. in Greenfield, Mass., 23 June, 1851. At the age of seven he began his musical education, and at fourteen filled a place as organist. When sixteen he went to Hartford, Conn., where he studied with Dudley Buck, and at the age of seventeen became organist of Bethany church, Montpelier, Vt. Here he remained about two years and a half, teaching and devoting all his leisure time to his studies. In 1871 he went to Berlin, where he studied the piano under Loeschhorn and the organ under Haupt. After making a concert tour through Saxony, Austria, and Switzerland, playing in all the principal churches, he was invited in Berlin to play before the emperor and many of the nobility. Passing through England on his way home, he stopped in London, playing in the Royal Albert hall and in St. Paul's cathedral. On his return from Europe, Mr. Eddy became organist of the 1st Congregational church in Chicago. In 1876 Mr. Eddy became general director of the Hershey school of musical art in Chicago. In the spring of 1877 the music-hall connected with the school was finished, capable of seating 1,000 persons, and here, upon a fine three-manual concert organ, Mr. Eddy began a series of recitals unique in the history of organ music. They will number, when completed, 100, and will embrace all the greatest works for the organ, of both ancient and modern authors. Mr. Eddy played at the Centennial exposition at Philadelphia, and in different parts of the country, giving concerts and exhibiting many new organs. Among his most notable publications are a prelude and fugue in A minor; a set of organ variations on the tune of "Greenville," both displaying a profound knowledge of counterpoint; an English translation of Haupt's "Theory of Counterpoint and Fugue"; and several compositions for the organ.

EDDY, John H., geographer, b. in New York in 1782; d. 22 Dec., 1817. He published a circular map of the country for thirty miles around New York (1814); a map of the western part of New York; a map to illustrate the communication between lake Erie and the Hudson; and a map of the state of New York; and was engaged on a general atlas of America at the time of his death.

EDDY, Norman, congressman, b. in Scipio, Cayuga co., N. Y., 10 Dec., 1810; d. in Indianapolis, Ind., 28 Jan., 1872. He was graduated in medicine at the University of Pennsylvania in 1835, and removed in 1836 to Mishawaka, Ind., where he practised for several years, but finally gave up his profession for that of the law, and was admitted to the bar in April, 1847, removing to South Bend, Ind., in the same year. He was elected state senator on the Democratic ticket in 1850, and in 1852 was elected to congress over Schuyler Colfax, but was defeated by him in 1854. President Pierce appointed Mr. Eddy district attorney for Minnesota in 1855, and in 1856–'7 he was commissioner of the Indian trust lands in Kansas. In the autumn of 1861 he organized the 48th Indiana regiment, was commissioned its colonel, and continued in command till July, 1863, when he resigned because of disability resulting from wounds received in the battle of Iuka, Miss. In that engagement the 48th lost 119 killed or wounded out of 420 that entered the fight. Col. Eddy was appointed collector of internal revenue by President Johnson in 1865, and in 1870 was elected secretary of state of Indiana, which office he held till his sudden death from heart disease.

EDDY, Richard, author, b. in Providence, R. I., 21 June, 1828. He was apprenticed to a bookbinder at the age of fifteen, but in 1848 went to Clinton, N. Y., where he studied theology and became a Universalist minister. He had pastorates in Rome and Buffalo, N. Y., Philadelphia, Pa., and Canton, N. Y., and in 1861–'3 was chaplain of the 60th New York regiment. He was librarian of the Pennsylvania historical society in 1864–'8, and then held pastorates in Franklin and Gloucester, Mass., Akron, Ohio, and Melrose, Mass., where he went in 1881. Since 1878 he has been president of the

Universalist historical society, and Tufts college gave him the degree of S. T. D. in 1881. In July, 1886, he became editor of the "Universalist Quarterly." Dr. Eddy has published a "History of the 60th Regiment, New York State Volunteers" (Philadelphia, 1864); "Universalism in America, a History" (2 vols., Boston, 1884–'6); and several sermons, including three on President Lincoln, with the title "The Martyr to Liberty" (1865). He has in press "Alcohol in History."

EDDY, Samuel, jurist, b. in Johnston, R. I., 31 March, 1769; d. in Providence, R. I., 2 Feb., 1839. He was graduated at Brown in 1787, and studied law, but was not long in active practice. He was clerk of the Rhode Island supreme court in 1790–'3, secretary of state in 1798–1819, and in the latter year was elected to congress as a Democrat without opposition, serving three terms till 1825. He was chief justice of the state supreme court in 1827–'35. Brown gave him the degree of LL. D. in 1801. Judge Eddy contributed to the collections of the Massachusetts historical society, and published "Reasons for My Opinions" (Providence, 1818).

EDDY, Thomas, philanthropist, b. in Philadelphia, Pa., 5 Sept., 1758; d. in New York city, 16 Sept., 1827. His parents, who were Friends, emigrated from Ireland about 1753. Thomas received a limited education, and in his thirteenth year was apprenticed to a tanner, but remained with him only two years. On 4 Sept., 1779, he went to New York, being resolved to become a merchant, though his possessions only amounted to ninety-six dollars, and he was totally ignorant of business. He began by buying small quantities of goods at auction, and soon established a trade, but failed in 1784 through an unfortunate speculation, and about 1790 entered the insurance business, in which he made a large fortune. In 1796, with Philip Schuyler and Ambrose Spencer, he prepared a bill for establishing a penitentiary system, which was passed. Mr. Eddy had sole charge of the erection of the first building, and served as its director for four years, substituting cleanliness and discipline for former abuses. To Mr. Eddy is due the plan of providing a separate cell for each convict, instead of confining several together. He was chosen one of the governors of the New York hospital in 1793, induced the legislature to make liberal grants in its aid, and in 1815 was one of the founders of the Bloomingdale insane asylum. In 1793, with John Murray, he was appointed by the society of Friends to visit the Indians in New York state, and did much to improve their condition. He labored earnestly for the construction of the Erie canal, being second only to De Witt Clinton in his efforts, and was also one of the originators of the New York savings bank and the New York Bible society. His labors in these various directions earned for him the title of the "American Howard." He published a work on the "State Prison of New York" (1801). See "Life of Thomas Eddy" by Samuel L. Knapp (New York, 1834).

EDDY, Thomas Mears, clergyman, b. in Newtown, Hamilton co., Ohio, 7 Sept., 1823; d. in New York city, 7 Oct., 1874. He was educated in Greensborough, Ind., classical seminary, and in 1842–'53 was a Methodist circuit preacher in that state. He was agent of the American Bible society in the latter year, and presiding elder of the Indianapolis district till 1856, when he was appointed editor of the "Northwestern Christian Advocate" in Chicago. He retained this post till 1868, and, after holding pastorates in Baltimore and Washington, was elected one of the corresponding secretaries of the missionary society by the general conference of 1872, of which he was a member. Dr. Eddy was a copious writer for the press, and, besides occasional sermons, published "Patriotism of Illinois," a history of the state during the civil war (2 vols., Chicago, 1865).

EDDY, Zachary, clergyman, b. in Stockbridge, Vt., 19 Dec., 1815. He was educated by private tutors, ordained as a minister of the Cumberland Presbyterian church in 1835, and was for several years a home missionary in western New York and Wisconsin. He was pastor of Congregational churches in Warsaw, N. Y., in 1850–'5, and Northampton, Mass., in 1857–'67, of the Brooklyn Heights Dutch Reformed church in 1867–'71, and afterward of Congregational churches in Chelsea, Mass., Detroit, Mich., and Augusta, Ga., where he is at present (1887). Williams gave him the degree of D. D. in 1860. Dr. Eddy has published "Immanuel, or the Life of Jesus Christ" (Springfield, Mass., 1868); and was the principal compiler of "Hymns of the Church" (1869), and joint editor of "Carmina Sanctorum" (New York, 1884).

EDEN, Charles, governor of North Carolina, b. in 1673; d. in North Carolina, 17 March, 1722. He was appointed governor on 13 July, 1713, and his administration was marked by the arrest of the pirate Edward Teach, called "Black-Beard." Eden had offered Teach the royal pardon if he would give himself up, whereupon he surrendered with twenty of his followers, and for a time occupied himself as a good citizen, but soon returned to his old habits. Eden was even suspected of an intimacy with him, and Edward Mosely, a prominent colonist, declared that the governor could raise an armed posse to arrest honest men, but could not raise a similar force to apprehend Teach. For his accusations, Mosely was arrested, fined £100, and debarred from holding office for three years; and in 1719 the governor gave to the council a full account of his dealings with the pirate, which was approved by them. An expedition against Teach was finally sent out by the government of Virginia, and the pirate was killed in a hand-to-hand combat with its commander, Lieut. Maynard. In 1720 the town of Edenton was named for the governor. His tombstone, which stands on Salmon creek, Bertie co., N. C., bears an inscription to the effect that "He brought the country into a flourishing condition, and died much lamented."

EDEN, Sir **Robert,** governor of Maryland, b. in Durham, England; d. in Annapolis, Md., 2 Sept., 1786. He was the second son of Sir Robert Eden, Bart., and succeeded Horatio Sharpe as royal governor of Maryland in 1768. He was more disposed to moderation than any of the other British officers, advised the repeal of the tax on tea, and, when the colonels of militia demanded the arms and ammunition of the province, readily gave them up. His course had much to do with the attitude of the Maryland patriots, who hoped and labored for conciliation long after the other colonies had given up all idea of it. Eden was allowed to remain undisturbed in Maryland after his authority had ceased, till in April, 1776, despatches were intercepted addressed to him by Lord George Germain, which implicated him in transactions hostile to the liberty of the country. These were sent by Gen. Charles Lee to congress, and he also ordered the Baltimore committee of safety to arrest Eden, which order was presently confirmed by congress. Its execution, however, was prevented by the provincial council of safety at Annapolis, and the governor was allowed to embark for England, where he was created a baronet on 19

Sept., 1776. He had married Caroline Calvert, sister and co-heir of the last Lord Baltimore, and died while on a visit to Maryland in 1784 "to look after his lady's estate," which he was entitled to by the treaty of 1783.—His grandson, Sir **Frederick,** an officer in the British army, fell at New Orleans, 24 Dec., 1814.—Sir Robert's brother, **William,** Lord Auckland, b. in 1744; d. 28 May, 1814, studied law and became a barrister. He was at different times secretary of state for Ireland, privy councillor and ambassador to France, Spain, and Holland, and in 1789 was made an Irish peer, with the title of Baron Auckland. He received the same title in the English peerage in 1793. He was one of the lords of trade and plantations in 1776, and one of the three commissioners sent by Lord North in 1788 to treat with the Americans.

EDES, Benjamin, journalist, b. in Charlestown, Mass., 14 Oct., 1732; d. in Boston, 11 Dec., 1803. His great-grandfather John came from England to Charlestown, Mass., about 1674. Benjamin was educated in the public schools of Charlestown, and in 1755 he became, with John Gill, editor and proprietor of "The Boston Gazette and Country Journal," a patriotic sheet that exerted a powerful influence just before the Revolution and during that struggle. In its columns first appeared John Adams's "Novanglus" letters, and Quincy, Warren, and other patriots were among its contributors. Mr. Edes, as one of the "Sons of liberty," took an active part in the politics of his time, and was a caustic writer on the political questions of the day. In his house the patriots comprising the "Boston tea-party" assembled on the afternoon of 16 Dec., 1773, and drank punch from a bowl that was subsequently given by Mr. Edes's family to the Massachusetts historical society, afterward disguising themselves as Indians in the "Gazette" office. During the siege of Boston, Mr. Edes escaped to Watertown, where he continued the publication of the "Gazette." After forty-three years of editorship he discontinued it in 1798. Andrew Oliver, writing to England in 1768, says, referring to the "Gazette": "The temper of the people may be surely learned from that infamous paper": while Gov. Bernard, in one of his letters to the Earl of Hillsborough, advised the arrest of both Edes and Gill as publishers of sedition. At the beginning of the war Mr. Edes possessed a comfortable fortune, but afterward lost it by the depreciation of the currency. —His son, **Peter,** b. in Boston, 17 Dec., 1756; d. in Bangor, Me., 30 March, 1840, was educated at the Boston Latin-school. Two days after the battle of Bunker Hill, when in his nineteenth year, he was arrested by Gen. Gage on the charge of "having fire-arms concealed in his house," and confined in Boston jail one hundred and seven days, in the same room with "Master" James Lovell of the Latin-school and "Master" John Leach. Mr. Edes was afterward in business in Boston, and Newport, R. I., but removed in 1796 to Augusta, Me., where in 1797 he published the "Kennebeck Intelligencer." He afterward lived in Hallowell, Me., and finally settled in Bangor, Me., where he died. He published an edition of the "Fifth of March Orations," with a preface addressed to the people of Boston (1785), and an oration on Washington (Hallowell, Me., 1800). His journal, kept during his imprisonment, containing a list of the prisoners taken at Bunker Hill, was published by one of his descendants (Bangor, Me., 1837). An interesting letter from Mr. Edes to his grandson about the "Boston tea-party" appears in the "Proceedings of the Massachusetts Historical Society" (December, 1871).

EDES, Henry Herbert, great-great-grandson of Benjamin's brother Thomas, merchant, b. in Charlestown, Mass., 29 March, 1849. He was educated at the grammar and high schools of his native town, and in 1865 entered mercantile life in Boston, in which he has since continued. He became assistant treasurer of the "New England historic genealogical society" in 1869, and since 1873 has been a member of its publication committee. He is also a fellow of the American antiquarian society. Mr. Edes has been a member of the executive committee of the Boston civil-service reform association since 1881, and of the Massachusetts reform club since 1885; and since 1869 has been arranging the Charlestown archives (1629–1847), which when complete will fill about 120 volumes. He has in manuscript a "Genealogy of the Edes Family," and is the author of "History of the Harvard Church at Charlestown, 1815–'79" (Boston, 1879), besides many historical books and pamphlets, including "Connecticut Colonial Documents," a reprint of papers contributed by him to the "New England Historical and Genealogical Register" in 1868–'71 (privately printed); "Memorial of Josiah Barker, of Charlestown" (privately printed, Boston, 1871); "Charlestown's Historic Points" (1875). He also edited and wrote the introduction to Wyman's "Genealogies and Estates of Charlestown" (Boston, 1879); and contributed three chapters on Charlestown to "The Memorial History of Boston" (Boston, 1880–'1).

EDES, Richard Sullivan, clergyman, b. in Providence, R. I., 24 April, 1810; d. in Boston, Mass., 26 Aug., 1877. He was sixth in descent from John Edes. He was graduated at Brown in 1830, and at Harvard divinity-school in 1834, and held various Unitarian pastorates, the last in Boston, Mass., retiring from the ministry in a few years. He was active in public affairs, and took special interest in educational matters. Besides numerous discourses and addresses, he published a memoir of Peter Edes in the "New England Historical and Genealogical Register" (1862); "Journal and Letters relative to Two Journeys to the Ohio Country in 1788 and 1789 made by Col. John May," with a biographical sketch (Cincinnati, 1873); and assisted in the preparation of "A Genealogy of the Descendants of John May" (Boston, 1878).—His son, **Robert Thaxter,** physician, b. in Eastport, Me., 23 Sept., 1838, was graduated at Harvard in 1858, and took his degree in medicine there in 1861. In September following he was appointed acting assistant surgeon in the U. S. navy, in January, 1862, assistant surgeon, and in May, 1865, passed assistant surgeon, resigning in the same month. Having taken an extended tour in Europe he then practised his profession at Hingham, Mass., Roxbury, and Boston, where in 1872–'5 he was assistant professor of materia medica at Harvard. He held the full professorship from 1875 till 1884, and in 1884 was Jackson professor of clinical medicine. In 1886 Dr. Edes removed to Washington, D. C. He was for several years one of the visiting physicians at Boston city hospital. He is a member of various medical societies, was a contributor of many articles to medical journals, and to Peppers's "System of Medicine," and has published "Nature and Time in the Cure of Diseases" (Boston, 1868), and "Physiology and Pathology of the Sympathetic Nerve" (New York, 1869), both originally prize essays, and "Therapeutic Hand-Book of U. S. Pharmacopœia" (1883).

EDGAR, Henry Cornelius, clergyman, b. in Rahway, N. J., 11 April, 1811; d. in Easton, Pa., 23 Dec., 1884. He was graduated at Princeton in

1831, and read law in New York city, but illness interrupted his studies, and, after travelling extensively, he entered mercantile life. He afterward taught in Rahway, N. J., and in 1837–'44 was principal of the University grammar-school of the city of New York. He had taken a private course in theology, and was licensed as a Presbyterian minister in 1845. After holding a pastorate at Bridgehampton, L. I., he had charge, from 1853 till 1882, of the Reformed church at Easton, Pa., where he had among his congregation the faculty and students of Lafayette college. Dr. Edgar was an eloquent preacher, and an outspoken opponent of slavery during the war. He frequently lectured on educational topics, and in advocacy of temperance. After his death a tablet in his memory was placed on the wall of his church at Easton. He contributed largely to religious and secular magazines, and published numerous orations and sermons, including "Three Lectures on Slavery" (Easton, Pa., 1862); "Four Discourses occasioned by the Death of Lincoln" (1865); "Memorial of Russell S. Chidsey" (1865); "An Exposition of the Last Nine Wars" (1867); "Christianity our Nation's Wisest Policy" (1872); "A Discourse occasioned by the Death of President Garfield" (1881); and "The Relation of the Pulpit to Politics" (1884).

EDGAR, James David, Canadian lawyer, b. in Hatley, Quebec, 10 Aug., 1841. He was educated by private tuition, and at Lenoxville grammar-school studied law, was admitted to the bar of Upper Canada in 1864, and subsequently practised in Toronto. In 1874 he was sent to British Columbia by the Dominion government to arrange terms for the postponement of the construction of the Canada Pacific railway. He was first returned to the Dominion parliament in 1872, and sat for two years, unsuccessfully contested Centre Toronto in 1882, and was elected by acclamation for West Ontario in August, 1884. He has contributed frequently to the daily press and to periodicals, and is the author of some spirited lyrics. He has published "The Insolvent Act of 1864, with Notes and Forms" (Toronto, 1864); "An Act to amend the Insolvent Act of 1864, with Annotations," "Notes of Decisions, etc." (Toronto, 1865); a pamphlet on the "Commercial Independence of Canada" (1883); and "White Stone Canoe," a poem (1885).

EDGAR, John Todd, clergyman, b. in Sussex county, Del., 13 April, 1792; d. in Nashville, Tenn., 13 Nov., 1860. He removed with his parents to Kentucky early in life, and entered Transylvania university, Lexington, but was not graduated. He was graduated at Princeton theological seminary in 1816, and in 1817 ordained as a Presbyterian. He was pastor at Flemingsburg, and Maysville, Ky., in 1827, and Frankfort in 1827–'33, where his preaching attracted much attention. Henry Clay said of him: "If you want to hear eloquence, listen to John T. Edgar." He became pastor of the 1st Presbyterian church in Nashville, Tenn., in 1833, and remained there till his death. At one time he edited the "American Presbyterian," published at Nashville. He was much beloved in Nashville by people of all denominations, and on the day of his funeral there was a general suspension of business in the city, by proclamation of the mayor.

EDGREN, August Hjalmar, author, b. in Wermland, Sweden, 18 Oct., 1840. He was graduated at the University of Upsala, and at the Royal military school of Sweden in 1860, came to the United States, and entered the 99th New York regiment as 2d lieutenant in January, 1862. He was promoted to 1st lieutenant, and in August, 1863, was assigned to the engineer corps. He afterward joined the regular army of Sweden, and served from February, 1864, till August, 1870, having been adjutant from July, 1869. He was a teacher of languages in Riverview academy in 1871–'2, instructor in French, German, and Sanskrit in Yale from 1874 till 1880, and lecturer on Sanskrit in the University of Lund, Sweden, from 1880 till 1884, when he became professor of modern languages and Sanskrit in Nebraska university. He is a member of various learned societies, and is the author of numerous papers relating to Sanskrit, Romance, and Germanic philology, and of value to scholars, which have appeared at various times from 1867–'86 in Sweden, England, and the United States. Among his numerous publications are a Swedish translation of Longfellow's "Evangeline" (Göteborg, 1875); a "German and English Dictionary," with Prof. W. D. Whitney (New York and London, 1877); a work in Swedish on "The Literature of America" (Göteborg, 1878), and on "The Public Schools and Colleges of the United States" (Upsala, 1879); "Swedish Literature in America" (Sweden, 1883); and "American Antiquities" (1885).

EDISON, Thomas Alva, inventor, b. in Alva, Ohio, 11 Feb., 1847. His mother, who had been a teacher, gave him the little schooling he received, and at the age of twelve he became a newsboy on the Grand Trunk line running into Detroit. While thus engaged he acquired the habit of reading. He also studied qualitative analysis, and conducted chemical experiments on the train till an accident caused the prohibition of further work of the kind. Afterward he obtained the exclusive right of selling newspapers on the road, and, with the aid of four assistants, he set in type and printed the "Grand Trunk Herald," which he sold with his other papers. The operations of the telegraph, which he constantly witnessed in the stations along the road, awakened his interest, and he improvised rude means of transmitting messages between his father's home in Port Huron and the house of a neighbor. Finally a station-master, whose child he had rescued in front of a coming train at the risk of his own life, taught him telegraph operating, and he wandered for several years over the United States and Canada, acquiring great skill in this art, but frequently neglected his practical duties for studies and experiments in electric science. At this time he invented an automatic repeater, by means of which a message could be transferred from one wire to another without the aid of an operator, and in 1864 conceived the idea of sending two messages at once over the same wire, which led to his experiments in duplex telegraphy. Later he was called to Boston and placed in charge of the "crack" New York wire. While in that city he continued his experiments, and perfected his duplex telegraph, but it did not succeed till 1872. He came to New York in 1871, and soon afterward became superintendent of the gold and stock com-

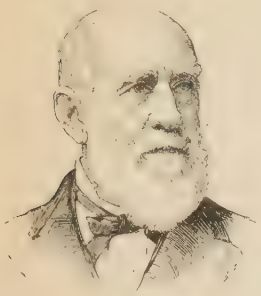
pany, inventing the printing telegraph for gold and stock quotations. For the manufacture of this appliance he established a large workshop at Newark, N. J., and continued there till 1876, when he removed to Menlo Park, N. J., and thenceforth devoted his whole attention to inventing. Among his principal inventions are his system of duplex telegraphy, which he subsequently developed into quadruplex and sextuplex transmission; the carbon telephone transmitter, now used by nearly all telephones throughout the world, in which the variation in the current is produced by the variable resistance of a solid conductor subjected to pressure, rendering more faithfully than any other telephone the inflections and changes in the intensity of the vocal sounds to be transmitted; the microtasimeter, used for the detection, on the same principle, of small variations in temperature, and successfully employed during the total eclipse of 1878 to demonstrate the presence of heat in the sun's corona; the aerphone, which may be used to amplify sound without impairing the distinctness of articulation; and the megaphone, which, when inserted in the ear, so magnifies sounds that faint whispers may he heard at a distance of 1,000 feet. The phonograph, which records sound in such a manner that it may be reproduced at will, and the phonometer and apparatus for measuring the force of sound-waves produced by the human voice, are inventions of this period. His attention then became absorbed in the problem of electric lighting. He believed that the process of lighting by the voltaic arc, in which great results had already been achieved by Charles F. Brush, would never answer for general illumination, and so devoted himself to the perfection of the incandescent lamp. After entirely perfecting a device for a lamp with a platinum burner, he adopted a filament of carbon inclosed in a glass chamber from which the air was almost completely exhausted. He also solved the problem of the commercial subdivision of the light in a system of general distribution of electricity, like gas, and in December, 1879, gave a public exhibition in Menlo Park of a complete system of electric lighting. This was the first instance of subdivision of the electric light, and created great interest throughout the world, especially as scientific experts had testified before a committee of the English house of commons in the previous year that such a subdivision was impossible. His system is now in general use, and in 1882 Mr. Edison came to New York for the purpose of supervising its establishment in that city. In 1878 he received the degree of Ph. D. from Union, and during the same year was made a chevalier of the Legion of Honor by the French government.

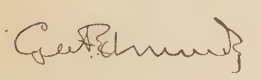
EDMONDS, Francis W., artist, b. in Hudson, N. Y., 22 Nov., 1806; d. at his country-seat, Bronxville, Westchester co., 7 Feb., 1863. He showed great love for art in his youth, but was a bank cashier in his native city and in New York city till 1855. During this time he studied at the National academy of design, and employed his leisure with his pencil. In 1835 he sent to the academy, under an assumed name, his first picture, "Sammy the Tailor." He was secretary from 1860 till 1863 of the American bank-note company, and his "Barn-Yard," "Sewing-Girl," "Grinding the Scythe," and "Mechanic" were engraved on notes printed by that establishment. He was elected an associate of the National academy in 1838, was afterward a trustee, and became an academician in 1840. After this he studied in Europe, and on his return aided in the establishment of the New York gallery of fine arts. Among the better known of his pictures, besides those named above, are "Dominie Sampson" (1837); "The City and Country Beaux," "The Penny Paper" (1839); "Sparkling" (1840); "Vesuvius and Florence" (1844); "Commodore Trunion," "The Sleepy Student" (1846); "Trial of Patience" (1848); "The Speculator" (1852); "Taking the Census" (1854); "The Thirsty Drover" (1856); "Bargaining" (1858); and "The New Bonnet" (1859).

EDMONDS, John Worth, jurist, b. in Hudson, N. Y., 13 March, 1799; d. in New York city, 5 April, 1874. He was graduated at Union in 1816, studied law, was admitted to the bar in 1819, and began practice in Hudson in 1820. He rose to the rank of colonel of militia, and received from Gov. De Witt Clinton the appointment of state recorder. He was a member of the New York assembly in 1831, and in 1832–'6 of the state senate. In 1836–'8 he was sent on special missions to the Indians by the government, and became familiar with several Indian languages. In 1841 he settled in New York city, and resumed law practice. He was appointed one of the state-prison inspectors in 1843, founded a prison association for improving the condition of convicted criminals, and effected important reforms in prison discipline. By his exertions corporal punishment was abolished by the legislature, a series of rewards for good conduct was instituted, and measures adopted for obtaining for discharged criminals an honest livelihood. Mr. Edmonds became a circuit judge in 1845, one of the judges of the state supreme court in 1847, and in 1852 was appointed to the court of appeals, from which he afterward retired to the private practice of law. Judge Edmonds became a convert to the doctrines of spiritualism in 1851, and in 1853 openly avowed and defended them, believing himself to be in almost constant communication with departed spirits. His peculiar views were sustained with the greatest courage and persistence, and it was said that they cost him his place on the bench of the supreme court. He was a jurist of unquestioned ability, and the honesty of his convictions was never doubted. Besides contributions to periodicals in favor of his belief, he published "Spiritualism," in connection with George T. Dexter, M. D. (2 vols., New York, 1853–'5); "Reports of Select Law Cases" (1868); and "Letters and Tracts on Spiritualism" (London, 1874).

EDMUNDS, George Franklin, statesman, b. in Richmond, Vt., 1 Feb., 1828. He was educated at the common schools and by a private tutor; studied law at an early age, and began practice in 1849, removing in 1851 to Burlington, Vt. He was a representative in the Vermont legislature in 1854–'9, serving as speaker for three years, and in 1861–'2 was a member of the state senate, and its president *pro tempore*. At the beginning of the civil war he was a member of the State convention that formed a coalition between the Republicans and war Democrats, and drew up the resolutions adopted there. He was appointed to the U. S. senate in March, 1866, by the governor of Vermont, to fill the vacancy made by the death of Solomon Foot, and was then elected by the legislature to fill the unexpired term, and three times re-elected. Mr. Edmunds was active in the impeachment of Andrew Johnson, sided with President Grant against Charles Sumner, and acted an influential part in the passage of the reconstruction measures, adopting a conservative course. In 1876–'7 he was one of the members of the electoral commission, having been previously chairman of the committee which, in concert with a similar committee of the house of representatives, prepared

the bill creating that commission. The passage of the Pacific railroad funding act was also largely due to his influence and exertions. At the National Republican conventions, held in Chicago in 1880 and 1884, Mr. Edmunds received thirty-four and ninety-three votes respectively for the presidential nomination, each on the first ballot. He was elected president *pro tempore* of the senate after Mr. Arthur became president of the United States. In the senate he has served on the committees on commerce, public lands, appropriations, pensions, retrenchment, private land claims, the library, and the judiciary, and has served as chairman of the last-named committee for several successive congresses. As a legislator, Senator Edmunds is noted for his legal acumen, his readiness in repartee, and his love of strictly parliamentary procedure. He has been a fearless foe of political jobs and legislative intrigues. He was the author of the act of 22 March, 1882, for the suppression of polygamy in Utah and the disfranchisement of those who practise it. This is known as the "Edmunds act," and was upheld by the supreme court in decisions that were rendered on 22 March, 1884, in a series of five cases. He was also the chief author of the similar act passed in 1887; and of the act of 1886 prescribing the manner in which electoral votes for president shall be counted. In 1886 he was the leader in the senate in the attempt to compel President Cleveland to furnish that body with all documents necessary to show cause for recent removals from office.





EDSON, Josiah, politician, b. about 1710; d. in New York or on Long Island in 1778. He was graduated at Harvard in 1730, and became a noted tory politician in Bridgewater, Mass. Hutchinson speaks of him in 1771, when he was in the legislature, as one who would ordinarily have had great weight in that body, but who, discouraged by the numbers of the opposition, remained inactive. In 1774 he was one of the "mandamus councillors," and in the same year was driven from his house by a mob, and compelled to take refuge in Boston, under the protection of British troops. At the evacuation of that city in 1776 he went with the army to Halifax, and then to New York. He was a colonel of militia and a deacon of the church. John Trumbull, in his satire "McFingal," alludes to him as "that old simplicity of Edson."

EDSON, Theodore, soldier, b. in Massachusetts in 1838; d. in Rock Island, Ill., 16 Nov., 1870. He was graduated at the U. S. military academy in 1860, and served with honor in the civil war, being chief of ordnance in Gen. Rosecrans's Tennessee campaign. He was brevetted captain on 31 Dec., 1862, for services at the battle of Stone River, given his full rank on 3 March, 1863, and commanded various arsenals and ordnance depots, being chief of ordnance in the department of Virginia and North Carolina in 1864–'5. He was promoted to major in 1867, and in 1869–'70 was instructor in gunnery at West Point.

EDWARDS, Agustin, Chilian capitalist, b. in Serena, Chili, 13 Jan., 1816; d. in Valparaiso, 5 Aug., 1877. He was the son of an English physician, Dr. George Edwards. At an early age he began business life as a partner in a mercantile concern of Huasco, and soon acquired quite a fortune in banking and mining operations at Copiapo. In 1850 he established at Valparaiso the first bank of Chili, and afterward contributed to the foundation of the Bank of Ossa, Bank of Bolivia, and of the Bank of San Juan, in the Argentine Republic. He was the originator and principal shareholder of the railroad, established in 1851, between Caldera and Copiapo, which was the first railway of South America. Edwards furnished to William Wheelwright the capital necessary to establish the first steamship line in the Pacific, or the Pacific steam navigation company, and, besides being connected with various South American railroads, was the originator of the road that is to run across the Andes to Buenos Ayres. He is the owner of silver mines in Copiapo and Antofagasta, and of a manufactory of nitrate of soda at Salinas. Edwards was the first speculator in Chilian copper in Europe. He was elected to congress several times, and in 1870 became senator for Valparaiso. He was also offered the portfolio of the treasury, but he declined it. At his death he was worth $30,000,000.

EDWARDS, Bryan, English author, b. in Westbury, Wiltshire, England, 21 May, 1743; d. in England, 15 July, 1800. He received a fair education at Bristol, and emigrated in 1759 to Jamaica to live with a rich uncle, who gave him the means of completing his education, and made him his heir. He became an eminent merchant and prominent member of the colonial assembly, where he attacked the restrictions made by the government on trade with the United States. He afterward went to Santo Domingo, where he spent several years in collecting materials for his work on that island. He then returned to England, and from 1796 till his death was a member of the house of commons, where he was a zealous defender of the creole planters against Wilberforce's attacks on slavery and the slave-trade. He published "Thoughts on the Trade of the West India Islands with the United States" (1784); "History of the British Colonies in the West Indies" (2 vols., London, 1793; vol. 3, with plates, 1801; new ed., including two new volumes, 5 vols., 1819; abridgment of the first three vols., 2 vols., 1794). The third volume contains also a "History of Santo Domingo" (first published in 1791; 2d ed., 1797) and an autobiography. Mr. Edwards also published "Conduct of the Government and Colonial Assembly of Jamaica in regard to Fugitive Slaves" (London, 1796), and printed privately "Proceedings of the Association for promoting the Discovery of the Interior Parts of Africa" (1798), and a volume of poems.

EDWARDS, Charles, lawyer, b. in Norwich, England, 17 March, 1797; d. in New York city, 30 May, 1868. He was graduated at Cambridge, removed to New York, practised law, and was for twenty-five years counsel to the British consulate in that city. He was the author of "The Juryman's Guide" (1831); "Parties to Bills and Other Pleadings" (1832); "Feathers from My Own Wings" (1833); "Receivers in Chancery" (1839–'46); "Reports of Chancery Cases, First New York Circuit—1831–'45" (4 vols.); "History and Poetry of Finger-Rings" (1855); "Receivers in Equity" (1857); "Referees" (1860); "The Stamp-Act of 1862" and "Pleasantries about Courts and Lawyers" (1865).—His son, **Pierrepont,** has been for many years British vice-consul in New York.

EDWARDS, Cyrus, lawyer, b. in Montgomery county, Md., 17 Jan, 1793; d. in Upper Alton, Ill., in September, 1877. In the early history of Illinois he was one of its most prominent and useful citizens. He was frequently elected to the legislature, and was especially conspicuous as a friend of education. He was active in originating the State normal school at Bloomington, and was for thirty-five years president of the board of trustees of Shurtleff college, to which institution he gave real estate valued at $10,000, besides other generous donations. He received the degree of LL. D.

EDWARDS, Jesse, clergyman, b. in Elmira, N. Y., 21 Feb., 1819; d. in Plover, Wis., 6 Feb., 1866. He was graduated at Princeton theological seminary in 1842, and licensed to preach the same year. Removing to Indiana, he was ordained in 1845, and labored at Delphi, Rock Creek, and Monticello until 1847, when he returned to New York and preached both at Sparta and Portageville. In 1850 he went to Wisconsin as a missionary, and engaged in that work at Plover, Portage county, Stevens Point, and Grand Rapids. While thus employed he was (1859) elected professor of Latin and Greek at Carroll college, Waukesha, Wis. When that institution was closed in 1861 he returned to Plover. Mr. Edwards was distinguished for his biblical scholarship.

EDWARDS, John, senator, b. in Virginia in 1755; d. in Bourbon county, Ky., in 1837. In 1780 he removed to that portion of Virginia now comprised in the state of Kentucky, and entered 23,000 acres. He was a member of the state legislature from 1781 till 1785, again in 1795, and from 1796 till 1800. He was a delegate in the conventions of 1785–'7 and '8, called to set off the state of Kentucky, and was also elected to the convention that ratified the Federal constitution, and to that held in 1792, which framed the constitution of the state. He was a United States senator from Kentucky from 24 Oct., 1791, till 3 March, 1795. About 1800 he retired from public life.

EDWARDS, John, author, b. in Llanuwch-y-lynn, Wales, 15 April, 1806; d. near Rome, N. Y., 20 Jan., 1887. He was educated in his native place, where he resided until the age of twenty-two, when he settled in Utica, N. Y., near which town he purchased a farm in 1828. In 1834 he removed to the city of New York, where he remained six years, and then returned to his farm in Oneida county. In 1866 he purchased a small farm in the suburbs of Rome, N. Y., where he resided until his death. In his native land, and among the Welsh inhabitants of America, Mr. Edwards was known as Eos Glan Twrch ("the nightingale of the Twrch"), his birthplace being on the banks of the river Twrch. He began to write at an early age, and soon became a successful competitor for the prizes awarded at the "Eisteddfodau"—the annual gatherings of the Welsh people—for the best songs and prose essays. His name was among the foremost in connection with these yearly festivals, and he was an adjudicator in many of them. To his influence and labors some of the earliest Welsh periodicals in America are indebted for their successful establishment. To many of them he was a constant contributor, and of one, "Amserai," published in Utica, N. Y., he was editor. His published poems include "The Crucifixion" (1853) and "The Omnipresence of God" (1859).

EDWARDS, John, lawyer, b. in Jefferson county, Ky., 24 Oct., 1815. He received a common-school education, studied law, and entered upon the practice of his profession. He was a member of the legislature of Indiana from 1845 till 1849, when he emigrated to California, and was at once made alcalde. He returned to Indiana in 1852, and was in the same year elected to the state senate. He removed subsequently to Iowa, was chosen a member of the State constitutional convention in 1855, and was in the legislature from 1856 till 1860, serving the last two years as speaker of the house. On 21 May, 1861, he was appointed lieutenant-colonel and aide-de-camp on the governor's staff. He organized and commanded state troops until May, 1862, when he became colonel of the 18th Iowa infantry. On 26 Sept., 1864, he was promoted to be brigadier-general of volunteers, and was mustered out of the service, 15 Jan., 1866. After the close of the war he settled at Fort Smith, Ark., and was appointed U. S. assessor, 6 Aug., 1866. He was also elected a member of the 42d congress as a liberal Republican, but his election was successfully contested by Thomas Boles, who took his seat, 9 Feb., 1872.

EDWARDS, John Ellis, clergyman, b. in Guilford county, N. C., 1 Aug., 1814. He was graduated at Randolph-Macon college, Va., which also conferred upon him the degree of D. D. Dr. Edwards entered the Methodist ministry in 1834, and has been continuously engaged in pastoral work since that time, with the exception of the period occupied by a European tour in 1856. He was stationed for twenty-one years at Richmond, Va., and has represented the Virginia conference in the quadrennial sessions of the General conference of the Methodist Episcopal church south for thirty years. He also was present as a representative of the same body in the Centennial conference held in Baltimore in December, 1884. Dr. Edwards is the author of "Travels in Europe" (New York, 1857); "Life of Rev. John Wesley Childs" (Philadelphia, 1851); "The Confederate Soldier" (1868); and "Log Meeting-House," etc. (Nashville, 1884), and of addresses, tracts, etc.—His son, **Landon Brame,** physician, b. in Prince Edward county, Va., 20 Sept., 1845, was educated at Randolph-Macon college. In 1863 he enlisted in the artillery corps of the Confederate army, in which he served until the end of the war. He was graduated at the medical department of the University of the city of New York in March, 1867, and until October of that year served as house physician in the Charity hospital, Blackwell's Island, and then as assistant physician to the hospital for nervous diseases at Lake Mahopac, N. Y. In 1868 he began to practise at Lynchburg, Va., and was largely instrumental in founding the Medical society of Virginia in 1870, of which he is recording secretary. In 1872 he was made a member of the State board of health, and the same year removed to Richmond. In April, 1874, he established the "Virginia Medical Monthly," and about the same time he was appointed lecturer on anatomy in the Virginia medical college, in 1875 lecturer in the same college on materia medica and therapeutics, and in 1880 on medico-legal jurisprudence. Dr. Edwards is a member of many professional societies, and has contributed frequently to other medical journals besides his own. Among the subjects he has discussed are "Chloral Hydrate in Chronic Gastric Ulcer" and "Strychnia in Tremulous Effects of Tobacco-Smoking."—Another son, **William Emory,** clergyman, b. in Prince Edward county, Va., 10 June, 1842, was graduated at Randolph-Macon college in 1862, and has since been a clergyman of the Methodist Episcopal church south, in the territory of the Virginia conference, and has received the degree of D. D. He is the author of "John Newsom; a Tale of College Life" (Nashville, 1883).

EDWARDS, Justin, clergyman, great-grandson of Samuel, b. in Westhampton, Mass., 25 April, 1787; d. at Bath Alum, Va., 23 July, 1853. He was descended from Alexander Edwards, who emigrated from Wales, and resided at Northampton, Mass., in 1655–'90, and whose grandson, Samuel, died in 1749. Justin was graduated at Williams in 1810, and in 1811 began at Andover a theological course, which he did not finish. Being earnestly pressed to become pastor of the "South" parish, comprising nearly 2,000 parishioners without other religious organization in the same town, he was ordained 2 Dec., 1812. In 1817 he was elected a member of the executive committee of the New England tract society, and in 1821 was chosen corresponding secretary, by which the labor and responsibility of superintending the press and directly managing the business of the association officially devolved upon him. Early in 1825 he united with the Rev. Dr. Woods and fourteen others in organizing in Boston the "American Society for the Promotion of Temperance." In 1827 he was one of several prominent New York and New England clergymen who met at Lebanon Springs, N. Y., to discuss the subject of religious revivals, and the same year was honored with the degree of D. D. by Yale. About this time he applied for and received a release from the pastoral relation, and had entered on his duties as agent of the American temperance society when he decided to accept a call from a new church in Salem street, Boston. Here he labored so zealously that, by the following summer, his failing health compelled him to resign. Dr. Edwards was now free to return to his temperance work, in which he engaged with extraordinary energy for the next six years (1830–'6). During this period he travelled extensively, arousing the public to the importance of the reform, and wrote a series of papers known as "Permanent Temperance Documents." In 1836 he was elected president of the Andover theological seminary, which office he held for nearly six years. His attention was now called to the proper observance of the Sabbath, and when the American and foreign Sabbath union was organized in Boston he became its secretary. From 1842 till 1849 he was laboriously engaged in doing for the Sabbath what he had previously done for the cause of temperance, not only travelling extensively and delivering addresses in every part of the country, but writing another set of "Permanent Documents," which probably form the ablest condensed plea for the Sabbath that the language affords. The last four years of his life were chiefly occupied in the preparation of a condensed commentary on the Scriptures at the request of the American tract society. He had completed the work, so far as the New Testament was concerned, and had proceeded with the Old Testament as far as the 50th Psalm. Dr. Edwards published many sermons and addresses, and was the author of the following tracts issued by the American tract society: No. 167, "Well-conditioned Farm" (on temperance); No. 177, "Joy in Heaven over One Sinner that Repenteth"; No. 179, "The Way to be Saved"; No. 125, "On the Traffic in Ardent Spirits"; No. 582, "The Unction from the Holy One." Of the first four, 750,000 copies were printed prior to 1857. Of his "Sabbath Manual," 583,544 were called for; of the "Temperance Manual," 193,625; and more than 70,000 of the commentary on the New Testament. A memoir of his life and labors, by Rev. Dr. William Hallock, was published by the Tract society in 1854.—**Bela Bates,** clergyman, another great-grandson of Samuel, mentioned in the preceding sketch, b. in Southampton, Mass., 4 July, 1802; d. in Athens, Ga., 20 April, 1852. He was graduated at Amherst in 1824, and at Andover in 1830. He was licensed to preach in the latter year, but was never ordained. After serving as tutor at Amherst, he acted as assistant secretary of the American education society in 1828–'33. He edited the "American Quarterly Register" in 1828–'42; the "American Quarterly Observer," which he founded, in 1833–'5; the "American Biblical Repository," with which the latter was united, in 1835–'8; and the "Bibliotheca Sacra" in 1844–'52. He was appointed professor of Hebrew in Andover theological seminary in 1837, received the degree of D. D. from Dartmouth in 1844, and in 1848 was elected associate professor of sacred literature. During his twenty-four years of editorial labor he issued thirty-one octavo volumes of the periodicals with which he was connected. His work in connection with the "Quarterly Register" was especially valuable. He designed to make it a storehouse of facts for present and future generations, and it contains indispensable materials for the historian. In the pages of the other periodicals named, Dr. Edwards's contributions were chiefly criticisms of current (especially biblical) literature and disquisitions on the science of education. While occupied with his labors in this field he published several works, among which are the "Eclectic Reader" (1835); "Biography of Self-Taught Men" (1831); "Memoir of Henry Martin," with an introductory essay (1831); "Memoirs of E. Cornelius" (1833); a volume on the "Epistle to the Galatians"; and the "Missionary Gazetteer" (1832). He was also a frequent contributor to the religious press, and wrote various pamphlets and the more important portions of several books in collaboration with Profs. Sears, Felton, and Park. Among the latter are "Selections from German Literature" and "Classical Studies." He was also associated with Samuel H. Taylor in the translation of "Kühner's Greek Grammar." In 1845 he was compelled to visit Florida for his health, and on his return sailed for Europe, where he spent a year. In 1851 he was again compelled to go south, and was residing there the following winter, when he died. He was an ideal editor and professor, uniting great erudition and a sound judgment with a deep, earnest, and uniform piety. A selection from his sermons and addresses, with a memoir by Prof. Edwards A. Park, was published in Boston in 1853.

EDWARDS, Morgan, clergyman, b. in Monmouthshire, Wales, 9 May, 1722; d. in Pencador, Del., 28 Jan., 1795. He was educated at Bristol college, England, and ordained to the Baptist ministry in Cork, Ireland, 1 June, 1757. He came to this country in 1761 and became pastor of the Baptist church in Philadelphia, but resigned his charge in 1770, and never afterward became a pastor, travelling widely as preacher and lecturer. In the Revolutionary struggle Mr. Edwards was the only Baptist minister in the country, with one possible exception, who sympathized with the mother country. He was a man of scholarly tastes and attainments, and as a preacher had no equal in the Baptist pulpit of his day. To him, more than to any one else, is due the credit of founding Rhode Island college, now Brown university. Besides being the principal mover in the enterprise, he was active in securing funds for the permanent support of the institution, and was one of its fellows from 1764 till 1789. Mr. Edwards was the first American Baptist to attempt a history of his denomination in this country. In pursuing this design he travelled from New Hampshire to Georgia eagerly collecting materials. Besides various published dis-

courses, he was the author of "Materials toward a History of the Baptists of Pennsylvania" (1772), and "Materials toward a History of the Baptists in Jersey" (1792). He also left a large body of manuscript records, which have proved of great value to subsequent writers. He received the degree of A. M. from the College of Philadelphia in 1762, and from Rhode Island college in 1769.

EDWARDS, Ninian, senator, b. in Montgomery county, Md., in March, 1775; d. in Belleville, Ill., 20 July, 1833. His education was at one time directed by William Wirt, and was completed at Dickinson college, Pa. At the age of twenty he removed to the Green river district in Kentucky. He studied both medicine and law, but, deciding in favor of the latter, was admitted to the bar in 1798 in Kentucky, and in 1799 in Tennessee. He had previously been elected to the Kentucky legislature before he was twenty-one. He rose rapidly in his profession, and was appointed first clerk, and then judge, of the general court of Kentucky, judge of the circuit court in 1803, of the court of appeals in 1806, and in 1808 chief justice of the state, before he had attained his thirty-second year. In 1809 President Madison appointed him governor of Illinois, on the organization of that territory, and he retained the office till its admission to the Union in 1818. Before congress had adopted any measures on the subject of volunteer rangers, he organized companies, supplied them with arms, built stockade forts, and established a line of posts from the mouth of the Missouri to the Wabash river. He was thus prepared for defence, and during the war of 1812 and the frontier wars with the Indians, his precautionary measures were greatly appreciated. In 1816 he was appointed one of three commissioners to treat with the Indian tribes. He was one of the first two United States senators from Illinois, having been elected as a Democrat, and serving from 4 Dec., 1818, till 4 March, 1824, when he resigned, to accept the appointment of minister to Mexico. He had reached New Orleans on his way to his post, when he was recalled, in consequence of charges made against him by William H. Crawford, then secretary of the treasury. He was again elected governor of Illinois and served from 1826 to 1830. See "History of Illinois and Life of Ninian Edwards," by Ninian W. Edwards (1870); and "The Edwards Papers," being vol. iii. of the Chicago historical society's collections (Chicago, 1884).

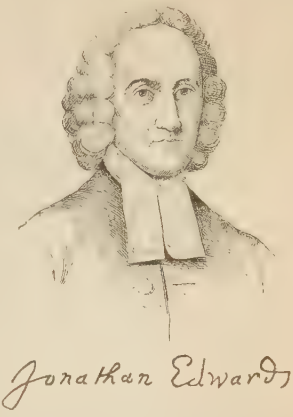
Ninian Edwards

—His son, **Ninian Wirt,** lawyer, b. in Frankfort, Ky., 15 April, 1809, was taken by his father, when an infant, to Kaskaskia, then the capital of Illinois territory. He was graduated at the Transylvania university, and at its law department in 1833. Before his graduation he was married to Elizabeth P. Todd, a sister of Mrs. Abraham Lincoln. Mr. Edwards began the practice of law in 1833, and in 1834 was appointed attorney-general of Illinois, but resigned in 1835, and removed to Springfield. In 1836 he was elected to the legislature, and with Abraham Lincoln and others was active in securing the removal of the capital to Springfield. Mr. Edwards remained a member of the legislature continuously till 1852. During that period he was also a member of the convention that framed the State constitution in 1848. In 1854 he was appointed by the governor attorney before the board of commissioners whose duty it was to investigate the claims of canal contractors against the state, amounting to over $1,500,000. From 1854 till 1857 he served as superintendent of public instruction, and drafted a bill regarding free schools, which afterward became a law. In August, 1861, he was appointed by President Lincoln captain commissary of subsistence, which appointment he held until 22 June, 1865. In the latter year Mr. Edwards retired almost entirely from the practice of his profession. At the request of the State historical society, he prepared a volume entitled "The Life and Times of Ninian Edwards, and History of Illinois," which is considered an authority (1870).—Another son, **Benjamin Stevenson,** lawyer, b. in Edwardsville, Madison co., Ill., 3 June, 1818; d. in Springfield, Ill., 5 Feb., 1886, was graduated at Yale in 1838, and at the law department in the following year. In politics he was first a Whig, and subsequently a strong Democrat, being several times chosen to the state legislature. In 1869 he was elected circuit judge of Sangammon county, Ill., but resigned after eighteen months' service, preferring the active practice of his profession. At the time of his death he was president of the state bar association.

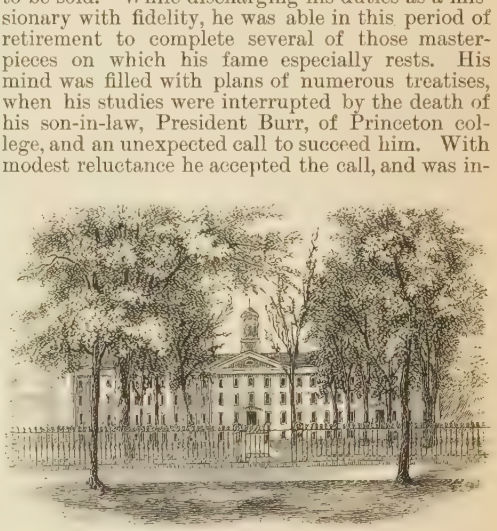
EDWARDS, Oliver, soldier, b. in Springfield, Mass., 30 Jan., 1835. He was graduated at the Springfield high-school in 1852. At the beginning of the civil war Mr. Edwards was commissioned 1st lieutenant and adjutant of the 10th Massachusetts regiment, and in January, 1862, was appointed senior aide-de-camp on the staff of Gen. Darius N. Couch. He was commissioned major of the 37th Massachusetts on 9 Aug., and was promoted colonel on 27 Aug. On 19 Oct., 1864, he was brevetted brigadier-general "for gallant and distinguished services at the battle of Spottsylvania Court-House, and for meritorious services at the battle of the Opequan." He was brevetted major-general, 5 May, 1865, "for conspicuous gallantry in the battle of Sailor's Creek, Va.," and was made a full brigadier-general, 19 May, 1865. After serving through the Peninsula campaign of 1862, and those of Fredericksburg and Gettysburg, Gen. Edwards was ordered to New York city in command of a picked provisional brigade, to quell the draft riots in July, 1863, and placed in command of Fort Hamilton and Fort Lafayette. At the end of the enforcement of the draft, Gen. Edwards returned to the Army of the Potomac, and took part in the battle of Rappahannock. During the second day of the battle of the Wilderness, when in command of the 4th brigade, 2d division, 6th army corps, he made a charge at the head of the 37th Massachusetts regiment, and succeeded in breaking through the Confederate lines. At Spottsylvania, Va., 12 May, 1864, he held the "bloody angle" with his own brigade from 5 A. M. till 4 P. M. and was at the head of twenty regiments from that hour until 5 A. M., when the enemy withdrew, making twenty-four hours of continuous fighting. He subsequently participated in all the battles of the overland campaign, and accompanied the 6th corps when sent to the defence of Washington against the advance of Early. He was afterward with Gen. Sheridan in his campaign in the Shenandoah valley, and took part in the battle of Winchester, of which town he

was placed in command by that officer. The latter also offered him the provost-marshal-generalship of the middle military division, but he declined it, preferring a direct command. In the final assault on Petersburg, Gen. Edwards's brigade captured the guns in front of three of the enemy's brigades, and he received the surrender of the city from the hands of its mayor, 3 April, 1865. At the battle of Sailor's Creek, on 6 April, Gen. Edwards, with the 3d brigade of the 1st division, captured Gen. Custis Lee and staff, with his entire brigade. Lieut.-Gen. Ewell and staff, and many others. He was mustered out of the army on 16 Jan., 1866, and has been since engaged in mercantile pursuits, both in this country and in England. He invented the Florence oil-stove.

EDWARDS, Timothy, clergyman, b. in Hartford, Conn., 14 May, 1669; d. in East Windsor, Conn., 27 Jan., 1758. The Edwards family is of Welsh origin, the earliest known ancestor being the Rev. Richard Edwards, who, it is supposed, left Wales in the time of Queen Elizabeth, and settled in Oxford, or London, as a clergyman of the established church. His son, William, accompanied his mother to this country, she having been left a widow and married again, and took up his residence in Hartford, Conn. Richard, a wealthy merchant, son of William, was the father of Timothy. The latter was graduated at Harvard in 1691, receiving both his degrees the same day—one in the morning, the other in the afternoon, "an uncommon mark of respect," say the East Windsor records, "paid to his extraordinary proficiency in learning." After pursuing the usual theological course, he was licensed to preach, and ordained pastor over the church in East Windsor in 1694, where—with the exception of a few weeks' absence in 1711, when appointed chaplain to the Connecticut troops in a military expedition to Canada—he remained nearly sixty-four years. When he was eighty-six years of age an assistant was given him, at his request. His wife, a daughter of the Rev. Solomon Stoddard, of Northampton, Mass., a woman of strong intellect and much cultivation, died in her ninety-ninth year. Mr. Edwards always preached extemporaneously, and, until he was over seventy, without noting down the heads of his discourse. He is only known to have written out one sermon, that delivered on the occasion of the general election of 1732. He lived until within a few months of his son's decease, and the latter often visited him, and was heard in his father's pulpit. Comparing the two, it is said to have been customary for the parishioners to remark that, "although Mr. Edwards was, perhaps, the more learned man, and more animated in his manner, yet 'Mr. Jonathan' was the deeper preacher."—His son, **Jonathan,** theologian, b. in East Windsor, Conn., 5 Oct., 1703; d. in Princeton, N. J., 22 March, 1758, was the fifth of eleven children and the only son. At a very early age his uncommon genius began to discover itself. At ten he wrote a paper ridiculing the idea that the soul is material, and at twelve he sent to a European correspondent of his father an account of "The Wondrous Way of the Working of the Spider." He was prepared for college by his father and sister, and in September, 1716, when only twelve years of age, entered Yale, and was graduated in 1720. While in college his "character was marked with sobriety and improvement in learning." The book which at this time "inexpressibly entertained and pleased him" was Locke's "Essay on the Human Understanding." Though he showed proficiency in all the studies of the college course, including natural philosophy, which he cultivated to the end of his life, moral philosophy and divinity were his favorite subjects. Brought up in a household and community that were eminently religious, he had from his childhood "a variety of concerns and exercises about his soul," but found a painful stumbling-block to his spiritual progress in "the doctrine of God's sovereignty," which appeared to him "a horrible doctrine." At length, while in college, how or by what means he could never tell, his difficulties vanished, and he had no more doubts of "God's absolute sovereignty and justice with respect to salvation and damnation." This change of condition was attended with "an inward sweet delight in God." His sense of divine things would often suddenly kindle up "a sweet burning in his heart." Having conversed with his father, he became satisfied of his "good state," united with the church, and accepted the Christian ministry as his true calling. With the purpose of his life now made plain, he remained at college two years after his graduation as a student of divinity. In August, 1722, he was selected to preach in a Presbyterian church in the city of New York, where, on account of the smallness of the society and some special difficulties, he remained only eight months. While in New York he made a new and solemn dedication of himself to God, vowing "for the future to be in no respect his own, but to act as one who had no right to himself in any respect." He "used frequently to retire into a solitary place on the banks of Hudson's river, at some distance from the city, for contemplation on divine things and secret converse with God." In April, 1723, he returned to his father's house in East Windsor, where he spent the summer in close study. Here he finished a series of seventy resolutions remarkable for the spirit of pure, lofty, and practical piety that they embody. They definitely outline a theory and plan of life which can only be objected to as perhaps unattainably exalted. They constitute a manual of devotion which has been very effective in quickening the piety of succeeding generations. In September, 1723, Mr. Edwards was invited by several congregations to become their minister, but he declined all these calls, as well as a request to return to New York, preferring to accept the position of tutor in Yale college, at that time offered him. Here he continued for two years. In the summer of 1726 he was invited to become the colleague of his grandfather, Solomon Stoddard, in the pastorate of the church at Northampton, Mass. He accepted this call, resigned his tutorship in September, 1726, and was ordained to his office in February, 1727, in the twenty-fourth year of his age. On 28 July of the same year he married Sarah Pierrepont, daughter of a minister at New Haven. In 1729 the senior pastor died, leaving the young minister alone. For about seventeen years his settlement at Northampton was happy and eminently useful. His fame as a preacher grew rapidly and



was very great. In July, 1731, he delivered the Thursday lecture in Boston, and his discourse was printed and much approved. He regarded the Arminian doctrines, then very prevalent, as dangerous in their practical tendency, and in 1734 preached a series of sermons of a Calvinistic character, among which was an elaborate discourse on "Justification by Faith alone." Soon afterward a wonderful religious awakening began in his congregation, exceeding anything that had been known in any part of the country. In the year 1740 the Rev. George Whitfield visited Mr. Edwards, spending four days with him, and preaching several times. In this and the year following, the revival extended far and wide through New England, and Mr. Edwards's services were eagerly sought by ministers and people in promoting the work. His preaching was attended with great success, and one sermon in particular, entitled "Sinners in the Hands of an Angry God," delivered at Enfield, was attended with extraordinary impressions. To guard against fanatical excesses he wrote and published about this time "The Distinguishing Marks of a Work of the Spirit of God," "Thoughts concerning the Present Revival of Religion," and his famous "Treatise on Religious Affections." At this moment of general religious prosperity, and when Mr. Edwards was at the height of his fame and usefulness, a great reverse came, entailing the heaviest trial of his life. In 1744 he received information that some young persons, members of his church, had in their possession impure books, which were causing an alarming demoralization. He sought to have the church investigate the matter, with a view to suitable discipline. The church, finding that a great scandal was likely to follow inquiry, refused to comply with the pastor's wishes, and let the matter drop. This painful affair weakened his influence, especially as it was connected with a system of organization to which the Northampton church was committed, and to which Mr. Edwards was now strongly opposed. His predecessor had favored what was known as the "half-way covenant," and under his ministry the church had practically, though not formally, adopted it. According to this plan, unconverted persons were admitted to the Lord's supper, and their children to the rite of baptism. This was a distinct departure from the old Congregational rule, which restricted admission to the church and its ordinances to those who professed personal religious convictions and aims. When it was known that Mr. Edwards desired to enforce the old rule, a storm of opposition rose against him, and there was a general cry that he should be dismissed. He proposed to deliver a course of lectures on the subjects in dispute, but his request was refused, and at length, 22 June, 1750, after long and fruitless efforts to avoid this result, he was forced to resign, thus closing a ministry in Northampton of nearly twenty-four years. With a large family and little income aside from his salary, his situation was painful in the extreme. He was not left, however, without substantial tokens of sympathy. His friends in Scotland invited him to establish himself in that country, and at once forwarded to him a considerable sum of money. Samuel Davies, of Virginia, entreated him to remove to that state, offering to surrender to him his own parish, and not a few of the people of Northampton adhered to him, and would have been glad to maintain him, had he consented to remain in the town. He preferred to accept an offer, from the London society for propagating the gospel, to become a missionary to the remnant of the Housatonnuck Indians at Stockbridge, whither he removed in August, 1751. At the same time the white inhabitants of the town asked him to become their pastor. This exile at Stockbridge was not without its compensations, especially in the fact that he had more leisure than ever before to prosecute the studies that were dear to him. His preaching to the Indians was without notes, aided by an interpreter. His slender income was slightly augmented by the delicate handiwork of his wife and daughters, which was sent to Boston to be sold. While discharging his duties as a missionary with fidelity, he was able in this period of retirement to complete several of those masterpieces on which his fame especially rests. His mind was filled with plans of numerous treatises, when his studies were interrupted by the death of his son-in-law, President Burr, of Princeton college, and an unexpected call to succeed him. With modest reluctance he accepted the call, and was in-



stalled as president, 16 Feb., 1758. The original building, Nassau Hall, is shown in the engraving. His brief service of thirty-four days was long enough to excite among the students satisfaction and wonder. The small-pox was prevailing in the neighborhood, and he was inoculated, but died of it, leaving as his last words, "Trust in God, and ye need not fear." He was interred at Princeton. In 1872 his descendants erected to his memory at Stockbridge a monument of red granite twenty-five feet high. Edwards as a pastor and preacher cannot be considered apart from Edwards as a man. His excellence was of the kind that has long been described as saintly. The seventy "Resolutions" that he framed when a young man expressed an extraordinary piety and elevation of character, and reacted in consistently maintaining his high spiritual tone. His reputation was without a blemish. Though grave and reserved, he was not austere. His benevolence and pity for the poor were large and practical. He was self-restrained, and bore himself with calm dignity under all circumstances, even amid the bitter provocations that attended the rupture of his pastorate at Northampton. If somewhat overstern and exacting as a father, he was far from being unkind. He was an eager student, with a genuine thirst for knowledge. He read all the books that came in his way, but studied the Bible more than all the rest. He had been trained by his father to read with pen in hand, and this became so much his habit that his pen was with him, even in his solitary walks for exercise, always ready to jot down the thoughts that might come to him. If not an eloquent preacher, he was certainly a most powerful and effective one. He was tall and slender, a little more than six feet in stature, and had a countenance expressive of intelligence

and benignity. With a feeble constitution, his voice, though clear, was not strong. He used little gesture, and resorted to none of the arts of the orator. Still, his sermons were so scriptural in matter, so strong and lucid in thought, so marked by deep knowledge of human nature, by simplicity and the absence of all self-consciousness, so glowing with the central heat of intense earnestness, that they held the closest attention, and often produced great effects. They are still read with the deepest interest, while those of Whitfield are forgotten. It is especially on his character as a theologian and metaphysician that Mr. Edwards's fame rests. He was not by any means a merely "dry and cold thinker," but his highest strength undoubtedly lay in the region of pure thought. He was emphatically an original thinker. He was not widely learned, and with slender opportunities of acquaintance with the works of contemporary writers, it is clear that he drew his materials almost entirely from his own reflections and resources. Though the best impulse to his mind was early given by Locke, he was far from accepting that great man as his intellectual master. He explicitly rejected many of Locke's ideas, and inclined rather to that system which in Europe had found its representatives in Malebranche and Leibnitz. His attachment to the system known as Calvinism was intense, and in the defence of this system he produced his greatest works. His immortal treatise "On the Freedom of the Will" (1754) aimed at a conclusive settlement of the main points in controversy between the Calvinists and Arminians. He here maintains that the law of causality extends to every action. Liberty consists in the power of doing what one wills, not in any power of willing without a motive. The will always follows the greatest seeming good, and what shall seem to a man the greatest good depends on the state of his soul. Liberty is not in the act but in the man, and, if a depraved nature is to abstain from sin, it can only be effected by a change of heart. Whatever may be thought of the conclusions of this treatise, there have never been two opinions as to its extraordinary ability. Edwards's definition of virtue, in his treatise on that subject, as "the love of being," has provoked dissent on the part of many who have in general accepted him as a guide. The estimate of Edwards by competent judges puts him in the front rank of great men. Dr. Chalmers says that "on the arena of metaphysicians he stood highest of all his contemporaries." Sir James Mackintosh spoke of him as "a most extraordinary man, who, in a metaphysical age or country, would certainly have been deemed as much the boast of America as his great contemporary, Franklin." Again he calls him, by way of eminence, "the metaphysician of America," and expresses the opinion that "in power of subtle argument he was perhaps unmatched, certainly unsurpassed, among men." Dugald Stewart declared "there is, however, one metaphysician of whom America has to boast, who, in logical acuteness and subtlety, does not yield to any disputant bred in the universities of Europe. I need not say that I allude to Jonathan Edwards." The influence of Edwards was very great in the spiritual history of England and this country, especially of New England, whose leading minds, in the age following him, showed his moulding hand. Bellamy and Hopkins were his pupils; Dwight was his expositor; Smalley, Emmons, and many others were his followers. Through Hopkins his influence reached Kirkland, and assisted in forming the character of Channing. Edwards sums up the old theology of New England, and is the fountain-head of the new. Besides works mentioned above, Edwards published "Treatise Concerning the Religious Affections" (1746); "Inquiry into the Qualifications for Free Communion in the Church" (1749); "Original Sin" (1757); "True Nature of Christian Virtue" (1788); "Dissertation concerning the End for which God created the World" (1789); "Thoughts on the Revival of Religion"; "History of the Redemption"; and a "Life of David Brainerd." There have been two editions of his works in England, one in eight volumes, octavo, and one in two compact volumes. The American editions are to be preferred. They include that edited by Samuel Austin (8 vols., Worcester, Mass., 1809); that by Sereno E. Dwight, with a memoir (10 vols., New York, 1830); and a later one in a more convenient form (4 vols., 1852). There are several lives of Jonathan Edwards; the most interesting is that by Samuel Hopkins, who was his pupil; the fullest is that by Sereno Edwards Dwight, in the edition of his works mentioned above. There is also a memoir by Dr. Samuel Miller in Sparks's "American Biography," and another in "Lives of Eminent Literary and Scientific Men of America" (New York, 1850).—**Timothy,** judge, eldest son of Jonathan, b. in Northampton, Mass., 25 July, 1738; d. in Stockbridge, Mass., 27 Oct., 1813. He was graduated at Princeton in 1757, and began business as a merchant in Elizabeth, N. J. He removed to Stockbridge about 1770, where he was a leading citizen for forty-three years, and sat as judge of probate for Berkshire county. He had fifteen children. — His son, **William,** inventor, b. in Elizabethtown, N. J., 11 Nov., 1770; d. in Brooklyn, N. Y., 1 Dec., 1851, introduced the system, now employed in nearly all American tanneries, by which leather is made in about one fourth of the time required by the old European processes. His first tannery was built at Northampton, Mass., and the first leather made in it was sent to Boston in 1794. Having exhausted the supply of hemlock-bark in the Connecticut valley, he removed, in 1817, to Hunter, Greene co., N. Y., and erected a model tannery on Schoharie creek. It was in the midst of the hemlock forests of the Catskill mountains, on an estate of twelve hundred acres. In 1822 the Messrs. Edwards (he was assisted in business by his son), in connection with Jacob Lorillard, purchased the real estate of the company (an act of incorporation having been granted), which had been unsuccessful, greatly enlarged the business, and made many improvements in the machinery. From this establishment about 10,000 sides of sole-leather were sent to the city of New York annually. Mr. Edwards not only invented several machines, but adapted many devices previously used for other purposes to the art of tanning, thus largely substituting water-power for manual labor. His rolling machine was considered especially valuable, is still in use in nearly its original form, and gives to leather the smoothness of surface and solidity of texture peculiar to the hammered article.—**Jonathan,** Jr., theologian, second son of Jonathan, Sr., b. in Northampton, Mass., 26 May, 1745; d. in Schenectady, N. Y., 1 Aug., 1801. When he was six years old the family removed to Stockbridge, at that time almost solely inhabited by Indians. Here he became so proficient in the Indian language as to surpass in the thoroughness of his scholarship all other Anglo-Americans of that day. As it was his father's wish that he should become a missionary to the aborigines, he was sent, in 1755, to the Rev. Gideon Hawley, who was stationed on the Susquehanna river,

to learn the dialect of the Oneidas. In consequence of the breaking out of war between England and France, in which the colonies were involved, young Edwards remained there only six months, and acquired but an imperfect knowledge of the language. The death of his father, soon followed by that of his mother, and their removal to Princeton, N. J., materially changed his plans. Although left with insufficient means to complete his education, he determined to go forward, and, with the aid of friends, entered the grammar-school at Princeton in February, 1760. The following year he matriculated at the College of New Jersey, at which institution he was graduated in 1765. He began the study of theology under the Rev. Joseph Bellamy, D. D., and received a licence to preach from the Association of Litchfield county, Conn., in 1766. In 1767 he was appointed tutor at Princeton, where he remained for two years, till he became, in January, 1769, pastor of the society at White Haven, Conn. Several members of his church were advocates of the "half-way covenant," while he, like his father, decidedly opposed it. His pastorate was also disturbed by the reaction among the New England churches that followed the extravagances that accompanied the "great awakening" of 1740–'2, and by the demoralizing influences of the Revolutionary war. The result of these untoward circumstances was a dismissal from his charge, 19 May, 1795, for the ostensible reason that the society was unable to support a minister. In 1796 he was called to the church in Colebrook, Litchfield co., Conn. Here, in a retired country parish, he found opportunity to pursue his favorite theological and metaphysical inquiries, and would have been willing to spend the remainder of his days there; but he was called, in the summer of 1799, to the presidency of the then recently established college at Schenectady, N. Y. He was warmly welcomed by both students and citizens, and the talent for government that he subsequently displayed surprised even those who knew him best, his discipline being mild and affectionately parental; but he died the second summer after his inauguration. He received the degree of D. D. from the College of New Jersey in 1785. His career resembled that of his distinguished father in so many particulars that the coincidence has attracted universal attention. They bore the same name, and were distinguished scholars and divines. Both were tutors for equal periods in the colleges where they were respectively educated. Both, after being settled in the ministry, were dismissed on account of their doctrinal opinions, and were again settled in retired places, where they had leisure to prepare and publish their works. Both were called from the discharge of these duties to be presidents of colleges, and both died shortly after inauguration, one in the fifty-fifth and the other in the fifty-seventh year of his age, each having preached on the first Sabbath of the year from the text, "This year thou shalt die." Nor was this resemblance confined merely to outward circumstances; intellectually the two men were much alike. Dr. Emmons is reported to have said that "the father had more reason than the son; yet the son was a better reasoner than the father"; and Dr. Samuel Miller, of Princeton, remarked that "the son greatly resembled his venerable father in metaphysical acuteness, ardent piety, and the purest exemplariness of Christian deportment." The younger Edwards devoted a large portion of his life to the study and interpretation of his father's writings. He was thus well fitted to edit the latter's works, and did prepare for the press the "History of the Work of Redemption," two volumes of sermons, and two volumes of "Miscellaneous Observations on Important Theological Subjects." In 1797 Dr. Edwards published "A Dissertation concerning Liberty and Necessity," which is, perhaps, the fairest exposition extant of the father's "theory of the will." He also printed numerous articles in the "New York Theological Magazine," under the signatures "I" and "O," and many sermons in which his views were carefully elaborated. Among the latter may be mentioned three discourses "On the Necessity of the Atonement and its Consistency with Free Grace in Forgiveness" (1785). They have been frequently republished, and form the basis of what is now known as the "Edwardean theory of the atonement." Dr. Edwards also ranked high as a philologist, and his "Observations on the Language of the Muhhekaneew Indians," etc., elicited the enthusiastic praises of Humboldt. Nearly all his published writings were reprinted in two octavo volumes, edited, with a memoir, by Tryon Edwards (Andover, 1842).—**Jonathan Walter,** lawyer, only son of the second Jonathan, b. in New Haven, Conn., 5 Jan., 1772; d. in Hartford, 3 April, 1831, was graduated at Yale in 1789, and was afterward a tutor there. On taking his second degree, he delivered an oration in which he vigorously attacked the then existing state law by which the eldest son received a double portion of his father's property in case the latter died intestate, and the obnoxious statute was repealed in the following year, 1792. He studied law at Litchfield, settled in Hartford, and soon took high rank in his profession. He was gifted with quick perceptive powers, great acuteness in reasoning, and an unfailing flow of language. Unremitting devotion to his legal studies and pursuits finally undermined his health, and led to his early retirement from the more engrossing duties of his profession; his remaining years were mainly devoted to his family and to looking after his large inherited landed interests. Chief-Justice Williams has written a sketch of Mr. Edwards, which is contained in an appendix to the "Connecticut Reports."—**Jonathan,** son of Jonathan Walter, b. in Hartford, Conn., 7 Sept., 1798; d. in New Haven, 23 Aug., 1875, was graduated at Yale in 1819, and studied in the law-school of Judge Gould at Litchfield, Conn. He practised for many years in Hartford, where he held the office of judge of probate. About 1840 he removed to Troy, N. Y., of which city he was subsequently chosen mayor. He was also several times elected to the legislature.—**Tryon,** clergyman, another son of Jonathan Walter, b. in Hartford, Conn., 7 Aug., 1809, was graduated at Yale in 1828, studied law in New York, and theology at Princeton, and accepted a pastoral call to Rochester, N. Y., in 1834, whence he removed to New London, Conn., in 1845. He was subsequently called to Hagerstown, Md. (1867), and from there went to Gouverneur, St. Lawrence co., N. Y., in 1880, which charge he was obliged to relinquish in 1886 on account of failing health. While settled at Hagerstown he was largely influential in originating and organizing Wilson college, of which institution he was chosen the first president. In 1832 a prize tract on Sunday-schools appeared from his pen, and soon afterward "Christianity a Philosophy of Principles." He has since contributed largely to the religious literature of the time in both periodical and book-form. He is the author of "Self-Cultivation" (New York, 1835), and "Light for the Day, or Heavenly Thoughts for Earthly Guidance" (Philadelphia, 1879), partly original and

partly selected. In 1842 he edited the works of his grandfather, and in 1850 those of the Rev. Dr. Bellamy (2 vols., Andover). He has prepared for the press "Select Poetry for Children and Youth" (New York, 1851); "Jewels for the Household" (Hartford, 1852); "The World's Laconics" (New York, 1852); "Wonders of the World" (Hartford, 1855); and "Anecdotes for the Family." Several of the foregoing have passed through many editions, and been reprinted in England. He has also edited "Charity and its Fruits" from the manuscripts of the elder President Edwards, and for years had editorial charge of "The Family Christian Almanac."—**Pierrepont,** lawyer, youngest son of Jonathan, Sr., b. in Northampton, Mass., 8 April, 1750; d. in Bridgeport, Conn., 5 April, 1826. From the fact that his father was a missionary to the Stockbridge, Mass., Indians, he early became so proficient in their language that he was wont to say that he "thought in Indian." He was graduated at Princeton in 1768, and began the practice of law in New Haven in 1771. He was frequently elected to the legislature, and was appointed administrator of the estate of Benedict Arnold at the time of his treason. He took an early stand in favor of independence, and served in the Revolutionary army, taking part in two hard-fought battles. He was a member of the Continental congress of 1787–'8, and an able advocate of the constitution of the United States in the convention held to ratify it. He was the founder of the Toleration party in Connecticut, and by his ability and perseverance drew upon himself the animosity of the Calvinists. At the time of his death he was a judge of the U. S. district court.—**Henry Waggaman,** senator, son of Pierrepont, b. in New Haven, Conn., in 1779; d. there, 22 July, 1847, was graduated at the College of New Jersey in 1797, and studied at the Litchfield law-school. He settled in New Haven, and was twice elected to congress as a Democrat, serving from 6 Dec., 1819, till 3 March, 1823. He was appointed U. S. senator to fill a vacancy, and subsequently elected for a term, serving from 1 Dec., 1823, till 4 March, 1827. He was afterward elected a member of the state senate (1827–'9), and of the state house of representatives, of which he was chosen speaker in 1830. In 1833 he was elected governor of Connecticut, and again in 1835 and 1838. In 1833 he received the degree of LL. D. from Yale. During his term of office as governor he recommended a geological survey of the state, which was accordingly made.—**Henry Pierrepont,** lawyer, son of Henry Waggaman, b. in 1809; d. in New York city, 24 Feb., 1855, was judge of the supreme court of New York for over seven years, and sustained a high reputation for independence and legal ability.—**Ogden,** lawyer, brother of Henry Waggaman, b. in Connecticut in 1781; d. on Staten Island, 1 April, 1862, removed to New York city in the early part of the century, and served for many years as surrogate. He was afterward a member of the legislature, and in 1821 sat in the convention called to revise the constitution of the state. He was subsequently appointed circuit judge of the supreme court, and continued in that office until in 1841 he reached the age when he was no longer eligible. He was at one time candidate of the Whig party for governor.

EDWARDS, Weldon Nathaniel, politician, b. in Warren county, N. C., in 1788; d. there, 18 Dec., 1873. He received an academical education, studied law, was admitted to the bar in 1810, and settled at Warrenton, N. C. He was a member of the state house of commons in 1814–'15, and was then elected as a democrat to congress, and re-elected five times, serving from 7 Feb., 1816, to 3 March, 1827. He was chosen to the state senate in 1833, successively re-elected until 1844, and again elected in 1850, when he was chosen president of that body. He was a member of the North Carolina constitutional convention in 1835, and president of the State convention that passed the ordinance of secession in 1861.

EDWIN, David, engraver, b. in Bath, England, in December, 1776; d. in Philadelphia, Pa., 22 Feb., 1841. He was the son of John Edwin, a comedian. David was apprenticed to Jossi, a Dutch engraver residing in England, who soon returned to Holland, taking his apprentice with him to Amsterdam. Master and boy did not long agree, and the latter left before his term of apprenticeship had expired. Finding himself alone in a foreign land, without either money or friends, he shipped as a sailor on an American vessel bound for Philadelphia, hoping eventually to reach London. He landed in Philadelphia in December, 1797, obtained employment from T. B. Freeman, an English publisher, and was also employed by Edward Savage, the painter. He devoted himself to the engraving of portraits, and succeeded in doing the best work that had been produced in this country up to that time. His copies of the portraits of Gilbert Stuart were especially good. He engraved the pictures of Washington, by Stuart and Peale, and made copies of the portraits of prominent men of the day painted by those artists and by Waldo, Wood, Jarvis, Sully, and Neagle. After twenty years of steady application his eyesight failed, and he was compelled to resort to various methods to obtain a livelihood. He also possessed considerable taste and skill as a musician. A list of Edwin's principal works will be found in "American Engravers" (Philadelphia, 1875).

EGAN, Maurice Francis, author, b. in Philadelphia, Pa., 24 May, 1852. He was graduated from La Salle college, and in 1878 became professor of English literature in Georgetown college. On leaving Georgetown he studied law for a time, but finally became a journalist. He edited "McGee's Illustrated Weekly," which, while under his management, was highly successful. After his connection with this newspaper had ceased he travelled through the western and southern states and Mexico, and embodied his observations of those countries in magazine articles and letters to the press. On his return he became an editor of the "Catholic Review," and in 1881 of the "Freeman's Journal," of which he is now editor-in-chief (1887). He has published "That Girl of Mine," and several other anonymous novels (1879); "Preludes," a collection of his poems that had appeared in various magazines (1880); "Songs and Sonnets" (London, 1885); "The Theatre and Christian Parents" (1885); "Stories of Duty" (1885); "A Garden of Roses" (1886); and "The Life around Us," a collection of tales, with a strong religious tendency (1886).

EGAN, Michael, R. C. bishop, b. in Ireland; d. in Philadelphia, Pa., in 1814. He was educated in Ireland, where he became a priest of the Franciscan order. He came to the United States in 1802, labored as a missionary at Lancaster, Pa., and in 1804 made an unsuccessful attempt to found a province of the Franciscan order in the United States. He was then appointed pastor of St. Mary's church, Philadelphia. In 1810 he was consecrated bishop of the new diocese of Philadelphia, but was able to do little, owing to the opposition of the trustees of his cathedral, who insisted on having a voice in the selection of their pastors.

EGAN, Thomas W., soldier, b. in New York city in 1836; d. there, 24 Feb., 1887. He entered the 40th New York regiment at the beginning of the civil war, and was made lieutenant-colonel, 14 June, 1861. In June, 1862, he was promoted colonel, and participated in all the battles of the Army of the Potomac. During Gen. Grant's overland campaign of 1864 he commanded a brigade, receiving his commission 3 Sept., 1864, and was wounded at Petersburg. At the battle of Boydton plank-road he commanded the division, and was brevetted major-general. He was seriously wounded in November, and on recovery was given a division in the Army of the Shenandoah. Gen. Egan was mustered out of the service, 15 Jan., 1866, and subsequently lived in New York.

EGAÑA, Juan (a-gan'-ya), South American jurist, b. in Lima, Peru, in 1769; d. in Santiago, Chili, 13 April, 1836. He entered the seminary of Santo Toribio in 1776, distinguishing himself as a Latin scholar. At the age of sixteen he was supernumerary professor of philosophy, and in the five subsequent years occupied the chairs of law and theology, and meantime practised at the bar. In 1790 he started for Spain by way of Chili, but was persuaded to remain in the latter country by the regent of the supreme court, Francisco A. Moreno, who had been a judge in Lima, and held Egaña in great estimation. When, in 1810, Chili threw off the Spanish yoke for the first time, Egaña was called by the corporation of Santiago to aid in their work. He was elected a representative to the first congress, where he distinguished himself in debate, and afterward filled several commissions. After the victory of the royalists at Rancagua in October, 1814, Egaña was imprisoned in Santiago, and afterward in the penitentiary of the island of Juan Fernandez, remaining there until delivered by the victory of San Martin at Chacabuco, 12 Feb., 1817. He then reappeared in active life, with greater prestige for the sufferings he had undergone, and was appointed representative from Santiago to the assembly of plenipotentiaries that fixed on the form of government, and in 1823 presided over congress and the committee in charge of the formation of a constitution, distinguishing himself by his knowledge of history and politics. He was afterward re-elected to congress for several provinces. Egaña was the promoter of a benevolent society in Santiago. He was for years a senator, and devoted the latter part of his life to literary pursuits, writing numerous historical, geographical, and religious works.—His son, **Mariano,** Chilian jurist, b. in Santiago, Chili, 18 Sept., 1793; d. there, 24 June, 1846, studied in Spain, and at the age of eighteen was graduated at law. In 1813 he was appointed secretary of the sovereign junta of Chili. After the defeat of the insurgents at Rancagua, Egaña was exiled with his father, and on his return to Chili, in 1817, was appointed secretary of the general inspection of police, and afterward prosecutor of the court of appeals. In December of the same year he was given the secretaryship of the Economic junta. Egaña was elected a member of the municipality of Santiago in 1820, and in 1822 was appointed legal adviser of the city government. In January of the following year he was made chief clerk of the treasury and of the department of disputed claims. He was soon afterward appointed secretary of the provisional government, and in April, 1824, was made secretary of the treasury and of foreign relations. At the end of this year he was sent as minister to several European powers, and remained abroad till 1829. In 1830 he was secretary of the interior, and prosecutor for the supreme court of justice. In 1831 he was elected to congress, and was president of the National convention. In 1836 he was sent as minister to Peru, and, after efforts to arrange existing difficulties amicably, declared war by order of his government. He was minister of justice, worship, and public instruction in 1839, and in the following year was again minister to Peru. After his return to Chili he was minister of justice up to 1841, and while in this office he revised the Chilian code of law.

EGEDE, Hans, Danish missionary, b. in Harstadt, Norway, 31 Jan., 1686; d. on the isle of Falster, 5 Nov., 1758. He became pastor in Drontheim in 1707, and while there determined on a mission to Greenland for the purpose of converting the natives. After application to the bishops, which proved unsuccessful, as far as pecuniary assistance was concerned, he gave up his benefice at Vaagen in 1717, and removed to Bergen, where he endeavored to found a company to trade with Greenland. This likewise proved unsuccessful, and Egede determined to appeal to Frederick IV., at Copenhagen, under whose auspices a company was subsequently organized. In May, 1721, Egede sailed for Greenland on the "Haabet," with forty-six persons, landing in July at Baalsreiver, where they were hospitably received by the natives. For some years the mission had a hard struggle for life, and the colony was sustained only by the provisions sent annually by the king. Finally, in 1635, Egede returned to Copenhagen, bearing with him the remains of his wife, who had died during 1734, and to whose persistent courage and energy much credit is due for such success as the colony had. In 1740 a seminary for the Greenland mission was established in Copenhagen, and Egede became its superintendent, with the title of bishop. Seven years later he retired to the island of Falster, where he spent the remainder of his days with his daughter, Christina. He published "Relation angaaende den Grönlandske Missions Begyndelse og forsättelse," a description of his missionary labors (Copenhagen, 1738), and "Den gamle Grönlands nye Perlustration" (1741–'4), which was published in English as "A Description of Greenland" (1745). Bishop Egede is generally called the "apostle of Greenland."—His son, **Paul,** missionary, b. near Drontheim, Norway, in 1720; d. in Denmark, 3 June, 1789, accompanied his father to Greenland in 1721. In 1728 he returned to Copenhagen, bringing with him several Eskimos, with the design of civilizing them, but they soon died of the small-pox. He continued his theological studies till 1734, when he again went to Greenland, succeeding his father in 1735, and remaining in charge of the colony till 1740, when he withdrew, leaving it in a highly prosperous condition. On his arrival in Copenhagen he was made chaplain of the Hospital of the Holy Ghost, a member of the College of missions, and a director of the Hospital of orphans. In 1776 he was made bishop of Greenland, and later held the chair of theology in the University of Copenhagen. He published a "Greenland-Danish Latin Dictionary" (1750); "Greenland Catechism" (1756); and "Greenland Grammar" (1760). In 1766 he completed the translation of the New Testament into the Greenland tongue, begun by his father, and in 1787 translated "The Imitation of Christ." He published in 1789 a journal of his life in Greenland, giving a history of the mission from 1720 till 1788.

EGGLESTON, Edward, author, b. in Vevay, Ind., 10 Dec., 1837. His father, a lawyer of Virginian birth, died when his son was nine years of

age. He was prevented by delicate health from entering college, and his education was mainly self-acquired. In 1856 he spent four months in Minnesota for his health, and then, returning to Indiana, became a Methodist preacher, riding a four-weeks' circuit, and laboring with great persistence. After six months of this work, failing health compelled his return to Minnesota, where he was a general agent of the Bible society, and held pastorates at St. Peter's, St. Paul, Stillwater, and Winona. At times the state of his health forced him to abandon all pastoral work and support his family by various pursuits, which were "always honest, but sometimes very undignified." In 1866 he removed to Evanston, Ill., and for six months was associate editor of the "Little Corporal," a children's paper, to which he had previously contributed a series of "Round Table Stories." A year later he became editor of the "Sunday-School Teacher" in Chicago, whose circulation, under his management, increased in three years from 5,000 to 35,000. He also gained a reputation as speaker at Sunday-school conventions, and as a manager of Sunday-school teachers' institutes. During this time he had contributed to the "New York Independent," under the name of "Pen-holder," and in 1870 he removed to New York, and became its literary editor. On the retirement of Theodore Tilton, Mr. Eggleston succeeded him as superintending editor, but resigned in July, 1871, to become the editor of "Hearth and Home," which office he continued to hold for over a year. From 1874 till 1879 he held the pastorate of the Church of Christian Endeavor, in Brooklyn, but was again compelled by failing health to retire, and returned to literature, making his home of "Owl's Nest," on Lake George. Mr. Eggleston's novels, depicting early life in southern Indiana, have been widely read. Some of them have been reprinted in England, and translated into various foreign languages. In addition to a "Sunday-School Manual" (1870), and several works of a similar character, he has published "Mr. Blake's Walking-Stick" (Chicago, 1869); "Book of Queer Stories" (1870); "The Hoosier School-master" (New York, 1871); "End of the World" (1872); "Mystery of Metropolisville" (1873); "The Circuit Rider" (1874); "Schoolmaster's Stories for Boys and Girls" (1874); "Christ in Literature" (1875); "Christ in Art" (1875); "Roxy" (1878); and "The Hoosier School-boy" (1883). In 1878, in connection with his daughter, Mrs. Lillie E. Seelye, he began the publication of a series of biographies of American Indians for young people. It includes "Tecumseh and the Shawnee Prophet" (New York, 1878); "Pocahontas and Powhatan" (1879); "Brant and Red Jacket" (1879); and "Montezuma and the Conquest of Mexico" (1880). He has finished a novel, not yet published, and has in preparation (1887) a "History of Life in the United States," chapters of which have appeared in the "Century."—His brother, **George Cary**, b. in Vevay, Ind., 26 Nov., 1839, was educated at Indiana Asbury university and Richmond college, Va. Subsequently he studied law and began its practice in Virginia. After serving throughout the civil war as a private and subaltern in the Confederate army, he settled in the west, where he had charge of the correspondence of a large business house. In 1870 he became a reporter on the Brooklyn "Union," and soon afterward one of the editorial staff, where he remained till July, 1871, when he became managing editor of "Hearth and Home," and subsequently succeeded his brother as editor-in-chief. In 1874 he became editor of the "American Homes," and in 1875 literary editor of the New York "Evening Post," which appointment he held until 1881. During the three following years he was occupied in editing books and other literary work. He became literary editor of the "Commercial Advertiser" in March, 1884, and editor-in-chief in January, 1886. His contributions to magazines have been numerous, and he has published "How to Educate Yourself" (1872); "A Man of Honor" (1873); "A Rebel's Recollections" (Boston, 1874); "How to Make a Living" (New York, 1875); "The Big Brother" (1875); "Captain Sam" (1876); "The Signal Boys" (1877); "Red Eagle and the War with the Creek Indians" (1878); "The Wreck of the Red-Bird" (1882); "Haydn's Dictionary of Dates" (American edition, 1883); and "Strange Stories from History" (1885).

EGGLESTON, Joseph, soldier, b. in Amelia county, Va., 24 Nov., 1754; d. there, 13 Feb., 1811. He was graduated at William and Mary in 1776, and soon afterward joined the Revolutionary army, serving in the cavalry. In the southern campaign against Col. Tarleton, Capt. Eggleston commanded the rear guard of Col. Henry Lee's legion, and acquired the name of being one of the most efficient officers in the American cavalry. He was distinguished in the engagement at Guilford Court-House in March, 1781, and in the siege of Augusta in June of that year. The first success in the battle of Eutaw, in September, 1781, was the attack by Maj. Eggleston on the advance of the British forces. After the war he was a member of the Virginia assembly for several years, and was also a representative in congress from Virginia, serving from 3 Dec., 1798, till 3 March, 1801.

EGLE, William Henry, historian, b. in Harrisburg, Pa., 17 Sept., 1830. After receiving a public-school education he spent three years as a printer in the office of the "Pennsylvania Telegraph," and subsequently had charge of the state printing. In 1853 he became editor of the "Literary Companion," and also of the "Daily Times," both of which were soon discontinued. He then turned his attention to medicine, and was graduated at the medical department of the University of Pennsylvania in 1859, after which he settled in Harrisburg. He served during the civil war as surgeon of Pennsylvania volunteers, and in the Appomattox campaign was chief medical officer of Gen. David B. Birney's division in the 24th army corps. Since 1870 Dr. Egle has been surgeon of militia, and is now (1887) senior medical officer of the National guard of Pennsylvania. He turned his attention to historical research in 1871, and has been elected corresponding member of various historical and learned societies in the United States and England. In March, 1887, he was appointed state librarian of Pennsylvania. Among his works are "History of the Commonwealth of Pennsylvania" (Harrisburg, 1876); "Notes and Queries relating to Interior Pennsylvania" (3d series, 1881–'7); "History of the County of Dauphin" (1883); "History of the County of Lebanon" (1883); "Historical Register" (2 vols., 1883–'4); "Pennsylvania Genealogies, Scotch, Irish, and German" (1886); "Centenary Memorial of the Founding of the city of Harrisburg" (1886); and "Pennsylvania in the Revolution" (2 vols., 1887). He has also edited, with John Blair Linn, "Pennsylvania Archives" (2d series, 12 vols., 1874–'80).

EGLESTON, Thomas, engineer of mines, b. in New York city, 9 Dec., 1832. He was graduated at Yale in 1854, and at the École des mines, in Paris, in 1860, and in 1861–'4 had charge of the collections of mineral and metallurgical products in the

Smithsonian institution. In 1863 he published a plan for a school of mines, which resulted in the establishment of the present institution connected with Columbia college. Mr. Egleston was joined by Charles F. Chandler and Francis L. Vinton, and the school was developed under their joint supervision. He became professor of mineralogy and metallurgy there in 1864, and has since continued to hold that chair. Prof. Egleston was commissioner to make the geological survey of the Union Pacific railroad in 1866, commissioner to examine fortifications in 1868, and mint commissioner in 1870, 1878, and 1885. He has frequently been called in consultation as an expert on metallurgical subjects, and his opinion has been sought extensively throughout the United States as an expert in mining, on important points of furnace construction, the treatment of ores, and similar topics. In 1874 he received the degree of Ph. D. from Princeton and LL. D. from Trinity. Prof. Egleston is a member of numerous scientific societies, was vice-president of the New York academy of sciences for many years, and has been president of the American institute of mining engineers. He has taken out various metallurgical patents, and has written about a hundred papers on subjects connected with his specialties. He has published "Tables for the Determinations of Minerals" (New York, 1867); "Metallurgical Tables on Copper, Lead, Silver, Gold, and other Metals" (1868); "Tables of Weights, Measures, and Coins of the United States and France" (1868); "Metallurgical Tables on Fuels, Iron, and Steel" (1869); "Lectures on Mineralogy" (1871); and "The Metallurgy of Gold, Silver, and Mercury in the United States" (1887).

EGUIARA Y EGÚREN, Juan José (ay-ghee-ah'-rah), Mexican clergyman and author, b. in the city of Mexico in the latter part of the 17th century; d. there, 29 Jan., 1763. He studied at the college of San Ildefonso, and was afterward canon, professor of theology, and rector of the University of Mexico. His desire to give up his time to his literary tasks made him decline the bishopric of Yucatan, for which he was nominated. He was the author of the first dictionary of biography in South America, which he called "Biblioteca Mexicana," containing the results of much curious research (Mexico, 1765). He printed the first volume of this work, containing the letters A, B, and C, in his own press, and left in manuscript other volumes, which are in the library of the cathedral of Mexico. Among his other works are "Prælecciones" (1726–'47); "Selectæ disertationes Mexicanæ ad Scholasticam speciantes Theologiam" (3 vols., 1746); "La Nada contrapuesta en las balanzas de Dios al aparente peso de los hombres" (1727); and "Vida del V. P. Pedro Arellano Sosa, primer Preposito de San Felipe Neri" (1735).

EHNINGER, John Whetton, artist, b. in New York city, 22 July, 1827. He was graduated at Columbia in 1847, and in 1848–'9 studied art in Thomas Couture's studio in Paris. The subject of his first oil-painting, "Peter Stuyvesant" (1850), was taken from Irving's "Knickerbocker's History of New York," and was engraved by the American art union. He went abroad again in 1851–'2, and visited Dusseldorf and other art centres. Besides drawings in outline, pencil, and India ink, he has produced a series of etchings illustrating Hood's "Bridge of Sighs" (1849); a series on Irving's story of "Dolph Heyliger" (1850); and a set of eight illustrations for Longfellow's "Miles Standish" (1858). His best known paintings are "New England Farmyard"; "Yankee Peddler"; "Love me, Love my Horse"; "The Foray"; "The Sword"; "Lady Jane Grey"; "Christ Healing the Sick"; "Death and the Gambler"; "Autumnal Landscape" (1867); "Monk" (1871); "Vintage in the Valtella" (1877); and "Twilight from the Bridge of Pau" (1878).

EICHBERG, Julius, musician, b. in Düsseldorf, Germany, in 1824. At seventeen years of age he entered the conservatory at Brussels as a pupil of De Beriot, and studied composition under Fetis. He was afterward professor of the violin at the conservatory of Geneva. Being advised to take a sea-voyage for his health he came to the United States, and settled in Boston, Mass. While director of the Boston museum, from 1859 till 1866, he became known as the first composer of English-American operas. "The Doctor of Alcantara" was written in 1862, followed by "The Rose of Tyrol," "A Night in Rome," and "The Two Cadis." In 1867 he became director of the Boston conservatory of music, and in the same year was elected superintendent of music in the public schools of Boston, which position he still holds.

EIDLITZ, Leopold, architect, b. in Prague, Bohemia, 29 March, 1823. He was educated at the Polytechnic school in Prague, and in Vienna, emigrated to this country, and became an architect in New York city. Among the buildings designed by him are Christ church, St. Louis; St. George's church, New York city; the Brooklyn academy of music; the Dry-dock bank building, on the Bowery, New York; and the Continental bank building in that city. In 1875, with Frederick Law Olmsted and Henry H. Richardson, he was appointed on a commission to consider the work already accomplished in the building of the capitol at Albany. An elaborate report was made, and preliminary studies for the completion of the building were undertaken by Mr. Eidlitz. Subsequently its continuation was confided to Mr. Richardson, but much of the dignity of the work in its present condition is due to the designs of Mr. Eidlitz. He has published "The Nature and Function of Art" (New York, 1881). — His son, **Cyrus Lazelle Warner,** architect, b. in New York city, 27 July,

1853, was educated in New York, Geneva, Switzerland, and at the Polytechnic institute in Stuttgart. Among the buildings that he has designed are the Michigan central railway station in Detroit (1880), the Dearborn station in Chicago (1883), and the Buffalo library, which is represented in the annexed picture (1886).

EIGENBRODT, Lewis Ernest Andrew, educator, b. in Lauterbach, Hesse Darmstadt, 22 Sept., 1773; d. 30 Aug., 1828. He was graduated at the University of Giesen in 1793, was master of seven languages, skilled in mathematics, astronomy, and engineering, and had taken a full

course in divinity. He came to the United States in 1793; and, after spending four years in private tuition and further studies, he was made in 1797 principal of Union Hall academy at Jamaica, N. Y., which his genius, energy, and ability soon made celebrated. Pupils flocked to it from all parts of the United States and from the West India islands, and many men received their early training there who have since been distinguished. Mr. Eigenbrodt received the degree of LL. D. from Union in 1825. He delivered an oration in honor of George Washington on the day of the latter's funeral, 18 Dec., 1799.—His son, **David Lamberson,** physician, b. in Jamaica, N. Y., 5 Sept., 1810; d. in New York, 3 Jan., 1880, was graduated at Washington (now Trinity) college in 1831, and at the College of physicians and surgeons, New York, in 1835. After useful services in the New York hospital and at Bellevue, where he was in charge of the cholera hospital, he removed to St. Jago de Cuba, where he practised medicine for fifteen years. On his return to New York, he organized in 1858, at the request of Dr. Muhlenberg, both the surgical and medical departments of St. Luke's hospital, then just established, and took charge of that institution as its first resident physician, giving his services gratuitously for a year, at the end of which time he retired to private life.—Another son, **William Ernest,** clergyman, b. in Jamaica, N. Y., 10 June, 1813, was educated at Union Hall academy, and at Columbia, where he was graduated in 1831. He then studied in the General Protestant Episcopal theological seminary, New York, and entered the ministry of that church. He was engaged in professional duties in Bainbridge and Rochester from 1838 till 1846, in which year he was chosen rector of All Saints' church, New York city. He became associate minister of Calvary church, New York, in 1858, and in 1862 was made professor of pastoral theology in the General theological seminary, where he has since remained. He was secretary of the convention of the diocese of New York from 1854 till 1883. Columbia gave him the degree of D. D. in 1855.—Another son, **Charles S.,** soldier, b. in Jamaica, N. Y., 20 March, 1825; d. in Virginia, 25 Aug., 1864, was one of the pioneers who went to California in 1849. He settled at Alameda, and remained there till 1863, when he raised in California a battalion of cavalry, afterward enrolled in the second Massachusetts cavalry. Capt. Eigenbrodt continued at the head of his troops for more than a year, and fell, at their head, in a charge in the Shenandoah valley. An address on the Eigenbrodt family was delivered by the Rev. Bundy R. Belts before the New York genealogical and biographical society, 11 March, 1887.

EILERS, Frederic Anton, metallurgist, b. in Laufenselten, Nassau, Germany, 14 Jan., 1839. He was educated at the mining-school in Clausthal and in the University of Göttingen. Soon after the completion of his studies he came to the United States, and from 1869 till 1876 held the office of deputy U. S. commissioner of mining statistics. Subsequently he was occupied in building and managing smelting-works for lead and silver in Utah and Colorado. He is at present (1887) general manager of the Colorado smelting company's works at South Pueblo, Col. Mr. Eilers is considered one of the foremost experts in the United States in his branch of metallurgy, and, while he has never patented any of his own inventions, he has done more than any other person to improve American methods in the treatment of lead and silver. This he has accomplished by making possible the long, continuous running of large shaft furnaces in the smelting of argentiferous lead-ores. The most important elements of this improvement are the use of water-jackets and the scientific and precise adjustment of charges with reference to their chemical composition and the fusion-point of slags. The "chills" or "salamanders," formerly so frequent in furnaces of this type, and not only necessitating stoppages but compelling the use of small furnaces, have thus been obviated. Some of his improvements are adopted in Europe. He is the author of various professional papers.

EINHORN, David, b. in Dispeck, Bavaria, 10 Nov., 1809; d. in New York city, 2 Nov., 1879. He was educated at the rabbinical school of Fuerth, and subsequently at the universities of Munich and Wurzburg. Espousing the cause of radical reform in Judaism, he was chosen rabbi at Hopstadter, and afterward chief rabbi of Mecklenburg-Schwerin. He was called to Pesth in 1851, where his advanced views met with such opposition that his temple was closed by the Austrian government. In 1855 Dr. Einhorn was invited to assume charge of a Hebrew congregation in Baltimore, Md., and during his incumbency published a prayer-book, which has a wide circulation in the United States, and also a German magazine, "Sinai," devoted to interests of radical reform. In 1861 he was such a staunch Unionist that his Baltimore pastorate was exchanged for one in Philadelphia. In 1866 Dr. Einhorn removed to New York, where he held a rabbinical position till his death. A collection of his addresses has been issued in German.

EISFELD, Theodore, musician, b. in Wolfenbüttel, Brunswick, Germany, in 1816; d. in Wiesbaden, 16 Sept., 1882. His chief instructor in musical composition was C. G. Reissiger, of Dresden. He came to New York in 1848, and in 1849 was chosen conductor of the Philharmonic society in that city. From 1855 till the season of 1865–'6, when he resigned, he conducted the society alternately with Carl Bergmann. On 18 Feb., 1851, he began a series of quartet concerts, the first being given on the date mentioned at Hope chapel. On his return trip from a visit to Europe in 1858, he was one of the few survivors of the burning of the steamer "Austria." He was lashed to a platform and so drifted on the ocean, without food, for nearly two days and nights. Eisfeld never recovered from this extraordinary prostration. He returned to Germany in 1866, and remained there till his death. He was also the first conductor of the New York harmonic society, which began the custom of giving an annual Christmas performance of the "Messiah."

EKIN, James Adams, soldier, b. in Pittsburg, Pa., 31 Aug., 1819. He was a ship-builder prior to 1861, but at the beginning of the civil war entered the 12th Pennsylvania infantry as 1st lieutenant and regimental quartermaster, and at the expiration of three months was made captain and assistant quartermaster in the volunteer army, being stationed in Pittsburg as acting assistant commissary of subsistence. In October, 1861, he was made assistant quartermaster and stationed in Indianapolis until December, 1863, when he was admitted to the regular army with similar rank, to date from March, 1863, and assigned to duty as quartermaster of the cavalry bureau in Washington till February, 1864. He was then promoted to lieutenant-colonel and made chief quartermaster of the cavalry corps of the Army of the Potomac, remaining as such until August, when he was advanced to colonel and given charge of the 1st division of the quartermaster-general's office in Washington, where he continued till 1870, holding various appointments in

that office. Subsequently he was chief quartermaster of the 5th military district and the department of Texas, then chief quartermaster of the department of the South, and in similar capacity in Jeffersonville, Ind., and finally disbursing agent of the quartermaster's department in Louisville, Ky., being assistant quartermaster-general of the army from February, 1882. He received the brevet of brigadier-general in the volunteer army, and those of major to brigadier-general in the regular army, for his services during the war. In August, 1883, he was retired, and has since resided in Louisville.

ELBERT, Samuel, soldier, b. in Prince William parish, S. C., in 1743; d. in Savannah, Ga., 2 Nov., 1788. He became an orphan at an early age, and went to Savannah, where he engaged in commercial pursuits. In June, 1774, he was elected captain of a grenadier company, and later was a member of the Savannah committee of safety. He entered the Continental army with the rank of lieutenant-colonel under Col. Lachlin McIntosh in February, 1776, and was promoted to colonel in September, 1776. In May of the following year he was given command of an expedition against the British in East Florida, and in April, 1778, captured Fort Oglethorpe in Frederica, Fla. Later in the same year he was actively engaged in the vicinity of Savannah, and behaved gallantly when the attack was made on that city in December, 1788, by Col. Archibald Campbell. He distinguished himself in the action at Brier creek, where he commanded a brigade under Gen. John Ashe, 3 March, 1789, and was made prisoner. After his exchange he joined the army under Gen. Washington, and was present at the surrender of Lord Cornwallis. He received the brevet of brigadier-general on 3 Nov., 1783, and in 1785 was elected governor of Georgia, succeeding John Houston. Subsequently he held the rank of major-general of the state militia. Elbert county, in Georgia, was named in his honor.

ELCANO, Juan Sebastian (el-cah'-no), Spanish navigator, b. in Guetaria, Spain, in 1476; d. at sea, 4 Aug., 1526. In his early life he was captain of a vessel trading to the Levant and Africa. On 15 Aug., 1519, he sailed from San Lucar, in command of the "Victoria," one of the five ships of Magellan's fleet, which had been sent to discover a western passage to the Spice or Molucca islands, and was with that navigator, 21 Oct., 1520, at the discovery of the strait afterward called by his name. After the death of Magellan, and that of his successor, Carabello, and the destruction of most of the fleet, Elcano, with the only surviving ship, continued his voyage toward the Moluccas, and, after having established friendly relations with one of the native sovereigns, sailed around the Cape of Good Hope, and returned to San Lucar on 6 Sept., 1522. Elcano was the first seaman who ever made the complete circuit of the globe. Elcano contributed to the establishment of a Spanish factory in the island of Lidor, and explored several other islands. When he returned to Spain, Charles V received him with distinction and gave him a pension, and a coat-of-arms bearing the inscription "Primus circumdedisti me." On 25 July, 1525, Elcano sailed again from Spain, in a second expedition under command of Garcia Loaiza, and, after making some explorations on the eastern coast of South America, passed again through Magellan's strait, 26 May, 1526. Loaiza died on 30 July, and Elcano succeeded him, but did not long survive him.

ELDER, George A. M., educator, b. in Hardin's Creek, Ky., in 1794; d. in Bardstown, Ky., in 1838. He was sent to Mount St. Mary's college, Emmettsburg, in 1810, and afterward to the seminary of the Sulpitians, in Baltimore, where he finished his ecclesiastical studies. He was ordained a priest of the Roman Catholic church in 1819, and commissioned by his superiors to found a college in Bardstown, Ky. Between the years 1820 and 1823 he erected the College of St. Joseph, which was at that time one of the largest and best-appointed school structures in the west. He acted as president of this institution till his death. He was also one of the editors of the "Catholic Advocate," published in Bardstown, and author of a work entitled, "Letters to Brother Jonathan."

ELDER, John, clergyman, b. in County Antrim, Ireland, in 1706; d. near Harrisburg, Pa., in 1792. He studied for the ministry with his uncle, a Presbyterian clergyman in Edinburgh, and about 1736 followed his father, who had emigrated in 1730, and settled near Harrisburg. He was installed over the churches of Paxton and Derry, 22 Nov., 1738, and remained in that relation till his death. He trained his parishioners for cavalry service against the Indians, and afterward received a colonel's commission from the proprietaries and had charge of the block-houses from Easton to the Susquehanna. His band of rangers in 1763 massacred the Conestoga Indians against his advice.

ELDER, Joseph Freeman, clergyman, b. in Portland, Me., 10 March, 1839. He was graduated at Portland high school in 1856, and at Waterville college (now Colby university) in 1860. After an interval of teaching he entered the Rochester, N. Y., theological seminary, where he was graduated in 1867. In May of that year he was ordained pastor of the North Orange Baptist church, Orange, N. J., and on 1 Jan., 1870, went to New York city and assumed charge of the church now called the Baptist church of the Epiphany (formerly Oliver street Baptist church), of which he is still (1887) the pastor. He was president of the Baptist state convention of 1884–'5, and in the latter year became president of the New York Baptist city mission.

ELDER, Susan Blanchard, author, b. in Fort Jessup, La., about 1835. Her childhood was passed at an extensive frontier military post, where her father, Gen. Albert G. Blanchard, then a captain in the army, was stationed. She was educated in St. Michael's convent of the sacred heart, New Orleans, and was married at an early age to Charles D. Elder, of that city. After the capture of New Orleans she went with her husband to Selma, Ala., where she turned her cottage into a hospital for wounded soldiers. After the war she became professor of natural science in the New Orleans high-school, and editor of the "Morning Star" newspaper of that city. When sixteen years of age she began to write for the press under the name of "Hermine." Her writings comprise poems, histories, and several dramas intended for representation in Roman Catholic colleges. She has published "The Loss of the Papacy"; "James the Second"; "Savonarola"; and "Ellen Fitzgerald," a tale, dealing with southern scenes and incidents. She has also contributed extensively to Roman Catholic publications, and her devotional poems are very popular among her coreligionists.

ELDER, William, physician, b. in Somerset, Pa., 23 July, 1806; d. in Washington, D. C., 5 April, 1885. He practised his profession in Philadelphia, and was well known as an abolitionist and as an editorial writer and public speaker in the period preceding the civil war. He is the author of "Periscopics," a volume of miscellanies (New York, 1854); "The Enchanted Beauty" (1855); "Life of Dr. E. K. Kane" (Philadelphia,

1857); "The Debt and Resources of the United States" (1863); "Questions of the Day" (1871); and "Conversations on Political Economy" (1882). —His nephew, **Cyrus,** author, b. in Somerset, Pa., 16 June, 1833, was educated in the common schools, and served during the civil war as 1st lieutenant and quartermaster of the 10th Pennsylvania reserves. He edited the "Industrial Bulletin" in 1870–'5, and was appointed in 1881 a commissioner to revise the revenue system of Pennsylvania. He is the author of "My Gift," a volume of poems (New York, 1867); "Dream of Free-Trade Paradise" (Philadelphia, 1872); and "Man and Labor" (Chicago, 1886).

ELDER, William, Canadian journalist, b. in Malin, County Donegal, Ireland, 22 July, 1822; d. in St. John, N. B., in 1882. He was educated at Queen's college, Belfast, and at the universities of Glasgow and Edinburgh, studied theology, and was for some time a minister in the Presbyterian church. He afterward came to New Brunswick, and at once attained prominence as a public writer and speaker. He edited the "Colonial Presbyterian" and the "Morning Journal" at St. John for a term of years, and was chief editor and proprietor of the St. John "Daily Telegraph." He was a member of the grammar-school board and of the council of the Dominion board of trade. He was an unsuccessful candidate for the Dominion parliament at the general election in 1872, was first returned for the legislature of New Brunswick in 1878, and was re-elected in 1882.

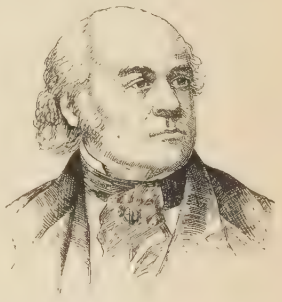
ELDER, William Henry, archbishop, b. in Baltimore, Md., in 1819. He was educated in Mount St. Mary's college, Emmettsburg, and afterward in the college of the Propaganda, Rome. After his ordination, in 1846, he was appointed president and professor of theology in Mount St. Mary's, where his ability attracted notice, and he was elected bishop of Natchez in 1857. When the civil war began he devoted all his energies to the care of the sick and wounded. Having refused to obey an order of the post commandant at Natchez, in 1864, who insisted on his inserting a form of prayer for the president of the United States in his ritual of worship, he was arrested and sent out of his diocese to Vidalia, La., but the order was subsequently revoked. He labored fearlessly in aid of the yellow-fever sufferers in the epidemic of 1878, and was himself stricken down by the disease. In 1879 he was named coadjutor archbishop of San Francisco, but declined, giving as his reason that he could not leave his diocese when his people were suffering from yellow-fever. In 1880 he was ordered by the pope to proceed as coadjutor archbishop to Cincinnati, which diocese had become involved in great financial difficulties. He did so, still retaining the administration of Natchez. He presided over the fourth provincial council of Cincinnati, held in 1882, and on the death of Archbishop Purcell, in the same year, became archbishop of Cincinnati.

ELDRIDGE, Charles A., politician, b. in Bridport, Vt., 27 Feb., 1821. He removed with his parents to New York, where he studied and began the practice of law, and in 1848 settled in Fond du Lac, Wis. He was a member of the state senate in 1854–'5. In 1862 he was elected a member of Congress as a democrat, and was five times re-elected, serving from 7 Dec., 1863, to 3 March, 1875. On 1 Feb., 1864, he offered a resolution condemning the draft as contrary to the genius of republican government, and on 21 March of the same year one calling upon the president to furnish the names of all persons that had been arrested for political cause.

ELDRIDGE, Edwin, capitalist, b. in 1811; d. in Elmira, N. Y., 16 Dec., 1876. He became a physician; was largely engaged in coal-mining and iron manufacturing, became president of the Elmira iron and steel company, and was long connected with the Erie railroad. Dr. Eldridge gave a public park to Elmira, and contributed materially to the progress of that town.

ELDRIDGE, Hamilton N., soldier, b. in South Williamstown, Berkshire co., Mass., 23 Aug., 1831; d. in Chicago, Ill., 27 Nov., 1882. He was graduated at Williams in 1856, in the same class with James A. Garfield, and at the Albany law institute in 1857, and began practice in Chicago. In July, 1862, with his partner, Col. F. W. Tourtellotte, he raised the 127th Illinois regiment, and was made its lieutenant-colonel. He commanded the regiment in the operations of Gen. Sherman from Memphis to Grenada and Chickasaw bayou, distinguished himself at Arkansas Post, was promoted colonel, and took part in the siege of Vicksburg, where he bore the colors with his own hand, after several color-bearers had been shot, and led his regiment, in advance, to the fortifications of the enemy. After the surrender, he was compelled by sickness to resign, but was brevetted brigadier-general for gallantry. After a slow recovery he resumed the practice of law in Chicago.

ELGIN, James Bruce, eighth earl of Elgin, and twelfth of Kincardine, British statesman, b. in London, 20 July, 1811; d. in Dhurmsala, India, 20 Nov., 1863. He was educated at Eton, and at Christ church college, Oxford, where he was graduated in 1833. He began his public life in 1841, as a member of parliament for Southampton, and before the end of the year succeeded to the title and estates of his father. He was appointed governor of Jamaica in 1842, but found the legislature of that island determined to disregard the rights of the recently emancipated slaves, and in 1846 was recalled at his own request. He was then appointed governor-general of Canada, and arrived there early in 1847. Soon after his arrival he signed a bill providing for compensation to loyalists in Lower Canada for losses sustained in the rebellion of 1837. This bill had been bitterly opposed, and, when it became known that the governor-general had signed it, a meeting was held in Montreal at which violent speeches were made. After the meeting a mob dispersed the parliament, then in session in that city, and burned the parliament buildings and their contents. The assembly next met in Bonsecours market, and passed an address eulogizing the action of Lord Elgin. He drove into the city from Monklands, his residence, to the government house, to receive the address, and was assailed on the way by the mob with volleys of stones. His country residence was threatened, and had to be guarded, and for several weeks he remained there, that he might not provoke an outbreak by his presence in the city. He refused to



Elgin & Kincardine

make use of the troops, saying, "I am prepared to bear any amount of obloquy that may be cast upon me, but, if I can possibly prevent it, no stain of blood shall rest upon my name." He thought it right, however, to offer his resignation to the home government, but it was not accepted. The minority in Canada then made an unsuccessful appeal to the British parliament to have the obnoxious bill rescinded. Toward the end of September of the same year the arrest of some persons charged with being implicated in burning the parliament building produced a second outbreak, during which a young man was killed, and his funeral was made the pretext for a riotous demonstration. The magistrates of Montreal requested Lord Elgin to proclaim martial law, but he still refused, and the malcontents were finally quieted by a proclamation from the mayor. During the autumn, to disprove the statement that he required protection, Lord Elgin visited western Canada, without military escort, and was received with enthusiasm, except in a few of the large cities, where his opponents were able to cause disturbances. Lord Elgin's policy of conciliation was regarded by some of his warmest friends in Great Britain as weak and nerveless, but, after the passion consequent upon these events had subsided, it was clearly perceived that it required greater courage to submit patiently to unjust reproaches than to crush opposition by a display of force. But a new trouble soon followed the commotion over the losses bill. In 1849, during a period of commercial depression, a manifesto appeared urging annexation with the United States, which was signed by many prominent men throughout Canada. This remedy had often been offered for the same evil, and to put a stop to such suggestions the governor proposed free navigation and a reciprocity treaty with the United States, at the same time assenting to the dismissal of all officials who had signed the annexation manifesto. In June, 1849, the abolishing of the imperial navigation laws resulted in greatly stimulating Canadian trade, and, after several years of fruitless diplomacy, Lord Elgin went, in 1854, to Washington, where he negotiated a treaty with Sec. Marcy, which was ratified by the senate, and continued in force till it was terminated in 1864 by President Lincoln. Other important measures of Lord Elgin's administration were the repeal of the imperial act relating to the clergy reserves in 1853, the devotion of those reserves to education and other public purposes in 1854, and the abolition of seignorial tenure in Lower Canada in the same year. Lord Elgin never opposed the popular voice, as expressed by the majority in parliament. His principle was "to let the colony have its own way in everything that was not contrary to public morality or to some imperial interest." The constitution of the legislative council early attracted his attention, and, in a letter to Earl Grey in 1850, he expressed himself as favoring its being made elective, but the proposition met, strangely enough, with a most determined opposition from such reformers as Robert Baldwin, George Brown, and others. He deserves the credit of setting before himself the noblest ideal of free colonial government, and of having largely realized it in practice. He surrendered the government to his successor in December, 1854, and on his return to England declined the chancellorship of the duchy of Lancaster. In 1857 he was appointed high commissioner to China during the trouble with that country, and, after penetrating with British troops to Pekin in June, 1858, concluded the treaty of Tientsin with the Chinese government. He became postmaster-general, and in 1861 accepted the governor-generalship of India. He left England, to assume his new duties, in January, 1862, and during the period that elapsed before his death was successful in his administration of the government.

ELIAS, Domingo (ay-lee'-as), Peruvian statesman, b. in Ica, Peru, in 1805; d. in Lima in 1867. He was educated in Spain and France, returned to Peru in 1825, and from the beginning took great interest in the new republic. He was the first in Peru to turn his attention to the planting of cotton on a large scale, and to the elaboration of wines, and the first that introduced there Chinese laborers. He founded in Lima the College of Nuestra Señora de Guadalupe. When Gen. Vivanco headed the revolution of Arequipa, Elias was the first to lend him a helping hand. Elias was then temporarily in charge of the government at Lima, and he was asked to exert his influence with the opposing armies, in order to avoid war, and to appeal to the country for a decision. But Vivanco and Castilla preferred to settle the matter by arms, and Vivanco was defeated at the battle of Carmen Alto in 1844. Elias surrendered the command to the one designated by law, elections were held, and Castilla was chosen 1 April, 1845. Elias was then appointed councillor of state and elected to congress. At the expiration of his term of office, he was a popular candidate for the presidency, and it was the first time that serious efforts were made to elect a candidate from civil life; but the military candidate, Gen. Echenique, was proclaimed constitutional president in 1851. In 1854 Elias proclaimed a revolution at Ica, and at his own expense organized a division, with which he offered battle to the government forces at Saraja, and was defeated. He then marched southward, to confer with Gen. Castilla, who had proclaimed a revolution at Arequipa. Castilla advanced upon Cuzco to organize his army, and Elias remained in the department of Moquegua, as chief commander of the south. Elias suddenly attacked the city of Arequipa, 1 Dec., 1854, and the government forces were defeated. A few days afterward the liberating army approached the capital, and Gen. Castilla won the victory of Palma, 5 Jan., 1855. This revolution was of great benefit to Peru, as it freed the slaves, and abolished the Indian taxes. Gen. Castilla, as provisional president, organized his cabinet, and appointed Elias secretary of the treasury, who soon afterward was sent to France as minister. In 1858 he was nominated for president of the republic, but was not elected.

ELIOT, Andrew, clergyman, b. in Boston, Mass., 28 Dec., 1718; d. there, 13 Sept., 1778. His great-grandfather, Andrew Elliott, of Somersetshire, settled in Beverly, Mass., about 1683. He was graduated at Harvard in 1737, and in 1742 was ordained as colleague pastor with Mr. Webb, of the New north church in Boston, where he remained until his death, being sole pastor after 1750. The University of Edinburgh gave him the degree of D. D. in 1767, and in 1765 he was chosen to the corporation of Harvard, afterward declining an election to the presidency in 1773. During the British occupation of Boston, Dr. Eliot did much to alleviate the sufferings of the people, but, notwithstanding his devotion to the patriot cause, his moderation won him the respect of the royalists. When Gov. Hutchinson's house was plundered by a mob, Dr. Eliot saved a large number of valuable manuscripts, including the second volume of the "History of Massachusetts Bay." He was much interested in the conversion of the Indians, and labored for the passage of an act, which was after-

ward vetoed by the governor, to establish in Massachusetts a society for propagating the gospel among the Indians, similar to that in London, of which he was a member. He took an active part in upholding the Congregational system against the Episcopalians, and published occasional discourses and a volume of sermons (1774). He also sent to a friend in England, in 1768, an account of the effects of the dispute between the colonies and the mother country, which was praised for its candor and moderation.—His son, **John,** clergyman, b. in Boston, Mass., 31 May, 1754; d. there, 14 Feb., 1813, was graduated at Harvard in 1772, began to preach in 1776, and was for a short time chaplain of a Boston regiment. On 3 Nov., 1779, he was ordained as his father's successor in the pastorate of the New north church, where he remained until his death. He received the degree of D. D. from Edinburgh university in 1797, and was chosen a member of the Harvard corporation in 1804. Dr. Eliot was intimately associated with Jeremy Belknap in the formation of the Massachusetts historical society, and was a principal contributor to its collections and to its library of rare books. Besides numerous articles in the Historical society's collections, and various sermons, he published a "Biographical Dictionary of Eminent Characters in New England" (Salem and Boston, 1809).—Another son, **Ephraim,** was graduated at Harvard in 1780, and became a druggist in Boston. He published "Historical Notices of the New North Religious Society, with Anecdotes of Rev. Andrew Eliot and John Eliot" (1822).

ELIOT, Charles, author, b. in Boston in 1791; d. in 1813. He was graduated at Harvard in 1809, and studied divinity, but gave up preaching on account of failing health. His first writings appeared in the "General Repository," a Boston periodical, and he was specially interested in the preparation of Scheusner's "Lexicon." His "Miscellaneous Writings" were edited by Andrews Anton (Cambridge, 1814). — Charles's nephew, **Samuel,** author, b. in Boston, Mass., 22 Dec., 1821, was graduated at Harvard in 1839, spent two years in a Boston counting-house, and four years in foreign travel and study. On his return he took private pupils, organized a charity-school for vagrant children, and instructed classes of young workingmen gratuitously. He was professor of history and political science in Trinity college, Hartford, Conn., in 1856–'64, its president in 1860–'4, and lecturer on constitutional law and political science in 1864–'74. He also lectured at Harvard in 1870–'3, was head master of the girls' high-school in Boston in 1872–'6, and superintendent of Boston public schools in 1878–'80. He was an overseer of Harvard in 1866–'72, and in 1868–'72 was president of the American social science association, by which the first movement in favor of civil service reform was organized in 1869. He became a member of the Boston school committee in 1885, and is president of various charitable and educational institutions. Columbia gave him the degree of LL. D. in 1863, and Harvard in 1880. He has published "Passages from the History of Liberty" (Boston, 1847), and "The Liberty of Rome" (2 vols., New York, 1849; revised ed., entitled "The Ancient Romans" Boston, 1853). This forms Part I. of a "History of Liberty," of which Part II. is entitled "The Early Christians" (2 vols., 1853). The plan of the work embraces five parts, of which the three remaining are to treat of the "Papal Ages," the "Monarchical Ages," and the "American Nation." Dr. Eliot has also published a "Manual of United States History between the Years 1792 and 1850" (Boston, 1856; revised ed., 1873); three volumes of selections for public schools, entitled "Poetry for Children" (1879); "Stories from the Arabian Nights" (1879); and "Selections from American Authors" (New York, 1879); and many reviews, essays, and addresses, issued in pamphlet form.

ELIOT, John, first styled "the Indian apostle" by Thomas Thorowgood in 1660, a designation so appropriate that it has secured universal and perpetual acceptance, b. probably in Widford, Hertfordshire, England, as there is a record of his baptism in that parish on 5 Aug., 1604; d. in Roxbury, Mass., 21 May, 1690. His father, Bennett, a yeoman, was a landholder in the parishes of Ware, Widford, Hunsdon, and Estweeke, in the county of Hertford, and elsewhere, and he bequeaths in his will, made 5 Nov., 1621, the profits of these lands, to the amount of £8 annually, to "Trusty and well-beloved friends,"

John Eliot

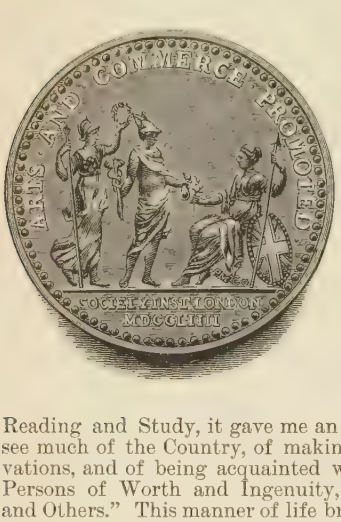
for the maintenance of his son John in the University of Cambridge, "where he is a Schollar." He had matriculated as a "pensioner" (i. e., one who pays his own expenses) at Jesus college, 20 March, 1619, and the degree of A. B. was conferred upon him in 1622. The only record of his life during the next nine years is that he was employed as a teacher in a grammar-school at Little Baddow, near Chelmsford, England, established by the Rev. Thomas Hooker, the illustrious pastor of the church that, first established at Cambridge, Mass., was removed to Hartford, Conn. In Anderson's "History of the Colonial Church" (London, 1856) is the following statement respecting Mr. Eliot: "That he had entered into holy orders in the Church of England before he left home is evident from the insertion of his name in the list given by Neal of the emigrant clergy." The Church of England was then dealing rigorously with those who did not conform to her doctrines and ordinances. Imprisonment awaited those who were bold in their opposition, and many hastened to the New World as a refuge from persecution. John Eliot landed at Boston, Mass., 4 Nov., 1631. Three brothers and three sisters accompanied him, or came a few years later. In his record he writes, "he adjoyned to the church at Boston, and there exercised, in the absens of Mr. Wilson, the pastor of yt church, who was gone back to England." His labors gave the greatest satisfaction, as is evident from a passage in his record: "The next summer Mr. Wilson returned, and by yt time the church at Boston was intended to call him to office." But, he says, he was "foreingaiged" to friends who had crossed the ocean and settled at Roxbury. The record of Gov. Winthrop is: "Though Boston laboured all they could, both with the congregation of Roxbury and with Mr. Eliot himself, alleging their want of him and the covenant between them, etc., yet he could not be diverted from accepting the call of Roxbury." Here he became the "teacher" of the church, with which he retained a life-long connection, having Mr. Weld,

Mr. Danforth, and Mr. Walter as colleagues, and at long intervals being without clerical assistance. A time-worn manuscript volume, now in the keeping of the New England historic-genealogical society, Boston, contains the record of his church work, vast and interesting. It has been printed by the city of Boston as "A Report of the Record Commissioners, Document 114" (1880); and, with notes, in the New England "Historical and Genealogical Record" (vols. 33 and 34). His active and aggressive spirit twice brought him into unpleasant relations with the civil authorities in 1634, for criticising the method of making a treaty with the Pequods, and again in 1660, when one of his publications, written several years previously, "The Christian Commonwealth," was "condemned, and by order of the general court suppressed." Explanations and acknowledgments led to a speedy and satisfactory settlement. Several petitions in his handwriting, signed by himself and others, to the general court, attest the interest that he took in the secular affairs of the commonwealth. In 1637 he took part in the examination of Mrs. Ann Hutchinson for her religious opinions, which were repulsive to him, and for which she was banished. An account of her trial may be found in Thomas Hutchinson's "History of the Province of Massachusetts Bay from 1628 to 1749." Eliot's fame depends mainly upon his labors in Christianizing the Indians. The translations of the Bible, and several other books into their language, are his imperishable monument. As far north as the Merrimac river, as far east as Cape Cod, to the towns in the southern part of Massachusetts, to Brookfield, sixty miles west of Roxbury, to northeastern Connecticut, and to the vicinity of Hartford and to Martha's Vineyard, he travelled, proclaiming the gospel to the red man with an enthusiasm that brought thousands under its influence. A pamphlet of twenty-five pages, entitled "The Day-breaking, if not the Sun-rising, of the Gospel with the Indians in New England" (London, 1647), gives "a true relation of our beginnings with the Indians." At Nonantum, in the northeast corner of Newton, on the south side of Charles river, about five miles from Roxbury, on 28 Oct., 1646, "four of us" went to the wigwam of Waaubon, and there met a company of Indians, men, women, and children, "gathered together from all quarters round about." After a prayer in English, Mr. Eliot preached to them in their own tongue for an hour and a quarter. When asked if they understood all that he had said, many voices replied in the affirmative. Questions followed, curious, wonderful, and interesting. The meeting lasted three hours, and the Indians said they were not weary; but their instructors resolved to leave them "with an appetite." An appointment for another meeting was made, and apples were given to the children, and tobacco to the men. The Indians desired more ground to build a town, and it was promised that the government should be petitioned in their behalf for this purpose. The second meeting differed from the first in this: it was closed with a prayer "in their own language for above a quarter of an hour." The pamphlet describes also a third and a fourth meeting. The Indians showed great willingness to receive the gospel, requesting that their children might find homes with their white friends in order that they might be trained in the right way, and some adults sought employment with the settlers, that they might receive instruction in the truths of Christianity. It was then believed by many that these Indians were the descendants of the lost tribes of Israel, and this opinion was an additional incentive for efforts to convert them. Mr. Eliot was convinced that the Indians must give up their roving habits and become members of settled communities before they could make much progress in the Christian life. Natick, seventeen miles southwest of Boston, a place "somewhat remote from the English," was selected as a very advantageous place for a town, and thither the Indians at Nonantum, and other "praying Indians," as the converts were called, removed in 1651. A civil government was established, and, after many delays and much hesitation, a church was formed in 1660, an ecclesiastical organization that continued until the death of their last pastor, Daniel Takawombpait, an Indian, in 1716. The work, although it sometimes encountered fierce opposition on the part of the Indians and ungenerous depreciation on the whites, prospered until King Philip's war in 1675. Town after town was organized, and worshipping assemblies gathered, in several instances presided over by Indian preachers, until within the jurisdiction of Massachusetts there were seven old and seven new "praying towns," embracing not fewer than eleven hundred "souls yielding obedience to the gospel." Those in Plymouth colony and in the isles of the ocean much exceeded this number. In the war the praying Indians suffered dreadfully, both from their own countrymen, by whom they were hated, and by a great majority of the English, who suspected them of the most atrocious intentions. It is now generally believed that the latter were saved from extinction by the aid received from the friendly Indians. But to them the war was ruin. The number of Indian towns and their inhabitants were greatly diminished, and after the death of Mr. Eliot, a few years later, their extinction was rapid and irresistible. When the infirmities of age made him too feeble for the exertions of an active life, he proposed that negro servants should be sent to him for religious instruction; and a boy, made blind by falling into the fire, was taught by him to repeat many chapters of the Bible. One of his last recorded acts was to give by deed, in 1689, about seventy-five acres of land for "the maintenance, support, and encouragement of a school and schoolmaster at

that part of Roxbury commonly called Jamaica, or the Pond Plain, for the teaching and instructing the children of that end of the town (together with such Indians and negroes as shall or may come to the said school)," etc. His remains were placed in the parish tomb in the old burying-ground at Roxbury. No authentic likeness of him exists. The accompanying picture is known as

the Whiting portrait of the "apostle," but there is no authority for the statement that it is a representation of John Eliot. His name is inscribed, with those of his successors in the ministry at Roxbury, upon a monumental structure that covers the tomb. There is a monument to his memory in the Indian burying ground at South Natick, a granite watering-trough at Canton, Mass., and a memorial structure at Newton, on or near the site of Nonantum, where the apostle first preached to the Indians. See the accompanying illustration. His life and labors have been the subject of numerous biographies, the first by Cotton Mather in 1691, and the best by Convers Francis in 1836 (vol. 5, Sparks's "American Biography"). Mr. Eliot's manner must have been particularly attractive, judging from the accounts of his contemporaries and of several strangers who visited him. Dankers & Sluyter, agents for the Labadist community, in the record of their visit made in 1680, speak of him as "a very old man, named John Eliot, as the best of the ministers who we have yet heard" in Boston and its vicinity. John Dunton, a bookseller from London, describes him in 1686 as "the glory of Roxbury, as well as of all New England"; and the narrative in French of the Jesuit Father Gabriel Druilletes, a missionary from Canada, who spent the night before Christmas in 1650 at the apostle's house, justifies the statement of the historian, Mr. Parkman, that "there was great sympathy between the two missionaries, and Eliot prayed his guest to spend the winter with him." Before leaving England, Mr. Eliot had made a matrimonial engagement, and his betrothed came over in the year following his arrival. The first entry on the record of "Marages of the Inhabitants of Roxbury" is that of Mr. John Eliot and Hanna Mumford, 4 Sept., 1632. To use his own words, spoken at her funeral three years before his own death, she was a "dear, faithful, pious, prudent, prayerful wife." Unusual honors were paid to her memory. Six children—a daughter and five sons—were born to them. Of the sons, but one survived their parents, the Rev. Joseph, who, as a "burning and shineing light," ministered to the people of Guilford, Conn., from 1664 till 1694. From him descend all the posterity of the apostle bearing his surname. A genealogy of the descendants of John Eliot was published in 1854: Fitz-Greene Halleck; the Rev. Jared Eliot, of Killingworth (now Clinton), Conn., eminent as a minister, physician, and scientist in our colonial history; Prof. Elisha Mitchell, of the University of North Carolina, whose remains are at rest upon the highest peak of land in the United States east of Mississippi river, named Mt. Mitchell, in his honor; Charles Wyllys Elliott; and Ethelinda Eliot Beers, who wrote the poem "All Quiet along the Potomac"—are the most distinguished of his posterity. With his colleague, the Rev. Thomas Weld, and his neighbor, the Rev. Richard Mather, of Dorchester, Mr. Eliot translated into the Indian language the Psalms of David, and their work, the "Bay Psalm-Book," was the first book printed in this country (Cambridge, Mass., 1640). It was reprinted and extensively used in England and Scotland, and a small edition was reprinted in Cambridge in 1862 as a curiosity. So rare has this book become that a copy has been sold for $1,200. There is one in the Lenox library, New York. In the tracts entitled "The Clear Sunshine of the Gospel," "The Glorious Progress of the Gospel," "The Light appearing more and more toward the Perfect Day," "Strength out of Weakness," "Tears of Repentance," "A Late and Further Manifestation of the Progress of the Gospel," "A Brief Narrative," and in other communications, published mostly in London from 1647 till 1671, the methods employed, and the progress made in the conversion of the Indians, are set forth with much interesting detail by Mr. Eliot and others. The principal part of the expense of these and other publications, as well as the salaries of those engaged in labors among the Indians, was defrayed by "A Corporation for the Promoting and Propagating the Gospel of Jesus Christ in New England," established in London in 1649. In 1653 or 1654 Mr. Eliot's Catechism, probably the first book in the Indian language, was printed at Cambridge. No copy can be found. Another edition was printed in 1662. Genesis and Matthew, in Indian, were printed in 1665; but no copy is known. Before the close of 1658 he published a translation of a few psalms in metre. The New Testament in Indian was printed at Cambridge in 1661. A few copies remain, one of which was sold a few years ago for $700. The libraries of the University of Edinburgh and the Congregational library in Boston, Mass., contain the only known copies (not alike) of "A Christian Covenanting Confession," in Indian and English, which are thought to have been printed in 1660. In 1663 the Old Testament was printed. This, bound with the New Testament, a metrical version of the Psalms, and with a single leaf containing what has been called a Catechism, is known as the first edition of the Indian Bible—the first Bible printed in America. A copy of this edition was sold at auction a few years ago for $1,250. The second edition of the New Testament was published at Cambridge in 1680, and this, bound with the Old Testament (1685), the Psalms in metre, and the Catechism, complete the second edition of the Indian Bible. These editions can not be regarded as very rare, since between fifty and sixty copies (many of them imperfect) are owned in this country. The finest collection of them is in the Lenox library, New York. There are copies that show signs of much use, and some have autographs and other manuscript of Indian owners. The Psalter, as well as the New Testament, of the first edition was bound separately. Of the translation of Baxter's "Call to the Unconverted" (1664), no copy has been found; but of the second edition (1688) there are copies at Harvard college and in other libraries. An abridgment of Bishop Bayly's "Practice of Piety," translated into Indian, was printed in 1665, and again in 1685. Yale college owns a copy. Of "The Indian Grammar Begun" (Cambridge, 1666), copies are in the John Carter Brown library at Providence, R. I., and in the Lenox library, New York. "The Indian Primer," of which the only copy known is in the library of the University of Edinburgh, was printed at Cambridge in 1669. It has been reprinted. The last of Mr. Eliot's translations printed in his life-time, "The Sincere Convert," by the Rev. Thomas Shepard, was published in 1689. Mr. Eliot's published books in the English language are: "The Christian Commonwealth" (London, 1659). This book is extremely rare, having been suppressed by the government because it was "full of seditious principles and notions in relation to all established governments in the Christian world, especially against the government established in their native country." The author was induced to make public acknowledgment that he had "offended" in his opinions. "The Communion of Churches" (Cambridge, 1665). This book has been described as the first privately printed book in America. A copy is in the Lenox library. "Indian Dialogues" (Cambridge, 1671),

in the Lenox library. "Indian Logick Primer" (Cambridge, 1672), in the library of the British museum. "The Harmony of the Gospels" (Boston, 1678), in the Lenox library. "Brief Answer to a Book by John Norcot against Infant Baptism" (Boston, 1679). The copy in the Lenox library is the only one known. "Dying Speeches of Several Indians" (Cambridge, about 1680). But one copy is known, which is in the Lenox library. Many of these have been reprinted separately, in the collections of the Massachusetts historical society and elsewhere.—His grandson, **Jared,** b. in Guilford, Conn., 7 Nov., 1685; d. in Killingworth (now Clinton), Conn., 22 April, 1763, was the son of Rev. Joseph Eliot, who was graduated at Harvard in 1658. Immediately after his graduation at Yale in 1706, Jared was appointed school-master of his native town, and numbered among his pupils Samuel Johnson, first president of Kings (now Columbia) college. In March, 1707, he accepted a call from the church at Killingworth, to become the successor of Rector Abraham Pierson, whose favorite pupil he had been while at Yale. He retained this charge till his death, and while discharging in full measure the duties of his office he found time to make himself eminently useful and famous as a physician, an agriculturist, a scientific investigator, and an author. In 1747 he writes in the preface to his "Essays upon Field Husbandry": "Having spent more than Thirty years in a Business that required a great deal of Travel, altho' it did not much hinder Reading and Study, it gave me an opportunity to see much of the Country, of making many Observations, and of being acquainted with very many Persons of Worth and Ingenuity, both Farmers and Others." This manner of life brought him into intimate relations with Benjamin Franklin, and others who at that early day took delight in scientific pursuits. Franklin writes to him in 1755: "I remember with Pleasure the cheerful hours I enjoyed last winter in your Company, and would with all my heart give any ten of the thick old Folios that stand on the shelves before me for a little book of the stories you then told with so much propriety and humor." In Sparks's edition of Franklin's works are eleven letters to Mr. Eliot. His high standing as a clergyman is attested by the fact that he was several times moderator at the meetings of the General association of Connecticut. As a physician, his ability gave him the highest rank. Not only in his own but in neighboring colonies, his skill was frequently in demand, some of his medical pupils afterward becoming distinguished physicians. He received the degree of A. M. from Harvard in 1709; he was elected a trustee of Yale in 1730, in which capacity he rendered valuable services to that college during life, besides making himself in his will the first contributor to its library fund, and in 1756 or 1757 was unanimously chosen a fellow of the Royal society, London. His publications include sermons entitled "The Right Hand of Fellowship" (Boston, 1730); "Religion Supported by Reason and Divine Revelation" (New London, 1736); "Give Cæsar his Due" (New London, 1738); "The Blessings Bestowed on Them that Fear God" (New London, 1739); "God's Marvellous Kindness," preached on the occasion of a general thanksgiving to commemorate the capture of the city of Louisbourg (New London, 1745); "Repeated Bereavements Considered and Improved" (New London, 1748); and "A Discourse on the Death of Rev. William Worthington" (New Haven, 1757); "An Essay upon Field Husbandry in New England" (Boston, 1760); and an "Essay on the Invention or Art of Making Very Good, if not the Best, Iron from Black Sea-Sand" (New York, 1762). The accompanying illustration is a copy of a medal awarded to the Rev. Jared Eliot in 1762, by the London Institute, "for producing malleable iron from the American black sand."



ELIOT, Samuel Atkins, mayor of Boston, b. in Boston, Mass., 5 March, 1798; d. in Cambridge, Mass., 29 Jan., 1862. He was graduated at Harvard in 1817, became a merchant in Boston, served several terms in the state legislature, and was mayor of the city in 1837–'9. During his administration a riot took place, caused by a collision between a volunteer fire company and an Irish funeral procession. The disturbance was suppressed by the promptness of Mayor Eliot, who was on the ground at the first alarm, and immediately took measures for calling out the militia. The result of this affair was the establishment of a paid fire department and a day police. Mayor Eliot was elected to congress as a whig, to fill the vacancy caused by the appointment of Robert C. Winthrop to the U. S. senate, and served from 22 Aug., 1850, till 3 March, 1851. He was treasurer of Harvard college in 1842–'53. He published a "Sketch of the History of Harvard College and of its Present State" (Boston, 1848), and edited selections from the sermons of Dr. Francis W. P. Greenwood, with a memoir (2 vols., Boston, 1844).—His son, **Charles William,** educator, b. in Boston, Mass., 20 March, 1834, was fitted for college at the Boston Latin-school, and was graduated at Harvard in 1853. In the following year he was appointed tutor in mathematics, and studied chemistry with Prof. Josiah P. Cooke. In 1858 he was made assistant professor of mathematics and chemistry, but in 1861 was relieved of his work in the mathematical department, and taught chemistry in Lawrence scientific school. In 1863 he went to Europe and spent two years in the study of chemistry and in the examination of the systems of public instruction in France, Germany, and England; and on his return in 1865 was appointed professor of analytical chemistry in the Massachusetts institute of technology. In that year an important revolution occurred in the government of Harvard university. The board

Charles W. Eliot

of overseers had hitherto consisted of the governor. lieutenant-governor, president of the state senate, speaker of the house, secretary of the board of education, and president and treasurer of the university, together with thirty other persons, and these other persons were elected by joint ballot of the two houses of the state legislature. An opinion had long been gaining ground that it would be better for the community and the interests of learning, as well as for the university, if the power to elect the overseers were transferred from the legislature to the graduates of the college. This change was made in 1865, and at the same time the governor and other state officers ceased to form part of the board. The effect of this change was greatly to strengthen the interest of the alumni in the management of the university, and thus to prepare the way for extensive and thorough reforms. Shortly afterward Dr. Thomas Hill resigned the presidency, and after a considerable interregnum Mr. Eliot succeeded to that office in 1869. During his administration the elective system has completely supplanted the old-fashioned prescribed curriculum, and Harvard has come to resemble in its methods the great European universities, while it has doubled in number of students and professors, and more than trebled in wealth. President Eliot received the degree of LL. D. from Williams and from Princeton in 1869, and from Yale in 1870. He is a fellow of the American academy of arts and sciences, and of the American philosophical society, and a member of other literary and scientific bodies. On many occasions he has been called upon to deliver addresses, notably at the inauguration of Daniel C. Gilman as president of Johns Hopkins university, at the opening of the American museum of natural history in New York, and before various educational bodies. His brief remarks at the museum were described by Prof. Edward L. Youmans as having "summed up in a few words the grandest characteristics of modern science." President Eliot is a frequent speaker at the meetings of the Harvard club in New York, and at public dinners in Boston. Besides chemical memoirs, written with Prof. Frank H. Storer, essays on educational topics, and his annual reports as president of Harvard, he has published, in connection with Prof. Storer, a "Manual of Inorganic Chemistry" (New York, 1868), and a "Manual of Qualitative Chemical Analysis" (1869).

ELIOT, Thomas Dawes, congressman, b. in Boston, Mass., 20 March, 1808; d. in New Bedford, Mass., 12 June, 1870. He was graduated at Columbian college, Washington, D. C., in 1825, studied law in Washington and New Bedford, and was admitted to the Massachusetts bar. After being a member of both houses of the legislature, he was elected to congress as a Whig, to fill the unexpired term of Zeno Scudder, serving from 17 April, 1854, till 3 March, 1855, and making an eloquent speech on the Kansas-Nebraska bill, which was published (Washington, 1854). He was prominent in the Free-soil convention at Worcester, Mass., in 1855, and on the dissolution of the Whig party was active among the founders of the Republican party in Massachusetts. He declined its nomination for attorney-general in 1857, but was afterward elected to congress again for five successive terms, serving from 1859 till 1869. Mr. Eliot took an active part in the proceedings of the house, particularly in the legislation on the protection and welfare of the negroes.

ELIOT, William Greenleaf, educator, b. in New Bedford, Mass., 5 Aug., 1811; d. at Pass Christian, Miss., 23 Jan., 1887. His great-grandfather was brother to the great-grandfather of Charles William Eliot, president of Harvard. He was graduated at Columbian college, Washington, D. C., in 1831, and at Harvard divinity-school in 1834. In the latter year he was ordained pastor of the Church of the Messiah (Unitarian) in St. Louis, Mo., a place which he held until 1872. During all this time he was energetically employed in improving the condition and advancing the interests of the public schools of St. Louis. A man of untiring energy and rare administrative ability, he was engaged in all sorts of public and philanthropic enterprises, and has probably done more for the advancement of St. Louis and all the southwest than any other man that has lived in that section. He was always a bold and outspoken opponent of slavery. In 1861 he was found among the small band of resolute men who assisted Gens. Nathaniel Lyon and Francis P. Blair in preserving Missouri to the Union; and during the war he was active in the western sanitary commission. In 1872 he was chosen to succeed Dr. Chauvenet as chancellor of Washington university in St. Louis, and held the office until his death. He has published a "Manual of Prayer" (Boston, 1851); "Discourses on the Doctrines of Christianity" (Boston, 1852; 22d ed., 1886); "Lectures to Young Men" (1853; 11th ed., 1882); "Lectures to Young Women" (1853; 13th ed., enlarged, with the title "Home Life and Influence," St. Louis, 1880); "The Unity of God" (Boston, 1854); "Early Religious Education" (1855); "The Discipline of Sorrow" (1855); "The Story of Archer Alexander, from Slavery to Freedom" (Boston, 1885); and a great number of pamphlets, tracts, discourses, and review articles.

ELÍZAGA, Mariano (ay-lee'-thah-gah), Mexican musician, b. in Morella, 27 Sept., 1781; d. in the city of Mexico, 2 Oct., 1842. He was noted for precocious musical talent, and at the age of five years was called to the presence of the viceroy Galvez, who, pleased with the extraordinary facility of the child, gave orders for his education at the expense of the king. He was sent to the College of Infantes, where he made wonderful progress, and while yet a young man became an accomplished musician. He was the teacher of Catalina de Huarte, wife of the Emperor Iturbide, who appointed him master of the imperial chapel. After the fall of Iturbide he spent his life in teaching. His compositions include "El Miserere del Miércoles Santo," "Lamentación," "Responsorio," and "Misa."

ELKINS, Henry Arthur, artist, b. in Vershire, Vt., 30 May, 1847; d. in Georgetown, Col., 25 July, 1884. He removed to Chicago in 1856, taught himself to paint, and achieved some success. Among his pictures are "Mount Shasta," "The Thirty-eighth Star," "Storm at Shasta," "New Eldorado," and "Crown of the Continent."

ELKINS, Stephen Benton, politician, b. in Perry county, Ohio, 26 Sept., 1841. He removed to Missouri when very young, was graduated at Missouri university in 1860, and studied law. He served in 1862–'3 as a captain in the 77th Missouri regiment, and in the latter year went to New Mexico, where he was admitted to the bar in 1864. He also engaged in mining and stock-raising there, and accumulated a fortune. He was a member of the territorial legislature in 1865–'6, attorney-general of the territory in 1868–'9, and U. S. district attorney in 1870–'2. He was then elected a delegate to congress as a Republican, and served two terms, from 1873 till 1877, making a speech in 1874 on the admission of New Mexico to the Union, which attracted much attention. In 1875 he became interested in the West Virginia system of railroads, and has lately resided in New York. Mr. Elkins

was a member of the National Republican committee from 1872 till 1884. He took an active part in the Chicago convention of 1884 that nominated James G. Blaine for the presidency, and earnestly supported him in the canvass.

ELLERY, William, signer of the Declaration of Independence, b. in Newport, R. I., 22 Dec., 1727; d. there, 15 Feb., 1820. His father, of the same name, was graduated at Harvard in 1722, became a successful merchant in Newport, served successively as judge, senator, and lieutenant-governor of the colony, and died in 1764. The younger William received his early education mostly from his father, and was graduated at Harvard in 1747. He married in 1750, engaged in business in Newport, and was for some time naval officer of Rhode Island. He began the practice of law in Newport in 1770, having served for two years previous as clerk of one of the courts. He was an active patriot, and in May, 1776, was chosen the colleague of Stephen Hopkins, as delegate to the Continental congress, and took his seat on the 14th of that month. He became an influential member of that body, serving on the committee to consider the ways and means of establishing expresses between the continental posts, on those on the treasury and on marine affairs, and on the special committee for purchasing clothing for the army. During this session he signed the Declaration of Independence, and he was accustomed in later years to relate with great vivacity the incidents connected with that event. "I was determined," he said, "to see how they all looked as they signed what might be their death-warrant. I placed myself beside the secretary, Charles Thomson, and eyed each closely as he affixed his name to the document. Undaunted resolution was displayed in every countenance." Mr. Ellery continued a member of the congress till 1786, with the exception of the years 1780 and 1782, and, overcoming his natural diffidence, became a ready debater. He was a member of important committees, but did especially good service on the board of admiralty, where he had much influence, and probably originated the plan of fitting out fire-ships at Newport. During the British occupation of Rhode Island, Mr. Ellery's house was burned and much of his other property injured. In 1779 he was a member of a committee to arrange some diplomatic difficulties among the American commissioners to Europe, and was chairman of a committee to consider means of relieving the distress brought upon the Rhode Islanders by the British occupation. In 1782 he presented to congress a plan for organizing a department of foreign affairs. In 1785 he actively supported Rufus King in his effort to abolish slavery throughout the country, seconding King's resolution to that effect. He was appointed commissioner of the continental loan-office for Rhode Island in 1786, was for a short period chief justice of the Rhode Island superior court, and from 1790 till his death was collector of Newport, being retained in the office in spite of frequent and frank avowals of political differences with several administrations. Mr. Ellery was of moderate stature, with a large head and impressive features. He was fond of study and literature, and was highly esteemed for his social qualities, being intimate with all the distinguished men of his time. He retained the full use of his faculties to the close of his long life, and died holding in his hand a copy of Cicero's "De Officiis," which he had been reading. See a biography of Ellery by his grandson, Edward T. Channing, in Sparks's "American Biography," vol. vi., and Goodrich's "Lives of the Signers to the Declaration of Independence."—His nephew, **Christopher,** senator, b. in Newport, R. I., 1 Nov., 1768; d. there, 2 Dec., 1840, was graduated at Yale in 1787, studied law, and began to practise in his native city. He was elected to the U. S. senate as a Democrat, to fill the vacancy caused by the resignation of Ray Green, and served from 7 Dec., 1801, till 3 March, 1805. President Jefferson appointed him commissioner of loans at Providence in 1806, and from 1820 till 1834, when the failure of his health caused him to resign, he was collector of customs at Newport.—Christopher's son, **Frank,** naval officer, b. in Newport, R. I., 23 July, 1794; d. in Castleton, Vt., 24 March, 1871, entered the navy as a midshipman on 1 Jan., 1812, and served in the frigate "President" on all her cruises, being wounded in the action with the "Belvidere" by the bursting of the gun at which he was stationed. He received a sword and the thanks of congress for his services on Lake Champlain, was in the "Constellation" in the Mediterranean in 1815, at the capture of an Algerine frigate and a Turkish flag-ship, and assisted in expelling McGregor's band of adventurers from Amelia island, Fla., in 1817, capturing one of their privateers with her prize. He became lieutenant, 28 March, 1820, commanded the "Cyane," of the Brazil squadron, in 1827, and was on duty at the Boston and New York rendezvous in 1829–'37. He commanded the steamer "Enterprise" in 1840, was put on the reserved list, 13 Sept., 1855, commanded the Boston rendezvous again in 1861, and was commissioned commodore on the retired list, 4 April, 1867.

William Ellery

ELLET, Charles, engineer, b. in Penn's Manor, Bucks co., Pa., 1 Jan., 1810; d. in Cairo, Ill., 21 June, 1862. He was destined by his father for the life of a farmer, but his inclinations led him to mathematical and engineering pursuits. First as a rodman, then as a volunteer, and subsequently as a paid assistant on the Chesapeake and Ohio canal, he soon acquired means to visit Europe, and completed his education in the École polytechnique in Paris. He became an engineer on the Utica and Schenectady railroad, then on the Erie, and subsequently chief engineer of the James and Kanawha canal. In 1842 he planned and built the first wire suspension bridge in this country, across the Schuylkill river at Philadelphia. He designed and built the railroad suspension bridge across the Niagara river below the falls in 1847, and afterward built a suspension bridge at Wheeling, Va. He then engaged in many important engineering works, constructed a remarkable temporary track across the Blue Ridge, improved the navigation of the Kanawha river, and aided in laying out the Baltimore and Ohio railroad, and in 1846–'7 he was president of the Schuylkill navigation company. He was among the first to advocate the use of steam rams, and suggested a plan to the

Russian government by which the allied fleet before Sebastopol might be destroyed. At the beginning of the civil war in 1861 he became interested in military matters, and devoted much attention to the use of rams in naval warfare. He sent a plan for cutting off the Confederate army at Manassas to Gen. McClellan, who rejected it, and Ellet then wrote two pamphlets censuring McClellan's mode of conducting the campaign. He urged upon the government the construction of steam rams, for use on the large rivers of the west, and after his plans had been rejected by the navy department he presented them to the secretary of war, by whom they were approved. He was then commissioned colonel of engineers, and converted several powerful light-draught steamers on the Mississippi river into rams. With these he engaged in the naval battle off Memphis on 6 June, 1862, and sank and disabled several of the Confederate vessels, but during the battle he was struck above the knee by a musket-ball, and died from the effects of his wound. Among his most noteworthy labors was his investigation of the hydraulics of the Ohio and Mississippi rivers, the result of which he published in a paper entitled the "Physical Geography of the Mississippi Valley, with Suggestions as to the Improvement of the Navigation of the Ohio and other Rivers," printed in the "Smithsonian Transactions" (Washington, 1851). His other publications are "An Essay on the Laws of Trade" (1839); "The Mississippi and Ohio Rivers, containing Plans for the Protection of the Delta from Inundation" (Philadelphia, 1853); a pamphlet on "Coast and Harbor Defences, or the Substitution of Steam Battering-Rams for Ships of War" (Philadelphia, 1855), and many other scientific papers.—His brother, **Alfred W.**, held a commission under him as lieutenant-colonel in the same fleet, and was appointed brigadier-general of volunteers, 1 Nov., 1862. He ordered the burning of Austin, Miss., on 24 May, 1863, in retaliation for information furnished by citizens to Confederates of Gen. Chalmers's command, which enabled them to fire upon a Federal transport. He resigned on 31 Dec., 1864.—Charles's son, **Charles Rivers,** soldier, b. in Philadelphia, Pa., in 1841; d. in Bunker Hill, Ill., 29 Oct., 1862, was engaged at the beginning of the war in studying medicine, and became assistant surgeon in one of the military hospitals. In 1862 he commanded one of his father's rams in the action at Memphis. After his father's death, on the organization of the Mississippi brigade by his uncle, Alfred W. Ellet, he was appointed colonel, and when his uncle was commissioned brigadier-general he was placed in command of the marine brigade. Choosing the ram "Queen of the West" for his headquarters, he made many daring expeditions on the Mississippi, and succeeded in running the Confederate batteries at Vicksburg as he was cruising between that stronghold and Port Hudson. On 10 Feb., 1863, he made an expedition up the Red river and captured the Confederate steamer "Era" and some other vessels. After ascending the river with success the pilot ran his vessel aground, placing her in such a difficult position that she was disabled by the fire from the Confederate fort, and fell into the hands of the enemy. Col. Ellet made his escape on a bale of cotton, and was rescued by the "De Soto." During the siege of Vicksburg, and afterward, he rendered valuable assistance to Gen. Grant in keeping open his communications, but in the course of this duty his health failed, owing to the influence of the climate, and he died suddenly in Illinois, where he had retired for rest.

ELLET, William Henry, chemist, b. in New York city, 1 Nov., 1806; d. there, 26 Jan., 1859. He was graduated at Columbia in 1824, and subsequently, while studying medicine, gained a gold medal for a dissertation on the compounds of cyanogen. In 1830 he became lecturer on elementary chemistry in Columbia college, and two years later was promoted to the chair of that name, but in 1835 was made professor of chemistry, mineralogy, and geology in South Carolina college. For his discovery of a new and cheap method of preparing gun-cotton the legislature of South Carolina presented him with a service of silver-plate. In 1848 he returned to New York, and in 1854 became consulting chemist of the Manhattan gas company, which office he held until his death.—His wife, **Elizabeth Fries,** author, b. in Sodus Point, N. Y., in 1818; d. 3 June, 1877, was the daughter of Dr. William Nixion Lummis. She was educated at the Aurora, N. Y., female seminary, and after her marriage with Dr. Ellet, about 1835, began to write for periodicals. She has contributed largely to magazines and reviews, and has published a translation of Silvio Pellicoe's "Euphemia of Messina" (1834); "Teresa Contarini," a tragedy, which was represented in New York (1835); "Poems, Original and Selected" (Philadelphia, 1835); "Scenes in the Life of Joanna of Sicily" (Boston, 1840); "Characters of Schiller" (1842); "Family Pictures from the Bible" (New York, 1849); "Evenings at Woodlawn" (1850); "Domestic History of the American Revolution" (1850); "Watching Spirits" (1851); "Women of the American Revolution" (1851); "Pioneer Women of the West" (1852); "Novelettes of the Musicians" (1852); "Summer Rambles in the West" (1853); "The Practical Housekeeper, a Cyclopædia of Domestic Economy" (1857); "Women Artists in all Ages and Countries" (1861); "Queens of American Society" (1867); and "Court Circles of the Republic," with Mrs. R. E. Mack (Hartford, 1869).

ELLICOTT, Andrew, civil engineer, b. in Bucks county, Pa., 24 Jan., 1754; d. in West Point, N. Y., 29 Aug., 1820. His father and uncle, who were Quakers, purchased a large tract of wild land on the Patapsco river in 1770, and in 1774 founded the town of Ellicott's Mills, now Ellicott City, where Andrew passed his youth in the study of science and practical mechanics. His scientific attainments soon attracted attention, and he enjoyed the friendship and confidence of Washington, Franklin, and Rittenhouse. He was appointed commissioner at various times for marking the boundaries of Virginia, Pennsylvania, and New York, and about 1785 removed to Baltimore, where he was elected to the legislature. He was selected by Washington in 1789 to survey the land lying between Pennsylvania and Lake Erie, and during that year he made the first accurate measurement of the Niagara river from lake to lake, with the height of the falls and the descent of the rapids. In 1790 he was employed by the government to survey and lay out the city of Washington, and in 1792 was made surveyor-general of the United States. He superintended the construction of Fort Erie, at Presque Isle, now Erie, Pa., in 1795, and was employed in laying out the towns of Erie, Warren, and Franklin. He was appointed by Washington in 1796 as U. S. commissioner under the treaty of San Lorenzo el Real, to determine the boundary separating the United States from the Spanish possessions on the south. The results of this service, which embraced a period of nearly five years, appear in his "Journal" (Philadelphia, 1803). Upon its completion he was appointed by

Gov. McKean, of Pennsylvania, secretary of the state land-office, but resigned in 1808, and in 1812 became professor of mathematics at West Point, where he remained till his death. He went to Montreal in 1817, by order of the government, to make astronomical observations for carrying into effect some of the articles of the treaty of Ghent. He was an active member of the American philosophical society, contributed to its transactions, and corresponded with many of the learned societies of Europe. With the exception of his "Journal" and a few other writings, his works are still in manuscript.—His brother, **Joseph,** engineer, b. in Bucks county, Pa., 1 Nov., 1760; d. in Batavia, N. Y., 19 Aug., 1826, received a common-school education, and subsequently studied surveying and engineering. He was engaged as an assistant to his brother Andrew in the survey and plotting of the city of Washington, and in running the boundary-line between New York and Pennsylvania. In 1797 Mr. Ellicott was employed by the Holland land company to survey the tract in western New York known as the "Holland purchase," and, on the completion of the survey in 1800, was appointed local agent of the company, with headquarters at Batavia, N. Y., which he had located, and toward whose early development he contributed largely. Mr. Ellicott was among the first to recognize the possibility of building a great city at the foot of Lake Erie on the lands owned by the company that he represented. His influence was largely used not only in promoting settlements in the vicinity of the present city of Buffalo, but in assisting in its growth and development. Mr. Ellicott has justly been called the "founder of Buffalo." He surveyed and laid out the city on its original plan. He was a zealous advocate of the projected Erie canal, and corresponded with Gov. De Witt Clinton concerning the project. He opposed Clinton's plan of sending to England for engineers, insisting that there was abundant home talent for the work, and succeeded in convincing the governor that he was right. He served for some time as canal commissioner, but held no other public office. After serving the Holland land company twenty years, during which time most of the vast tract of land owned by it in western New York was disposed of to actual settlers, Mr. Ellicott retired from active pursuits.

ELLIOT, Benjamin, jurist, b. in Charleston, S. C., in 1786; d. in 1836. He was graduated at Princeton in 1806, studied law, was admitted to the bar in 1810, and began to practise in South Carolina. He was the author of numerous literary, historical, and political productions. Among his works is a "Refutation of the Calumnies circulated against the Southern and Western States respecting the Institution and Existence of Slavery" (1822). He also prepared and published "The Militia System of South Carolina" which was adopted as the military code for the state.

ELLIOT, Charles, governor of Bermuda, b. in England in 1801; d. 9 Sept., 1875. He entered the British navy in 1816, took part in the battle of Algiers, and subsequently served in India, on the coast of Africa, and in the West Indies, rising to the rank of admiral. In 1835 he was appointed chief superintendent of trade and British minister to China. From 1842 till 1845 he was chargé d'affaires in Texas. He was governor of Bermuda in 1847–'52, of Trinidad from 1853 till 1856, and of St. Helena from 1863 till 1869, when he retired from the service. He was made a K. C. B. in 1856.

ELLIOT, George Henry, military engineer, b. in Lowell, Mass., 31 March, 1831. He was graduated at the U. S. military academy in 1855 as a lieutenant of artillery, served on the Texas frontier, and entered the engineer corps in 1857. He was engaged in constructing the works on Alcatraz island, San Francisco harbor, and other fortifications on the Pacific coast till 1870, was promoted major on 3 March, 1867, chief engineer of the Washington aqueduct in 1870–'1, engineer secretary of the Light-house board, and in 1873 went to Europe to examine light-house systems there. He became assistant to the chief of engineers at Washington in 1884, and was advanced to the grade of lieutenant-colonel on 8 Aug., 1882. He superintended the improvement of Connecticut river in 1882–'3, and in 1883–'7 harbor improvements at Nantucket, Newport, Providence, New Bedford, and other places on the coast of New England. He published "Light-House Systems in Europe" (1874), and "The Presidio of San Francisco" (1874).

ELLIOT, George Thomson, physician, b. in New York city, 11 May, 1827; d. there, 29 Jan., 1871. He was graduated at Columbia in 1845, and at the New York university medical school in 1845. He subsequently studied in Paris, London, and Dublin, where he attained great clinical skill under Dr. Shekelton. In 1857 he was chosen visiting physician of the Lying-in hospital in New York, and in 1861 was elected to fill the chair of obstetrics and diseases of women and children and of clinical midwifery in the Bellevue hospital college. His principal medical work is "Elliot's Obstetric Clinic" (New York, 1867).

ELLIOT, James Habersham, clergyman, b. in Beaufort, S. C., in 1819; d. in Charleston, S. C., 18 June, 1876. He was graduated at South Carolina college, and for a few years practised law in Charleston; but, after studying for the Protestant Episcopal ministry, he was ordained at Beaufort, and held pastorates in Grahamville, S. C., Charleston, Greensboro, Ga., and Brookline, Mass. While in the last-named place he had charge for four years of the "Christian Witness," published in Boston. In 1871 he was called to the pastorate of St. Paul's church in Charleston, S. C., where he remained until his death. In 1871 he received a large vote for bishop of the diocese. Columbia gave him the degree of D. D. in 1871.

ELLIOT, William Horace, genealogist, b. in New Haven, Conn., in 1824; d. in St. Croix, West Indies, 8 Dec., 1852. His father, of the same name, was a merchant in New Haven. The son was graduated at Yale in 1844, and at the law-school in 1847, and compiled a "Genealogy of the Eliot Family," which was revised and enlarged by W. S. Porter (New Haven, 1854).

ELLIOTT, Andrew, collector of customs. He was the third son of Sir Gilbert Elliott, bart., lord justice clerk of Scotland. While very young he was sent to Philadelphia, served as an apprentice in a counting-house there, and afterward entered into mercantile life. After his marriage with his second wife, who possessed a large fortune in Philadelphia, he returned to Great Britain and obtained, through the influence of his brother, a place of honor and profit in the household of the princess dowager of Wales. He succeeded Archibald Kennedy as receiver-general and collector of New York in January, 1764, and held these offices till the close of the Revolution. In 1774 he seized a quantity of fire-arms, and the people threatened to tar and feather him. In 1782 he was not only at the head of the customs, but was lieutenant-governor, receiver-general of quit-rents, superintendent-general of police, and chief of the superintendent department, established by Sir William Howe in 1777.

When Sir Henry Clinton made his last effort to save André in 1780, Mr. Elliott was one of the three persons who were sent to confer with Washington. He remained in New York till its evacuation in 1783, when he sailed in the "Nonesuch" with his family for England.

ELLIOTT, Anna, patriot of the Revolution. She was a daughter of Thomas Ferguson, a patriot who was exiled after the British capture of Charleston. Her husband was Charles Elliott, of that place. American prisoners that were brought into Charleston were aided and relieved by her assiduous ministrations.

ELLIOTT, Charles, clergyman, b. in Greenconway, County Donegal, Ireland, 16 May, 1792; d. in Mount Pleasant, Iowa, 6 Jan., 1869. He united with the Wesleyan church and applied for admission to the University of Dublin, but was refused because he could not take the prescribed test oath. By the aid of some eminent scholars, he succeeded in following a course of study equivalent to that of the university. He emigrated to the United States about 1815, and was received into the travelling connection of the Ohio conference in 1818. In 1822 he was appointed superintendent of the mission among the Wyandotte Indians at Upper Sandusky, Ohio. He was presiding elder of the Ohio district for four years, and professor of languages in Madison college, Uniontown, Pa., for four years. In 1831 he was stationed in Pittsburg, and was subsequently presiding elder of that district, editor of the "Pittsburg Conference Journal," and afterward of the "Western Christian Advocate," which he conducted until 1848, and again from 1852 till 1856. He then became professor of biblical literature in Iowa Wesleyan university and its president, but resigned in 1860. He was afterward appointed editor of the "Central Christian Advocate" at St. Louis, Mo., and during the civil war strongly supported the Union cause. After the close of the war he was again connected with Iowa Wesleyan university until 1866. His chief works are a "Treatise on Baptism" (1834); "Delineation of Roman Catholicism" (2 vols., New York, 1851); "Life of Bishop Roberts" (1853); "History of the Great Secession from the Methodist Episcopal Church" (1855); "Political Romanism" (1859); "Reminiscences of the Wyandotte Mission"; "Southwestern Methodism"; and two works against slavery.

ELLIOTT, Charles Loring, artist, b. in Scipio, N. Y., in December, 1812; d. in Albany, N. Y., 25 Sept., 1868. In early life he was a clerk in a store in Syracuse, but devoted his leisure to drawing and painting. He came to New York about 1834, and became a pupil of Trumbull and afterward of Quidor. At first his portraits were unsuccessful, but he executed some oil-paintings illustrating scenes from Irving's and Paulding's works, which attracted attention. After painting portraits for several years in the western part of the state, he returned to New York city, where he opened a studio. He was elected associate of the National academy in 1845, and academician in 1846. He is said to have painted more than 700 portraits of eminent men, among them likenesses of Fitz-Greene Halleck, in the office of the publishers of this work; James E. Freeman, belonging to the National academy; Matthew Vassar, in Vassar college; Louis Gaylord Clark; W. W. Corcoran; Fletcher Harper; Fenimore Cooper (see engraving in vol. i.); Govs. Seymour and Hunt, in the New York city hall; and Erastus Corning, in the state library, Albany. Several of his works were at the National academy in 1868, including "Don Quixote," "Falstaff," "Andrew Van Corlear, the Trumpeter," his own portrait, and "The Head of Skaneateles Lake," said to be the only landscape that he painted.

ELLIOTT, Charles Wyllys, author, b. in Guilford, Conn., 27 May, 1817; d. 23 Aug., 1883. He was a lineal descendant in the fifth generation of Eliot the "Indian Apostle." After some years spent in mercantile life in the city of New York, he studied horticulture and landscape gardening with A. J. Downing, at Newburg, in 1838–'9, and from 1840 till 1848 practised those pursuits at Cincinnati. He then returned to New York and engaged with his brother Henry in the iron business, devoting his attention also to literary and philanthropic labors. He was one of the founders and trustees of the Children's aid society in 1853. In 1857 he was appointed one of the commissioners for laying out Central park in the city of New York. He resided for some time in Cambridge, Mass., and became manager of the Household art company of Boston, and afterward in his native place. He has published "Cottages and Cottage Life" (New York, 1848); "Mysteries, or Glimpses of the Supernatural" (1852); "St. Domingo, its Revolution and its Hero, Toussaint l'Ouverture" (1855); "The New England History, from the Discovery of the Continent by the Northmen, A. D. 986, to 1776" (1857); "Remarkable Characters and Places in the Holy Land" (Hartford, 1867); "Wind and Whirlwind," a novel, by "Mr. Thom Whyte" (New York, 1868); "The Book of American Interiors, prepared from existing Houses," with heliotype illustrations (Boston, 1876); and "Pottery and Porcelain, from Early Times to the Philadelphia Exhibition," giving the marks and monograms (New York, 1877). He was also a frequent contributor to periodicals, and was the author of several novels published anonymously.

ELLIOTT, David, educator, b. in Sherman's Valley, Perry co., Pa., 6 Feb., 1787; d. in Allegheny City, Pa., 18 March, 1874. He was of Scotch-Irish parentage. He entered Dickinson college in the junior class, and was graduated in 1808, studied theology for three years, was a home missionary for one year, and was then settled as pastor of the Presbyterian church at what is now Mercersburg, Pa., where he remained for eighteen years. Then he was called to Washington, Pa., as pastor, and was also for nearly two years acting president of Washington college and professor of moral philosophy. He did more than any one else to revive the college when threatened with extinction, but declined the presidency of the institution, consenting, however, to act in that capacity in connection with his pastoral duties until in 1832 a permanent president was secured. In 1835 he was called to the professorship of ecclesiastical history and church government in the Western theological seminary, at Allegheny, Pa. He declined, but the following year, at the solicitation of the directors, he accepted the chair of polemic and historic theology. He

held this for nearly thirty-five years, and retired in 1870 as professor emeritus. In 1837 he was moderator of the Presbyterian general assembly, which divided that year; but he lived to see the reunion of 1870–'1, and took part in its exercises.

ELLIOTT, Ezekiel Brown, statistician, b. in Sweden, Monroe co., N. Y., 16 July, 1823. He was graduated at Hamilton in 1844, and after teaching for some time was connected with the development of telegraphy. Later he became actuary of a life-insurance company in Boston, and in 1861 was called to fill a similar office to the U. S. sanitary commission. He became secretary of the commission for revising the U. S. revenue laws in 1865, and in 1871 entered the civil-service reform commission. At present (1887) he holds the office of government actuary in the U. S. treasury department. In 1863 he was a member of the International statistical congress, held in Berlin, and in 1882 was vice-president of the American association for the advancement of science, presiding over the section of economic science and statistics. Mr. Elliott is also a member of numerous scientific societies at home and abroad. He has published various papers on mathematical physics, but has achieved his greatest reputation in connection with the many valuable statistical reports on coinage, weights and measures, and similar topics, that he has prepared for the government. Several of these have appeared in the volumes of the U. S. census, especially in that on "Vital Statistics."

ELLIOTT, Franklin Reuben, horticulturist, b. in Guilford, Conn., 27 April, 1817; d. in Cleveland, Ohio, 10 Jan., 1878. He settled in Cleveland in 1844. He was the author of "The Western Fruit Book, or American Fruit-Grower's Guide" (New York, 1854; enlarged ed., 1867); "Popular Deciduous and Evergreen Trees" (1868); "Handbook for Fruit-Growers" (Rochester, N. Y., 1876); and "Handbook of Practical Landscape Gardening" (1877). He also contributed frequent articles on fruit-culture to periodicals.—His son, **Henry Wood,** author, b. in Cleveland, Ohio, 13 Nov., 1846. He was educated in the public schools of his native city, and has been employed for many years by the Smithsonian institution, Washington, as an artist. He edited the Cleveland "Daily Herald" in 1879, and then went to Alaska as a special agent of the treasury department. He has published, besides magazine articles, "Monograph of the Seal Islands" (Washington, 1881); and "Our Arctic Province, Alaska, and the Seal Islands" (New York, 1886).

ELLIOTT, Gilbert Molleson, soldier, b. in Thompson, Windham co., Conn., 7 Oct., 1840; d. on Lookout Mountain, Tenn., 24 Nov., 1863. He removed to New York in early childhood and studied at the Free academy (now the College of the city of New York), received the gold medal for excellence as the leader of his class at four successive commencements, and delivered the valedictory oration at his graduation in 1861. He also took the Burr gold medal for mathematics, the Cromwell gold medal for history and belles-lettres, and the Ward bronze medals for excellence in logic, philosophy, law, Greek, Latin, and Spanish, oratory, composition, and engineering. In April, 1861, when Fort Sumter was fired upon, he unfurled the stars and stripes from the college building, and in his address declared he would defend his country's honor with his life's blood. Full of loyalty and patriotism, he gave up his purpose of studying law and entered the United States service in October, 1861, as 1st lieutenant in the 102d New York volunteers. He took part in Banks's campaign in the Shenandoah valley, distinguished himself at Antietam, was soon afterward promoted to captain, and a little later was attached to the staff of Gen. John W. Geary. He acted as ordnance officer in the 2d division of the 12th army corps, and rendered effective service during the battles of Chancellorsville and Gettysburg. When his commission as major was received, he returned to his regiment and shared its fortunes. The 12th corps was transferred to Chattanooga in 1863. His regiment was directed to lead the assault at Lookout Mountain, and he was placed in actual command of it. While leading the skirmishers, he was mortally wounded by a sharp-shooter. The government gave him the posthumous brevets of lieutenant-colonel and colonel.

ELLIOTT, James, lawyer, b. in Guilford, Vt., 9 Aug., 1770; d. in Newfane, Vt., 10 Nov., 1839. He received a public-school education, served under Gen. Anthony Wayne in the Indian campaigns of 1793–'6 as a non-commissioned officer, and afterward studied law, and was a contributor of prose and verse to several newspapers in Vermont and Philadelphia. He resided for a short time in the latter place, and edited the "Freeman's Journal." Returning to Brattleboro', Vt., he was admitted to the bar, began practice, and held various local and state offices. In 1802 he was elected to congress as a Federalist, and served from 1803 till 1809. He published a volume of poetry and prose (Greenfield, Mass., 1796).

ELLIOTT, Jesse Duncan, naval officer, b. in Maryland, 14 July, 1782; d. in Philadelphia, Pa., 18 Dec., 1845. He was educated at Carlisle, Pa., and studied law, but entered the navy as a midshipman in April, 1804, and was promoted to a lieutenancy, 23 April, 1810. In 1812 he was attached to Chauncey's command at Sackett's harbor, and in the war with Great Britain was sent by him to the upper lakes to purchase vessels and make other naval preparation. While on this service, on 8 Oct., 1812, he captured two armed British brigs, the "Detroit" and "Caledonia," anchored under the guns of Fort Erie. The "Caledonia," with a cargo valued at $200,000, was brought over safely to the American side with but slight loss of life, while the "Detroit" was afterward burned by her captors after the removal of most of her stores. For this exploit, the first naval success on the lakes, Elliott was voted a sword by congress. He next commanded the "Madison" with distinction in the capture of York, 19 April, 1813, was promoted in July to the rank of master, and commanded the "Niagara" in the battle of Lake Erie, being also second in command of the fleet in that engagement. Elliott's conduct in this action was eulogized in Perry's official report, and he received a gold medal from congress. A court-martial, appointed at Elliott's request in consequence of insinuations to his disparagement, pronounced him "a brave and skilful officer." He succeeded Perry in command on Lake Erie in October, 1813, and in 1815 commanded the "Ontario" sloop-of-war, in Decatur's squadron, employed against Algiers. He was promoted to captain in 1818, and till 1824 was engaged in selecting sites for dock-yards, light-houses, and fortifications on the coast of North Carolina. In 1829–'33 he commanded the West India squadron and the Charleston navy-yard. He then commanded for several years the "Constitution," of the Mediterranean squadron, but his conduct did not meet the approval of his superiors, and resulted in his trial by court-martial in June, 1840, and his suspension from duty for four years. In October, 1843, the remaining period of his suspension was remitted by the president, and he was ap-

pointed to the command of the Philadelphia navy-yard. He was a man of kind feelings, but a rigid disciplinarian. A biographical notice of him was published by "A Citizen of New York" (Philadelphia, 1835).—His son, **Washington Lafayette,** soldier, b. in Carlisle, Cumberland co., Pa., 31 March, 1821, accompanied his father in cruises in the West Indies in 1831–'2, and on board the "Constitution" on a cruise in the Mediterranean. He studied at Dickinson college, and in 1841 entered the U. S. military academy. In May, 1846, he was commissioned as 2d lieutenant of mounted rifles. He served with his regiment in Mexico till the surrender of Vera Cruz, was promoted 1st lieutenant on 20 July, 1847, and after the war was stationed at Fort Laramie and in Texas and New Mexico, becoming a captain in July, 1854. In September, 1858, he distinguished himself in conflicts with the Navajoes in New Mexico. In the beginning of the civil war he took part in the actions at Springfield and Wilson's Creek, Mo., was appointed colonel of the 2d Iowa cavalry in September, 1861, and on 5 Nov., 1861, was promoted major in the regular army. He afterward commanded a brigade of cavalry in the Army of the Tennessee, was engaged at the capture of Madrid, brevetted for gallantry at the capture of Island No. 10, and again for services at the siege of Corinth, and in a raid on the Mississippi and Ohio railroad in May, 1862. He was promoted to brigadier-general of volunteers in June, 1862, became chief of cavalry in the Army of Virginia in August, 1862, and was wounded at the second battle of Bull Run. He commanded the Department of the Northwest in the beginning of 1863, was placed in command of a division in the Army of the Potomac in the summer of that year, then in the Army of the Cumberland, and was engaged in re-enforcing Gen. Burnside, and commanded in the action of Mossy Creek, Tenn. He was subsequently chief of cavalry in the Army of the Cumberland, and took part in the Atlanta campaign and in the pursuit of Gen. Hood. In 1865 he commanded a division of the 4th corps, and was in the battles around Nashville. For services at Nashville he received the brevets of major-general of volunteers and brigadier-general in the regular army. He was also brevetted major-general, U. S. army, for gallant and meritorious services during the war. He became lieutenant-colonel in August, 1866, colonel in April, 1878, and on 20 March, 1879, was retired at his own request.

ELLIOTT, John, clergyman, b. in Clinton, Conn., 24 Aug., 1768; d. in Madison, Conn., 17 Dec., 1824. He was graduated at Yale in 1786, and received the degree of D. D. there in 1822. He was pastor of the Congregational church in Madison, Conn., from 1791 till his death, and from 1812 till his death was a fellow of Yale. Eleven of his discourses, one of them an "election sermon," were printed, and he was also, with Samuel Johnson, Jr., of Guilford, Conn., author of the first American dictionary of the English language, which is now a great rarity (Suffield, Conn., 1800). Mr. Johnson had published a small "School Dictionary" the previous year.

ELLIOTT, Jonathan, publicist, b. near Carlisle, England, in 1784; d. in Washington, D. C., 12 March, 1846. He emigrated to New York about 1802 and became a printer, but in 1810 volunteered to assist in the establishment of the independence of New Granada, and was in several engagements under Bolivar, in one of which he was severely wounded. He was taken prisoner at the surrender of Gen. Miranda in 1812, and suffered many hardships, but returned to the United States in 1813 and served in the U. S. army in the war of 1812–'5. In 1814 he made his home in Washington, and edited with ability, during thirteen years, the "Washington Gazette." He published "American Diplomatic Code" (Washington, 1827; new ed., 2 vols., 1834); "Debate on the Adoption of the Constitution" (1827–'30); "Funding System of the United States"; "Statistics of the United States"; "The Comparative Tariffs"; and "Sketches of the District of Columbia" (1830). He also edited the "Madison Papers" (1845).

ELLIOTT, Robert Brown, lawyer, b. in Boston, Mass., 11 Aug., 1842; d. in New Orleans, La., in 1884. He was of African descent. After studying in private schools, he entered High Holborn academy, London, England, in 1853, and subsequently studied at Eton college, where he was graduated in 1859. He then studied law and practised, afterward settling in South Carolina. He was a member of the State constitutional convention in 1868, and from July of that year till October, 1870, was a member of the legislature. In 1869 he was made assistant adjutant-general, which office he held till he was elected to congress as a republican, serving from 1871 to 1874, when he resigned, having been elected sheriff of his county. In 1875 he was again elected to the legislature, and was speaker of the lower house. He removed to New Orleans in 1877, became special agent for the treasury department, and then resumed law practice. He delivered various lectures and addresses.

ELLIOTT, Samuel Mackenzie, oculist, b. in Inverness, Scotland, 9 April, 1811; d. in New Brighton, Staten Island, N. Y., 1 May, 1873. He was graduated at the College of surgeons in Glasgow in 1828, pursued original investigations into the anatomy of the eye and the effects of climate on that organ, and in 1833 emigrated to the United States, and continued his medical studies in Cincinnati and Philadelphia. In 1835 he opened an office in New York city, and devoted himself to the cure of eye diseases. He gained a high reputation in this specialty, but the medical profession considered him an irregular practitioner, and accused him either of charlatanism or of unprofessional conduct in keeping his medical discoveries a secret. He accordingly obtained a diploma, after an examination in the New York medical college, and in a course of lectures explained his methods of practice. He exhibited eccentricities, but his scientific attainments and professional skill obtained recognition, and his amiable characteristics and generous charities gained him many friends. At the beginning of the civil war he was lieutenant-colonel of the 79th regiment of New York volunteers. During the first battle of Bull Run his horse was shot and fell upon him, so injuring his spine as to incapacitate him for further active service. He afterward raised the Highland brigade, and at the close of the war was mustered out as brigadier-general. He continued to practise his profession until 1874, when he retired to his residence on Staten Island.

ELLIOTT, Stephen, naturalist, b. in Beaufort, S. C., 11 Nov., 1771; d. in Charleston, S. C., 28 March, 1830. His father settled in Beaufort, where he purchased land, and married a granddaughter of John Barnwell. He was graduated at Yale in 1791, devoted himself to the cultivation of his estate and to literary and scientific studies, and in 1793 was elected to the legislature of South Carolina, of which he continued to be a member until the establishment of the Bank of the state in 1812, of which he was chosen president. He retained this office till his death. His leisure was devoted to literature and science, and he cultivated the

study of botany with enthusiasm. In 1813 he was instrumental in founding the Literary and philosophical society of South Carolina, of which he was president. He lectured gratuitously on his favorite science, and was for some time editor of the "Southern Review." In 1825 he aided in establishing the Medical college of the state, and was elected professor of natural history and botany. He was the author of "The Botany of South Carolina and Georgia" (Charleston, 1821–'4), in the preparation of which he was assisted by Dr. James McBride, and left several works in manuscript. His collection in natural history was one of the most extensive in the country.—His son, **Stephen,** P. E. bishop, b. in Beaufort, S. C., 31 Aug., 1806; d. in Savannah, Ga., 21 Dec., 1866. He was graduated at Harvard in 1824, studied law, and practised in Charleston and Beaufort from 1827 till 1833. Under the impulse of a newly awakened religious devotion, he became a candidate for holy orders in the Episcopal church, and was ordained a deacon in 1835, and became professor of sacred literature and the evidences of Christianity in South Carolina college. He took priest's orders the following year. In 1840 he was chosen first bishop of the diocese of Georgia, and after his consecration, 28 Feb., 1841, became rector of St. John's church, Savannah. In 1844 he was made provisional bishop of Florida. From 1845 till 1853 he lived in Montpelier, Ga., where he founded a seminary for young ladies, and expended his fortune in the effort to improve female education. He afterward officiated as rector of Christ church, Savannah, until his death.—**Stephen,** son of the latter, soldier, b. in Beaufort, S. C., in 1832; d. in Aiken, S. C., 21 March, 1866. At the beginning of the war he raised and equipped a battery of light artillery, known as the Beaufort artillery. At Pinckney island, in August, 1862, he commanded three batteries, and was promoted for his gallantry. Shortly afterward he was placed in command of Fort Sumter, where he continued during the long bombardment to which it was subjected by Gen. Gillmore. In July, 1864, he was wounded by the explosion of the mine at Petersburg, and was disabled for the rest of the war. He attained the grade of brigadier-general. In 1865 he took the oath to support the constitution of the state and of the United States, and later was a candidate for congress, being opposed by ex-Gov. Aiken.—Another son of the second Stephen, **Robert Woodward Barnwell,** P. E. bishop, b. in Beaufort, S. C., 16 Aug., 1840. He was graduated at the College of South Carolina in 1861, and during the civil war served in the Confederate army, rising to the rank of major. He took deacon's orders at Rome, Ga., in 1868, and studied in the General theological seminary, New York city, officiating while there as an assistant minister. He was ordained a priest in Savannah, Ga., in 1871, and in November of that year became pastor of St. Philip's church in that city, which rapidly increased in numbers under his ministry. On 15 Nov., 1874, he was consecrated missionary bishop of western Texas, and took up his residence in San Antonio.—**William,** brother of the first Stephen, patriot of the Revolution, b. in Beaufort, S. C., in 1761; d. there in 1808. He served in the patriot army while still a youth, and was taken prisoner at the surprise of John's island, and confined in the prison-ship. After the war he applied himself with success to repairing the damage done to his estates, was a promoter of various charitable and educational enterprises and public improvements, and served with distinction in both branches of the legislature.—William's son, **William,** author, b. in Beaufort, S. C., 27 April, 1788; d. there in February, 1863, entered Harvard at the age of eighteen, and took a high rank of scholarship in his class; his health failing him, he was obliged to return home before completing his studies, but his degree was conferred upon him in 1810. During the nullification crisis in South Carolina in 1832 he was a senator in the state legislature, but resigned upon being instructed by his constituents to vote to nullify the tariff law, not believing in the right of nullification, though unalterably opposed to protection. He afterward devoted himself to agriculture and rural sports, and occasionally published essays on rural economy, controversial articles on political science and economics, sporting sketches signed "Venator" and "Piscator," and poems, and delivered many addresses before agricultural societies. His letters against secession, signed "Agricola," and published in 1851, were among his latest expressions of opinion upon political subjects. He contributed largely to the periodical press of the south, especially the "Southern Review." His published works include an "Address before the St. Paul's Agricultural Society" (Charleston, 1850), and "Carolina Sports by Land and Water" (1856). He was also the author of "Fiesco," a tragedy (1850).

ELLIOTT, Susannah, patriot, b. in South Carolina about 1750. Her maiden name was Smith. She was descended from one of the oldest families of the colony, left an orphan at an early age, was educated by Rebecca Brewton Motte, and married Barnard Elliott, a colonel in the Revolutionary army. On 28 June, 1776, after the battle of Fort Moultrie, she presented to Col. Moultrie's regiment two standards, embroidered by her own hands, saying that the soldiers' gallant behavior entitled them to the highest honors, and that she had no doubt they would stand by the colors as long as they should wave in the air of liberty. At her plantation she had a secret apartment in which two American officers were hidden safely from the British, who searched the house, and found neither the patriots nor the family silver, which was buried in a marsh and disinterred after the war.

ELLIS, Abner, patriot, b. in Dedham, Mass. He represented that town in the provincial congresses of October, 1774, and February and May, 1775, taking a prominent part in the proceedings. He collected clothing and supplies for the army, and in 1775–'6 and in 1776–'8 he was a member of the Massachusetts house of representatives.

ELLIS, Calvin, physician, b. in Boston, Mass., in 1826; d. there, 14 Dec., 1883. He was graduated at Harvard in 1846, and at the medical school in 1849, and established himself in practice in Boston. In 1863 he became adjunct professor of the theory and practice of medicine in Harvard, and in 1865 adjunct, and in 1867 regular, professor of clinical medicine, which chair he held till his death. He was for some time attending physician to the Massachusetts general hospital. Among his publications the most important are papers on "Obstruction of Lung, caused by Pressure on the Primary Bronchus" and "The Tendency of Disease in One Part to excite it in Another," and clinical lectures on "Capillary Bronchitis" (1874).

ELLIS, Charles Mayo, lawyer, b. in Boston, Mass., 23 Dec., 1818; d. in Brookline, Mass., 26 Jan., 1878. He was one of the early abolitionists of Boston, one of the few prominent lawyers who openly opposed slavery, and acted as counsel for Anthony Burns, the fugitive slave. He was the author of a "History of Roxbury," of which only one volume was issued (Boston, 1847).

ELLIS, Edward Dimick, journalist, b. in Niles, N. Y., 7 Oct., 1801; d. in Detroit, Mich., 18 May, 1848. He was an early immigrant to Michigan, and edited at Monroe the "Michigan Sentinel." He was a member of the 1st Constitutional convention, and suggested that judicial fines should be set aside to support town libraries.

ELLIS, E. John, lawyer, b. in Covington, La., 15 Oct., 1841. He was graduated in the law department of the University of Louisiana in 1861, joined the Confederate army as a private, and became a captain of infantry. In 1863 he was taken prisoner and confined at Johnson's island in Lake Erie, whence he was not released till 1865. He then returned to Louisiana, was admitted to the bar in 1866, and practised in New Orleans till 1874, when he was elected to congress as a Democrat, and re-elected in 1876, 1878, 1880, and 1882.

ELLIS, George Edward, clergyman, b. in Boston, 8 Aug., 1814. He was graduated at Harvard in 1833, and at the divinity-school in 1836, and after two years' travel in Europe was ordained, on 11 March, 1840, as pastor of the Harvard Unitarian church, Charlestown, Mass. From 1857 till 1863 he was professor of systematic theology in Harvard divinity-school. In 1864 he delivered before the Lowell institute a course of lectures on the "Evidences of Christianity," in 1871 a course on the "Provincial History of Massachusetts," and in 1879 a course on "The Red Man and the White Man in North America" (1882). He resigned the pastorate of Harvard church on 22 Feb., 1869. Mr. Ellis was at one time sole editor of the "Christian Register," and afterward joint editor with Rev. Geo. Putnam, D. D.; and subsequently conducted the "Christian Examiner" for several years. He has been vice-president of the Massachusetts historical society and is now (1887) president, and was a member of the board of overseers of Harvard in 1850–'4, serving for one year as its secretary. Harvard gave him the degree of D. D. in 1857, and that of LL. D. in 1883. Mr. Ellis is the fourth person who has received both these degrees from Harvard. He has published lives of "John Mason" (1844), "Anne Hutchinson" (1845), and "William Penn" (1847), in Sparks's "American Biography"; "Half Century of the Unitarian Controversy" (Boston, 1857); "Memoir of Dr. Luther V. Bell" (1863); "The Aims and Purposes of the Founders of Massachusetts, and their Treatment of Intruders and Dissentients" (1869); "Memoir of Jared Sparks" (1869); "Life of Benjamin Thompson, Count Rumford," in connection with an edition of Rumford's complete works, issued by the American academy of arts and sciences (1871); "History of the Massachusetts General Hospital" (1872); "History of the Battle of Bunker Hill" (1875); an "Address on the Centennial of the Evacuation by the British Army, with an Account of the Siege of Boston" (1876); "Memoir of Charles W. Upham" (1877); "Memoir of Jacob Bigelow" (1880); "Memoir of Nathaniel Thayer" (1885); and numerous sermons and addresses. He also printed privately memoirs of Charles Wentworth Upham and Edward Wigglesworth (1877). Mr. Ellis wrote three historical chapters for the "Memorial History of Boston" (1880–'1); "The Red Man and the White Man in North America" (1882); an "Address on the 82d Anniversary of the New York Historical Society" (1886); "The Religious Element in New England" and other chapters in the "Narrative and Critical History of America" (1886); and several articles for the ninth edition of the "Encyclopædia Britannica," and has contributed to periodicals.—His brother, **Rufus,** clergyman, b. in Boston, Mass., 14 Sept., 1819; d. in Liverpool, England, 23 Sept., 1885, was graduated with honor at Harvard in 1838, and at the Cambridge theological seminary in 1841. He preached at Northampton, Mass., then became the first Unitarian pastor in Rochester, N. Y., returned to Northampton in 1843, and from 1853 till his death he was pastor of the 1st church in Boston. He was also lecturer in the Harvard divinity-school in 1869 and 1871, and for several years before his death was editor of the "Religious Monthly Magazine." Many of his discourses were published, including a series of sermons commemorating the two hundred and fiftieth anniversary of the 1st church, which were published in a volume (Boston, 1880).

ELLIS, Henry, explorer, b. in England in 1721; d. 21 Jan., 1806. He was educated to the law at the Temple, London. In May, 1746, he went out as agent of a company for the discovery of a northwest passage. After extinguishing with difficulty a fire in his ship, he sailed to Greenland, where he exchanged commodities with the Esquimaux, 8 July, then proceeded to Fort Nelson, and wintered in Hayes river. He renewed his efforts in June, 1747, without success, and returned to England, where he arrived on 14 Oct. Ellis was rewarded for his services by being made lieutenant-governor of Georgia, 15 Aug., 1756. He arrived at Savannah on 16 Feb., 1757, and on 17 May, 1758, was made royal governor. His services to the colony were great in securing the good-will of the Creeks and in a wise and able administration, and he was highly esteemed; but the climate was injurious to his health, and he left on 2 Nov., 1760. After his return to England his knowledge of American affairs were called into requisition for developing the plan for taxing the colonies, and in return for this service he was rewarded with sinecure offices. He was governor of Nova Scotia in 1761–'4. He afterward resided in Italy, principally occupied in scientific researches. He published "Voyage made to Hudson's Bay in 1746–'7, by the 'Dobbs Galley' and 'The California,' to discover a Northwest Passage," which contains important facts and remarks relating to Hudson bay (1748); "Considerations relating to the Northwest Passage" (London, 1750); and valuable papers on "Dr. Hale's Ventilators" and the "Heat of the Weather in Georgia" in the "Philosophical Transactions" for 1751 and 1758.

ELLIS, John Millot, clergyman, b. in Keene, N. H., 14 July, 1793; d. 6 Aug., 1855. He was graduated at Dartmouth in 1822, and at Andover theological seminary in 1825. He then removed to Illinois, and was pastor at Kaskaskia and Jacksonville, where he established a female seminary. Subsequently he became secretary of the Indiana education society, and was instrumental in founding Wabash college at Crawfordsville, and Marshall college, Mich. He was settled as pastor at East Hanover, N. H., in 1840, and in 1844 entered the service of the Society for promoting collegiate and theological education at the west.

ELLIS, John Willis, governor of North Carolina, b. in Rowan county, N. C., 25 Nov., 1820; d. in Raleigh, N. C., in 1861. He was graduated at the University of North Carolina in 1841, was admitted to the bar in 1842, and soon acquired a large practice. He was a member of the state house of commons from 1844 till 1848, when he was elected a judge of the superior court of North Carolina. This office, in which he succeeded his former preceptor, Judge R. M. Pearson, who was elevated to the supreme bench, he held

until 1858, when he was chosen governor of North Carolina. He was re-elected in 1860, and died in office. On 2 Jan., 1861, Gov. Ellis took possession of Fort Macon, at Beaufort, the works at Wilmington, and the U. S. arsenal at Fayetteville, professedly on behalf of the state. On the 20th of April he ordered the seizure of the U. S. mint at Charlotte. He was active in promoting the passage of the secession ordinance in North Carolina.

ELLIS, Powhatan, jurist and politician, b. in Virginia about 1794; d. in Richmond, Va., about 1844. He was graduated at William and Mary in 1813, settled in Mississippi while it was a territory, gained a high reputation as a lawyer, and in 1818 was elevated to the supreme bench of the state, being one of the first judges of that court. He remained in office till 1825, when he was appointed by the governor to serve out the unexpired term of David Holmes in the U. S. senate. The legislature elected Thomas B. Reed for the place, who displaced Mr. Ellis after he had served three months. At the next election, however, the latter was chosen senator for the full term, but served only from 3 Dec., 1827, till 1832, when he resigned to take his seat on the bench as U. S. judge for the district of Mississippi. While in the senate he joined Thomas H. Benton and William Smith in opposing the ratification of the treaty of 1828 with Mexico, which established a boundary-line intersecting the Red and Arkansas rivers, thus leaving only Florida and Arkansas for the expansion of slavery. While on the bench he delivered more opinions than any contemporary judge. On 5 Jan., 1836, he was appointed by President Jackson chargé d'affaires in Mexico, and on 28 Dec. he closed the American legation. President Van Buren appointed him minister to Mexico on 15 Feb., 1839, in which post he was superseded by Waddy Thompson on 21 April, 1842. After his return he resided in Virginia.

ELLIS, Reuben, clergyman, b. in North Carolina; d. in Baltimore, Md., in February, 1796. He entered the Methodist ministry in 1777, and was one of the early leaders of that church. His labors extended from South Carolina to Baltimore, which was his last station.

ELLIS, Robert Fulton, clergyman, b. in Topsham, Me., 16 Oct., 1809; d. in St. Louis, Mo., 24 July, 1854. He studied at Bowdoin college, and at Newton theological institution, where he was graduated in 1838. From 1838 till 1845 he was pastor of a Baptist church in Springfield, Mass., then for two years a missionary in Missouri, where he established many Sunday-schools and furnished them with libraries, and in 1847–'53 pastor at Alton, Ill. He was afterward associate editor of the "Western Watchman," published in St. Louis, and again an itinerant agent in Missouri.

ELLIS, Sumner, clergyman, b. in North Orange, Mass., 17 May, 1828; d. in Chicago, Ill., 26 Jan., 1886. He was educated at Melrose seminary, West Brattleboro, Vt., studied divinity under Hosea Ballou, Jr., and was the colleague of Sebastian Streeter in the 1st Universalist church of Boston in 1851–'3. Subsequently he held charges in that city, Lynn, Salem, and other places, and went to Chicago as temporary and afterward permanent successor to the Rev. Dr. Ryder. He engaged in literary work in Boston in 1872–'4, and again in 1881–'2. He published "At Our Best; or Making the Most of Life" (Boston, 1873); "Hints on Preaching," and a "Life of Edward H. Chapin, D. D." (1883). He also delivered many lectures in Chicago and other places. After his death appeared "Faith and Righteousness," a memoir, together with several of his sermons, edited by the Rev. C. R. Moor (Boston, 1887).

ELLIS, Theodore Gunville, soldier, b. in Boston, Mass., 25 Sept., 1829; d. in Hartford, Conn., 8 Jan., 1883. He became a civil engineer, was chief engineer of the Sackett's harbor and Saratoga railroad, subsequently had charge of silver mines in 1856–'58 in Mexico, and in 1859 became engineer of the Hartford dyke. He entered the Federal army as adjutant of the 14th Connecticut infantry, was engaged at Antietam and Fredericksburg, was promoted major in April, 1863, and at the battle of Chancellorsville commanded the regiment. At Gettysburg his regiment was hotly engaged, and captured five battle-flags in a bayonet charge. In September, 1863, he became lieutenant-colonel, and in October colonel, of the regiment. He was engaged at Mine Run, and in the battle of the Wilderness and the subsequent conflicts commanded a brigade. During the summer of 1864 he commanded the camp at Annapolis, Md. His regiment had become greatly reduced in numbers by many severe engagements. In the winter of 1864–'5 he was a member of a general military court at Washington. He was mustered out on 8 June, 1865, with the brevet rank of brigadier-general. In 1867 he became surveyor-general of Connecticut. He was for several years vice-president of the American society of civil engineers. In 1874 he conducted hydraulic experiments with large apertures at Holyoke, Mass. At the time of his death he had charge of the government works on the Connecticut river. He was the author of many important papers on engineering published in the "Transactions" of the American society of civil engineers, and elsewhere.

ELLIS, Welbore, British statesman. He succeeded Charles Townshend as parliamentary secretary for war, and in 1763 proposed appropriations for twenty regiments for America. In 1776 he opposed the receiving by parliament of the papers from the American congress.

ELLISON, Matthew, clergyman, b. in Monroe county, Va., 10 Nov., 1804. He became a Baptist minister in Virginia, travelled over wide districts in that vocation, and organized twenty-five churches. When seventy-five years of age he gave up preaching and settled at Raleigh, W. Va. He is the author of "Dunkerism, a Plea for the Union of Baptists," and other controversial works on the subject of Baptism.

ELLMAKER, Amos, jurist, b. in New Holland, Lancaster co., Pa., 2 Feb., 1787; d. in Lancaster, Pa., 28 Nov., 1851. He was educated at Yale, but not graduated, and studied law at the Litchfield, Conn., law-school under Judge Reeve, and in Harrisburg, Pa., under Thomas Elder. He was admitted to the bar in 1808, was deputy attorney-general for Dauphin county in 1809–'12, and served in the legislature in 1812–'14. He was appointed president judge of his judicial district, 3 July, 1815. In 1814 he accompanied the volunteers to Baltimore as an aide to Gen. Forster. On 30 Dec., 1816, he resigned, to accept the office of attorney-general of the state, serving till 1819. In June, 1821, he removed to Lancaster and resumed the practice of his profession. He was the anti-masonic candidate for vice-president of the United States in 1832. "Mr. Ellmaker," says Alexander Harris in his "Reminiscences," "was reported to be a good lawyer, and his addresses to the jury when at the bar were clear, distinct, and argumentative."

ELLSKWATAWA, Indian prophet, b. on the banks of the Scioto river, near what is now Chillicothe, about 1770. The date of his death is un-

known. He was the son of Pukeesheno, a chief of the Shawnees, and a brother of the famous Tecumseh. He possessed in 1808 a tract of country near the confluence of the Tippecanoe with the Wabash. With him was a band of about a thousand warriors belonging to various tribes. He administered the affairs of his followers so badly that in a short time he was deserted by all but about three hundred, and these were in a most wretched state of existence. At this juncture Tecumseh appeared among them, and assumed the direction of affairs, acting, however, in the name of the prophet. In 1809 the government directed Gov. William H. Harrison to purchase of the Delawares, Miamis, and Pottawatamies a large tract of country on both sides of the Wabash, and extending up the river sixty miles beyond Vincennes. This tract included the section settled upon by the prophet and his band, and the purchase led to the famous interview between Harrison and Tecumseh. The prophet is next heard of at the battle of Tippecanoe, 4 Nov., 1811, where he directed or ordered the attack. During the action he was performing conjurations on an eminence in the vicinity, but out of the reach of danger. After the end of the war between Great Britain and the United States the prophet received a pension from the British government, and resided in Canada till 1826, when, together with the only surviving son of Tecumseh and others, he settled beyond the Mississippi. The accounts relative to his character, and his pretensions as a prophet, are conflicting. There can, however, be but little doubt that the Indians generally regarded him as possessing the gift of prescience in an eminent degree. In his fiftieth year, while in the act of lighting his pipe, he fell back upon his bed, and became apparently lifeless. Preparations were made for his interment, but during his removal for that purpose he revived. His first words were: "Don't be alarmed. I have seen heaven. Call the nation together, that I may tell them what has appeared to me." When the people had assembled, he told them that he had been conducted to the gates of heaven by two young men sent by the Great Spirit, and that the Great Spirit was angry with them, and would destroy them unless they refrained thenceforth from drunkenness, lying, and stealing. See Edward Eggleston's "Tecumseh and the Shawnee Prophet" (New York, 1878).

ELLSLER, Fanny, dancer, b. in Vienna, Austria, 23 June, 1810; d. there, 27 Nov., 1884. She began her career at six years of age, and at the age of seventeen, with her sister, who was two years her senior, appeared on the stage at Naples. In 1830 the two performed in Berlin, afterward in Vienna, and in 1834 went to the opera-house in Paris. Fanny was much preferred for her grace, agility, and beauty, and caused an excitement among theatre-goers in the French capital. In 1840 she came to this country and appeared at the Park theatre in several ballets with immense success, finally making a general tour through the principal cities of the United States. She returned to England in 1842, visited Russia and Germany professionally, and took leave of the stage at Vienna in 1851. Most of her later years were spent in retirement at her villa near Hamburg. She was tall and slender, and her features regular, animated, and winning. In sprightliness, combined with grace, she has never been excelled.

ELLSWORTH, Ephraim Elmer, soldier, b. in Mechanicsville, Saratoga co., N. Y., 23 April, 1837; d. in Alexandria, Va., 24 May, 1861. After entering mercantile life in Troy and New York city, he removed at an early age to Chicago, where he studied law, and became a solicitor of patents. In 1860 he organized a regiment of zouaves, which became renowned for the perfection of their discipline, and of which he was commissioned colonel. He accompanied Lincoln to Washington in 1861, and proceeded thence to New York, where in April he organized a zouave regiment composed of firemen. Of this regiment he was appointed colonel, and sent to Alexandria, Va. Seeing a Confederate flag floating above a hotel owned by a man named Jackson, Ellsworth rushed to the roof and tore down the flag. On his way from the roof he was met and shot dead by Jackson, who in turn was immediately killed by one of Ellsworth's men, Frank E. Brownell.

ELLSWORTH, Erastus Wolcott, poet, b. in East Windsor, Conn., 27 Nov., 1822. He was graduated at Amherst college in 1844, and studied law, but was diverted from the profession by a taste for mechanics, and has occupied himself chiefly as an inventor. In 1845 he took out patents for a drawing or copying instrument, and for a device for making a siphon discharge a portion of its contents at the highest point. He then entered an extensive foundry. His first published poem, entitled "The Yankee," appeared in 1849; his best and longest is "Ariadne," originally printed in the "International Magazine" (1852); his most popular is "Tuloom." Some of his fugitive pieces were collected and published (Hartford, 1855).

ELLSWORTH, Mary Wolcott, writer, b. in Exeter, N. H., in 1830; d. in Newton, Mass., 12 Aug., 1870. Her maiden name, under which she wrote, was Janvrin. She was educated at the Exeter female seminary, and began her literary career at eighteen years of age with a prize tale for a Boston journal. She afterward wrote both prose and verse for periodicals, and in 1858 began an engagement as a regular contributor to "Godey's Lady's Book." Miss Janvrin edited and wrote biographical articles for "Cypress Leaves" (Boston, 1857); and published "Peace, or the Stolen Will" (Boston, 1857), and "An Hour with the Children" (Boston, 1860). She also compiled a series of books entitled "The Juvenile Miscellany" (Boston, 1858).

ELLSWORTH, Oliver, jurist, b. in Windsor, Conn., 29 April, 1745; d. there, 26 Nov., 1807. He entered Yale in 1762, but afterward went to Princeton, where he was graduated in 1766, with high rank as a scholar. After a year's study of theology he abandoned it for the law, and was admitted to the bar of Hartford county in 1771. He married in the following year, and for three years divided his attention between farming and practice. Becoming states' attorney in 1775, he sold his farm, removed to Hartford, and soon acquired a larger and more remunerative practice than any other member of the Connecticut bar. As a Whig he was chosen, at the outbreak of the Revolution, to represent Windsor in the general assembly, was

one of the committee of four, called "the Pay-table," that managed all the military finances of the colony, and in October, 1778, took his seat as a delegate to the Continental congress, where he served on the marine committee (acting as a board of admiralty) and the committee of appeals. By yearly election, from 1780 till 1784, he was a member of the governor's council, in which he held unrivalled influence, and in June, 1783, left his seat in congress and, although re-elected, declined to serve. In 1784 he declined the appointment of commissioner of the treasury, tendered by congress, but accepted a legislative assignment as judge of the Connecticut superior court, which he held until made a member of the Federal convention at Philadelphia in May, 1787. Here he was conspicuous in advocacy of the rights of the individual states, and it was on his motion that the words "National government" were expunged from the constitution and the words "Government of the United States" substituted. His name was not affixed to that document, because pressing domestic considerations compelled his return home as soon as all of the provisions of the constitution had been completed; but his force and energy were successful the next year in securing its ratification, against much opposition, in the Connecticut state convention. When the new government was organized at New York in 1789, he was one of the senators from Connecticut, and was chairman of the committee for organizing the U. S. judiciary, the original bill, in his own handwriting, passing with but slight alterations, and its provisions being still in force. His watchfulness over the public expenditures earned for him the title of "the Cerberus of the Treasury," and his abilities were strenuously exercised in building up the financial credit of the government, and for the encouragement and protection of manufactures. John Adams spoke of him as "the finest pillar of Washington's whole administration," and he was, by common consent, the Federalist leader in the senate. The mission of John Jay to England in 1794 was suggested by him, and by his influence Jay's treaty, though strenuously opposed in the house of representatives, was defended and approved by the senate. In March, 1796, he was appointed chief justice of the U. S. supreme court, and served with distinguished ability till 1799, when President Adams, on the recommendation of the senate, appointed him, with Patrick Henry and Gov. William R. Davie, an extraordinary commission to negotiate with France, the relations between which nation and the United States were then severely strained. On reaching Paris, 2 March, 1800, they found Napoleon Bonaparte at the head of the new republic, and soon concluded a satisfactory adjustment of all disputes. The negotiations and discussions were conducted almost exclusively by Judge Ellsworth, and secured all the points most essential to the securing of peace, including a recognition from France of the rights of neutral vessels, and an indemnity for depredations on American commerce. Ill health preventing his immediate return, Mr. Ellsworth sent home his resignation as chief justice and visited England, where, while trying the mineral springs at Bath and elsewhere, he became the recipient of marked attention from the court and from leading public men, as well as from the English bench and bar. After his return to his home in April, 1801, his impaired health decided him to remain free from the cares of public life, but in 1802 he was again elected a member of the governor's council, which acted as a supreme court of errors, being the final court of appeals in Connecticut from all inferior courts of state jurisdiction. In May, 1807, on a reorganization of the state judiciary, he was appointed chief justice of the supreme court, but failing health compelled his resignation within a few months, and he died soon afterward. His extraordinary endowments, accomplishments as an advocate, integrity as a judge, patriotism as a legislator and ambassador, and sincerity as a Christian, were fitly complemented by a fine personal presence and by manners at once plain, unaffected, and social, yet tinctured with a courtliness and dignity which impressed all with whom he came in contact. In 1790 Yale, and in 1797 both Dartmouth and Princeton, conferred on him the degree of LL. D.—His son, **Henry Leavitt,** commissioner of patents, b. in Windsor, Conn., 10 Nov., 1791; d. in Fairhaven, Conn., 27 Dec., 1858, was graduated at Yale in 1810. After studying law under Judge Gould, at Litchfield, Conn., he settled first at Windsor and then at Hartford, where he remained eight or ten years. At the close of this period he accepted a government appointment, and went as resident commissioner among the Indian tribes to the south and west of Arkansas. From July, 1836, till May, 1848, he was U. S. commissioner of patents. His reports, especially those on the science of agriculture, were much prized. He afterward settled for a time as a land agent in Lafayette, Ind., but in 1857 returned to his native state and settled at Fairhaven. He published "Digest of Patents from 1770 to 1839" (1840).—Henry Leavitt's twin brother, **William Wolcott,** jurist, b. in Windsor, Conn., 10 Nov., 1791; d. in Hartford, 15 Jan., 1868, was graduated at Yale in 1810, studied law in Litchfield and Hartford, and was admitted to the bar in 1813. In the same year he married Emily, eldest daughter of Noah Webster, and established a successful practice in Hartford. In 1817, when his brother-in-law, Judge Williams, then the foremost lawyer at the Hartford bar, was elected to congress, he made Mr. Ellsworth his partner. In 1827 Mr. Ellsworth became professor of law in Trinity college, and held this office till his death. In 1829 he was elected to congress as a Whig, and served till 1834, when he resigned and returned to the practice of his profession. During his congressional service he was a member of the judiciary committee, and in this capacity took an active part in preparing and reporting measures to carry into effect President Jackson's proclamation against nullification. He prepared and reported for the committee the present law of copyright, after exhaustive and comparative research into the laws of the United States and other countries. He was also one of the committee to investigate the U. S. bank at Philadelphia. In 1838 he was chosen governor of Connecticut, and re-elected the three following years, during which period he twice declined an election to the U. S. senate. In 1847 he was elected by the legislature a judge of the superior court and of the supreme court of errors, and remained on the bench

Oliver Ellsworth

till he reached the age of seventy, when his term expired by limitation. He received the degree of LL. D. from the University of New York in 1838. An oration delivered at his funeral by George A. Gould was published (Hartford, 1868).—Henry Leavitt's son, **Henry William,** lawyer and author, b. in Windsor, Conn., in 1814; d. in New Haven in August, 1864, was graduated at Yale in 1834, studied in the law-school, and removed to Indiana in 1835. He was chargé d'affaires to Sweden, 1845–'50, and after this counsel for Samuel F. B. Morse in suits connected with his telegraph patents. He was author of "Sketches of the Upper Wabash Valley, Indiana" (New York, 1838), and "American Swine Breeder" (1840), and was a contributor to the "Knickerbocker Magazine."

ELLYSON, Henry Keeling, journalist, b. in Richmond, Va., 31 July, 1823. He was apprenticed at an early age as a printer, and steadily rose in his calling. In 1854–'5 he served his native city in the Virginia legislature, from 1857 till 1865 was sheriff of Henrico county, and in 1870 was elected mayor of Richmond. He has long been connected, as associate proprietor and editor, with the Richmond "Dispatch," one of the most widely circulated journals in the south. Mr. Ellyson has been prominently identified with all the great enterprises of the Virginia Baptists for the past forty years, and as secretary of the state mission board he has performed a most valuable work. He is president of the trustees of Richmond college.

ELMENDORF, Joachim, b. in Rochester, Ulster co., N. Y., 26 March, 1827. He was graduated at Rutgers in 1850, and at the New Brunswick, N. J., theological seminary in 1853. He was licensed to preach by the Dutch Reformed church in Poughkeepsie in the same year, and had pastorates in Syracuse, Albany, and other places, till 1872, when he was called to Poughkeepsie, N. Y., where he remained until he removed to New York city in 1886. He was elected a trustee of Rutgers college in 1869. He is the author of several discourses, memoirs of Richard Varick De Witt and Alice Justina De Peyster (1872), and many addresses and contributions to periodical literature. The degree of D. D. was conferred upon him by Union.

ELMENDORF, John James, educator, b. in New York city, 27 June, 1827. He was graduated at Columbia in 1845, and entered the priesthood of the Protestant Episcopal church. In 1848 he became instructor of mathematics at Columbia, and in 1868 professor of philosophy and belles-lettres in Racine college, Wis. The degree of D. D. was conferred upon him by Columbia in 1866. His publications include "Manual of Rites and Ritual" (1867); "A History of Philosophy" (1876); and "Outlines of Logic" (1884).

ELMER, Jonathan, jurist, b. in Fairfield, Cumberland co., N. J., 29 Nov., 1745; d. in Burlington, N. J., 3 Sept., 1807. He was graduated in medicine at the University of Pennsylvania in 1771, and elected the next year a member of the American philosophical society. He began the practice of medicine, and afterward turned his attention to political affairs, raised a military company, was active in the committee of vigilance, entered the Provincial congress in 1776, and was a member of the committee that formed the first constitution of the state. He was a member of the National congress during the Revolution, and was a medical inspector of the army. After the establishment of independence he was for two years a member of the National house of representatives, and was a member of the upper house of the state legislature in 1780, and again in 1784. He was high sheriff, and afterward surrogate, of Cumberland county, holding the latter office from 1784 till 1802. In 1787 he was elected to the presidency of the State medical society, and in 1789 was chosen to represent the state as a Federalist in the U. S. senate, resigning it in 1791. He was one of those who voted for establishing the seat of government on the Potomac. For many years after leaving the senate he devoted himself both to literary and legal pursuits, and was presiding judge of the county court of common pleas, which office he resigned in 1814.—His brother, **Ebenezer,** physician, b. in Cedarville, N. J., in 1752; d. in Bridgeton, N. J., 18 Oct., 1843, after receiving an academic education, studied medicine with his brother, and was admitted to practice. He entered the army as an ensign, and in 1777 was appointed surgeon of the 2d New Jersey regiment. He practised medicine in Bridgeton, N. J., was a member of the state house of representatives from 1789 till 1795, serving as speaker of the assembly in 1791 and 1795, and was thrice elected to congress, serving from 1801 till 1807. He was appointed collector of customs in Bridgeton in 1808. He was vice-president of the state council from 1807 to 1815, and held the office of vice-president of Burlington college from 1808 till 1817, and again from 1822 till 1832. During the war of 1812 he commanded a brigade of New Jersey militia on the eastern bank of the Delaware. He was president of the Society of the Cincinnati for New Jersey at the time of his death, and was the last survivor of the original members, as he was also the last surviving Revolutionary officer of New Jersey.—**Lucius Quintius Cincinnatus,** son of Ebenezer, jurist, b. in Bridgeton, N. J., 3 Feb., 1793; d. there, 11 March, 1883, was educated in the schools of his native town and at Woodbury, Bordentown, and at Philadelphia. He served in the militia during the war of 1812 as lieutenant of artillery, and was promoted to the rank of brigade major and inspector. In 1815 he studied law, was admitted to the bar of New Jersey, and practised in his native town, where he was prosecuting attorney for the state for many years, and was a member of the assembly from 1820 till 1823, and in the latter year acted as its speaker. In 1824 he was prosecutor of the pleas for Cumberland county, and in the same year he was made U. S. attorney for the state. He was elected a representative in congress, as a Democrat, in 1842, was appointed attorney-general of New Jersey in 1850, holding the office two years, and twice appointed justice of the state supreme court—in 1852, and again in 1859. In 1866 he retired from public life. He was president of the New Jersey Society of the Cincinnati when he died. Princeton gave him the degree of A. M. in 1824, and that of LL. D. in 1865. His published works were "A Digest of the Laws of New Jersey," which became known as "Nixon's Digest" (Newark, 1838; 4th ed., 1868); "Genealogical and Biographical Account of the Elmer Family" (Bridgeton, N. J., 1860); "History of Cumberland County" (1869); "History of the Constitution and Government of New Jersey, with Biographical Sketches of the Governors from 1776 till 1845" (1872); "Eulogium on Garrett D. Wall, delivered before the Bench and Bar of New Jersey" (1872); and several historical collections.

ELMORE, Franklin Harper, financier, b. in Laurens district, S. C., 16 Jan., 1799; d. in Washington, D. C., 29 May, 1850. He was the second son of Gen. John A. Elmore, a soldier of the Revolution. He was graduated at South Carolina college in 1819, studied law, and was admitted to the bar in 1821. From 1822 till 1836 he was solicitor

of the southern circuit. In 1824 he was appointed aide to Gov. Manning, with the rank of colonel. He married Harriet, the second daughter of President Taylor. He was elected trustee of the state in 1825, 1829, and 1833, was elected to congress in 1835, as a State-rights Democrat, and remained until 1839, when he was elected president of the bank of the state of South Carolina. To this office he was annually elected till April, 1850, when by the governor's appointment he became U. S. senator, to fill the vacancy occasioned by the death of John C. Calhoun, and his own life closed twenty-three days after he entered the senate. He had been selected in 1838, by the congressional delegation, to obtain authentic information concerning the anti-slavery movement; and the letters that passed between him and James G. Birney were printed, under the title of the "Elmore Correspondence."—His brother, **Rush,** jurist, b. in Alabama about 1810, was educated for the bar, served in the Mexican war, and in 1854 was appointed an associate justice of the U. S. court in Kansas, residing in Lecompton. He died during the civil war.

ELMSLEY, John, Canadian jurist, b. in England in 1762; d. in Montreal, 29 April, 1805. He was a nephew of the noted London bookseller of the same name. After serving for a time as puisne judge in Upper Canada, he became speaker of the legislative council of Lower Canada, and was a member of the executive council. In October, 1802, he was appointed chief justice.—His son, **John,** Canadian legislator, b. in Elmsley House, Toronto, in 1801; d. in Toronto, 8 Aug., 1863, entered the British navy, attained the rank of captain, and after his retirement from the service took a leading part in the public affairs of Upper Canada. He was called by royal mandamus to the legislative council, and sat as a member of that body until the union of the two provinces in 1840. On his marriage with Miss Sherwood, a Catholic lady of Toronto, he went over to the Church of Rome, and henceforth he was a munificent patron of Catholicism. He established the House of Providence at Toronto, and in a great measure was instrumental in founding the College of St. Michael in the same city. He also established the first Roman Catholic school in Upper Canada.

ELPHINSTONE, George Keith, Viscount, British naval officer, b. in Scotland in 1746; d. 10 March, 1823. He was made commander in 1772, and as post-captain he served in America in 1775–'6. During the American war he commanded the "Pearl," a frigate of 32 guns, participated in the attack on Mud Island, and at the capture of Charleston commanded a detachment of seamen. In 1782 he captured the French frigate "L'Aigle," of 40 guns. He obtained the rank of vice-admiral in 1795, and the same year captured Cape Town. In 1800 he was commander-in-chief in the Mediterranean, where he took Malta and Genoa. For his services in Egypt he was raised to the British peerage, as baron (1801), having for four years had the same title in the Irish peerage. In 1805 he was made admiral of the white, and in 1814 was created a viscount of the United Kingdom. He was a son-in-law of the noted Mr. and Mrs. Thrale, friends of Dr. Samuel Johnson.

ELSBERG, Louis, physician, b. in Iserlohn, Prussia, 2 April, 1836; d. in New York city, 19 Feb., 1885. He emigrated to Philadelphia with his parents in 1849, was educated in the public schools of that city, and was graduated at Jefferson medical college in 1857. For six months after graduation he was resident physician at Mount Sinai hospital, New York. He then studied in Europe for a year, and on his return introduced medical laryngoscopy into the United States. He settled in New York city, delivered a course of lectures at University medical college in 1861, and in 1862 established the first public clinic for diseases of the throat. This was his specialty, and he contributed largely to the literature of the subject, both by lectures and published papers. In 1865 a prize gold medal was awarded by the American medical association to his essay on "Laryngoscopical Surgery, illustrated in the Treatment of Morbid Growths within the Larynx." From 1880 till 1884 he published the "Archives of Laryngology," a quarterly, and "A Complete Manual of Throat Diseases." He also wrote many essays on subjects pertaining to music, general literature, and science, among which are the "Discovery of a New Kind of Resultant Tones," "Explanation of Musical Harmony," "The Preservation of Organic Molecules," and on "The Plastidule Hypothesis."

ELSON, Louis Charles, musical critic, b. in Boston, Mass., 17 April, 1848. His theoretical knowledge of music was mostly gained from Carl Gloggner, under whom he studied at the Conservatory of music in Leipsic. In 1876 he became a contributor to the "Musician and Artist," and in 1877 began contributing to the "Vox Humana," of which he became editor in 1879. He is chiefly known as one of the editors of the Boston "Musical Herald," and through his criticisms in the Boston "Courier." He has contributed articles to the Boston "Transcript," New York "Tribune," and "St. Nicholas" magazine, and has translated and arranged over two thousand German, French, and Italian songs. He has composed songs in the style of the German Lied, has published "Curiosities of Music" and "German Songs and Song-Writers," and is now (1887) engaged in preparing a "History of German Song."

ELTON, John P., manufacturer, b. in Watertown, Conn., 24 April, 1809; d. in Waterbury, Conn., 10 Nov., 1864. His early education was received in the public schools and in the academy at Farmington, Conn. In March, 1832, he went into business in Waterbury, Conn., and in January, 1833, his firm began the manufacture of brass wire, being the first in the country to take up that industry. In 1836 the manufacture of brass and copper tubing was begun. In 1840, 1849, 1851, and 1863 he served in the state legislature. In 1858 he engaged in private banking, under the style of the Elton loan and trust company, and after his death the business was organized into a joint stock company. In 1864 he was a presidential elector.

ELTON, Romeo, clergyman, b. in Ellington, Conn., in 1790; d. in Boston, 5 Feb., 1870. He spent his early days on his father's farm, and was graduated at Brown in 1813. He studied theology, was ordained in June, 1817, pastor of the 1st Baptist church in Rhode Island, and in 1824 held a charge in Windsor, Vt. Failing health obliged him to resign each pastorate. After his resignation at Newport he was called to the chair of Latin and Greek at Brown in 1825, and passed two years in Europe in preparing himself for the duties of the professorship. Resigning in 1843, he visited England, and resided in Exeter until 1867, and in Bath two years. On returning to this country, he was again pastor in Rhode Island and Connecticut, resumed his residence in England after two or three years, and returned to the United States again in 1869, and was a pastor in Boston. He was one of the editors of the "Eclectic Review," and received the degree of D. D. from Nashville university in 1842. Among other bequests that Dr. Elton made

was one of $20,000 to establish a professorship of natural philosophy at Brown, and nearly as much to Columbian college, D. C., to establish a professorship of intellectual and moral philosophy. He also endowed some scholarships in Brown university. His published works include "Callender's Century Sermon," edited with copious notes and sketches; the "Works of Jonathan Maxcy, D. D.," first president of Brown university, with an introductory memoir (New York, 1844); and a "Life of Roger Williams, the Earliest Legislator." The latter work contains much original matter, particularly the letters of Mrs. Sadlier, daughter of Sir Edward Coke, to Roger Williams.—His second wife, **Prothesia S. Goss,** b. in England about 1800; d. there in 1867, wrote "The Philanthropist," "Spirit of Sectarianism," and "The Piedmontese Envoy, or the Men, Manners, and Religion of the Commonwealth" (1844).

ELUYAR Y SUVISA (erroneously written **D'ELHUYART), Fausto de** (ay-loo-yar'-ee-soo-vee'-sah), Spanish chemist, b. in Logroño, Spain, 11 Oct., 1757; d. in Madrid in 1833. After studying in Spain, he went to Paris, devoted himself to natural science, and was appointed professor of mineralogy at the seminary of Vergara when he was scarcely nineteen years old. Two years afterward he was sent by the Royal basque society to make special studies in the mineralogical academy of Freiberg, Saxony, and in the mineral region of that country, whence he returned in 1781 to Vergara, and again occupied his chair. During 1783–'4, by order of the government, he made scientific explorations of the mountains of Biscay and Navarra, and, in company with his brother Juan (who was afterward director-general of mines in New Granada, and died there), analyzed the German wolfram ore, discovering the new metal called tungsten in 1785. In the same year he was sent by the Spanish government to study the new method of amalgamation, used by Born in Hungaria, where he remained two years, and married in 1786 the daughter of Maria Theresa's privy counsellor, Raab. In 1788 he went to New Spain as president of the royal supreme court of mines, taking with him twenty-five German miners, to teach the new method of amalgamation. He improved and enlarged the mines of Zacatecas, Guanajuato, Sombrerete, Bolaños, Real del Monte, Regla, and Pachuca, and in 1792 established in the city of Mexico the Royal college of mines, taking the chair of chemistry until a special professor could be obtained. During his presidency he established a complete chemical laboratory, a physical cabinet, and collections of minerals and of models of machinery constructed in Mexico of beautiful native woods. Humboldt visited the college in 1803, and admired its completeness and scientific merits. Eluyar's distinguished qualities were so much appreciated that, in 1797, when his term of nine years was about to expire, the junta general of the vice-royalty petitioned the king to reappoint him, with the rank of minister of the royal council of commerce, mines, and mints for New Spain. After the rebellion of Iturbide and the independence of Mexico, Eluyar returned to Spain, and was there appointed general director and member of the council of mines (1823), which place he held until his death. Eluyar was the inventor of a hydraulic machine and the author of several works on mineralogy, mining, and mints, the principal ones being "Descubrimiento de un nuevo metal hecho en el análisis del Wolfram" (printed by the Basque society); "Tratado sobre la nueva amalgamación del concejero Born" (printed by the Mineralogical society of Germany); "Plan y distribución para el Colegio Seminario de minería de Méjico"; "Memoria sobre noticias de minas" (1793); "Sobre una nueva máquina hidráulica del autor" (1805); "Discursos sobre la importancia y subsistencia del Real cuerpo de la minería en Nueva España" (1815); "Disertacion sobre recojer la moneda provisional, y sobre las casas de moneda provínciales"; "Discursos sobre la minería, su gobierno en general, su estado actual en Nueva España y su conveniente reforma"; and "Indagaciones sobre el sistema de amonedación observado en Nueva España, su actual estado y producto" (1818).

ELWYN, Alfred Langdon, philanthropist, b. in Portsmouth, N. H., 9 July, 1804; d. in Philadelphia, Pa., 15 March, 1884. He was a grandson of John Langdon, the first continental governor of New Hampshire. Alfred was graduated at Harvard in 1823, studied medicine abroad in 1824–'9, and, on his return, at the University of Pennsylvania, where he received his degree in 1831. Dr. Elwyn never practised his profession, but became widely known as a philanthropist. He was the originator of the Pennsylvania agricultural society and farm-school, and its president in 1850, and was also at various times president of the Pennsylvania institution for the instruction of the blind, of the Training-school for feeble-minded children, and of the Society for the prevention of cruelty to animals. He published "Bonaparte," a poem (Philadelphia, 1848); "Glossary of Supposed Americanisms" (1860); "Letters to the Hon. John Langdon, during and after the Revolution" (1880); "Melancholy, and its Musings" (1881); and "A Few Hints to the City on Intemperance."

ELY, Alfred, clergyman, b. in West Springfield, Mass., 8 Nov., 1778; d. in Monson, Mass., 6 July, 1866. He was graduated at Princeton in September, 1804, and elected a tutor in that college, where he remained one year. He then returned to West Springfield, entered on the study of theology, was licensed to preach in February, 1806, and ordained the following December. His pastorate was remarkable for its success as well as for lasting through his life. He was one of the earliest trustees of Amherst college, and in that office assisted in sustaining the institution in the difficulties and discouragements of its early history. He was elected in 1840 a corporate member of the American board of foreign missions. Several of his sermons have been published.

ELY, Alfred, lawyer, b. in Lyme, New London co., Conn., 18 Feb., 1815. He received an academic education, removed to Rochester, N. Y., in 1835, studied law, was admitted to the bar in 1841, and began practice in Rochester. Mr. Ely was elected to congress as a Republican in 1858, and served from 5 Dec., 1859, till 3 March, 1863. He went as a civilian spectator to the battle-field of Bull Run in July, 1861, where he was captured by the Confederates and put into Libby prison, Richmond. After nearly six months' confinement he was exchanged for Charles J. Faulkner, the American minister to France, who had been imprisoned for disloyalty. During his term of imprisonment he kept a diary, which was edited by Charles Lanman, with the title "Journal of Alfred Ely, a Prisoner of War in Richmond" (New York, 1862).

ELY, Ezra Stiles, clergyman, b. in Lebanon, Conn., 13 June, 1786; d. in Philadelphia, Pa., 18 June, 1861. He was graduated at Yale college in 1803, studied theology with his father, Rev. Zebulon Ely, and was ordained pastor of the Presbyterian church in Colchester, Conn., in 1806. He was then chaplain of the New York city hospital, subsequently pastor of the Pine street church,

Philadelphia, till 1844, and of the Northern Liberties church in that city till 1851, when he had a paralytic shock. He undertook to establish a college and theological seminary in Missouri, in 1834, but reverses discontinued his efforts while others carried on the work. He was one of the founders and trustees of Jefferson medical college, for, in its pecuniary straits he bought the lot and erected the building where the institution now stands. He was active in works of benevolence, giving during his life about $50,000 to various institutions, including Jefferson medical college and Marion college, Mo. Washington college, Tenn., gave him the degree of D. D. Dr. Ely edited gratuitously for several years a religious paper called the "Philadelphian." He published a memoir of his father, Rev. Zebulon Ely; "Visits of Mercy"; "The Contrast"; "Ely's Journal"; "Sermons on Faith"; "The Science of the Human Mind" (1819); "Contrast between Calvinism and Hopkinsianism" (1811); and "Endless Punishment" (1835). He also edited, with William McCorkle and Rev. Gregory Bedell, a "Collateral Bible, or Key to the Holy Scriptures" (3 vols., Philadelphia, 1826–'8); and left in manuscript a "History of the Churches of Philadelphia."

ELY, Richard Theodore, political economist, b. in Ripley, N. Y., 13 April, 1854. After attending the New York state normal school, he was graduated at Columbia in 1876, and, as holder of the graduate fellowship of letters in that institution, studied at Heidelberg university, Germany, in 1876–'9, receiving the degree of Ph. D. in the latter year. Since 1885 he has been associate in political economy at Johns Hopkins, secretary of the American economic association, and has also served as tax commissioner of Maryland since 1885. He has contributed to periodical literature, and has published "French and German Socialism in Modern Times" (New York, 1883); "The Past and Present of Political Economy" (Baltimore, 1884); "The Labor Movement in America" (New York, 1886). He has also edited, with an introduction, "Co-operation in America" (Baltimore, 1887).

ELY, Samuel Rose, clergyman, b. in West Springfield, Mass., 29 Dec., 1803; d. in Roslyn, L. I., 11 May, 1873. He was graduated at Williams in 1830, studied theology at Princeton, and held Presbyterian pastorates in Carmel, N. Y., and East Hampton, Brooklyn, and Roslyn, L. I. He received the degree of D. D. from Columbia in 1865.

ELY, William G., soldier, b. about 1835. At the beginning of the civil war he enlisted as a private for the three months' call, went out again as lieutenant-colonel of the 6th Connecticut infantry, and was afterward elected colonel of the 18th regiment. On 13 June, 1863, in charge of the 2d brigade, he advanced upon the Fort Royal pike, and, while in action, was made a prisoner. He was confined in Libby prison, Richmond, Va., till the following February, when, with 108 other officers, he escaped through the famous tunnel dug under Twentieth street. About fifty of the party were recaptured, among them Col. Ely, in a state of great exhaustion. He was taken by cavalry forty-two miles out, after being absent four days, and returned to the prison. A few weeks later he was paroled, and returned north, his exchange following. On 17 May, 1864, he rejoined his regiment, and commanded it at the battle of Piedmont on 4 June, 1864. On 18 June, in the advance toward Lynchburg, he was wounded in the throat and temporarily disabled. In August he was assigned to the command of a brigade, and in September was brevetted a brigadier-general.

ELY, William Mather, politician, b. in Binghamton, N. Y., in 1818; d. there, 5 Feb., 1872. He was educated at Amherst college, but was not graduated. After leaving college he followed mercantile pursuits for a time, but afterward engaged in farming, and was for several years president of the State agricultural society. In 1868 he was elected to the legislature, and served till his death. He was an industrious legislator, and had acquired extensive knowledge of state affairs.

ELZEY, Arnold, soldier, b. in Somerset county, Md., 18 Dec., 1816; d. in Baltimore, Md., 21 Feb., 1871. His name was originally Arnold Elzey Jones, but he dropped the last name shortly after his graduation at the U. S. military academy in 1837. He was assigned to the 2d artillery, and served in the Florida war of 1837–'8 and in the Canada border disturbances. During the Mexican war he was brevetted captain for gallantry at Contreras and Churubusco, and was also at Fort Brown, Vera Cruz, Cerro Gordo, San Antonio, Molino del Rey, Chapultepec, and the capture of the city of Mexico. He became captain in the 2d artillery, 14 Feb., 1849, and served against the Seminoles in 1849–'50 and 1856. On 25 April, 1861, he resigned and entered the Confederate service, with the rank of colonel. At the first battle of Bull Run he was senior colonel of Kirby Smith's brigade, and in the afternoon after Gen. Smith was wounded, led a successful charge, for which he was complimented by Gen. Beauregard, and promoted on the field to a brigadier-generalship by Jefferson Davis. He commanded a brigade through Stonewall Jackson's valley campaign, was wounded and had his horse shot under him at Port Republic, and at Cold Harbor was shot through the head. This last wound prevented him from seeing any more active service, but after his recovery he was promoted to major-general, and commanded the department of Richmond till just before the close of the war, when he joined Hood in Georgia, and was with him at Chattanooga. After the close of the war he retired to a farm near Jessup's Cut, Anne Arundel co., Md.

EMANGARD, or **ESMANGARD, Charles,** West Indian jurist, b. in Port au Prince, Hayti, in 1755; d. in Paris in 1837. He studied in the Jesuit college of Port au Prince, and after graduation he was appointed substitute judge of the police court of his native city, where his father was president of the civil court. Young Emangard began to administer equal justice to all without regard to persons, and thereby made enemies of the rich proprietors of the island. His first offence against the privileged classes was the condemnation of a rich planter to a large fine for maltreating his slaves. In 1780 Emangard volunteered as counsel for Elmira, a mulatto girl who had been emancipated by her former master at his death, but had been detained and atrociously tortured by his widow, out of jealousy. The woman, Madame de Laureal, was arrested, and, as the feeling on both sides ran high, she was sent to France for an impartial hearing. The case was submitted in privy council to the king, who ordered the widow's estate to be confiscated and given to Elmira; and as Emangard's position in Port au Prince had become untenable in consequence, he was promoted judge of the civil court of the island of Martinique. At the outbreak of the rebellion of the negroes in Santo Domingo in 1800 he was sent by the government to that island, where he was the means of saving from death a great number of prominent proprietors, some of them formerly his enemies. Bonaparte, in recompense, promoted

him judge of the supreme court of Santo Domingo, and when this island was finally lost to France, he became president of the court of Martinique, which position he held till 1827. He then removed to Paris, and, on the accession of Louis Philippe, was appointed member of the state council. He published "De la marine française" (1800); "Des colonies françaises, et en particulier de Saint Domingue" (1802); "La vérité sur les affaires d'Haiti," published at the expense of the former planters of the French part of the island, as Emangard had sustained their right to an indemnity (1833); and "Nouvel avis aux propriétaires de Saint Domingue sur le paymentde l'indemnité" (1836).

EMBRY, James Crawford, clergyman, b. in Knox county, Ind., 2 Nov., 1834. He is of African descent, and was brought up on a farm. He was admitted to the ministry of the African Methodist Episcopal church in 1863, was elected by the general conference of his church in 1876 to be secretary of education, and chosen also financial secretary in 1878. He was a member of the Methodist ecumenical conference at London in 1881, and of the Baltimore centennial conference of 1884. In the latter year he was made general manager of the publishing department of his church. He is the author of "Condition and Prospects of the Colored American" (Kansas City, Mo.).

EMBURY, Emma Catherine, author, b. in New York city in 1806; d. in Brooklyn, N. Y., 10 Feb., 1863. She was the daughter of Dr. James R. Manley of New York city, and in 1828 became the wife of Daniel Embury, afterward president of the Atlantic bank of Brooklyn. From girlhood to the time of her death she was a frequent contributor to various periodicals, in many of them over the pen-name "Ianthe." Her printed volumes include "Guide and other Poems" (New York, 1828); "Female Education"; "The Blind Girl and other Tales"; "Glimpses of Home Life"; "Token of Flowers"; "Pictures of Early Life"; "Nature's Gems, or American Wild Flowers" (1845); "Love's Token Flowers" (1846); "The Waldorf Family, a Grandfather's Legend" (1848); "Poems" (1869).

EMBURY, Philip, preacher, b. in Ballygaran, Ireland, 21 Sept., 1729; d. in Camden, Washington co., N. Y., in August, 1775. His parents were members of the colony of Germans that emigrated from the Palatinate to Ireland early in the eighteenth century, and in which Wesley labored with great success. Embury was educated at a school near Ballygaran, and learned the carpenter's trade. He was converted on Christmas day, 1752, became a local preacher in 1758, and in 1760 came to New York and worked at his trade. In common with his fellow-emigrants, he began to lose interest in religious matters, and did not preach in New York till 1766, when, moved by the reproaches of Barbara Heck, sometimes called the "foundress of American Methodism," he began to hold services first in his own house on Barrack street, now Park place, and then in a rigging loft on what is now William street. The congregation thus formed was probably the first Methodist congregation in the United States, though it is a disputed question whether precedence should not be given to Robert Strawbridge, who began laboring in Maryland about this time. The first Methodist church was built under Embury's charge in 1768, on the site of the present John street church, and he himself worked on the building as a carpenter, and afterward preached there gratuitously. He resigned in 1769 and went to Camden, N. Y., where he continued to work at his trade during the week, preaching every Sunday. He organized among Irish emigrants at Ashgrove, near Camden, the first Methodist society within the bounds of what is now Troy conference. He died suddenly, in consequence of an accident in mowing, and was buried on a neighboring farm, but in 1832 his remains were removed to Ashgrove churchyard, and in 1866 to Woodland cemetery, Cambridge, N. Y., where in 1873 a monument to him was unveiled, with an address by Bishop Simpson.

EMERIAN, Maurice Julien, Comte d', French naval officer, b. in Carhaix, Finisterre, 20 Oct., 1762; d. in Paris, 2 Feb., 1845. On his father's side he belonged to a creole family of Santo Domingo, and was an extensive land-owner there and in the island of Martinique. At the age of sixteen he entered the royal navy as a volunteer, and took part in the war of American independence, distinguishing himself under Comte d'Estaing in the combats of the island of Grenada and of Savannah. He took part in twelve sieges, received three wounds, and in 1769 was rewarded with the rank of lieutenant. In 1797 he was given command of a corvette on the naval station of Santo Domingo, and while cruising in the waters of that island, as well as on the coast of the United States, he rendered important services during the revolt of the negroes. He was then promoted to captain, appointed chief of squadron, and commanded the first division, which formed the vanguard of the Egyptian expedition. For his brilliant services in the battle of Aboukir he was appointed rear-admiral, and was for some time maritime prefect of Toulon. In 1800 he was sent to Santo Domingo to re-establish communication with the south of the island, and successfully accomplished his mission, forcing Dessalines to raise the siege of Port au Prince. In 1803–'11 he had charge of the defence of the coast of the Mediterranean against the English, and rendered important services to his country. In 1811 he was appointed commander of a fleet of twenty-one vessels of the line and ten frigates, constructed and equipped under his personal inspection while he was prefect of Toulon. He had frequent engagements with the English fleets, and for three years never lost a ship. He was made vice-admiral in 1813, and in 1814 defended Toulon against the attack of a formidable fleet. Emerian was made a peer of France by Napoleon in 1815, and by Louis Philippe in 1830. He was engaged in writing his memoirs when he died.

EMERSON, Benjamin Dudley, educator, b. in Hampstead, N. H., in 1781; d. in Jamaica Plain, now a part of Boston, 2 Oct., 1872. He was graduated at Dartmouth in 1805, was a teacher in Newburyport, Mass., in 1810–'17, and afterward principal of the Adams grammar-school, Boston, for many years. He was associated with his brother Frederick in the preparation of school-books, and his spelling-books, readers, and arithmetics became widely popular. He also published an "Academical Speaker" (Boston). According to the provisions of his will, the bulk of his property was given for religious and educational purposes. In it he provided for the establishment of the Hampstead high-school, and left $100,000 to Dartmouth college.—His brother, **Frederick,** author, b. in Hampstead, N. H., 28 Nov., 1788; d. in Boston, Mass., in 1857, was for many years a well-known teacher in Boston, and was for some time superintendent of schools there. He published a series of arithmetics, which were largely used in schools, including the "North American Arithmetic," in three parts (Boston, 1834).

EMERSON, Benjamin Kendall, naturalist, b. in Nashua, N. H., 20 Dec., 1843. He was gradu-

ated at Amherst in 1865, and then spent two years at the University of Göttingen, receiving the degree of Ph. D. in 1869. On his return to the United States he became instructor in geology and zoölogy in Amherst, and in 1872 was appointed professor of these branches. Dr. Emerson is a member of several scientific societies at home and abroad, and has contributed valuable geological papers to scientific journals.

EMERSON, Brown, clergyman, b. in Ashby, Mass., 8 Jan., 1778; d. in Salem, Mass., 25 July, 1872. He was graduated at Dartmouth in 1802, received the degree of D. D. from that college in 1835, and at his death was its oldest graduate. After studying theology in Hancock, N. H., he was ordained, on 14 April, 1805, as Dr. Daniel Hopkins's colleague in the pastorate of the old South church, Salem, where he remained till his death, a period of sixty-seven years, being sole pastor from 1816 till 1849. Dr. Emerson was an able and vigorous preacher, and published various sermons, addresses, and orations, including a sermon on the fiftieth anniversary of his ordination.

EMERSON, Charles Franklin, educator, b. in Chelmsford, Mass., 28 Sept., 1843. He was graduated at Dartmouth in 1868, becoming at once instructor in gymnastics, and also instructor in mathematics in the agricultural department. In 1869 he became instructor in mathematics in the college proper, and in 1872 associate professor of natural philosophy, succeeding in 1878 to full possession of that chair. His work has consisted largely in the development of the physical laboratory in Dartmouth, for which purpose he travelled extensively through Europe during 1883–'4. He is a fellow of the American association of the advancement of science, and is an occasional contributor to scientific literature.

EMERSON, Charles Noble, lawyer, b. in Williamstown, Mass., 6 Feb., 1821; d. in New York city, 15 April, 1869. He was graduated at Williams in 1840, studied law and was admitted to the bar there, and served in the civil war, advancing to the rank of major of volunteers. He delivered a poem before the alumni of Williams college in 1860. He was appointed assessor of internal revenue in Massachusetts in 1865, and published a "Handbook of the Internal Revenue" (Springfield, 1868).

EMERSON, George Barrell, educator, b. in Kennebunk, Me., 12 Sept., 1797; d. in Newton, Mass., 14 March, 1881. He was graduated at Harvard in 1817, and soon afterward took charge of an academy in Lancaster, Mass. He was tutor in mathematics and natural philosophy in Harvard in 1819–'21, and in the latter year was chosen principal of the English high-school for boys in Boston, after declining the professorship of mathematics in Harvard. In 1823 he opened a private school for girls in the same city, and conducted it until 1855, when he retired from professional life. In 1831 he assisted in organizing the Boston society of natural history, of which he became president in 1837. He was instrumental in getting the legislature to authorize the geological survey of the state, and took charge with Dr. Dewey of the botanical department of the survey, under appointment from Gov. Everett. Mr. Emerson was also president of the American institute of instruction, and aided in securing the establishment of the state board of education. He passed forty years of his life in teaching, thirty-four of which were spent in Boston. He received the degree of LL. D. from Harvard in 1859, and was a member and associate of many learned bodies. He wrote the second part of the "School and School-master" (New York, 1842), of which the first part was written by Bishop Potter, of Pennsylvania. A copy of this work was placed in every school in the states of New York and Massachusetts. He was also the author of several lectures on education, and a contributor to various periodicals, and published a "Report on the Trees and Shrubs growing naturally in the Forests of Massachusetts" (Boston, 1846); a "Manual of Agriculture" (1861); and "Reminiscences of an Old Teacher" (1878).

EMERSON, Gouverneur, physician, b. in Kent county, Del., in 1796; d. 2 July, 1874. He was graduated in medicine at the University of Pennsylvania in 1816, and began practice in Philadelphia in 1820, but spent many years in retirement on a farm, where he devoted himself to peach-culture, and gave much attention to the subject of fertilizers. He wrote extensively on the subject of vital statistics, and contributed to the "American Journal of the Medical Sciences," in 1827–'48, tables of the mortality of Philadelphia from 1807 till 1848, showing, among other things, the excessive mortality of males during childhood. He also adapted Cuthbert W. Johnson's "Farmers and Planters' Encyclopædia of Rural Life" (London, 1842) to the United States (Philadelphia, 1853), and published a translation of Le Play's treatise on the "Organization of Labor." He also contributed numerous scientific papers to the proceedings of the American philosophical society, of which he became a member in 1833.

EMERSON, James E., machinist, b. in Maine, 2 Nov., 1823. His youth was spent in farming and working in saw-mills, and he was a carpenter in Bangor for several years. In 1850 he removed to Lewiston, where he established a manufactory for making wood-working machinery, and while engaged in this business made his first invention. This was a machine for boring, turning, and cutting the heads on the spools or bobbins that are used in cotton factories, and did the same work that formerly required three machines. In 1852 he removed to California, where he was first employed as superintendent of a saw-mill, and afterward became a proprietor of mills in various counties of that state. Here he proved the advantages of circular saws with movable teeth. For several years he was occupied in the introduction of his new saws, but subsequently returned to the east and manufactured edge tools in Trenton, N. J., receiving large contracts for swords and sabres from the government during the civil war. He afterward became the superintendent of the American saw company, which was organized to manufacture his circular saws with movable teeth. A circular saw 88 inches in diameter, and costing $2,000, was exhibited by this company at the Paris exposition of 1867. Among his miscellaneous inventions are a combined anvil, shears, and punching machine (1866), and a swage for spreading saw-teeth to a uniform width and shape, and cutting the edge at a single operation.

EMERSON, John Smith, missionary, b. in Chester, N. H., 28 Dec., 1800; d. in Waialua, Oahu, Sandwich Islands, 28 March, 1867. He was graduated at Dartmouth in 1826, at Andover theological seminary in 1830, and was ordained in May, 1831, having acted for a year as agent of the American board of commissioners for foreign missions. He had studied with the intention of becoming a missionary in India, but, yielding to a special call from the Sandwich Islands, sailed in November, 1831, for Honolulu, and was pastor of the Congregational church at Waialua from 1832 till 1864 with the exception of the years 1842–'6, when he

was professor in the seminary at Lahainaluna and pastor of the church at Kaanapali. He visited the United States in 1860, and took the degree of M. D. there. He baptized nearly 1,200 persons during his pastorate. He published five volumes of elementary works, three of them in the Hawaiian language, and, while at Lahainaluna, was joint author, with Rev. Artemas Bishop, of an "English-Hawaiian Dictionary," based on Webster's abridgment (Lahainaluna, 1845).—His wife, **Ursula Sophia Newell,** b. in Nelson, N. H., 27 Sept., 1806, married Mr. Emerson in 1831, and gave him efficient aid in his work.

EMERSON, Joseph, educator, b. in Hollis, N. H., in 1777; d. in Wethersfield, Conn., in 1833. He was graduated at Harvard in 1798, and was tutor there in 1801–'3, meanwhile studying theology. He was pastor of Beverly, Mass., in 1803–'16, and delivered there a course of historical lectures. After visiting the south, and delivering and publishing "Lectures upon the Millennium," he established an academy in Byfield, Mass., and afterward lectured on astronomy in Boston. He taught school and was pastor at Saugus, Mass., in 1821–'3, but in the latter year moved to Charleston, S. C., for his health. After returning to Saugus he gave up ministerial duties in 1825 and engaged in teaching in Wethersfield, Conn. During his residence there he again visited Saugus, and delivered lectures on Pollok's "Course of Time." He published an edition of "Watts on the Mind."—His brother, **Ralph,** clergyman, b. in Hollis, N. H., 18 Aug., 1787; d. in Rockford, Ill., 20 May, 1863, was graduated at Yale in 1811, and at Andover theological seminary in 1814, and, after holding a tutorship in Yale for two years, was ordained, 12 June, 1816, as pastor of the 1st Congregational church at Norfolk, Conn., where he remained till 1829. He was professor of ecclesiastical history and pastor at Andover from 1829 till 1853, then removed to Newburyport, and in 1858 to Rockford, Ill., where he remained till his death, also lecturing at the Chicago theological seminary. Yale gave him the degree of D. D. in 1830. He contributed largely to religious periodicals, published a "Life of Rev. Joseph Emerson," his brother (Boston, 1834), and translated, with notes, Wiggins's "Augustinianism and Pelagianism" (Andover, 1840).

EMERSON, Luther Orlando, musician, b. in Parsonsfield, Me., 3 Aug., 1820. He began the study of music at the age of twenty-four, and has devoted himself to teaching singing-classes and to writing vocal school-exercises and church music, in Boston, Salem, and West Greenfield, Mass. Mr. Emerson is well known as the conductor of numerous musical festivals and conventions in all parts of the Union. Besides occasional pieces in the form of sheet-music, he has written and compiled many collections of church music. Among them "The Romberg Collection" (Boston, 1853); "The Golden Wreath" (1857); "The Golden Harp" (1858); "The Sabbath Harmony" (1860); "The Harp of Judah" (1863); "Merry Chimes" (1865); "Jubilate" (1866); and sundry other collections.

EMERSON, Ralph Waldo, author, b. in Boston, Mass., 25 May, 1803; d. in Concord, Mass., 27 April, 1882. He was the second of five sons of the Rev. William Emerson, minister of the 1st church, Boston. His grandfather at the sixth remove, Rev. Joseph Emerson, of Mendon, Mass., married the granddaughter of Rev. Peter Bulkeley, who was one of the founders of Concord, Mass., and minister of the first church there. Joseph's grandson, of the same name, was pastor at Malden, and married a daughter of the Rev. Samuel Moody, of York, Me., and three of the sons of this union were clergymen; among them William, Ralph Waldo's grandfather, who presided over the church in Concord at the time of the first battle of the Revolutionary war, which took place close by the minister's manse. This grandfather also had married the daughter of a minister, the Rev. Daniel Bliss, his predecessor in the pulpit at Concord. Thus the tendency and traditions of Ralph Waldo Emerson's ancestry were strong in the direction of scholarly pursuits and religious thought. His family was one of those that constitute, as Dr. Holmes says, the "academic races" of New England. His father (see EMERSON, WILLIAM) was a successful but not popular preacher, whose sympathies were far removed from Calvinism. He published several sermons, and was editor of the "Monthly Anthology" from 1805 till 1811, a periodical that had for contributors John Thornton Kirkland, Joseph S. Buckminster, John S. J. Gardiner, William Tudor, and Samuel C. Thacher. It was largely instrumental in developing a taste for literature in New England, and led to the establishment of the "North American Review." The mother of Waldo was a woman "of great patience and fortitude, of the serenest trust in God, of a discerning spirit, and the most courteous bearing." He strongly resembled his father. His aunt, Mary Moody Emerson, a woman of high intellectual attainments, was one of his early companions; and in some printed extracts from her journals a mode of thought and expression remarkably similar to that of the now celebrated essayist is traceable. His youngest brother, Charles Chauncey, who died young, in 1834, was distinguished by a singularly pure and sweet character, and contributed to the "Harvard Register" three articles in which there are passages strikingly like portions of the essays afterward produced by Ralph Waldo. The latter concentrated in himself the spiritual and intellectual tendencies of several generations. He entered the grammar-school at the age of eight, and the Latin-school, under Master Gould, in 1815; but neither here nor at Harvard did he show unusual ability. After leaving college he engaged in teaching, and began the study of theology under the direction of Dr. Channing, although not regularly enrolled at the Cambridge divinity-school. He read Plato, Augustine, Tillotson, Jeremy Taylor, and had from boyhood been an enthusiast regarding Montaigne's essays, of which he said: "It seems to me as if I had myself written the book in some former life." In 1826 he was "approbated to preach" by the Middlesex association of ministers; but his health forced him to pass the winter in South Carolina and Florida. He was ordained in March, 1829, as colleague of Rev. Henry Ware, Jr., in the pastorate of the 2d church, Boston, and succeeded to Ware's place within eighteen months. His preaching was eloquent, simple, and effective. He took part actively in the city's public affairs, and showed a deep interest in philanthropic movements, opening his church, also, to the anti-slavery agitators. In 1832, however, he resigned his pastorate, and did not thereafter regularly resume ministerial labors. Having decided that the use of the elements in the communion was a mistaken formality—the true communion, as he thought, being purely spiritual—he refused to make the compromise proposed, that he should put his own construction on the Lord's supper, leaving his congregation to retain their view. The parting with his flock was friendly, and, although long misunderstood in certain quarters, he always maintained a strong sympathy with Christianity. For several

years he had been writing poetry, but he published no literary work during the term of his pastorate. The poem "Good-bye, Proud World," incorrectly attributed to the date of his resignation, was written before he entered the ministry. Excepting this piece, little poetry of his early period has been given to the world. He had married, in 1829, Miss Ellen Louisa Tucker, who died in February, 1832. In 1833 he went to Europe for his health, visiting Sicily, Italy, and France, and preaching in London and Edinburgh. At this time he met Coleridge, Wordsworth, and Thomas Carlyle, forming with the last-named writer an enduring friendship, which is one of the most interesting in literary annals. It resulted in a correspondence, which was continued for thirty-six years, and has been published under the editorship of Charles Eliot Norton (Boston, 1883). Returning to the United States in 1834, Mr. Emerson preached in New Bedford, declined a call to settle there, and went to Concord, where he remained. In the next winter he began lecturing, the subjects of his choice being, curiously enough, "Water" and "The Relation of Man to the Globe." But he soon found themes better suited to his genius, in a course of biographical lectures given in Boston, discussing Luther, Milton, Burke, Michael Angelo, and George Fox. Two of these were published in the "North American Review." This course was followed by ten lectures on English literature in 1835, twelve on the philosophy of history in 1836, and in 1837 ten on human culture. Much of the matter embraced in them was afterward remoulded and brought out in his later volumes of essays, or condensed into the rhythmic form of poems. Mr. Emerson married, in September, 1835, Miss Lidian Jackson, of Plymouth, Mass. He then left the "Old Manse," where he had been staying with Dr. Ripley, and moved into a house on the old Lexington road, along which the British had retreated from Concord in 1775. In this "plain, square, wooden house," surrounded by horse-chestnut and pine trees, with pleasant garden-grounds attached, he made his home for the rest of his life; and, through his presence there, the village became "the Delphi of New England." On 19 April, 1836, the anniversary of the Concord fight, Emerson's hymn, composed for the occasion and containing those lines which have since resounded almost as widely as the fame of the deed,

"Here once the embattled farmers stood,
And fired the shot heard round the world,"

was sung at the dedication of the battle-monument. In September of the same year his first book, "Nature," an idealistic prose essay in eight chapters—which had been written in the same room of the "Old Manse" in which Hawthorne afterward wrote his "Mosses"—was published anonymously in Boston. During the summer he had supplied the pulpit of the Concord Unitarian church for three months, and in the autumn he preached a while for a new society at East Lexington; but he refused to become its pastor, saying: "My pulpit is the lyceum platform." Doubts had arisen in his mind as to the wisdom of public prayer, the propriety of offering prayer for others, and the rightfulness of adhering to any formal worship. From this time his career became distinctively that of a literary man, although for several years he confined himself mainly to lecturing, and most of his prose writings were first given to the public orally. Carlyle had said to Longfellow that when Emerson came to Craigenputtock it was "like the visit of an angel." In 1836 he edited early sheets of Carlyle's "Sartor Resartus," and in 1838 three volumes of the same author's essays, all of these appearing in book-form in this country before they did so in England, and netting a comfortable sum for Carlyle. "Nature," similarly, met with considerable appreciation in England, but in the United States it took twelve years to sell 500 copies. The character of the book was both methodical and rhapsodical. It taught that the universe consists of nature and the soul, and that external nature serves four purposes—viz.: commodity, beauty, language, and discipline. It ministers to the senses; then to the love of beauty; then it gives us language—i. e., supplies words as the signs of natural facts, by which we interpret our own spirits. Natural laws applied to man become moral laws; and thus we perceive the highest use of nature, which is discipline. It trains reason, develops the intellect, and becomes the means of moral culture. Thus nature speaks always of spirit, suggests the idea of the absolute, teaches worship of God, whom we cannot describe, and shows us that nature itself is only an apparition of God. "The mind is a part of the nature of things," and God is revealed directly to the soul, spirit being present all through nature, but acting upon us through ourselves and not from without. In verbal style this treatise has great beauty, and rises to the plane of a prose poem; but the contents perplexed theologians. The author was accused of pantheism, though it is hard to see how the belief so named differs from the professed Christian doctrine of the omnipresence of God. Most of the practical people in the community regarded Emerson as crazy, revolutionary, or a fool who did not know his own meaning. Ex-president John Quincy Adams wrote concerning him in 1840: "After failing in the every-day vocations of a Unitarian preacher and school-master, he starts a new doctrine of transcendentalism, declares all the old revelations superannuated and worn out, and announces the approach of new revelations."

The term transcendentalists was somewhat vaguely applied to a number of writers, among whom Emerson was the chief; but they did not constitute a regularly organized group, and had no very well-defined aims in common that could warrant the classification. Emerson himself disclaimed it later, saying "there was no concert of *doctrinaires* to establish certain opinions or to inaugurate some movement in literature, philosophy, or religion . . . but only two or three men and women, who read alone, with some vivacity. Perhaps all of these were surprised at the rumor that they were a school or a sect, but more especially at the name of 'Transcendentalism.'" Nevertheless, the scholars and writers of the period under notice, who numbered considerably more than two or three, finally adopted the name that had been forced upon them by changing the name of a periodical gathering held by them from the "Symposium" to "The Transcendental Club." A period of new intellectual activity had begun about 1820, on the return of Edward Everett from Europe, laden with treasures of German thought, which he put into circulation. Gradually his influence, and that of Coleridge and Carlyle in England, produced a reaction against the philosophy of Locke and Bentham, which, denying all innate ideas, and insisting upon purely mechanical revelation, had hitherto ruled Unitarians in Old and New England. The reactionists affirmed the existence of innate ideas, and a faculty in man that transcends the senses and the understanding. Supported by Goethe's deep love of nature as a companion of man, and Wordsworth's conception of it as interfused with spirit, Emerson

made a new advance, reiterated the idea of a transcendent faculty, intuitive religion, and perception of God, and embodied in an original form the spiritual interpretation of nature. The Symposium, or Transcendental Club, began to meet in 1836, first at the house of Dr. George Ripley. Among the members were Emerson, Frederic H. Hedge, James Freeman Clarke, Convers Francis, Theodore Parker, Bronson Alcott, Rev. Cyrus A. Bartol, Orestes A. Brownson, Margaret Fuller, and Miss Elizabeth P. Peabody. Dr. Channing once attended, and was in sympathy with the club, which discussed religion, impersonality, justice, truth, mysticism, pantheism, and the development of American genius. In this last theme perhaps lay the germ of Emerson's oration, "The American Scholar," delivered before the Phi Beta Kappa society at Cambridge in August, 1837. This has been well called "our intellectual Declaration of Independence," an event without any former parallel in our literary annals. After eloquently describing the education and duties of the scholar, it protested against the prevailing subserviency to European taste, suspected the American freeman of being "timid, imitative, tame," and demanded that the individual man "plant himself indomitably on his instincts and there abide. . . . We will walk on our own feet; we will work with our own hands; we will speak our own minds. . . . A nation of freemen will for the first time exist, because each believes himself inspired by the Divine Soul which inspires all men." His friend, Bronson Alcott, having set up a school in Boston for teaching young children by methods based on a new theory of education, published in 1837 a book reporting his own conversations with the children on the gospels, which excited severe criticism, and Emerson defended him in the Boston "Courier." He was destined to rouse a much greater hostility himself by his address to the senior class in the Divinity college, Cambridge, 15 July, 1838. With great force and beauty of language he attacked the formalism of contemporary religion, and the traditional limited way of using the mind of Christ. "Men have come to speak of the revelation as somewhat long ago given and done, as if God were dead. . . . The soul is not preached. . . . It is the office of a true teacher to show us that God is, not was; that he speaketh, not spake. The true Christianity—a faith like Christ's in the infinitude of man—is lost." To each of the graduates he said: "Yourself a newborn bard of the Holy Ghost, cast behind you all conformity, and acquaint men at first hands with the Deity." The address, pronounced with strong conviction, led to lively controversy, in which Emerson took no part. Ten lectures were given by him, in the winter of 1838–'9, on "The Doctrine of the Soul," "Home," "The School," "Love," etc., followed later by "Man the Reformer," "The Method of Nature," and a "Lecture on the Times." In these he treated some of the reforms then agitated—temperance, anti-slavery, non-resistance, no government, and equal labor. Having come to hold the position of a religious reformer, he was looked to for sympathy with other reforms; but he dealt with them in the same spirit as with religion, and proceeded to reform the reformers. He pointed out that "reforms have their higher origin in an ideal justice, but they do not retain the purity of an idea." Their work "is done profanely, not piously; by management, by tactics, and by clamor." Any end pursued for itself, by the practical faculty, must become an offence. The end should be "inapprehensible to the senses"; then it would always be a good, always giving health. Briefly, it was Emerson's mission not to do practical work for reforms, but to supply impulses and a high inspiration to the workers. In 1841 he lectured on "The Conservative," and the next year on "The Transcendentalist," saying that "transcendentalism" was simply modern idealism, and that the "new views" were the oldest of thoughts cast in a new mould. Yet, seven years before, he had consulted with others about establishing a journal to be known as "The Transcendentalist," and in July, 1840, it was begun, under the name of "The Dial." Emerson succeeded Margaret Fuller as the editor, and during its continuance, until April, 1844, published more than forty of his own pieces, prose and verse, in its columns. The poems included such famous ones as "The Problem," "Wood-notes," "The Sphinx," and "Fate." This periodical contained much delicate and valuable writing, but failed of pecuniary support. Associated as he was with the idealists, in the capacity of chief intellectual leader, he took a cordial interest in the semi-socialistic experiment at Brook Farm (1840 to 1847), with which some of the brightest New England men and women of that day were connected; but he did not join the community. Hawthorne, who was actually a member and lost money in the undertaking, has been much criticised for having viewed it independently; but Emerson, outside, held a similar neutral attitude, and wrote an account of the affair, in which, touching it humorously at points, he called it "a French Revolution in small, an Age of Reason in a patty-pan." In 1841 appeared the first volume of his essays, made up from lectures. It embraced "History," "Compensation," "Self-Reliance," "Heroism," "The Over-Soul," "Spiritual Laws," "Love," "Friendship," "Prudence," "Intellect," "Circles," and "Art." A second series was published in 1844, containing "Character," "Gifts," "Manners," "The Poet," "Politics," "New England Reformers," and a new one on "Nature." These made a favorable impression in France and England, and laid the basis of his lofty reputation in this country as a prose-writer. Two years later he collected in a volume of "Poems" his scattered metrical pieces, many of which had been printed in periodicals. He did not escape sharp criticism, but the circle of his admirers rapidly widened. A new periodical, "The Massachusetts Quarterly Review," began its career at Boston in 1847, edited by Theodore Parker, a disciple of Emerson, who expounded the "new views" in a more combative way; and Emerson wrote for it an "Editor's Address," inculcating a wise and sincere spirit in meeting the problems of the state, of slavery, and socialism. In October of that year he sailed to England on a lecturing tour, repeated a course on "Representative Men" in various places, read a special series in London on "The Mind and Manners in the Nineteenth Century," and lectured frequently in Scotland. He was enthusiastically received by large audiences, met a great number of the foremost men and women of the time, and was a guest in many private houses. In 1849 he returned home and published "Representative Men" (1850). Here he contributed to the "Memoirs" of Margaret Fuller Ossoli (1852) an account of her conversations in Boston and her Concord life. He also, having visited Paris while abroad, gave a lecture on "France," which has never been printed; and at the Woman's Rights convention in 1856 delivered an address that took advanced ground, for that date, in favor of larger liberty for women. In

this year the result of his observations in England was published in the volume entitled "English Traits," which gained cordial recognition both at home and abroad, and has been translated into several foreign languages. It is certainly the best analysis of the English people that has been written by an American, and probably the best produced in any country. The style is succinct and exact, sown with epigram, as in most of Emerson's writings; but, the purpose being more objective than that of his essays, the saving common sense that underlies all of his thinking is here brought constantly and predominantly into view. Previously to this publication he had given seven lectures in Freeman place chapel, Boston, and another in New York, and had also made addresses before the Anti-slavery society in both cities. While in the ministry he alone had opened a church to abolition speakers, and his sympathies were always on the side of emancipation. In 1835 he countenanced Harriet Martineau in her outspoken condemnation of slavery, and in the height of her unpopularity invited her to his house. Again, in 1844, he spoke stirringly on the anniversary of West Indian emancipation, and scourged his countrymen for tolerating negro servitude. His own plan was to buy the slaves, at a cost of $2,000,000,000, and he put faith in moral and spiritual influences to remove the evil, rather than in legislation. He never formally united with the abolition party, but he encouraged it, and his influence was great. As the contest grew warmer, he rose to the emergency and took a more active part, even making campaign speeches for John G. Palfrey, who, having missed re-election to congress on account of his anti-slavery course in that body, was nominated as free-soil candidate for governor of Massachusetts. The assault on Charles Sumner by Preston S. Brooks called forth another vigorous speech. In November, 1859, he said before the Parker fraternity that John Brown, were he to be hanged, would "make the gallows glorious, like the cross." A few days afterward he spoke at a John Brown meeting at Tremont temple, with Wendell Phillips, and took part in another at Concord, and in still a third at Salem, Mass. In January, 1861, also, he addressed the Anti-slavery society at Boston, in the face of disturbance by a mob. Though he was not a chief agitator of the cause, these efforts, so alien to his retired habits as a student, poet, and meditative writer, made him a marked advocate of freedom.

The "Atlantic Monthly" made its first appearance in November, 1857, with James Russell Lowell as the editor, and Emerson became a contributor, printing in all twenty-eight poems and prose articles in the first thirty-seven volumes. "The Romany Girl," "Days," "Brahma," "Waldeinsamkeit," "The Titmouse," "Boston Hymn," "Saadi," and "Terminus," which are among his best-known poems, belong to this period; and in the "Atlantic" in 1858 appeared his essay on Persian poetry, which is instructive as to the influence of oriental verse upon Emerson's. He continued to lecture in different parts of the country, and at the Burns festival in Boston in January, 1859, made an after-dinner speech which is described as imbued with a passion uncommon in his utterances. Its effect on the assembly was said, by a competent judge who had heard the chief orators of the time, to have surpassed anything accomplished by them, and it seems to have indicated a reserve power in Emerson seldom suspected. In 1860 and 1862 he lost by death his friend Theodore Parker and his intimate companion Thoreau, both of whom he celebrated in memorial addresses. The "Conduct of Life" was published in the former year—a series of essays on fate, power, wealth, culture, behavior, worship, considerations by the way, beauty, and illusions. With a diminished admixture of mysticism, it offered a larger proportion of practical philosophy, and stated the limitations of fate in life, while but reaffirming the liberty of the individual. Hitherto Emerson's books had sold very slowly; but of the "Conduct of Life" the whole edition, 2,500 copies, was sold in two days. This is an index of the great change that had occurred in the popular

estimate of him since the issuing of his first volume, "Nature," twenty-seven years before. He who had been feared as a revolutionist, or laughed at as erratic, was now, at the age of fifty-seven, accepted as a veritable prophet and sage. The people and the times had, in a measure, grown up to him. A new "Dial" having been established in Cincinnati about this time, he wrote for its pages. During the civil war he delivered a lecture on "American Civilization" at the Smithsonian institution in February, 1862; an address in Boston on the emancipation proclamation, September of the same year; and at Concord, 19 April, 1865, he pronounced a brief eulogy on Abraham Lincoln.

On 30 May, 1867, he attended at the organization of the Free religious association in Boston, and stated his view as to religion briefly thus: As soon as every man is apprised of the Divine presence in his mind, and sees that the law of duty corresponds with the laws of physical nature—that duty, social order, power of character, wealth of culture, perfection of taste, all draw their essence from this moral sentiment—"then we have a religion that exalts, that commands all the social and all the private action." Emerson passed many severe criticisms on his countrymen, publicly accused America of wanting in faith, hope, enthusiasm, and in a letter to Carlyle called it an intelligent but sensual, avaricious America. The war, with its heroisms and exhibitions of moral strength, gave him new courage, new belief in the national future. His Phi Beta Kappa oration of 1867 on "The Progress of Culture" expressed even more sanguine expectation than "The American Scholar," thirty years before. He received the degree of LL. D. from Harvard in 1866, and was elected to the board of overseers in 1867. He began to feel the approach of age, and in 1866 wrote the noble poem "Terminus."

"It is time to be old,
To take in sail;
. . . . .
I trim myself to the storm of time,
I man the rudder, reef the sail,
Obey the voice at eve obeyed at prime."

Nevertheless, in the following year he brought out "May-Day," a long poem, the freshest and most youthful in tone of any that he had written, accompanied by many other pieces, some of which had appeared previously. In the next three years, 1868–'70, he read at Harvard a number of lectures on "The Natural History of the Mind," which have not been collected. The essays entitled "Society and Solitude" were published in 1870. They are noticeable for an easy, almost conversational tone, differing remarkably from the earlier published essays and "English Traits." The same is true of "Letters and Social Aims" (1875). Emerson's method of composition was to jot down notes from reading and observation, which were entered in a commonplace book, with a memorandum on the margin. From this he drew the material for his lectures, which, heard from the platform, were flowing in style and clear in sequence. When he prepared them for publication, much of the incidental matter and connecting links were struck out. The latest two volumes were arranged for the press when the author, growing old, gave them a less rigorous revision, and relied upon help from others. In 1870 and 1871 he wrote introductions to a translation of Plutarch's "Morals" and W. E. Channing's poem "The Wanderer." "Parnassus," a collection of poems by British and American authors, was brought out, with a short introduction, in 1874. Emerson was nominated in the latter year for the lord-rectorship of Glasgow university by the independents, and was defeated by a vote of 500 in his favor against 700 for Benjamin Disraeli. In 1875 he made a short address at the unveiling of French's statue of "The Minute-Man" on the Concord battle-field. He responded to an invitation from two societies of the University of Virginia in 1876 by lecturing to them on "The Scholar." In March, 1878, he read a paper at the Old South church, Boston, on "The Fortune of the Republic," in which, commenting with sagacity on current tendencies in the national life, he said: "Let the passion for America cast out the passion for Europe." The same year he printed in the "North American Review" "The Sovereignty of Ethics"; in 1879 he read "The Preacher" in Divinity college, Cambridge, and an essay on "Superlatives" was published in "The Century" magazine for February, 1882, shortly before his death. Two posthumous volumes of essays and reminiscences have appeared: "Miscellanies," and "Lectures and Biographical Sketches"; and many brief poems heretofore unpublished have been included in a new edition.

In July, 1872, Emerson's house at Concord was partly destroyed by fire. This shock hastened the decline of his mental powers, which had already set in, and impaired his health. His friends spontaneously asked to be allowed to rebuild the house, and deposited in bank for him over $11,000, at the same time suggesting that he go abroad for rest and change. With his daughter Ellen he visited England and the Nile, and returned to Concord in May, 1873, to find his house rebuilt, and so perfectly restored to its former state that few could have discovered any change (see view on page 346). Welcomed by the citizens in a mass, he drove to his home, passing beneath a triumphal arch erected in his honor, amid general rejoicing.

After 1867 Emerson wrote no poems, and little prose, but revised his poetry and arranged the "Selected Poems." Always inclined to slow speech, sometimes pausing for a word, he succumbed to a gradual aphasia, which made it difficult for him to converse. He forgot the names of persons and things. He had some difficulty in discriminating printed letters, and for the last five years of his life was unable to conduct correspondence. Yet he read through all his own published works "with much interest and surprise," and tried to arrange his manuscripts, which he examined thoroughly. He also, following his custom of reading a paper annually before the Concord lyceum, gave there, in 1880, his hundredth lecture to the local audience. On that occasion the several hundred people in the hall spontaneously arose at his entrance and remained standing until he had taken his place on the platform. He took an interest in the Concord school of philosophy, organized in 1880, and supplied to its sessions an essay on "Natural Aristocracy." Most of these later productions were put together from portions of earlier compositions. Throughout this time of decline he retained the perfect courtesy and consideration for others that had always characterized him. He was apparently quite able to comprehend the essence of things around him, and, to a certain extent, ideas; but the verbal means of communication were lost. He had so long regarded language and visible objects as mere symbols, that the symbols at last melted away and eluded him. He continued to read everything in printed form that he found upon his table, whispering the words over like a child, and was fond of pointing out pictures in books. In April, 1882, he took a severe cold, and, attended by his son, Dr. Edward Waldo Emerson, died of pneumonia. He was buried in the cemetery at Concord, near the graves of Hawthorne and Thoreau, in ground over which he had often walked and talked with them and with Margaret Fuller.

Emerson was tall and slender, not of robust physique, rather sallow in the face, with an aquiline nose, brown hair, and eyes of the "strongest and brightest blue." His head was below the average in circumference, long, narrow, but more nearly equal in anterior and posterior breadth than most heads. His appearance was majestic. He was calm, kindly in expression, and frequently smiled, but seldom laughed. His manners were dignified but exquisitely simple. He was a ready listener, and often seemed to prefer listening, as if he were to be instructed rather than to instruct. He rarely showed irritation. His hospitality was almost unbounded, and he frequently waited upon the humblest of his guests with his own hands. He was never well-to-do until in his latest years. In 1838 he wrote to Carlyle that he possessed about $22,000 at interest, and could earn $800 in a winter by lecturing, but never had a dollar "to spend on a fancy." He worked hard every summer writing, and every winter travelling and lecturing. His habits were regular and his diet frugal, the only peptic luxury in which he indulged being pie at breakfast. Every morning was spent in his study, and he would go all day without food unless called to eat. His bed-time was ten o'clock, but, if engaged in literary work, he would sit up until one or two, and was able to do this night after night. He fulfilled the duties of a citizen by attending town-meetings punctiliously. Much question has been made whether Emerson was rather a poet than a philosopher, or whether he was a philosopher at all. An exact philosopher he was not; but all that he wrote and said was based upon philosophic ideas. He was an intellectual rather than an emotional mystic, an idealist who insisted upon the application of idealism to the affairs of daily life. He believed that "Nature is the incarnation of a thought. . . . The world is mind pre-

cipitated." He believed in the Over-Soul as a light guiding man, the light of intuitive perception, in God as the soul of the world, and in the human soul as one with that Over-Soul. He was not able to formulate these or other beliefs of his logically. Writing to his former colleague, Henry Ware, he said: "I could not give an account of myself if challenged. . . . I do not know what arguments are in reference to any expression of a thought. I delight in telling what I think; but if you ask me how I dare say so, or why it is so, I am the most helpless of mortal men." This continued to be his position to the end. He relied upon intuition, and thought that every one might bring himself into accord with God on that basis. He expressed what he felt at the moment, and some of his sayings, even in a single essay, seem to be mutually opposed. But, if the whole of his works be taken together, a type of thought may be discerned in the conflicting expressions, coherent and suggestive, like that presented by the photographs of several generations of a family superimposed on one plate. In the beginning he seems to have looked somewhat askance at science; but in the 1849 edition of "Nature" he prefixed some verses that said:

"And, striving to be man, the worm
Mounts through all the spires of form."

This came out ten years before Darwin's "Origin of Species," and twenty years sooner than "The Descent of Man." Lamarck's theories, however, had been popularized in 1844. But Emerson here showed how quick he was to seize upon the newest thought in science or elsewhere if it seemed to be true. Eleven years passed, and he declared in the essay on "Worship," in "Conduct of Life": "The religion which is to guide and fulfil the present and coming ages must be intellectual. The scientific mind must have a faith which is science. . . . There will be a new church founded on moral science, at first cold and naked . . . but it will have heaven and earth for its beams and rafters, science for symbol and illustration. It will fast enough gather beauty, music, picture, poetry." While he thus advanced in viewing science, he advanced also in viewing all other subjects; but it was from the point of view of intuition and oneness with what he called the Over-Soul. Everything that he said must be looked at in the light of his own remark, "Life is a train of moods." But his moods rest upon the certainty, to him, of his own intuition. Emerson's presentation of his views is generally in a large degree poetic. His poems sum up and also expand his prose. The seeming want of technical skill in his verse is frequently due to a more subtile art of natural melody which defied conventional rules of versification. The irregular lines, the flaws of metre and rhyme, remind us of the intermittent breathings of an Æolian harp. Emerson's poetic instrument may have been a rustic contrivance, but it answered to every impulse of the winds and the sighs of human feeling, from "Monadnoc" to the "Threnody" upon the death of his child-son. Sometimes he unconsciously so perfected his poetic lines that, as Dr. Holmes says, a moment after they were written they "seemed as if they had been carved on marble for a thousand years," as this in "Voluntaries":

"So nigh is grandeur to our dust,
So near is God to man,
When duty whispers low, *Thou must*,
The youth replies, *I can*."

Matthew Arnold has pronounced his essays "the most important work done in prose" in this century; but Prof. C. C. Everett, discussing the qualities of Emerson in the "Andover Review" for March, 1887, describes his philosophy as that of a poet, and adds, "so his ethics is the ethics of a poet." He regards the poems as the most complete and worthy expression of Emerson's genius. But Dr. Everett's discovery of passion in Emerson's poetry is not generally accepted by other critics. As has been well remarked by another writer, the verse, in general abstractly and intellectually beautiful, kindles to passion only when the chosen theme is distinctly American or patriotic. Emerson constantly preached by life and pen a new revelation, a new teacher of religion and morals, putting himself always in the place of a harbinger, a John crying in the wilderness. Julian Hawthorne has written of him: "He is our future living in our present, and showing the world, by anticipation, what sort of excellence we are capable of." His own life conformed perfectly to the idealism that he taught; but he regarded himself as a modest link in the chain of progress. He made his generation turn their eyes forward instead of backward. He enforced upon them courage, self-reliance, patriotism, hope. People flocked to him from all quarters, finally, for advice and guidance. The influence that he exercised not only upon persons since grown eminent, such as Prof. Tyndall, who found a life's inspiration in his thought, but also upon thousands unknown, is one of his claims to recognition. Another is that, at a time when, it is conceded, the people of the United States were largely materialistic in their aims, he came forward as the most idealistic writer of the age, and also as a plain American citizen. He was greatly indebted to preceding authors. It has been ascertained that he named in his writings 3,393 quotations from 868 individuals, mostly writers. "The inventor only knows how to quote," said Emerson; and, notwithstanding his drafts upon the treasury of the past, he is the most original writer as a poet, seer, and thinker that America possesses. The doctrine of the "many in one," which he incessantly taught, is exemplified in himself and his works. The best extant accounts of Emerson are "Ralph Waldo Emerson, his Life, Writings, and Philosophy," by George Willis Cooke (Boston, 1881); "Ralph Waldo Emerson," by Oliver Wendell Holmes (Boston, 1884); "Emerson at Home and Abroad," by Moncure D. Conway; "Biographical Sketch," by Alexander Ireland; "The Genius and Character of Emerson, Lectures at the Concord School of Philosophy," edited by F. B. Sanborn (Boston, 1885). See, also, F. B. Sanborn's "Homes and Haunts of Emerson." J. E. Cabot, of Boston, has in charge a life authorized by Emerson's family, which may include extracts from his diaries and other unpublished matter.

EMERSON, William, clergyman, b. in Concord, Mass., 6 May, 1769; d. in Boston, Mass., 12 May, 1811. He was the father of Ralph Waldo Emerson. William was graduated at Harvard in 1789, and after teaching for two years returned to Cambridge as a student of divinity. He had been there but a few months when he began preaching, and on 23 May, 1792, was ordained pastor of the Unitarian church at Harvard, Mass. In 1799 he received a call from the 1st church in Boston, and remained there until his death. Of his abilities as a pulpit orator, Mr. George Ticknor wrote in 1849: "Mr. Emerson possessed a graceful and dignified style of speaking, which was by no means without its attraction, but he lacked the fervor that could rouse the masses, and the original resources that could command the few." He was the founder and active promoter of the "Christian Monitor" society, whose publications were issued

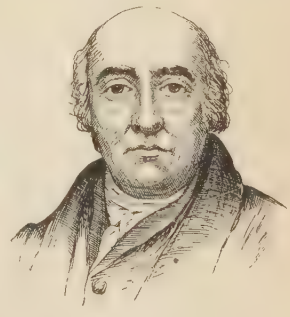
periodically for many years. In 1804 he undertook, in conjunction with several friends, a literary periodical, the precursor of "The North American Review," entitled "The Monthly Anthology and Boston Review," which was published until 1810, and enlisted some of the best talent in New England. Mr. Emerson's theological views were liberal, but he was always tolerant toward those who differed from him most widely. In addition to numerous sermons, he printed an "Oration Pronounced at Boston, 4 July, 1802"; a "Discourse before the Humane Society" (1807); and a "Selection of Psalms and Hymns" for use in churches (1808). After his death, his "History of the First Church in Boston," with two sermons appended, was issued (1812).

EMERTON, James Henry, b. in Salem, Mass., in 1847. At the age of fifteen he began the study of natural history in the museum of the Essex institute in Salem, became assistant at the museum of the Boston society of natural history in 1873–'4, took charge of the Salem museum in 1879, and in 1880 became an assistant at the Yale college museum, and also an assistant on the U. S. fish commission. He stands at the head of natural history artists in the United States, and has drawn the illustrations for many scientific works, including Packard's "Guide to the Study of Insects" and most of Prof. Verrill's later publications. Mr. Emerton is the author of "Notes and Additions to a Second Edition of Hentz's Spiders of the United States" (1875); "Structures and Habits of Spiders" (1877); and "Life on the Seashore" (1880).

EMERY, Charles Edward, civil engineer, b. in Aurora, N. Y., 29 March, 1838. He was educated at the academy in Canandaigua, N. Y., and early developed a taste for engineering. In July, 1861, he entered the U. S. navy as third assistant engineer, and served on the "Richmond" during engagements at Pensacola, the Mississippi river passes, and finally under Farragut. In December, 1862, he was promoted to second assistant engineer, and participated in the blockading of Charleston. In December, 1867, he resigned, entered the employ of the Novelty iron works in New York city, and was general superintendent of the first fair of the American institute in its permanent quarters. In 1869 he engaged in business for himself, but soon afterward became consulting engineer of the U. S. coast survey and the U. S. revenue marine, and had charge of the construction of the vessels of the former service until its engineering department was put in the hands of the navy. In connection with chief-engineer Charles H. Loring, he instituted a series of experiments to determine the relative value of compound and non-compound engines, and his results were published in scientific journals at home and abroad. In 1879 he was appointed engineer of the New York steam company, and the entire plant of that company was constructed from his designs, and is now (1887) under his direction. The details were entirely new, as the similar work that had been done previously was on a small scale. He invented for this work expansion-joints made with thin copper corrugated diaphragms supported on backing plates, and a meter for registering steam when moving at a velocity of eighty feet a second and upward, together with numerous devices for overcoming difficulties encountered in the transmission through the streets, generation in the building, and the return of the water of condensation. Mr. Emery has made several inventions in connection with steam engines, and has conducted experiments for the purpose of testing the practicability of lining steam cylinders with non-conducting materials. He is one of the non-resident professors of Cornell university, and his lectures have been published in the "Scientific American" supplements. In 1879 he received the honorary degree of Ph. D. from the University of New York. He is the author of technical papers, principally relating to steam engineering, most of which have been contributed to the "Transactions" of the American society of civil engineers, or those of the American society of mechanical engineers, of which organizations he is a member.

EMMERTON, James Arthur, genealogist, b. in Salem, Mass., 28 Aug., 1834. He was graduated at Harvard in 1855 and at the medical school in 1858, and then studied abroad for six months. He served as soldier and surgeon in the civil war in 1861–'5, was assistant at the State lunatic asylum, Utica, N. Y., in 1866–'7, and since then has practised his profession. He has contributed papers to the Essex institute historical collections, including "Gleanings from English Records," and has published "Deacon Richard Prince, of Salem, and some of His Descendants" (Salem, 1877); "Genealogical Account of Henry Silsbee" (1880); "Materials toward a Genealogy of the Emmerton Family" (1881); "Eighteenth Century Baptisms in Salem, Mass." (1886); and "Record of the 23d Massachusetts Regiment" (Boston, 1886).

EMMET, Thomas Addis, Irish patriot, b. in Cork, Ireland, 24 April, 1764; d. in New York city, 14 Nov., 1827. He was an elder brother of the famous Irish patriot, Robert Emmet, who was executed in Dublin in 1803. The father of the Emmets was an eminent physician in Dublin. Thomas was graduated at Trinity college, Dublin, and studied medicine in Edinburgh university, where he received his degree in 1784. After travelling through Italy and Germany, and returning to Dublin, he decided to adopt the legal profession, for which he had always had a fondness. He studied law in the Temple, London, for two years, and in 1791 was admitted to the Dublin bar, of which he soon became a prominent member. He early became a leader of the "United Irishmen," an association whose object was to make Ireland an independent republic, and was one of the committee whose duty it was to supervise all branches of the society through the country. Disclosures being made to the government, Emmet was apprehended by order of the privy council in 1798, confined in Kilmainham jail, Dublin, and, being promised his liberty, made a full confession, but without implicating other persons, before a committee of the Irish house of commons a few months later. Notwithstanding this, he was confined for two years and a half in Fort George, Scotland, but was liberated after the treaty of Amiens, and permitted to go to France with his wife, who had been with him in his imprisonment, both being forbidden to set foot again on Irish soil. Emmet spent the winter of 1802–'3



in Brussels, whence he saw his brother, Robert, undertake the rash enterprise that led to his death. He came to the United States in 1804, intending to go to Ohio, but, by the advice of Gov. George Clinton, remained in New York city, where he spent the rest of his life, attaining great eminence at the bar. He identified himself with the Democratic party, and became attorney-general of the state in 1812. Mr. Emmet was a hard worker, devoting more than thirteen hours a day to study and business, mingling but little in society, and resorting to mathematics for diversion. He excelled as an advocate. "His mind," says Judge Story, "was quick, vigorous, searching, and buoyant. He kindled as he spoke. His rhetoric was never florid, and his diction, though select and pure, seemed the common dress of his thoughts, as they arose, rather than any studied effort at adornment." He was seized with an apoplectic fit in the court-room, and died on the same day. He is buried in Marble cemetery in Second street, between First and Second avenues, New York city, next to the vault occupied for twenty-seven years by the remains of President Monroe, and a monument to his memory stands in St. Paul's churchyard. While in prison in Scotland, Mr. Emmet wrote sketches of Irish history, particularly of events in which he had taken part, which he afterward published in connection with Dr. William J. McNevin, under the title "Pieces of Irish History" (New York, 1807). His memoirs were written by Charles G. Haynes (London, 1829). —His son, **Robert,** lawyer, b. in Ireland about 1792; d. in New Rochelle, N. Y., 15 Feb., 1873, came to this country with his father, was admitted to the bar, attaining high rank in his profession, and became a justice of the state superior court. At the time of the contemplated Irish insurrection of 1848 he was one of the directory formed in New York for the purpose of aiding it, and made an eloquent address at a mass-meeting held on 6 June, 1848.—Another son, **John Patton,** chemist, b. in Dublin, Ireland, 8 April, 1797; d. in New York city, 13 Aug., 1842, also came to New York with his father. He left school in 1813 on account of his health, was at the U. S. military academy in 1814–'7, spent a year in Naples, and on his return studied medicine in New York for four years with Dr. William J. McNevin. He received his degree at the College of physicians and surgeons, and practised in Charleston, S. C., in 1822–'4, also giving popular lectures on chemistry there. In the latter year he accepted the chair of chemistry and natural history in the University of Virginia, where his lectures were noted for simplicity of style and beauty and novelty of illustration. Several months before his death his health, which had never been good, failed completely, and after a visit to Florida he returned to New York to die. Dr. Emmet was a good draughtsman, and did some work as a sculptor, including an excellent bust of his father. He also occasionally attempted musical composition. His chemical papers, published in "Silliman's Journal," include "Iodide of Potassium as a Test for Arsenic" (1830); "Solidification of Gypsum" (1833); a description of a new mode of producing electro-magnet currents (1833); an inquiry into the cause of such currents, in which he concludes that it is induction (1835); and one on "Formic Acid" (1837). —Another son, **Thomas Addis,** b. in Ireland in 1798; d. in Astoria, L. I., 12 Aug., 1863, also came to this country with his father, was well known as a lawyer, and for many years filled with credit the office of master in chancery.—Robert's son, **Thomas Addis,** engineer, b. in New York city, 4 June, 1818; d. in Carmel, Putnam co., N. Y., 12 Jan., 1880, entered Columbia in 1834, but left in the following year and became a civil engineer. He was engaged in the construction of various railroads, but was employed chiefly on the Erie. From 1870 till his death he was an assistant in the Croton aqueduct department, and superintended the construction of the large reservoir near Brewster's, N. Y. He was one of the twelve founders of the American society of civil engineers. —John Patton's son, **Thomas Addis,** physician, b. at the University of Virginia, 29 May, 1828, took a partial course there, and was graduated in medicine at Jefferson medical college, Philadelphia, in 1850. He began practice in New York city in 1852, and in 1862 became surgeon-in-chief to the Women's hospital, of which he had been assistant surgeon since 1855. He retained this office till 1872, and since then has been visiting surgeon. Dr. Emmet is a member of various medical associations. Since 1859 he has made a specialty of the diseases of women, and has introduced new operations and methods of treatment that are important in the history of medical science. He has contributed largely to the literature of that branch of medicine, his important papers in medical journals numbering nearly forty. His publications in book-form are "Vesico-vaginal Fistulæ" (New York, 1868); "Risse des Cervix Uteri als eine haüfige und nicht erkannte Krankheitsursache" (Berlin, 1875); "Treatment and Removal of Fibroids from the Uterus by Traction" (New York, 1875); and "Principles and Practice of Gynecology" (Philadelphia, 1879; 3d ed., revised, 1884). The last-named work has passed through three editions in London, has been translated into German (Leipsic, 1881), and is now (1887) in course of translation into French. Dr. Emmet's later papers include one on "Certain Mooted Points in Gynecology," read before the British medical association in August, 1886, and "Pelvic Inflammations," before the American gynecological society, Baltimore, in September, 1886.—Robert's grandson, **Robert Temple,** soldier, b. in New York city, 13 Dec., 1854, is the son of William J. Emmet. He was graduated at the U. S. military academy in 1877, assigned to the 9th cavalry, and served with distinction as commander of Indian scouts through the four-years campaign against the Apaches.—His twin-sister, **Rosina,** artist, was educated at Pelham Priory, Westchester co., N. Y., and studied art under William M. Chase in 1879–'80, and in Paris in 1885–'6. She received the first prize in Prang's Christmas-card competition in 1879, and a first prize medal in London in 1878, for heads on china. She has illustrated a book for children, entitled "Pretty Peggy," collecting and arranging for it the poems and music (New York, 1880), and Mrs. Burton Harrison's "Old-Fashioned Tales" (1884), and has made many illustrations for prominent periodicals. She is a member of the Society of American artists, and has exhibited many paintings, both in oil and water-colors.

EMMONS, Ebenezer, geologist, b. in Middlefield, Berkshire co., Mass., 16 May, 1799; d. in Brunswick, N. C., 1 Oct., 1863. He was graduated at Williams in 1818, and, after studying medicine and the natural sciences in various places, received his diploma from the Berkshire medical institute, Pittsfield, Mass., in 1830, and in 1833 became professor of natural history at Williams, being one of the first in the country to occupy such a chair. Here he made important contributions to the botany, geology, and mineralogy of the northern states, and prepared a report on the "Quadrupeds of Massachusetts." He was then appointed geologist-in-

chief of the second district of the geological survey of the state of New York, and while thus engaged began to doubt the truth of the received opinion that the Silurian system was the oldest stratified fossil-bearing system of rocks on the continent. After continuing his investigations for several years, he announced his belief that the rocks forming the western face of the Green mountains, extending from Canada to Georgia, the well-known Berkshire and Vermont limestones, and other stratified rocks, belonged to a system underlying and therefore older than the Silurian. This he named the "Taconic" system, from the range of hills traversing Berkshire county. This announcement was received by other geologists with skepticism, and Dr. Emmons was looked upon for years almost as a scientific impostor. But later discoveries in Canada and on the continent of Europe seemed to confirm his theory, and before his death it was received, either wholly or partially, by most American geologists. In 1838 he removed to Albany to occupy the chair of chemistry in the medical college there, but continued to lecture at Williams. In 1858 he was appointed by the North Carolina legislature to conduct the geological survey of that state, and rendered further service to science by determining the probable age of the red sandstone belt that stretches from the Connecticut valley to North Carolina. After the beginning of the civil war Dr. Emmons remained in the south, either because he was not permitted to leave, or from a desire to protect certain mining property. He published valuable reports in connection with the surveys of New York and North Carolina, a "Manual of Mineralogy and Geology" (1826), and "American Geology" (1856).

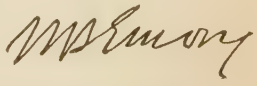
EMMONS, George Foster, naval officer, b. in Clarendon, Rutland co., Vt., 23 Aug., 1811; d. in Princeton, N. J., 2 July, 1884. He entered the navy as midshipman, 1 April, 1828, was promoted to passed midshipman in 1831, and was attached to Capt. Charles Wilkes's exploring expedition in 1838–'42. He was made lieutenant on 25 Feb., 1841, and after the loss of his vessel, the "Peacock," off Columbia river, Oregon, in July of that year, had charge of a party that explored the country south of the Columbia to the head-waters of the Sacramento, and went thence to San Francisco. He then served in various vessels, taking part in several engagements on shore in California, during the Mexican war. He became commander on 28 Jan., 1856, commanded the "Hatteras," of the western gulf squadron, in 1862, and in that year captured Cedar Keys, Fla., and Pass Christian, Miss., and about twenty prizes. He afterward commanded the "R. R. Cuyler," of the same squadron, and after being commissioned captain, 7 Feb., 1863, was fleet-captain under Admiral Dahlgren off Charleston. He commanded the "Lackawanna," and a division of from five to fifteen vessels in the Gulf of Mexico in 1864–'5, and while at New Orleans assisted in destroying the ram "Webb," and preventing the destruction of the city and shipping. In 1866–'8 he commanded the "Ossipee," carrying the U. S. commissioners to Alaska, and hoisting the American flag over that country. He was made commodore, 20 Sept., 1868, appointed senior member of the ordnance board in Washington in 1869, and given charge of the hydrographic office in 1870. He was promoted to rear-admiral, 25 Nov., 1872, and retired from active service on 23 Aug., 1873. He published "The Navy of the United States from 1775 to 1853" (Washington, 1853).—His cousin, **Halmer Hull,** lawyer, b. in Glens Falls, N. Y., in 1815; d. in Detroit, Mich., 14 May, 1877, was educated in Rutland, Vt. After assisting his father, a journalist, he studied law, and was admitted to the bar, but soon removed to Detroit, whither his father had already gone, and the two formed a law partnership about 1840. Halmer acquired distinction by defending the right of a Protestant clergyman to preach against whatever he believed injurious to the welfare of his fellow-citizens. He partially retired from practice in 1853, on account of failing health, but in 1870 was appointed U. S. circuit judge for the sixth district; including Michigan, Ohio, Kentucky, and Tennessee.

EMMONS, Nathanael, theologian, b. in East Haddam, Conn., 20 April, 1745; d. in Franklin, Mass., 23 Sept., 1840. He was graduated at Yale in 1767, and was licensed to preach in 1769, although holding doctrines that were unsatisfactory to many of his examiners. He was accustomed to call himself a "genuine Calvinist," though he excepted to the received Calvinistic doctrines in several important respects. From 1773 till his retirement from active duties in 1827 he was pastor at Franklin, Mass., and during this long pastorate prepared fifty-seven young men for the ministry. Dr. Emmons was one of the founders and the first president of the Massachusetts missionary society, and an editor of the Massachusetts "Missionary Magazine." Dartmouth gave him the degree of D. D. in 1798. He was noted for shrewd sense, mingled with oddity. Among his aphorisms is the well-known rule for clergymen: "First have something to say; then say it." Another is: "The worst books are the best; they compel us to think." Dr. Emmons was a zealous patriot during the Revolution, and afterward an ardent Federalist. On "fast-day," in 1801, he delivered a sermon on Jereboam, picturing Thomas Jefferson in the guise of that king, so that the portrait was easily recognized. He published about two hundred sermons, besides essays and dissertations. His collected works were published by his son-in-law, Dr. Jacob Ide, with a memoir (6 vols., Boston, 1842). See also "Memoir of Nathanael Emmons," by Edwards A. Park, D. D. (Andover, 1861).

EMMONS, Samuel Franklin, geologist, b. in Boston, Mass., 29 March, 1841. He was graduated at Harvard in 1861, and then studied at the École des mines, Paris, during 1862–'4, and at the Freiberg (Saxony) mining-school during 1864–'5. In May, 1867, he was appointed assistant geologist under Clarence King on the U. S. geological exploration of the fortieth parallel, and in July, 1879, became geologist in charge of the Colorado division of the U. S. geological survey. He has travelled extensively throughout the United States in connection with his work, and in 1870 made a survey of Mount Rainbow, the highest and most inaccessible peak in Washington territory. During the autumn of 1872, with Clarence King, he discovered the locality of the supposed diamond-fields in Arizona, and was active in exposing their fraudulent character. He is a member of scientific societies, and an occasional contributor of papers to their transactions. His larger publications are: "Descriptive Geology," in vol. ii. of the "Reports of the Exploration of the Fortieth Parallel" (Washington, 1877); "Statistics and Technology of the Precious Metals," written in conjunction with George F. Becker (1885); and "Geology and Mining Industries of Leadville, Colorado" (1886).

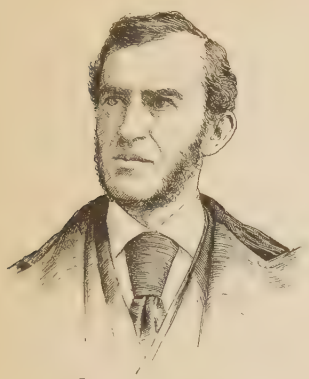
EMORY, John, M. E. bishop, b. in Queen Anne county, Md., 11 April, 1789; d. in Reisterstown, Md., 17 Dec., 1835. He was educated under tutors at Easton and Lancaster, Pa., and in Washington

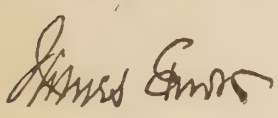
college, Md. He began to study law in 1805, and was admitted to the bar in 1808, but his attention was turned to the pulpit, and he entered the ministry of the Methodist Episcopal church in 1810. He became well known, and his services were much in demand throughout the middle states. He was chosen to the general conference of 1816, and to each succeeding conference with a single exception till 1832, when he was elected and ordained bishop. He was sent as a delegate to the British Wesleyan conference in 1820, and in 1824 was appointed book agent and editor for his denomination at New York. His episcopal appointment did not take him away from the book concern, and during his management he was successful in paying all its debts and putting it on a solid and satisfactory foundation. He was active in promoting the improvement of the literature of his church. The "Methodist Quarterly Review" was founded by him, and nearly all the original articles in the first two volumes are from his pen. His services and experience were made available in the founding of the University of New York and Wesleyan university, and he was one of the principal organizers of Dickinson college. In his day he was an able debater, and in 1817, in a pamphlet controversy, he used literary weapons, not unsuccessfully, with Bishop White, of Pennsylvania. In the controversy of 1828 he was the chief defender of the existing church government. He was of a logical turn of mind, and had command of a pure, clear, and vigorous style. After his election to the episcopacy he was largely influential in giving to the church code known as the Methodist discipline its present form. He met his death by being thrown from his carriage. He left several works, including "The Divinity of Christ Vindicated," and "Defence of Our Fathers," in which he upholds Wesley's policy.—His son, **Robert,** educator, b. in Philadelphia, 29 July, 1814; d. in Baltimore, Md., 18 May, 1848, was graduated at Columbia in 1831, and studied law. He was appointed professor of ancient languages in Dickinson college in 1834, but resigned in 1839, and entered the Baltimore annual conference of the Methodist Episcopal church. In 1842 he was recalled to Dickinson college and made president *pro tempore*, and after the death of Dr. Durbin was elected president, holding the office for the rest of his life. Columbia gave him the degree of D. D. in 1846. He published a "Life of Bishop Emory," with a collection of his writings (New York, 1841), and "History of the Discipline of the Methodist Episcopal Church" (1843); and left behind him an unfinished "Analysis of Butler's Analogy," which was afterward completed and published by Dr. Crooks (1850).—Bishop Emory's first cousin, **William Hemsley,** soldier, b. in Queen Anne county, Md., 9 Sept., 1811, was graduated at the U. S. military academy in 1831, and appointed lieutenant of artillery and mounted rangers. He was stationed chiefly at sea-ports in 1831–'6, and was in Charleston harbor during the nullification trouble in South Carolina. He was in the Creek nation in 1836–'8, was appointed 1st lieutenant of topographical engineers in the latter year, and employed successively on the improvements of Delaware river, and on the northeast boundary survey. He went with Gen. Stephen W. Kearny to California in 1846, and was on his staff during the Mexican war, when he was successively made captain and brevet-major. He was on the Mexican and Californian border in 1848–'53, and in those years was commissioner and astronomer to run the boundary between Mexico and the United States, especially under the Gadsden treaty of 1853. He was in Kansas in 1854, in Utah in 1858, and remained on border duty till 9 May, 1861, when he resigned. He was reappointed as lieutenant-colonel of the 6th cavalry on 14 May, and he took part in the peninsular campaign, being engaged at Yorktown, Williamsburg, and Hanover Court-House. He was made brigadier-general of volunteers, 17 March, 1862, commanded a division under Banks in Louisiana in 1863, and, having been raised to the command of the 19th corps, was with the same commander in 1864 in the Red river expedition, in which he displayed unwonted bravery and skill, winning distinction especially at Sabine Cross-Roads, at Pleasant Hill, and at Cane River. Later in the same year, at the head of the 19th corps, he offered a splendid and successful resistance to Early in the Shenandoah valley, especially at Opequan Creek, 19 Sept., at Fisher's Hill, 22 Sept., and at Cedar Creek in October. He received the successive brevets of major-general of volunteers, 23 July, 1864, and brigadier-general and major-general in the regular army, 13 March, 1865, and on 25 Sept., 1865, was commissioned full major-general of volunteers. After the war he was successively in command of the Department of West Virginia in 1865–'6, of the Department of Washington in 1869–'71, and of the Department of the Gulf in 1871–'5. He retired in 1876 with the rank of brigadier-general. Gen. Emory has published "Notes of a Military Reconnoissance in Missouri and California" (New York, 1848); and "Report of the United States and Mexican Boundary Commission" (Washington).—His son, **William Hemsley,** naval officer, was graduated at the U. S. naval academy in 1866, became master in 1869, and lieutenant in 1870, and in 1884 commanded the "Bear," of the Greely relief expedition.



EMOTT, James, jurist, b. in Poughkeepsie, N. Y., 14 March, 1771; d. there, 7 April, 1850. He did not receive a collegiate education, but the degree of A. M. was conferred on him by Union in 1800. He studied law, began to practise at Ballston Centre, and soon became a distinguished member of the bar. He was a commissioner to settle disputes concerning titles to lands in the military tract of Onondaga county in 1797, and about 1800 removed to Albany, which he represented in the legislature of 1804. He was a leader of the Federalist party in congress from 1809 till 1813; a member of the New York assembly from 1814 till 1817, and its speaker in 1814; first judge of the court of common pleas of Dutchess county from 1817 till 1823, and judge of the second judicial circuit court from 1827 till his resignation, about 1831. He received the degree of LL. D. from Columbia in 1833.—His son, **James,** jurist, b. in Poughkeepsie, N. Y., 23 April, 1823; d. there, 11 Sept., 1884, received his early education in Poughkeepsie, and in 1838 was graduated at the head of his class at Columbia. He then studied law in Poughkeepsie, was admitted to the bar there, and at once began active practice in his native place,

soon taking a prominent position in the profession. When Poughkeepsie received its charter, he was elected its first mayor, holding the office from April, 1854, to January, 1855, when he resigned to accept the office of justice of the New York supreme court for the second judicial district. He was appointed presiding judge of his district in 1862, and judge of the court of appeals in 1863, when his term closed. He then resumed the practice of law in Poughkeepsie, but removed to New York city in 1870. He was a vice-president of the Union League club and a warm supporter of the Union cause during the civil war, having taken a prominent part in organizing the first regiment sent from Dutchess county. He was one of the founders of the New York bar association, and a member of the committee of seventy, so largely instrumental in the overthrow of the Tweed ring in 1870. From 1862 till his death he was president of the Merchant's bank of Poughkeepsie. Judge Emott was considered by his associates a man of wide reading and large culture, thorough professional training, sound judgment, and masterly clearness in the exposition of the law. He was a member of the Protestant Episcopal church.





EMPÁRAN, Diego de (em-par'-an), Mexican author, b. in Puebla, Mexico, 5 April, 1718; d. in Ravenna, Italy, after 1807. He came of a noble and rich family, studied in the seminary of his native city, and in 1733 was sent to Rome to complete his education in the Jesuit college of the Trinity. He received consecration as priest in 1745, and soon published his first work, "Los Jesuitas y el Pápa" (1746), which appeared at the same time in Latin, Spanish, and Italian, and was soon translated into English and French. In this work he attacked Louis XIV., and, on the demand of the French government for his punishment, he was confined in the ecclesiastical prison, where he remained for nearly five years. After his release he published "La orden de los templarios y la de los jesuitas bajo el punto de vista histórico; Santiago de Molay é Ignacio de Loyola" (Bologna, 1751), which attracted a censure from the holy office, and a suspension for a year of his functions as priest. But Emparan was not to be subdued, and soon issued "Los apostoles de sayal y los apostoles de túnica," containing a panegyric of the company of Jesus and a bitter critic of the princes of the church and their vices (1752). This time he had gone too far, and the clamors of the church dignitaries were so powerful that the pope deposed him from the priesthood and condemned him to perpetual imprisonment in the fortress of San Angelo. His work was publicly burnt by the executioner, but one copy was saved, and exists to-day in the National academy of Mexico. Emparan finally received pardon through the intercession of his mother, and remained for some years in obscurity, but, unable to remain silent for a long time, published the most noteworthy of all his books, "Pitágoras, Empedócles y Zenón" (1760). This book also attracted the censure of the holy office, was put on the "Index expurgatorius," and its author interdicted; but he, foreseeing his fate, had escaped to France and hid in Paris for several months, nearly reduced to absolute poverty. In 1761 another book, "Le Diable, les femmes, et Saint Bernard," caused him to be arrested and imprisoned in the Bastile. In 1762, thanks to the influence of Voltaire, he was set at liberty, and acquainted with the principal philosophers and encyclopædists of the 18th century living at the court. He soon became one of the leaders of the philosophy of that age, and for several years, together with Condorcet, was a contributor to different scientific reviews under the pen-name of "Zoroaster." He received a rich inheritance from his parents in 1790, and, after several years of foreign travel, settled in England in 1793. He removed again to Paris in 1795, and in 1806 made a voyage to Mexico, but Iturrigaray, at that time viceroy, considering Emparan's presence in New Spain dangerous for the public order, expelled him, without consideration for his advanced age and infirmities. He then returned to Europe, and went to Bologna, and afterward to Ravenna, where he died. Emparan was an accomplished linguist, speaking and writing correctly Greek, Latin, Spanish, French, Italian, and English. His other works include "The Tombs of Mohammed and Christ"; "Voltaire and his School"; "Science and Superstition"; and "Religion and Hygiene" (London, 1794–'5); and "La Virgen India," predicting the independence of Mexico (Bologna, 1807).

ENAMBUC, Pierre Vaudrosques Diel d', founder of French colonies in the West Indies, b. about 1586; d. in 1636. He belonged to a Norman family, and became a captain in the French navy, but, wishing to better his fortune, he fitted out a small armed brig, and with about forty sailors sailed from Dieppe in the spring of 1625 for the West Indies. When opposite the Cayman islands he met and vanquished a Spanish ship of thirty-five guns, but was obliged to put into St. Christopher for repairs. Here he found some French settlers, and, after deciding to remain with them, was elected their chief. He subsequently defeated an attempt of the Indians to massacre all Europeans on the island, and, eight months after his arrival in St. Christopher, sailed for Europe, taking with him tobacco and mahogany. Cardinal Richelieu authorized D'Enambuc to found French colonies in all the Antilles from 11° to 18° north latitude, appointing him governor-general and lieutenant of the king. On 14 Feb., 1627, D'Enambuc and his second, Durossey, sailed again for the West Indies, taking with them 600 colonists. D'Enambuc and his followers met with many reverses, through sickness and the attacks of the English, and Durossey was sent to France for assistance. He brought back to St. Christopher six royal ships and six transports, so that the English were defeated, but soon afterward the Spaniards landed in the island and destroyed the French possessions. Just then Durossey proposed to D'Enambuc to abandon St. Christopher, and to found a new colony at Antigua, and, although the latter was opposed to this venture, they sailed away, arriving at St. Martin after a voyage of three weeks. There Durossey left the expedition and sailed for France, where he was imprisoned in the Bastile for abandoning his chief. After a short sojourn at Antigua, D'Enambuc re-

turned to St. Christopher, where he took possession of the land he had abandoned three months before. The colony soon flourished, and D'Enambuc prepared to colonize the neighboring islands. He sent his lieutenants to Guadeloupe, and set out in 1635 for Martinique, where he built Fort Saint Pierre. The colonies thrived, and D'Enambuc was about to found others when he died.

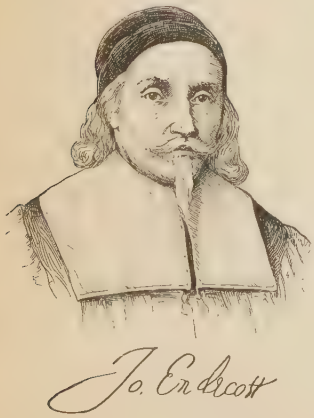
ENCALADA, Manuel Blanco (en-cah-lah'-da), South American soldier, b. in Buenos Ayres, 21 April, 1790; d. in Santiago, Chili, 5 Sept., 1876. He was the son of Blanco Ciceron, a Spaniard, who for some time acted as judge of the supreme courts in Peru, La Plata, and Bolivia. Blanco Encalada was sent to Spain in 1803, entered the "Seminario de Nobles" at Madrid, and from there went to the naval academy of the island of Leon. In 1807, when the French blockaded the port of Cadiz, Encalada distinguished himself as second gunner on board the "Carmen." Wishing to return to America, he was sent in 1808, through the influence of his uncle, the Count of Villa Palma, to the port of El Callao as an ensign, which rank he had obtained as a reward for his conduct at Cadiz. In 1811 he began to show revolutionary ideas, and was sent to Spain by the Viceroy Abascal, but returned to Montevideo at the end of two years. Soon afterward he left his post, and, after flying to the woods and overcoming great dangers, swam across the Uruguay river and rode 240 miles to Buenos Ayres, whence in 1813 he started for Chili, arriving there in March, at the same time of the landing of Pareja in Talcahuana. Encalada was appointed captain of artillery, and in March, 1814, had been promoted lieutenant-colonel for his services to his party. About that date he was taken prisoner by the royalists, degraded as a deserter from Montevideo, and confined to a garrison, whence, in March, 1817, he was liberated by the revolutionary forces of Chacabuco. In July, Encalada entered the Chilian army as sergeant-major of artillery, and on 19 March, 1818, at the attack of Cancha Rayada, which was so disastrous for the liberal forces, he had under his charge twelve pieces of artillery. He was promoted to lieutenant-colonel, and in the following June was given command of the naval force that captured, in the month of December, five ships belonging to the Spanish expedition against Chili. Soon afterward he was made rear-admiral, and appointed second to Lord Cochrane, who had begun his Pacific campaign. In 1820 Encalada was appointed major-general of infantry. In August, 1821, after having been a senator, he was tried for bringing charges against the government, but was absolved by O'Higgins. In January, 1822, Encalada served under Bolivar in the expeditions of Guayaquil and El Callao, greatly contributing toward the victory of Ayacucho in December, 1824. In July, 1825, he was appointed general-in-chief of the army of Chili. In July, 1826, Encalada became president of the republic of Chili, but tendered his resignation two months afterward, and up to the civil war of 1827–'30 took no active part in public affairs. He was in the Chilian expedition against Peru in 1838, after which he again disappeared from public life for ten years, visiting Europe in 1844–'6. In 1847 he was appointed governor of Valparaiso, and contributed greatly to the progress of that city, laying in 1852 the first rail of the railroad between it and Santiago. He was appointed Chilian minister to France in 1853, but returned in 1858, and retired again to private life. In 1865, notwithstanding his age, he protested against the so-called war with Spain. To commemorate his services for his adopted country, the Chilian government had in 1875 a powerful iron-clad of 3,560 tons named "Blanco Encalada," which, together with her sister ship "Almirante Cochrane," took a conspicuous part in the war against Peru and Bolivia in 1879 and 1880.

ENCISO, Martin Fernández de, Spanish cosmographer, b. in Seville about the middle of the 15th century; d. in the same city about 1525. It is not known in what year or in what capacity he went to America, but he had established himself in 1508 in the island of Santo Domingo, where he made a fortune as a lawyer, and had the title of "bachiller y letrado." The government of that part of America along the isthmus of Darien and east of the gulf of Uraba had just been granted to Ojeda, but, to get possession of the lands which were granted and to colonize them, money was needed, and he addressed Enciso, who had then the reputation of being rich and adventurous. A bargain was soon made between them; Ojeda gave Enciso the title of alcalde mayor of his government, and the latter agreed to furnish a ship with provisions and men. After a visit to the gulf of Uraba, where he found his companions a prey to famine, Ojeda determined to return to Santo Domingo and hasten the arrival of the succors promised by Enciso, leaving Francisco Pizarro in the new colony. Nearly two months had passed, when Enciso appeared at last in the harbor of Carthagena with a ship loaded with provisions, and having on board twelve mares, several stallions, sows and boars, ammunition, spears, swords, and other arms, and over 150 men. At Carthagena he was joined by a ship, under the orders of Pizarro, which had left Uraba some fifty days after the departure of Ojeda and was carrying to Santo Domingo the few colonists who had survived the famine. After many adventures from shipwreck and with hostile savages the party reached Darien (1510), and set about building a city, when Enciso excited a mutiny by forbidding them to trade with the Indians for gold under pain of death, and was finally deposed by Vasco Nuñez de Balboa (see BALBOA). Enciso sailed for Spain (1512), brought the arbitrary conduct of Balboa before the court, and Pedrarias Davila was sent out as governor of Darien (1514), with instructions to do justice between the contestants. Enciso accompanied him as alguacil mayor, and after his arrival obtained a decree condemning Balboa to pay him a large sum as an indemnity for the wrongs he had suffered. In 1515 he was sent at the head of an expedition into the province of Cenu, where it was reported there was much gold, and unsuccessfully tried first to persuade and then to force the caciques to submit to the king of Spain. Shortly after this event he returned to Spain and devoted his time to the arrangement and publication of the materials which he had gathered during his stay in the New World. He published a memoir in favor of the commanderies established and about to be established in the West Indies, which met with much opposition from the Franciscans, and "Suma de geografía que trata de todos las partidas y provincias del mundo; en especial de las Indias y trata largamente del arte de marear" (Seville, 1519; new editions, 1530 and 1549). "Enciso," says Navarrete, "has embraced in this work all that was then known of the theory and practice of pilotage." He gives a dissertation on the sphere according to the Ptolemaic system, with tables of declination, the method of taking the height of the polar star and its use, and the construction of the mariner's compass with thirty-two rhumb-lines. Enciso was not ignorant of the inaccuracies that resulted from

these projections, and of the difficulty of representing a spherical figure on a plane surface, though he could not find the means of correction. The geographical portion of the work is written with great exactness, and contains the first description of the result of Spanish exploration up to 1519. He fixed the latitudes of the islands discovered, and of several points on the main-land. Cape Higuey, in Santo Domingo, is marked 20°, and Cape Cruz 23°, and those positions, although incorrect, are less so than those found in Ruysch, Peter Martyr de Anghierra, and others.

ENDICOTT, Charles Moses, author, b. in Danvers, Mass., in 1793; d. in Northampton, Mass., in 1863. He was a descendant in the eighth generation of Gov. John Endicott. His education was received mainly at the Phillips Andover academy and at a school in Salem, Mass. At the age of fifteen he entered the counting-room of his uncle, Samuel Endicott, of Salem, where he remained two or three years, and whence he went by invitation to the counting-room of William Ropes, of Boston. Influenced by a desire to see somewhat of the outside world, he went as supercargo to St. Petersburg, Russia, in 1812, and afterward made a voyage to the east in the same capacity, visiting Calcutta and Sumatra, and returning to Salem in 1818. After this he became captain of a merchantman, and traded for many years, being engaged extensively in the importation of pepper. Later, from 1835 till 1858, he was cashier of the Salem bank, Salem, Mass. He was a frequent contributor to the "New England Historical and Genealogical Register," and to the Boston "Gazette," under the pen-name of "Junius Americanus." Some of his papers are to be found in the "Collections of the Salem Institute." He wrote a "Life of John Endicott" (privately printed, 1847); "The Persian Poet: a Tragedy"; "Essay on the Rights and Duties of Nations"; and "Three Orations."

ENDICOTT, John, colonial governor of Massachusetts, b. in Dorchester, England, in 1558; d. in Boston, Mass., 15 March, 1665. He was one of the six patentees of the Dorchester company, which succeeded, by purchase in 1627, to the property and all the rights and privileges that had formerly belonged to the Plymouth company. Among those who, almost immediately after the purchase, secured proprietary rights in the company, and who became respectively governor and deputy-governor of the company in London, were Matthew Cradock and Roger Ludlow. Being related to both of these by marriage, Endicott was sent out with full powers to take charge of the plantation at Naumkeag (afterward Salem), where he arrived in September, 1628, accompanied by his family and numerous colonists. He continued to exercise the chief authority till April, 1630, when, the charter and company having been transferred to New England, John Winthrop arrived and took charge. In 1634, when member of the court of assistants, inflamed, it is said, by the fiery eloquence of Roger Williams, he publicly cut out the red cross of St. George from the king's colors, which hung before the governor's gate, for the reason, as he said, that the cross savored of popery. Endicott was reprimanded, removed from his office, and disqualified to hold any other for the space of one year. It was not long before it became manifest that he was not without sympathizers. Some of the militia refused to march under a flag that displayed what they regarded as an idolatrous figure; and, after no little controversy, the military commissioners agreed that, while the cross should be retained on banners of forts and ships, it should be omitted from the colors of the militia. In 1636, Endicott, in conjunction with Capt. John Underhill, conducted a sanguinary but ineffectual expedition against the Block Island and Pequot Indians. His harsh measures on this occasion were instrumental in bringing on the Pequot war. He was deputy-governor in 1641–'4, in 1650, and in 1654, and governor in 1644, 1649, and from 1650 till 1665, with the exception of 1654. In addition to these honors, he was made in 1645 sergeant major-general, the highest military office in the colony, and in 1685 president of the colonial commissioners. Endicott was a fair specimen of the men who made New England. It was characteristic of the man that, to meet the monetary requirements of the time, he established a mint which, contrary to law, continued to coin money for a period of thirty years. With all his many excellences, however, he had his faults. Of strong convictions, and of great decision of character, he was impatient of any resistance to his authority, and hasty of temper. On one occasion, in the early part of his career, he so far forgot himself as to strike a man, for which offence he was fined forty shillings. He was a Puritan of the Puritans, and would allow no divergence from what he conceived to be the straight line of orthodoxy. He had as little respect for episcopacy as he had for popery, as some of the prelatic clergy found to their cost. His hand fell heavily upon the unfortunate Quakers, of whom, under his administration, four were executed at Boston for so-called disobedience of the laws. But he aimed for good, and he sought, as he best knew how, to secure the highest welfare of the colony. He had been sent out, in the first instance, because he was believed to be a "fit instrument to begin the wilderness work." "A man of dauntless courage," says Bancroft, "and that cheerfulness which accompanies courage; benevolent, though austere; firm, though choleric; of a rugged nature, which his stern principles of non-conformity had not served to mellow."



ENDICOTT, William Crowninshield, secretary of war, b. in Salem, Mass., 19 Nov., 1827. He is a direct descendant of Gov. John Endicott, and is a grandson of Jacob Crowninshield, noticed elsewhere. He was graduated at Harvard in 1847, and, after studying in the law-school and with Nathanael J. Lord, was admitted to the bar in 1850. He was elected a member of the Salem common council in 1852, and five years later became city solicitor. He retired from this office in 1864, and resumed practice, but in 1873 he was appointed by Gov. William B. Washburn to the bench of the supreme court of Massachusetts. This office he held for ten years, when he resigned on account of ill health. He was originally a Whig, but joined the Democrats when the Whig party was broken up, and in November, 1884, was the unsuccessful candidate for governor of Massachusetts. In 1885 he became secretary of war.

ENDRESS, Christian, clergyman, b. in Philadelphia, Pa., 12 March, 1775; d. in Lancaster, Pa., 30 Sept., 1827. He was graduated at the University of Pennsylvania in 1790, and began to study theology. He was tutor in the university from 1792 till 1795, when he was elected principal of the Congregational school of Zion and St. Michael. He resigned in 1801, accepted a pastorate at Easton, Pa., was ordained at Reading in 1802, and afterward held pastorates at various places in Pennsylvania. On the death of Henry E. Michlenberg in 1815, he was chosen to succeed him as pastor of the Lutheran congregation in Lancaster. Here he conducted services in English, and in consequence the Germans withdrew from his congregation. The University of Pennsylvania gave him the degree of D. D. in 1819. Dr. Endress was a contributor to the "Lutheran Intelligencer," and after his death several of his sermons were published in the "Lutheran Preacher." He published, in the German language, "The Kingdom of Christ not Susceptible of Union with Temporal Monarchy and Aristocracy" (1791), and left in manuscript a "Commentary on the Epistle to the Romans."

ENGELHARD, Joseph Adolphus, soldier, b. in Monticello, Miss., 27 Sept., 1832; d. in Raleigh, N. C., 17 Feb., 1879. After attending schools in Mississippi and New Albany, Ind., he was graduated at the University of North Carolina in 1854. He studied law at Harvard, and subsequently at Chapel Hill, and was licensed to practise in the county courts in 1856. He then removed to Tarboro, where he remained until the beginning of the war. He entered the Confederate army as captain and quartermaster of the 33d regiment in May, 1861, and in April, 1862, was promoted to be major and quartermaster of Branch's brigade. In December of that year he was transferred to Gen. Pender's brigade as its adjutant-general, and served in this capacity till Lee's surrender. He became the editor of the Wilmington "Journal" in 1865, and was afterward elected secretary of state, which office he held till his death.

ENGELHARDT, Francis Ernest, chemist, b. in Gieboldehausen, Hanover, 23 June, 1835. He was educated at the gymnasium in Duderstadt and Hildesheim, and in the University of Göttingen. In 1856 he became assistant to Prof. Frederick Wöhler in the chemical laboratories in Göttingen, where he remained until he came to the United States in 1857. He was assistant in chemistry to Prof. William S. Clark at Amherst in 1857–'8, and to Prof. Charles A. Joy at Columbia in 1860. From 1861 till 1866 he was professor of chemistry in the College of St. Francis Xavier in New York city, and from 1869 till 1886 chemist to the Onondaga salt reservation and the salt companies of Onondaga. In 1886 he became chemist to the Genesee salt company, and is one of the experts for the State board of health, having special charge of the examination of all wines, beers, and liquors. In 1864 he received the degree of Ph. D. from St. Francis Xavier. His contributions to chemical literature have been large, but are mostly in the form of technical reports bearing on his special work.

ENGELMANN, George, botanist, b. in Frankfort-on-the-Main, Germany, 2 Feb., 1809; d. in St. Louis, Mo., 11 Feb., 1884. His uncle, Friedrich Theodor, a German pioneer of Illinois, was one of the early American viticulturists. He received his early education at the gymnasium in Frankfort, and studied the sciences in the University of Heidelberg, where he met Karl Schimper and Alexander Braun. Later he was connected with the University of Berlin, and received in 1831 the degree of M. D. from the University of Wurzburg. In 1832 he went to Paris, where he again became associated with Braun, and also with Louis Agassiz. Meanwhile he was induced to come to the United States, and in September, 1832, sailed from Bremen for Baltimore. He settled in St. Clair county, near Belleville, Ill., but three years later removed to St. Louis, where he soon became prominent as a physician. In 1836 he founded a German newspaper called "Das Westland," which contained valuable articles on life and manners in the United States, and gained a high reputation both here and in Europe. Dr. Engelmann made a specialty of botany, and obtained a wide recognition for his services in that branch of natural history. He made special studies of the cacti, dodders, pines, rushes, spurges, and other little-known and difficult groups, contributing numerous articles on them to the St. Louis academy of sciences, to the American academy of arts and sciences, and to government reports. His opinion became so valuable that much of the material in his specialties collected by the National government was sent to him for examination. He was one of the earliest to study the North American vines, and nearly all that is known scientifically of the American species and forms is due to his investigations. His first monograph on "The Grape-Vines of Missouri" was published in 1860, and his latest on this subject shortly before his death. A monotypical genus of plants bears his name, and a splendid species of spruce from the Rocky mountains is called *Engelmann*. He was a member of scientific societies both in the United States and in Europe, and was one of the original members of the National academy of sciences. A list of his botanical papers, containing about 100 titles, is published in Coulter's "Botanical Gazette" for May, 1884, and his writings are now (1887) being collected under the direction of Prof. Asa Gray for publication by Henry Shaw of St. Louis. Dr. Engelmann's botanical collection, valuable as containing the original specimens from which many or most of our western plants have been named and described, will be given to Shaw's botanical garden as soon as a fireproof building can be erected. This gift has led to the founding of the Shaw school of botany as a department of Washington university, St. Louis, where an Engelmann professorship of botany has been established by Mr. Shaw in his honor.—His son, **George Julius,** physician, b. in St. Louis, Mo., 2 July, 1847, was graduated with the valedictory at Washington university in 1867, then studied at the universities of Tübingen, Vienna, Paris, and received his medical degree at Berlin in 1871. During the Franco-Prussian war of 1870–'1 he served as assistant surgeon in the German army, and subsequently returned to St. Louis, where he settled in the practice of medicine. In 1883 he turned his attention to gynecology, and has since occupied himself exclusively in efforts to introduce more rational, effective, and safe methods of prac-

tice in diseases of women. Toward this end he founded the St. Louis school of midwives, the St. Louis lying-in hospital, and the St. Louis polyclinic and post-graduate school of medicine, holding the chair of gynecology and obstetrics in the latter institution. He is a member of medical and scientific societies, was one of the founders of the American gynecological society, being its vice-president in 1886, of the St. Louis obstetric and gynecological society, of which he was vice-president in 1887, and also of the St. Louis medico-chirurgical society. Dr. Engelmann has been active in archæology, having opened mounds and collected specimens in southern Missouri. He has a valuable museum of the material which he has gathered, and has exchanged specimens with museums in Berlin and Vienna, and with the Peabody in Cambridge, Mass., the Natural history in New York, and the National museum in Washington, D. C. Dr. Engelmann is the author of numerous papers contributed to medical journals in his specialty, some of which have been translated into French and German.

ENGLAND, John, R. C. bishop, b. in Cork, Ireland, 23 Sept., 1786; d. in Charleston, S. C., 11 April, 1842. He was educated in the schools of Cork, and studied law for two years, but in 1803 entered the theological college of Carlow. Here his progress in his studies was so brilliant that after his second year he was selected to deliver public lectures on religious subjects. He also devoted much of the time given him for recreation to the instruction of the militia stationed in the town. He also founded an asylum for unprotected females which afterward suggested the plan of the Presentation convent, and established free schools for the education of poor boys. In 1808 he was recalled by his bishop and appointed president of the theological seminary at Cork. He took a leading part in the agitation for Catholic emancipation, and, with the view of helping the cause of religious liberty, founded the "Chronicle," which he continued to edit till his departure from Ireland. When the see of Charleston, embracing the states of North Carolina, South Carolina, and Georgia, was founded, Dr. England was nominated its first bishop. As he had determined to become an American citizen, he refused to take the oath of allegiance exacted from Irish bishops on their consecration. After some difficulty he was consecrated in Cork in 1820, and arrived in Charleston the same year. Bishop England had many obstacles to contend with. There were only two priests and two churches in the three states under his jurisdiction, and his flock was made up chiefly of poor Irish emigrants and refugees from Santo Domingo. In order to provide priests for his diocese he opened a classical school in Charleston, and the success that attended his efforts in this respect enabled him to support several of his ecclesiastical students. Not only did he succeed in training a body of educated missionaries for his church, but he largely contributed to the revival of classical learning in South Carolina. Several schools were reopened, and the College of Charleston, which had suspended for some time, resumed its studies. He infused new life into the Philosophical literary association of Charleston as soon as he became a member, and did much to suppress duelling, not by intemperate denunciations, but by forming the most influential gentlemen of the state into an anti-duelling association. His address in reprobation of the practice before this body is considered a masterpiece of argument and persuasion. He was invited by congress to preach in the hall of representatives at Washington, and was the first Catholic clergyman on whom this honor was conferred. To explain and defend the doctrines of his church he established the "United States Catholic Miscellany" at Charleston. It was through the columns of this periodical that most of Bishop England's writings found their way to the public. His influence was felt in every part of the Catholic church in this country, and his influence at Rome was decisive in all ecclesiastical affairs connected with the United States. His courses of lectures, which he delivered in all the great cities of the Union, were attended by citizens of every creed. Nothing, however, endeared him to the people of Charleston so much as his heroism during the frequent visitations of the yellow fever, when he continued at his post night and day. In 1834 he visited Ireland and obtained the services of three nuns of the Ursuline order, by whose aid he established the Ursuline schools of Charleston. He also founded orphan asylums, boarding-schools, and free schools, which he placed under the charge of Sisters of Our Lady of Mercy. He conceived the plan of assembling the prelates in council for mutual aid, and has been styled "the author of our provincial councils." He visited Europe four times in the interests of his diocese, was sent twice as apostolic delegate from the pope to Hayti, and was offered an Irish bishopric, which he declined. On his return from Europe in 1841 malignant dysentery broke out among the steerage passengers, and his attendance on them was incessant until he was attacked by the disease himself. He finally died from its effects, which were heightened by overwork, immediately after landing. Dr. England increased the number of churches in his diocese to seventeen, and left a numerous and well-organized clergy behind him. His principal works are "Discourse before the Hibernian Society of Savannah" (Charleston, 1824); "Explanation of the Construction, Furniture, and Ornaments of a Church" (Baltimore); "Letters on Slavery"; and "Works," edited by Bishop Reynolds (5 vols., Baltimore, 1849).

ENGLAND, Sir **Richard,** British soldier, b. about 1750; d. 7 Nov., 1812. He was a resident of Clifford, County Clare, Ireland, served with distinction in the American campaigns from 1775 till 1781, and was at one time commandant of Detroit. He was efficient in aiding the colonization of the extreme western portion of Upper Canada.—His son, Sir **Richard,** b. in Detroit, Mich., in 1793; d. 19 Jan., 1883, joined the British army, and in recognition of his services in the Crimean war was made a lieutenant-general in 1855.

ENGLE, Frederick, naval officer, b. in Delaware county, Pa., in 1799; d. in Philadelphia, 12 Feb., 1868. He entered the navy as a midshipman on 30 Nov., 1814, and became lieutenant on 13 Jan., 1825. During the Mexican war he commanded the "Princeton" and served in the blockading squadron. He was promoted to captain in 1855, and at the beginning of the civil war was sent to China to bring home the "Hartford." He was then assigned to the command of the Philadelphia navy-yard, and subsequently became governor of the naval asylum in that city. He was promoted to be rear-admiral on the retired list, 25 July, 1866.

ENGLES, William Morrison, author, b. in Philadelphia, Pa., 12 Oct., 1797; d. 27 Nov., 1867. He was graduated at the University of Pennsylvania in 1815, and studied theology with Dr. Samuel B. Wylie, receiving his licence to preach in 1818. After spending some time in missionary labors in Wyoming, he returned to Philadelphia in 1820, and was ordained pastor of the 7th Presbyterian

church. He resigned in 1834 on account of impaired health, and was editor of the "Presbyterian" till his death, giving it a reputation as an organ of the old-school party. In 1838 he was appointed editor of the books and tracts issued by the Presbyterian board of publication, and held this office till 1863, when he was chosen to be president of the board. His books were prepared in connection with the board of publication, and are chiefly devotional. Among them are "Records of the Presbyterian Church" (Philadelphia, 1840); "English Martyrology" (1843); "Sick-Room Devotion" (1846); "Bible Dictionary" (1850); "Sailors' Companion" (1857); and "Soldiers' Pocket-Book," of which 300,000 copies were circulated, principally in the army, during the civil war (1861).

ENGLISH, Earl, naval officer, b. in Crosswicks, Burlington co., N. J., 18 Feb., 1824. He was educated in Trenton, N. J., and entered the naval service, 25 Feb., 1840. His first cruise was in the U. S. frigate "Constellation" around the world, returning after an absence of four years, then being ordered to the naval academy in Annapolis, where he was graduated in 1846. He joined the U. S. frigate "Independence," and was actively employed on the Pacific coast, principally in California. He was at the capture of Mazatlan, Mexico, in November, 1847, and remained there till the close of the Mexican war. In 1852 he was attached to the U. S. brig "Dolphin," which was engaged in "deep-sea soundings" across the Atlantic ocean from Newfoundland. He was appointed master, 1 March, 1855, and lieutenant on 14 Sept. In 1857 he cruised in the East Indies, and took part in the engagement with the barrier forts, seven miles below Canton, China, in which he was wounded. He was made lieutenant-commander, 16 July, 1862, and served throughout the civil war, being employed principally in the Gulf of Mexico and the sounds of North Carolina, and commanding at different periods the "Somerset," "Sagamore," and "Wyalusing." In 1866 he was appointed commander, and after the war served four years on the East India station. He was then employed in Japanese waters during the struggle that resulted in the overthrow of the Tycoon. When the latter was defeated at Osaka, 18 Feb., 1868, he received him on board the "Iroquois," which was then anchored in the Osaka river. He was commissioned captain, 28 Sept., 1871, commodore, 25 March, 1880, and rear-admiral, 4 Sept., 1884, at which time he resigned the office of chief of the bureau of equipment and recruiting, which he had held for six years. He then took command of the European station, and was retired, 18 Feb., 1886.

ENGLISH, George Bethune, adventurer, b. in Cambridge, Mass., 7 March, 1787; d. in Washington, D. C., 20 Sept., 1828. He was graduated at Harvard in 1807, and then studied law, but neglected his practice and turned his attention to theology. While studying Hebrew in Cambridge he began to doubt the truth of the Christian religion, which he attacked in a book entitled "The Grounds of Christianity Examined" (Boston, 1813). This was answered by Edward Everett in 1814, and in reply English wrote "Five Smooth Stones out of the Brook." Subsequently he edited a western paper for a time, and then sailed to the Mediterranean as a lieutenant of U. S. marines. On his arrival in Egypt he resigned his commission and joined Ismail Pacha in an expedition against Sennaar in 1820, winning distinction as an officer of artillery. As an experiment, he revived the ancient scythe-armed war-chariot, which was destroyed by being driven against a stone wall in Cairo, and he also employed camels for dragging cannon. He next became an agent of the U. S. government in the Levant, but in 1827 he returned to the United States and went to Washington, where he remained until his death. His friend, Samuel L. Knapp, has composed an ingenious epitaph recounting the incidents of his life. His genius was versatile, and he possessed remarkable facility for acquiring languages. Besides the works mentioned above, he published replies to William E. Channing's two sermons on infidelity (1813), and a "Narrative of the Expedition to Dongola and Sennaar" (London, 1822; Boston, 1823).

ENGLISH, James Edward, statesman, b. in New Haven, Conn., 13 March, 1812. He received a common-school education, and served an apprenticeship in a carpenter's shop. Here his energy and capacity were such that before he had attained his majority he was made master builder. He then engaged in the lumber-trade, and subsequently in real estate, banking, and manufacturing enterprises, and became one of the richest men in Connecticut. In 1848 he was a member of the New Haven common council, and elected a member of the state general assembly in 1855, and elected to the senate in 1856–'8. He was then elected to congress as a War-Democrat, and served from 1861 till 1865, voting with the Republicans for the abolition of slavery. He was a delegate to the Philadelphia national union convention in 1866, and was governor of Connecticut in 1867–'70. He then travelled extensively in Europe and the United States. In 1875 he was elected U. S. senator to fill a vacancy, and served till the following spring. He is president of the New Haven savings bank, and a manager of Adams express co.

ENGLISH, Thomas Dunn, author, b. in Philadelphia, Pa., 29 June, 1819. His ancestors were Quakers, who settled in Mount Pleasant, N. J., in 1684. The name was originally Angelos, which has been corrupted to the present form. He was educated chiefly in private academies and at the Friends' boarding-school in Burlington, N. J. When only seventeen years of age he wrote for the Philadelphia press. He was graduated in medicine at the University of Pennsylvania in 1839, but after a short practice he studied law in Philadelphia, and was admitted to the bar in 1842. He edited a daily paper in New York in 1844, and in the following year began the publication of a literary magazine, "The Aristidean," of which only a single volume was issued. In 1848 he edited a humorous periodical entitled "John Donkey," and in the same year he wrote a work on the French Revolution of that period, in conjunction with G. G. Foster. He removed to Virginia in 1852, where he remained five years, after which he wrote in New York the "Logan Grazier" and other poems descriptive of life and character in that region. In 1859 he settled in New Jersey, where he has since practised medicine. He has been actively engaged in politics, and served in the New Jersey legislature in 1863–'4. William and Mary gave him the degree of LL. D. in 1876. He is the author of several novels, mostly psuedonymous, and of more than twenty dramas, of which "The Mormons" is the only one printed. He wrote "Ben Bolt," a popular song, which first appeared in the New York "Mirror" in 1843, and the "Gallows-Goers," a rough but vigorous poem, which had an immense circulation during the agitation of the question of capital punishment from 1845 till 1850. His other publications are "Walter Woolfe" (Philadelphia, 1842); "MDCCCXLIV., or the Power of the S. F.," a political satire (New York, 1845); "Poems" (New

York, 1855; edition suppressed); "Ambrose Fecit, or the Peer and the Painter" (1869); "American Ballads" (1882); and "Book of Battle Lyrics" and "Jacob Schuyler's Millions" (1886). He has also written numerous pamphlets, and has contributed lyrics and essays to various periodicals.

ENGLISH, William Hayden, lawyer, b. in Lexington, Scott co., Ind., 27 Aug., 1822. His father, Elisha G. English, one of the pioneers of Indiana, was honored with many public trusts during a period of forty years. William was educated in the common schools and at Hanover college, studied law, and was admitted to practice in the U. S. supreme court before he was twenty-three years of age. He served as deputy clerk of his native county, and as postmaster of Lexington, before reaching his majority. In 1843–'4 he was a principal clerk in the Indiana house of representatives. He was principal secretary of the State convention of 1850, which framed the constitution of Indiana, and was a member and speaker of the first house of representatives after its adoption in 1851. He was a clerk in the U. S. treasury department during Polk's administration, and held a clerkship in the U. S. senate about 1850. He was elected to congress in 1852 as a Democrat, and served from 1853 till 1861, when he resigned and engaged in banking. He was prominently identified with the legislation of that period, and was the author of a compromise measure, in relation to the admission of Kansas as a state, which became a law, and was a prolific theme of controversy in the heated political contests of that day, under the name of "the English bill." From 1853 till 1861 he was one of the regents of the Smithsonian institution in Washington, D. C. In 1880 Mr. English was unanimously nominated for vice-president, on the ticket with Gen. Hancock, by the Democratic national convention. He is president of the Indiana historical society, and author of an historical and biographical work on the constitution and law-makers of that state (Indianapolis, 1887).

ENNEKING, John Joseph, artist, b. in Minster, Auglaize co., Ohio, 4 Oct., 1841. He was educated at Mount St. Mary's college, Cincinnati, Ohio, and studied art in Europe in 1873–'6, most of the time in the art-schools of Munich and Paris. He was a pupil of Bonnats and D'Aubigny. After his return to this country he opened a studio in Boston, and his works are frequently shown in the exhibitions of the Boston art club. For several years he has made a specialty of New England landscapes in November and winter twilights. He has also been successful as a painter of children's portraits. Among his works are "The Drove," cattle crossing a brook on a November morning (1878); a large "November Twilight" (1880); "Winter Twilight" (1882); "Summer Twilight" (1883); "Cloudy Day in Summer" (1884); "The Coming Storm," "Indian Summer," and another "November Twilight" (1885). The most successful of his figure-paintings are "Spring-time" and "Old Lady darning Stockings."

ENOS, Roger, soldier, b. in Simsbury, Conn., in 1729; d. in Colchester, Vt., 6 Oct., 1808. He was in the colonial service during the French war in 1759, became ensign in March, 1760, lieutenant in September, adjutant of his regiment and captain-lieutenant in 1761, 1st lieutenant in 1762, and captain in Israel Putnam's regiment in 1764. He was in the expedition against the Indians, served in the Havana campaign in 1762, and was a member, with Israel and Rufus Putnam and Phineas Lyman, of the commission sent by the colony of Connecticut to survey lands in the Mississippi valley that had been given by the crown to those who served in the French war and the Havana campaign. He was lieutenant-colonel of the 22d regiment, in Arnold's expedition to Canada, in 1775, returned with his command, to avoid starvation, on 25 Oct. of that year, and on 1 Dec. was court-martialed for "quitting without leave," and "honorably acquitted." He was afterward lieutenant-colonel of the 16th Connecticut regiment, and resigned on 18 Jan., 1776, but was colonel of a regiment in 1777–'9, when he removed to Vermont, settling the town of Enosburg in March, 1781. He was appointed brigadier-general in command of all the Vermont troops in that year, became major-general of the 1st Vermont division in 1787, and resigned in 1791, after thirty-two years of continuous military service. He was a member of the Vermont board of war in 1781–'92, and of the state assembly, and was on the committee to settle the New Hampshire and Vermont controversy. He was also a trustee of the University of Vermont, and one of the committee to consider the Vermont resolutions passed by the Continental congress. In 1779–'92 he was one of the most prominent actors and most honored figures in Vermont history. — His son, **Pascal Paoli,** became one of the four proprietors of the present site of Springfield, Ill.

ENRIQUE (also called Enriquíllo or Henriquíllo) (en-ree'-kay), Haytian cacique, b. in the 16th century. He was the son of the cacique of Barouco, but was educated in the Christian religion by the monks of the convent of San Francisco, in Managua, Santo Domingo. When he was of age, Enrique took upon himself the government of his tribe. In 1519 Valenzuela, a Spaniard, inherited an Indian commandery situated in Enrique's domains, and obtained from this chief all the assistance prescribed by law. But the cruel conduct of Valenzuela toward the Indians was such that Enrique had to make repeated complaints to the Spanish authorities; obtaining no redress, the cacique finally took to the mountains with a small number of his followers. There Valenzuela, with twelve colonists, went to attack him, and was defeated and taken prisoner, but generously set at liberty by Enrique. Other forces sent by the Spanish government were also unsuccessful, and finally Fray Remigio, who had been Enrique's teacher, was sent to exhort him to surrender. Enrique answered that he would give up the struggle if he should be allowed to enjoy the liberty of the mountains. For thirteen years the Spaniards made no headway, and in 1533 Gen. Barrio-Nuevo, empowered by the emperor, made a treaty of peace with Enrique. The latter selected the region of Boya as his residence, and was declared hereditary prince, and many natives flocked to his domains. After this time (about 1544) he is not mentioned by historians.

ENRIQUEZ DE ALMANSA, Martin (en-ree'-kayth), viceroy of New Spain, b. in Alcañices, Spain, about 1525; d. in Lima, Peru, 15 March, 1583. He took possession of the government, 5 Nov., 1568, and, on his arrival at Vera Cruz, attacked and defeated Sir John Hawkins in the bay of San Juan de Ulua. In 1570 he sent an expedition against the Indians, established in their territory the presidios of Ojuela and Portezuelos, and founded the towns of Celaya and San Felipe, in Guanajuato. During his government great activity was displayed in the foundation of towns, convents, and colleges. He established the inquisition in 1571, a year before the arrival of the Jesuits, and in 1573 began to build the cathedral of Mexico. He established the excise duty in the latter year, and abolished the forced service of the natives in the mines. When,

in 1576, the plague of Matlazahuatl broke out, in which two million natives perished, Enriquez showed them great kindness, and excused them from all taxes. He was promoted viceroy of Peru on 4 Oct., 1580, and arrived in Lima in 1581. He founded the College of San Martin, 11 Aug., 1582, giving the direction to the Jesuits, and, up to the abolition of that order in 1767, this college was one of the most notable in the New World. Enriquez authorized the convocation of the third concilium of Lima on 15 Aug., sent assistance to the city of Arequipa, which had suffered greatly from an earthquake, gave orders for the cleaning of the streets and canals of Lima, organized the mail service to the interior, and initiated numerous other improvements. Enriquez died suddenly, while in office, and his remains were buried in the convent of San Francisco of Lima. He is the author of "Ordenanzas de Mesta para la Nueva España" (1574) and "Instrucciones sobre las cosas y gobierno de Nueva España," both of which are preserved in manuscript in Mexico.

ENRIQUEZ DE RIVERA, Payo, viceroy of Mexico, b. in Seville, Spain, about 1610; d. in the convent of Nuestra Señora del Risco, Avila, Spain, 8 April, 1684. He belonged to the family of the Duke of Alcala, a distinguished Spanish nobleman. He entered the religious order of Saint Agustin, and graduated as doctor of theology, which science he taught afterward in the convents of Burgos, Valladolid, and Alcala. He was appointed bishop of Guatemala by Philip IV. in 1657, and in 1667 was assigned to the bishopric of Michoacan, Mexico, but before he could reach his new see he received notice of his promotion to the archbishopric of Mexico, where he arrived 27 June, 1668. In 1673 Pedro Nuño Colon, Duke of Veragua, then an old man, came to New Spain as viceroy, but died six days after his arrival. Then some sealed instructions, which had been deposited in the inquisition, were opened, and it was found that they appointed Payo Enriquez deputy viceroy. His government was remarkable for its liberality and justice. He ordered many repairs of public buildings and other improvements, built the causeway between Mexico and Guadalupe, and took energetic measures for the defence of the coasts during the invasion of Yucatan by English corsairs. In 1681, after resigning both the office of archbishop and that of viceroy, he returned to Spain, and, declining the bishopric of Cuenca, retired to the convent, where he died. When the news of his death arrived at Mexico, due honors were paid by the authorities to his memory. He wrote many theological works printed in Valladolid, Guatemala, and Mexico, and also "Carta al Señor Don Diego Andrés Rocha, Alcalde del Crimen, en la Audiencia de Lima" (Mexico, 1670).

EPIPHANE, Louis Marie, French missionary, b. in Moirans, Franche Comté, in 1630; d. in Cumana, Spanish Guayana, in 1692. His father, who was seneschal of Moirans, had destined him for a soldier, but at the age of twenty he joined the order of Capuchin monks, and requested permission to take part in the South American missions organized by them. In 1651 he was sent to Maranham, and studied several Indian dialects, which he soon spoke fluently. Afterward he resided for several years in the territory of the Tayupe Indians, where he founded several villages, among others that of Saint Marc in 1657, which was for some time renowned for its college. In 1661 the Spanish government commissioned Epiphane to explore the course of the Rio Grande, which he ascended as far as the river Amazonas. Afterward, in 1663, he ascended the latter river for 1,200 miles. He then went to Guayana, and founded at Viapoquo a mission and a college, and in 1667 was appointed director of the College of Capuchin monks at Cumana. He filled this office till his death, and at the same time discharged the duties of general chief of the missions of Spanish Guayana and of the province of Caracas. It is said that Father Epiphane founded upward of 200 villages in the province of Caracas, and that he contributed to the civilization of more than 40,000 Indians. He was the author of important works on America, which were published in the "Bibliotheca scriptura Capucinorum" of Bernard de Bologne (1754). These are "Annales historiques de la Mission des pères Capucins dans la Nouvelle Andalousie, Amerique du Sud, de 1615 à 1670"; "Explorations le long du fleuve Orénoque, 1662"; "Ma mission sur le Rio Grande, 1661"; "Grammaire de la langue Tayupe"; "Les moeurs et coutumes des Indiens dans la Guyane Espagnole, 1690"; and "La civilisation Indienne dans l'Amerique méridionale, 1685," said to be the only work on the subject.

EPPES, John Wayles, senator, b. in Virginia in 1793; d. near Richmond, Va., 20 Sept., 1823. He received an academic education, and, after studying law, was admitted to the bar, and began practice in Richmond. In 1803 he was elected as a Democrat to the U. S. house of representatives, and with successive re-elections served continuously from 17 Oct., 1803, till 3 March, 1811. Later he was elected to the 13th congress, and served from 24 May, 1813, till 3 March, 1815. He was chosen U. S. senator in 1817, but resigned the office two years afterward on account of failing health, and retired to his estates in Chesterfield county. He married Maria, the daughter of Thomas Jefferson, who died at Monticello in April, 1804.

ERAUZO, Catalina de (a-row'-tho), also called Erauso and Eraso, Spanish adventuress, b. in San Sebastian de Guipuzcoa, province of Biscay, Spain, 10 Feb., 1585; d. in Cuitaxtla, near Orizaba, Mexico, in 1650. She was the daughter of Capt. Miguel de Erauzo. At the age of four years she was placed in a Dominican convent; but on 18 March, 1600, she scaled the wall and escaped to the woods, where, subsisting on herbs and roots, she remained three days, and in that time transformed her habit into that of a Dominican lay friar. Proceeding in male attire to Vitoria, she found employment as an amanuensis. Subsequently she was a page, and then, under an assumed name, visited her native place and heard mass in the very convent from which she had so lately escaped. Thence she went to Valladolid, and became page to the king's private secretary. After this Catalina obtained a sum of money and went to Bilbao, thence to the port of Pasajes, where she embarked for San Lucar, and bound herself as cabin-boy on board a galleon commanded by her uncle, who did not recognize her. She sailed in the fleet commanded by Gen. Luis Fernandez de Cordova, which reached Punta de Araya, near Cumana, and there destroyed a

small Dutch squadron. Next she went to Panama, and thence to Saña, and there took charge of a shop, managing it to the entire satisfaction of her employer. On one occasion, while at the theatre, Catalina was annoyed by a man named Reyes, who threatened to disfigure her face, and on the following day went to the shop with the purpose of provoking her. When he left she got a knife, made it into a sort of saw, and, girding on her sword, went in search of Reyes. She found him near the door of a church, rushed upon him, and crying, "This is the face that is to be disfigured," tore his face with the rude weapon. A friend of Reyes then attacked her, but she wounded him dangerously, and then took refuge in a church. Her employer, who entertained feelings of friendship for the sister-in-law of the wounded Reyes, thought matters would be brought to a satisfactory termination by a marriage between her and his clerk. Catalina gave her employer to understand that nothing could induce her to marry. She then went to Trujillo to take charge of another shop. Reyes, with two others, followed and attacked her, but Catalina defended herself against all three, and killed one of them. Ordoño, the chief magistrate, was taking her to prison, when, passing by a church, he allowed her to take refuge in it. He was from Biscay, and she had chanced to speak to him in the Basque dialect. She next went to Lima, and after some months enlisted as a soldier, under the assumed name of Alonso Diaz Ramirez de Guzman, in the expedition that was to be sent to Chili. The company was commanded by Capt. Gonzalo Rodriguez, and formed part of the forces sent to Concepcion under the command of Sarabia, but made the campaign under the command of Gov. Ribera, whose secretary was Capt. Miguel de Erauzo, whom she knew to be her brother, but he did not recognize her. But he found that Ramirez de Guzman frequented a certain gambling-saloon, and caused her transfer to Paicabi (Arauco), where she remained three years in service. She accompanied the expedition to Valdivia, where, in a severe engagement, she with two soldiers rushed in among the Indians, and both soldiers perished in the fight; but Catalina wounded many, and killed a cacique, after receiving three wounds from arrows and one from a lance. For this exploit she was appointed ensign, and served as such in the company of Alonso Moreno, in the battle of Puren, and when her captain fell she took his place and led the company bravely. Afterward Catalina took part in other engagements, and was wounded many times by arrows. She fought with the famous cacique Quispehuancha, unhorsed him, and then had him hanged on a tree. When Catalina was at Nacimiento she obtained a six-months' leave of absence, to return to Concepcion, and while there was insulted in a gambling-saloon by an officer, whom she wounded in the breast, and took refuge in a church. The governor had the church surrounded for six months, and by this time the fury of the people had abated. Catalina left, accompanied by the ensign Don Juan Silva, who had asked her to be his second in a duel with Don Francisco Rojas. Silva being wounded and Rojas killed, Catalina fought with the second of the latter while the moon was obscured by a cloud, so that she did not see the face of her opponent. The cloud passed away and Catalina looked upon the face of her brother, whom she had killed. She then set out on a journey to Tucuman (in the Argentine province). Some idea may be formed of her hardships and sufferings on that perilous journey from the fact (as she herself relates) that for the first time in her life she shed tears. When she saw two deserters and two Indians who accompanied her perish of hunger and cold, her heart failed her for a moment, but she killed a horse, and, subsisting on its flesh, continued her journey. After travelling a long time, she came to a farm, whose owner, a widow, treated her with the greatest kindness, and wanted Catalina to marry her daughter. She went to Tucuman, as if for the purpose of celebrating the marriage, but fled, and directed her steps to Potosi, accompanied by a soldier. On the way they were attacked by a gang of robbers, two of whom they killed. She reached Potosi, and was for a short time valet to Gov. Arguijo, but soon joined the command of the corregidor of Potosi, who was raising troops to put down an insurrection headed by Ybañez, and took part in a severe engagement. She was made aide-de-camp to Gen. Alba, and accompanied him on an expedition against the Mojos Indians. After this she went to Charcas, where she was employed by a merchant, whose business prospered rapidly under her able management; but she had a dispute at the gaming-table, and fought a duel with the cousin of the bishop, killing her adversary. In Pomabamba (Bolivia), Catalina had another duel, in which she killed her adversary, and was thrown into prison and put to the torture. She made no confession, but was sentenced to die, refused to receive the consolations of the church, and ascended the scaffold. But an order arrived from President Don Diego de Portugal to suspend the execution and send the culprit to Chuquisaca, as it had been proved that the declarations of the witnesses were false. Catalina went to Cochabamba. A nun named Ulloa induced the president of Charcas to commission Catalina to conduct the trial of Francisco Escobar, who had treacherously killed two Indians. The result of the trial was that she condemned him to be hanged, and the sentence was carried into execution. Catalina next went to La Paz, where the servant of the corregidor enraged her by throwing his hat in her face. Catalina stabbed him with her dagger, and he fell, mortally wounded. She was imprisoned, sentenced to die, and was allowed two days to prepare for death, but finally escaped. When the viceroy, Marquis de Montesclaros, was preparing a fleet to attack the naval forces of the Dutch in the Pacific, under the command of George Spilberg, Catalina joined the fleet, and embarked in the "Almirante," which, stranded off Cañete, was completely destroyed in the conflict. Catalina was one of the few persons that were saved, and fell into the hands of the Dutch, but were set free at Payta. She went to Lima, and, after a stay of seven months, proceeded to Cuzco. Here she was a great favorite with the ladies. On one occasion, in a gambling-saloon, she met a Spaniard commonly known as the "Cid." He was repulsive and quarrelsome, but courageous. The "Cid" took his seat beside her. Twice he took from the table the money she had won; but on his making the third attempt she pinned his hand to the table with her poniard. The "Cid," with two of his friends, attacked her; she, battling with all three, made her way to the street, where two Biscayan friends came to her aid. The "Cid" wounded Catalina in the back and in the left side, and she fell, bleeding profusely. Faint from loss of blood, she believed herself to be dying, and longed to reveal her sex. Rousing herself, she saw the "Cid" standing opposite the church at whose door she lay. The dying woman rose, staggered toward the "Cid," and thrust her sword through his body, killing him on the instant. The corregi-

dor arrived, and, seeing her dangerous wound, ordered her to confess. She revealed the secret of her sex to the priest, and was taken to the house of the treasurer Alcedo. After many more adventures, mostly personal encounters, she met Bishop Agustin de Carvajal, to whom she related the story of her life, telling him she was willing to submit to examination by a committee of matrons, adding that she still preserved her purity. It was proved by the declarations of the matrons that she had spoken the truth. Catalina lived in a convent in 1620–'2, then travelled to New Granada, and sailed for Spain, arriving in Cadiz, 1 Dec., 1624. Her fame had preceded her, and crowds thronged the streets with cries of "Long life to valor!" "Long live the ensign-nun!" In Madrid she presented an account of her services to King Philip IV., who granted her a pension for life of 800 crowns. Catalina set out for Barcelona, but before arriving there was robbed. From Barcelona she went to Genoa, and thence to Rome, where the pope, Urbano VIII., granted her an audience, and, having heard the narrative of her adventures, gave her absolution for all the crimes she might have committed, with permission to dress in male attire for the rest of her life. She next went to Naples, and thence to Spain, remaining in Seville until 1630, in which year she embarked again for Havana, and thence for Mexico, as ensign in the fleet commanded by Capt. de Echazarreta. In Mexico she made a long campaign, and, as usual, distinguished herself by her bravery in battle, and after some years retired from the service, bought a string of pack-mules, and began trade between the city of Mexico and Vera Cruz. A certain rich merchant commissioned her to take a young lady from Jalapa. Catalina, enchanted with the beauty of the young lady, grew very fond of her; but when they reached Mexico a nobleman became enamored of the girl, and, although Catalina offered to place $3,000 at interest in her name, and give her half her pension, if she would become a nun, the young lady married the nobleman. Unable to endure the absence of her beloved friend, Catalina went to the house of the latter, where she was well received; but as she repeated her visits too often, the lady, jealous of her reputation, persuaded her husband to forbid Catalina the house. At this the latter almost lost her reason, and challenged the husband, who declined to measure swords with a woman. A short time afterward the husband was defending himself against three men who had attacked him, when Catalina took up his defence and vanquished them. In 1650, on her way to Vera Cruz, she fell ill at Cuitaxtla, and in a few days expired, and was buried at Orizaba. Archbishop Palafox, of Mexico, caused a eulogistic epitaph to be inscribed on her tomb in 1651. The memorial presented by her to King Philip IV. is referred to on page 135 of the book published by Don Joaquin Maria Ferrer, and was accompanied by a certification of Don Luis de Cespedes Feria, governor of Paraguay, of Don Francisco Perez de Navarrete, of Don Juan Cortes de Monroy, governor of Veraguas, and of Gen. Don Juan Recio de Leon. The king and the pope called her Ensign Doña Catalina Erauzo. Don Pedro de la Valle, in a work on his voyages (1630), says he knew her in Rome, and that in that city Francesco Crecencio executed a portrait of her. The history of her life, written by herself, was published in Mexico in 1653. The Rev. Nicholas Renteria in 1693 gave a succinct account of her life. The poet Juan Perez de Montalban wrote a drama entitled "La Monja Alférez" ("The Ensign-Nun"), which was represented in Lima and in Seville at the beginning of the present century. Don Candido M. Trigueros wrote a poem on Doña Catalina Erauzo (Seville, 1784). Gil Gonzalez Davila, in his life of Philip III., gives a succinct account of Doña Catalina. He mentions that he met her at an inn in the dress of a soldier, and that he saw her wounds, and the documents that proved her services. Joaquin M. Ferrer published her history (Paris, 1829), taken from her memoirs. In 1630 Pacheco made a full-length portrait of her from the following description: "She is tall, for a woman; her eyes are large, black, and brilliant; her lips red and full; her nose rather short, the nostrils dilated; her neck is short; her figure, neither good nor bad; her hair short, and anointed with pomade, according to the fashion. Her gait is light and elegant; her manners natural; her hands alone are feminine, but rather in gestures than in form. There is a light brown down on the upper lip."

ERBEN, Peter, organist, b. in Philadelphia, Pa., in 1771; d. in New York city in 1863. After the death of his father, who was one of the early German settlers in Pennsylvania, he removed to New York, where he became an organ-builder, and was also organist in Trinity parish from 1807 till 1839.—His son, **Henry,** b. in New York city in 1801; d. there in May, 1883, was apprenticed in 1818 to Thomas Hall, an organ-builder. He became Mr. Hall's partner in 1822, and afterward carried on the business alone.

ERCILLA Y ZÚÑIGA, Alonso de (er-theel'-ya), Spanish poet, b. in Madrid, 7 Aug., 1533; d. there about 1595. He was the third son of Fortun Garcia, lord of Torre de Ercilla, and Leonor de Zuñiga, a noble lady in the service of Empress Isabella, wife of Charles V. In early youth he was a page to the Prince of Asturias, afterward Philip II., and in 1554 accompanied Philip to England on the occasion of the latter's marriage to Queen Mary. While he was in London news was received of the rebellion of the Araucanians, a brave nation of Chili, and Ercilla at once joined the expedition against them under Alderete. He highly distinguished himself in the campaign that followed, taking part in seven battles and many other fierce encounters. He afterward accompanied Hurtado de Mendoza to the conquest of Chiloe, near the straits of Magellan, and with ten followers, on 28 Feb., 1558, penetrated inland to a point that had been reached by no other Europeans, leaving a statement of that fact in verse, cut in the bark of a tree. After taking possession of those regions in the name of the Spanish monarch, he returned to the city of Imperial, and, being suspected of joining in a mutiny, was condemned to be beheaded, but was reprieved and afterward exiled. While at Lima he heard of the rebellion and cruelties of Lope de Aguirre in Venezuela, and

reached Panama in 1561, on his way to fight against him; but Aguirre had just been deposed and killed, and Ercilla, after a long and dangerous illness, returned to Spain in 1562. After travelling extensively through Europe, he entered the service of the Emperor Rudolph, of Austria, as one of his chamberlains, but about 1580 returned to Madrid, where he passed the rest of his life in retirement, almost forgotten, and in extreme poverty. When Ercilla began his seven years' campaign in Chili he conceived the idea of making it the subject of a poem; and in the intervals of active duty, mostly at night-time, he composed the first part of "La Araucana," writing his verses on scraps of paper, and often on bits of leather. The third and last part of the poem he finished after his return to Spain. "La Araucana" is one of the most celebrated of Spanish epics, and one of the best ever written in any language. It not only possesses the merit of pure diction, vivid description, and majestic style, but it is also a true history of the Araucanian war, in which the author was personally engaged, and as such has been used by the most conscientious historians. The first fifteen cantos of "La Araucana" were published in Madrid in 1569, the second part in 1578, and the third part, completing the thirty-seven cantos, in 1590. Its best editions are those of Madrid (1776 and 1828). A portion of the poem, translated into French by Grainville, is found in vol. vii. of the "Quatre Saisons du Parnasse." An analysis of the poem, with translations of parts of it, has been made in Hayley's "Essay on Epic Poetry" (London, 1782).

ERIC, bishop, b. in Norway in the 11th century. He was active in the conversion of the natives of Greenland, and was the first bishop that exercised jurisdiction in America. As soon as the Norwegians under Thorwald began to form settlements in Vinland, Eric followed his countrymen from Greenland to the newly discovered continent. Here he labored among the natives for several years. He returned to Norway in 1120, gave an account of the progress of religion in Vinland and Greenland, and advised the establishment of a bishopric in the new colonies. The bishop of Scandinavia erected the new see of Garda in Greenland, and recommended Eric as bishop. He was consecrated at Lund, in Denmark, in 1121, by Archbishop Adzar, and sailed for Garda with a body of missionaries, but, after a short stay, visited the new colony in Vinland. The situation of Vinland has been fixed by some in southeastern New England. Some have gone so far as to place it about Narragansett bay; but such conjectures are supported by inadequate evidence, and have little historical value.

ERIC THE RED, Scandinavian navigator. He was the son of a jarl of Jadar, and was called red from the color of his hair. In 982 he was one of the Northmen who braved the dangers of the Atlantic ocean to settle in Iceland. During the following year he set sail from Bredifiord in search of land seen by Gunnbjörn, of which a tradition still lingered among the Northmen. He doubled Cape Farewell, and sailed up the west coast to the present site of Julianeshaab, where he saw large herds of reindeer browsing on the meadowlands. The country pleased him, and he named it Greenland, and the inlet Ericfiord. In 985 he returned to Iceland, but soon again set sail with twenty-five ships loaded with emigrants, and the means of founding a colony. He reached Ericfiord with but fourteen of his vessels, the remainder having been lost or forced to put back, and he built a settlement far up the fiord. The town grew and prospered, and in time the coast was explored and new plantations founded. As no trees grow in that region now, it is probable that the land was far more habitable than at present, and very little mention of ice is made by the early chroniclers. About 1000, an exploring party sent out by him, under the command of his son Leif, discovered the continent of North America, part of which they called Markland, and another part Vinland. The latter appears to have been southeastern New England. He is supposed to have established a colony in that neighborhood, but the evidence on which this supposition is made is not satisfactory. See Bryant and Gay's "Popular History of the United States," and Rev. Benjamin F. De Costa's "Pre-Columbian Discovery of America by the Northmen"; also, Laing's "Heimskringla," which contains by far the ablest discussion of the subject.

ERICH, Augustus Frederick, physician, b. in Eisleben, Germany, 4 May, 1837. He was educated at the gymnasium in Eisleben, and came to the United States in 1856. He was graduated in medicine at the University of Maryland in 1861, and began to practise in Baltimore. In 1868 he was elected a member of the Baltimore special dispensary, and was assigned to the charge of diseases of women. He became professor of chemistry in the College of physicians and surgeons in Baltimore in 1873, and was afterward elected to fill the chair of diseases of women in the same institution. He is a member of numerous medical societies, and in 1871 was president of the Medical and surgical society of Baltimore. His contributions to medical literature have been important, and are chiefly composed of papers on his specialties.

ERICSSON, John, engineer, b. in Långbanshyttan, province of Wermland, Sweden, 31 July, 1803. His father, Olof, was a mining proprietor, and his brother, Baron Nils Ericsson, was colonel of engineers, and became chief of the Swedish railways. As a boy, John had ample opportunity of watching machinery connected with mines, and his mechanical talent was early developed. He received his earliest instruction from a Swedish governess, and a German engineering officer who had served under Bernadotte. Before he was eleven years of age he had constructed with his own hands, and after his own plans, a miniature saw-mill, and had made numerous drawings of complicated mechanical contrivances. These efforts having attracted the attention of Count Platen, this celebrated engineer appointed him a cadet in the corps of mechanical engineers, and, after six months' tuition, he was made a leveller at the grand Swedish ship canal, then in course of construction. Two years later, at the age of fourteen, he was employed to set out the work of a section employing 600 soldier operatives, and occupied his leisure in making drawings of every implement and machine connected with the canal. He entered the Swedish army as ensign in 1820, and was rapidly promoted to a lieutenancy.

Shortly afterward he passed with distinction a competitive examination for an appointment on the survey of northern Sweden. Notwithstanding the labor attendant upon his duties as a surveyor, he undertook to make drawings for a work on canals, and to engrave the plates in the style of what was known as machine engraving. He devised a line engraving machine, by means of which, within one year, he completed eighteen large copper plates, which experts pronounced to be of superior merit. When about twenty-two years old he constructed a condensing flame-engine of ten-horse power, and in 1826 went to England to introduce it; but it was not successful, the flame produced by mineral fuel being far less in volume than that obtained from a pine-wood fire, while the intense heat from coal seriously affected the working parts of the engine. In 1827 he resigned his commission in the army, after being promoted to a captaincy. The failure of the flame-engine compelled him to draw upon his mechanical abilities for means to prosecute further experiments. He produced, in rapid succession, an instrument for taking sea soundings, a hydrostatic weighing machine, and numerous other devices, including tubular steam-boilers, and artificial draught by centrifugal fan-blowers, dispensing with huge smoke-stacks, economizing fuel, and showing the fallacy of the assertion that the production of steam was dependent on the amount of fire surface. In the steamship "Victory," in 1828, he made the first application to navigation of the principle of condensing steam and returning the water to the boiler, and in the same year submitted to the admiralty his self-acting gun-lock, the peculiarity being that by its means naval cannon could be automatically discharged at any elevation, notwithstanding the rolling of the ship. Not being able to agree as to the terms of adoption in the British navy, he kept the secret of this invention till 1843, when he applied it to the wrought-iron gun of the "Princeton." In 1829 he produced the celebrated steam carriage "Novelty," built for the purpose of competing with George Stephenson for the historical Liverpool and Manchester railway prize. This engine was planned and completed, and placed on the trial-ground within seven weeks; but, although the "Novelty," guided by its inventor, far exceeded all other competitors in lightness, elegance, and speed, attaining the then amazing speed of thirty miles an hour, Stephenson's "Rocket" proved superior in traction, and was awarded the prize. In the "Novelty" he introduced several features, the four most important of which are retained in the locomotive of the present day. This year, also, he invented a steam fire-engine, which excited great interest in London, and for which he afterward received, in 1840, the great gold medal of the Mechanics' institute of New York. In 1830 he introduced "link motion" for reversing locomotive engines, and a modification of this device is now in use in all locomotives. His long-cherished plan of a caloric engine was realized in 1833, and was hailed with astonishment by the scientific world of London. Lectures were delivered on it by Dr. Dionysius Lardner and Michael Faraday, and it was highly approved by Dr. Andrew Ure and Sir Richard Phillips. A working engine of five-horse power was built, in which he placed the "Regenerator," but it was unsuccessful owing to the high temperature essential, which produced oxidation, quickly destroying the valves and other working parts. In 1853 the caloric ship "Ericsson," of 2,000 tons, was propelled by a motor on the same principle. A sea trial from New York to Washington and back established great economy in fuel, but at a speed too slow to compete with steam. For several years thereafter Ericsson devoted himself to the improvement of the stationary caloric engine and its application to light mechanical purposes, and more than 6,000 of such engines have been built up to 1887, hundreds being employed in New York city in pumping water in private dwellings. In 1862 the American academy of arts and sciences awarded the gold and silver Rumford medals to Ericsson "for his improvements in the management of heat, particularly as shown in his caloric engine of 1858." This was the second bestowal of the premium in the United States. In 1836 Ericsson invented and patented the screw propeller, which revolutionized navigation, and in 1837 built a steam vessel having twin screw propellers, which on trial towed the American packet-ship "Toronto" at the rate of five miles an hour on the river Thames. Subsequently the admiralty barge, bearing the lords of the admiralty, was towed at a rapid rate, but the endeavor to convince them of the practicability of the new device was futile, since they thought that, as the power must be applied at the stern, the vessel would not steer. In 1838 he constructed the iron screw-steamer "Robert F. Stockton," which crossed the Atlantic under canvas in 1839, and was afterward employed as a tug-boat on the river Delaware for a quarter of a century. In 1839, urged by Com. Robert F. Stockton, U. S. N., Ericsson resigned his office in London as superintending engineer of the Eastern Counties railway, and came to the United States during November. In 1841, under order from the U. S. navy department, he furnished designs for the screw war-ship "Princeton," the first vessel having the propelling machinery below water-line, out of the reach of hostile shot. This vessel dictated the reconstruction of the navies of the world. Besides its screw propeller, the "Princeton" was remarkable for numerous mechanical novelties devised by Ericsson, such as a direct-acting semi-cylindrical steam-engine of great compactness and simplicity; a telescopic smoke-stack; and independent centrifugal blowers for ventilation and for promoting combustion in the boiler-furnaces, obviating the necessity of exposing the chimney during battle. He also fitted it with wrought-iron gun-carriages, with mechanism for dispensing with breeching, and taking up the recoil of the twelve-inch wrought-iron gun, the first of its kind, and up to that time the largest and most powerful piece of ordnance mounted on ship-board; the self-acting lock, before referred to; and an optical instrument to enable the commanding officer, by mere inspection, accurately to ascertain the distance of the object to be aimed at. The "Princeton" is correctly regarded as the pioneer of modern naval construction, and also as the foundation of the steam marine of the world. During the construction of the "Princeton," and before the end of 1843, numerous propeller vessels were built and furnished with engines by Ericsson, for carrying freight on the rivers and inland waters of the United States, and his propellers were in successful application in more than sixty vessels in this country before a single attempt was made to evade his patent. Up to this period Europe was skeptical regarding the commercial value of the new method of propulsion. In 1851, in the U. S. division of the World's fair held in London, he exhibited several of his inventions, including his instrument for measuring distances at sea; a hydrostatic gauge for fluids under pressure; a gauge for the volume of water passing through pipes; the alarm barometer; a pyrometer;

an instrument for measuring fluids by the velocity with which they pass through definite apertures; and a self-registering deep-sea lead, still in use by the U. S. coast survey, the principle of which was adopted in constructing the sounding apparatus used by the "Challenger" expedition. For these philosophical exhibits Ericsson was awarded the prize medal of the exhibition. Previous to 1836, Ericsson conceived the idea that was put in practical shape when, in 1854, he presented to Emperor Napoleon III. plans of a partially submerged armored vessel, with guns in a revolving shot-proof cupola placed centrally on the deck. This was the first suggestion of the "Monitor," which was designed and built by him in Greenpoint, N. Y., in 1861, for the U. S. government, under very arbitrary conditions. When the proposition to build this vessel was accepted, the only drawing completed by the designer was a mere outline and section to illustrate the stability of the structure; but, by extraordinary energy and executive skill, calculations and working-plans were made, and the "Monitor" launched, with steam machinery complete, in one hundred days from the laying of the keel. She arrived in Hampton Roads just in time to defeat, on 9 March, 1862, the Confederate iron-clad "Merrimac," which, on the day preceding, had destroyed the "Cumberland" and "Congress," and was about to sink or disperse the rest of the gov-

ernment's wooden fleet. But for the victory of the "Monitor," the result of the war might have been changed, and European interference attempted. A fleet of monitors was then quickly built, which defeated several Confederate iron-clad batteries; and Ericsson's system was taken up by European maritime powers and carried out by them on a large scale. In 1869 he constructed for the Spanish government a fleet of thirty steam gun-boats, which was intended to guard Cuba against filibustering parties. In 1881 his latest war-vessel, the "Destroyer," was devised. It carries a submarine gun of sixteen inches calibre, which discharges 300 pounds of gun-cotton, in a 1,500-pound projectile, against an iron-clad's hull beneath the water-line. During many years Ericsson has devoted much time to scientific investigation, including computations of the influences that retard the earth's rotary motion. His "Sun Motor," erected at New York in 1883, develops a steady power obtained from the supply of mechanical energy stored up in the sun. This motor is intended by the designer as a contribution to applied science. Ericsson has contributed numerous papers, on scientific, naval, and mechanical subjects, to various journals in America and Europe. In "Contributions to the Centennial Exhibition" (New York, 1876) he describes the scientific apparatus devised and employed by him in experiments which determined all important practical questions relating to radiant heat, and of numerous novel instruments by which he has demonstrated the intensity of solar energy and the temperature of the solar surface; it also contains a description of his principal engineering constructions during his residence in the United States. Many honors have been bestowed upon him. Besides receiving royal favors from Sweden, he is knight commander of royal orders in Denmark and Spain; recipient of the grand cross of naval merit from the late King Alfonso of Spain, and of a special gold medal sent by the emperor of Austria in behalf of science; has received the thanks of congress, and is a member of various scientific institutions in Europe and America. Wesleyan university gave him the degree of LL. D. in 1862. In 1867 a huge monument, quarried in one piece from the neighboring granite-mines, was set up in front of his birthplace, bearing the inscription, in the Swedish language, "John Ericsson was born here, 31 July, 1803." He now (1887) resides in New York city. See "Ericsson and his Inventions," "Atlantic Monthly," July, 1862, and "John Ericsson," "Scribner's Monthly," April, 1879.

ERNST, Oswald Hubert, soldier, b. near Cincinnati, Ohio, 27 June, 1842. He entered Harvard in 1858, and two years later was appointed to the U. S. military academy, where he was graduated in 1864, becoming at once 1st lieutenant in the engineer corps. In July, 1864, he became assistant engineer of the Army of the Tennessee, and served throughout the Georgia campaign. After a short service at the U. S. military academy as assistant professor of engineering, he was appointed assistant engineer in constructing fortifications on the Pacific coast, and remained so occupied till 1868. He was promoted captain in March, 1867, had command of an engineer company at Willett's Point, N. Y., in 1868–'71, and in 1870 was sent as astronomer with the government expedition to Spain, to observe the solar eclipse of that year. Later he was appointed instructor of practical military engineering, military signalling, and telegraphy at the military academy, performing also the duties of architect for the more important structures of the place. In 1878 he became assistant engineer on western river improvements, and in 1880 was given charge of the improvements of the Mississippi river, between the Illinois and Ohio rivers. He received his commission as major in May, 1882, and has since had charge of the works of river and harbor improvement in Texas. Major Ernst has written articles on engineering subjects, and has also published "A Manual of Practical Military Engineering" (New York, 1873).

ERRANI, Achille, musician, b. in Faenza, Italy, 20 Aug., 1823. When seventeen years of age he entered the conservatory of Milan, and studied singing under the famous Vaccai. About five years later he made his first appearance as a leading tenor at Reggio di Modena. In 1859, after singing often in Italy, Spain, and Greece, he went to Havana under the management of Max Maretzek. He came to New York in 1860, sang at Winter Garden with Fabbri, Gazia, and Fressolini, and in 1861, when Adelina Patti sang Violetta in "Traviata" for the first time, he took the part of Alfredo. He went to Mexico in 1863, and after the civil war made a tour through the southern states as first tenor of an opera company. He then settled in New York as a teacher of the Italian style of singing. His most famous pupils are Minnie Hauck, Miss Thursby, Mme. Durand, and Stella Bonheur.

ERRÁZURIZ, Federico (er-rah'-thu-rith), Chilian statesman, b. in Santiago, Chili, 27 March, 1825; d. there, 20 July, 1877. He studied law in

the University of Chili, was made a deputy at an early age, and took some part in the parliamentary debates. In 1860 he was made chief of the province of Santiago, and introduced many reforms. In 1862, during Perez's administration, he became secretary of justice and of public instruction; and in 1865, during the war with Spain, he was secretary of war and the navy. In 1871 Errazuriz became president of the republic of Chili, and, while in the discharge of this office, introduced liberal reforms of great importance to the country, tending toward the secularization of public instruction and freedom of worship. He amended the constitution of 1833 by means of a law which was very much discussed in congress, abolished ecclesiastical privileges, and built several railways in the northern and southern parts of the country. He also organized several exhibitions of industry and art, the most important being the "Exposición Universal" of 1875, held in a magnificent palace built in the "Quinta Normal de Agricultura" expressly for that purpose. Errazuriz improved the navy by adding to it the two steel men-of-war "Cochrane" and "Blanco Encalada." He also improved the condition of the army, and contributed greatly to the material progress and welfare of his country. He died soon after retiring from office.

ERRETT, Russell, journalist, b. in New York in 1817. In 1829 he removed to Pittsburgh, Pa., where he adopted journalism as a profession. He has been repeatedly elected to the legislature of that state. In 1861 he was appointed paymaster in the U. S. army, and served in that office till the close of the civil war. He was a state senator in 1867, assessor of internal revenue in 1869–'73, and clerk of the state senate in 1860–'1 and 1872–'6. He was elected a representative in congress in 1876 as a Republican, and served in 1877–'83.—His brother, **Isaac,** clergyman, b. in New York city, 2 Jan., 1820. His parents were among the earliest converts of Alexander Campbell, and he became a preacher of the Christian denomination in 1840. He has held pastorates in Pittsburg, Pa., New Lisbon, Warren, and North Bloomfield, Ohio, Detroit, Muir, and Ionia, Mich., and in Chicago, Ill. He had been associated with Alexander Campbell in the editorship of the "Millennial Harbinger," and in 1866 he began the publication of "The Christian Standard" in Cleveland. He was elected president of Alliance college in 1868, but, finding that his journal did not succeed in Alliance, Ohio, he resigned his office, and in 1868 established himself in Cincinnati, where he has since continued the publication of the "Christian Standard," now the foremost weekly periodical of his church. He received the degree of LL. D. from Butler university in 1886, was corresponding secretary of the Ohio Christian missionary society from 1853 till 1856, and president from 1867 till 1870. He was also corresponding secretary of the General Christian missionary society from 1857 till 1860, and president from 1874 till 1876, and president of the foreign society from 1875 till 1886. Dr. Errett's books include "Debate on Spiritualism with Joel Tiffany" (1855); "A Brief View of Missions" (1857); "Walks about Jerusalem" (1871); "Talks to Bereans" (1872); "Letters to Young Christians" (1875); "Review of a Tract by Dr. Thomas O. Summers, entitled 'Why I am not a Campbellite'"; "Evenings with the Bible" (2 vols., 1884 and 1887); and numerous pamphlets.

ERSKINE, David Montagu, Baron, diplomat, b. in England in 1776; d. there, 19 March, 1855. He was the son of Thomas Erskine, lord high chancellor of England, and received his education at Eton and Cambridge. He became a barrister at law in 1802, and in 1806 was returned to parliament for Portsmouth. Soon afterward he was sent to the United States as envoy from Great Britain, and continued as such till 1809. For many years he was minister plenipotentiary to the court of Bavaria, and remained there till his withdrawal from active service in 1843. He succeeded to the peerage in 1823.—His wife, **Frances,** b. in Philadelphia, Pa., 28 June, 1781; d. in England, 25 March, 1843, was the daughter of Gen. John Cadwalader, of Philadelphia, and married Lord Erskine in 1799. She was the great-granddaughter of Judge William Moore, of Moore's Hall, Pa., whose niece married the lord high chancellor Erskine, and hence Baron David Montagu Erskine and his wife were cousins. Lady Erskine was distinguished for her graces of character as well as of person, and was one of the most remarkable beauties of her time. The portrait of her by Gilbert Stuart is considered one of his masterpieces. It is worthy of note, as a proof of the regard evinced by Lord Erskine for the United States, that his eldest sons, Thomas Americus and John Cadwalader, each of whom succeeded to the title, were named, the former after Thomas Cadwalader, his wife's brother, who became an officer during the war of 1812, and the latter after his father-in-law, who was distinguished as a general in the American army during the Revolutionary war. The descendants of Lady Erskine, and therefore of a Revolutionary general, include the present Duke of Portland and the son of Lord Archibald Campbell, prospective Duke of Argyll, his eldest brother being childless.

ERSKINE, Ebenezer, clergyman, b. in Ridley Park, Pa., 31 Jan., 1821. He was graduated at Jefferson college in 1843, and at Princeton theological seminary in 1848. In 1849 he was called to the pastorate of Penn church in Philadelphia, and was ordained by the Presbytery of Philadelphia in September of that year. He held this charge till 1851, and was then for six years pastor of the church in Columbia, Pa. He was pastor in Starling, Ill., from 1858 till 1864, and from 1865 till 1869 edited the "Northwestern Presbyterian" in Chicago. In 1870 he was called to the church in Newville, Pa. He was moderator of the synod of Harrisburg, and in 1878 became a director of the Princeton theological seminary.

ERSKINE, Mason, clergyman, b. in New York city, 16 April, 1805; d. there, 14 May, 1851. He was graduated at Dickinson in 1823, while his father, Rev. John M. Erskine, was president of that institution, and studied theology in Baltimore. He was licensed to preach in 1826 by the 2d Presbytery of New York, and in May, 1827, was installed pastor of the Presbyterian church in Schenectady. He was then called to the pastorate of Bleecker street Presbyterian church in New York, and was installed on 10 Sept., 1830. In February, 1836, he became professor of ecclesiastical history in Union theological seminary, New York, and held that chair till 1842. He published several sermons, and after his death a collection of them appeared under the title "A Pastor's Legacy," with a biographical memoir by Rev. William Adams (New York, 1853).

ERSKINE, Robert, scientist, b. in Scotland, 7 Sept., 1735; d. in Ringwood, N. J., 2 Oct., 1780. He was the son of the Rev. Ralph Erskine, of Dunfermline, Scotland, author of "Gospel Songs" and "Scripture Songs," and for his scientific researches was elected a member of the Royal society. He afterward came to this country and became geographer and surveyor-general to the army.

ERSKINE, Sir **William,** British soldier, b. in England in 1728; d. on 9 March, 1795. He entered the Scots greys in 1743, and became a cornet at Fontenoy. In March, 1759, he was made a major in the 15th light dragoons, and served with great credit in Germany; and in 1762 he was promoted to lieutenant-colonel. He was sent to America with the appointment of brigadier-general, and commanded the 7th brigade in the battle of Long Island in 1776. Subsequently he was second in command of Gov. William Tryon's marauding expedition to Danbury, Conn., in April, 1777. He was then made colonel of the 80th regiment, and commanded the eastern district of Long Island during the winter of 1778–'9. He was made a major-general in 1779, lieutenant-general in 1787, and became a baronet in June, 1791. During the campaign in Flanders, in 1793–'5, he was second in command to the Duke of York.

ERVIN, James, lawyer, b. in Williamsburg district, S. C., 17 Oct., 1778; d. near Darlington Court-House, S. C., 7 July, 1841. He was graduated at Brown in 1797, studied law with W. D. James, and was admitted to the bar in Columbia in November, 1800. He was elected to the legislature in the same year, re-elected in 1802, and served until 1804. Meanwhile he had entered on his practice in Pedee county, and was solicitor of the northern judicial district from 1804 till 1816. He was then elected to congress as a supporter of the tariff, and served from 1 Dec., 1817, till 3 March, 1821. Failing health led to his declining a re-election. From 1809 till 1817 he was a member of the board of trustees of the South Carolina college.

ERVING, George W., diplomatist, b. in Boston, Mass., in 1771; d. in New York city in July, 1850. He was a son of George Erving, who, during the Revolutionary war, went to Halifax and thence to London, and sent his son back to the United States after educating him at Oxford. Mr. Erving was made consul at London by President Jefferson, and in 1804 was appointed secretary of legation to Spain, where he remained for six years. In 1811 he was commissioned special minister to Denmark, and charged with the subject of spoliations committed under the Danish flag on the commerce of the United States. From 1814 till 1819 he was United States minister to Spain.

ERWIN, Alexander R., clergyman, b. in Louisiana, 12 Jan., 1820; d. in Huntsville, Ala., 10 Jan., 1860. He was licensed to preach in the Methodist Episcopal church in 1840, and joined the Tennessee conference in 1842. He occupied a high rank in the ministry, presided over the Clarksville female academy and the Huntsville female college, and while stationed in Nashville received the degree of D. D. from Nashville university.

ESCALANTE, Juan (es-cah-lahn'-tay), Spanish soldier, b. in the 15th century; d. in 1519. He was one of the adventurers that accompanied Hernan Cortes in his expedition to Mexico. When Cortes founded Villa Rica de Vera Cruz on the spot where he had disembarked, Escalante was appointed high constable, and discharged the duties of that office in the absence of the general-in-chief. By order of Cortes, he destroyed the ten vessels that formed the Spanish fleet. When Cortes marched to Mexico he left Escalante with 150 men to guard the newly founded city. Shortly after this an Aztec chief, called Quanpopoca, who wished to go to pay homage personally to the Spaniards, obtained from Escalante a guard of four soldiers to protect him from the hostile tribes he would have to encounter. Two of the soldiers were able to reach Vera Cruz, but the others were assassinated. Escalante then set out with fifty Spaniards and some thousands of Indians to take revenge. A battle ensued, in which the Spaniards were victorious, but with the loss of seven men, among them Escalante himself.

ESCALANTE Y COLOMBRES, Manuel, Mexican bishop, b. in Lima, Peru, about the middle of the 17th century; d. in Salvatierra, Mexico, 15 May, 1708. While very young he was taken to New Spain by his father, who had been appointed attorney of the audiencia or supreme court of Mexico. There the boy entered the college of San Ildefonso, finished his studies there, and subsequently became theological doctor, professor, and four times rector of the university. He also filled several other high offices, as vicar-general of the archbishopric, abbot of San Pedro, whose college and hospital he had founded, and in 1700 was appointed bishop of Durango, from which see he was translated to that of Valladolid, Michoacan, in 1704. His charity was so great that he even pawned the episcopal jewels to give alms. He died on his return from a visit to San Luis Potosi.

ESCALERA, Antonio de, Spanish soldier, b. in Toledo, Spain, in 1506; d. in Ciudad Real de Guayra, South America, 6 Sept., 1575. He studied at the University of Salamanca, and in 1534 received holy orders at Seville. In 1541 he sailed for Rio de la Plata with Gov. Alvar Nuñez Cabeza de Vaca, and, enlisting in the army, joined in the campaigns of the conquerors. When difficulties arose between Cabeza de Vaca and the Vizcayan, Irala, Escalera advised Cabeza to compromise, whereupon Irala was appointed second commander, and sent in 1543 against the Guaycuru and Cacove Indians. Meanwhile Escalera had undertaken the conquest of the Xaraye Indians, and for that purpose had built several fortresses in their territory. About that time a terrible famine oppressed the conquerors, but, as Escalera's army was well supplied with provisions, he was able to minister to the wants of Cabeza de Vaca and Irala. In 1544 Escalera was of great service in delivering the Spaniards who had been besieged by the Cacove Indians in a place near Asuncion. On 25 April, 1544, the army rebelled and deposed Cabeza de Vaca, and Escalera was imprisoned for some time by the mutineers. Soon after his release he founded the city of Ciudad Real de Guayra, and in 1569 deposed Alonzo de Riquelme, who was then governor, for preventing the colonists from gathering precious

stones. After Diaz Melgarejo assumed command, Escalera continued in his work of conquest, engaged in a nine months' campaign against the Guarany Indians, founded several forts, and in 1570 returned to Ciudad Real. After that date Escalera retired to the exercise of his ecclesiastical duties, and wrote several memoirs relating to the conquest and the natural products of the country. Previously, in 1556, he had sent to Charles V. a report of Irala's behavior, and one to the prosecutor for the council of Indies. His writings have been published by the Madrid Academy of history.

ESCALONA, Juan (es-cah-lo'-nah), South American soldier, b. in Caracas, Venezuela, in 1768; d. there in 1834. He joined the revolutionists in 1810, and on 5 July, 1811, as president of the federal executive, he declared the independence of Venezuela to the republican soldiers. He assisted in reconquering Venezuela in 1813, and in 1814 defended Valencia till obliged to surrender to Boves, who put citizens and soldiers to death on entering the city. Escalona escaped to Caracas, where he hid himself, but continued to encourage the revolutionists by his writings. He returned to the army in 1820, and filled various civil and military posts till 1826, when he was elected commander-in-chief of Venezuela, relieving Gen. Paez, who had been suspended by order of the senate pending an official investigation. After the restoration of public order in 1827 he resigned his commission, but continued in the service of the government till 1830, when the republic of Colombia was dissolved. After Venezuela had become a separate country he was made prefect of Caracas, and as such was instrumental in suppressing an insurrection in 1831.

ESCALONA Y CALATAYUD, Juan José, South American bishop, b. at Quer, Rioja, Spain, in 1675; d. near Valladolid, Mexico, 23 May, 1737. He studied at the colleges of San Jeronimo, Alcala, and San Bartolome, Salamanca, and subsequently was theological doctor, canon of the cathedral of Calahorra, and chaplain of the royal convent of La Encarnacion of Madrid. Afterward he occupied the see of Caracas, Venezuela, where he remained for a short time, and was translated to that of Valladolid de Michoacan in 1729, where he was noted for his charities. He gave large sums to various churches, finished at his expense the convent of Santa Catalina, built the Episcopal palace and the church of Nuestra Señora de los Urdiales, as well as a part of that of San Jose, and the hospitium of the Guadalupe shrine. He also finished the most costly part of his cathedral, founded a college for girls, and a home for women of good character, made many endowments for poor married women and for nuns, and often distributed clothing among the needy. One of his pastorals is entitled "Instrucción para una vida perfecta."

ESCANDÓN, Antonio (es-can-don'), Mexican capitalist, b. in the city of Mexico, 25 Aug., 1825; d. in Paris, France, 14 Jan., 1882. He began life as a merchant and manufacturer, and afterward became a banker. His thorough knowledge of the trade of his country soon led him to understand the importance of a better communication between the capital and the principal port of entry, Vera Cruz, and he was active in building the railroad between those points. The road was begun in 1861, and opened by President Lerdo de Tejada, 1 Jan., 1873, and is considered one of the triumphs of modern engineering skill. During the empire Escandon accepted the decoration of the order of Guadalupe, and frequented the imperial court, and on the eve of the downfall of Maximilian went to Paris, where he stayed until the beginning of 1877. During his residence there he ordered from the sculptor Charles Cordier a statue of Christopher Columbus, which he gave to his native city. The monument is nearly forty feet high; the statue itself represents Columbus with one hand outstretched, while with the other he lifts a veil, uncovering a world.

On the four corners of the pedestal are seated four monks—Diego de Dieza, turning the leaves of the Bible to see if it contains any text opposed to the mariner's idea; Juan Perez de Marchena, studying a chart and measuring with compasses the distance between Spain and the New World; Bartolome de las Casas, preparing to write the defence of the Indians whom he vainly sought to protect against the cruelty of the conquerors; and Bernardino de Sahagun, holding aloft the cross, before which the Indians are prostrated. The four sides of the pedestal contain bas-reliefs representing scenes from the conquest of America, and the chart used by Columbus. Escandon came to Mexico in 1877 to see this monument unveiled, and returned in 1878 to Paris, where he remained till his death. Escandon built a country house, about 1860, at Tacubaya, the gardens of which are among the finest in America, while the building contains fine collections of natural history.

ESCOBAR, Bartolomé de, Spanish missionary, b. in Seville, Spain, in 1562; d. in Lima, Peru, in 1624. He belonged to one of the noblest families in Spain, and had immense possessions, which he employed in works of charity. His religious zeal led him to the West Indies, where he became a Jesuit and lived seventeen years. He afterward went to Lima, Peru, where he spent the three years preceding his death. His works are "Conciones de Christi testamento" (Lyons, 1617); "De Festis Domini" (Paris, 1624); "Super omnes Beatae Virginis festivitates" (1624); and "De la Concepcion de Nuestra Señora" (Oviedo, 1622).

ESCOBAR, María de (es-co-bar'), Spanish colonist, b. in Truxillo about the end of the 15th or the beginning of the 16th century; d. in Cuzco, Peru, about 1560. She was the wife of Diego de Chaves, one of the companions of Pizarro, and one of the few officers who had the courage to protest against the execution of Atahualpa in 1533. María followed her husband to Peru, shared the fatigues and dangers of the Spaniards, and introduced the cultivation of wheat and barley into the conquered country. The first experiment was tried on a small scale near Cuzco with a few grains brought by her from Spain, and in a few years there was sufficient grain to furnish seed for all the colonists of the different provinces. María

taught the Indians personally how to cultivate the grain, and after the death of her husband in Lima, about 1540, Pizarro granted her a fine piece of land near Lima, together with the Indians upon it. The grateful colonists resolved to clear the land and cultivate it for her during ten years, but it seems that they soon forgot their promise, as Maria is said to have died very poor in Cuzco.

ESCOBAR, Pedro Suárez de, Spanish theologian, b. in Medellin, Spain; d. in Tlayacapan, Mexico, in 1591. He belonged to the order of St. Augustine, which he entered at the age of thirteen in Mexico. After having mastered the Mexican language, he devoted himself to preaching the gospel to the Indians, and was successively first theologian of the cathedral of that city, professor of the Scriptures in the university, prefect of his province, prior of several convents, and bishop of Guadalajara. His works include "Escala del Paraíso celestial," "Silva de la perfección evangélica," "Relox de príncipes," and "Sermones de los evangelios de todo el año" (4 vols., Madrid, 1601).

ESCOBEDO, Mariano, Mexican soldier, b. in Dos Arroyos, Galeana, state of New Leon, in January, 1828. He was of humble parentage, and as soon as his age permitted he became a muleteer. At that time Mexico had no railroads, and scarcely any good highways, but merely mountain-paths, especially near the Texas frontier, where the muleteers were at the same time traders and smugglers. Escobedo was in charge of a string of pack mules belonging to his father when the war with the United States began; and when Gen. Zachary Taylor marched against Mexico, crossing the river Nueces, Escobedo converted his muleteers into partisans, and attacked the American forces wherever he could meet them in small bodies. He also took part in the fight at the Cañon de Santa Rosa, and in the battles of Palo Alto and Resaca de Guerrero, and in the rest of the campaign in the northern states. After the peace of Guadalupe Hidalgo, in 1848, Escobedo retired again to his former life in the country; but when, in 1854, the revolution of the "Plan de Ayutla" broke out, he offered his services to the Liberal party, was appointed captain of a company, and, together with Geronimo Treviño, Francisco Naranjo, and Diodoro Corella, who afterward became notorious, contributed, in 1855, to the defeat of Guitian at Saltillo, and of Parrodi in Morterillos. His name first became known during the three years' war called the "war of the reform," when he again fought for the Liberal party against the forces of Miramon. Juarez appointed him colonel in 1859, and he contributed to the defeat of Miramon at Atentique, after which he continued in the campaign till the victory of Calpulalpan, 22 Dec., 1860. After the departure of Miramon for Europe, and the establishment of the government of Juarez in the city of Mexico, 11 Jan., 1861, Escobedo, with the rank of brigadier-general, was sent against the remnant of the church party under Marquez and Mejia, but he was surprised in the town of Rio Verde, and taken prisoner after a heroic defence. Marquez ordered him to be shot, but he was saved by Mejia, and kept prisoner at Bucareli, whence he afterward escaped, and, travelling on foot to Huichapan, offered his services again to the government of Juarez. After the intervention of Napoleon III. in Mexican affairs, Escobedo participated in the repulse of the French under Laurenzec at Puebla, 5 May, 1862, and the less fortunate Mexican attack at the Cerro del Borrego hill, near Orizava. After the re-enforcement of the French under Forey, and their renewed advance upon Puebla, Escobedo, under special orders from Juarez, organized forces for the succor of that city, spending part of his private fortune in this undertaking, and entered Puebla before it was surrounded by the French army. He took part in the protracted defence of the city, and when it was captured, 17 May, 1863, he was taken prisoner, but escaped from Orizava and joined Juarez again in the capital. When the president with his cabinet abandoned the city before the advancing French, Escobedo accompanied him as far as Zacatecas, but afterward joined Felipe Berriozabal and Nicolas Regules in their resistance to the invaders. When the empire was established, in June, 1864, Escobedo was obliged to give up the struggle, which he had continued in the states of Tamaulipas and Nuevo Leon, together with Hinojosa and Cortina. He passed into Texas, and fixed his residence in San Antonio, where he continued his exertions for the republican cause. With special authority from Juarez, he went to New Orleans in the middle of 1865, secretly purchased arms and ammunition, and organized, after his return to San Antonio, a force consisting of American negroes, ex-Confederate soldiers, and Mexican refugees, which he led into Mexico. In November, 1865, he surprised and captured the imperial garrison of Monterey, and from that time the fortunes of the republic in the northern states took a favorable turn. Escobedo's forces were rapidly augmenting by the enrolment of the dispersed republicans, and in March, 1866, he was able to begin offensive operations toward the interior. In June, 1866, he captured Saltillo after a short resistance, and in July of the same year Juarez established his government in that city. Escobedo was appointed general-in-chief of the army of the north; and as the French troops retired from the northern states in their march of concentration toward Vera Cruz, Escobedo captured the principal cities successively from the remaining imperial forces. In September, Escobedo marched toward Guanajuato, establishing his headquarters in Celaya, where his forces were joined by those of Corona and Eulogio Parras from the north, and Huerta and Regules from Michoacan, while Juarez established his government in Zacatecas. In November his army numbered 15,000 men, and with this force he marched, in December, on San Luis Potosi. Alarmed by the rapid successes of Escobedo, the emperor despatched Miramon and Castillo at the head of two bodies of troops, the latter toward San Luis Potosi, the former, with 4,000 men, to Zacatecas. Miramon rapidly occupied Aguas Calientes, and surprised Zacatecas, where Juarez with his cabinet barely escaped falling into his hands. He immediately evacuated the town, and on his march to join Castillo he was attacked, on 1 Feb., 1867, by Escobedo's forces at San Jacinto and completely routed, with the loss of nearly 2,000 dead and wounded. His artillery and ammunition were captured, together with 100 prisoners. Miramon's brother Joaquin was also taken and shot, together with ninety-three

M Escobedo

prisoners, as a reprisal for the execution of Mexican officers after the imperial decree of 3 Oct., 1865, declaring republicans under arms outlaws. For this victory Escobedo was promoted to general of division, and appointed commander-in-chief of all the republican armies. Juarez established his government in San Luis de Potosi, and ordered Escobedo to advance on Queretaro, where the rest of the dispersed troops of Miramon had joined the imperial army, consisting of more than 8,000 picked men. After an obstinate fight on the heights of San Gregorio, Escobedo, with an army of over 20,000 men, surrounded Queretaro in the beginning of March, establishing intrenchments and batteries on the hills of Cimatario and Cuesta-China, and on 12 March a regular siege began, which lasted till 15 May, when, after a vigorous assault, the city was taken, as is generally believed, by treachery of Col. Miguel Lopez, the chief of the emperor's body-guard. The emperor, together with Mejia and Severo del Castillo, was taken prisoner, and, on surrendering his sword, offered his word of honor to Escobedo to leave the country immediately if conducted to the nearest port by an escort; but Escobedo refused to grant him this liberty, under express orders from Juarez. It is said that he had previously refused brilliant offers that were made to him by European princes to allow Maximilian to escape from Queretaro. A court-martial was instituted at Queretaro by Juarez's order, and the emperor was condemned and executed. At the end of June, Escobedo left for the city of Mexico, but after the re-establishment of the republican government in the capital he retired to his country seat, where he remained, except during a short service in 1868 against the revolutionists of Sinaloa, till Lerdo de Tejada assumed the presidency in 1873. When a revolutionary movement, encouraged by the church party, broke out toward the end of that year in Michoacan, Escobedo was sent to quell it, and succeeded in doing so in November, 1874. In 1875 he was appointed commander-in-chief of the frontier department of the east, when the rising of Gen. Diaz broke out. Escobedo, by order of the secretary of war, Mejia, delivered his command to Gen. Corona, but the latter did not succeed in quelling the movement, which culminated in February, 1876, in the "Plan de Tuxtepec." Lerdo de Tejada then removed Mejia and appointed Escobedo secretary of war. Notwithstanding that the army was filled with sedition, Escobedo took the most active measures, sending Gen. Alatorre with a strong force to the eastern and Gen. Ceballos to the western states, but they were unable to stem the tide; and when the revolution was triumphant at Los Llanos de Tecoac, and Lerdo resolved to abandon the capital, Escobedo collected the garrison and a troop of rural guards, and with them, on 26 Nov., protected the departure of the president and his ministers toward the Pacific coast, as the roads to the Gulf were intercepted. After several days the party was surprised and captured by a bandit, Pioquinto Huato, of Diaz's party, and only released on payment of a ransom of $30,000. After this they reached Acapulco in safety, and proceeded thence to New York. Escobedo remained there till February, 1878, when he went to San Antonio, Texas, and published a manifesto, proposing the overthrow of Diaz and the reinstallation of Lerdo. This document was signed by Cols. Winter, Monroy, and Cristo, who, passing the frontier, invaded Mexican territory. But the authorities took active measures, and when Escobedo ventured personally to enter Mexico, he was arrested at Lampazos and sent as a prisoner to the capital. He was tried by a court-martial, but, notwithstanding the exertions of the government, was declared not guilty, and again retired to his estate in San Luis Potosi. Fearing attempts on his life, he came to the capital, where, although at liberty in his residence, he was continuously under espionage, and, in fact, a prisoner, being forced to present himself frequently to the authorities. To escape these persecutions, he obtained a medical certificate, and, under pretext of restoring his health, came to New York toward the end of 1879, but in August, 1880, returned to Mexico and accepted an office from the government. This action was a surprise, as shortly before this he had been planning a new conspiracy against Diaz, and had compromised many persons. In 1882 Gonzalez appointed him president of the supreme military court of justice, and, after holding this office till 1883, he retired finally into private life.

ESCOBEDO Y AGUILAR, Pedro José Alcantara, Mexican physician, b. at Queretaro, 19 Oct., 1798; d. in Jalapa, 28 Jan., 1844. He was graduated at the University of Mexico, and studied medicine there at the National school of surgery, and at the San Andres hospital. He was one of the founders of the Academy of practical medicine, and occupied the special chair of surgery there in 1826–'8. In 1832 he joined the medical staff of the military canton established at Jalapa, and rendered valuable services. In 1833 he returned to the capital, and was appointed professor of surgery at the College of medical sciences, and was afterward its vice-director. In 1844 he labored to improve the institution under his direction, established boards of health, and, with a credit which he obtained from the government, facilitated the printing of the "Farmacopea Mexicana." He spent his salary in books and instruments for the college of medicine, in which he took great interest. Dr. Escobedo was for some time in congress, and was a member of learned societies in Mexico and Europe. He was the author of many treatises and articles on medicine.

ESCOBEDO Y ALARCÓN, Jorge, Spanish jurist, b. in Jaen, Spain, in February, 1748; d. in Madrid in March, 1806. He entered the college of Cuenca in 1762, and afterward studied law at Salamanca, where, in 1769, he occupied the chair of moral philosophy. In 1776 he was sent to Peru by the king as judge of the superior court of Charcas. Afterward he was appointed political and military governor of Potosi, and was superintendent of the mint, the bank, the mines, the taxes, and of the royal treasury. In 1779 he incorporated the government bank of purchases and barter, which, under Escobedo's direction, yielded a large revenue to the exchequer, and provided for the wants of the miners. He defended Potosi during the Revolution of 1780, organizing the troops in that city, and ordering the casting of cannon and the manufacture of arms. He was then appointed criminal judge of the supreme court of Lima, and in 1782 Charles III. made him inspector of the courts of justice and royal treasury of the vice-royalties of Lima and Buenos Ayres, and superintendent subdelegate of the treasury of Peru, with the same honorary rank in the council of the Indies. He was also appointed political governor of Lima, and from 1785 till 1787 presided over the city corporation. In that period he founded the superior junta of the treasury, of which he was president. In all these public offices he introduced many reforms, and at the same time co-operated in the pacification of Peru. In February, 1788, he returned to Spain, and soon afterward was elected president of the supreme council of the Indies. Escobedo

was the author of "Sobre el trabajo de minas, beneficio de metales y medios de fomentarlos," "Instrucción de Revistas," "Para la aprobación de matrículas y cobranza de tributos," and "Sobre los antiguos repartimientos de los corregidores y arbitrios para socorrer á los indios sin aquel gravamen." Besides these, which were all published in Lima in 1774, Escobedo wrote memoirs on the government of Peru, which were afterward published in Madrid.

ESCUDERO, José A. (es-koo-day'-ro), Mexican jurist, b. at Panal de Hidalgo, 22 June, 1801; d. in Chihuahua, 3 May, 1862. He received his education in his native town, and in 1825 was appointed chief clerk of the secretary of state of Chihuahua. He afterward became supernumerary member of the supreme court, and magistrate of the same body. After receiving his degree at Guanajuato, he was admitted to the bar in the city of Mexico, and was appointed judge for the district of Chihuahua, which office he held for ten years. He represented his native city in five state legislatures, was twice elected to congress, and was afterward prosecutor to the supreme military court. Escudero was a member of congress in 1847, a year of severe trials for Mexico, and he distinguished himself by his patriotism. He was the author of some economic studies on the general history of various states of Mexico. His principal works are "Conducta del jefe político de Chihuahua"; "Manual del Cultivador"; "Manual del Viñador"; "Ordenanzas de tierras y aguas"; and "Recopilación de los decretos y órdenes del rey D. Fernando VII."

ESGLIS, Louis Philip Mariaucheau d', Canadian R. C. bishop, b. in Canada, 5 April, 1710; d. in L'Île d'Orleans, Canada, 4 June, 1788. His name was submitted to the court of Rome by the Canadian government as its choice for coadjutor bishop of Quebec in 1770. He had been previously parish priest of L'Île d'Orleans for seventeen years. He was a man of weak intellect and timid character, and it was supposed by the Canadian clergy that the object of the governor-general in selecting him for the office was to weaken the church. Their resistance, however, and that of the titular bishop, Briand, was feeble. He was consecrated in 1772 under the title of bishop of Dorylea *in partibus*. Immediately after his consecration he was sent back to his parish by Bishop Briand, who refused to admit him to any share in the government of the diocese. But in 1774, at the request of the governor-general, he recognized him as coadjutor of Quebec, and assigned him a revenue suitable to his rank. In 1784 the resignation of his predecessor made him bishop of Quebec. The priests of his diocese, who were persuaded of his unfitness for the office, asked him to name a coadjutor, which he did, and then retired to the presbytery of Saint Peter in L'Île d'Orleans, where he resided until his death.

ESHLEMAN, Isaac Stauffer, physician, b. in Lancaster county, Pa., 22 May, 1820. He was graduated at Jefferson college, Philadelphia, in 1851, and began practice at once in that city. He claims to be among the first to use stimulants in pneumonia, and also to have proved that blisters are not revellents, but stimulants. He found that cerebro-spinal meningitis yielded to free depletion if made use of early in the stage, and followed by chloroform taken internally. This experience prepared him for the use of chloral, which he has successfully prescribed in every form of convulsion. In 1866 he used with success a narrow-blade forceps for rigid os uteri, having failed with the usual remedies, and without an unpleasant symptom the delivery took place. He claims that fractures which involve the joints where the callus is washed by synovial fluids are capable of forming good bony union if well adjusted and kept in apposition for a much longer period than usual. Dr. Eshleman is the author of papers showing originality of practice in placenta previa. Of this, Dr. Davis, of Wilkesbarre, in an address said: "Dr. Eshleman has opened a new era in the treatment of placenta previa." He is vice-president of the Philadelphia county medical society, member of the Northern medical society, and president of the Medico-chirurgical society of Philadelphia.

ESLABA, Sebastian (es-lah'-bah), Spanish soldier, b. in Eguiller, Spain, in February, 1698; d. in Madrid in January, 1759. In 1723 he served with distinction as captain of the Spanish guards, and as colonel of the regiments of "Asturias" and "Castilla" he took part in nearly all the battles of the second reign of Philip V., reaching the rank of lieutenant general in 1738. At the beginning of the war between England and Spain in 1740, Eslaba was appointed viceroy of New Granada, and immediately after his arrival set to work to repair the old fortifications of Carthagena and Portobello, and to build new ones. Early in November the most powerful British fleet that had ever been sent to South America appeared before Carthagena, under command of Sir Edward Vernon, and on 5 Nov. the bombardment began. Notwithstanding that Sir Edward made continuous attacks by land and sea on Carthagena during the prolonged siege, the splendid fortifications withstood the bombardment, and repeated assaults were repulsed by Eslaba, till, in May, 1741, the British were forced to raise the siege with the loss of seventeen ships. As a recompense for his services, Eslaba was promoted captain-general of the army, and in 1743 was made viceroy of Peru, but did not go to fill this place, as he was called to Spain early in 1744 to become minister of war, and held the office for several years. The splendid fortifications of Carthagena, built under his personal inspection, exist to this day nearly intact. After his death, in 1760, Charles III., in memory of his brilliant defence of Carthagena, raised his son, Col. Gaspar Eslaba, to the peerage of Castilla, under the title of "Marquis of the Royal Defence."

ESLING, Catherine Harbeson, poet, b. in Philadelphia, Pa., 12 April, 1812. She contributed to the press for many years under her maiden name of Waterman, and in 1840 married George J. Esling, a captain in the mercantile marine, with whom she lived in Rio de Janeiro for four years before his death. She has published "The Broken Bracelet, and other Poems" (Philadelphia, 1850).

ESLING, Charles Henry Augustine, author, b. in Philadelphia, Pa., in 1845. He was educated in St. Joseph's college, Philadelphia, and Georgetown college, D. C., and was admitted to the bar in 1869. He was invited to act as representative of the Catholic laity of the United States at the Vatican on the celebration of the golden jubilee of Pius IX., in 1877, and on his return was successful as a lecturer. He has contributed articles to the "Catholic Record," and other magazines dealing with the religious questions of the day, and has published the "Life of Saint Germaine Cousin, the Shepherdess of Pibrac"; metrical translations from the hymns of the "Roman Missal and Breviary"; and several poems, religious and secular, the longest being "The King's Ring, a Legend of Merry England."

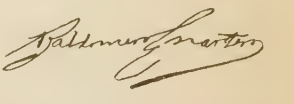
ESMENARD, Joseph Alphonse, French poet, b. at Pelissane, France, in 1770; d. near Fondi, Italy, in 1811. He was elected deputy to the national assembly in 1790, and soon became noted

as a royalist writer in the public papers, for which reason he was banished in 1792. In 1797 he returned to France, but was exiled again, and was not allowed to return till 1799. In 1801 he was appointed secretary to Gen. Leclerc, brother-in-law of Napoleon Bonaparte, whom he accompanied in his expedition to Santo Domingo, and remained there after Leclerc's death. On his return to Paris he was appointed censor of the theatres and libraries, afterward chief of a department in the ministry of police, and in 1810 he became a member of the Academy of sciences. He published a didactic poem of eight cantos, "La Navigation," containing exact descriptions of the scenery of tropical seas and the landscapes of Santo Domingo (Paris, 1805); and also wrote the text for the opera of "Trajanus," by Lesueur (1807), and that of "Hernan Cortéz," by Spontini (1809). A satire against the Russian emperor, Alexander I. (1811), caused his banishment to Italy, but he was recalled after three months, and was killed while returning.

ESPADA, Juan J. Díaz y Landa (es-pah'-dah), Cuban bishop, b. in Alava, Spain, 20 April, 1756; d. in Havana, 13 Aug., 1832. He studied at the University of Salamanca, where he received sacred orders. He was appointed bishop of Havana in January, 1800, but did not assume his office till 26 Feb., 1802. During thirty years Bishop Espada contributed actively toward the progress and welfare of the island. In 1804 he caused a vast public cemetery to be laid out in Havana, the first one ever established in the island, and it was subsequently named after him. In 1804–'6 other cities and towns of Cuba were also provided with cemeteries, abolishing forever the old and unhealthy custom of burying in the churches or near them. During the first decade of the century Bishop Espada encouraged vaccination, which had been introduced in the island in 1801, endowed many public schools out of his own revenues, founded in 1827 an asylum for the insane, and paid much attention to the improvement of the morals of the clergy. He was indefatigable in his efforts to promote public instruction, and introduced many useful reforms in the Theological seminary of San Carlos, and in the University of Havana, where he created several new cathedras. In 1833 a memorial of Bishop Espada was published, to which the best writers of Cuba contributed. In 1880 his remains were transferred, with great pomp and solemnity, from their old resting-place to the new cemetery near Havana, where a fine monument has been erected to his memory. A street in Havana bears his name.

ESPADERO, Nicolás Ruíz (es-pah-day'-ro), Cuban musical composer, b. in Havana, Cuba, in 1833. He was a friend of Gottschalk and of Fontana, and acquired a remarkable mastery of the piano. Gottschalk says of Espadero: "He has written with such a freshness of melody, an elegance of harmony, a sonority and knowledge of the piano, that a prominent place is insured for him among the multitude of modern composers." In 1876 Espadero was commissioned to collect and classify the unpublished works of Gottschalk. Among his principal productions are "La chute des feuilles," "La Plainte du Poéte," "Sur la tombe de Gottschalk," "Chant de l'âme," "Ossian," "La plainte de l'esclave," "Grand Sonate," "Ave Maria," besides many barcarolles, nocturnes, and songs. See "Biographie universelle des musiciens" (Paris, 1881).

ESPARTERO, Baldomero (es-par-tay'-ro), Spanish soldier, b. in Granatula, Ciudad Real, 27 Oct., 1793; d. in Logroño, Spain, 8 Jan., 1879. He was the son of a peasant, and destined for the church; enlisted as a soldier in 1809, and took part against the French in the battle of Ocaña on 19 Nov. of that year. Afterward he entered the military academy of Isla de Leon, where he was graduated, 12 Jan., 1812, as ensign of engineers, but, failing to pass subsequent examinations, was transferred to the infantry, and took part in the blockade of Tortosa in 1813. In February, 1815, Espartero sailed from Spain, as lieutenant of the regiment of Estremadura, in the expedition against Colombia under Gen. Pablo Murillo. He was ordered to Peru, promoted captain in January, 1816, and afterward, in command of a company of sappers, took an active part in numerous encounters with the guerilla chiefs of the insurgents. He participated in the expedition of the Laguna and the defence of Chuquisaca, 10 and 11 Feb., 1816, and on 1 Aug., 1817, was promoted major. In 1820, while in temporary command of his battalion, at Oruro, he succeeded, by prompt action and personal valor, in quelling a revolt, and thus prevented this important town, with a large deposit of ammunition and arms from falling into the hands of the republicans. For his behavior on this occasion he was promoted lieutenant-colonel of his battalion, 20 Feb., 1821. He was brevetted colonel, 23 May, 1822, and toward the latter part of the year joined the division of Gen. Valdes, operating in the southern coast-districts against the insurgents under Gen. Alvarado. On 19 Jan., when at the head of his battalion, he was the first to take possession, under the enemy's fire, of the heights of Valdivia, where the bloody battle of Torata was fought. Here Espartero, although repeatedly wounded, sustained himself against superior forces with great bravery. On 21 Jan., notwithstanding his wounds received at Torata, he took an active part with his battalion in the operations of Valde's brigade against the enemy's right wing at Moquegua, and on 1 Feb. was promoted by the viceroy to the full rank of colonel. He afterward took part in Valdes's campaign against the northern provinces, and also in the unlucky battle of Zepita, 20 Aug., 1823. In September, Espartero was promoted to brigadier-general, and soon afterward commissioned by the viceroy, La Serna, to go to Salta for a conference with the Argentine general, Las Heras, respecting an armistice proposed by the Spanish government. On his return, at the end of January, 1824, he was sent to upper Peru to suppress the revolt of Gen. Pedro Olañeta, and on 5 June sailed for Spain, to explain and justify La Serna's conduct in making rapid promotions, which had been the cause of Olañeta's disaffection. He had a long audience with Ferdinand VII., and was so skilful in his representations that all the acts of La Serna were approved, and Espartero himself appointed chief of the general staff of the army of Peru. He arrived in the port of Quilca, 4 May, 1825, after the overthrow of the Spanish dominion



in Peru, and was arrested by the republican authorities, but found means to throw overboard the official correspondence intrusted to him. He was sent as a prisoner to Arequipa, and it was generally believed that he would be shot in reprisal for the execution of republicans, but he was subsequently released, and returned to Spain in 1825. He did not enter active service again till 1830, when he was made chief of the regiment of Soria. He favored the succession of Isabella II. to the throne, and the appointment of Queen Christina as regent, and at the beginning of the civil war, after the death of Ferdinand VII., 29 Sept., 1833, he was made commander-in-chief of the province of Biscay, and afterward lieutenant-general. In his operations against the Carlists he displayed energy and ability, and was appointed general-in-chief of the army of the north, viceroy of Navarre, and captain-general of the Basque provinces. After new victories, early in 1839, he was created a grandee of the first class, with the title of Duke of Victoria and Morella. In August, 1839, he concluded with the Carlist general Maroto the convention of Vergara; Don Carlos left the country, and Cabrera, the only Carlist general remaining in arms, was defeated by Espartero in the same year. Queen Christina endeavored to strengthen her government by placing Espartero at the head of the ministry; and when, in 1841, she was compelled to resign the regency, he was appointed regent by the cortes. During his administration he suppressed various insurrections; but, notwithstanding his energy, a revolutionary junta assembled at Barcelona in 1843, declared that the queen had attained her majority, and, when Narvaez entered Madrid at the head of an army, Espartero was forced to retire to England, where he resided until 1847. He was then restored to his honors, and lived in Logroño in retirement till 1854, when he was placed by Isabella at the head of the ministry, but resigned in July, 1856. After the expulsion of Isabella in 1868 he supported the provisional government, and in 1870 several members of the cortes offered him the crown of Spain, but he declined it on the ground of his great age and want of heirs. He was afterward created prince of Vergara.

ESPEJO, Antonio de (es-pa'-ho), Spanish explorer, b. in Cordova, Spain (some say in London), about the middle of the 16th century. He was a captain of the army in Mexico, when in 1582, after organizing a special force of one hundred horsemen and a corresponding infantry detachment, almost at his own expense, he undertook, in company with Father Bernardino Beltran, a journey in search of the Franciscan missionary Agustin Ruiz. After travelling several days toward the north, he met some natives who had been converted during the expedition of Panfilo de Narvaez to Honda in 1528. The people among whom these lived, the Jumanes, were so far advanced in civilization that they inhabited houses of stone. Shortly afterward he learned that Ruiz had been killed, but pushed on toward the east, and, after marching through a fertile country, reached the territory of the Cunames, whose capital, Cia, possessed "eight public markets; the houses were built of limestone of divers colors, and the inhabitants wore beautiful cloaks of cotton, woven in the country." Five leagues northwest of this he found the Amayes, who had seven cities, and afterward visited the town of the Acomas, situated on an almost perpendicular rock, which had to be ascended by narrow stairs cut in the stone. After journeying eighty leagues farther, he reached the country of the Zunis, where he met three Spaniards who had accompanied the expedition of Vasquez in 1540, and who had lived so long with the Indians that they had almost forgotten their native tongue. Here Father Beltran, with most of the party, left Espejo and returned to Mexico, but he pushed on with but nine followers, and reached the town of Zaguato, whose inhabitants lodged him sumptuously and gave him presents of clothing. He then passed through the land of the Quires, which contained 25,000 inhabitants, and abounded in mines. The natives wore cloaks of cotton or of painted skin, and lived in houses four stories high. The forests abounded in game, the rivers in fish, and in the valleys grew maize, melons, flax, fruit-trees, and vines. But he soon encountered the Tamos, who refused to let him proceed through their territory, and, turning back, he journeyed along a river which he named "Rio de las Vacas," from the cattle on its banks. He reached San Bartolome in 1583, after a journey of nine months. He left a work entitled "Relación del viaje al Nuevo Méjico" (1636).

ESPEJO, Jeronimo, Argentine soldier, b. in Mendoza in 1801. At the age of fifteen he entered the Army of the Andes as a cadet, and fought bravely for the liberty of three republics. In Chili he served in the campaign of the restoration, and took part in the battle of Chacabuco, the siege of Talcahuana, the action and surprise of Cancha Rayada, and the battle of Maypu. In Peru he served under the orders of Gen. San Martin, and took part in the capture of Lima, the siege of Callao, and the actions of Torata and Moquegua. In the Argentine republic he took part in the battle of Ytusaingo and the action of the bridge of Marquez, and afterward fought against Rosas and shared in the battle of Laguna-larga, the action of Rodeo de Chacon, and in the battle of the citadel of Tucuman. He has been decorated with many crosses of military honor, and has published a historical work, "Entrevista de Guayaquil de Bolivar y San Martin" (Buenos Ayres, 1873).

ESPELETA, Antoine Froger (es-pa-la'-ta), Baron, French colonist, b. in Laval, France, in 1676; d. in Patagonia in 1715. His father was a rich merchant, and married a baroness Espeleta, whose title her son inherited. Young Espeleta received a good education, and early showed great aptitude for mechanical science. In 1695, notwithstanding his youth, he was appointed royal engineer of the fleet which at that time was fitting out at Rochelle for the purpose of founding French colonies in South America under command of his cousin, the Count de Gennes. (See Gennes, Count de.) It was by Espeleta's advice that the site for the new colony was fixed at Port Gallant, and in April, 1696, he was left in charge of it with one vessel, seventy-five soldiers, and fifty colonists, while De Gennes sailed in search of supplies. He built a fort and laid out the plan for the new city, which he named Saint Louis, in honor of the king; and when it was evident that he had been abandoned to his fate by De Gennes, he made the colonists promise to continue the building of the city, left the soldiers with them, and, taking only the crew of his vessel, started for Europe. In the West Indian sea he encountered De Gennes's fleet, and sailed with him to Rochelle. As De Gennes was too much occupied with the prizes he had taken to remember the new colony, Espeleta went at once to Paris to solicit assistance and a royal commission, but was unfavorably received, as he was considered a deserter from De Gennes's fleet. For his justification he published "Relation d'un voyage fait en 1695–'6 et '7 aux côtes d'Afrique, détroit de Magellan, Brésil, Cayenne et les Antilles, par une

escadre de vaisseaux du roi, commandés par le comte de Gennes, et de la fondation de la colonie de Saint Louis à la Baie Française, par M. Froger, baron d'Espeleta" (Paris, 1698). This narrative is still highly esteemed on account of its exactitude, and in it the author contradicts the stories regarding the gigantic stature of the Patagonians, which he never found to be above six feet three inches. This publication, as it was not contradicted by De Gennes, turned the tide of public opinion in Espeleta's favor, and the king, toward the end of 1698, made him a knight of Saint Louis, and in January, 1699, lieutenant-general and governor of the colony of Saint Louis, with power to found other French colonies in the South sea. Espeleta sailed again on 11 March, 1700, with 180 soldiers and 340 colonists. On his arrival in Saint Louis he found the colony a prey to famine and at war with the Patagonians. He promptly concluded peace with the Indians, set the colonists to clearing and cultivating the land, and in a few years they became very prosperous, and a new colony was founded at Port Gallant. The vessels which he sent to France laden with colonial produce were twice captured by the British, and Espeleta conducted the third expedition himself. After his return in 1715, hostilities with the Patagonians broke out again, and in one of the encounters Espeleta was killed. His death was the ruin of the colony, and although his deputies continued to hold out for a year, the colonists became disheartened, and, after blowing up the fort, returned to France. Malte Brun says, in his "Geographie générale": "Espeleta's death was a great loss for France, as he certainly would have founded, in the course of time, in South America a vast colonial empire for France, if he had been properly supported by his government."

ESPINOSA, Gaspar de (es-pe-no'-sa), Spanish soldier, b. in Medina del Campo, Valladolid, in 1484; d. in Cuzco, Peru, 14 Feb., 1537. In 1514 he came to Darien with Pedrarias Davila as supreme judge of the expedition, and in that capacity presided at the first trial of Balboa, Davila's predecessor. (See BALBOA, VASCO NUÑEZ DE.) When Pedrarias declared war against an Indian chief called Pocorosa, he ordered Espinosa to leave Acla with an expeditionary force of infantry and cavalry. He attacked a body of 3,000 Indians, and, after an obstinate fight, they fled, frightened by the horses and the blood-hounds that the Spaniards carried. After his victory Espinosa committed many cruelties against the Indian prisoners, and on the arrival of re-enforcements from Pedrarias he invaded the Indian territory still farther, and recovered a great part of the treasure that had been abandoned some time before by Gonzalo de Badajos, amounting to about 80,000 gold castellanos. After defeating an army of 20,000 men with which the native cacique hoped to crush him, and conquering several other tribes, he began his return march to Darien, which he finally reached, with great riches and over 2,000 Indian slaves. Espinosa, preferring the adventurous life of a conqueror to that of a judge, soon started on another expedition, and, according to his assertion, explored many miles of the Pacific coast. On his return to Darien in 1517, he found that Balboa had been imprisoned a second time by Pedrarias, and although he gave it as his opinion that that explorer ought to be pardoned in consideration of his services to the crown, he sentenced the prisoner to death on a written order from Pedrarias. Favored by the military for his generosity, and by the municipality of Darien on account of his success in his expedition, Espinosa was proclaimed deputy governor notwithstanding Pedrarias's strenuous opposition. In the beginning of 1518, Pedrarias, to get rid of Espinosa, sent him with a force of 150 men on an expedition along the coast to recover the rest of the treasure lost by Badajos, in which attempt he was entirely successful. On his return to the isthmus he proceeded with his force to the western gulf to found, by Pedrarias's orders, a city to serve as a base for the expedition to the South Pacific, and toward the latter part of 1518, with the customary formalities, the foundations of the city of Panama were laid. In the same year Lope de Sosa, who was to relieve Pedrarias, arrived in Darien, and with him came Judge Alarconcillo to investigate the administration of the late governor. As Sosa died on the day of his arrival in Darien, the astute Espinosa persuaded Alarconcillo that his authority had expired. Espinosa himself then proceeded with the investigation, and naturally favored Pedrarias, as his own reputation was involved in that of Pedrarias. In the beginning of 1519 Espinosa was sent with two ships to take possession of a group of islands called, by the historian Herrera, Zebaco. Hearing of gold-mines on the mainland, he set sail for the coast, where he met an auxiliary force under Pizarro and De Soto. They were finally forced to retire without finding gold and with heavy losses, but the rest of his expeditions along the coast were more fortunate. The Indian chiefs submitted after a short struggle, and, loaded with booty, his command returned to the coast of the gulf of Parita, where he founded the city of Nata, leaving Francisco Compañon in command. He was recalled to Panama in 1519 by Pedrarias, who wished to visit the new colony himself, and in the same year, together with many other officers from the West India islands, Espinosa reached San Lucar with a fleet of five ships, which carried, as tribute for the crown, over $600,000 in gold, 2,500 marks of pearls, and many other valuables. At court he was received with distinction, more on account of his riches than of his character, and the emperor, Charles V., gave him a coat of arms, emblematic of his exploits in the New World. In 1524 he was commissioned to investigate the administration of the judges of the supreme court of Santo Domingo, and during that time to administer justice in the island together with Judge Zuazo. After finishing the investigation, Espinosa went to Panama to attend to his private affairs. Hernando de Luque, in the compact signed by him with Pizarro and Almagro on 10 March, 1526, seems to have been but a figure-head for Espinosa, who really furnished the $20,000 in gold for the outfit of the first expedition, but who, at that time in office, did not want his name to appear. When therefore Pizarro, in consequence of the general rising of Indians in 1536, asked for auxiliary troops, Espinosa raised a corps of 250 men in Panama; and when, after the return of Almagro from Chili in 1537, the war between the two copartners began, Espinosa accepted a commission from Pizarro to go to Almagro at Cuzco and try to arrange the difficulty. While there he was attacked by the illness of which he died.

ESPINOSA, Juan, South American soldier, b. in Montevideo in 1804; d. in Arenas, Peru, in 1871. He was known as "the soldier of the Andes." Espinosa's family emigrated to Buenos Ayres in 1807. His father was exiled in 1810 by the revolutionists, and the boy remained with his mother till he was twelve years of age, when he enlisted in the troops that left Buenos Ayres in 1816 to fight for the independence of Chili. Espinosa fought at Chacabuco, 12 Feb., 1817, and

Maypu, 5 April, 1818, and was promoted officer of the 8th battalion of Rio de la Plata. In 1820, when sixteen years of age, he followed San Martin in his expedition to Peru, took part in the battles of Rio Bamba, Pichincha, and other encounters, which freed the territory now known as the republic of Ecuador. After this Espinosa was assigned to the battalion Pichincha, of the Colombian division, and in 1823 served in the campaign of Intermedios, in 1824 in the battle of Ayacucho, and after the campaign of Bolivia, in 1825, had reached the rank of lieutenant-colonel of Colombia. After the war of independence Espinosa wished to return to his country, but had no means to make the trip. Bolivar gave him $500, and the custom-house of Arica defrayed his expenses to Valparaiso. He supported himself in Chili for ten years, and in 1841 returned to Lima, and was appointed by Gen. Gamarra rector of the College of Puno. He afterward shared in the campaign of the south as secretary to the commander-in-chief. The government of Marshall Castilla appointed him inspector-general of the army, and in 1857 he was made prefect of Ayacucho, and commander-in-chief of the departments of Ayacucho, Junin, and Huancavelica. As subsecretary of war, Espinosa shared in the encounter of Callao on 2 May, 1866. He left two works, "Herencia española ó caracter de Isabel II.," and "Diccionario republicano."

ESPINOSA, Pedro, Mexican bishop, b. in Tepic, 29 June, 1793; d. in the city of Mexico, 12 Nov., 1866. He completed his studies at the seminary of Guadalajara, and afterward occupied the chair of the Holy Scriptures at the university, where he received the degree of doctor of theology, and was subsequently appointed professor of philosophy and dogmatic theology. He was intrusted with many important ecclesiastical commissions by Cabañas, then bishop of Guadalajara, and on 8 Jan., 1854, was consecrated bishop at the cathedral. He labored hard for the benefit of his diocese, founding schools, printing books, and supplying the wants of the poor. Political disturbances afterward compelled Espinosa to leave the country, and he visited the pope, who received him well, and honored him with several religious titles. After the erection of the separate diocese of Zacatecas, he was consecrated first archbishop of Guadalajara. He died on his way to assume his office.

ESPIVENT, Louis Charles, French corsair, b. in Nantes, France, in 1641; d. in Tobago, West Indies, in December, 1677. He was of noble family, and, when very young, entered the royal navy, which he soon abandoned for the more hazardous life of privateering. In 1659 he went to Saint Christopher, where his relative De Poincy was commanding at that time. Soon afterward he fitted out a small fleet, with which he went on a cruise, and his captures and adventures soon became famous. In 1663 he entered the port of Carthagena by night, and under the guns of the forts captured a galleon that was about to sail. In 1664 Espivent kidnapped the Spanish governor of Santo Domingo, and obliged him to pay a ransom of 25,000 francs. Soon afterward the buccaneers of Santo Domingo chose Espivent as their chief, but the jealousy of Ducasse obliged him to quit the island. In 1667 he went to Guadeloupe, where Gov. Houel appointed him his lieutenant. In that same year he kidnapped M. de Thoisy Patrocle, an envoy of Louis XIV., and exacted a ransom from him. In 1676 he was appointed by Admiral d'Estrées 1st lieutenant on board the frigate "La Gloire." He took part in the recapture of Cayenne, and distinguished himself at the combat of Petit Goave against the Dutch fleet under Binkers. He was killed in the attack on Tobago.

ESPY, James Pollard, meteorologist, b. in Westmoreland county, Pa., 9 May, 1785; d. in Cincinnati, Ohio, 24 Jan., 1860. He was graduated at Transylvania university in 1808, and in the same year became principal of the classical academy in Cumberland. Afterward he studied law, was admitted to the bar, and practised for four years in Xenia, Ohio. In 1817 he accepted a call to the classical department of the Franklin institute, and while in Philadelphia published in the "Journal of the Franklin Institute" his earliest researches in meteorology. After some years of investigation he advanced the theory that every great atmospheric disturbance begins with the uprising of air which has been rarefied by heat. The rising mass dilates, and, as its temperature falls, precipitates vapor in the form of clouds. Owing to the liberation of the latent heat, the dilation continues with the rising till the moisture of the air forming the upward current is practically exhausted. The heavier air flows in beneath, and, finding a diminished pressure above it, rushes upward with constantly increasing violence. The great quantity of aqueous vapor precipitated during this atmospheric disturbance gives rise to heavy rains. The physical principles on which this theory was based were correct, and it is so far supported by observation. It found many adherents, and attracted the attention of scientists abroad. In 1840 he visited Europe, and presented his views before the British association, to whose transactions he contributed papers on "Storms" and on the "Four Fluctuations of the Barometer." A committee of the French academy of sciences examined his theory, and reported favorably on it. During the debate that took place in the academy, Arago said, "France has its Cuvier, England its Newton, America its Espy." However, subsequent researches led to important modifications of his views by the so-called rotary theory which is now generally accepted. Mr. Espy believed that rains could be produced artificially by means of fires sustained long enough to produce a powerful upward current, which would initiate the action as previously described. He petitioned congress and the legislature of Pennsylvania for an appropriation to enable him to perform the experiment, but without success. In 1843 he received an appointment under the war department, enabling him to prosecute his investigations in the Washington observatory, and several volumes of his reports were published. While holding this office he instituted a service of daily bulletins, in conjunction with the newspapers and the telegraph companies, on the condition of the weather in different localities. This constituted the earliest efforts of the weather bureau, which has since developed into an important branch of the war department. Mr. Espy was a member of the American philosophical society, received its Magellanic gold medal in 1836, and in 1841 was elected a corresponding member of the Smithsonian institution. He was sometimes called the "Storm King." He published "Philosophy of Storms" (Boston and London, 1841).

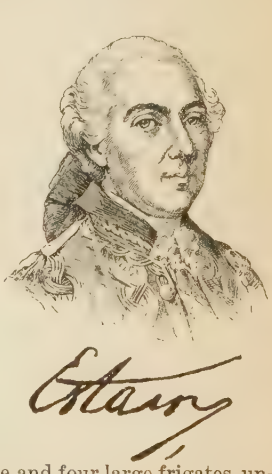
ESQUEMELING, John, buccaneer. He wrote in Dutch an account of the buccaneers of America, which was translated into English (London, 1684). Sir Henry Morgan obtained a verdict of £200 against the publisher for libel.

ESQUIN, Mamertus, South American R. C. bishop, b. in Piedrablanca, South America, in 1826; d. in Cordoba, Argentine Republic, in 1883. He entered the Franciscan order at an early age,

and devoted himself to the study of philosophy and theology, becoming distinguished as a professor and preacher. His learning procured for him among his countrymen the title of "Lacordaire of America." He was so abashed by the praises that he received, that he retired among the natives and labored among them for some years. He was sought out and nominated to the bishopric of Parana, but declined it, and retired to the missionary college of Tarija, in Bolivia, whence he was summoned by the archbishop, who made him professor of theology in the college of Sucre. Here he also edited a literary and philosophical journal, "El Cruzado," his articles in which attracted attention throughout Spanish America. His reputation led to his nomination as archbishop by the authorities of Buenos Ayres. He again declined, but fearing that he might be compelled to assume the office, he concealed himself, with the consent of his superiors, in different monasteries in Peru until it was filled by another. He then returned to his missionary college of Tarija. In 1875 he sailed for Europe to visit the Holy Land. While in Palestine the see of Cordoba became vacant, and he was ordered by the pope to return to South America and assume its duties. He entered Cordoba barefoot, in his Franciscan habit, and, after his consecration, continued to travel as a missionary from town to town throughout his diocese. He acted successfully as a peacemaker in the civil wars, and it was on the occasion of a journey in the heat of summer, to restore peace at Rioxa, that he fell sick and died by the road-side.

ESQUIVEL, Juan de (es-ke-vel'), Spanish adventurer, b. in Spain about 1480; d. in Jamaica about 1519. In 1502, when Ovando was appointed to succeed Bobadilla as governor of Hispaniola, Esquivel went to the island as one of his lieutenants. In 1504 Ovando sent him, at the head of 400 men, to subjugate the province of Higuey, which had revolted under the leadership of the famous cacique, Cotabanama. The Indians were defeated and driven to the mountains, but there was soon another insurrection, and Esquivel was again sent by Ovando to subdue the province. This was done after much bloodshed and the capture of the cacique, after which Esquivel founded, in 1505, the town of Santa Cruz del Seybo, which was afterward destroyed in the middle of the 18th century by an earthquake. Diego Columbus sent Esquivel, in 1509, with seventy men, to take possession of the island of Jamaica on his behalf. In 1509 he reduced it easily, and, in further obedience to his instructions, began a colony and founded the seat of government on the spot where Christopher Columbus had been shipwrecked in 1503, and named it Sevilla Nueva. The Indians betook themselves to the mountains, and stood on their defence; but Esquivel, after several engagements, found means at length to cut off the chiefs. The rest submitted, and were employed in planting cotton and grain. Esquivel introduced a Spanish breed of cattle, hogs, and horses, and several kinds of garden-stuff were cultivated. By the moderation of his government he soon won the Indians into subjection. This commander has been highly extolled for prudent and temperate behavior. The exportation from his colony about the year 1514 had grown to be considerable, and it furnished copious supplies of provisions to the Spaniards of the continent and the neighboring islands. Unfortunately, his rule was short. In the space of ten years, five vessels had been fitted out under his direction, and two new towns were established, which he named Oristan and Melilla.

ESTAING, Charles Hector Theodat, Count d', French naval officer, b. in Ruvel, Auvergne, France, in 1729; d. in Paris, 28 April, 1794. At the age of sixteen he entered the Mousquetaires, became colonel of the regiment Rouergue in 1748, and brigadier in 1756. In 1757 he served in the fleet of Count d'Aché, and in 1758 took Gondeleur and Fort St. David. He then joined the East Indian squadron under Count Lally, and was made prisoner at Madras in 1759, but was released on parole. After this he joined the navy, was given command of two men-of-war, and inflicted great damage on the English while in the east, but on his return was captured near L'Orient by British cruisers. He was imprisoned in Portsmouth and subjected to cruel treatment, on the ground that he had broken the parole that he had given in Madras. Admiral Boscawen was then commander-in-chief in India, and often said that, if ever he should get "the villain" in his power again, he "would chain him upon the quarter-deck and treat him like a baboon." D'Estaing seems to have had equally bitter feelings against the English. In 1763 he was made lieutenant-general in the navy, and in 1778 vice-admiral, a rank which he had at first refused. Meanwhile the colonies in America had found an advocate at the French court in the person of Marie Antoinette, who placed in the hands of Louis XVI. a memoir prepared by the Counts de Maillebois and D'Estaing, which censured the timid policy of the king's ministers. After the defeat of Burgoyne, 6 Feb., 1778, a treaty was concluded between the United States and France, and, pursuant to its stipulations, a fleet of twelve ships-of-the-line and four large frigates, under the command of D'Estaing, sailed for America on 13 April, 1778. Early in July D'Estaing reached Delaware bay, and, after landing Conrad A. Gerard, the French ambassador, sailed for New York in hopes of engaging the British fleet, but, being unable to secure a pilot, anchored near the Jersey shore, not far from the mouth of the Shrewsbury river, where he captured several prizes. At the suggestion of Gen. Washington, the French fleet was requested to co-operate with Gen. John Sullivan in the expulsion of the British from Rhode Island. D'Estaing appeared at Newport late in July, and on 5 Aug., 1778, the British burned six frigates in order to prevent their falling into the hands of the French. Events seemed favorable for the capture of the entire British force at Newport, but delays and lack of proper understanding between the two commanders prevented united action. The appearance of the British fleet, and a subsequent storm in which several of the French vessels were seriously injured, led to their withdrawal to Boston for repairs, and the campaign terminated without success. In May, 1779, D'Estaing proposed a joint expedition with his fleet and the American troops to capture Halifax and Newfoundland for the king of France. Washing-



ton could not afford to reduce his army by the required number of troops, and the enterprise was consequently abandoned. Later, D'Estaing sailed to the West Indies, where, after an unsuccessful attempt to take St. Lucia, he captured St. Vincent and Grenada, and also forced the British admiral, Byron—who came to the relief of Grenada—to retire. In September, 1779, with twenty ships-of-the-line and eleven frigates, bearing about 6,000 soldiers, he suddenly appeared off the coast of Georgia. Four British vessels at once fell into his hands, and a plan was arranged with Gen. Benjamin Lincoln for a united attack on the city of Savannah. The lateness of the season, the dangerous coast, and the reported approach of a British fleet, made it necessary for him to insist on immediate action; but unfortunate circumstances, with various delays, made it possible for the British to prepare themselves, and, in consequence, the attack was postponed. Finally, on 9 October, it was decided to carry the town by assault. The Americans and French advanced in three columns, the principal one under the direct command of D'Estaing, assisted by Gen. Lincoln. Early in the engagement the French commander was wounded both in the arm and thigh, and in this condition was carried to his camp. The combined forces failed in carrying the fortifications, and, after severe losses, withdrew. A second attack was urged by Gen. Lincoln, but D'Estaing's loss had been heavy, and he determined on immediate departure, in consequence of which the siege was raised. He returned to France in 1780, and there endeavored to persuade the ministry to send 12,000 men to America as the best way of pursuing the war. Lafayette had given similar advice, and in June, 1780, Count de Rochambeau, with 6,000 men, was sent to the colonies. In 1783 D'Estaing had command of the allied fleets of France and Spain, and was made a grandee of Spain. Subsequently he declared himself in favor of national reforms, and was elected in 1787 to the assembly of notables. In 1789 he was appointed commandant of the National guard, and was chosen admiral in 1792 by the legislative assembly, but was retired soon afterward. He continued to cherish a regard for the royal family, and wrote friendly letters to the queen, which came to the knowledge of the revolutionary authorities, and he was arrested and imprisoned. On the trial of Marie Antoinette he testified in her favor, but without avail. He was himself brought to trial in 1794, and cited his military and naval services to the nation in his defence, but, seeing that his death was determined on, said, "Send my head to the English; they will pay you well for it." D'Estaing wrote a poem, "Le rêve," a tragedy, and a pamphlet, "Aperçu hasardé sur l'exportation dans les colonies; dédié à feu M. Franklin" (Paris, 1790).

ESTAUGH, Elizabeth, colonist, b. in London, England, in 1682; d. in New Jersey in 1762. She was the oldest daughter of John Haddon, a Quaker. During her early youth William Penn visited her father's house, and greatly amused her by talking about the Indians. From that time she became interested in the Quaker emigrants, and early began to talk of visiting the colonies. Her father purchased land in New Jersey, with a view of emigrating, but did not carry out his plan; and when he offered the land to any relative who would settle upon it, Elizabeth at once promptly agreed to accept it. Her parents reluctantly permitted her to embark early in the spring of 1700, accompanied by a friend and housekeeper, and two men-servants, members of the society of Friends. Soon afterward she married John Estaugh, a Quaker preacher, after a courtship in which the first advances were made by herself in the following words: "Friend John, I have a subject of importance on my mind, and one which nearly interests thee. I am strongly impressed that the Lord has sent thee to me as a partner for life." In 1742 her husband went to make a religious visit to Tortola, in the West Indies, where he died. She published a religious tract by him, in which appears a preface entitled "Elizabeth Estaugh's Testimony concerning her Beloved Husband, John Estaugh." Mrs. Estaugh's house became a place of general resort for Friends, and an asylum for benighted travellers. Haddonfield, N. J., was named for her. Her medical skill is so well remembered, that the old nurses of New Jersey are said still to recommend her preparations.

ESTE, David Kirkpatrick, jurist, b. in Morristown, N. J., in October, 1785; d. in Cincinnati, Ohio, 1 April, 1875. He was the son of Capt. Moses Este, of the Continental army, and Ann Kirkpatrick, sister of Chief-Justice Kirkpatrick, of New Jersey. He was graduated at Princeton in 1803, and studied law under difficulties, owing to partial loss of eyesight. He removed to Ohio in 1809, settled in Cincinnati in 1814, and became prominent in his profession. He was associated with Henry Clay as counsel for the Bank of the United States for the Northwest territory, and his practice extended to the U. S. supreme court. In 1834 he was elected president judge of the ninth judicial circuit of Ohio, and in 1838 judge of the superior court of Cincinnati. On the expiration of his term in 1847 he retired to private life. Judge Este was an advocate of much force and skill, and a man of great research. In his long life he was singularly above reproach.

ESTEN, James Christie Palmer, Canadian jurist, b. in St. George, Bermuda, 7 Nov., 1805; d. in Toronto, Canada, 25 Oct., 1864. He was a grandson of a former attorney-general of the Bermudas, and his father was chief-justice of those islands for twenty years. The son was educated at the Charter House school, London, called to the bar in Lincoln's Inn, and practised as a barrister in England. He passed a part of his early life in Virginia, came to Canada in 1836, and on the establishment of the court of chancery there in 1837, became a barrister in it, and in 1849, on the reconstruction of the court, he was constituted one of its judges, and so continued till his death. During his term of office he was never absent from his post, and was acting chancellor for a few years during the illness of Chancellor Blake.

ESTERLY, George, inventor, b. in Plattekill, N. Y., 17 Oct., 1809. He received a common-school education, and in 1837 removed to Wisconsin, where he engaged in wheat-growing. Finding difficulty in securing laborers, he turned his attention to the invention of agricultural machines. He experimented at first with a reaper, and, converting his barn into a machine-shop, produced in 1844 an implement capable of successfully cutting ten acres of wheat in half a day. A year later he built a harvesting machine, and soon began to manufacture various agricultural implements. Subsequently he obtained numerous patents, and his establishment at Whitewater, Wis., has become one of the largest of its kind in the United States. His inventions include steel plows, a self-raking reaper, reaper for harvesting without binding, and an improved broadcast seeder and cultivator. The use of steel in reapers and harvesters is his most important invention, and his machines are now constructed of that metal. Mr. Esterly has written several pamphlets on the currency.

ESTEVEZ Y UGARTE, Pedro Agustín (esta'-veth), Mexican R. C. bishop, b. in Orotava, Canary Islands, 5 March, 1754; d. in Merida, Mexico, 8 May, 1827. He studied theology, philosophy, and literature in a Franciscan convent in his native island, and then entered the College of San Bartolome and Santiago de Granada, where he won a fellowship in jurisprudence for nine years. Shortly afterward he became rector of the college, and professor in the University of Granada. On 15 July, 1775, he received the degree of doctor in canonical law. In 1770 he was ordained as a priest, and became noted for the eloquence of his sermons. For some time he was regent of the seminary of Zamora, and on 27 July, 1796, was appointed by Charles IV. bishop of Yucatan, Mexico. He arrived at Campeche in May, 1802, and immediately set about remodelling the plan of studies in the seminary, increasing its faculty and founding the chairs of Greek and canonical law. When Mexico became independent he accepted the result of the contest unhesitatingly, and, without mixing in politics, preached peace, union, and Christian fraternity. He was the founder of the University of Yucatan, which was finished in 1824.

ESTORGE, Joseph Leonard, physician, b. in Opelousas, La., in 1830; d. there, 21 Aug., 1880. He studied at the royal college of Cahors, France, where he was a classmate of Gambetta. After receiving the degree of M. D., he was pursuing scientific studies in Paris, when the civil war in the United States recalled him to this country. He was appointed a surgeon in the Confederate army in the trans-Mississippi department, but was made a prisoner at Fort de Russey. After the war he practised his profession in St. Landry, and endeared himself to the people by his skill and devotion during the epidemic of 1878.

ESTRADA, Bartolomé Ruíz de, Spanish pilot, lived in the early part of the 16th century. He accompanied Francisco Becerra in the first voyage of exploration he made, by order of Pedrarias Davila. Sailing from Darien with 150 men, he explored the Pacific coast, visited the river Peru, and at the end of six months returned with an immense quantity of gold and pearls. It is also said that it was he who conducted Pizarro and Almagro to the empire of the Inca Atahualpa, which they called Peru, after the river of that name.

ESTRADA, José Dolores (es-trah'-dah), Nicaraguan general, b. in Matagalpa in 1787; d. near Granada, 12 Aug., 1869. Up to his sixty-fourth year he lived quietly in the country, occupied in the cultivation of his estate, but in the civil war of 1851 offered his services to the conservative leader, Fruto Chamorro, and enlisted under the same chief against the democrats in the revolution of 1853. He participated in the nine months' defence of the city of Granada, and was wounded in the battle of 5 Aug., 1854; but notwithstanding, when the enemy raised the siege, Estrada, as second in command, remained for twenty-four hours in the saddle in the pursuit of the retiring army. When the republic was invaded by Walker and his followers in June, 1855 (see WALKER, WILLIAM), Estrada did his best in the defence of his country, and after the capture of Granada, 15 Oct., 1855, he retired with a few followers to the northern department of Chinandega, and continued, with Generals Martinez and Fernando Chamorro, to oppose the forces under Walker's command. After Walker had caused himself to be elected president in June, 1856, and declared war on the rest of the Central American republics, Estrada marched with his little army to join the Costa Ricans, but was intercepted by Walker's forces, and intrenched himself in a favorable position in San Jacinto. Early in the morning of 14 Sept., 1856, his position was stormed by the enemy, who attacked in three columns, and one of his redoubts was taken. After many hours of fierce fighting, Estrada saw that his forces would soon be surrounded, and made a desperate sally at the head of his troops, throwing the enemy into such confusion that they fled, and were pursued as far as Tipitapa. After Walker had been driven from the country, Estrada left the army, and although, on the second invasion of Nicaragua by Walker, in November, 1857, he offered his services again, he refused all honors and offices, and took part in the electoral campaign of 1863 only to avoid the unconstitutional re-election of the last president. When the revolution of 1869 began, Estrada, although eighty-two years old, was appointed commander-in-chief of the army, and defeated the revolutionists in several encounters, but, a few days before the final pacification, he died in consequence of the fatigue that he had undergone. The congress of 1870 ordered a marble monument to be erected on his grave with the inscription "Al general Estrada, vencedor de San Jacinto, el 14 de Setiembre 1866, la patria agradecida."

ETHERIDGE, Emerson, statesman, b. in Carrituck county, N. C., 28 Sept., 1819. When thirteen years of age he removed to Tennessee, received a public-school education, studied law, and was admitted to the bar in 1840. He was a member of the legislature in 1845–'7, and a candidate for speaker, and was then chosen to congress as a Whig, and re-elected as an American, serving from 1853 till 1857. He was the defeated American candidate for the next congress, but was successful in 1858, and served again in 1859–'61, in which session he was chairman of the committee on Indian affairs. He was then elected clerk of the house of representatives, and served from 4 July, 1861, to 8 Dec., 1863. On his return to Tennessee he devoted himself to the practice of his profession and the study of philosophy, served in the Tennessee senate in 1869–'70, and was twice nominated for the governorship of his state, being defeated once and declining the second nomination. He was the last Whig that served in congress. He is the author of "Speeches in Congress" (Washington, 1857).

ETTWEIN, John, Moravian bishop, b. in Trendenstadt, Würtemberg, 29 June, 1721; died in Bethlehem, Pa., 2 Jan., 1802. In 1754 he came to the American colonies, where he labored for nearly half a century as an evangelist, as a pastor, and finally as a bishop of the Moravian church. He was consecrated to the episcopacy on 25 June, 1784. In 1801, owing to the infirmities of old age, he retired from active service. Few men of the last century displayed greater zeal in spreading the gospel through the country of his adoption. He studied the language of the Delaware Indians, prepared a small dictionary and phrase-book thereof, and in 1788 gave an account of their language and traditions, including a vocabulary, since pub-

lished by the Historical society of Pennsylvania. He travelled thousands of miles, often on foot, and preached in eleven of the thirteen original colonies and in what is now the state of Ohio; "in cities," to use his own words, "in villages, in homesteads, from pulpits, in the open air, in courthouses and barns, to many and very different classes of men." He labored frequently among the Indians, and in 1772 led the Christian Indians from the Susquehanna to the Tuscarawas valley of Ohio, a journey of eight weeks, full of hardships and dangers, and ministered with great faithfulness to the sick of the American army, in 1776 and 1777, when the general hospital had been established at Bethlehem. Throughout the Revolutionary war he received, in the name of his church, the many distinguished visitors who flocked to that town, both military officers and statesmen. With some of the latter he became intimate. Henry Laurens, of South Carolina, was his particular friend. On various occasions he corresponded with Washington and negotiated with congress, as the agent of the Moravians. Not the least important act of his life was the founding, in 1787, of the "Society for Propagating the Gospel among the Heathen," which still exists, has a large endowment, and contributes liberal amounts toward the support of the extensive missions of the Moravian church. Ettwein stood at the head of this church as its presiding bishop for seventeen years, displaying sound judgment, great decision of character, and often, amid trying circumstances, a marvellous heroism. He was quick in expressing his opinions, and abrupt in his utterances; but upon closer acquaintance whatever seemed offensive was forgotten.

EUPHEMIA, mother-superior of Sisters of Charity, b. in Dublin, Ireland, 18 April, 1816; d. near Emmettsburg, Md., 18 March, 1887. Her secular name was Catherine Blenkensoff. She emigrated to the United States in early girlhood, and entered the novitiate at St. Joseph's academy, near Emmettsburg, Md. She rapidly rose to be principal teacher in the academy, and was soon afterward transferred to St. Mary's orphan asylum, Baltimore, and appointed mother-superior. She was after several years returned to St. Joseph's, and chosen to the same place in that institution. At the end of the first three years of her direction she was appointed mother-superior of all the Sisters of Charity in the United States. Mother Euphemia, as superior of her order, made a tour through the south in 1886, and arranged for the establishment of two branch houses.

EUSTACE, John Skey, soldier, b. in Flushing, L. I., 10 Aug., 1760; d. in Newburg, N. Y., 25 Aug., 1805. He was graduated at William and Mary in 1776, and in the same year was appointed aide to Gen. Sullivan and Gen. Greene. Congress commissioned him major for his services in capturing the British colonel Burton. After the war he resided in Georgia, where he practised law and became adjutant-general of the state, and held other civil and military offices. In 1794 he entered the French service, was made aide-de-camp to Luckner, and afterward to Dumourier, and attained the grade of major-general and maréchal-de-camp. In 1797 he commanded a division of the French army in Flanders. On his return to his native country in 1800 he led a studious and retired life in Newburg. He was the author of many pamphlets, and an account of his "Exile from Great Britain, by Order of the Duke of Portland" (London, 1797).

EUSTIS, William, governor of Massachusetts, b. in Cambridge, Mass., 10 June, 1753; d. in Boston, Mass., 6 Feb., 1825. He was graduated at Harvard in 1772, studied medicine under Dr. Joseph Warren, and entered the Revolutionary army as a regimental surgeon, serving throughout the war in that capacity, and also as hospital surgeon. For some years he was stationed opposite West Point, at the house of Col. Beverly Robinson, where Arnold had his headquarters. After the close of the war he practised his profession in Boston, and was a surgeon in the expedition against the insurgents in Shays's rebellion in 1786–'7. From 1788 till 1794 he was a member of the Massachusetts legislature, and was for two years councillor under Gov. Sullivan. In 1801–'5 he was a representative in congress, having been chosen as a Democrat, and in 1807 was appointed secretary of war, which office he retained till 19 Jan., 1813. In 1814 he was appointed minister to Holland, where he remained till 1818. After his return to the United States he was again elected to congress to fill a vacancy, and served from 1820 till 1823, when he was chosen governor of Massachusetts, and held that office till his death. The degree of LL. D. was conferred on him by Harvard in 1823.—His nephew, **George,** jurist, b. in Boston, Mass., 20 Oct., 1796; d. in New Orleans, La., 23 Dec., 1858, was graduated at Harvard in 1815. He became private secretary to his uncle, Gov. Eustis, then minister to the Hague, where he began his legal studies. He went to New Orleans in 1817, was admitted to the bar there in 1822, and served several terms in the state legislature. He was afterward secretary of the state, and, as a commissioner of the board of currency, instituted reforms that gave stability to the currency of the state. He was also attorney-general of Louisiana, a member of the Constitutional convention of 1845, and chief-justice of the supreme court till 1852. He received the degree of LL. D. from Harvard in 1859.—Another nephew, **Abraham,** soldier, b. in Petersburg, Va., 28 March, 1786; d. in Portland, Me., 27 June, 1843, was graduated at Harvard in 1804, studied law in the office of his relative, Chief-Justice Parker, was admitted to the bar in 1807, and began practice in Boston. In 1808 he entered the army as captain of artillery, and became major in 1810. During the war of 1812 he served with distinction, and commanded a regiment in the capture of York, Upper Canada, in 1813. He was brevetted lieutenant-colonel for meritorious services in 1813, became lieutenant-colonel of the 4th artillery in 1822, brigadier-general in 1834, and a few months later colonel of the 1st artillery.—George's son, **George,** congressman, b. in New Orleans, La., 28 Sept., 1828; d. in Cannes, France, 15 March, 1872, was educated at Jefferson college, La., and at Harvard law-school. He was elected to Congress as an American, and served from 1855 till 1859. He went to France as secretary of the Confederate legation, and remained there after the civil war. During the Franco-Prussian war he voluntarily gave his services to the U. S. legation in Paris.—Another son, **James Biddle,** senator, b. in New Orleans, 27 Aug., 1834. He received a classical education, was graduated at Harvard law-school in 1854, admitted to the bar in 1856, and practised in New Orleans. When the civil war began he entered the Confederate army, and, after one year's service as judge-advocate on the staff of Gen. Magruder, was transferred to the staff of Gen. Joseph Johnston, with whom he served till the close of the war. He then resumed practice in New Orleans, was elected a member of the legislature prior to the reconstruction acts, and was one of the committee sent to Washington to confer with President Johnson on Louisiana affairs. He was a member

of the state house of representatives in 1872, and was elected a member of the state senate for four years in 1874. He was chosen to the U. S. senate as a Democrat in January, 1876, to fill the vacancy which, it was claimed, existed by failure of the senate to give the seat to P. B. S. Pinchback, who had been elected in 1873. Only three Republicans took part in the election, on the ground that no vacancy existed, and Mr. Eustis was not given his seat till late in 1877, serving till 1879. He then became professor of civil law in the University of Louisiana, but in 1884 was again elected to the U. S. senate for the full term of six years.—Abraham's son, **Henry Lawrence,** engineer, b. at Fort Independence, Boston, Mass., 1 Feb., 1819; d. in Cambridge, Mass., 11 Jan., 1885, was graduated at Harvard in 1838, and in that year was appointed to the U. S. military academy, where he was graduated at the head of his class in 1842. He was then assigned to the engineer corps, and ordered to Washington as assistant to the chief engineer. He assisted in the construction of Fort Warren and Lovell's island sea-wall, in Boston harbor, in 1843–'5, and during the following two years was connected with engineering operations in Newport harbor. In 1847 he was made the principal assistant professor of engineering at West Point, but resigned in 1849 in order to become professor of engineering in Harvard, and organized that department in the Lawrence scientific school there, and held this office until his death. He was dean of the scientific faculty from 1871 till 1885. In the civil war he was colonel of the 10th Massachusetts volunteers, and served at Williamsport, Fredericksburg, Marye Heights, Salem, Gettysburg, Rappahannock Station, Mine Run, Wilderness, Spottsylvania, Cold Harbor, and many minor actions. He was brevetted brigadier-general of volunteers on 12 Sept., 1863, and resigned on 27 June, 1864, owing to impaired health. He returned to his college duties in Cambridge in 1864. He was a member of various learned societies, to whose transactions he contributed papers, and also wrote reports and technical articles.

EVANS, Anthony Walton White, civil engineer, b. in New Brunswick, N. J., 31 Oct., 1817; d. in New York city, 28 Nov., 1886. He received his early education in New Jersey, and then studied civil engineering at the Rensselaer polytechnic institute in Troy. His first professional employment was on the enlargement of the Erie canal, where he served principally on the eastern division. He was made assistant on the survey and construction of the New York and Harlem railway in 1845, and for five years was resident engineer of two divisions of this work. He then accompanied Allan Campbell to Chili, and became his principal assistant in the construction of the Capiapo railroad. Subsequently he entered the employ of the Chilian government as chief engineer in the construction of one of its railroads, and still later was appointed chief engineer of the Arica and Tacua railway company in Peru. After a brief visit to the United States, he returned to Chili, and became chief engineer on several railroads then in course of building under the direction of the government. On the completion of these he came back to the United States and settled in New Rochelle, N. Y., resuming his profession as a consulting engineer, and acting as purchasing agent of rolling-stock and other railway materials for various governments and companies of South and Central America, and the islands of the South sea. Mr. Evans took an active interest in the matter of a ship-canal between the Atlantic and Pacific oceans, and favored the San Blas route. He was a fellow of the American society of civil engineers, and other societies both in the United States and England, to whose proceedings he contributed. In addition to the foregoing, he wrote occasionally for magazines, and furnished reports on the "Preservation of Timber," "Railway Gauges for the British Colonies," and similar subjects, to different governments of the British colonies. By virtue of his descent from Gen. Anthony W. White, he was a member of the Society of the Cincinnati, and he prepared for this organization an illustrated memoir of Kosciusko, which was printed privately (New York, 1883).

EVANS, Augusta Jane, author, b. in Columbus, Ga., 8 May, 1835. When a child she removed with her father to Texas, residing in San Antonio from 1847 till 1849, when the family settled in Mobile, Ala. She was educated almost entirely by her mother. While her parents lived in the frontier town of San Antonio the Mexican war was in progress, and that town was a place of rendezvous for the soldiers sent out to re-enforce Gen. Taylor. She afterward entered a school in Mobile, but delicate health compelled her to leave it. During the civil war Miss Evans was an active, zealous sympathizer with the south, and a benefactor to the soldiers that were stationed near her country home. An encampment a short distance from her residence was named in her honor, "Camp Beulah," and there she was a constant visitor among the sick and the dying. Miss Evans married in 1868 L. M. Wilson, of Mobile. Her novels have become widely popular, especially in the southern states. She is the author of "Inez, a Tale of the Alamo," anonymous (New York, 1856); "Beulah," the novel that established her reputation (1859); "Macaria" (Richmond, 1863); "St. Elmo" (New York, 1866); "Vashti" (1869); and "Infelice" (1875).

EVANS, Caleb, English clergyman, b. in Bristol, England, in 1737; d. in 1791. He was a Baptist clergyman, and received the degree of D. D. Dr. Evans was an advocate of American independence, and published "A Letter to Rev. John Wesley," under the signature "Americanus," on his "Calm Address to the American Colonies" (London, 1775), and a "Reply to Rev. Mr. Fletcher's Vindication of Wesley" (Bristol, 1776).

EVANS, David Reid, lawyer, b. in Westminster, England, 20 Feb., 1769; d. near Winn's Bridge, Fairfield district, S. C., 8 March, 1843. He came to South Carolina with his father in 1784, was educated at Mount Zion college, studied law, and was admitted to the bar in 1796. In 1800 he acted as second to Thomas Baker in a duel with Daniel Brown, in which both the principals were killed. He was a member of the legislature in 1800–'4, was solicitor of the middle judicial circuit in 1804–'11, and was then elected to congress as a Democrat, serving in 1813–'5, and declining a renomination on account of failing health. He was in the state senate in 1818 and 1822, was first president of the Fairfield Bible society, and a ruling elder in the Presbyterian church for thirty years. He bequeathed $8,000 to benevolent societies.

EVANS, De Scott, artist, b. in Boston, Wayne co., Ind., 28 March, 1847. He was at Miami university, Oxford, Ohio, in 1863–'5, studied art by himself, and opened a studio in Cleveland, Ohio, in 1874, giving his attention to portrait-painting. After studying under Bouguereau in Paris, in 1877–'8, he returned to Cleveland, and became instructor and co-director in the Academy of fine arts there. He is specially skilful in painting draperies. His genre pictures include "The First Snowfall," "Grandma's Visitors," "Day before the Wedding,"

and "The Flirtation." He has sent to exhibitions of the National academy in New York city "The Answer" (1881); "Old Clock" (1882); "Morning" and "Wading in the Brook" (1883); "Birthday Card" and "Fun at the Studio" (1884); "After the Pose" (1885); and "Love-Letter" and "Christmas Morning" (1886). He is now (1887) engaged on a picture of the Garfield family, entitled "Winter Evening at Lawnfield," to be placed in the reception-room of the Garfield monument at Cleveland.

EVANS, Edward Payson, scholar, b. in Remsen, N. Y., 8 Dec., 1833. His father was a Welsh Presbyterian clergyman. Edward removed to Michigan in 1850, and was graduated at the state university in 1854. He taught in an academy in Hernando, Miss., in 1855, and was professor in Carroll college, Waukesha, Wis., in 1856–'7. After spending the years from 1857 till 1860 in travel and study abroad, he became in 1861 professor of modern languages in Michigan university, but resigned in 1870 and went abroad, where he has since been engaged in literary work. Since 1884 he has been connected with the "Allgemeine Zeitung," of Munich, Bavaria, and has contributed to it many articles on the literary, artistic, and intellectual life of the United States. Prof. Evans has made a specialty of oriental languages. Besides many articles in reviews and magazines, he has published "Abriss der deutschen Literaturgeschichte" (New York, 1869) and a "Progressive German Reader" (1870), and has translated Stahr's "Life and Works of Lessing," with an introduction (2 vols., Boston, 1866), and Coquerel's "First Historical Transformations of Christianity" (1867). He has in preparation (1887) a work on "Animal Symbolism in Art and Literature," and a "History of German Literature," to be completed in five volumes, two of which are already written, though not published.—His wife, **Elizabeth Edson Gibson,** author, b. in Newport, N. H., 8 March, 1833, was educated at a high school for young ladies in Ann Arbor, Mich., and has done some work as an artist. She has contributed essays and short stories to magazines, and has published "The Abuse of Maternity" (Philadelphia, 1875), and "Laura, an American Girl," a novel (1884).

EVANS, Elizabeth Hewlings, poet, b. in Philadelphia in 1818; d. in Amelia county, Va., in 1855. She was a daughter of William S. Stockton, of Philadelphia, and in 1839 married Dr. M. F. T. Evans, of Amelia county, Va. Mrs. Evans contributed poems to various periodicals, and was widely known to the public. A volume of her poems, with a preface by her brother, the Rev. Thomas H. Stockton, was published shortly before her death (Philadelphia, 1851).

EVANS, Evan, clergyman, b. in Wales; d. in Harford county, Md., in October, 1721. He was educated in England, entered the ministry of the established church, and, on the grant of a royal bounty of £50 to Christ church, Philadelphia, was appointed its second rector in 1700 by Dr. Compton, lord-bishop of London. He at once became a leader, and had such power that many visiting Philadelphia were deeply impressed by his preaching, and formed congregations when they returned to their homes. His duties, not the least of which was his work among young men over whom he exercised great influence, were thereby much increased. In visiting these congregations he often travelled fifty or sixty miles, through Pennsylvania, West Jersey, and Delaware. The chief of them were Radnor and Oxford, and his church at the former place, where there was a colony of Episcopalians from Radnorshire, Wales, is represented in the accompanying illustration. He went to England in 1707 on private business, and urged that a bishop should be sent to the colonies, and on his return in 1709 brought the communion service presented by Queen Anne to Christ church. He visited England again in 1716 "on some family concerns," and while there received the degree of

D. D. from one of the universities, and was appointed missionary at Oxford and Radnor, in addition to Christ church. Having been presented to St. George's parish, Harford co., by the governor of Maryland, he resigned his former charge on 15 Feb., 1718. While on a visit shortly afterward, he was seized with an apoplectic fit in the pulpit of Christ church on Sunday, and died on the following Wednesday. During his ministry he baptized 800 persons, about 500 of whom had belonged to the society of Friends, whose members flocked to hear him in great numbers.

EVANS, Evan William, scholar, b. near Swansea, Wales, in 1827; d. in Ithaca, N. Y., 22 May, 1874. He came to this country with his parents when a child, and was graduated at Yale in 1851. After studying theology in New Haven for a year he became principal of Delaware institute, Franklin, N. Y., and in 1855–'7 was a tutor in Yale, accepting in the latter year the chair of natural philosophy and astronomy in Marietta college, Ohio, where he remained until 1864. He was then occupied for three years as a mining engineer, spent one year in European travel, and on the foundation of Cornell university was the first professor appointed, occupying the chair of mathematics there till 1872, when he resigned on account of failing health. Prof. Evans was regarded as the best Celtic scholar in the United States.

EVANS, George, senator, b. in Hallowell, Me., 12 Jan., 1797; d. in Portland, Me., 5 April, 1867. He was graduated at Bowdoin in 1815, studied law, and was admitted to the bar in 1818. He began to practise at Gardiner, but afterward removed to Hallowell, and attained eminence as a criminal lawyer. He was a member of the legislature in 1825–'8, and was speaker of the house in his last year. He was then chosen to congress as a Whig, and served six terms, from 1829 till 1841, when he was elected to the U. S. senate, and served in 1841–'7. During his twelve years in the house, although his party was in the minority, he exerted a commanding influence. In the senate he was chairman of the committee on finance. Henry Clay is reported to have said that Mr. Evans knew more about the tariff than any other public man in the country. His speeches on important and complicated economical questions were very effective. He was a candidate for the vice-presidential nomination when Gen. Taylor was nominated for president, and after the latter's accession in 1849 was appointed chairman of the Mexican claims com-

mission. He was attorney-general of Maine in 1853, 1854, and 1856, and was for twenty-two years a trustee of Bowdoin college, which gave him the degree of LL. D. in 1847.

EVANS, Sir George De Lacy, British soldier, b. in Moig, Ireland, in 1787; d. in London, 9 Jan., 1870. He entered the British army in 1807, served in India and Spain, and in 1814, when brevet lieutenant-colonel of the 5th West India regiment, was ordered to this country. He was at the battle of Bladensburg on 24 Aug., where two horses were killed under him, and led the small force that entered Washington and destroyed the public buildings there. He also took part in Ross's expedition against Baltimore in September, and was near that officer when he fell. At New Orleans he was the only landsman that volunteered to accompany the expedition against the American sloops defending Lake Borgne. He was wounded before New Orleans on 23 Dec., 1814, and again on 8 Jan., 1815, and was sent home. He recovered just in time to join Wellington at Quatre Bras, where again two horses were killed under him. He commanded in Spain, in 1835–'7, the British auxiliary legion, and after 1846 was member of parliament from Westminster. He served as a lieutenant-general in the Crimean war, commanding the 2d division of the English army, and was distinguished at the Alma and at Inkerman, receiving for his services the thanks of parliament and the grand cross of the bath. He published "Facts relating to the Capture of Washington" (London, 1829).

EVANS, George Henry, reformer, b. in Bromyard, Herefordshire, England, 25 March, 1805; d. in Granville, N. J., 2 Feb., 1855. He came to this country with his father and brother in 1820, and was one of the earliest land-reformers in the United States, adopting views similar to those since held by Henry George. Among the reforms for which he labored were the destruction of the U. S. bank, inalienable homesteads, the transportation of the mails on Sundays, a limitation in the right of any person to hold lands, general bankrupt laws, and laborers' liens. He also favored the abolition of slavery, of laws for collecting debts, and of imprisonment for debt. He edited and published "The Man," at Ithaca, N. Y., about 1822; the "Working Man's Advocate," in New York, in 1830; "The Daily Sentinel," in 1837; and "Young America," in New York and Rahway, N. J., in 1853.—His brother, **Frederick William,** reformer, b. in Bromyard, England, 9 June, 1808, spent his boyhood on a farm of 500 acres at Chadwick Hall, near Worcester. He says: "My maps were the landscape of hills and valleys; my books, trees and plants; my teachers, the servants, and their masters and mistresses. I graduated, and emigrated to America in 1820. Then I taught myself how to read, and began the study of history. I learned how to think, observe, and reason upon theology and the social and governmental organization of mankind, until I became a materialist, a socialist, a land-reformer, and an infidel to all the popular church and state religions of Christendom." On his arrival in New York his father apprenticed him to a hatter, and it was in the intervals of his work that he thus educated himself. After travelling on foot to the west, then on rafts and boats down the Mississippi to New Orleans, he made a short visit to England, and on his return joined the Shakers at Mount Lebanon, N. Y., on 3 June, 1830. He was appointed assistant elder in the "North Family" in 1838, and in 1858 became first elder of three "families." He has invented a simple method of warming the rooms of the community uniformly. Elder Evans has lectured frequently, has contributed to seventy different publications, and in 1873–'5 edited and published, with Antoinette Doolittle, a periodical entitled "The Shaker and Shakeress." His teachings have considerably modified the dogmas of his sect. He has published "Compendium of Principles, Rules, Doctrines, and Government of Shakers," with biographies of Ann Lee and others" (New York, 1859); "Autobiography of a Shaker" and "Tests of Divine Revelation" (1869); "Shaker Communism" (London, 1871); "Religious Communism," a lecture delivered in St. George's hall, London (1872); and "Second Appearing of Christ" (1873).

EVANS, Henry G., journalist, b. in 1812; d. in Brooklyn, N. Y., 14 Aug., 1869. He was co-editor and proprietor of the New York "Evening Mirror" almost from the beginning of its career to its close, and was one of the best writers for the daily press in the city. About fifteen years previous to his death the publication of the "Mirror" was discontinued, and he engaged in mercantile business, in which he maintained a high reputation.

EVANS, Hugh Davey, author, b. in Baltimore, Md., 26 April, 1792; d. there, 16 July, 1868. He left school at thirteen years of age on account of his health, and in 1810 began to study law. He was admitted to practice in Baltimore on 19 April, 1815, took rank, while yet a young man, with Pinckney, Wirt, Reverdy Johnson, and the other leaders of the Maryland bar, and afterward attained eminence as a constitutional lawyer. He was prominent for many years in the councils of the Protestant Episcopal church, and in 1843–'56 edited "The True Catholic," a high-church periodical. He was also connected with the Philadelphia "Register" in 1853, contributing to it "Thoughts on Current Events," with the New York "Churchman" in 1854–'6, and the New York "Church Monthly" in 1857–'8, and in the two years last mentioned edited the "Monitor," a weekly paper published in Baltimore. He was a prominent member of the Maryland colonization society, and prepared a code of laws for the Maryland colony in Liberia (Baltimore, 1847). He received the degree of LL. D. from St. James's college, Maryland, in 1852, and from that time till 1864 was lecturer there on civil and ecclesiastical law. During the civil war Mr. Evans was an earnest supporter of the National government, and in 1861 wrote to the London "Guardian" a letter in defence of the arrests made in Baltimore in that year, which attracted much attention. His published works include "Essay on Pleading" (Baltimore, 1827); "Maryland Common-Law Practice" (1837; revised ed., 1867); "Essays to prove the Validity of Anglican Ordinations," in reply to Archbishop Kenrick's book on the subject (Baltimore, 1844; second series, 2 vols., 1851); "Theophilus Americanus," an American adaptation, with additions, of Canon Wordsworth's "Theophilus Anglicanus" (Philadelphia, 1851); "Essay on the Episcopate of the Protestant Episcopal Church in the United States" (1855); and several pamphlets. After his death appeared his "Treatise on the Christian Doctrine of Marriage," which he considered his best work (New York, 1870), and a memoir by Rev. Hall Harrison, founded on recollections written by himself (Hartford, Conn., 1870).

EVANS, H. Sugden, Canadian chemist, b. in London, England, in 1830. He was graduated at the School of pharmacy in 1848, and then removed to Liverpool, where he took charge of the laboratories of his father, a wholesale druggist. In 1849 he read before the London chemical so-

ciety a paper on "Chromates of Copper," and was elected one of its fellows. He afterward investigated the adulteration of drugs and food, and for his microscopical labors in this connection was made a fellow of the Royal microscopical society. He was also, in 1869, president of the Pharmaceutical society of Great Britain. In 1866 he entered the wholesale drug business in Montreal, Canada, but continued to live in England till 1877. He retired from active connection with the business in 1884, and became chief analyst for the Dominion government.

EVANS, John, colonial governor of Pennsylvania, b. about 1678. He was of Welsh origin, and in February, 1704, became deputy-governor of the province, under the proprietor, William Penn. He was not a Quaker, and was doubtless selected out of deference to the court party, who did not believe in the peace principles of that sect. His administration was marked by quarrels with the assembly, and especially with the speaker of the house, David Lloyd, who headed the popular party. Disregarding the convictions of the Quakers, Evans, for the first time in the history of the colony, made a public call for troops, with the desire of assisting the other colonies against the French and Indians. The call met with no response, whereupon the governor, resorting to a discreditable ruse, arranged to have a messenger ride into Philadelphia on the day of the annual fair, announcing, with apparent consternation, that the French had arrived in the Delaware and were marching on the city. Evans then rode through the street with drawn sword, entreating the people to arm, and for a time great excitement prevailed. Valuables were hastily thrown into wells, and many people fled to the forests; but the Quakers, on whom Evans had wished to make an impression, continued quietly at their devotions, as it was the day for their "weekly meeting." The governor also built a fort at Newcastle, and unlawfully demanded tribute of all vessels passing up the river. Evans had a good deal of learning and refinement, but his habits were unsuited to the Quaker city. Watson, in his "Annals of Philadelphia," says that in 1702 "Solomon Cresson, going his round at night, entered a tavern to suppress a riotous assembly, and found there John Evans, Esq., the governor, who fell to beating Cresson." Evans was finally recalled in February, 1709, and was succeeded by Col. Charles Gookin.

EVANS, John, geologist, b. in Portsmouth, N. H., 14 Feb., 1812; d. in Washington, D. C., 13 April, 1861. His father, Richard Evans, was a judge of the New Hampshire supreme court. After taking his degree at St. Louis medical college, he served, under Dr. David Dale Owen, on the geological surveys of Wisconsin, Minnesota, Iowa, and Nebraska. He first attracted notice, both here and abroad, by his discovery and description of a large deposit of fossil bones of extinct species in the "Mauvaises Terres" of Nebraska. He was afterward commissioned by the U. S. government to carry on the geological surveys of Washington and Oregon territories, and was subsequently geologist to the Chiriqui commission. At the time of his death he was preparing an elaborate report on his surveys of Washington and Oregon.

EVANS, Josiah James, jurist, b. in Marlborough district, S. C., 27 Nov., 1786; d. in Washington, D. C., 6 May, 1858. He was graduated at South Carolina college in 1808, studied law, was admitted to the bar in 1811, and gained a high reputation as a lawyer. He was chosen to the legislature from Marlborough district in 1812–'13, and in 1816 from Darlington district, whither he had removed in that year. He was state solicitor for the northern circuit in 1817–'29, was elected circuit judge in 1829, and, on the abolition of the court of appeals in 1835, became a judge not only in the first but also in the last resort. He was elected to the U. S. senate as a state-rights Democrat in 1852, and served from 1853 till his sudden death from heart disease. The highest tributes were paid to his character by both political friends and opponents. In 1856 Judge Evans made a speech in the senate in vindication of South Carolina, in reply to Charles Sumner.

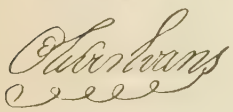
EVANS, Lewis, geographer, b. about 1700; d. in June, 1756. During an active career as a surveyor he collected materials for a map of the British colonies in North America, and in 1749 published one of the middle colonies, embracing New York, New Jersey, Delaware, and the adjacent Indian country. A second edition appeared in 1755, containing also Virginia, Maryland, Pennsylvania, and a part of New England. The map was republished in 1776, with large additions, by Gov. Pownall. Evans also published "Geographical, Historical, Political, Philosophical, and Mechanical Essays" (2 series, Philadelphia, 1755; London, 1756). In the last series he replied to some strictures on a statement questioning the English title to Fort Frontenac, which had appeared in the first.

EVANS, Nathan George, soldier, b. in Darlington district, S. C., in 1823; d. in Midway, Ala., 30 Nov., 1868. He was graduated at the U. S. military academy in 1848, assigned to the 1st dragoons, and served on frontier duty and against the Indians. He was made 1st lieutenant in the 2d cavalry, 3 March, 1855; captain, 1 May, 1856; and distinguished himself in a fight with Comanche Indians, 1 Oct., 1858, killing two of them in personal combat. He resigned on 27 Feb., 1861, entered the Confederate service as colonel, and commanded a brigade at Bull Run. He was then promoted to brigadier-general, and commanded the Confederate forces at Ball's Bluff, 19 Oct., 1861. He also commanded in the actions at James Island, S. C., and Kinston, N. C., in 1862, and subsequently became major-general. He led a division of Gordon's corps at Hatcher's Run, surrendered with Gen. Lee on 9 April, 1865, and from 1866 till his death was engaged in teaching.

EVANS, Nathaniel, poet, b. in Philadelphia, Pa., 8 June, 1742; d. in Gloucester county, N. J., 29 Oct., 1767. After studying at the Philadelphia academy, he was apprenticed to a merchant, but afterward entered the College of Philadelphia (now University of Pennsylvania). He was not graduated, but received the degree of M. A. in 1765. He then went to England, was ordained in the established church, and returned in December, 1765, as a missionary of the Society for propagating the gospel in foreign parts. Mr. Evans published an edition of Thomas Godfrey's poems, with a memoir (1767). After his death, selections from his writings, entitled "Poems on Several Occasions," with other pieces, including one of his sermons, were published with a memoir by his friend, the Rev. Dr. Smith (Philadelphia, 1772).

EVANS, Oliver, inventor, b. in Newport, Del., in 1755; d. in New York city, 21 April, 1819. He was apprenticed to a wheelwright, and before he had reached the age of manhood the construction of a land-carriage to be propelled without animal power began to occupy his attention. At the age of twenty-two he invented a machine for making card-teeth. Two years later he entered into business with his brothers, who were millers, and in a

short time invented the elevator, the conveyer, the drill, the hopper-boy, and the descender, the application of which to mills worked by water-power effected a revolution in the manufacture of flour. In 1786–'7 he obtained from the legislature of Maryland and Pennsylvania the exclusive right to use his improvements in flouring mills, and Maryland gave him a similar privilege with regard to steam carriages. It was not till 1799 or 1800 that he was able to set about the construction of a steam carriage. Finding that his steam-engine differed in form as well as in principle from those in use, he secured a patent, and applied it to mills more profitably than to carriages,



This was the first steam-engine constructed on the high-pressure principle; and to Evans, who had conceived the idea of it in early life, and in 1787 and again in 1794–'5 had sent to England drawings and specifications, the merit of the invention belongs, although it has been common to assign it to Vivian and Trevithick, who had had access to Evans's plans. In 1803–'4, by order of the board of health of Philadelphia, he constructed the first steam-dredging machine used in America. It consisted of a scow, with a small engine to work the machinery for raising the mud. The machine, which he named the "Orakter Amphibolos," propelled itself on wheels to the Schuylkill, a distance of one and a half mile, was fitted with a paddle-wheel in the stern, and navigated the river to its junction with the Delaware. This is believed to have been the first instance in America of the application of steam-power to the propelling of land-carriages. He predicted the time when such carriages would be propelled on railways of wood or iron, and urged the construction of a railroad between Philadelphia and New York, but was always prevented by his limited means from prosecuting his mechanical experiments to the extent he desired. He was the author of "The Young Engineer's Guide" (Philadelphia, 1805; translated into French, Paris, 1821); and of the "Miller and Millwright's Guide" (Philadelphia, 1797; Paris, 1830; 14th ed., with additions by Thomas P. Jones); and he also published a description of an improved merchant flouring mill, by C. and O. Evans (Philadelphia, 1853).

EVANS, Thomas, Quaker, b. in Philadelphia in 1798; d. 25 May, 1868. In 1827–'8 he opposed the Unitarian views of Elias Hicks in a series of able papers in the "Friend." In 1837 he narrowly escaped shipwreck on a voyage to Charleston, S. C., and, from over-exertion at the pumps, his health was irreparably injured. From 1837 till 1854 he edited, with his brother William, "The Friend's Library," a collection of standard religious writings by eminent members of the society, in fourteen volumes. He was the author of "An Exposition of the Faith of the Religious Society of the Friends" (Philadelphia, 1828).

EVANS, Thomas Wiltberger, dentist, b. in Philadelphia, Pa., 23 Dec., 1823. He received a common-school education, and, at the age of fourteen, entered the employ of a silversmith, who was also a maker of dental appliances. In 1841 he entered the office of Dr. John D. White, of Philadelphia, with whom he remained two years, meanwhile following a regular course at the Jefferson medical college. He established himself as a dentist in Maryland, and afterward in Lancaster, Pa., where he acquired an extensive practice. His early familiarity with metals, and especially with gold-foil, enabled him to fill cavities, which up to that time had been considered impracticable. Many teeth that would otherwise have been extracted were filled by him, and he made an exhibition of his achievements at the Franklin institute in Philadelphia. About 1848 he went to Paris, where, under the patronage of Napoleon III., he became distinguished, and in time he treated many of the crowned heads of Europe. Dr. Evans was active in the establishment of the Red cross society, and in organizing the American ambulance corps that was sent out under its auspices with the French army in 1870. At the downfall of the empire in September, 1870, he aided the Empress Eugenie to escape, and, although the story is told in several ways, it is generally accepted that the empress, after leaving the Tuileries, was taken to Dr. Evans's residence for refuge. She was hurried into his carriage and driven beyond the walls of the city, while he held in front of her face an open newspaper, which he was apparently reading. Dr. Evans's fortune is estimated at many millions, including a valuable collection of souvenirs, which he has received from his titled patients. He is the proprietor of the "American Register," a weekly journal issued in Paris, and has recently purchased a daily, which is now (1887) published in the English language in that city. He has published several books, including "The Memoirs of Heinrich Heine" (London, 1884).

EVANS, William, agriculturist, b. in Cavan, Ireland, in 1786; d. in Montreal, Canada, in 1857. He emigrated to Canada in 1819, and settled in Montreal, where he was made secretary to the first agricultural society founded there. In 1837 he contributed a series of letters upon agriculture to the "Courier," which were published in pamphlet form. He established the "Canadian Quarterly" and the "Agriculturist and Industrial Magazine." In 1842 he edited the "British American Cultivator" in Toronto. When he returned to Montreal in the following year he founded the "Canadian Agricultural Journal," of which he was editor until a short time before his death. He frequently contributed to the "Gazette," in Montreal, on agricultural subjects, and in 1853 was appointed secretary and treasurer of the board of agriculture in Lower Canada. He published "Theory and Practice of Agriculture" (Montreal, 1835).

EVARTS, Jeremiah, philanthropist, b. in Sunderland, Vt., 3 Feb., 1781; d. in Charleston, S. C., 10 May, 1831. He was graduated at Yale in 1802, and, after some time spent in teaching, studied law, was admitted to the bar in 1806, and practised that profession in New Haven for about four years. From 1810 till 1820 he edited the "Panoplist," a religious monthly magazine published in Boston. In 1812 he was chosen treasurer of the American board of commissioners for foreign missions, and in 1820, when the "Panoplist" was discontinued and the "Missionary Herald" was issued by the board in its stead, he took charge of the latter periodical. He was chosen correspond-

ing secretary of the board in 1821, and retained that office until his death. He died while travelling for the benefit of his health. He wrote twenty-four essays on the rights of the Indians, under the signature of "William Penn," and also edited a volume of "Speeches on the Indian Bill," writing the introduction; and wrote most of the reports of the board of missions, that of 1830 especially being an able document. See "Memoirs of Jeremiah Evarts," by E. C. Tracy (Boston, 1845).—His son, **William Maxwell,** lawyer, b. in Boston, 6 Feb., 1818. He was prepared for college in the Boston Latin-school, graduated at Yale in 1837, and while in college, with four of his classmates, he founded the "Yale Literary Magazine." Choosing the profession of the law, he studied in Harvard law-school, and in the office of Daniel Lord, of New York city, and was admitted to the bar in New York in 1841. He soon established a reputation for learning and acumen, and was often consulted by older lawyers. In 1849–'53 he was assistant district attorney in New York city, and in 1851 successfully conducted the prosecution of the Cuban filibusters concerned in the "Cleopatra" expedition. The same year he was selected to argue in favor of the constitutionality of the Metropolitan police act. In 1857 and 1860 he was retained by the state of New York to argue the Lemmon slave case against Charles O'Conor, the counsel for the state of Virginia, before the supreme court and the court of appeals. He became an active and prominent member of the Republican party, was chairman of the New York delegation in the Republican national convention of 1860, and proposed the name of William H. Seward for the presidency. In 1861 he and Horace Greeley were rival candidates for the U. S. senatorship before the New York legislature, but finally his name was withdrawn to enable his supporters to secure the election of Ira Harris. In 1862 he conducted the case of the government to establish in the supreme court the right of the United States in the civil war to treat captured vessels as maritime prizes, according to the laws of war. In 1865 and 1866 he maintained with success before the courts the unconstitutionality of state laws taxing U. S. bonds or National bank stock without the authorization of congress. In 1868 President Johnson chose him as chief counsel in the impeachment trial before the senate, and from 15 July, 1868, till the end of President Johnson's administration, he filled the office of attorney-general of the United States. He acted in 1872 as counsel for the United States before the tribunal of arbitration on the Alabama claims at Geneva, and presented the arguments on which the decisions favorable to the United States were to a large extent based. In 1875 he was senior counsel for Henry Ward Beecher in the trial of the suit against him in Brooklyn. For many years his reputation had been national, and he had been engaged in a large number of cases involving great interests, among the more famous of which were the Parrish will case and the contest over the will of Mrs. Gardner, mother of the widow of President Tyler. His services were often sought in cases in which large corporations were parties, and he received in some instances fees of $25,000 or $50,000 for an opinion, such as that on the Berdell mortgage upon the Boston, Hartford, and Erie railroad. The firm of Evarts, Choate & Beaman, of which he is senior partner, has among its clients many of the prominent merchants and bankers of New York city. In 1877 he was the advocate of the Republican party before the electoral commission, and during the administration of President Hayes he was secretary of state. His administration of the state department was marked by a judicious and dignified treatment of diplomatic questions, and especially by the introduction of a higher standard of efficiency in the consular service, and the publication of consular reports on economic and commercial conditions in foreign countries. In 1881, after the conclusion of his term of service in the cabinet, he went to Paris as delegate of the United States to the International monetary conference. On 4 March, 1885, he took his seat in the U. S. senate for the term expiring 3 March, 1891, having been elected as a Republican to succeed Elbridge G. Lapham as senator from New York. Mr. Evarts is known as a brilliant speaker at convivial gatherings, and as a public orator of eloquence and versatility. On many important occasions he has delivered addresses, several of which have been published. Among his public addresses are the eulogy on Chief-Justice Chase, at Dartmouth college, in June, 1873; the Centennial oration, in Philadelphia, in 1876; and the speeches at the unveiling of the statues of William H. Seward and Daniel Webster, in New York, and of Bartholdi's Statue of Liberty.

EVE, Joseph Adams, physician, b. in Charleston county, S. C., 1 Aug., 1805. He was graduated at the South Carolina medical college in 1828, and began to practise in Augusta, Ga., making a specialty of obstetrics and diseases of women and children. He was one of the founders in 1832 of the Medical college of Georgia, and took the chair of materia medica and therapeutics, which he exchanged in 1839 for that of obstetrics and women's and children's diseases. His papers on materia medica and gynecology have appeared in the "Southern Medical and Surgical Journal."—His son, **Robert Campbell,** physician, b. in Augusta, Ga., 15 May, 1843, was graduated at the Medical college of Virginia in 1863, and, after practising some time at Staunton, Va., settled in Augusta, and became professor of materia medica and medical jurisprudence in the Georgia medical college. He has written on the "Influence of the Ovaria in Uterine Disorders," "Epilepsy," and "Tonic Properties of Mercury in Minute Doses."—Joseph Adams's niece, **Maria Lou,** author, b. near Augusta, Ga., about 1848, was graduated at Greensborough college, Ga., and after leaving school contributed to "Scott's Magazine" and other southern literary journals. In 1879 she wrote a prize poem entitled "Conquered at Last," expressing gratitude for northern aid during the yellow-fever epidemic of 1878. She has published many poems in magazines and newspapers, some of which are included in "Woman in Sacred Song" (Boston), and some in George M. Baker's "Reading Club."—Joseph Adams's cousin, **Paul Fitzsimons,** physician, b. near Augusta, Ga., 27 June, 1806; d. in Nashville, Tenn., 3 Nov., 1877, was graduated at Franklin col-

lege, Ga., in 1826, and studied in the office of Dr. Charles D. Meigs and in the medical department of the University of Pennsylvania, where he was graduated in 1828. He then studied three years in London and Paris, and served as ambulance surgeon during the revolution of 1830, and as a regimental surgeon in the Polish war. He returned to the United States in November, 1831, and the following June was elected professor of surgery in the newly organized Medical college of Georgia. He remained there until 1849, when he succeeded Dr. Gross as surgical professor in the University of Louisville, but resigned after the first course of lectures. In 1850 he became professor of surgery in the University of Nashville, which was established at that time. In 1868 he accepted the professorship of surgery in the University of Missouri, but was obliged by the unhealthfulness of the climate to return to Nashville, where he became professor of operative and clinical surgery. In 1877 he became professor of the principles of surgery and of the diseases of the genito-urinary organs in the Medical college there. He was one of the best surgeons in the southwest. In 1861 he was appointed surgeon-general of Tennessee, and served during the war as hospital surgeon on the medical examination board, and with the Confederate army at Shiloh, Columbus, Miss., Atlanta, and Augusta, Ga. He performed more than a hundred operations of lithotomy, usually by the bilateral method, and lost only eight out of ninety-two cases operated upon bilaterally. He is believed to have been the first American surgeon to excise the uterus *in situ*, the patient living over three months, and has removed the crista galli, the patient surviving six days, trephined the lateral sinus of the brain, removed a nail from the lung by tracheotomy, and performed other difficult operations. He was for a time editor of the "Southern Medical and Surgical Journal," and assisted in editing the Nashville "Medical and Surgical Journal." He has published over 600 articles on medical subjects. His most important works are "Remarkable Cases in Surgery" (1857); "One Hundred Cases of Lithotomy" in the "Transactions" of the American medical association for 1870; "What the South and West have done for American Surgery"; and reports of 20 amputations and 13 resections at the hip-joint performed by Confederate surgeons, contributed to the "Medical History of the War."

EVELINE, Robert, an English colonist in Virginia. He published "Direction for Adventurers, and True Description of the Healthiest, Pleasantest, and Richest Plantation of New Albion, in North Virginia" (London, 1641).

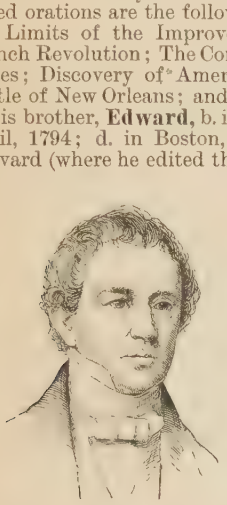
EVERARD, Sir **Richard,** colonial governor of Carolina, d. in London, England, 17 Feb., 1733. He was the last of the proprietary governors, and his administration was disturbed by frequent altercations with the council. When he had been governor for four years the lords proprietors, in 1729, surrendered the provinces to the crown, each receiving in consideration of the surrender the sum of $12,500. The population of North and South Carolina, after the charter had been in existence sixty-six years, was not at that time more than 25,000 persons, including negroes. On the transfer, Everard was recalled, and the first royal governor, George Burrington, succeeded him in February, 1730.

EVEREST, Charles William, poet, b. in East Windsor, Conn., 27 May, 1814; d. in Waterbury, Conn., 11 Jan., 1877. He was graduated at Trinity college in 1838, and ordained a priest in the Protestant Episcopal church in 1843, became rector at Hamden, Conn., and taught the rectory school. He contributed to magazines, edited many books of poems, and published "The Poets of Connecticut" (Hartford, 1843).

EVERETT, Alexander Hill, b. in Boston, Mass., 19 March, 1792; d. in Macao, China, 28 June, 1847. He was a son of the Rev. Oliver Everett (who was pastor of the New south church in Boston from 1782 to 1792), and was graduated at Harvard in 1806 with the highest honors of his class, although the youngest of its members. After leaving college he was for a year assistant teacher in Phillips Exeter academy, then studied law in the office of John Quincy Adams, whom in 1809 he accompanied to Russia, residing for two years in his family, attached to the legation. At the close of the war between the United States and Great Britain, Gov. Eustis, of Massachusetts, was appointed minister to the Netherlands, and Mr. Everett went with him as secretary of legation, but after a year of service returned home. On the retirement of Gov. Eustis he was appointed his successor, with the rank of charge d'affaires, and held this post from 1818 till 1824. In 1825–'9 he was minister to Spain, after which he returned home and became proprietor and editor of the "North American Review," to which he had, during the editorship of his brother Edward, been one of the chief contributors. From 1830 till 1835 he sat in the legislature of Massachusetts; in 1840 he resided, as a confidential agent of the United States, in the island of Cuba, and while there was appointed president of Jefferson college, Louisiana, but was soon obliged by failing health to return to New England. On the return of Caleb Cushing from his mission to China, Mr. Everett was appointed commissioner to that empire, and sailed for Canton, 4 July, 1845. He was detained by illness at Rio Janeiro, and returned home, but in the summer of 1846 made a second and more successful attempt to reach his destination, and died in Macao. Mr. Everett's first published compositions appeared in the "Monthly Anthology," the vehicle of the Anthology club of Boston, which consisted of George Ticknor, William Tudor, Dr. Bigelow and Rev. J. S. J. Gardiner, Alexander H. Everett, and Rev. Messrs. Buckminster, Thacher, and Emerson. The "Monthly Anthology," established by Phineas Adams, was published from 1803 till 1811. Mr. Everett published "Europe, or a General Survey of the Political Situation of the Principal Powers, with Conjectures on their Future Prospects" (London and Boston, 1822; translated into German, French, and Spanish, the German version edited by Prof. Jacobi, of the University of Halle); "New Ideas on Population, with Remarks on the Theories of Godwin and Malthus" (London and Boston, 1822); "America, or a General Survey of the Political Situation of the Several Powers of the Western Continent, with Conjectures on their Future Prospects, by a Citizen of the United States" (Philadelphia, 1827; London, 1828); "Critical and Miscellaneous Essays" (first series, Boston, 1845; second series, 1847); and "Poems" (1845). To Sparks's "American Biography" Mr. Everett contributed the lives of Joseph Warren and Patrick Henry. His principal contributions to the "North American Review" are on the following subjects: French Dramatic Literature; Louis Bonaparte; Private Life of Voltaire; Literature of the 18th Century; Dialogue on Representative Government, between Dr. Franklin and President Montesquieu; Bernardin de St. Pierre; Madame de Staël; J. J. Rousseau; Mirabeau; Schiller; Chinese Grammar; Cicero on Government; Degerando's History of Philosophy; Lord Byron; British Opinions on the

Protecting System; The American System; Life of Henry Clay; Early Literature of Modern Europe; Early Literature of France; Origin and Character of the Old Parties; and Thomas Carlyle. His principal contributions to the "Democratic Review" are the following: The Spectre Bridegroom, from Bürger; The Water-King, a Legend of the Norse; The Texas Question; and The Malthusian Theory. His contributions to the "Boston Quarterly Review" were chiefly, if not altogether, devoted to an exposition of questions connected with the currency. Among Mr. Everett's published orations are the following: On the Progress and Limits of the Improvement of Society; The French Revolution; The Constitution of the United States; Discovery of America by the Northmen; Battle of New Orleans; and Battle of Bunker Hill.

—His brother, **Edward,** b. in Dorchester, Mass., 11 April, 1794; d. in Boston, 15 Jan., 1865, entered Harvard (where he edited the "Harvard Lyceum") in 1807, and was graduated with the highest honors in 1811. In 1813 he was settled as pastor over the Unitarian church in Brattle square, Boston, succeeding the Rev. Joseph Stevens Buckminster, and soon attracted attention by his eloquence, especially by his sermon delivered in the hall of the house of representatives, Washington, in February, 1820. "The sermon was truly splendid," wrote Judge Joseph Story, "and was heard with a breathless silence. The audience was very large, and, being in that magnificent apartment of the house of representatives, it had vast effect. I saw Mr. King, of New York, and Mr. Otis, of Massachusetts, there. They were both very much affected with Mr. Everett's sermon; and Mr. Otis, in particular, wept bitterly. There were some very stirring appeals to our most delicate feelings on the loss of our friends. Indeed, Mr. Everett was almost universally admired as the most eloquent of preachers. Mr. King told me he never heard a discourse so full of unction, eloquence, and good taste." After his graduation Mr. Everett was Latin tutor at Harvard, and in 1814 he was chosen to fill the newly-formed chair of Greek literature, to qualify himself for which he spent more than four years (from the spring of 1815 to the autumn of 1819) in Europe, studying for two years in the University of Göttingen. "Edward Everett," remarks Abraham Hayward in his sketch of "American Orators and Statesmen," in the "London Quarterly Review" for December, 1840, "is one of the most remarkable men living. . . . At nineteen he had already acquired the reputation of an accomplished scholar, and was drawing large audiences as a Unitarian preacher. At twenty-one (the age at which Roger Ascham achieved a similar distinction) he was appointed professor of Greek in Harvard university, and soon afterward he made a tour of Europe, including Greece. M. Cousin, who was with him in Germany, informed a friend of ours that he was one of the best Grecians he ever knew, and the translator of Plato must have known a good many of the best. On his return from his travels he lectured on Greek literature with the enthusiasm and success of another Abelard—we hope without the Heloise." Before his departure for Europe, Mr. Everett had given a striking proof of his wide reading and critical powers in answering a volume entitled "The Grounds of Christianity Examined," by George B. English (Boston, 1813). Mr. Everett convicts English of dishonesty in his assertions, and of plagiarism from Evanson, Collins, Toland, Sember, Priestley, Rabbi Isaac, and Orobio. About ninety-four pages are borrowed from other writers, while English credits other authors with twenty-four pages only. In 1819 Mr. Everett returned home and entered upon the duties of the Greek professorship. In addition to his regular duties he published a translation of Buttman's Greek grammar, and a Greek reader based upon that of Jacobs. He became editor of the "North American Review" in January, 1820, and in the next four years contributed to its pages about fifty papers, to which are to be added sixty more written while the "Review" was under the management of his brother Alexander and his successors. In May, 1822, Mr. Everett married Charlotte Gray, a daughter of Peter Chardon Brooks, whose biography he wrote. In 1824 Mr. Everett was elected to congress from the Boston district, and sat in the house of representatives for ten years. He took the side in politics maintained by the friends of President John Q. Adams, as a "National Republican" and "Whig"; but gave special attention to obtaining pensions for the survivors of the Revolution, and offered vigorous opposition to the removal of the Indians from Georgia. In 1835, and for three successive years thereafter, he was elected governor of Massachusetts, and at the next election was defeated by only one vote out of more than 100,000. In 1840 he made another journey to Europe, and while residing in London he was appointed, chiefly through the influence of Daniel Webster, minister to England. During his sojourn in that country he received the degree of D. C. L. from Oxford and that of LL.D. from Cambridge and Dublin. He was recalled by President Polk in 1845. From 1846 till 1849 he was president of Harvard college, and on the death of Daniel Webster, in 1852, was appointed secretary of state. In 1853 he succeeded John Davis in the U. S. senate. In the summer and autumn of this year he spoke on the Central American question, addressed the New York historical society on colonization and emigration, replied to Lord John Russell's protest against the doctrines of the U. S. government in the note declining the Tripartite convention, and spoke in opposition to the proposed new constitution in Massachusetts. On the assembling of congress in December, 1853, although his health had been impaired by his labors, he continued them with such zeal and fidelity in the discussion of the bill to repeal the Missouri compromise, and other important measures of that session, that in the following May he was obliged to resign his seat. In 1853 Miss Ann Pamela Cunningham originated a plan to purchase Mount Vernon by private subscription, in an address to the women of the United States, signed "A Southern Matron," and in this praiseworthy object she found an efficient advocate in Mr. Everett, who delivered in its behalf his oration on Washington, from 19 March, 1856, till June, 1859 —122 times—with a result of more than $58,000. In the autumn of 1858 Mr. Everett contracted with Robert Bonner, proprietor of the New York "Ledger," to furnish an article weekly for that paper for one year, in consideration of $10,000, to



Edward Everett.

be paid in advance to the Mount Vernon fund. Mr. Everett also invited the readers of the "Ledger" to transmit each the sum of fifty cents or more toward the same object, and this appeal produced more that $3,000. On 22 Dec., 1857, he delivered an address on charity and charitable associations for the benefit of the Boston provident association, which was repeated fifteen times, with receipts of about $13,500. On 17 Jan., 1859, he delivered an address in Boston on the "Early Days of Franklin," which was repeated five times, yielding about $4,000 to various institutions. The receipts of these lectures were not less than $90,000. A notice of the "Life and Works of Daniel Webster," by Mr. Everett, is included in the collective edition of the works of the former (6 vols., Boston, 1852). From his pen also came the "Life of General Stark," in Sparks's "American Biography," and several of the annual reports of the Massachusetts board of education. At the instance of Lord Macaulay, he contributed a life of Washington to the "Encyclopædia Britannica" (published separately, New York, 1860). Mr. Everett had substantial claims to the character of a poet. His dirge of "Alaric the Visigoth" and the beautiful poem of "Santa Croce" are among the few compositions that the remembrance of school-boy declamation can present without fear of rebuke to the maturer judgment of riper years. In addition to the "Defence of Christianity," already mentioned, and occasional addresses, official letters, reports, etc., Mr. Everett published "Orations and Speeches on Various Occasions" (Boston, 1836); "Importance of Practical Education and Useful Knowledge," a selection from his "Orations and other Discourses," published in 1836, originally prepared for the Massachusetts district-school library at the request of the Board of education (New York, 1847); "Orations and Speeches on Various Occasions from 1826 to 1850" (2d ed., 2 vols., Boston, 1850; this edition includes all that were in the edition of 1836; 3d ed., 2 vols., 1853). These volumes contain eighty-one articles. The third volume of Everett's "Orations and Speeches" (Boston, 1859) contains forty-six articles, and also a copious index to the contents of the three volumes. Volume IV. of the "Orations and Speeches" (Boston, 1859) contains fifty-nine articles. Those who would witness a remarkable illustration of the power of eloquence to transfuse life and beauty into the teachings of science, the lessons of history, the ethics of politics, and vicissitudes of letters, will not neglect to devote their "days and nights" to the orations of Edward Everett. The first oration that drew upon Mr. Everett the eyes of his countrymen at large was delivered at Cambridge before the Phi Beta Kappa society, 27 Aug., 1824. The subject was, "The Circumstances Favorable to the Progress of Literature in America." When the youthful orator had excited to a painful pitch the feelings of the vast assemblage, he suddenly turned to the illustrious guest, Lafayette, who had seen so much of the rise and fall of human greatness, who had witnessed alike the destruction of a throne and the birth of a nation, and addressed him in an apostrophe never to be forgotten by auditor or reader. Perhaps Mr. Everett's powers as an orator are nowhere displayed to greater advantage than in that passage in his Fourth of July address delivered at Dorchester, Mass., in 1855, in which he epitomizes, in a single eloquent paragraph, the far-reaching consequences of the battle of Lexington. He said: "On the 19th of April the all-important blow was struck; the blow which severed the fated chain whose every link was bolted by an act of parliament, whose every rivet was closed up by an order in council—which bound to the wake of Europe the brave bark of our youthful fortune, destined henceforth and forever to ride the waves alone—the blow which severed that fated chain was struck. The blow was struck which will be felt in its consequences to ourselves and the family of nations till the seventh seal is broken from the apocalyptic volume of the history of empires. The consummation of four centuries was completed. The life-long hopes and heart-sick visions of Columbus, poorly fulfilled in the subjugation of the plumed tribes of a few tropical islands, and the partial survey of the continent; cruelly mocked by the fetters placed upon his noble limbs by his own menial and which he carried with him into his grave, were at length more than fulfilled, when the new world of his discovery put on the sovereign robes of her separate national existence, and joined, for peace and for war, the great Panathenaic procession of the nations. The wrongs of generations were redressed. The cup of humiliation drained to the dregs by the old puritan confessors and nonconformist victims of oppression—loathsome prisons, blasted fortunes, lips forbidden to open in prayer, earth and water denied in their pleasant native land, the separations and sorrows of exile, the sounding perils of the ocean, the scented hedge-rows and vocal thickets of the 'old countrie' exchanged for a pathless wilderness ringing with the war-whoop and gleaming with the scalping-knife; the secular insolence of colonial rule, checked by no periodical recurrence to the public will; governors appointed on the other side of the globe that knew not Joseph; the patronizing disdain of undelegated power; the legal contumely of foreign law, wanting the first element of obligation, the consent of the governed expressed by his authorized representative; and at length the last unutterable and burning affront and shame, a mercenary soldiery encamped upon the fair eminences of our cities, ships of war with springs on their cables moored in front of our crowded quays, artillery planted open-mouthed in our principal streets, at the doors of our houses of assembly, their morning and evening salvos proclaiming to the rising and the setting sun that we are the subjects and they the lords—all these hideous phantoms of the long colonial night swept off by the first sharp volley on Lexington Green." An eloquent review of Mr. Everett's orations, by Prof. Cornelius C. Felton, was published in the "North American Review" for October, 1850, and an admirable analysis of his mental characteristics and oratorical style, by a distinguished critic, himself an orator of renown, George S. Hillard, will be found in the same periodical for January, 1837. We give a brief extract from the latter: "The great charm of Mr. Everett's orations consists not so much in any single and strongly developed intellectual trait as in that symmetry and finish which, on every page, give token to the richly endowed and thorough scholar. The natural movements of his mind are full of grace; and the most indifferent sentence which falls from his pen has that simple elegance which it is as difficult to define as it is easy to perceive. His level passages are never tame, and his fine ones are never superfine. His style, with matchless flexibility, rises and falls with his subject, and is alternately easy, vivid, elevated, ornamented, or picturesque, adapting itself to the dominant mood of the mind, as an instrument responds to the touch of a master's hand. His knowledge is so extensive and the field of his allusions so wide, that the most

familiar views, in passing through his hands, gather such a halo of luminous illustrations that their likeness seems transformed, and we entertain doubts of their identity." In 1860, when secession was seriously threatened by South Carolina, Mr. Everett, against his own inclination (as he wrote to the author of this sketch), permitted his name to be used by the Constitutional-Union party as a candidate for the vice-presidency, John Bell, of Tennessee, being the candidate for president. They received thirty-nine electoral votes—those of Virginia, Kentucky, and Tennessee. (See BELL, JOHN.) During the civil war Mr. Everett labored zealously in defence of the Union, but was always disposed to extend the hand of fraternal reconciliation toward those whom he regarded as so greatly in the wrong; and his last public service was one of humanity in behalf of southern sufferers by the conflict, at the meeting in Faneuil hall on Monday, 9 Jan., 1865, for the relief of the people of Savannah. On his return home after a day of fatiguing engagements, he was obliged to summon his physician, and did not again leave his house. "We all remember him," remarks Daniel Webster, "some of us personally, myself, certainly, with great interest, in his deliberations in the congress of the United States, to which he brought such a degree of learning and ability and eloquence as few equalled and none surpassed. He administered, afterward, satisfactorily to his fellow-citizens, the duties of the chair of the commonwealth. He then, to the great advantage of his country, went abroad. He was deputed to represent his government at the most important court of Europe, and he carried thither many qualities, most of them essential, and all of them ornamental and useful, to fill that high station. He had education and scholarship. He had a reputation at home and abroad. More than all, he had an acquaintance with the politics of the world, with the laws of this country and of nations, and with the history and policy of the countries of Europe. And how well these qualities enabled him to reflect honor upon the literature and character of his native land, not we only, but all the country and all the world, know. He has performed this career, and yet is at such a period of life that I may venture something upon the character and privilege of my countrymen when I predict that those who have known him long and know him now, those who have seen him and see him now, those who have heard him and hear him now, are very likely to think that his country has demands upon him for future efforts in its service." It is pleasing to know that the cordial relations that united the hearts of these distinguished patriots were never disturbed by misunderstanding nor chilled by estrangement. To this gratifying truth we have the following testimony, which occurs in a letter from Webster to Everett, written about three months before the decease of the former: "We now and then see stretching across the heavens a clear, blue, cerulean sky, without cloud, or mist, or haze. And such appears to me our acquaintance from the time when I heard you for a week recite your lessons in the little school-house in Short street, to the date hereof" [21 July, 1852]. Mr. Everett had long contemplated a work upon international law, and at the time of his death he was preparing a course of lectures on this theme, which he had "promised to deliver before the Dane law-school." But failing health, and the fatigue and excitement of travel arising from "much serving" in patriotic enterprises, prevented the completion of the greatly desired treatise. The accompanying illustration is a view of Mr. Everett's birthplace in Dorchester, Mass. The house is supposed to have been built by Col. Robert Oliver, about 1740.—Another brother, **John,** b. in Dorchester, Mass., 22 Feb., 1801; d. in Boston in 1826, was graduated at Harvard in 1818. At his graduation he delivered an oration on "Byron," and the year previous one on "The Poetry of the Oriental Nations" at a college exhibition. On 14 July, 1818, he addressed the senior class on the "Prospects of the Young Men of America." Shortly after leaving college he accompanied President Holly to Lexington, Ky., where he became tutor in Transylvania university. While there he delivered an impromptu oration in the presence of Andrew Jackson, which was much praised. On returning to Massachusetts, Mr. Everett entered the law-school at Harvard, subsequently studied with Daniel Webster, and was called to the bar. Before completing his legal studies he visited Europe, and for a brief period was connected with the American legation at Brussels and the Hague, where his elder brother, Alexander, was chargé d'affaires. Mr. Everett's early death cut short a career that promised to be unusually brilliant. He possessed great facility in extemporaneous debate, and was a leader among the young men of Boston. His poetical abilities were also considerable, as is shown by his "Ode to St. Paul's Church," and by one written for the Washington society, and sung at Concert Hall, 4 July, 1825. He is the author of articles in "The North American Review," and delivered the oration before the Washington society on 4 July, 1824.—**William,** youngest son of Edward, educator, b. in Watertown, Mass., 10 Oct., 1839, was graduated at Harvard in 1859, and at Trinity college, Cambridge, England, in 1863. He was tutor and assistant professor of Latin at Harvard from 1870 till 1877, receiving from that institution the degree of Ph. D. in classics in 1875. In 1878 he became master of Adams academy at Quincy, Mass., where he still (1887) remains. He occasionally preaches, under a license from the Boston ministers' association, as a strongly conservative Unitarian. He has taken an active part in different political movements since 1864, both as a Republican and an Independent, notably in that of 1884, when he supported the Democratic ticket. He is a pronounced civil-service and tariff reformer. Mr. Everett is the author of "On the Cam," a series of lectures on the University of Cambridge (Boston, 1865): two books for boys, "Changing Base" (1868), and "Double Play" (1870); "Hesione, or Europe Unchained," a poem (Boston, 1869); "School Sermons" (1881); and various pamphlets on political, literary, and religious subjects.

EVERETT, Charles Carroll, theologian, b. in Brunswick, Me., in June, 1829. He was graduated at Bowdoin in 1850, studied some time in the

University of Berlin, Germany, and after his return was librarian and for two years tutor, and then for two years professor of modern languages, at Bowdoin. He then entered Harvard divinity-school, and was graduated in 1859. For the next ten years he was pastor of the Independent Congregational church in Bangor, Me., which post he resigned in 1869 to accept the Bussey professorship of theology in Harvard university. In 1878 he became also dean of the theological faculty. He has published, besides pamphlets and reviews, "The Science of Thought" (Boston, 1869); a discourse commemorative of Leonard Woods (1879); "Religions before Christianity," a Sunday-school manual (Boston, 1883); and "Fichte's Science of Knowledge, a Critical Exposition" (Chicago, 1884).

EVERETT, David, journalist, b. in Princeton, Mass., 29 March, 1770; d. in Marietta, Ohio, 21 Dec., 1813. He was graduated at Dartmouth in 1795. While teaching a grammar-school at North Ipswich he wrote the well-known juvenile recitation, beginning,

"You'd scarce expect one of my age
To speak in public on the stage."

He studied law in Boston, and wrote for Russell's "Gazette" and Dennie's "Farmer's Museum." He contributed to a literary paper, the "Nightingale," in 1796. He removed to Amherst in 1802, where he practised law. Returning to Boston in 1807, in 1809 he edited the "Boston Patriot," and in 1812 the "Pilot." He wrote a series of papers on the Apocalypse, which were published in a pamphlet. He left Boston in 1813 for Marietta, Ohio, for the purpose of establishing a newspaper, but death interrupted his plans. He was the author of "Common Sense in Dishabille" and "Farmer's Monitor" (1799); "The Rights and Duties of Nations," an essay; "Junius Americanus," in the "Boston Gazette," in defence of John Adams; and "Darenzel, or the Persian Patriot," a tragedy, which was brought out in Boston (Boston, 1800).

EVERETT, Edward Franklin, genealogist, b. in Northfield, Mass., 28 May, 1840. He was graduated at Harvard in 1860. He was recording secretary of the New England historical and genealogical society in 1862. From 1862 till 1865 he served in the volunteer army as lieutenant in 2d Massachusetts heavy artillery regiment, after which he was engaged in the fire insurance business in Boston. He is the author of "Genealogy of the Everett Family" (1860), and "Genealogy of the Capen Family," published in the "New England Historical and Genealogical Register" (1866). Since 1882 he has been engaged in preparing the two works for publication in book form.

EVERETT, Erastus, educator, b. in Princeton, Mass., in 1813. He was graduated at Dartmouth in 1836, and from 1840 till 1843 was professor of English history at Jefferson college, St. James parish, La. In the latter year he assisted in founding the Orleans high-school at New Orleans, and in 1849 became its principal. The school was chartered as a college in 1854, and he served as its president till 1855. From that year until 1875 he taught a select school at Brooklyn, N. Y., and for the four years following was professor of Greek and Latin in Rutgers female college. He is the author of "A System of English Versification" (New York, 1848), and "Progress," a poem.

EVERETT, Horace, congressman, b. in Vermont in 1780; d. in Windsor, Vt., 30 Jan., 1851. He was graduated at Brown in 1797, studied law, and practised in Windsor. He was a member of the Vermont legislature in 1819–'20, 1822–'4, and 1834, a prominent member of the State constitutional convention of 1828, and in that year was elected to congress as a Whig, serving from 1829 to 1843. While a member of congress he was a zealous advocate of the rights of the Indians.

EVERETT, Joseph, clergyman, b. in Queen Anne county, Md., 17 June, 1732; d. in Cambridge, Md., 16 Aug., 1809. While living a licentious life he was converted at a meeting of the followers of Whitefield in 1763, and entered the communion of the Presbyterian church. He was a zealous Whig, and fought with the Maryland militia in the Revolutionary war. He had grown less earnest in religious matters, when, in 1778, he was deeply impressed by the preaching of Francis Asbury, united with the Methodist church, and in 1780 became an itinerant preacher. He was ordained a deacon in 1786, and an elder in 1788. He was presiding elder of Cecil and neighboring circuits in 1789–'90, and of other districts in Maryland till 1800, when he became presiding elder in Philadelphia, and afterward of the Delaware district. In 1804 he became disabled for continuous labor, though he continued to preach as a supernumerary. He was distinguished for the boldness and directness of his preaching, and was one of the most successful of the early Methodist revivalists.

EVERHART, Benjamin Matlack, botanist, b. near West Chester, Pa., 24 April, 1818. His father, William Everhart, the son of a Revolutionary soldier, was a merchant, and a member of congress in 1853–'5. Benjamin was educated in private schools in West Chester, and spent his early life in mercantile business there and in Charleston, S. C. From boyhood he was an ardent student of botany, and since retiring from business in 1867 he has devoted himself almost entirely to that science, particularly to cryptogamic botany. In connection with J. B. Ellis, of New Jersey, he has been active in issuing yearly fifty volumes, called "The Century of North American Fungi," each volume describing 100 species. At the same time, with W. A. Kellerman, of Kansas, they are publishing the "Journal of Mycology." He is a specialist of deserved repute in his science, has discovered many new fungi, and several such plants have been named for him by his fellow-scientists. — His brother, **James Bowen,** author, b. near West Chester, Pa., 26 July, 1821, was graduated at Princeton in 1842, and studied law in West Chester, Philadelphia, and at the Harvard law-school. After practising law in West Chester for a few years, he travelled extensively in Europe and the east, and then devoted himself to literature. He was elected to the state senate in 1876, and was re-elected in 1880, but resigned in 1883, having been chosen as a Republican to congress, where he served in 1883–'7, and then retired to private life. His writings, which are marked by terseness of style, include "Miscellanies," in prose (West Chester, Pa., 1862); a volume of short poems (Philadelphia, 1868); and "The Fox Chase," a poem (Philadelphia, 1875).

EVERTS, Orpheus, physician, b. in Union county, Ind., 26 Dec., 1826. His father, a physician from Vermont, was a pioneer in Indiana. Orpheus was graduated at the medical college connected with La Porte university, Ind., in 1846, practised in St. Charles, Ill., and in Indianapolis, Ind., served as a field surgeon during the civil war, and in 1868 became superintendent of the Indiana hospital for the insane. He designed the female department in the hospital on an original plan. In 1880 he became superintendent of the Cincinnati sanitarium, a private hospital for the insane. Besides papers in medical journals, he has published "Giles & Co., or Views and Interviews concerning Civilization"

(Indianapolis, 1878), and "What shall we do with the Drunkard? or, Rational Views of the Use of Alcoholic Drinks" (Cincinnati, 1883).

EVERTS, William Wallace, clergyman, b. in Granville, Washington co., N. Y., 13 March, 1814. He was graduated at the Hamilton literary and theological institution (now Madison university) in 1837, and in the same year was ordained as pastor of the Baptist church in Earlville, N. Y. In 1839 he became pastor of the Tabernacle Baptist church in New York, and in 1842 he founded the Laight street Baptist church in the same city. Subsequently he was pastor in Wheatland, N. Y., Louisville, Ky., and in Chicago, where he remained for twenty years. While there he was actively engaged in founding the Chicago university and the Chicago Baptist theological seminary. He removed to Jersey City, N. J., in 1879, and became pastor of a Baptist church there, but resigned his charge in 1885. Dr. Everts is the author of the following works: "The Pastor's Hand-Book" (New York, 1856); "The Bible Prayer-Book"; "The Scriptural School Reader"; "Life and Thoughts of John Foster"; "The Voyage of Life"; "The Promise and Training of Childhood"; "Words in Earnest"; and "Tracts for the Churches."

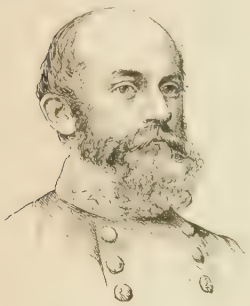
EVERTSEN, Cornelis, Dutch naval officer, b. in Zealand. He was a son of Admiral Cornelis Evertsen, who was killed in a battle with the English in 1666. He commanded a squadron of fifteen ships that was despatched against the English colonies in 1673. After capturing or destroying the Virginia fleet of tobacco ships in the Chesapeake, he sailed northward, and on 7 Aug. anchored off Staten Island. His fleet had been re-enforced, and now, with its prizes, numbered 27 sail, with 1,600 men. Evertsen demanded the surrender of the city, saying, "We have come to take the place, which is our own, and our own we will have." Some of the Dutch citizens visited the hostile fleet, and described the state of the defenses to the officers. The Dutch militia spiked the guns of a recently erected battery. On 8 Aug. the fleet moved up the bay, exchanged shots with the fort, and landed 600 men under Capt. Anthony Colve, to whom the fort was surrendered without bloodshed, the British garrison being allowed to march out with the honors of war. The name New Orange was given to the reconquered city. The neighboring settlements hastened to make their submission, and Evertsen, after confiscating the Duke of York's property, restoring the old form of municipality, and proclaiming Colve governor-general, set sail for Holland.

EWART, Thomas West, lawyer, b. in Grand View, Washington co., Ohio, 27 Feb., 1816; d. in Granville, Ohio, 8 Oct., 1881. He was self-educated, but rose to prominence in his profession. He was a member of the convention that formed the present constitution of Ohio, and was actively engaged for more than a generation in promoting the educational and missionary work of the Baptist denomination, with which he was identified. He was a trustee of Denison university, president of the Ohio Baptist state convention, and vice-president of the American Baptist missionary union. In 1878 the degree of LL. D. was conferred upon him by Denison university.

EWBANK, Thomas, scientist, b. in Durham county, England, 11 March, 1792; d. in New York, 16 Sept., 1870. At the age of thirteen he was apprenticed to a tin and copper smith, and about 1819 emigrated to New York, and followed the trade of a machinist, occupying at first Fulton's factory at Paulus Hook, which had remained undisturbed since the inventor's death. In 1820 he began the manufacture of metallic tubing in New York, and retired in 1836 to devote himself to literary and scientific pursuits. From 1849 till 1852 he was U. S. commissioner of patents. As a member of the commission to examine and report upon the strength of the marbles offered for the extension of the National capitol, he suggested the employment of woolen instead of the plates of lead usually placed between the stones, and established the fact that lead caused the stones to give way at half the pressure they would sustain without it, and that consequently in all previous trials there had been an undervaluation of the power of resistance to pressure in building-stones. He was one of the founders of the American ethnological society. He published "Descriptive and Historical Account of Hydraulic and other Machines, Ancient and Modern" (New York, 1842; 15th ed., with additions, 1863); "The World a Workshop, or the Physical Relation of Man to the Earth" (1855); "Life in Brazil," describing a visit to that country in 1845–'6, with an appendix on a collection of American antiquities (1857); "Thoughts on Matter and Force" (1858); "Reminiscences in the Patent Office" (1859); and a variety of miscellaneous essays on the philosophy and history of inventions, which appeared chiefly in the "Transactions of the Franklin Institute." His "Experiments on Marine Propulsion, or the Virtue of Form in Propelling Blades," was reprinted in Europe. In 1860 he published an essay that he had read before the Ethnological society, entitled "Inorganic Forces Ordained to Supersede Human Slavery."

EWELL, Benjamin Stoddert, soldier and educator, b. in Washington, D. C., 10 June, 1810. He is a grandson of Benjamin Stoddert, first secretary of the navy. He was graduated at the U. S. military academy in 1832, and assigned to the 4th artillery. He served in the military academy as assistant professor of mathematics in 1832–'5, and as assistant professor of natural and experimental philosophy in 1835–'6, when he resigned. From 1836 till 1839 he was one of the principal assistant engineers of the Baltimore and Susquehanna railroad. He was professor of mathematics at Hampden-Sidney from 1840 till 1846, when he was elected to the Cincinnati professorship of mathematics and military science in Washington college, Lexington, Va., which office he held two years. In 1848 he was elected professor of mathematics and acting president of William and Mary, and became president in 1854. He held this office till the beginning of the civil war, when the college was suspended. He then served in the Confederate army as colonel of the 32d Virginia regiment in 1861–'2, and afterward was appointed adjutant-general to Gen. Joseph E. Johnston, when he commanded the departments of Tennessee and Mississippi. He was again elected president of William and Mary in 1865, and still (1887) retains the office. The degree of LL. D. was conferred on him from Hobart college in 1874. He was made an honorary member of the Royal historical society of Great Britain in 1880. Dr. Ewell urged the election and re-election of Gen. Grant to the presidency because of his moderation and magnanimity at the close of the civil war. He was opposed to secession in 1861, thinking it unnecessary and unconstitutional, and resisted the measure until war was waged. Since 1865 he has exerted himself to foster harmony between the north and the south, and loyalty to the National government. He spoke in the house of representatives at Washington on 1 April, 1874, and again on 25 Jan., 1876,

in support of the petition of William and Mary college for an appropriation on account of the destruction of its buildings and property during the civil war.—His brother, **Richard Stoddert,** soldier, b. in Georgetown, D. C., 8 Feb., 1817; d. in Springfield, Tenn., 25 Jan., 1872, was graduated at the U. S. military academy in 1840. His first experience of actual warfare was obtained in Mexico, where, in August, 1847, he was engaged at Contreras and at Churubusco. He was promoted to captain, 4 Aug., 1849, and in June, 1857, won distinction fighting against the Apaches in New Mexico. When the civil war began, he resigned his commission, entered the Confederate army, and was actively engaged throughout the war. He was promoted to the rank of major-general, and fought at Blackburn's Ford, 18 July, 1861, and at Bull Run, 21 July. In the following year he distinguished himself under Jackson, by whom he was greatly trusted, and took an active part in the various movements preceding the second battle of Bull Run, losing a leg at Warrenton Turnpike on 28 Aug., 1862. He took part also in the Maryland campaign. When Gen. Jackson was fatally wounded at Chancellorsville, Ewell, at his request, was promoted to lieutenant-general, and assigned to the command of the 2d corps. At the head of Jackson's veterans he fought valiantly at Winchester, at Gettysburg, and at the Wilderness on the Confederate left. He was captured, with his entire force, by Sheridan at Sailor's Creek, 6 April, 1865. After the war he retired to private life. Gen. Grant says in his "Memoirs": "Here" [at Farmville] "I met Dr. Smith, a Virginian and an officer of the regular army, who told me that in a conversation with Gen. Ewell, a relative of his" [who had just been made a prisoner], "Ewell had said that when we had got across the James river he knew their cause was lost, and it was the duty of their authorities to make the best terms they could while they still had a right to claim concessions. The authorities thought differently, however. Now the cause was lost, and they had no right to claim anything. He said further, that for every man that was killed after this in the war, somebody is responsible, and it would be but very little better than murder. He was not sure that Lee would consent to surrender his army without being able to consult with the president, but he hoped he would." Grant says this gave him the first idea of demanding the surrender.—Another brother, **Thomas,** was killed at the battle of Cerro Gordo, Mexico, in 1847.



R. S. Ewell

EWELL, Marshall Davis, lawyer, b. in Oxford, Oakland co., Mich., 18 Aug., 1844. He was graduated at the Michigan state normal school in 1864, studied law, and was admitted to the bar at Detroit in 1868. He was elected judge of probate in Mason county, Mich., in 1874, and since 1877 has been professor of common law in the Union college of law, Chicago, Ill., and is an editor of the "American Law Register," of Philadelphia, and of the "Chicago Law Times." He has also given much attention to microscopy and metorology, and is professor of microscopical technology in Northwestern university, Evanston, Ill., and secretary of the Medico-legal society of Chicago. In 1886 he was elected a fellow of the Royal microscopical society of London. Michigan university gave him the degree of LL. D. in 1879, and Chicago medical college that of M. D. in 1884. Dr. Ewell has published "Blackwell on Tax Titles" (Boston, 1875); "Leading Cases in Disabilities" (1876); "Treatise on the Law of Fixtures" (Chicago, 1877); "Illinois Reports" (vols. xxxii.–xxxvi. inclusive, 1877); "Washburn's Manual of Criminal Law" (1878); "Evans on Agency" (1879); "Lindley on Partnership" (1881); "Student's Manual of Medical Jurisprudence" (1887); and an abridgment of Blackstone.

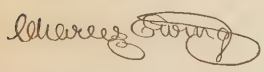
EWEN, Mary Cecilia, actress, b. in New York city in 1836; d. there, 10 Nov., 1866. Her maiden name was Taylor. She made her first public appearance, at ten years of age, at a concert given in New York, and sang a scene from "Der Freischutz." Shortly afterward she appeared in the chorus of "Amilie" at the National theatre. Her special forte was light comedy, and she became so great a favorite that she was familiarly known as "Our Mary." Among her greatest successes in the various theatres where she played were "Life in New York," "Child of the Regiment," and "Pride of the Market." She married, 11 Nov., 1852, W. Ogilvie Ewen, and retired from the stage.

EWEN, William, patriot, b. in England about 1720; d. in Georgia soon after the Revolution. He came to Georgia about 1734 as an apprentice to the trustees, and was one of the earliest and most active of the Revolutionary leaders of that state. He was a member of the Council of safety, and as first president of the executive council performed the duties of governor in 1775.

EWER, Ferdinand Cartwright, clergyman, b. in Nantucket, Mass., 22 May, 1826; d. in Montreal, Canada, 10 Oct., 1883. He was graduated at Harvard in 1848. His parents were Unitarians, but he was baptized by the rector of the Protestant Episcopal church in Nantucket. This gentleman was one of the earliest of the "Ritualists," and young Ewer entered zealously into the novelties in worship of that day in the Episcopal church. It was his purpose to enter the ministry, but instead he chose civil engineering as his profession, and in 1849 sailed for California by way of Cape Horn. There he became a journalist, and for eight years was busily occupied in editorial work. In 1852, after years of doubt, he returned to the Episcopal church, was ordained deacon in 1857, and priest in 1858. He soon became rector of Grace church, San Francisco, where he labored for two years. His health having become impaired, he returned to the east in 1860, was for a while assistant minister in St. Ann's church, New York city, and in 1862 was chosen rector of Christ church. Here he began the introduction of practices not usual in Episcopal churches, which, after a time, created disturbance among the people, and the rector felt it best to resign his charge. This was in 1871, when some friends organized a new parish for him by the name of St. Ignatius. Here he was at liberty to carry out fully his views as to doctrine and ritual, and he became the foremost champion of what he called catholic principles. Dr. Ewer was a man of genial spirit and temper, and was an able writer on theological and controverted points. While preaching in St. John's church, Montreal, Sunday, 7 Oct., 1883, he was stricken with paralysis, and died the third day afterward. Among other works he wrote "Two Eventful Nights, or the Fallibility of Spiritualism Exposed" (New York, 1856);

"Catholicity in its Relations to Protestantism and Romanism" (1878); "The Operation of the Holy Spirit" (1880); and "Grammar of Theology" (1880).

EWING, Andrew, Confederate soldier, b. in Nashville, Tenn.; d. in Atlanta, Ga., 16 June, 1864. He studied law and became eminent in his profession, and for years participated in the political controversies that distinguished the history of Tennessee at that time. He represented the Nashville district in congress from 3 Dec., 1849, to 3 March, 1851, having been elected as a Democrat. In February, 1861, he was elected as a Unionist to represent Davidson county in the proposed State convention, which was voted down by the people. Subsequently he was drawn away from his allegiance to the Union, and took an active part against the government. After the fall of Fort Donelson he left his home, and until he died held an office in the Confederate army.



EWING, Charles, jurist, b. in Burlington county, N. J., 8 July, 1780; d. in Trenton, N. J., 5 Aug., 1832. He was the son of James Ewing, a Revolutionary patriot, and a commissioner of loans for New Jersey. Charles was graduated with honors at Princeton in 1798, studied law, was admitted to the bar in 1802, and practised successfully in Trenton. In 1812 he became a counsellor, and from 1824 till his death was chief-justice of New Jersey. His knowledge of law was profound, and he was justly regarded as one of the greatest jurists in the state. He was also prominent in religious matters, and was for many years an elder in the Presbyterian church.

EWING, Finis, clergyman, b. in Bedford county, Va., 10 June, 1773; d. in Lexington, Mo., 4 July, 1841. He was of Scotch-Irish descent, and both his parents were eminent for piety. His early education was neglected, but it is said that he studied for a time in college. After the death of his parents he settled near Nashville, Tenn., and in 1823 married a daughter of William Davidson, a Revolutionary general. Soon afterward he went to Logan county, Ky., where he was licensed to preach, and in 1803 was ordained by the Cumberland presbytery. He met with remarkable success as a revivalist, but his ordination was not recognized by the Kentucky synod, and the presbytery being dissolved, and the action of the synod having been sustained by the general assembly, he, with two others, organized in 1810 the new Cumberland Presbyterian church, which now numbers about 2,000 congregations. In doctrine they occupy a middle ground between Calvinism and Arminianism. A few years after originating the new denomination Mr. Ewing removed to Todd county, Ky., and became pastor of Lebanon congregation, near Ewingsville. In 1820 he proceeded to Missouri, settled in what is now Cooper county, and organized a congregation at New Lebanon, which still flourishes. In 1836 he removed to Lexington, Lafayette county, where he preached till his death. He is the author of "Lectures on Divinity," which contains the germ of the peculiarities of the creed of the Cumberland Presbyterians.

EWING, James, soldier, b. in Lancaster county, Pa., 3 Aug., 1736; d. in Hellam, York co., Pa., 1 March, 1806. He was of Scotch-Irish descent, his father having emigrated from the north of Ireland to Pennsylvania in 1734. The son received a good education. During Forbe's expedition to Fort Duquesne he entered the provincial service, and was commissioned lieutenant 10 May, 1758. He was a member of the general assembly from 1771 till 1775. At the outbreak of the Revolution he was on the committee of safety for York county, and was chosen one of the two brigadier-generals of the Pennsylvania associators, 4 July, 1776. He had a part assigned to him at the surprise of Trenton, but was prevented from crossing the Delaware as previously arranged, owing to the ice and high wind. He served as vice-president of Pennsylvania from 7 Nov., 1782, till 6 Nov., 1784. In the latter year, and under the constitution of 1789–'90, he was a member of the assembly of Pennsylvania, and served as state senator from 1795 till 1799. He was one of the original trustees of Dickinson college, Carlisle.

EWING, John, educator, b. in Nottingham, Md., 22 June, 1732; d. in Philadelphia, Pa., 8 Sept., 1802. His ancestors emigrated from Ireland and settled in Pennsylvania. After attending the academy of Dr. Francis Alison in New London, he entered Princeton, where he was graduated in 1754, and served as tutor in 1756. He then studied theology with Dr. Alison, and was licensed by the presbytery of Newcastle. While employed in instructing the philosophical classes in the College of Philadelphia, during the absence of its provost, in 1759, he was called to the 1st Presbyterian church of that city. He was commissioned in 1773 to solicit contributions in Great Britain for the support of the academy of Newark, in Delaware, and was successful. He had frequent interviews with the prime minister, Lord North, and Dr. Johnson. The last affirmed that the Americans were as ignorant as they were rebellious, and said, "You never read. You have no books there." "Pardon me," was the reply, "we have read the 'Rambler.'" In 1775 he returned from Europe, and from 1779 till his death held, in conjunction with his pastorate, the office of provost of the University of Pennsylvania. He was a thorough mathematician and scientist, and assisted Rittenhouse in surveying the boundaries of several states. The University of Edinburgh gave him the degree of D. D. in 1773. He was vice-president of the American philosophical society, and made several contributions to its "Transactions," among which was an "Account of the Transit of Venus over the Sun." His collegiate lectures on natural philosophy, and a biography by Rev. R. Patterson, were published after his death (2 vols., 1809), and also a volume of his sermons, with a memoir (Philadelphia, 1812).

EWING, Thomas, statesman, b. near West Liberty, Ohio co., Va., 28 Dec., 1789; d. in Lancaster, Ohio, 26 Oct., 1871. His father, George Ewing, served in the Revolutionary army, and removed with his family in 1792 to the Muskingum river, and then to what is now Athens county, Ohio. In this unsettled district young Ewing's education was necessarily imperfect. His sister taught him to read, and in the evenings he studied the few books at his command. In his twentieth year he left his home and worked in the Kanawha salt establishments, pursuing his studies at night by the light of the furnace-fires. He remained here till

he had earned enough money to clear from debt the farm that his father had bought in 1792, and had qualified himself to enter the Ohio university at Athens, where, in 1815, he received the first degree of A. B. that was ever granted in the Northwest. He then studied law in Lancaster, was admitted to the bar in 1816, and practised with success for fifteen years. In 1831–'7 he served as U. S. senator from Ohio, having been chosen as a Whig. He supported the protective tariff system of Clay, and advocated a reduction in the rates of postage, a recharter of the U. S. bank, and the revenue collection bill, known as the "force-bill." He opposed the removal of the deposits from the U. S. bank, and introduced a bill for the settlement of the Ohio boundary question, which was passed in 1836. During the same session he brought forward a bill for the reorganization of the general land-office, which was passed, and also presented a memorial for the abolition of slavery. In July, 1836, the secretary of the treasury issued what was known as the "specie circular." This directed receivers in land-offices to accept payments only in gold, silver, or treasury certificates, except from certain classes of persons for a limited time. Mr. Ewing brought in a bill to annul this circular, and another to make it unlawful for the secretary to make such a discrimination, but these were not carried. After the expiration of his term in 1837 he resumed the practice of his profession. He became secretary of the treasury in 1841, under Harrison, and in 1849 accepted the newly created portfolio of the interior, under Taylor, and organized that department. Among the measures recommended in his first report, 3 Dec., 1849, were the establishment of a mint near the California gold-mines, and the construction of a railroad to the Pacific. When Thomas Corwin became secretary of the treasury in 1850, Mr. Ewing was appointed to succeed him in the senate. During this term he opposed the fugitive slave law, Clay's compromise bill, reported a bill for the establishment of a branch mint in California, and advocated a reduction of postage, and the abolition of slavery in the District of Columbia. He retired from public life in 1851, and again resumed his law-practice in Lancaster. He was a delegate to the peace congress of 1861. During the civil war he gave, through the press and by correspondence and personal interviews, his counsel and influence to the support of the National authorities. While he devoted much of his time to political subjects, the law was his favorite study and pursuit. He early won and maintained throughout his life unquestioned supremacy at the bar of Ohio; and ranked in the supreme court of the United States among the foremost lawyers of the nation. In 1829, just after his father's death, Gen. William T. Sherman, then a boy nine years of age, was adopted by Mr. Ewing, who afterward appointed him to the U. S. military academy, and in 1850 he married Ellen, the daughter of his benefactor.—His son, **Hugh Boyle,** soldier, b. in Lancaster, Ohio, 31 Oct., 1826, was educated at the U. S. military academy. At the time of the gold fever, in 1849, he went to California by way of New Orleans and Texas, and travelled extensively through that country, going to the High Sierra in an expedition sent by his father, then secretary of the interior, to rescue emigrants from the snows. In 1852 he returned by way of Panama, as bearer of despatches to Washington. He then went to Lancaster and completed his law studies, began the practice of his profession in St. Louis in 1854, and two years later opened an office with his brother Thomas in Leavenworth, Kansas. In 1858 he removed to Ohio, in order to assume charge of his father's salt-works. In April, 1861, he was appointed brigade-inspector of Ohio volunteers, with the rank of major, and took part in the early combats in the mountains of West Virginia under McClellan and Rosecrans. He commanded the 30th Ohio regiment in August, 1861, was appointed brigadier-general, 29 Nov., 1862, and brevetted major-general in 1865. He led a brigade at Antietam, and at the siege of Vicksburg, and a division at Chickamauga, which formed the advance of Sherman's army, and which, in a desperate battle, carried Mission Ridge. He was afterward ordered to North Carolina, and was preparing a secret joint military and naval expedition up the Roanoke, when the war came to an end. In 1866 he was appointed U. S. minister to Holland, where he served for four years. After his return he bought a small estate near his native town, where he has since resided. Gen. Ewing has travelled widely in this country and abroad, and is author of "The Grand Ladron, a Tale of Early California," and "A Castle in the Air" (1887).—Another son, **Thomas,** lawyer, b. in Lancaster, Ohio, 7 Aug., 1829, was educated at Brown university, which gave him the degree of A. M. in 1860. He was private secretary to President Taylor from 1849 till 1850, and subsequently studied law in Cincinnati, where he began to practise his profession. In 1856 he removed to Leavenworth, Kansas, and became a member of the Leavenworth constitutional convention of 1858, and in 1861 became the first chief-justice of the state. He was a delegate to the Peace conference of 1860. He resigned his judgeship in 1862, recruited the 11th Kansas regiment, was made its colonel, and served with distinction in the civil war, taking part in the battles of Fort Wayne, Cane Hill, and Prairie Grove. He was made brigadier-general, 13 March, 1863, for gallantry at the last-named battle, commanded the district of the border, and subsequently at Pilot Knob, 28 Sept., 1864, with a thousand men, held his position against the repeated assaults of the Confederates under Price, thus checking the invasion of Missouri. He made a retreat to Rolla in 1864, and in 1865 was brevetted major-general of volunteers. After the war he practised law in Washington, D. C., but returned to Lancaster in 1871, and in 1877–'81 was a member of congress, where he prepared a bill to establish a bureau of labor statistics. He also actively supported the measures that stopped the use of troops at the polls, advocated the remonetization of silver, and the retention of the greenback currency. In 1879 he was the unsuccessful candidate for governor of Ohio. At the close of his last term in congress he declined a renomination, and removed to New York city, where he has since practised law.—Another son, **Charles,** soldier, b. in Lancaster, Ohio, 6 March, 1835; d. in Washington, D. C., 20 June,

1883, was educated in his native town, at a Dominican college, and at the University of Virginia. At the beginning of the civil war he received a commission in the regular army as captain of the 13th infantry, and also served for some time on the staff of his brother-in-law, Gen. William T. Sherman. He was brevetted major in 1863 for gallantry in the first assault at Vicksburg, where he was wounded while planting the flag of his battalion on the parapet. He was also brevetted lieutenant-colonel in 1864 for services in the Atlanta campaign, and colonel in 1865 for gallant conduct during the war. On 8 March, 1865, he was appointed brigadier-general of volunteers. He resigned his commission in 1867, and practised law successfully in Washington, D. C., during the remainder of his life.

EWING, William Bellford, physician, b. in Greenwich, N. J., in 1776; d. there, 23 April, 1866. He was graduated at Princeton in 1794, studied medicine at Trenton under Dr. Nicholas Bellville, and began to practise his profession in the island of St. Croix, where he continued for two years. He then settled in Greenwich, where he practised for twenty-eight years. For many years he was presiding judge of the county courts, for ten years a member of the legislature, and a member of the New Jersey constitutional convention of 1841. In 1823 he was president of the New Jersey medical society, of which he was one of the oldest fellows.

EWING, William Lee Davidson, senator, b. in 1795; d. in Ohio, 25 March, 1846. He received an academic education, studied law, was admitted to the bar, and began practice. He became receiver of public moneys for the district of Vandalia in 1825, and in 1826–'7 was U. S. surveyor of public lands and general of state militia. He served as major of the "Spy battalion" in the Black-Hawk war in 1832, became a member of the state senate in that year, and was its speaker in 1834, acting as governor from 15 Nov. till 9 Dec. On 29 Dec., 1835, he was chosen to the U. S. senate to fill the vacancy caused by the death of Elias K. Kane, and he served till 4 March, 1837. He was speaker of the state house of representatives in 1840, and in 1843 was chosen state auditor, which office he held until his death.

EXMOUTH, Edward Pellew, Viscount, English naval officer, b. in Dover, England, 19 April, 1757; d. in Teignmouth, 23 Jan., 1833. He entered the navy in 1770, and joined the frigate "Blonde," which sailed to the relief of Quebec. His first distinction was gained in the battle of Lake Champlain, 11 Oct., 1776, against the flotilla of Arnold, whom he nearly made prisoner. In command of a body of seamen, he rendered great assistance to the army of Burgoyne in its difficult advance to Saratoga, was sent to England with despatches, and promoted. He became post-captain in 1782, and from 1786 till 1789 was stationed off Newfoundland. In the war with France he commanded the frigate "Nymphe," of thirty-six guns, in 1793, and captured the French frigate "La Cléopâtre," after a desperate battle. This was the first prize taken in the war, and Exmouth was knighted, and afterward employed to blockade the coast of France. In 1796, by his bravery and presence of mind, he saved the lives of all on board a wrecked transport near Plymouth, and for this action he was made a baronet. He was elected to parliament in 1802. He returned to the navy in 1804, was promoted rear-admiral, and made commander-in-chief in the East Indies, where he annihilated the Dutch fleet in 1806. He became vice-admiral in 1808, was sent to command forces in the Mediterranean in 1810, and during this service concluded treaties with Algiers, Tunis, and Tripoli, for the abolition of Christian slavery. In 1814 he was created Baron Exmouth of Canonteign and admiral of the blue, and in 1816 was advanced to a viscounty for his gallantry in bombarding and destroying the fleet and arsenal of Algiers in that year. He was retired from active service in 1821.

EXPILLY, Jean Charles Marie, French author, b. in Salon, Bouches-du-Rhône, 8 Sept., 1814. He was a relative of the famous geographer, Jean Joseph Expilly, received his education at the Lycée Charlemagne of Paris, was graduated in law at Aix, and afterward served his time in a regiment of lancers. Since 1840 he has devoted his time entirely to literary work. He went to South America in 1852 and remained till 1858, studying the country and the political and economical situation. After his return to Paris he resumed for some time his work as a contributor to the prominent journals, but soon turned his attention entirely to political economy. His works on this subject soon gained him a reputation, and were the cause of his appointment in August, 1866, as commissary of emigration in Havre, and in 1868 to the same place in Marseilles. He published "Le Brésil tel qu'il est" (1862); "Les femmes et les moeurs du Brésil" (1863); "Du mouvement d'émigration dans le port de Marseille" (1864); "La traite, l'émigration et la colonisation au Brésil" (1865); "La vérité sur le conflit entre le Brésil, Buenos Ayres, Montevidéo et le Paraguay devant la civilization" (1866); "L'ouverture de l'Amazone, ses conséquences politiques et commerciales" (1867); La politique du Paraguay" (1869); and several novels, including "L'épée de Damocles" (1843); "Grand dame et lorette" (1854); "Les filles de Mahomet" (1854); "Le pirate noir" (1858); "La chêvre d'or" (1864); and "Les aventures du capitaine Cayol" (1866).

EYMA, Louis Xavier, French author, b. in St. Pierre, Martinique, West Indies, 16 Oct., 1816. When scarcely nineteen years old he was appointed to a place in the navy department in Paris, which he held for eleven years, and in 1846 he was sent by the government on several missions to the West Indies and the United States. After his return in 1848 he published interesting reports about the primary instruction and the general school system of the countries which he had visited. Soon afterward he travelled for a second time through the United States, and spent several years in studying the institutions and natural features of the country. He recorded his observations in several works published after his return, of which the best known are "Les femmes du nouveau monde" (1853); "Les deux Amériques" (1853); "Les peaux rouges" (1854); "Les peaux noires" (1856); "La République Américaine; ses institutions; ses hommes" (2 vols., 1861); "Les trente quatre étoiles de l'union Américaine" (2 vols., 1862); and "La Chasse à l'esclave" (1866). He also published an "Introduction à une politique générale" (1842); and many novels.

EYRE, Edward John, British diplomatist, b. in England in August, 1815. Failing to secure a commission in the army, he went to Australia in 1833, where he engaged in sheep-farming, was appointed magistrate of his district and protector of the aborigines, and became distinguished as an explorer. After serving for some time as governor of New Zealand, he was appointed lieutenant-governor of the island of St. Vincent in 1854, and in 1859–'60 was in the island of Antigua, acting as administrator of the Leeward islands during the absence of the governor. In 1860 he returned to England to recruit his health, which had become impaired by long residence in tropical climates,

and in 1862 he was chosen to administer the government of Jamaica and its dependencies during the absence of Gov. Darling. He found this a matter of difficulty, as the inhabitants were disaffected and on the point of rebellion. The colored population, constituting 97 per cent. of the inhabitants of the island, suffered from agricultural depression and loss of trade, and attributed their destitution to the misgovernment of their white legislators, who had recently increased the taxes and voted money for public works of a speculative character. They were further incensed by new laws prescribing flogging for petty offences, and introducing cruel punishments in the prisons. In 1864 Mr. Eyre was appointed captain-general, governor, and vice-admiral of the island of Jamaica, and in October, 1865, suppressed an insurrection. The means that he adopted in accomplishing this were censured by many in Great Britain, especially his condemnation to death of a rich mulatto, George William Gordon. A commission of inquiry was despatched to Jamaica, and Gov. Eyre was superseded temporarily by Sir Henry Storks. Though the report of the commission, published in June, 1866, disproved the charges brought against Eyre, he was nevertheless recalled, and on his arrival in England was prosecuted by the "Jamaica Committee" for his action in suppressing the revolt; but this and other prosecutions, extending over four years, costing him £10,000, failed to substantiate the charges against him.

EYRE, Sir **William,** British soldier, b. in Hatfield, England, in 1805; d. in England in 1859. He was a son of Vice-Admiral Sir George Eyre. He entered the army in 1823, accompanied the 73d regiment to Canada, and acted as aide-de-camp to the lieutenant-governor of Upper Canada while there. Subsequently he served in the Caffre war and attained the rank of lieutenant-colonel. He had command of a brigade in the Crimean war, and for his services was created a knight of the bath, a commander of the legion of honor, and a knight of the Turkish order of Medjidie. In June, 1856, he was appointed to the command of all the troops in Canada, and he also administered the government during the absence of Sir Edmund W. Head, the governor-general.

EYSTER, Nellie, author, b. in Frederick, Md., in 1831. She is the daughter of Abraham Blessing, and at the age of sixteen married David A. T. Eyster, of Harrisburg, Pa., where she resided till her removal to San José, Cal., in 1875. She has contributed frequently to "Harper's Magazine," "Saint Nicholas," and "Wide Awake," and has published in book-form "Sunny Hours" (1865); "Chincapin Charlie" (Philadelphia, 1866); "On the Wing"; "Tom Harding and his Friends" (1869); "Robert Brent's Three Christmas Days"; and "Lionel Wintour's Diary" (1882).

EYTINGE, Rose, actress, b. in Philadelphia, Pa., in September, 1835. She first appeared in Brooklyn as an amateur in 1852, and during the following year went west, playing with Hough's dramatic company. Later she was connected with the Green street theatre in Albany, and acted there for some time. Her first appearance in New York was in 1862 at the Olympic theatre, under the management of Laura Keene, where she filled an engagement of two weeks. Subsequently she was connected with Edwin Booth, and afterward was engaged at the Winter Garden theatre. In 1868–'9 she was leading lady in Wallack's company, playing Nancy Sykes, Lady Gay Spanker, Beatrice, and other characters. She then starred through the country in various rôles, succeeded best in Rose Michel, and afterward played Gervaise in "Drink" at the Standard theatre, New York, making a great success. Subsequently she appeared in the titular rôle of "Felicia" at the Union square in New York. In 1880 she visited England, where she was well received, and in 1884 made a starring tour through the United States, playing in legitimate drama. While in Albany she married David Barnes, from whom she was afterward divorced, and married George H. Butler, for a time U. S. consul-general to Egypt. Later she married Cyril Searle, who was her leading support while travelling.

EYZAGUIRRE (ay-thah-ghee'-ray), the name of five brothers, Chilians, who lived in the 18th and 19th centuries.—**Agustin,** statesman, b. in Santiago de Chili in 1766; d. there, 17 July, 1837. During the first days of the revolt of Chili against Spanish domination in 1810 he was a member of the municipal corporation of Santiago, and joined the revolutionary cause with enthusiasm, and in 1812 was elected deputy to the first congress. When, in 1813, Gen. Carrera marched to meet the invasion of Pareja, the senate appointed a temporary government, and Eyzaguirre was elected a member. He took an active part in founding the national academy and many schools, and in promulgating the liberty of the press; and during this administration the first republican paper was printed at Santiago. After the unfortunate battle of Rancaguas, in October, 1814, he, with other patriots, was imprisoned on the island of Juan Fernandez, until the battle of Chacabuco, 12 Feb., 1817, restored the exiles to their families. During the presidency of O'Higgins, Eyzaguirre retired to private life and devoted himself to his commercial interests. During this time he organized the famous Calcutta company, for direct trade between the East Indies and Valparaiso, and thus was the first that caused the Chilian flag to float in Asiatic seas. After the downfall of the O'Higgins government, 28 Jan., 1823, Eyzaguirre was twice called to the executive chair of the republic, first as a member of the provisional government, and again after the resignation of President Freire, whom he succeeded as vice-president, 10 Sept., 1826, to 26 Jan., 1827, when he resigned in consequence of a military mutiny, and returned to private life.—**Miguel,** jurist, b. in Santiago about 1770; d. in Lambayeque, Peru, in 1821. In 1805 he was appointed prosecutor of the royal supreme court of Lima, and afterward was made judge of the same court; but, on account of the participation of his brothers in the liberation of Chili, he fell under suspicion, was arrested and sent as prisoner to Spain, but died on the way.—**Domingo,** philanthropist, b. in Santiago, 17 July, 1775; d. there in April, 1854. He studied in the seminary of his native city, and showed remarkable aptitude for mathematics and chemistry. When scarcely nineteen years old he was appointed assayer of the royal mint of Santiago, but resigned the next year, and devoted himself entirely to the cultivation of a farm near Santiago, inherited from his father. There his labors tended more to the improvement of the condition of the laboring classes than to his own pecuniary interest. He improved the yield of some of the poorest lands by his knowledge of chemistry, introduced modern agricultural implements, and, by giving his laborers better than the accustomed wages and caring for their moral and material welfare, soon assembled a colony of well-to-do and contented people. He also introduced looms, which, although imperfect, served to weave from native wool the coarse cloth worn by the peasantry. From the first years of his country life he agitated the project of a canal

to water the barren plain surrounding Santiago, which had been begun some time before, but was abandoned. The Spanish government approved the plan, and in 1802 made Eyzaguirre director. He pushed the work with energy until it was interrupted by the revolution of 1810, and notwithstanding he sympathized with the patriotic cause, he abstained from any participation. His prestige as an honorable and impartial man was so great that, even when his brothers were exiled, he suffered no persecution from the Spanish authorities, and was enabled to alleviate the sufferings of his compatriots. When the independence of Chili was finally established in 1817, he resumed his favorite work, and in 1820, amid great festivities, the canal of Maipo was opened. This, with many smaller lateral canals, soon converted the arid plain into a fertile garden. It was placed by the government under the administration of a board, of which Eyzaguirre was appointed president. In 1823 he was commissioned to reorganize the charitable institutions, and undertook the task of building a home for wayfarers and needy persons. Within a few years he had collected the necessary means, and a new and commodious building was erected. In 1835 he was appointed first governor of the department of Victoria, the capital of which he had founded and spent a good part of his fortune in improving. He established the agricultural society in 1838, and was elected its president. He was several times deputy to the National congress, where he soon became noted for his honesty. In 1845 he attempted to establish a socialistic colony in the country, where the labor and produce should be shared by all, but soon dissensions broke out, and the project failed. A few years later he undertook to establish a large cloth-factory, with the object of improving the condition of the poor and giving occupation to women and children. In this enterprise he invested the greater part of his fortune, but before the factory was finished he died. The Maipo canal board erected a statue to his memory.—**José Alejo,** clergyman, b. in Santiago in 1783; d. there in 1850, studied in the seminary of his native city, and in the University of San Felipe, where he was graduated in law in 1803. He began the practice of his profession, and at the same time was made professor of canonical law in the university. In 1805 he accompanied his brother Miguel to Lima, but decided to enter the church, and in 1807 was consecrated priest. He returned in 1815 to Chili, and was appointed attorney of the ecclesiastical court of the archdiocese of Santiago, and afterward rector of the parish of Sagrario, where he became known as the most eminent pulpit orator of South America. In 1822 he was banished by the dictator O'Higgins to Mendoza, where he was well received by the clergy, and for two years directed an educational institute that was founded by him. Then he returned to Chili, and by the government of Freire was appointed on several important commissions. The archbishop made him his vicar, and afterward canon of the cathedral. He was elected three times to congress, and as such signed the constitution of 1828, and later was councillor of state. Some years later he was elected dean of the cathedral, and when the new bishopric of Serena was founded he was offered the seat, but declined it. In 1843, on the death of Archbishop Vicuña, he was appointed capitular vicar, and soon elected to the archbishopric, in which dignity he continued his simple, unostentatious life. Toward the end of 1845, on account of declining health, he resigned the archiepiscopal seat, and lived in privacy at Santiago till his death.—**José Ignacio,** senator, b. in Santiago about 1787; d. there about 1850, took a prominent part in the Chilian struggle for liberty, was banished with his brother Augustin to Juan Fernandez, and returned in 1817. In 1823 he was appointed secretary of the treasury, and in 1834 senator of the republic, which place he held until his death. In 1837 he wrote a history of the Chilian revolution.—His son, **José Ignacio Victor,** clergyman, b. in Santiago de Chili, 20 March, 1824; d. in Alexandria, Egypt, 8 Oct., 1875, studied in the seminary of Santiago, was early consecrated priest, and soon became famous as an orator. In 1854 he was elected to congress, and in 1856 became vice-president of the lower house. At the same time he was a member of several benevolent societies, and received high credit for promoting public instruction and protecting the poor. He was also professor of the humanities, theology, and sacred science. He travelled extensively in Palestine, Europe, and the United States, and published a work descriptive of that country. In 1871 he founded in Rome a South American seminary, and was appointed a monsignor. Eyzaguirre was elected member of several scientific societies in Italy and France, and honorary member of the Spanish academy. Returning from one of his trips to Palestine, he died on board a steamer in the port of Alexandria. His most important publications are "La historia eclesiástica, política y literaria de Chile"; "El catolicismo en presencia de sus disidentes"; and "Los intereses católicos en América"; all of which were published in Chili, and translated into French (Paris, 1874).

EZEKIEL, Moses Jacob, sculptor, b. in Richmond, Va., 28 Oct., 1844. He is of Hebrew parentage, and at an early age manifested his talent by painting panoramas. He entered the Virginia military institute, at Lexington, in 1861, and was graduated there in 1866, after serving in the Confederate army in 1864–'5. He then served in his father's dry-goods store, but devoted a portion of each day to his art, and executed some creditable paintings, among which was "The Prisoner's Wife." Soon afterward he gave his attention to sculpture, and produced "Cain, or the Offering Rejected," an ideal bust that showed dramatic talent. After studying anatomy in the Medical college of Virginia, he removed to Cincinnati in 1868, and in the following year went to Berlin, Germany. In 1872 he modelled the colossal bust of Washington, now in Cincinnati, which gained him admission into the Society of artists of Berlin. In 1873 he won the Michael Beer prize, which had never before been awarded to a foreigner. In 1874 the Jewish secret order Sons of the Covenant commissioned him to execute a group entitled "Religious Liberty" for the Centennial exhibition. This was unveiled in Fairmount Park, Philadelphia, 30 Nov., 1876, and now stands in front of Horticultural Hall. He was afterward commissioned to execute statues for the outside niches of the Corcoran art-gallery, Washington, D. C. Since 1886 his subjects have been mainly ideal. Among his works are busts of Liszt and Cardinal Hohenlohe; a statuette of "Industry" (1868); reliefs of Schiller and Goethe (1870); bas-relief portraits of Farragut (1872) and Robert E. Lee (1873); "Pan and Amor," a bas-relief (1875); "Fountain of Neptune," Netturno, Italy (1884); a bronze medallion of William W. Corcoran for his gallery in Washington (1886); and a group entitled "Art and Nature," in Frankfort, Germany (1887). He received the cavalier's cross of merit for art and science, with a diploma from the grand-duke of Saxe-Meiningen, in 1887.

F

FABERT, Antoine (fáh-báre), French traveller, b. in Moirans, Franche-Comté, in 1532; d. in Zoguato, Mexico, 2 March, 1574. He settled in Mexico in 1854, where he soon acquired a competency. Thenceforward he decided to devote himself to exploring the northern part of the country. He departed on his first expedition in 1565 with Father Pinto, a Franciscan monk. The party, consisting of four Europeans and thirty porters, after thirty-two days of steady marching, reached a large town called Chaco, in the province of Las Tiguas, where the hostility of the Indians forced them to turn back, and on the return journey Father Pinto died of a fever. Fabert was made bailiff of Cuatro Cienegas, in New Biscay, in 1566, retaining the office for four years. He finally decided to undertake a new exploring trip, and set out from Cuatro Cienegas, 7 Oct., 1570, accompanied by fifteen soldiers, numerous slaves, and one hundred horses and mules laden with arms and provisions. Taking his former route, he had penetrated by December to the country of the Tobosos, who disputed his passage. He set out on his return journey on 11 Dec., taking with him as prisoners a dozen Tobosos, after burning two of their villages. His third expedition was his most important. Leaving San Bartolomé, 8 Nov., 1573, with 25 soldiers, 200 slaves, and 140 baggage-horses and mules, he reached the Conchos territory on the 11th. Turning eastward, he avoided the Tobosos, and on 14 Dec. entered the country of the Cumanes, or Patarabuyes, a warlike tribe, who inhabited the borders of the Rio del Norte, and who were quite advanced in civilization. Their principal town was built of stone, its streets were straight and clean, and it contained several squares, ornamented with fine trees. A march of 140 miles through a pine forest brought Fabert to the borders of the Rio del Norte, a thickly populated region. On 29 Jan. he entered the Cumanes territory, where he saw four cities and estimated their population at about 25,000. The capital was Cia, a commercial city. The inhabitants were clothed in garments of woven cotton. On 11 Feb. he reached the country of the Ameyas, which contained five towns with a population of about 30,000. On the 16th he visited the city of the Acomas, built in the midst of rocks, and 60 miles farther on he reached, on 20 Feb., the Zuñi country, the capital of which was Cibola. Fabert here found the cross planted by Francisco Vasquez de Coronado in 1540, marking the graves of three of his companions. On 26 Feb. he arrived at the province of Mohotze and stopped in the principal town, Zoguato, which had a population of about 10,000 inhabitants. Here Fabert died of a fever. His companions raised a tomb to his memory, and conducted the expedition back to San Bartolomé, where it arrived 15 May, 1574. The countries through which Fabert passed were explored about twenty years later by Espejo (*q. v.*). Fabert is mentioned by Mendoza in his "Historia del Grande Reyno de China" (Madrid, 1589); by Hakluyt in his "Voyages"; by Humboldt in his "Essai politique sur le Royaume de la Nouvell Espagne"; and by Bordier in his "Histoire du Mexique."

FABRE, Charles Edward, Canadian R. C. archbishop, b. in Montreal, 28 Feb., 1827. At the age of nine he was sent to the College of St. Hyacinthe, where he remained until 1843. After spending two years in Paris, he entered the ecclesiastical seminary of Issy. In 1846 he visited Italy, obtained an audience with the pope, and returned to Canada. He was ordained priest, 23 Feb., 1850, and stationed as curate in Sorel. On 30 Oct., 1852, he was appointed pastor of Pointe-Claire, where he exercised his ministry for two years. He was then summoned to Montreal, and became distinguished as a pulpit orator; also for his influence among the students of the city, his lectures and retreats having wrought a marked change among the medical students. He made a second visit to Rome in 1869 at the time of the Vatican council, and thence went to Belgium to study the method of articulation in use in the deaf-and-dumb asylums. He afterward turned his experience to account in the institution that he founded in Montreal. On 1 April, 1873, he was consecrated bishop of Gratianopolis and coadjutor of Montreal. He was appointed bishop of Montreal, 11 May, 1876, and in 1886, the diocese of Montreal having been erected into an archiepiscopal see, Dr. Fabre became the first archbishop, 8 June.—His brother, **Louis K. Hector,** Canadian journalist, b. in Montreal, 9 Aug., 1834, was educated at the College of L'Assomption and St. Hyacinthe, and at St. Sulpice of Montreal. He studied law with his brother-in-law, the late Sir George E. Cartier, and was called to the bar of Lower Canada in 1856. He has been long connected with the newspaper press of Quebec. He was for some time editor of "L'Ordre," Montreal, and from 1862 till 1866 had editorial management of "Le Canadien," Quebec. In 1869 he founded "L'Événement," Quebec, and was its editor and proprietor. He has been a vice-president of the Dominion editors' and reporters' association, and president of the Literary and historical society of Quebec. He was an unsuccessful candidate for a seat in the house of commons in 1873, but was called to the senate in 1875. He is the author of "Ésquisse biographie sur Chevalier de Lorimier" (Montreal, 1856); "Ecrivains Canadiens" ("Canadian Review," 1865–'6); "Canadian Literature" (1866); and "Confederation, Independence, Annexation" (Quebec, 1871).

FABREGAT, Lino (fah-bray-gah'), Mexican scholar, b. in Mexico in 1746; d. there in 1809. He was the son of a rich Mexican ship-owner, and was himself engaged in commerce for some time, but, after suffering several severe losses, he decided to give up business and devote himself to study. He entered the Jesuit's college in Mexico in 1774, and was debating as to what branch he should pursue, when Father Figueira, superior of the order, suggested that he apply himself to deciphering some Aztec manuscripts in the college library. Father Fabregat immediately set to work, became greatly interested, and was soon able to read the manuscripts. He spent much time in wandering about the country, examining private libraries, and searching for stones bearing Aztec inscriptions. He soon gathered a magnificent collection, which he spent his time in deciphering. The Jesuits now urged him to go to Rome, where he could profit by the labors of such men as Boturini, Veytia, Borunda, and Antonio Gama, some of whom were still living, and where the treasures of the Vatican would aid him in his researches. He accordingly set out for Rome, where, to facilitate his studies, Cardinal Borgia made him librarian in 1780. Thenceforward Father Fabregat lived alternately in Rome and Mexico. The French invasion of 1800 forced him to return to Mexico

permanently, and he remained there till his death. Father Fabregat's works are of great value, as he was one of the first to explain the signification of Aztec manuscripts, and therefore we owe to him all knowledge of Mexican history before the Spanish conquest. It is much to be regretted that Father Fabregat died before the completion of his labors, and left behind him but few notes, for since his time but little advance has been made in knowledge on these subjects. Had he lived a few years longer, many points would have been decided that to this day remain contested. Father Fabregat left a manuscript in Italian in the Vatican library entitled "Explicatione delli figuri hieroglifichi del Codice Mexicano." This work was published by Ramirez (1827), and opened the way to important discoveries. The notes left by Father Fabregat were collected and published by Ternaux-Compans, as "Notes et manuscrits et ouvrages inachevés laissés par l'illustre hieroglyphe Mexicain, Fabregat tirés des archives du college des Jesuites et de la bibliothèque Vaticane" (4 vols., Paris, 1843).

FAGNANI, Joseph (fan-yah'-nee), artist, b. in Naples, Italy, 24 Dec., 1819; d. in New York city, 22 May, 1873. He studied art in the Royal academy of Naples, and began his career at an early age. His reputation was established by several crayon portraits, among the most remarkable of which was that of Baron Smucker. He removed to Vienna, and painted a portrait of the Archduke Charles. In 1842 he accepted the offer from the queen regent of Spain, Maria Christina, to make album-portraits of the distinguished persons that shared her exile. While under this engagement he formed the acquaintance of Sir Robert Peel and Sir Henry Bulwer, with whom he came to New York in 1851, and there married an American. In 1858 he visited Europe, and was ordered by Queen Christina, then at Malmaison, to paint two portraits of herself and portraits of the Prince and Princess Ladislas Czartoriski. In 1860 he painted two portraits of Richard Cobden, one of which was given by Fagnani to the New York sanitary fair, where it was bought by Morris Ketchum, Esq., who presented it to the New York chamber of commerce; the other was purchased by the National portrait gallery of London. His principal works are the portraits of Garibaldi, Victor Emanuel, the Prime Minister Ratazzi and Gen. Cialdini, Sir Henry Bulwer, Lord Byron, the ex-Empress Eugenie, and the Countess Guicciola. Among his drawings is a sketch of President Taylor, taken after his death, and a portrait of Sir Henry Bulwer, executed in Madrid in 1846. His house in New York contained many rare specimens of art, collected from all parts of Europe. This collection was sold shortly after his death. His paintings of the "Nine Muses," now in the Metropolitan museum of art, New York, attracted much attention, as well-known American beauties had served as models.

FAGOAGA, Francisco (fah-go-ah'-gah), Mexican philanthropist, b. in the city of Mexico, 7 Feb., 1788; d. there, 20 July, 1851. He was a son of the first Marquis of Apartado. Fagoaga entered the College of San Ildefonso in 1799, where he studied philosophy, went to Paris in 1808 to finish his studies, and afterward travelled through Europe. After his return to Mexico he was elected, in 1820, deputy for the province of Mexico to the Spanish cortes, and, sympathizing with the struggle for independence in his native country, spoke often in defence of its political rights, and, together with Ramos Arispe, prepared the recognition of its independence. He returned to Mexico after the fall of Iturbide in 1823, and was immediately elected president of the municipal council of Mexico, where he made many improvements. In 1832 he was appointed secretary of foreign relations by Bustamante, but, the government of the latter having been overthrown by Santa Anna, Fagoaga was forced to emigrate to Europe, where he lived for several years. After his return adverse circumstances obliged him, in 1841, to make an assignment, and, giving up his art collection and his library to his creditors, he retired from public life. When his elder brother, the Marquis of Apartado, died, leaving the greater part of his fortune for charitable purposes, Fagoaga was appointed trustee, and soon was recognized as one of the public benefactors of Mexico. He rebuilt and endowed the Foundling hospital, the convents of the Capuchin nuns and of Corpus Christi, the hospital of San Juan de Dios and the insane asylum of San Hipolito, the Charitable home, and many other kindred institutions. In the Acordada prison he endowed the School of bookbindery and the Lancasterian schools, established, together with Luis de la Rosa, the School of design, and with Francisco Carvajal, the School for trades and mechanical teaching. Moreover, privately and without ostentation, he relieved innumerable needy families. He was elected senator in three legislatures, a member of the board of mines, and of several scientific associations and public boards. At his death the inmates of the Charitable home petitioned that his body be buried in the chapel of the institution, which was done.

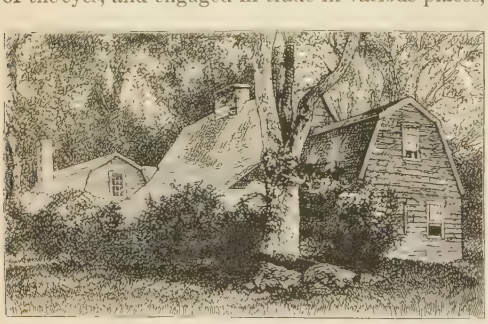
FAHY, Anthony D., clergyman, b. in Loughrea, Ireland, in 1804; d. in Buenos Ayres in 1871. He studied theology in St. Clement's Irish convent of Dominicans, Rome, where he became a member of the order. After being ordained priest he came to the United States, and for more than ten years was employed in missionary duty in Ohio and Kentucky. In 1843 he was invited by the Irish residents of Buenos Ayres to become their pastor, and went thither. In 1857 he brought out Sisters of Mercy from Ireland, by whose aid he founded the Irish convent, and in 1861 he erected a large building for them in the Calle Rio Bamba. As his countrymen increased in numbers and prosperity, he provided them with chaplains at Luxan, Mercedes, Capilla del Señor, San Antonio, and in all the mining districts. He founded burses in the missionary college of All-Hallows, Dublin, specially for this purpose, and also established Irish reading-rooms, libraries, and schools. Notwithstanding his age and ill-health, he continued his attendance on the sick during the yellow-fever epidemic of 1871, until he was prostrated by the disease three days before his death. He died so poor that his funeral expenses had to be borne by his parishioners.

FAILLON, Michel Étienne, author, b. in Tarascon, France, in 1799; d. in Paris, 25 Oct., 1870. He was a Sulpician of Paris, and came to Montreal in 1854 as a visitor to the houses of that congregation in America. His contributions to the history of Canada embrace lives of the Ven. M. Olier (1853); Margaret Bourgeoys, foundress of the Congregation Sisters (1852); Mlle. Maure, foundress of the Hôtel Dieu (1854); Madame d'Youville, foundress of the Grey Sisters (1852); Mlle. le Ber, the recluse (1860); and an extended history of the French colony in Canada, of which three volumes (1865–'6) appeared before his death, embracing only a small portion of his plan.

FAIR, James Graham, capitalist, b. near Belfast, Ireland, 3 Dec., 1831. His parents emigrated to the United States in 1843, and settled in Illinois, where he attended the public schools. He

completed his education in Chicago, received a business training there, and paid much attention to scientific studies. He went to California in 1849, and after engaging in mining till 1860, he removed to Nevada, where he amassed a fortune of $50,000,000. He was especially successful in the construction of quartz-mills, water-works, and chlorinizing furnaces. In 1865 he became superintendent of the Ophir mine, and in 1867 of the Hale and Norcross. In the latter year he also formed a partnership with John W. Mackay, James C. Flood, and William T. O'Brien, and purchased the control of several well-known mines. The yield of gold and silver in these mines during Mr. Fair's service as superintendent is estimated to have reached $200,000,000. Mr. Fair was elected to the U. S. senate from Nevada, as a Democrat, to succeed William Sharon, Republican, and served from 1881 till 1887. He is largely interested in manufactories on the Pacific coast.

FAIRBANKS, Erastus, manufacturer, b. in Brimfield, Mass., 28 Oct., 1792; d. 24 Nov., 1864. He was fifth in descent from Jonathan Fairbanks, who came from England and settled in Dedham, Mass., in 1633. The old Fairbanks house in Dedham, built by Jonathan's brother John, and still in possession of the family, is represented in the accompanying illustration. Erastus began to study law, but gave it up on account of an affection of the eyes, and engaged in trade in various places,



finally removing to St. Johnsbury, Vt. He formed a partnership with his brother Thaddeus in 1824, and began the manufacture of cast-iron plows and stove-castings. In 1826 the firm, with several others, formed the St. Johnsbury hemp-dressing company, and in 1831 the brothers gave their entire attention to making the platform-scales invented by Thaddeus. Erastus remained at the head of the firm till his death. He was a member of the legislature in 1836–'8, president of the Passumpsic railroad company in 1849, and was elected governor of Vermont in 1851 and 1860, rendering efficient aid to the government in the early days of the civil war.—His brother, **Thaddeus,** inventor, b. in Brimfield, Mass., 17 Jan., 1796; d. in St. Johnsbury, Vt., 12 April, 1886, removed with his father in 1815 to St. Johnsbury, Vt., and aided him in a saw- and grist-mill, also making carriages. He had an aptitude for mechanics, and in 1826, while engaged in the business of dressing hemp, observed the rudeness of the methods in use for weighing it. The result was the invention of his platform-scale, for which he received a patent on 21 June, 1831. Platform-scales were not unknown before that time, but had been little used. The most essential improvements invented by Mr. Fairbanks were the employment of only two levers, and the use of knife-edge bearings, resting on plane polished steel surfaces. Other improvements, covered by about fifty patents, were afterward made, and the Fairbanks scales are now used in all parts of the world. It has been estimated that they weigh a million-million pounds a week. The scales have received medals at eight international exhibitions, and Thaddeus Fairbanks received in 1873, from the emperor of Austria, the cross of the order of Francis Joseph.—Another brother, **Joseph Paddock,** b. in Brimfield, Mass., 26 Nov., 1806; d. 15 May, 1855, studied law, but became a member of the firm in 1834, and took charge of the introduction of the scales into general use.—Erastus's son, **Horace,** b. in St. Johnsbury, Vt., 21 March, 1820, succeeded his father as manager of the firm, and on the organization of the Fairbanks scale company, 24 Nov., 1874, became its president. He has served as state senator, and in 1876 was elected governor of Vermont.—Another son, **Franklin,** b. 18 June, 1828, has contributed several inventions toward perfecting the scales, and has also patented modifications of the special machinery used in their manufacture. He was a member of the Vermont legislature in 1871–'2, and was speaker of the house.—Thaddeus's only son, **Henry,** b. in St. Johnsbury, Vt., 6 May, 1830, was graduated at Dartmouth in 1853, and at Andover theological seminary in 1857. He was ordained in 1858, held pastorates in Burke and Barnet, Vt., and in 1859 became professor of natural philosophy at Dartmouth. He exchanged this chair for that of natural history in 1865, and since 1868 has resided in St. Johnsbury, giving his time to mechanical experiments. He has patented several inventions relating to the manufacture of scales and to other industries. He has been a member of the board of trustees of Dartmouth college since 1870.

FAIRCHILD, Ashbel Green, clergyman, b. in Hanover, N. J., 1 May, 1795; d. in Smithfield, Pa., in 1864. He was graduated at Princeton in 1813, studied theology, and was licensed as a preacher in 1816, ordained in 1818, and served in various places as a missionary. From 1822 till 1854 he was pastor at George's Creek, whence he went to Tent, Pa., where he remained until his death. Besides frequent contributions to the religious press, he published many tracts and discourses. His principal work was the "Great Supper," which was translated into German and had a circulation larger, with one or two exceptions, than any other book published by the Presbyterian board. Among his other works are "Baptism," "Faith and Works," "Confession of Faith," "The Faith in Hungary," "What is Faith?" "Faithful Mother's Reward," and "False Friendship."

FAIRCHILD, Cassius, soldier, b. in Kent, Ohio, 16 Dec., 1828; d. in Milwaukee, Wis., 26 Oct., 1868. In 1846 his father settled at Madison, Wis., where, as state treasurer and in other responsible offices, his time was so fully occupied that Cassius, the eldest living son, devoted himself mainly to the care of his father's private business. He was elected a member of the state legislature in 1860. On President Lincoln's first call for troops in 1861, he was commissioned major of the 16th Wisconsin volunteers. In the battle of Shiloh, 6 April, 1862, he received a wound that disabled him until 18 April, 1863, when he rejoined his regiment at Lake Providence, and took command of it on 18 June. He served on general court-martial at Vicksburg, Miss., from 10 Oct., 1863, till 7 March, 1864, at which date he again took command of his regiment, participated in the march from Clifton, Tenn., to Ackworth, Ga., and was engaged in the battles of Big Shanty and Kenesaw Mountain, and many other conflicts. He was detached on recruiting

service, 12 Aug., 1864, but rejoined his regiment at Beaufort, S. C., in January following. He commanded a brigade of the 3d division of the 17th army corps from 15 Jan., 1865, till 1 April, and, on being mustered out in July, was brevetted brigadier-general, his commission to date from 13 March, 1865. On his return to Wisconsin he was appointed U. S. marshal, the duties of which office he continued to discharge until his death, which was caused by the reopening of his wound.

FAIRCHILD, Charles Stebbins, secretary of the treasury, b. in Cazenovia, N. Y., 30 April, 1842. He was graduated at Harvard in 1863, and, after studying at the law-school of that university, was admitted to the bar in 1865. Subsequently he became a member of the law-firm of Hand, Hale, Swartz & Fairchild, and continued actively engaged in the practice of his profession for several years. In 1874 he was deputy attorney-general of New York, and in 1876 was elected, as a Democrat, to the attorney-generalship. He served in that capacity for two years, and then spent some time in travel abroad. In 1880 he settled in New York city, and devoted himself to the practice of law. He continued so engaged until 1885, when he was appointed assistant secretary of the treasury. While holding this office, he was frequently called on to represent Sec. Daniel Manning, and when the latter was compelled to give up the duties of the place, Mr. Fairchild became acting secretary. On 1 April, 1887, the resignation of Mr. Manning went into effect, and the portfolio was then given to Mr. Fairchild, who thus became a member of President Cleveland's cabinet.

FAIRCHILD, Herman Le Roy, naturalist, b. in Montrose, Pa., 29 April, 1850. He was graduated at Cornell in 1874, where he received the degree of B. S. From 1874 till 1876 he was professor of natural sciences in Wyoming seminary, and from 1877 till 1878 professor of geology *ad interim* at Vassar. Prof. Fairchild then went to New York, where he has been occupied as lecturer in natural sciences in New York schools and in the Cooper Union. He is a member of several scientific societies, and is secretary of the New York academy of sciences. His contributions to literature include articles on comparative physiology in the "Popular Science Monthly," and more technical papers in the "Transactions of the New York Academy of Sciences." He has also published "A History of the New York Academy of Sciences, formerly the Lyceum of Natural History" (New York, 1887).

FAIRCHILD, James Harris, educator, b. in Stockbridge, Mass., 25 Nov., 1817. While he was a child his father removed to Oberlin, Ohio, and he was graduated there in 1838, was tutor in 1838–'42, ordained in 1841, professor of languages in 1842–'7, professor of mathematics from 1847 till 1858, and professor of moral philosophy and theology from 1858 till 1866. He was elected president of the college in 1866. During the years 1870–'1 he travelled in Europe, Asia, and Africa. In 1884 he visited the Hawaiian Islands. He has edited "Memoirs of Charles G. Finney" (New York, 1876), and "Finney's Systematic Theology" (Oberlin, 1878); and is the author of "Moral Philosophy" (New York, 1869); "Oberlin, the Colony and the College" (Oberlin, 1883); and "Woman's Right to the Ballot" (1870).

FAIRCHILD, Lucius, statesman, b. in Kent, Portage co., Ohio, 27 Dec., 1831. He was educated in the public schools of Cleveland, and at Carroll college in Waukesha, Wis. In 1846 his father removed to Wisconsin, then a territory, and settled in Madison. On the discovery of gold in California, the son, at the age of eighteen, joined with others, and with a four-yoke ox-team set out for the gold fields across the plains. After months of toil and travel the party arrived in San Francisco with a capital of twenty-seven cents. For six years he worked as digger, miner, prospector, and laborer, then returned to Wisconsin in 1855, not much richer than when he left. His entrance into politics began in California with his election as delegate to a convention for the nomination of governor. On his way to the gathering his mule fell off a height, carrying with him all of young Fairchild's baggage. He finished the remainder of his journey on foot, and sat in the convention without a coat and without a cent in his pocket. He was elected clerk of the circuit court in 1858, and in 1860 admitted to the bar. At the beginning of the civil war he was a member of a local company known as the "Governor's Guard," and promptly enlisted. He entered the service as captain in the 1st Wisconsin regiment, and served in the three months' campaign. In August, 1861, he was commissioned by President Lincoln a captain in the 16th regiment of the regular army, also about the same time a major in the 2d Wisconsin infantry. He accepted both appointments, and was the first officer of the regular army to receive leave of absence to serve with a volunteer regiment. At Bull Run he commanded the consolidated 2d and 7th Wisconsin regiments, forming part of the famous "iron brigade." At the beginning of the battle of Antietam he was sick in an ambulance at the rear, but went into action, where his regiment lost more than half its force. As colonel of the 2d Wisconsin, in the battle of Gettysburg, he led a charge at Seminary Hill, where he lost his left arm.

Lucius Fairchild

While recovering from his wounds he was commissioned a brigadier-general, 19 Oct., 1863, and shortly afterward elected secretary of state in Wisconsin, where he remained two years. He was then elected governor, and served for six consecutive terms, during which time he aided the Soldiers' orphans' home in Madison, and was one of the founders of the State board of charities and reform. Gen. Fairchild was appointed U. S. consul at Liverpool in November, 1872, and served six years. He was consul-general in Paris in 1878–'80, and then U. S. minister to Spain till 1882, when he resigned and returned to Madison, Wis. In 1886 he was elected commander-in-chief of the Grand army of the republic.

FAIRFAX, Thomas, sixth baron, b. in England in 1691; d. in Greenway court, Va., in 1782. His family was a very old one. During the wars of the Roses, his ancestor, Sir Guy Fairfax, head of a younger branch of the family, became lord chief justice of England. His great-grandson, Thomas, was raised to the peerage by Charles I. as Baron Fairfax, of Cameron. Thomas's brother, Edward, was well known for his translation of the great poem of Tasso; his grandson, Thomas, third Lord Fairfax, was commander-in-chief of the parliamentary forces in the rebellion against Charles I. The great general was succeeded in the baronetcy by his cousin, Henry, whose sons were Thomas, fifth Lord Fairfax, and Henry. Thomas married

Catherine, daughter of Lord Culpepper, and thus acquired the title to vast estates in the northern neck of Virginia, and also in the Shenandoah valley. Their son, Thomas, was educated at Oxford, enjoyed the reputation of a man of wit and letters, and was in early life a contributor to the "Spec-

tator." When he became sixth Lord Fairfax, he sent his cousin, Sir William, son of Henry, to take charge of the Virginia estates. Sir William's daughter, Anne, married Lawrence, elder brother of George Washington. In 1739, Thomas came himself to Virginia. Remaining about a year, he returned to England, when, on account of an alleged disappointment in love, he closed his affairs in England and came a second time to his Virginia estate in 1745. His inherited domain embraced all that section lying between the Potomac and Rappahannock, comprising the twenty-one counties of Lancaster, Northumberland, Richmond, Westmoreland, Stafford, King George, Prince William, Fairfax, Loudoun, Fauquier, Culpeper, Clark, Madison, Page, Shenandoah, Hardy, Hampshire, Morgan, Berkely, Jefferson, and Frederick. The area was 5,282,000 acres, and formed nearly one quarter of the commonwealth of Virginia. Lord Fairfax lived for several years with Sir William at Belvoir, and thus in 1748 he made the acquaintance of George Washington, then a youth of sixteen, and, impressed with his energy and talents, employed him to survey his lands lying west of the Blue Ridge. This was the beginning of an intimacy between Fairfax and Washington, which survived all differences of opinion on political subjects, and terminated only with the death of the former. So favorable was the report of Washington, that his employer soon afterward took up his residence at Greenway court (see illustration), in the midst of a manor of 10,000 acres, about twelve miles from Winchester, where he resided during the remainder of his life. Here he laid out a farm, and put it under a high state of cultivation. He was very fond of hunting. He was indulgent to all who held lands under him and around him, kind to the poor, and allowed them a large part of the surplus produce of his estate. During the panic on the Virginian frontier after the defeat of Braddock, Fairfax organized a troop of horse, and, as lord-lieutenant of Frederick county, called out the local militia. Although a pronounced loyalist, his hospitality and noble qualities caused him to be held in so much esteem and veneration that during the entire Revolutionary war he was never insulted or molested, and his property was equally respected by Americans and British. The great wealth in the immense clay deposits in that section of Virginia being unavailable, Lord Fairfax had brought from England the brick used for the erection of Christ church, Alexandria, the church at Falls Church Corners, and the hotel in Alexandria where Washington had his headquarters. He was a friend and patron of Washington's early life, and saw, with the most intense anguish, that the widow's son, who surveyed his lands, was destined to be the great instrument for dismembering the British empire. The surrender at Yorktown deeply wounded his national pride, and, according to tradition, was the immediate cause of his death, which happened soon afterward. He was a dark, swarthy man, more than six feet in height, of large frame, and extraordinary strength. His remains were deposited under the communion table of the Episcopal church in Winchester, but were removed in 1833, and the old church was torn down to make way for the erection of a pile of buildings. He never married, and his extensive domain descended to his only surviving brother, Robert Fairfax, who became the seventh Lord Fairfax, but, as the estate was in the possession of Thomas during the Revolution, it was confiscated.—**George William,** b. in England; d. in Bath, England, 3 April, 1787, was the son of Thomas's first cousin, Col. Sir William Fairfax, lieutenant of the county of Fairfax, and member and president of the council in Virginia. He was educated in England, and, coming to Virginia in early manhood, became quickly identified with the country. He was the early companion of Washington and his associate as surveyor of lands. Some property in Yorkshire having descended to him in 1773, he went to England, and, in consequence of the political troubles which followed, did not return to America. During the war he evinced much kindness to American prisoners who were carried to England. A part of his Virginia estate was confiscated, by which his income was much reduced. In making his will, he named Washington as his executor, but the office was declined on account of the pressure of public engagements. He left no children, and bequeathed his property to Ferdinando, the second son of his only surviving brother, Bryan, or Brian.—His brother, **Bryan,** eighth baron Fairfax, b. about 1730; d. in Monteagle, Va., in August, 1802, was the third son of Sir William Fairfax, and a life-long friend of Washington, notwithstanding their political differences. In 1789 he became an Episcopal clergyman, and presently took charge of the parish at Alexandria, Va. On Robert's death in 1793, the title to the Scottish peerage descended to him, and his claim was

Bryan Fairfax

recognized as valid by the house of lords in 1800, but he never asserted it.—His son, **Thomas,** sometimes called ninth Lord Fairfax, b. in 1762, d. at Vaucluse, Fairfax co., Va., 21 April, 1846, lived on his Potomac estates. He married Miss Cary. Thomas's eldest son, ALBERT, died during the lifetime of his father.—Albert's son, **Charles Snowden,** b. in Vaucluse, 8 March, 1829; d. in Baltimore, 7 April, 1869, was speaker of the California house of representatives in 1854, and clerk of the supreme court of that state from 1857 till 1862. He was chairman of the California delegation to the Democratic national convention held in New

York in July, 1868.—Another son, **John Contee,** eleventh representative of the title, b. 13 Sept., 1830, is a physician, residing at Northampton, Prince George co., Md.—Bryan's great-grandson, **Donald McNeill,** naval officer, b. in Virginia, 10 Aug., 1822, became a midshipman, 12 Aug., 1837, served under Dupont on the west coast of Mexico and California during the Mexican war, and was at the capture of several towns. He was promoted to a lieutenancy, 26 Feb., 1851, made commander, 16 July, 1862, and served on the "Cayuga," of the west gulf squadron, from June, 1862, till February, 1863, under Farragut, when he was transferred to the command of the steamers "Nantucket" and "Montauk," of the South Atlantic squadron, in which he made several attacks on the defences of Charleston harbor, under Dupont and Dahlgren. In 1864–'5 he was in command of the naval academy, promoted to a captaincy, 25 July, 1866, served on the flag-ship "Rhode Island," in the North Atlantic squadron, in 1866–'7, and on the steam sloop "Susquehanna" in 1867–'8. He was advanced to the rank of commodore, 24 Aug., 1873, and made rear-admiral, 11 July, 1880. Admiral Fairfax was in service forty-eight years and five months; of this time, twenty years and four months were spent at sea, his last cruise terminating in 1868. See "Magazine of American History," vol. xiii., pp. 217–236.

FAIRFIELD, Francis Gerry, journalist, b. in Stafford, Conn., 18 Aug., 1844; d. in New York city, 4 April, 1887. He was educated at a private school in Massachusetts, at the Pennsylvania college in Gettysburg, and finished his course in a Lutheran theological seminary. When only twenty years of age he was placed in charge of a Lutheran church in Waterloo, N. Y. After about two years he abandoned his calling and came to New York city, which became his home. Here he was at first employed in the editorial department of the "Home Journal," and later wrote for the "Daily News," the "Herald," and other papers. He then went to Mexico, where he was an eye-witness at the execution of Maximilian, an account of which he furnished to several journals. On his return to New York city he became a space writer for several newspapers, and contributed poems, sketches, short stories, and literary criticisms to various periodicals. Tempted by the prospect of greater emoluments, Fairfield for a brief period followed the pursuit of a veterinary surgeon. Disappointed, he returned to his former occupation, and at the last was employed as an occasional writer for the New York "Sunday Mercury" and Albany "Argus." Fairfield, in the best period of his life, was a forcible and incisive writer, and his signed articles were always read with attention. But he became addicted to the morphine habit, and gave way to mental vagaries and irregularities that eventually reduced him to poverty. He published "The Clubs of New York" (New York, 1873), and "Ten Years with Spiritual Mediums" (1875).

FAIRFIELD, John, senator, b. in Saco, Me., 30 Jan., 1797; d. in Washington, D. C., 24 Dec., 1847. He received a common-school education, studied law, was admitted to the bar in 1826, and practised successfully in his native town. He was appointed reporter of the state supreme court in 1832, and was then elected to congress as a Democrat, serving from 7 Dec., 1835, to 3 March, 1839. He was governor of Maine in 1839–'40, and again, in 1842, was chosen U. S. senator from Maine, in place of Reuel Williams, resigned, and served from 4 Dec., 1843, till his death. He was the author of "Supreme Court Reports" (Augusta, 1835–'7).

FAIRFIELD, Sumner Lincoln, poet, b. in Warwick, Mass., 25 June, 1803; d. in New Orleans, La., 6 March, 1844. His father died when he was three years old, and the mother with her two children removed to a small farm in western Massachusetts. Fairfield entered Brown, but sickness prevented his graduation, and he became a tutor in Georgia and South Carolina. There he passed several years and prepared himself for entering the university, but changed his purpose and returned to the northern states. Meanwhile, as he says, he had published "two pamphlets of rhymes." In December, 1825, Fairfield took passage for England. About this time his "Cities of the Plain" was published in Buckingham's "Oriental Herald." During his absence in Europe he contributed letters to several New York city weeklies. He returned home in July, was married, and removed to Elizabeth, N. J., but afterward went to Boston, Harper's Ferry, Philadelphia, and other places, winning a precarious subsistence by writing for the press. In 1828 he became principal of the Newtown academy, near Philadelphia, but soon afterward left for New York city. In 1833 he began the publication of the "North American Magazine" in Philadelphia, continuing as its editor and proprietor during five years. Soon afterward his health failed entirely. Fairfield excelled as an instructor in history and literature. He had more than the ambition of a Southey for writing epics, and was equally unfortunate in finding few readers and no admirers. He stoutly maintained that Bulwer-Lytton had taken thoughts and subject-matter from him in the construction of his "Last Days of Pompeii." Fairfield's published volumes include "Lays of Melpomene" (New York, 1824); "The Sisters of St. Clara" (1827); "Cities of the Plain" (1828); "Heir of the World" (1828); "Abaddon, the Spirit of Destruction" (1830); "The Last Night of Pompeii" (New York, 1832); "Poems and Prose Writings" (Philadelphia, 1840); and "Select Poems" (1860).—His wife, **Jane Frazee,** published her husband's "Life," including a few of his poems (1846).—Their eldest daughter, **Genevieve Genevra,** has written several volumes of miscellaneous literature.

FAIRLAMB, James Remington, musician, b. in Philadelphia, Pa., 23 Jan., 1839. He received his first musical instruction from his mother. At the age of twenty, after serving as organist of churches in Philadelphia, he went to Paris, where he pursued his instrumental and vocal studies under Marmontel, Prudent, and Masset, of the then Conservatoire imperiale, and Mme. Bockholtz-Falconi. Later he studied under Mabellini in Florence. Subsequently, while U. S. consul at Zurich, he visited Leipsic, Berlin, and Stuttgart. Soon after his return to this country he received from King Karl of Wurtemberg the "great gold medal for art and science." Between 1867 and 1880 he was successively director of the music in different churches in Washington, D. C. He was called to a similar office in the Church of the Ascension, New York city, and a year later to that of St. Ignatius. His published works, chiefly sacred compositions and songs (the latter including contributions to the St. Nicholas song-book), number nearly a hundred, exclusive of "Valerie," a romantic opera in five acts, which was successfully produced in Washington, and of which a large part is published in sheet form. "Leonello," a grand opera in five acts, and a mass in B flat, are still in manuscript.

FAIRMAN, Gideon, engraver, b. in Newtown, Conn., 26 June, 1774; d. in Philadelphia, Pa., 18 March, 1827. He was apprenticed to a firm of

jewellers and engravers in Albany, and in 1810 settled in Philadelphia as one of a firm of bank-note engravers. In the war of 1812 he entered the army as captain, and rose to a colonelcy. In 1819 he became a partner with Jacob Perkins, and went to England, where he resided and conducted the engraving business for three years, and then returned to Philadelphia. He contributed much toward the elevation of the art of engraving in the United States.—His brother, **David** (1782–1815), and **Richard** (1787–1821), were also engravers.

FALARDEAU, Antony Sebastian, artist, b. in St. Ambrose, near Quebec, Canada, 13 Aug., 1822. He manifested from his childhood a strong love for art, but it met with no encouragement from his father, who took him from school when twelve years old and set him to work on a farm. When he was fourteen years old he ran away to Quebec, where he endured hardships of every kind, and was for several years a servant. He still continued to draw and paint during his hours of leisure, and after he had succeeded in obtaining employment as clerk in a mercantile house he was enabled to take lessons, and some of his pictures began to attract attention. He wished to continue his studies in Europe, so he sold his pictures for $160, and, with some help from his patrons, set out for Montreal in the summer of 1846. Lord Cathcart, the governor-general, received him kindly, and furnished him with a letter of recommendation that was afterward of great value to him. He finally reached Florence, and, after many disappointments, was admitted to the Academy of fine arts. During the Revolution of 1848 he refused to enter the civic guard of the fine arts, and was obliged to leave the academy, but re-entered it after the battle of Novara. From this time he worked hard, but led a life of great poverty until 1850, when an American gentleman purchased some of his pictures. He then studied in the principal Italian cities, and in 1857, when he was in Parma, won a prize that had been offered for the best copy of the Saint Jerome of Correggio, exciting much enthusiasm by his work. He was chosen an honorary member of the Academy of the fine arts, and afterward presented the picture to the grand duke, who created him knight of the order of Saint Louis. After this he had orders for pictures from the empress dowager of Russia and other persons of rank. In April, 1862, he visited Canada, where he was received with enthusiasm. His pictures are considered by art critics to be distinguished for finish and elegance rather than vigor.

FALCONER, John M., artist, b. in Edinburgh, Scotland, 22 May, 1820. He was educated at the high school in Edinburgh, and came to the United States at the age of sixteen. He studied art in the National academy of design, and with the Society of painters in water-colors in New York city, in the Graham art school and that of the Art association of Brooklyn, and in the Louvre at Paris. He became a member of the New York art reunion and New York sketch union in 1847, was a member of the Society of painters in water-colors, and exhibited in their collection in the Crystal Palace, New York, in 1854. He became an honorary member of the National academy of design in 1856, of the Artists' fund society in 1861, of the American water-color society in 1872, of the New York etching club in 1879, and fellow of the Painters' and etchers' society of London, England, in 1882. He proposed the first exhibition of engravings in the United States, which was successfully held in Brooklyn in 1864, as part of the art department of the U. S. sanitary fair, and organized the first chronological exhibition of American art in the United States, which was held at the opening of the galleries of the Brooklyn art association in 1872, and the first exhibition of water-color paintings by the Artists' fund society of New York, out of which grew the present American water-color society. He has made numerous paintings in oil of American and European subjects, including "Kenilworth Castle," "House where the Declaration of Independence was Written," and "Robert Fulton's House in Philadelphia." In water-colors he produced the "William Penn Mansion," exhibited, with others of his works, by the American water-color society at the Centennial exhibition in 1876, and a series of "Historic Houses" in enamel on porcelain, now in the possession of the Long Island historical society. He has also restored many oil-paintings, and etched on copper fifty plates from his own works, and twenty from those of other artists. He wrote a "Sketch of the History of Water-Color Painting" for the Society of painters in water-colors (1852), and has compiled the "Catalogue Raisonnée of the Chronological Exhibition of American Art" (Brooklyn, 1872).

FALES, Almira L., philanthropist, b. in New York; d. in Washington, D. C., 8 Nov., 1868. She was for some time a resident of Iowa, but her husband, Joseph T. Fales, having received an appointment as examiner in the patent-office in Washington, she thenceforth made that city her home. As early as 1860, from her extended knowledge of southern feeling and action, she foresaw and predicted the approaching struggle, and, much to the surprise of her friends, began the collection and preparation of articles for hospital use. At the beginning of the war she entered, fully prepared, on the care of sick and wounded soldiers, and at Pittsburg Landing and other battle-fields of the west was busy in ministering to the wants of the sufferers. The government placed an ambulance at her command, and during the war she was unremitting in her visits to the hospitals in the neighborhood of Washington, at Fredericksburg, on the Peninsula, and elsewhere. In the yard of her own house she pitched a large tent, into which she gathered sick and disabled soldiers, and there ministered to their needs until means could be provided to send them to their homes. For some time Mrs. Fales was charged by the government with the superintendence of soldiers sent from the hospitals in and around Washington to the hospitals in New York and elsewhere. Amid all this activity she found time to correspond extensively and obtain pecuniary aid to carry on her work.

FALKNER, Thomas, clergyman, b. in Manchester, England, in 1710; d. in Plowdenhall, Salopshire, England, 30 Jan., 1784. He studied under his father, who was a distinguished surgeon in Manchester, and afterward attended the hospitals in London. He went as a surgeon on board of a ship, visiting Guinea, and then proceeded to Cadiz, where he re-embarked in 1731 for Buenos Ayres, and during an illness there was nursed so devotedly by the Jesuits, that on his recovery he determined to join the order. He entered one of their colleges, and was sent in 1734 to evangelize the vast territory comprised in the viceroyalty of Buenos Ayres, and the country south of the Rio de la Plata. He had extraordinary success in his missionary labors, which was largely due to his ability in curing the sick, his dexterity in surgical operations, and his knowledge of mechanics. During forty years he lived at different stations on the Chaco, the Paraguay, the Tucuman, and on the Pampas. The station of St. George

flourished so well that in 1773 it had 7,000 civilized Indians, five churches, three convents, two hospitals, a college, and a library. He was employed by the Spanish government in 1750 to draw a map of the coast of South America from the south of Brazil to Tierra del Fuego, which on its completion was printed in 1761 at Quito, and is noted for its accuracy. He also designed a chart of Paraguay in 1757, a chart of the Tucuman in 1759, and several others of less importance. On the expulsion of the Jesuits he was sent to Spain, and afterward went to England, where he became chaplain in an old English Roman Catholic family near Worcester. Here he wrote his "Description of Patagonia and of the Neighboring Countries of South America" (Hereford and London, 1774; German translation, Gotha, 1775; French translation, entitled "Description des terres Magellaniques et des pays adjacents," 2 vols., Geneva and Paris, 1787). This work is valuable for its descriptions of the countries in which he lived; but Falkner's superficial knowledge of natural history diminishes the value of his account of the natural productions of South America. He also published "A Treatise on the Language of the Indians of South America"; "Botanical, Mineral, and like Observations made by himself on the Products of South America"; "A Treatise on South American Distempers cured by American Drugs." Several South American plants were introduced by him into the European materia medica.

FALLOWS, Samuel, bishop of the Reformed Episcopal church, b. in Pendleton, near Manchester, England, 13 Dec., 1835. He removed with his parents to Wisconsin in 1848, was graduated at the State university there in 1859, and was vice-president of Gainsville university till 1861, when he was ordained in the Methodist Episcopal church. He served as a colonel in the civil war, and was brevetted brigadier-general. On returning to civil life he became a pastor in Milwaukee. He was chosen state superintendent of public instruction for Wisconsin in 1871, and was twice re-elected. In 1874 he was elected president of the Illinois Wesleyan university at Bloomington. In 1875 he united with the Reformed Episcopal church, and became rector of St. Paul's, Chicago, in May of that year. In January, 1876, he was appointed chief editor of the "Appeal," the organ of the Reformed Episcopal church, and on 15 July, 1876, he was elected a bishop. He was regent of the University of Wisconsin in 1864–'74, and received the degree of D. D. from Lawrence university in 1873. He has published a "Supplemental Dictionary" (Chicago, 1884), and "Past Noon" (1886).

FANEUIL, Peter, merchant, b. in New Rochelle, N. Y., in 1700; d. in Boston, Mass., 3 March, 1743. His parents were French Huguenots. He became a merchant in Boston, and in 1740, after the project of erecting a public market-house in that city had been discussed for some years, he offered, at a public meeting, to build a suitable edifice at his own cost as a gift to the town; but so strong was the opposition to market-houses that, although a vote of thanks was passed unanimously, the offer was accepted by a majority of only seven. The building was begun in Dock square in September of the same year, and finished in two years. It comprised a market-house on the ground floor, and a town-hall, with other rooms, over it. In 1761 it was destroyed by fire, nothing but the brick walls remaining. It was rebuilt by the town in 1763, and in 1775, during the British occupation of Boston, it was used for a theatre. In 1805 it was enlarged by the addition of another story, and increased forty feet in width. The large hall is about eighty feet square, and contains many fine paintings of distinguished men. During the Revolutionary period it was the usual meeting-place of the patriots, and, from the stirring debates and important resolutions that were often heard within its walls, it gained the name of "the cradle of American liberty." (See illustration.)

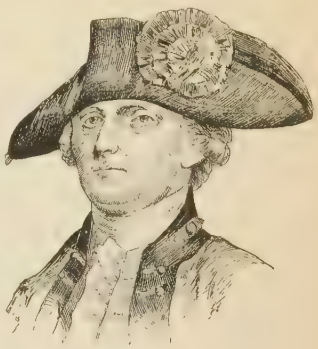
FANNIN, James W., soldier, b. in North Carolina about 1800; d. at Goliad, Texas, 27 March, 1836. He was a captain in the Texan service in 1835, and on 28 Oct., at the head of ninety men, with Capt. Bowie, defeated a superior Mexican force near Bexar. Gen. Houston soon afterward made him colonel of artillery and inspector-general. In January, 1836, he set out to re-enforce Dr. James Grant, who was in command of an unauthorized expedition to Matamoras. At Refugio he learned of the destruction of Grant's party, and fell back to Goliad, which he put in a state of defence; but by Houston's order he marched toward Victoria, and on 19 March was attacked on the Coleta river by a Mexican force under Gen. Urrea. Throwing up a breastwork of wagons, baggage, and earth, the Texans defended themselves with spirit until night interrupted the fighting, Col. Fannin being among the wounded. The battle was renewed on the 20th, but the Mexicans having received a re-enforcement of 500 men, with artillery, a capitulation was signed, by which it was agreed that the Texans should be treated as prisoners of war, and as soon as possible sent to the United States. After surrendering their arms they were taken to Goliad, where, on the 26th, an order was received from Santa Anna requiring them to be shot. At daybreak the next morning 357 of the prisoners, all of them but four physicians and their assistants, were marched out under various pretexts, and fired upon in divisions. Fannin was killed last. Many attempted to escape, and were cut down by the cavalry, but twenty-seven are believed to have eluded pursuit.

FANNING, Alexander C. W., soldier, b. in Massachusetts in 1788; d. in Cincinnati, Ohio, 18 Aug., 1846. He was graduated at the U. S. military academy in 1812, and immediately went into service on the Niagara frontier, being engaged in the capture of York (now Toronto), Canada, 27 April, 1813, where he was severely wounded by the explosion of the enemy's magazine. He took part in the defence of Sackett's Harbor, four weeks later, and in November following distinguished himself in the battle of French Creek, when the British flotilla was repulsed. For his bravery in the defence of Fort Erie when besieged by the British forces from 13 Aug. till 17 Sept., he was brevetted major. He was then transferred to the Florida frontier and served there till 1819, participating in Jackson's campaign against the Seminole Indians in 1817–'18, and in the capture of St. Mark's, 7 April, 1818, and was the provost-marshal at the execution of Arbuthnot and Ambrister, British subjects, on 29 April, 1818. He was in command in St. Mark's in 1818–'19, and was then

transferred to Fort Gadsden. On the reorganization of the army in 1821, he was appointed captain in the 2d artillery, and served in the garrison at Detroit in 1822–'3, Fort Mackinaw, Mich., in 1823, and Fort Columbus in 1824, after which he was appointed acting major of the artillery-school at Fortress Monroe, Va. On 15 Aug., 1824, he received a brevet lieutenant-colonelcy, and became major on 3 Nov., 1832. He took part in the war against the Seminole Indians in 1835–'9, was brevetted colonel, 31 Dec., 1835, and became lieutenant-colonel of the 4th artillery, 16 Sept., 1838. During the Canada border disturbances in 1840–'1 he was on the frontier, after which he was on recruiting service in the western department.

FANNING, David, freebooter, b. in Johnston county, N. C., about 1754; d. in Digby, N. S., in 1825. He seems to have been a carpenter, but claimed that he was a "planter in the back part of the southern provinces." He trafficked with the Indians, and was connected with the notorious Col. McGirth on the Pedee. When Wilmington was occupied by the British in 1781, Fanning, having been robbed by a party of men who called themselves Whigs, attached himself to the Tories, collected a small band of desperadoes, and scoured the country, committing frightful atrocities, but doing such good service to the British that Maj. Craig gave him a commission as lieutenant-colonel in the militia. By the rapidity and secrecy of his movements he succeeded in capturing many prominent Whigs, and hanged those who had incurred his personal resentment. At one time he dashed into the village of Pittsborough, where a court was in session, and carried off the judges, lawyers, officers, and some of the citizens. Three weeks later he captured Col. Alston and thirty men in his own house; and soon afterward, at Hillsborough, took Gov. Burke with his whole suite and a number of the principal inhabitants. He was excepted in every treaty and enactment made in favor of the royalists, and was one of the three persons excluded by name from the benefit of the general "act of pardon and oblivion" of offences committed during the Revolution. When the Whigs gained the ascendency in North Carolina he went to Florida, and afterward to St. John's, N. B., where he became a member of the assembly, but about 1800 was sentenced to be hanged. He escaped, and was pardoned. Fanning wrote, in 1790, a "Narrative of Adventures in North Carolina," which, with an introduction and notes by John H. Wheeler, was printed privately (Richmond, Va., 1861).

FANNING, Edmund, partisan, b. in Long Island in 1737; d. in London, England, 28 Feb., 1818. He was graduated at Yale in 1757, and settled as a lawyer in Hillsborough, N. C., where he was elected colonel of militia in 1763, clerk of the superior court in 1765, and subsequently went to the legislature. Among the offices held by him was that of recorder of deeds, and it was alleged that to his abuses of this trust and his exorbitant charges was due the rebellion of the regulators in Gov. Tryon's administration. By his vicious character "nearly all the estates in Orange county were loaded with doubts as to their titles, and new and unnecessary deeds were demanded." Through his actions as recorder, added to his zeal in quelling opposition to the severe exactions of the government and in bringing the leaders of that opposition to the scaffold, he became obnoxious to the people, and, to escape the popular indignation, he accompanied Gov. Tryon, who was his father-in-law, to New York as his private secretary in 1771. He subsequently applied to the North Carolina legislature, through Gov. Martin, the successor of Gov. Tryon, for reparation for losses from destruction of his property; but the petition was unanimously rejected, and the governor was rebuked for presenting it and thus "trifling with the dignity of the house." In 1774 Fanning received from the British government the lucrative office of surveyor-general, as a reward for his services to the crown and his losses in North Carolina. In 1777 he raised and commanded a corps of 460 loyalists, which bore the name of the "associated refugees," or "king's American regiment." While his regiment was on Long Island some of his men entered a house, tied the owner of it to a bed-post, and held a candle under the ends of his fingers, to force him to disclose the hiding-place of his money. Fanning was equally severe toward all. During the war he was twice wounded, and in 1779 his property was confiscated. He removed to Nova Scotia near the close of the war, and became councillor and lieutenant-governor on 23 Sept., 1783, and three years later governor of Prince Edward Island. This office he held for nineteen years. He was made a major-general in the British army in 1793, lieutenant-general in 1799, and general in 1808. The degree of A. M. was given him by Harvard in 1764, and by Kings in 1772; the degree of D. C. L. by Oxford in 1774, and that of LL. D. by both Yale and Dartmouth in 1803.—His brother, **Thomas,** of Suffolk county, N. Y., delivered the address before Gov. Tryon in November, 1776, and was deputed to present the submission of the committee of that county. In June, 1778, Fanning was captured and carried off by a party of Whigs.

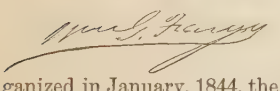


Edmund Fanning

FANNING, John Thomas, civil engineer, b. in Norwich, Conn., 31 Dec., 1837. He was educated in the public and normal schools of his native city, and then studied architecture until 1858. During the three following years he perfected himself in building construction by labor as a mechanic, meanwhile pursuing studies in theoretical engineering. In 1861 he enlisted as a private in the 3d Connecticut regiment, and rose gradually until he attained the rank of lieutenant-colonel. He began the general practice of engineering and architecture in 1862, opening an office in Norwich, where he remained until 1870, having charge during that time of all the engineering work of the city, including the laying out of its cemetery and the construction of its public water-works, also making plans for numerous mills and water-powers in New England. From 1870 till 1880 he was engaged principally as chief and consulting engineer in building water-works for cities. While superintending the construction of water-works for Manchester, N. H., he removed his office to that city, where he designed various public buildings. After 1880 he was called on by an association of citizens of New York and Brooklyn to make a report concerning an adequate public water-supply for these cities, and of all the cities

in the Hudson valley, from the upper Hudson river water-shed. This project contemplated an aqueduct 225 miles in length, capable of conveying from the Adirondack region 1,000,000,000 gallons of water daily to New York and Brooklyn, at an estimated cost of $60,000,000. In 1885 he prepared plans for the further development of the great water-power of St. Anthony's falls on the Mississippi river, at the city of Minneapolis, Minn., and in 1886 constructed new dams on the works. During the same year he was consulting engineer of the upper Red river valley drainage commission, and directed the detailed topographical survey and reported on the drainage of 3,000 square miles of prairie lands in the valley of the Red river of the North at an estimated cost of $3,000,000. Mr. Fanning received in 1883 from the New England agricultural society its highest prize for architectural and engineering designs, and he has secured patents for a water-wheel, a turbine motor valve, a steam boiler, a steam pumping-engine, for improvements in fire-proof building construction, and numerous original designs for hydraulic apparatus. He is a fellow of the American association for the advancement of science, and a member of other scientific associations. Besides a great number of reports on technical matters, he has published a "Treatise on Hydraulic and Water-Supply Engineering" (New York, 1877; rev. ed., 1886).

FARGO, William George, expressman, b. in Pompey, N. Y., 20 May, 1818; d. in Buffalo, N. Y., 3 Aug., 1881. He worked for his living from the age of thirteen, attending school for a few winters only. He was engaged for some time in mercantile business, but in 1841 removed to Auburn and became freight agent for the Auburn and Syracuse railroad company. He left this place in 1842 to become messenger for Pomeroy and company's express, running from Buffalo to Albany, and was made resident agent of the company in Buffalo in 1843. Mr. Fargo, in connection with Henry Wells and Daniel Dunning, organized in January, 1844, the first express company running west from Buffalo, under the name of Wells and company. At first the line reached only to Detroit, but the business was gradually extended to Chicago, Milwaukee, Cincinnati, and St. Louis. In 1845 the firm became Livingston and Fargo, and remained thus until 1850, when the American express company, uniting the interests of several firms, was organized. Henry Wells was president and William G. Fargo secretary of this company till its consolidation with the Merchants' union express company in 1868, when Mr. Fargo succeeded to the presidency. At the time of his death the corporation had a capital of $18,000,000, maintained 2,700 offices, and gave employment to more than 5,000 men, of whom 600 were messengers. In 1851 he was associated with Henry Wells and others in the organization of a company which undertook the transaction of express business between New York and San Francisco by way of the isthmus, and also operated interior lines on the Pacific coast under the firm name of Wells, Fargo and company. This was continued until the completion of the trans-continental railways, when the management was transferred to western capitalists, but Mr. Fargo remained a director of the company and its vice-president. Mr. Fargo was a director of various railroads, was largely interested in various Buffalo enterprises, and from 1862 till 1866 was mayor of that city.—His brother, **James Congdel,** b. in Pompey, N. Y., 5 May, 1829, entered the employ of Wells and company in 1844 in Buffalo, and remained there until 1848. He was then transferred to Detroit, and a few years later to Chicago, where he became agent and manager of the American express company. In 1866 he came to New York city as the general superintendent and manager of the company's interests, which office he held until 1881, when he succeeded to the presidency of the company. Mr. Fargo is also president of the Merchants' despatch transportation company, and director of several important railroad and express corporations.—Another brother, **Charles,** b. in Pompey, N. Y., 15 April, 1831, entered the express business in Detroit in 1851. In 1853 he was made agent of the Toledo office of the American express company, and three years later returned to Detroit to take charge of that office. Much of the development of Michigan is credited to his energy in pushing the express into remote districts, making possible the ready transportation of produce to the markets. In 1866 he became assistant general superintendent of the company, with general management of the Chicago office, and after the death of William G. Fargo he became second vice-president and general western manager.



FARGUES, Thomas, physician, b. in Quebec, Canada, in 1780; d. there, 11 Dec., 1847. He was graduated at Harvard in 1797, and soon afterward sailed for Scotland, where he studied medicine at the University of Edinburgh, and obtained a degree, after defending a Latin thesis on "Chorea." He subsequently practised for several years in London, and became intimate with the eccentric physician, John Abernethy. Dr. Fargues returned to Quebec in 1811, and soon took a high rank as a medical practitioner. He was a man of extensive reading, keen powers of observation, and unusual strength of intellect, and owned the best private medical library in the province, which was purchased after his death and given to the Laval university. He was repeatedly solicited to take a seat in the provincial legislature, but preferred to devote himself exclusively to professional work.

FARIBAULT, George Bartholomew, Canadian antiquarian, b. in Quebec, 3 Dec., 1789; d. there, 21 Dec., 1866. He studied law, and was admitted to the Quebec bar in 1811. During the war of 1812–'15 he served as lieutenant in the Canadian militia. In 1822 he was appointed secretary of committees and French translator to the legislature of Lower Canada, and in 1832 promoted to the post of assistant secretary. On the union of the two Canadas in 1841 he was named assistant secretary of the legislative assembly, which office he held until 1855. While fulfilling the duties of these offices he found leisure for the formation of a collection of works and documents relating to the history of Canada. This collection, amounting to 16,000 volumes, was lost in the fire that destroyed the legislative buildings in Montreal in 1849. Faribault at once began to form a second collection, and was sent by the legislature to examine the libraries of Europe. At first he received every aid from the French ministers in his investigations; but the events of 2 Dec., 1852, interfered

with his researches, and the death of his wife decided him to return to Canada. He then devoted himself to the formation of the new national library, which had reached 20,000 volumes when the legislative buildings of Quebec were burned, 1 Feb., 1854, and although 13,000 volumes were saved, the 7,000 that were lost comprised publications of the 16th and 17th centuries that never could be replaced. His health was injured by this calamity, and the legislature voted him a pension of $2,000. The principal work of the close of his life was the execution of the monument that the French troops had resolved to raise in 1761 to the memory of Montcalm in the church of the Ursulines of Quebec. He was one of the founders of the Historical society of Quebec. He wrote a "Catalogue raisonné d'ouvrages sur l'histoire de l'Amérique" (1837), which is still considered an indispensable guide for the historian. His collection of manuscripts and old works, which he left to Laval university, comprises about 400 manuscripts, half of which are original, or copies collated of very old documents (1626, 1636, and the years following). Among these the most precious is the "Journal des Jesuites" (1645–'88, the only part discovered so far). There are about 1,000 printed volumes, some of which are very rare and important, such as "Lescarbot" (1609); "Champlain" (1613); "Les voyages aventureux de Jean Alphonse"; "Relations des Jesuites"; and an album containing plans, maps, views, and portraits, all relating to the history of the country, and several of them of great importance.

FARIBAULT, John Baptist, pioneer, b. in Berthier, Quebec, about 1769; d. in Faribault, Minn., in 1860. He received his education in the village school, and at the age of seventeen entered a commercial house in Quebec, where he remained five years. In 1796 he became agent of the American company of the northwest, under the presidency of John Jacob Astor. He left Montreal in the spring for the straits of Mackinaw in a canoe, accompanied by nineteen men. After remaining some days at Mackinaw, he engaged a Pottawattomie Indian as a guide, and set out for the residence of Gen. Harrison, governor of the territory of Indiana, at Port Vincent on the Wabash, in order to obtain permission to trade with the Indians in the United States. He nearly perished on the journey through the treachery of his guide, but reached Gov. Harrison, who received him kindly and granted the necessary permission. He then returned to the mouth of the Kankakee, where he passed the remainder of the year. He afterward established himself at the port of Des Moines, and engaged in a lucrative trade with the Sakis, Foxes, Iowas, and Yankons. Then he proceeded to the Saint Peter, and traded with other Sioux tribes, making also an effort to teach them agriculture. He married a half-breed, by whom he had eight children, and, having prevision of the future greatness of the wild country in which he lived, he had them educated under circumstances of great difficulty. He remained ten years with the Astor company, and then entered into business for himself, realizing a large fortune, which he lost in the war of 1812. He had embraced the American side in this contest, and, having to go on business to Mackinaw after the siege of the fort that the Americans had erected there, he was made prisoner by the English as a traitor to British interests. He continued for several years to travel over the prairies, and although he was often a prisoner in the hands of the Indians, frequently wounded, and on two or three occasions left for dead, he always escaped. He was the first to cultivate the soil west of the Mississippi and north of the Des Moines, and bought agricultural implements with the purpose of teaching the Indians farming. His influence extended among all the Indian tribes of the vast territory from the Mississippi to the Missouri, and as far as Red river. He also acted as a missionary among them, and built, at his own expense, a Catholic church during the years 1840–'3, the first erected in Minnesota. He spent the last days of his life in Faribault, a city founded by his son Alexander. A county in Minnesota is also named in his honor.

FARLEY, Harriet, editor, b. in Claremont, N. H., about 1815. She was the daughter of a Congregational clergyman, and at the age of fourteen began to earn her own living, by turns working at straw- and palm-leaf plaiting, binding shoes, tailoring, weaving, and teaching. Her father then removed to Atkinson, N. H., and combined the duties of principal of two academies with those of his pastorate. Here she learned something of French, drawing, ornamental needle-work, and the usual accomplishments of that day. These were taught her because her friends wished her to be a teacher, an occupation for which she felt the greatest repugnance. This feeling resulted in her leaving home, and, going to Lowell, she determined that if she must support herself she would do so in her own way. She would then, to use her own words, be at liberty to "read, think, and write" when she could, and without restraint. She made good wages in the factories of that city, and expended her earnings in caring for her brothers and sisters, one of whom she assisted in educating. While she was thus engaged, the publication of "The New England Offering," the writers on which were exclusively women operatives in the mills of the city, was begun (January, 1841). Harriet was at first a contributor to, and afterward the editor of, this novel literary venture. After a time she also became the proprietor. "I do all the publishing, editing, canvassing," she writes in a biographical letter, "and, as it is bound in my office, I can, in a hurry, help fold, cut covers, stitch, etc. I have a little girl to assist me in the folding, stitching, etc.; the rest, after it comes from the printer's hands, is all my own work. I employ no agents, and depend upon no one for assistance. My edition is 4,000." Miss Farley published a volume containing extracts from "The Offering," including some of her own contributions, entitled "Shells from the Strand of the Sea of Genius" (Boston, 1847). In 1849 a second collection from the monthly was made and issued in London, with an introduction by Charles Knight, under the title "Mind Among the Spindles." An autobiographical sketch of Miss Farley, not written for publication, may be found in Mrs. Sarah J. Hale's "Biography of Distinguished Women."

FARLEY, James Thompson, senator, b. in Virginia, 6 Aug., 1829. He received a common-school education, and removed to Missouri, and subsequently to California. He studied law, and was admitted to the California bar in 1854, in which state he has since practised. He served for two terms as member of the assembly from Calaveras county, and was (1855–'6) chosen speaker. He was elected to the state senate in 1860, and re-elected for the eight years following, acting as president *pro tempore* during one session. He was for several years the recognized leader of the Democratic party in California, and in 1874 was defeated as a candidate for the U. S. senate by Gov. Newton Booth. He was afterward elected, and served as a senator from 18 March, 1879, till 3 March, 1885.

FARLEY, Michael, patriot, b. in Ipswich, Mass., in 1719; d. there, 20 June, 1789. He represented his native town for several years in the general court, and ranked among its most active members. In 1774 he was chosen one of the council, but Gov. Gage negatived his election. This, however, was considered something of an honor, such men as John Adams, Bowdoin, Winthrop, and Jedidiah Foster being at the time under a similar ban. He was a delegate to the Provincial congress of Massachusetts in 1774–'5, and was afterward a member of the house of representatives, July, 1775. He subsequently acted as one of the supreme executive council, and was for several years major-general of the 2d division of militia. He appears to have been an ardent patriot, and rendered the popular cause essential service.

FARLINGER, Alexander, land-owner, b. in Dundee, Huntingdon co., Quebec, 1 June, 1824. His grandfather, Nicholas, though of German descent, was a loyalist during the war of the Revolution, and emigrated from the Mohawk valley, settling in Cornwall, Canada. Capt. Farlinger in early life commanded one of the line of steamers plying between Kingston and Montreal, and on several occasions accomplished the difficult feat of safely passing the Long Sault, Coteau, Cedar, and Cascade rapids at night. After seven years spent in the service he retired, and engaged in business as a forwarder and general merchant at Prescott. He subsequently removed to Morrisburgh, where he became the owner of a large amount of real estate. This he managed, also speculating in land, until, in 1880, he found himself the owner of 19,000 acres of improved farming property in various parts of eastern Ontario. Many years ago he established a system of farm-tenantry, and now he has more than 100 tenants, several of whom have retained the same holdings for twenty-five years. Capt. Farlinger has interested himself in railway enterprises, and in 1865 projected the Ottawa, Waddington, and New York railway and bridge company, which obtained a charter in 1882. He is an extensive breeder of superior stock, and has been prominent in military matters.

FARLOW, William Gilson, botanist, b. in Boston, Mass., 17 Dec., 1844. He was graduated at Harvard in 1866, at the medical department of that university in 1870, and spent several years in Europe, studying under Henri A. de Bary in Strasburg, and also with Eduard Bornet and Gustave Thuret. In 1874, after his return to the United States, he was appointed adjunct professor of botany at Harvard, and in 1879 was elected to the chair of cryptogamic botany. He is a member of scientific societies in Europe and in the United States, and besides being a fellow of the American association for the advancement of science, received in 1879 an election to the National academy of sciences. Prof. Farlow's publications have been principally devoted to marine algæ, fungi, and diseases of plants. These have gained for him a high reputation among cryptogamic botanists. The accounts of the "Progress of Botany," in the reports of the Smithsonian institution from 1879 till 1886, were written by him, and he has also contributed valuable articles on his specialties to the reports of the U. S. fish commission and to the Massachusetts board of agriculture. He has published "The Potato Rot" (Boston, 1875); "Diseases of Olive and Orange Trees" (1876); "The Gymnosporangia, or Cedar-Apples of the United States" (1880); "The Marine Algæ of New England" (Washington, 1881); and has in preparation (1887) "Introduction to Cryptogamic Botany."

FARMAN, Elbert Eli, jurist, b. in New Haven, Oswego co., N. Y., 23 April, 1831. He was educated at Lima, N. Y., and at Amherst, where he was graduated in 1855. He studied law in Warsaw, N. Y., and was admitted to the bar in 1858. He went abroad in 1865, and spent two years in travel and study. On returning home he was appointed district attorney of Wyoming county, N. Y., to fill a vacancy, and was elected to two terms thereafter as his own successor. He was appointed consul-general at Cairo, Egypt, in March, 1876, and was designated by President Hayes as a member of the International commission to revise the international codes. He was appointed by President Garfield as judge of the international courts of Egypt, and by President Arthur as a member of the International commission that examined the claims of the citizens of Alexandria for damages arising from the bombardment, burning, and pillage of that city in the war of 1882. Mr. Farman was chiefly instrumental in securing from Egypt the granite obelisk known as "Cleopatra's needle," which stood so long in front of the temple of Cæsar in Alexandria, and is now in Central Park, New York. On leaving Egypt, Mr. Farman received from the khedive the decoration of "Grand Officer of the Imperial Order of the Medjidich," a distinction rarely conferred upon foreigners.

FARMER, Ferdinand, clergyman, b. in South Germany in 1720; d. in Philadelphia, Pa., in 1786. He entered the Society of Jesus, and was sent to Maryland in 1752. His real name was Steenmeyer, but on coming to America he changed it to Farmer. He was learned and zealous, and for many years performed missionary duty at several places in New Jersey, and seems to have been the first Roman Catholic priest to visit this colony regularly. He was afterward stationed in Lancaster county, Pa., whence he frequently visited numerous outlying stations in Pennsylvania and New Jersey. After six years' service at Lancaster, he was transferred to Philadelphia.

FARMER, George Edgar, soldier, b. in New York city in 1840; d. there, 16 Feb., 1870. He engaged early in life in mercantile pursuits, but at the beginning of the civil war in 1861 was commissioned 2d lieutenant of the 6th New York cavalry. He was subsequently appointed quartermaster, but before leaving for the seat of war was promoted to captain, and led his company in all the battles in which the regiment participated. At Trevillian Station, during Gen. Sheridan's first raid, Capt. Farmer was shot, but, continuing in the field, was still more seriously wounded at Deep Bottom. He rejoined his regiment in the autumn of 1864, and was with Sheridan throughout his campaign in the valley of the Shenandoah. After the battle of Cedar Creek he was made major, and was for some time in command of the regiment. Continuing with Sheridan's cavalry corps until the surrender of Lee, he was then promoted to lieutenant-colonel by brevet. He was honorably discharged at the close of the war, returned to business, and became a prominent and earnest member of the Grand army of the republic, at his death being in command of the oldest post in the state.

FARMER, Henry Tudor, poet, b. in England in 1782; d. in Charleston, S. C., in January, 1828. In early life he emigrated to Charleston, S. C., where he engaged in mercantile pursuits. He subsequently retired from business, studied medicine in New York, was graduated at the College of physicians and surgeons in 1821, and returned to Charleston, where he practised until his death. He published a small volume entitled "Imagination, the

Maniac's Dream, and Other Poems" (New York, 1819). His "Essay on Taste" includes an appeal to "Croaker." His verses indicate considerable facility in composition, a poetical taste, kindly feeling, and occasionally sound the louder notes of the lyre. It was the intention of Simms, the novelist, to publish a complete edition of Dr. Farmer's poems, the material for which he had obtained from the family. But his death prevented, and the poems have since been scattered and lost.

FARMER, John, genealogist, b. in Chelmsford, Mass., 12 June, 1789; d. in Concord, N. H., 13 Aug., 1838. After teaching for ten years, and subsequently engaging in business, he finally devoted himself to antiquarian investigation with extraordinary zeal and success. He was elected a member of various literary societies, and at his death was corresponding secretary of the New Hampshire historical society, of which he was one of the founders. Among the more important of the works in which he condensed the results of his researches, are his edition of Belknap's "History of New Hampshire" and the "Genealogical Register of the First Settlers of New England" (1829). The latter is a remarkable example of the author's industry and talent for historical investigation. He also published histories of Billerica (1806) and Amherst (1820), and, with the assistance of J. B. Moore, a "Gazetteer of New Hampshire" (1823). Besides contributing to the "Collections" of the historical societies of Massachusetts and New Hampshire, and to the "American Quarterly Register," he compiled the "New Hampshire Register." In 1822, in connection with Jacob B. Moore, he began the historical, biographical, and topographical "Collections of New Hampshire" (3 vols.).

FARMER, John, cartographer, b. in Half Moon, Saratoga co., N. Y., 9 Feb., 1798; d. in Detroit, Mich., 24 March, 1859. He was educated in the vicinity of Albany, N. Y., and taught a Lancastrian school in that city. By invitation of Gov. Cass and the trustees of the University of Michigan, he removed to that state in 1821, and, after teaching for a time, engaged in surveying and drew the first published map of Michigan. In 1825 he issued one on his own account, and afterward published twelve different maps of Michigan, Wisconsin, Lake Superior, and Detroit, most of which he engraved. In 1831 he compiled and drew for the governor and judges of the state the first and only map of Detroit, transmitted by them to congress. It was accepted by that body as authoritative, and was reproduced among the American state papers. His early maps are conceded to have been largely influential in promoting the extensive emigration to Michigan that occurred between 1825 and 1840. During his residence in Detroit, Mr. Farmer filled many important city offices. Before leaving Albany he published the first "Gazetteer of Michigan" (1830).—His son, **Silas,** publisher, b. in Detroit, Mich., 6 June, 1839, was brought up to his father's business, and continued the publication of maps. In 1882 he was chosen historiographer of the city of Detroit. Mr. Farmer claims to have been the first to suggest in print the summer gatherings that have resulted in the Chautauqua, N. Y., movement, and he is also the founder of the Young Men's Christian association of Detroit. He has issued a series of religious tracts under the titles of the "Royal Railroad" and "The Truth-Teller," of which several large editions have been printed. He has published a "History of Detroit and Michigan" (1884; 2d ed., 1887).

FARMER, John W., philanthropist, b. in 1819; d. in Brooklyn, N. Y., 23 Oct., 1869. Mr. Farmer was a generous and philanthropic resident of the city of New York, who took a deep and practical interest in the condition of the poor and laboring classes. He was active for several years in the organization of co-operative societies in New York and vicinity, and was ever fertile in expedients to help the poor to help themselves. In this good work he was never sparing of his own means, and in the winter of distress that followed the financial panic of 1857 he not only gave out provisions with a liberal hand, but established soup-houses for the benefit of the needy. In this way those in want were able to procure nutritious food for less than it would have cost them to prepare it at home, even had the raw material been given them. He pursued the same course during the winter of 1861–'2. The example of opening soup-kitchens was quickly followed in Philadelphia, Boston, and other cities.

FARNAM, Henry, philanthropist, b. in Scipio, N. Y., 9 Nov., 1803; d. in New Haven, Conn., 4 Oct., 1883. His early years were spent on his father's farm and in attending the district school. He afterward studied mathematics by himself, and became a surveyor. He was engaged on the Erie canal, west of Rochester, about 1820, became assistant engineer of the New Haven and Northampton canal in 1825, and its superintendent in 1827. He removed to New Haven in 1839, and in 1846–'8 built the railroad that took the place of the canal. He went to Illinois in 1850, and with Joseph E. Sheffield built the Chicago and Rock Island road, of which he was president in 1854–'63. He then retired from active life, and, after spending about five years abroad, returned in 1868 to New Haven, where he remained till his death. Mr. Farnam gave freely to New Haven charities, especially to the state hospital, and built for Yale, Farnam Hall, one of its best dormitories. He contributed largely for the development of East Rock park, and provided in his will that his residence, one of the finest in the city, should be given, after the death of his immediate heirs, to Yale college for a "president's house."—His son, **Charles Henry,** b. in New Haven, Conn., 12 Sept., 1846, was graduated at Yale in 1868, and at Columbia law-school in 1871. He has been for several years assistant in archæology in the Peabody museum of Yale, and has published a "History of John Whitman and his Descendants" (New Haven, 1887).—Another son, **Henry Walcott,** b. in New Haven, Conn., 6 Nov., 1853, was graduated at Yale in 1874, and received the degree of R. P. D. at Strasburg, Germany, in 1878. He was a tutor in Yale from 1878 till 1880, when he was appointed professor of political economy in Sheffield scientific school. In 1881 he became a member of its governing board. Prof. Farnam has contributed to periodicals numerous articles on his specialty.

FARNHAM, Horace Putnam, physician, b. in Salem, Mass., 7 May, 1822; d. in New York city, 9 June, 1886. He was graduated at Harvard in 1843, studied law with Rufus Choate, and, after graduation from the Dane law-school in 1846, was admitted to practice in 1847. After a visit to Europe in 1855–'6, he began the study of medicine, and obtained the degree of M. D. from Jefferson medical college in 1860. He at once settled in the city of New York as a general practitioner, but paid especial attention to diseases of the throat and nose, in which he was deemed an expert. In 1861–'3 he was attending physician to the Northern dispensary of New York. He was a member of various professional bodies, having been president of the New York medical association in 1865, and treas-

urer and vice-president of that and other societies at different times. He gave largely to the New York academy of medicine, was elected its treasurer in 1877, and subsequently its vice-president. He stood in the front rank of his profession for over twenty years, but was compelled, on account of failing health, to retire in January, 1884.

FARNHAM, Luther, clergyman, b. in Concord, N. H., 5 Feb., 1816. He was educated at Dartmouth and at Andover theological seminary, where he was graduated in 1841. He has since held pastorates at Northfield, Marshfield, Concord, and Linnfield, Mass., and at other places (1844–'69), but has made Boston his permanent residence, serving as one of the editors of the "Christian Alliance," and also of the "Massachusetts Ploughman." In 1855–'61 he was secretary of the Southern aid society, a missionary association having for its especial object the spreading of the gospel among the poorer classes, white and colored, of the south and southwest. In 1862 he was chosen secretary of the General theological library of Boston. Mr. Farnham has succeeded in raising for the Library an endowment of $32,000, and funds with which he has purchased for its use over 11,000 volumes. He has published "A Glance at Private Libraries," a pamphlet (1855), and has also prepared a "History of the Massachusetts Horticultural Society."

FARNHAM, Noah Lane, soldier, b. in New Haven, Conn., 4 June, 1829; d. in Washington, D. C., 14 Aug., 1861. His ancestor, Henry Farnham, came from Kenilworth, England, and settled in Roxbury, Mass., in 1644. In 1833 Noah's parents removed to the city of New York. He was educated in New Haven and at Cheshire, Conn., and entered business in New York at the age of sixteen. When eighteen years old he joined the city guard, and was present with that corps at the Astor place riot. He subsequently joined the fire department, and was soon chosen foreman of a "hook and ladder" company, where he introduced new methods of drill, and practised his men in climbing, jumping, and other athletic exercises. In 1856 he was elected assistant engineer of the New York fire department, and in 1857 joined the 7th regiment, soon attaining the rank of 1st lieutenant. He became acquainted with Col. Ellsworth on the arrival of the latter from Chicago in April, 1861, was persuaded by him to accept the lieutenant-colonelcy of the New York fire zouaves, and succeeded to the command after Ellsworth's death. When the regiment was ordered to march on Manassas, Col. Farnham was confined to a sick-bed, but left it, and rode into action at the head of his men. He was wounded early in the engagement and removed to a hospital in Washington, where he died a few weeks afterward.

FARNHAM, Ralph, soldier, b. in Lebanon, York co., Me., 7 July, 1756; d. in Acton, Me., 26 Dec., 1861. He was the last survivor of the battle of Bunker Hill. In 1780 he settled in Acton, being the first white inhabitant of that township. In 1860 he was invited to Boston, where a concert was given for his benefit in Tremont Temple.

FARNHAM, Roswell, governor of Vermont, b. in Boston, Mass., 23 July, 1827. When he was thirteen years of age his family removed to Bradford, Vt. He was graduated at the University of Vermont in 1849, was admitted to the bar in 1857, and was state attorney from 1859 till 1862. He then entered the army as lieutenant of the 1st Vermont regiment, and was provost-marshal at Newport News, Va. He afterward became lieutenant-colonel of the 12th Vermont during its service in the field. He was in the state senate in 1858–'9, a delegate to the Republican national convention in 1876, and a presidential elector on the Hayes ticket the same year. He has served on the state board of education, and has been one of the trustees of the University of Vermont and the State agricultural college since 1878. He was governor of Vermont from 1880 till 1882, having received the largest vote ever cast, and defeating Edward J. Phelps, afterward minister to England.

FARNHAM, Thomas Jefferson, author, b. in Vermont in 1804; d. in California in September, 1848. He was a lawyer, but in 1839 organized and took the command of a small expedition across the continent to Oregon. He went to California the same year, and was instrumental in procuring the release of a large number of American and English citizens who had been imprisoned by the Mexican government. He is the author of "Travels in Oregon Territory" (1842); "Travels in California, and Scenes in the Pacific" (1845); "A Memoir of the Northwest Boundary-Line" (1845); and "Mexico, its Geography, People, and Institutions" (1846). —His wife, **Eliza Woodson,** philanthropist, b. in Rensselaerville, N. Y., 17 Nov., 1815; d. in New York city, 15 Dec., 1864. Her maiden name was Burhans. She removed to Illinois in 1835, and was married there in 1836, but returned to New York in 1841. In 1844 she accepted an appointment as matron of the female department of the State prison at Sing Sing, that she might prove the possibility of governing such an institution by kindness alone. She met with unqualified success, and retained the office till 1848, when she removed to Boston, and was for several months connected with the management of the Institution for the blind. In 1849 she visited California, and remained there until 1856, when she returned to New York. For the two years following she devoted herself to the study of medicine, and in 1859 organized a society to assist destitute women in finding homes in the west, taking charge in person of several companies of this class of emigrants. She subsequently returned to California. While matron at Sing Sing, she published her "Life in Prairie-Land," and edited Samson's "Criminal Jurisprudence." She is also the author of "California, Indoors and Out," and "My Early Days" (1859). Her most elaborate work is contained in "Woman and Her Era" (2 vols., 1864).

FARNSWORTH, Benjamin Franklin, educator, b. in Bridgeton, Me., 17 Dec., 1793; d. in Louisville, Ky., 4 June, 1851. He was graduated at Dartmouth in 1813, studied for the ministry, and was pastor of the Baptist church at Edenton, N. C., for two years. From 1821 till 1823 he was principal of the Bridgewater, Mass., academy, and then took charge of a girls' high-school at Worcester, Mass. He next edited the "Christian Watchman," of Boston, which he left, in 1826, to take the chair of theology at the New Hampton, N. H., theological institute. Here he remained until 1833, when, after teaching school for a time in Providence, R. I., he was elected president of Georgetown, Ky., college, from which he afterward received the degree of D. D. The following year he was chosen president of the University of Louisville, where he remained until his death.

FARNSWORTH, John Franklin, legislator, b. in Eaton, Quebec, Canada, 27 March, 1820. He removed with his parents to Michigan in 1834, received an academic education, studied and practised law, and afterward went to Chicago, Ill. He was elected to congress as a Republican, and served from 1857 till 1861, when he became colonel of the 8th Illinois cavalry. He subsequently raised the

17th Illinois regiment, by order of the war department, and was commissioned brigadier-general, 29 Nov., 1862, but was compelled to resign from the army in March, 1863, owing to injuries received in the field. He then removed to St. Charles, Ill., and from 1863 till 1873 was again a member of congress. Since 1873 he has been engaged in the practice of his profession in Washington, D. C.— His nephew, **Elon John,** soldier, b. in Green Oak, Livingston co., Mich., in 1837; d. in Gettysburg, Pa., 3 July, 1863, was educated in the public schools, and spent a year at the University of Michigan. Leaving college in 1858, he served in the quartermaster's department of the army during the Utah expedition of that year. He then engaged in buffalo-hunting, and in carrying freight to the then newly discovered mines at Pike's Peak. In 1861 he became assistant quartermaster of the 8th Illinois cavalry, which his uncle was then organizing. He was soon promoted to captain, and took part in all the battles of the Peninsula, and in those of Pope's campaign. He was appointed aide to Gen. Pleasonton in May, 1863, promoted to brigadier-general on the 29th of the following month, and was killed four days afterward while leading a charge during the battle of Gettysburg.

E. J. Farnsworth

FARNSWORTH, Joseph Downing, physician, b. in Middletown, Conn., about 1780; d. in Fairfax, Vt., 9 Sept., 1857. For more than fifty years he was one of the most eminent physicians in Vermont. He was for fifteen years chief judge in Franklin county, and for twenty-seven years a member of the legislature. He was especially active in promoting the interests of the Baptist denomination, to which he belonged, and vigorously opposed an act passed by the Vermont legislature in 1787 requiring the inhabitants of each town to support "the standing order," unless they could show that they were connected with some other religious organization. This act was repealed in 1807.

FARNSWORTH, Philo Judson, physician, b. in Westford, Chittenden co., Vt., 9 Jan., 1832. He was graduated at the University of Vermont in 1854, and at its medical department in 1858. He practised at Phillipsburg, Canada, until 1860, in which year he received a second medical degree from the College of physicians and surgeons in New York. He was in Lyons, Iowa, in 1862–'6, then went to Clinton, Iowa, and in 1870 was elected to the chair of materia medica and diseases of children in the University of the State of Iowa. He is a member of several medical societies, and has contributed frequently to professional journals, chiefly to the "Medical and Surgical Reporter" of Philadelphia. He has also paid some attention to local geology and archæology. He read a paper on the "Therapeutics of Ammonia" before the American medical association in 1873, and one on "Indian Mounds" before the Iowa national history society in 1876. He is the author of "A Synopsis of a Course of Lectures on Materia Medica" (Chicago, 1884).

FARNUM, John Egbert, soldier, b. in New Jersey, 1 April, 1824; d. in New York city, 16 May, 1870. He was educated in Pottsville, Pa., entered the army as sergeant-major of the 1st Pennsylvania infantry in 1846, and served through the Mexican war. Subsequently he joined the Lopez expedition to Cuba which left New Orleans in 1850, and also took an active part in Walker's Nicaraguan expeditions. Still later he was captain of the slave-yacht "Wanderer," and was indicted at Savannah for carrying on the slave-trade. He is said to have regretted this episode in his life, and at the beginning of the civil war he became major in the 70th New York volunteers, which was raised and commanded by Gen. Sickles. He distinguished himself for gallantry in all the engagements in which Sickles's brigade took part, and was promoted colonel of his regiment. At the battle of Williamsburg, 5 May, 1862, he was severely wounded, but recovered in time to take part in the battles of Fredericksburg, Chancellorsville, and Gettysburg, and was brevetted brigadier-general for gallant conduct in those engagements. He was then compelled by his wounds to abandon active service, and accepted the colonelcy of the 11th regiment of the veteran reserve corps, which he retained till the close of the war. Later he was appointed inspector of customs in the city of New York, which office he held at the time of his death.

FARQUHAR, Norman von Heldreich, naval officer, b. in Pennsylvania, 11 April, 1840. He was graduated at the U. S. naval academy in 1859, became a lieutenant in 1861, a lieutenant-commander in 1865, and a commander in 1872. In 1862–'3 he was executive officer of the steamer "Mahaska," of the North Atlantic squadron, and during that period frequently engaged the enemy both afloat and in expeditions on shore. As executive officer of the "Santiago de Cuba" he took part in both attacks on Fort Fisher, N. C., and led the men of that vessel in the successful assault on the fort of 15 Jan., 1865. He was commandant of cadets at the U. S. naval academy in 1881–'6, and in the latter year was promoted captain.

FARRAGUT, David Glasgow, naval officer, b. at Campbell's Station, near Knoxville, Tenn., 5 July, 1801; d. in Portsmouth, N. H., 14 Aug., 1870. His ancestry is traced to Don Pedro Ferragut, called "El Conquistador," who served under James I., king of Aragon, in the campaign in which the Moors were expelled from Majorca and Valencia in the 13th century. The estates of the family were in the Balearic islands, and among the notable members were Agustin, a theologian; Pablo, an historian; Antonio, a distinguished soldier of the 17th century; Gonzalo, bishop of Urgel; and three magistrates of the kingdom of Majorca. But the name is now extinct in those islands. The admiral's grandfather married Juana Mesquida, and that surname appears to have superseded Ferragut. The admiral's father, George Farragut, b. in Minorca, 29 Sept., 1755; d. at Point Plaquet, West Pascagoula, La., 4 June, 1817, emigrated to this country in 1776, took part in the Revolutionary war, and was the friend and companion of Gen. Andrew Jackson during his Indian campaigns of 1813–'14. The journal of the U. S. house of representatives for 1797 records that William C. C. Claiborne presented "the petition of George Farragut, praying that he may be allowed the balance of pay due to him for services rendered the United States as muster-master of the militia of the district of Washington [East Tennessee], employed in actual service for the protection of the frontiers of the United States south of the Ohio, from the 1st of

D. E. Sickles

March, 1792, to the 26th of October, 1793." George Farragut, as sailing-master of an expedition to the Bay of Pascagoula in 1810–'11, sent by Gov. Claiborne, of the Mississippi territory, bore a principal part in securing from the Spaniards the disputed territory on that coast. Dr. Flood, the commissioner, wrote in his report: "At the special request of the inhabitants of Pascagoula, by whom he is greatly beloved, I prevailed on Sailing-Master George Farragut to accept the commission of magistrate." George Farragut married Elizabeth Shine, of North Carolina, who bore him five children—three sons and two daughters—and died in New Orleans in 1808, of yellow fever.

The boyhood of David Glasgow Farragut lacked none of the dangers and hardships of frontier life. In his journal he says: "I remember that on one occasion, during my father's absence, a party of Indians came to our house, which was somewhat isolated; when my mother, who was a brave and energetic woman, barred the door in the most effectual manner, and sent all of us trembling little ones up into the loft of the barn while she guarded the entrance with an axe. The savages attempted to parley with her, but she kept them at bay until finally they departed. My father arrived shortly afterward with his command (he was a major of cavalry), and immediately pursued the Indians, whom I believe he succeeded in overtaking and punishing." At the age of eight the boy accompanied his father in a small boat across Lake Pontchartrain, during a gale. "This expedition," he says in his journal, "was my first experience on salt water, and I fervently hoped at that time it would be my last." The father, who appears to have been afraid of nothing on land or sea, and once went from New Orleans to Havana in a pirogue (a sort of canoe), was in the habit of taking his children across the lake in all sorts of weather, saying "now was the time to conquer their fears." At this time Sailing-Master David Porter, father of Com. Porter, of the "Essex," being at the New Orleans naval station, became ill, was taken care of at Farragut's house, and died there, his funeral being on the same day with Mrs. Farragut's. This circumstance led to a warm friendship with Com. Porter when he succeeded his father on that station, and he offered to adopt one of the boys. The eldest son, William, had already received an appointment in the navy. The choice being presented to the two others, David promptly said that he would go, and accompanied Porter in the bomb-ketch "Vesuvius" to Washington. There he was placed in school, and there also he was introduced to Paul Hamilton, secretary of the navy, who promised to give him a midshipman's warrant as soon as he should complete his tenth year. Subsequently Farragut attended school in Chester, Pa., where the Porter family resided. He was but nine and a half years old when he received the promised appointment in the navy, 17 Dec., 1810. In July of the next year he went to Norfolk, Va., in company with Capt. Porter, who there took command of the frigate "Essex," which cruised up and down the coast, her men by constant practice being brought to the highest state of efficiency. The midshipmen were sent to school in Newport, R. I., during the greater part of the winter.

When war with England was declared in June, 1812, the "Essex" was quickly made ready for sea, and soon captured several prizes. On this cruise Farragut discovered and frustrated a mutiny among the prisoners. In October the "Essex" put to sea again, under orders to join Bainbridge's squadron in the West Indies; but Porter failed to find the squadron, and on his own responsibility continued his voyage southward, doubled Cape Horn, and made a memorable cruise in the Pacific. (See Porter, David.) Young Farragut was made prize-master of one of the captured vessels, and ordered to take her to Valparaiso, the captain to navigate her. When Farragut, who confesses that he "was a little afraid of the violent-tempered old fellow," gave his first order, the captain flew into a rage, declared he "had no idea of trusting himself with a d—d nutshell," and went below for his pistols. The twelve-year-old prize-master thereupon assumed complete command, had his orders obeyed, called down to the captain that if he came on deck with his pistols he would be thrown overboard, and thenceforth was master of the ship. While the "Essex" was refitting in the Marquesas islands, Farragut and the other midshipmen played with the native boys, and became expert swimmers. The first battle in which Farragut participated—that of the "Essex" against the "Phœbe" and the "Cherub," in the harbor of Valparaiso, 28 March, 1814—was one of the bloodiest ever fought on the sea. He says in his journal: "I performed the duties of captain's aide, quarter-gunner, powder-boy, and in fact did everything that was required of me. I shall never forget the horrid impression made upon me at the sight of the first man I had ever seen killed. It staggered and sickened me at first, but they soon began to fall around me so fast that it all appeared like a dream, and produced no effect on my nerves. After the battle he was at work for nearly a month assisting the surgeons in the care of the wounded, when the survivors were sent to New York in the "Essex Junior." Farragut was sent to school again at Chester, Pa., where he was not only instructed in the usual branches, but also drilled as a soldier.

In April, 1815, he sailed for the Mediterranean in the "Independence," as aide to Capt. William M. Crane; but she arrived too late to take part in the Algerine war, and, after visiting Malaga, Carthagena, and Gibraltar, returned home and wintered at Boston. In 1816 he visited the Mediterranean again, on board the "Macedonian," which conveyed William Pinkney, U. S. minister to Naples; and in 1817 the ship made an extended cruise in that sea, stopping in almost every port, and giving officers and crew abundant opportunities to visit the places of interest. In the autumn of that year the chaplain, Charles Folsom (*q. v.*), was appointed U. S. consul at Tunis, and at his request Midshipman Farragut spent nine months with him, studying French, Italian, English literature, and mathematics. At this time Richard B. Jones, U. S. consul at Tripoli, wrote to Mr. Folsom: "With regard to my young friend, Farragut, if he will only apply steadily to useful purposes the talents with which he is so bountifully enriched, it must, with his amiable disposition and obliging manners, insure him the respect and esteem of all who know him, and place him, at some future period, high in the niche of fame." In a later letter the same appreciative friend spoke of Farragut as "the young admiral." He attended the grand duke's ball in Pisa, and gives a humorous account of his misadventures. "At one time my shoebuckle caught in the flounce of the archduchess's dress. I kicked off the offending shoe with great elegance, and then knelt down and extricated it, with a suitable apology. Soon after this I trod on the grand duke's toe, and had to make another apology. Chagrined at my own awkwardness, I determined to retire, and looked around for my cocked hat, when I found the Countess Testa using it for a

foot-warmer. I drew it to me rather unceremoniously, at which she remarked that I 'ought to feel myself highly complimented, and should not be offended.' To which I replied, 'Madame, it might be so considered in your country, but not in mine.'"

In the spring of 1819 Farragut made another cruise in the Mediterranean, and was made acting lieutenant on the brig "Shark." In 1820 he was ordered home for his examination, and sailed in a merchantman. On the voyage they were sighted and chased by a Colombian war vessel, which the frightened captain supposed to be a pirate. Farragut therefore took command of the ship, mustered the crew, and prepared for resistance. When a small boat from the man-of-war came alongside, he had a grindstone and a barrel of tar ready to drop into it and sink it if they should prove to be pirates. He passed his examination, but not well enough to satisfy himself, and went to Norfolk, Va., where he fell in love with Miss Susan C., daughter of Jordan Marchant, whom he married three years later.

In May, 1822, he was ordered to sea in the sloop-of-war "John Adams," which conveyed the newly appointed U. S. representatives to Mexico and Guatemala. On this cruise he met Gen. Santa Aña (afterward president of Mexico) at Vera Cruz, and made his first acquaintance with the Gulf where his fame was to be won forty years later. After his return he obtained orders to sail in the schooner "Greyhound," of Com. Porter's fleet, which was preparing for a cruise against freebooters of the West Indies. They had numerous encounters with the pirates, and on one occasion Farragut was sent ashore at the Isle of Pines, in command of a detachment who, after making their way through swamps and thick chaparral, found the caves and concealed houses of the robbers, drove them out, and set fire to everything that would burn. Soon afterward Farragut was made executive officer of Porter's flag-ship, the "Seagull," which made a cruise to examine the reefs and shoals of the Gulf. In a subsequent cruise he obtained leave of absence and went to visit his friends in New Orleans, taking passage in a vessel that was carrying thither the first load of bricks for the construction of Fort Jackson, with which Farragut fought his first battle in the civil war. In July, 1823, he was assigned to the command of the "Ferret," which convoyed merchantmen through the Gulf, to protect them from pirates. He had many cases of yellow fever on board, and treated them himself, the only death being that of a midshipman who refused his prescription because he was not a physician. He himself took the fever on his homeward voyage, and on his arrival was sent to the hospital in Washington, where he remained until his recovery.

In 1825 he was commissioned lieutenant, and ordered to the frigate "Brandywine," Capt. Charles Morris, which in September carried Lafayette home to France, and after that made a cruise in the Mediterranean. On his return home in May, 1826, Farragut took his wife to New Haven, Conn., to be treated for neuralgia, and remained there four months, attending the lectures of the Yale professors. Those of Prof. Silliman especially interested him. After this he spent two years at Norfolk, Va. He was an accomplished cook, and prepared all the food for his invalid wife, and personally took a large part of the care of her. At the same time he established a successful school for boys on the receiving-ship "Alert." When Samuel L. Southard, secretary of the navy, inspected this school, he gave it what Farragut calls "one of the few, the very few, compliments I ever received from the navy department or its head."

In October, 1828, he was ordered to the new sloop-of-war "Vandalia," which in December sailed for the Brazil station. The squadron went to Buenos Ayres, and was there when Rosas became dictator. In the autumn of 1829 it returned to Rio de Janeiro, where Farragut witnessed the marriage of the Emperor Dom Pedro I., and was presented at court. In December an affection of the eyes, which had long troubled him, compelled him to ask for leave of absence, and he went home in a merchantman, which on the way was chased by a pirate. Farragut found four carronades and twenty-four pounds of powder on board, mounted the guns, and got everything ready for a vigorous defence; but the merchantman outsailed her pursuer. In December, 1832, he was ordered to the "Natchez," which in January, 1833, sailed for Charleston harbor, where she remained until the nullification troubles were over. The vessel was next ordered to the Brazil station. Of Farragut's qualities as executive officer at this time, one of those that sailed with him wrote: "Never was the crew of a man-of-war better disciplined or more contented and happy. The moment all hands were called, and Farragut took the trumpet, every man under him was alive and eager for duty. I remember well one occasion when he took the 'Natchez' out of the harbor of Rio, which at the entrance is quite narrow, against a head wind, by a manœuvre termed 'box-hauling.' There were several men-of-war in port, English and French, whose officers and crews were watching us closely. Many declared that the manœuvre could not be successfully accomplished, but it was done splendidly, without a balk or failure, and I shall remember to my dying day the glow of pride and satisfaction which we all felt." In March, 1834, he took command of the schooner "Boxer," which he thoroughly overhauled and repaired in the harbor of Rio. The "Boxer" was ordered home in the summer, and for four years the lieutenant was in Norfolk and Washington, serving on courts-martial, waiting for sailing orders, and taking care of his wife, who died in 1840. In August, 1838, he was given command of the sloop "Erie," and ordered to Tampico, because of the prospect of war between France and Mexico. There he made minute observations of all the military and naval movements, particularly the bombardment of the castle of San Juan de Ulloa, and gave his conclusions in a long letter to Com. Barron, in which he wrote: "If we who wander about the world do not keep those at home informed of the daily improvements in other navies, how can we hope to improve, particularly when we see men impressed with the idea that, because they once gained a victory, they can do it again? So they may; but I can tell them it must be with the means of 1838 and not those of 1812."

He now spent two years more at home, serving on courts-martial and learning the carpenter's trade, till the spring of 1841, when he became executive officer of the "Delaware," and in September he received his commission as commander. He sailed once more for South American waters, and in June, 1842, received command of the "Decatur." He took every opportunity to travel in the countries whose ports he visited, and became specially familiar with South American affairs. The cruise ended in Norfolk harbor in February, 1843. There, in December of that year, he married Virginia, eldest daughter of William Loyall, a woman of superior character and cultivation, and no little literary ability, who survived him fourteen years. In April, 1844, he became executive officer of the "Pennsylvania," and at the beginning of the Mexican war in

1846 applied for command of a ship and active service. After much difficulty, he obtained the sloop-of-war "Saratoga," in February, 1847. He collected a crew, and sailed two days after his assignment, eager to capture the castle of San Juan de Ulloa, which he believed could be done with three vessels; but when he arrived at Vera Cruz the castle had just surrendered to the land forces. Farragut always thought Com. Conner had lost a great opportunity in not attacking it. He says in his journal: "Of all the service I had seen since entering the navy, this cruise was the most mortifying. As I had the ill-will of my commodore" [Matthew C. Perry], "I was not permitted to participate in any of the expeditions and more honorable duties, but was placed under a reef of rocks off Tuxpan, to blockade that port. When I could bear the imposition no longer, I reported the facts to the navy department, and asked to be relieved from under his command, or from command of the ship. Accordingly, I was ordered home with my vessel. My letters were considered improper by the secretary of the navy." Com. Perry denied that he had any prejudice against Farragut.

In February, 1848, Farragut's vessel returned home, when he was assigned to the Norfolk navy-yard for two years, and in October, 1850, was ordered to Washington to compile a book of ordnance regulations for the navy, in collaboration with Commander T. A. Dornin and Lieuts. Barron, Harwood, and Fairfax. This work occupied them a year and a half. When it was completed, Farragut says: "Many of the best features were overruled and stricken out, as were also the drawings, which we considered fine illustrations. The book was highly commended by officers of other navies than our own; but where is it now? God only knows! For those who had the power called a new board ten years afterward, and made a few necessary changes to suit the introduction of steam and heavy guns, and the names of the original board were obliterated." During those eighteen months he attended regularly the lectures at the Smithsonian institution. When he returned to the Norfolk navy-yard as ordnance officer, he gave the officers a weekly lecture on gunnery. Lieut. Percival Drayton was associated with him at this time in a series of experiments at Fort Monroe, to test the various classes of guns used in the navy, and an intimate friendship grew up between the two officers which lasted through their lives.

When the Crimean war began, in 1854, Farragut asked to be sent thither as a professional observer. This request was denied by the navy department; but soon afterward he was sent to establish a navy-yard on the Pacific coast, the site chosen being Mare Island, in the bay of San Francisco. This task occupied him four years. During this time the affair of the vigilance committee took place, and he was appealed to for aid to the state authorities; but he carefully refrained from all interference.

In July, 1858, he returned to the Atlantic coast, and was given command of the "Brooklyn," a new sloop-of-war, in which he conveyed to Vera Cruz Robert M. McLane, the new U. S. minister to Mexico. The ship was then placed at the disposal of Mr. McLane and took him to various points on the coast, that he might communicate with the American consuls. Farragut was taunted with being at the beck and call of a civilian, and made a characteristic answer: "I can only say that I am always at the service of the country in doing my duty, and would rather be subject to the directions of an intelligent man appointed by the government for a purpose on account of his qualifications, than to be under some old fool who has floated up to his position without the first requisites, the only merit that he possesses being that he had been in the navy all his life without having done anything to recommend him either to the government or to his brother officers." From Vera Cruz he wrote: "I can't help loving my profession; but it has materially changed since the advent of steam. I took as much pleasure in running into this port the other day in a gale of wind as ever a boy did in any feat of skill. The people seemed astonished. McLane said he would sooner have done it than anything else—except to take a ship." Governmental affairs in Mexico were very much disturbed at this time, 1859, and Farragut was of great service in protecting American interests there, for which he received a letter of thanks from American merchants in Vera Cruz. He made another trip to Mexico in November, and in December passed up the Mississippi to New Orleans, where he arrived just in time to attend the funeral of his brother William, who was retired as a lieutenant. The intimate acquaintance with the Gulf of Mexico and the lower Mississippi, which Farragut gained by these frequent visits, was found to be of inestimable value to him two years later.

In the winter of 1860–'1 Farragut was on waiting orders in Norfolk, Va. The one topic of discussion there, as elsewhere throughout the country, was the impending secession of the south and the probability of civil war. If an amicable separation of the country should take place, he would remain with the south, because his relatives were there and his home, so far as he had a home on shore. But he did not see how secession could be attempted without war, and in that event he held that his allegiance was due to the National government, to which he was indebted for his naval education, rank, and employment. He watched with intense interest the efforts to carry Virginia into the Confederacy, and when it was accomplished he declared that "the state had been dragooned out of the Union." As he expressed his opinions freely, and boldly said that President Lincoln was justified in calling for troops, he was told that a person with such sentiments "could not live in Norfolk." "Well, then," said he, "I can live somewhere else," and that very evening (18 April, 1861) he departed with his wife and son, going first to Baltimore, and finally taking a cottage at Hastings-on-the-Hudson. He was a member of a naval retiring-board in Brooklyn, but had little else to do for nearly a year. One privateer, the "Sumter," had already been sent out by the Confederates. Farragut, who had a theory as to her probable movements, asked the government to let him go in chase of her with a swift vessel, but the suggestion was not approved.

In December, 1861, he was summoned to Washington, whence he wrote a hurried note to his wife: "Keep your lips closed, and burn my letters, for perfect silence is to be observed—the first injunction of the secretary. I am to have a flag in the Gulf, and the rest depends upon myself. Keep calm and silent. I shall sail in three weeks." For some time a formidable expedition had been in preparation, intended to reduce the defences of New Orleans and capture that place, which was by far the largest city in the south. The expedition included twenty-one schooners, each carrying a large mortar, under command of Commander (now Admiral) David D. Porter. Farragut had no faith in the efficacy of these mortars, but, as a great deal of time and money had been spent in their preparation, he accepted the fleet as he found it. He sailed from Hampton Roads, 2 Feb., 1862, in the

steam sloop-of-war "Hartford," 1,900 tons, which from that time till the close of the war was his flag-ship. She had a speed, under steam alone, of eight knots, or with steam and sail combined, of eleven knots. She carried twenty-two nine-inch Dahlgren guns, two twenty-pounder Parrots, and a rifled Sawyer gun on the forecastle; and Farragut had her fore- and main-tops protected with boiler iron and armed with howitzers. His orders instructed him to "collect such vessels as can be spared from the blockade, and proceed up the Mississippi river and reduce the defences which guard the approaches to New Orleans, when you will appear off that city and take possession of it under the guns of your squadron. . . . As you have expressed yourself perfectly satisfied with the force given to you, and as many more powerful vessels will be added before you can commence operations, the department and the country require of you success." A military force of 15,000 men, designed to co-operate with the fleet in capturing New Orleans, and to garrison the place after it should be taken, sailed in transports from Fort Monroe, on 20 Feb., commanded by Gen. Benjamin F. Butler. The place of rendezvous was Ship Island, which is about one hundred miles northeast of the mouths of the Mississippi.

At the last great bend in the river, about thirty miles above the mouth, stood Fort Jackson on the right bank and Fort St. Philip on the left. A single fort at this point had held the British forces in check for nine days in 1814–'15, though they threw a thousand shells into it. Fort Jackson was a bastioned fortification, built of brick, with casemates and glacis, rising twenty-five feet above the water. Fort St. Philip was smaller, and rose nineteen feet. The whole number of guns in the two works was about 115, which were of various kinds and sizes, but mostly smooth-bore thirty-two-pounders. Above the forts lay a Confederate fleet of fifteen vessels, including an iron-clad ram and a large, unfinished floating battery covered with railroad iron. Below the forts two iron chains were stretched across the river, supported on eight hulks anchored abreast. Two hundred Confederate sharp-shooters kept constant watch along the banks, and several fire-rafts were ready to be lighted and sent down against the fleet. To pass these obstructions and fight his way to the city, Farragut had six sloops-of-war, sixteen gun-boats, twenty-one mortar schooners, and five other vessels, carrying in all over 200 guns. This was the largest expedition that had ever sailed under the United States flag, but it did not include a single iron-clad, and while it was mainly built for sea-service, its task now was to operate in a river with many shoals and a shifting channel. To get the larger vessels over the bar at Southwest pass, it was necessary to lighten them as much as possible, and then drag them over through a foot of mud. With the "Pensacola" alone, this process occupied two weeks. The "Colorado" could not be taken over at all.

The mortar schooners were towed up the stream to a point within reach of the forts, and began to take their places and open fire on 18 April. There was a stretch of woods between them and the forts, and their masts were trimmed with bushes to prevent them from being distinguished. The gunners could not see the forts, but fired with a computed aim, the result of careful observation and triangulation by a coast-survey officer. They used shells weighing 285 pounds, and kept up a constant fire for six days and nights, throwing nearly 6,000 shells. This resulted in disabling fifty-three of the garrison and destroying some of the buildings, but not in materially damaging the forts. Farragut was impatient with this operation, as it only served to give the enemy warning, and he found the greatest difficulty in preventing collisions in his fleet. Half a dozen fire-rafts were sent down, but boats'-crews tackled them, and either towed them ashore or sent them out to sea. Perhaps no commander was ever so completely master of every detail as Farragut. He could have taken the place and performed the duties of any man in the fleet. He issued orders in which minute directions were given for every contingency that he could anticipate, and in addition to this he bade his officers use their own ingenuity. They whitewashed the decks (for the attack was to be in the night) and took other precautions, the most important of which were those intended to protect the boilers and machinery. Not only was the coal so placed as to guard these, but all the spare chains were "stoppered" up and down the side amidships. In the night of 20 April, Capt. Henry H. Bell went silently up the river with a boat's-crew and unfastened the chains to make an opening for the fleet to pass through. In the night of the 23d, Lieut-Com. C. H. B. Caldwell was sent up to see if the way was still clear, and signaled that it was; but the enemy discovered him and opened fire, at the same time sending down fire-rafts and lighting two large piles of wood near the ends of the chain, so that the whole scene was made as bright as day. But the fleet was now ready for the attack, and at half past three o'clock in the morning it was under way. The first division, consisting of eight vessels, was commanded by Capt. Theodorus Bailey; the second, three vessels, was led by Farragut's flag-ship; the third, six vessels, commanded by Capt. Bell. As the line of battle passed through the opening in the chain, it came within reach of the guns of the forts, and each vessel in succession was subjected to a raking fire. One became entangled among the rafts and did not get free in time to make the passage, another received a shot in her boiler and was compelled to drop down-stream again, while a third, being delayed till daylight, attempted to pass up alone and was driven back by a destructive fire. With these exceptions, the whole line moved steadily up the river, sailing close to the forts and pouring in broadsides of shell and grape-shot that at times swept the bastions clear of the enemy and silenced the guns. After passing by the forts, the fleet was subjected to a raking fire similar to that which it had encountered in the approach, and no sooner had it gone beyond the range of this than it encountered the Confederate fleet. But of this it made short work; some of the enemy's vessels were driven ashore, some were run down, and others were riddled with shot. The flag-ship "Hartford" grounded on a shoal, and at the same time the ram "Manassas" pushed a fire-raft against her. But the flames were promptly extinguished and the vessel gotten off into deep water, when she was approached in the smoke and darkness by a steamer crowded with men, evidently intending to board her. She at once planted a heavy shell in the stranger, which exploded, and the vessel disappeared. The "Hartford" then passed on up-stream, firing right and left into the enemy's gun-boats. The "Brooklyn" encountered several of these, into one of which she sent eleven shells at a single discharge, all of which exploded, and the gun-boat ran ashore in flames. The "Mississippi," a side-wheel steamer, encountered the ram "Manassas," and received a blow that disabled her machinery; but she sent a broadside through the ram, and

promptly boarded it and set it on fire, so that it drifted down the river and exploded. The gun-boat "Varuna," of Farragut's fleet, was rammed by two Confederate gun-boats and sank in fifteen minutes. At daylight the fleet continued on its way up the river, and Capt. Bailey, leading in the "Cayuga," captured a Confederate regiment encamped on the bank. On the morning of the 25th the Chalmette batteries, three miles below the city, were attacked and silenced, and an hour later New Orleans itself was at the mercy of Farragut's guns. This exploit had cost the National fleet 37 men killed and 147 wounded, and one vessel sunk out of the seventeen. The Confederate fleet was completely destroyed. At noon the surrender of the city was demanded of the mayor, and Capt. Bailey was sent ashore to haul down the Louisiana flag and raise the stars and stripes over the public buildings. A troublesome correspondence with the mayor ensued, and Farragut was glad to turn over the city to Gen. Butler as soon as the troops could be brought up, on the evening of 1 May. The forts had surrendered to Com. Porter on the 28th. It appears that this timely capture of New Orleans changed the purpose of the Emperor Napoleon, who was about to recognize the Confederacy and take measures to raise the blockade.

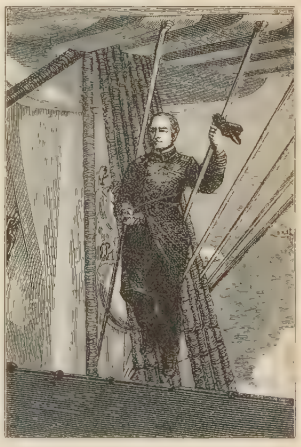
Farragut wanted to take his fleet at once to Mobile, capture that place, and close the port to blockade-runners; but the government was anxious to open the Mississippi through its whole length, and the ships were therefore kept in the river for some months. Before daylight, on 28 June, 1862, he ran by the batteries at Vicksburg with eight vessels, joining Com. Charles H. Davis's fleet of iron-clads above the city. In this passage Farragut's fleet was under fire about two hours, and lost fifteen men killed and thirty wounded. On 15 July, finding that nothing could be effected at Vicksburg by the fleet alone, he ran the batteries again, descending the river to New Orleans. The next day he was commissioned rear-admiral.

On 14 March, 1863, to assist Gen. N. P. Banks in his siege of Port Hudson, Farragut attempted to run by the batteries at that place with seven vessels —three sloops-of-war, each with a gun-boat lashed to the port-side, and the side-wheel steamer "Mississippi." By this arrangement, if a vessel were disabled, the gun-boat could take her out of the fight. But they met so destructive a fire that only the "Hartford" and her attendant gun-boat succeeded in getting by. The "Mississippi" ran aground and was burned, and the others were compelled to drop down stream. With the "Hartford" and the "Albatross" Farragut proceeded up stream and blockaded the mouth of Red river, thus preventing Confederate supplies from coming down, or re-enforcements from going up to the army of Gen. Richard Taylor. Coal and provisions were sent down to him by Gen. Grant and Admiral Porter, on barges that drifted past the Vicksburg batteries in the night. Subsequently he assisted Gen. Banks in the investment of Port Hudson, till it was surrendered, 8 July.

The Mississippi was now open to navigation through its entire length. Admiral Porter took Farragut's place at New Orleans, while Farragut sailed for New York in the "Hartford," arriving in August. When the flag-ship was examined at the navy-yard, it was found that she had been struck 240 times by shot and shell during her nineteen months of service. Farragut was given public welcome home and receptions by the New York chamber of commerce and committees of citizens, and rested five months while the ship was refitted.

In January, 1864, he returned to the Gulf, visited Ship Island and Pensacola, establishing depots of supplies, and prepared for his long-meditated attack on the defences of Mobile. In May a beautiful sword, with a gold and silver scabbard and the hilt set in brilliants, was sent to him by the Union League club of New York. About this time he wrote: "If any one asks what I am doing, answer, Nothing but waiting for the world to turn round till it comes my turn to do something." He reconnoitred the forts, and declared that an attack would be useless till he had some iron-clads. These came at last, as did also the troops under Gen. Gordon Granger for the land attack.

The defences of the bay consisted mainly of two forts—Morgan at the eastern side of the entrance, and Gaines at the western — three miles apart. From Fort Gaines eastward to a point near Fort Morgan stretched a line of piles and a double line of torpedoes. The point where they terminated was indicated by a red buoy, and the blockade-runners were accustomed to pass in by the narrow channel between this buoy and Fort Morgan. Inside of these defences lay the Confederate iron-clad ram "Tennessee" and three wooden gun-boats. As at New Orleans, Farragut issued general orders containing the most minute instructions for every contingency. His seven sloops-of-war—the "Brooklyn" leading and the "Hartford" coming second —were to form one line, each sloop having a gun-boat lashed on the port side, to take her through if her machinery should be disabled. The "Brooklyn" was given the lead because she had four chase guns and a contrivance for picking up torpedoes. The four iron-clad monitors, "Tecumseh," "Manhattan," "Winnebago," and "Chickasaw," formed another line to the right of the line of wooden ships, between them and Fort Morgan. Six steamers were placed south and east of that work, to keep up a flank fire upon it. Before daylight on 5 Aug. everybody in the fleet was astir, and at half-past five the signal was given for the advance. An hour later the combatants were within range, and the firing began immediately, and was heavy and destructive on both sides. The admiral mounted into the port main rigging, in order to see over the smoke, and as this increased he gradually mounted higher. Capt. Drayton, to prevent his falling to the deck in case of being wounded, sent up a quarter-master with a piece of lead-line, which was made fast to one of the shrouds and passed around the admiral, to prevent such an accident. The commanders had all been instructed to keep to the east of the red buoy; but the leading monitor, in her eagerness to engage the Confederate ram, passed west of it, struck a torpedo, and suddenly went down. (See Craven, Tunis A. M.) A little later the "Brooklyn" stopped, and this seemed likely to throw the whole line into confusion. "What is the trouble?" was shouted



through a trumpet from the "Hartford." "Torpedoes!" was the answer. "Damn the torpedoes!" exclaimed Farragut. "Four bells! Capt. Drayton, go ahead! Jouett, full speed!" Thus the "Hartford" passed the "Brooklyn," took her place at the head of the line, and led the fleet into the bay. Every vessel suffered from the enemy's fire as it approached the fort, poured in rapid broadsides that silenced the Confederate guns when it was abreast of the work, and suffered again from raking fire after it had passed. Inside of the bay, the signal "Chase enemy's gun-boats" was given, and the lashings that held the gun-boats to the sloops were cut with axes and the former made off for their prey, and one Confederate gun-boat was captured, one was sunk, and another driven under the guns of the fort. There was a brush with the iron-clad ram, but it was not serious, and the fleet came to anchor three miles up the bay. Farragut was planning to attack the ram as soon as it should be dark enough to prevent the garrison of the fort from seeing which was friend and which foe; but the ram anticipated him, steaming directly for the flag-ship in the midst of the fleet. The admiral at once gave orders for every ship to attack her, not only with shot but by ramming, and a desperate contest ensued. The ram had the advantage in that she was sure of striking an enemy with every blow, while the fleet had to avoid running and firing into one another. Their shot had no effect on the sloping iron sides of the monster, and when the wooden vessels rammed her they splintered their own bows and only heeled her over. But the monitors, with their enormous guns, shot away her smoke-stack and steering-apparatus and jammed her shutters, while one fifteen-inch shot actually penetrated her armor. Her commander was wounded, her crew could do nothing in the smoke that filled their vessel, and she displayed a white flag and surrendered. In the fight the "Lackawanna" had accidentally run into the flag-ship and cut her down nearly to the water's edge. The victory cost the National fleet 335 men, including 52 killed by shot and 113 drowned in the "Tecumseh." The Confederate fleet lost 10 killed, 16 wounded, and 280 prisoners. The loss in the forts is unknown. A few days later they were surrendered. Farragut in his official report awarded the most generous praise to all that had assisted in winning the victory. He said: "The commanding officers of all the vessels that took part in the action deserve my warmest commendations, not only for the untiring zeal with which they had prepared their ships for the contest, but for their skill and daring in carrying out my orders during the engagement," and he mentioned every one of them specially. He also wrote: "I witnessed the terrible effects of the enemy's shot, and the good conduct of the men at their guns; and although no doubt their hearts sickened, as mine did, when their shipmates were struck down beside them, yet there was not a moment's hesitation to lay their comrades aside and spring again to their deadly work." The quartermaster that tied him in the rigging says he saw the admiral come on deck just as the killed of the "Hartford" were being laid out, and "it was the only time I ever saw the old gentleman cry, but tears came in his eyes like a little child." Henry Howard Brownell was on board the flag-ship as an acting ensign, and described the battle in one of his finest poems, "The Bay Fight." The city of Mobile could not be captured by the fleet as New Orleans had been, because of shoal water and obstructions in the channel. But the purpose of the operation, to stop the passage of blockade-runners and so close another main avenue of supply to the Confederacy, was accomplished. The accompanying view of the "Hartford" shows the ship as she appeared in Mobile bay after the battle. The stunted appearance of her masts is due to the fact that her top-gallants were housed. Her hull was painted lead-color.

In November, as Farragut's health was failing, the department ordered him home, and on 12 Dec. he reached New York, where he was given a public reception, and a purse of $50,000 was presented to him for the purchase of a home in the city. A bill creating the grade of vice-admiral was passed by congress on 22 Dec., and the next day President Lincoln signed it, and nominated Farragut for the office, which nomination the senate at once confirmed. When Richmond fell into the hands of the National forces, Farragut, who was on the James, with Gen. George H. Gordon, procured horses, and rode thither post haste, entering the city a short time before the president got there. A few days later he visited his old home, Norfolk, and was given a public reception by the naval and military officers there and those of the citizens who had remained true to the Union. In the course of his speech he said: "This meeting recalls to me the most momentous events of my life, when I listened in this place till the small hours of the morning, and returned home with the feeling that Virginia was safe and firm in her place in the Union. Our Union members of the convention were elected by an overwhelming majority, and we believed that everything was right. Judge, then, of our astonishment in finding, a few days later, that the state had been voted out by a miserable minority, for want of firmness and resolution on the part of those whom we trusted to represent us there, and that Virginia had been dragooned out of the Union. . . . I was told by a brother officer that the state had seceded, and that I must either resign and turn traitor to the government which had supported me from childhood, or I must leave this place. Thank God, I was not long in making my decision! I have spent half of my life in revolutionary countries, and I know the horrors of civil war, and I told the people what I had seen and what they would experience. They laughed at me, and called me 'granny' and 'croaker'; and I said, 'I can not live here, and will seek some other place where I can live.' I suppose they said I left my country for my country's good, and, thank God, I did!"

On 6 July, 1865, the Union club of Boston gave a dinner to the admiral, at which Oliver Wendell Holmes read one of his happiest occasional poems, a few lines of which may be quoted here:

"Fast, fast are lessening in the light
The names of high renown—
Van Tromp's proud besom pales from sight,
Old Benbow's half hull down.

Scarce one tall frigate walks the sea,
Or skirts the safer shores.
Of all that bore to victory
Our stout old commodores.
Hull, Bainbridge, Porter—where are they?
The answering billows roll,
Still bright in memory's sunset ray,
God rest each gallant soul!
A brighter name must dim their light,
With more than noontide ray—
The Viking of the River Fight,
The Conqueror of the Bay.
I give the name that fits him best—
Ay, better than his own—
The Sea-King of the sovereign West,
Who made his mast a throne."

On 25 July, 1866, congress created the grade of admiral, before unknown in the U. S. navy, and the rank was given to Farragut. The next year he was assigned to the European squadron, hoisted his flag on the "Franklin," and made a long cruise in European waters. By special permission of the president, Mrs. Farragut and her cousin, Mrs. Pennock, wife of his fleet captain, Alexander M. Pennock, accompanied them. They visited the principal European capitals, and were everywhere received with the highest honors. One of the most interesting incidents of the cruise was a visit to the island of Minorca, the home of Farragut's ancestors, where the whole population turned out to welcome him. In the summer of 1869 the admiral and Mrs. Farragut visited Vallejo, Cal. His last official duty was to take charge of the naval obsequies of George Peabody, when the remains arrived at Portland, Me., in January, 1870. The next summer he spent in Portsmouth, N. H., the guest of Rear-Admiral Pennock. An old sailor, who had charge of the dismantled sloop-of-war "Dale," lying in the harbor, says that one day the admiral wandered on board, and on stepping ashore again remarked: "That is the last time I shall ever tread the deck of a man-of-war." The foreboding proved true, and not long afterward he quietly passed away. The remains were conveyed to New York, and, after a public funeral, were finally deposited in Woodlawn cemetery.

Admiral Farragut had a strongly religious nature, believing in the constant guidance of Divine Providence. At the time of his death he was a communicant of the Protestant Episcopal church. He is one of the few great heroes of the world whose character has never been clouded by the slightest suspicion of a want of honesty or personal purity. Many entertaining anecdotes are told of him. When we consider the novel and complicated problems that confronted him in naval warfare, and the providential manner in which he seemed to have been schooled for them through a long life—when we remember how other commanders merely fought line against line in simple though courageous fashion, while he contended with casemated forts, fire-rafts, fleets, and hidden torpedoes, all at once, and conquered them all, we can hardly refuse to pronounce him the greatest naval commander the world has ever seen.

There is a colossal bronze statue of the admiral in Farragut square, Washington, executed by Vinnie Ream, and paid for by a congressional appropriation. There is one of heroic size in Madison square, New York, executed by Augustus St. Gauden, paid for by a subscription raised among the citizens. In the chancel of the Church of the Incarnation, New York, is a mural tablet containing a bas-relief likeness by Launt Thompson. William Page's original picture of "Farragut's Entry into Mobile Bay" is now in the possession of the emperor of Russia; a replica is still owned by Mr. Page's family. (See illustration on page 417.) The authorized life of the admiral is that by his son, Loyall Farragut, which includes his journals and many of his letters (New York, 1879). See also James E. Montgomery's "Cruise of the Franklin" (New York, 1869), and "The Battle of Mobile Bay," by Com. Foxhall A. Parker (Boston, 1878).

FARRAR, John, educator, b. in Lincoln, Mass., 1 July, 1779; d. in Cambridge, Mass., 8 May, 1853. He was graduated at Harvard in 1803, studied theology at Andover, and in 1805 was appointed Greek tutor at Harvard. He was chosen Hollis professor of mathematics and natural philosophy in the same institution in 1807, and retained the chair till 1836, when he resigned in consequence of a painful illness that finally caused his death. He published for the use of his pupils a translation of Lacroix's "Elements of Algebra" (1818), which he followed by selections from Legendre, Biot, Bezant, and others. These works were at once adopted as textbooks by Harvard, the U. S. military academy, and other institutions. He was a contributor to scientific journals, to the "North American Review," and to the "Memoirs" of the American academy.—His wife, **Eliza Ware,** author, b. in Flanders, Europe, in 1791; d. in Springfield, Mass., 22 April, 1870, was the daughter of Benjamin Rotch, of New Bedford, Mass. She was educated in England, lived there until 1819, and in 1828 became the second wife of Prof. Farrar. She wrote "Children's Robinson Crusoe"; "The Story of Lafayette"; "The Life of Howard"; "Youth's Love-Letters"; "Young Lady's Friend" (1837); "Congo in Search of his Master" (New York, 1854); and "Recollections of Seventy Years" (Boston, 1865).

FARRAR, Samuel, lawyer, b. in Lincoln, Mass., in 1784; d. in Andover, Mass., 13 May, 1864. He was graduated at Harvard in 1797, and was tutor there in 1800. He then studied law, and soon afterward began practice in Andover. He was one of the chief founders of the Andover theological seminary, and for thirty-eight years was treasurer of that institution and of Phillips academy, devoting a large share of his salary to their support. He was the first president of the Andover bank, and held the office thirty years.

FARRAR, Thomas Charles, artist, b. in London, 16 Dec., 1838, learned drawing in a free school established in London by Ruskin. He came to New York in 1858, attained success as an instructor in his art, served in the Union army during the civil war, and in 1869 returned to London, where he has since resided. Among his works exhibited at the National academy in New York were "Field-Lily" and "Twilight on the Hudson" (1867); "Beach at Hastings" and "English Farm" (1871); "Caernarvon Castle, Wales" and "Interior of St. Mark's, Venice" (1872); "Sunset" (1875); "Yorkshire Trout Stream," "Coming through the Lock," and "Rochester Castle" (1878). He has also contributed paintings to the exhibitions of the Royal academy in London.—His brother, **Henry,** artist, b. in London, England, 23 March, 1843. In 1863 he came to New York, where he first gained distinction for his water-colors, and afterward took high rank as a landscape painter. He is a member of the New York etching club and of the American society of painters in water-colors. His principal works are "On the East River"; "A Hot Day"; "A Calm Afternoon"; "Sunset, Coast of Maine"; "The Silent Tongue"; "The Old Homestead at Twilight"; and a "November Day." He contributed to the Centennial exhibition at Philadelphia

"A Windy Day" and "The Old House on the Hill," and to the Paris exhibition of 1878 "A Quiet Pool."

FARRAR, Timothy, jurist, b. in Concord, Mass., 11 July, 1747; d. in Hollis, N. H., 21 Feb., 1849. He was graduated at Harvard in 1767, taught school and settled in New Ipswich, N. H., in 1770. He was a major in the Revolutionary army, and after the war became a justice of the court of common pleas of New Hampshire. He was appointed chief-justice in February, 1802, and altogether filled the office of judge for more than forty years.—His son, **Timothy,** jurist, b. in New Ipswich, N. H., 17 March, 1788; d. in 1874. He was a law partner of Daniel Webster from 1813 to 1816, and from 1824 to 1833 was judge of the New Hampshire court of common pleas. He was vice-president of the New England historic genealogical society from 1853 to 1858. He published "Report of the Dartmouth College Case" (Portsmouth, 1819); "Review of the Dred Scott Decision" (1857); "Manual of the Constitution of the United States" (Boston, 1867); and also wrote articles for the "North American Review" and the "New Englander."

FARRELL, John P., Canadian R. C. bishop, b. in Kingston, Ontario; d. in Hamilton, Ontario, 26 Sept., 1873. He studied theology in the seminary of Montreal, and after completing the course was ordained priest and stationed at L'Original, Ottawa. In 1856 the diocese of Hamilton was created, and Dr. Farrell was appointed its bishop.

FARRELL, Thomas, clergyman, b. in Ireland; d. in New York, 19 July, 1880. He came to the United States when a boy, studied for the priesthood at Mount St. Mary's college, Emmettsburg, Md., and was ordained by Archbishop Hughes. He was a staunch supporter of the Union during the war of secession, took great interest in the welfare of the colored people, and bequeathed $5,000 to form the nucleus of a fund to establish a church for their benefit in New York. In accordance with his wishes, the church of St. Benedict the Moor, on Bleecker street, was organized after his death.

FARRER, Edward, Canadian journalist, b. in Castlebar, County Mayo, Ireland, 8 Oct., 1850. He was educated by private tutors at Stonyhurst college, England, and at the Jesuit college in Rome. On completing his course of study, he declined the places of assistant teacher of Greek and Latin and teacher of English in the University of Milan. In 1870 he arrived in Canada and connected himself with the "Daily Telegraph" in Toronto, but upon the establishment of the Toronto "Mail" in 1872 he joined its editorial staff, and remained there till 1881, when he became foreign editor of the New York "World." After about a year's service on this paper he went to Winnipeg, Manitoba, and was for two years editor of the Winnipeg "Times." In the autumn of 1884 he became editor-in-chief of the Toronto "Mail," a place which he now (1887) holds. Mr. Farrer has made a special study of the Indian languages, and is preparing for the press a work on "The Algonkin Religion."

FARRINGTON, William George, clergyman, b. in New York city, 15 Dec., 1832. He was graduated at Columbia in 1853, and at the General theological seminary, New York, in 1856, was ordained deacon and priest the same year, and was rector at Huntington, L. I., till 1858, and then assistant in Trinity parish, New York city, till 1862. In 1863 he organized Christ church in Hackensack, N. J., of which he was rector till 1870. He subsequently had charge of churches at Newark and Orange, N. J., and at Bloomfield from 1877. He published a tract on "The Historical Church" in 1861, and has edited the "Church Almanac" since 1867.

FARROW, Samuel, lawyer, b. in Virginia about 1759; d. in Columbia, S. C., 18 Nov., 1824. His father settled near Musgrove's Mills, in Spartanburgh district, South Carolina, about 1765. The son was a member of a company of scouts in the Revolutionary war, was wounded in one of the numerous skirmishes in which he was engaged, and took part in the battle of Musgrove's Mills. When he was made a prisoner, together with his two brothers, his mother, a daughter of Col. Philemon Waters, obtained their release by delivering up six British prisoners, and boasted that she had made a good bargain, because she could beat the British four to one. After the war he studied law, was admitted to the bar in Charleston in 1793, and settled at Spartanburgh. In 1810 he was elected lieutenant-governor, and in 1812 as a Democrat to congress from the Pinckney district, serving from 24 May, 1813, till 4 March, 1815. He was re-elected, but resigned, preferring to serve in the state house of representatives, of which he was a member from 1816 till 1821, when he retired from public life. The organization of the South Carolina lunatic asylum and deaf and dumb asylum was chiefly due to his efforts.

FARWELL, Charles Benjamin, senator, b. in Painted Post, N. Y., 1 July, 1823. He was educated at Elmira academy, removed to Illinois in 1838, and was employed in government surveying and farming until 1844, when he engaged in the real estate business and banking in Chicago. He was elected county clerk in 1853, and re-elected to this office in 1857. Subsequently he engaged in mercantile pursuits, and became a member of the firm of John V. Farwell and Company. He was appointed a member of the state board of equalization in 1867, chairman of the board of supervisors in 1868, and National bank examiner in 1869. In 1871 he was elected to congress as a Republican, and served on the committee on banking and currency, and as chairman of that on manufactures. He remained in congress till 1876, when the house decided that J. V. Le Moyne was entitled to his seat. On the death of Gen. John A. Logan he was in 1887 elected U. S. senator from Illinois.—His brother, **John Villiers,** merchant, b. in Meads Creek, Steuben co., N. Y., 29 July, 1825, was graduated at Mount Morris seminary, Ill., in 1844. In 1860 he was a presidential elector on the Republican ticket, and he held the office of Indian commissioner during President Grant's first term, and travelled 10,000 miles in this service. In connection with his brother, he is now (1887) building the state house of Texas for 3,000,000 acres of land.

FARWELL, Nathan Allen, senator, b. in Unity, Me., 24 Feb., 1812. He received a public-school education, graduating in 1831, studied law, was admitted to the bar, and began to practise in Rockland, Me. He was a member of the state senate in 1853, 1854, 1861, and 1862, serving as president in 1861, and of the lower branch of the legislature in 1860, 1863, and 1864. He was a delegate to the Baltimore National Republican convention in 1864, and in that year was appointed to the U. S. senate as a Republican for the unexpired term of William Pitt Fessenden. He was a delegate to the Philadelphia "Loyalists' Convention" of 1866. He travelled in Europe from 1845 till 1847. He has been master mariner, trader, and twenty-five years president of marine insurance.

FARWELL, Samuel, contractor, b. about 1800; d. in Saginaw, Mich., 17 Nov., 1875. He was a resident of Utica, N. Y., and was known throughout the United States for fifty years as a contractor for the building of public works. He began

work on the Erie canal in 1825, completed contracts for the slack-water navigation in Lehigh river in 1835, the Croton aqueduct in 1838, and afterward constructed the Boston water-works. Subsequently he engaged in railroad building, and executed extensive contracts for the New York and Erie railway, the Great Western railway of Canada, the Utica and Black river railroad, and the Flint and Père Marquette railway, of which last he was vice-president and the principal share-holder. He also built the Brooklyn water-works.

FASNACHT, Charles H., soldier, b. in Lancaster county, Pa., 27 March, 1842. He enlisted in 1861 in the 99th Pennsylvania regiment, and mustered out of service in July, 1865, as 1st lieutenant. On 12 May, 1864, just after the taking of the salient at Spottsylvania, he captured the flag of the 2d Louisiana regiment, taking the color-bearer and color-guard prisoners, but was shortly afterward wounded, and fell into the enemy's hands. With over one hundred others he lay on the battle-field several days, waiting to be taken to Richmond, and was finally rescued by National troops. During this time he had the flag concealed in the lining of his blouse. For his gallantry he received the United States medal of honor, a silver medal from the directors of the sanitary fair at Philadelphia, and the bronze "Kearny badge."

FASQUELLE, Jean Louis, educator, b. in France in 1808; d. in Michigan in 1862. He came to the United States in 1834, and became a teacher of languages. From 1846 till his death he filled the professorship of modern languages and literature in the University of Michigan, and was also librarian for two years. In 1854 he published in New York "French Course, or a New Method for Learning to Read, Write, and Speak the French Language," which was extensively used in the United States, and of which 30,000 copies were sold in England. He also published, besides other text-books, "Télémaque, with Notes and Grammatical References," a "Colloquial French Reader," and a "General and Idiomatical Dictionary of the French and English Languages."

FASSETT, Cornelia Adèle (Strong), artist, b. in Owasco, Cayuga co., N. Y., 9 Nov., 1831. She studied water-color painting in New York city, and then spent two years in Paris and Rome, painting in oil under Matthieu and other artists. She returned to the United States about 1855, established herself as a portrait-painter in Chicago, Ill., and in 1875 became a resident of Washington, D. C. She has executed portraits of Vice-President Henry Wilson, Justices Miller and Field, Chief-Justice Waite, President Garfield, John A. Logan, Clara Barton, and others, and in 1877–'80 painted "The Electoral Commission in Open Session," containing portraits of about 200 persons. She became a member of the Chicago academy of design in 1873.

FAUCHER DE SAINT MAURICE, Narcisse Henri Edouard, Canadian author, b. in Quebec, 18 April, 1844. His father was seigneur of Beaumont, Vincennes, and Mont-à-peine. He was educated at the seminary of Quebec and at the college of Ste.-Anne de la Pocatière. He went to Mexico in 1864, and became a captain in the 4th Mexican sharp-shooters, and afterward was aide-de-camp to Gen. the Viscount Courtois Roussel d'Hurbal. He served through the war, being in eleven battles, thirty-two minor engagements, and at the sieges of Oaxaca and Satillo, at the latter of which he was made prisoner and sentenced to be shot, but was afterward exchanged. He returned to Canada in 1866, and was for the next fourteen years a clerk of the legislative council of the province of Quebec. In 1881 he was elected a representative for Bellechasse to the Quebec legislative assembly. He was a commissioner in 1881 from the province of Quebec at the International exposition of geography in Venice, and while in Europe was created a chevalier of the legion of honor for exceptional services rendered to France in the Canadian press. He also had been created a knight of the Imperial order of Guadaloupe by Maximilian, and received the medal of the Mexican campaign from Napoleon III. He became editor of "Le journal de Quebec" in 1883, retaining his connection with it for a year and a half, and is now (1887) editor of "Le Canadien." He has contributed largely to the newspaper press in France, Canada, and the United States. He is a member of various societies, and is the author of "De Quebec à Mexico"; "A la Brunante"; "Chases et autres"; "De Tribord à Babord"; "Promenades dans le Golf St. Laurent"; "Procedures parliamentaires"; "Cours de tactique"; "Relations de ce qui c'est passé aux fouilles faites lors de la demolition des casernes des Jesuites, à Quebec"; "A la Veillée"; "Deaux ans au Mexique"; and "L'abbé Laverdiére."

FAUCHET, Jean Antoine Joseph, Baron, diplomatist, b. in St. Quentin, France, in 1763. He was a law student at Paris when the Revolution began, and published a pamphlet in defence of its principles. He was appointed secretary of the executive council, and was ambassador to the United States in 1794–'6. He produced a work on the United States and their relations with France (translation by W. Duane, Philadelphia, 1797). The directory nominated him a commissioner to Santo Domingo, but he declined. Under Bonaparte he was prefect of the Var, and in 1805 of the Arno, and was made a baron. On Napoleon's return he was made prefect of the Gironde.

FAULKNER, Charles James, lawyer, b. in Martinsburg, Va., in 1806; d. in Boydville, W. Va., 1 Nov., 1884. He was graduated at Georgetown university, D. C., studied law, and was admitted to the bar in 1829. Three years later he became a member of the Virginia house of delegates, where he introduced a measure for the gradual abolition of slavery in Virginia, declaring that all children born of slave parents after 1 July, 1840, should be free, but the proposition was defeated. Mr. Faulkner after this devoted himself with success to his profession. He served as a commissioner on the disputed boundary-line between Virginia and Maryland. He was elected a state senator in 1841, but resigned in the following year. In 1848 he was elected to the house of delegates, and introduced a bill that was passed and sent to congress, which became the famous fugitive-slave law of 1850. He was a member of the convention for the revision of the State constitution in 1850. The next year he was elected to the U. S. house of representatives, and was re-elected by the Democratic vote for four successive terms, serving from 1 Dec., 1851, till 3 March, 1859. When James Buchanan became president in 1857,

Chas. J. Faulkner

he offered Mr. Faulkner the mission to France, which he at first declined, but accepted in 1859. Louis Napoleon was encouraged by him to sympathize with the south in the approaching contest, rather than with the nation, and accordingly President Lincoln recalled Mr. Faulkner, who, on his return to the United States, was arrested and confined in Fort Warren as a disloyal citizen. When released in exchange for Alfred Ely, a member of congress who was imprisoned in Richmond, he joined the Confederate army, and served on the staff of Gen. "Stonewall" Jackson until the death of that officer. For some years he was debarred the rights of citizenship on account of having borne arms against the government, but in 1872 his political disabilities were removed. He was a member of the State constitutional convention of West Virginia in 1872, and in 1874 was elected to the U. S. house of representatives for the term that expired on 3 March, 1877. He was an unsuccessful candidate subsequently for the U. S. senate and for the governorship of West Virginia, after which he retired to private life.—His son, **Charles James,** senator, b. in Martinsburg, W. Va., about 1840, was graduated at the University of Virginia, served as a private in the Confederate army during the civil war, and after its close studied law, and rose rapidly in the profession. In 1880 he was appointed a circuit judge, to fill an unexpired term, and in 1882 was elected to the same office. On 5 May, 1887, he was elected as a Democrat to the U. S. senate from West Virginia.

FAUNCE, Daniel Worcester, clergyman, b. in Plymouth, Mass., 3 Jan., 1829. He is a direct descendant of Thomas Faunce, who was for forty years ruling elder of the 1st church at Plymouth, Mass. He was graduated at Amherst in 1850, and received his theological education at Newton theological institution. He was ordained as pastor of the Baptist church in Somerville, Mass., in 1853, and has been pastor in Worcester, Malden, and Lynn, Mass., and also in Concord, N. H., and Washington, D. C. He has travelled in Europe, Egypt, and Palestine. The degree of D. D. was conferred upon him by Amherst in 1880. Dr. Faunce is the author of "The Christian in the World," an essay that received the Fletcher prize offered by Dartmouth college; "A Young Man's Difficulties with his Bible"; "The Christian Experience"; and "The Resurrection in Nature and in Revelation."

FAUNTLEROY, Thomas Turner, soldier, b. in Richmond county, Va., 6 Oct., 1796; d. in Leesburg, Va., 12 Sept., 1883. He was commissioned a lieutenant in the war of 1812–'15 when but seventeen years old. He studied law in Winchester, practised in Warrenton, and in 1823 was elected to the legislature. In 1836 he was commissioned a major of dragoons in the regular army, and served in the Seminole war. In September, 1845, he was detached from Gen. Taylor's army to hold in check the Indians on the frontier of Texas. From this duty he was ordered to join Gen. Taylor, and subsequently, in Mexico, he commanded the cavalry of Gen. Scott's army. In 1849 he was promoted to the lieutenant-colonelcy of the 1st dragoons, and commanded the troops on frontier duty in Texas. In 1850 he was promoted colonel. In the winter of 1854–'5 he conducted a campaign against the hostile Indian tribes of the Rocky mountains, and in 1858 he made another mid-winter campaign against the Indians in New Mexico. In May, 1861, he entered the Confederate service. He was commissioned a brigadier-general by the convention of Virginia, and placed in command of Richmond and its defences. But, after the organization of the Confederate government, it refused to confirm his commission, although he ranked all the officers but one that had resigned from the U. S. army to serve the Confederacy.—His son, **Archibald Magill,** physician, b. in Warrenton, Va., 8 July, 1837; d. in Staunton, Va., 19 June, 1886, was graduated in medicine at the University of Pennsylvania in 1856, and in 1857 entered the U. S. army as assistant surgeon; but he and his brother, a lieutenant in the navy, resigned at the same time with their father. He became a surgeon in the Confederate army, and was president of the board for the admission of surgeons, and chief officer on the medical staff of Gen. Joseph E. Johnston, and served with him until the battle of Seven Pines. He was then ordered to build and organize the hospitals at Danville, Va., and afterward had charge of the military hospital at Staunton, Va., until the war ended. He remained and practised at Staunton after the war, and was for several years superintendent of the lunatic asylum at that place. His contributions to medical literature include papers on bromide of potassium, chloral hydrate, the use of chloroform in obstetrical practice, and a "Report upon Advance in Therapeutics," which was printed in the "Transactions" of the Virginia medical society.—Another son, **Thomas T.,** became judge of the Virginia supreme court of appeals.—Their sister, **Mary Thurston,** married Surgeon-General Barnes, of the U. S. army.

FAUQUIER, Francis, colonial governor of Virginia, b. about 1720; d. in Virginia, 3 March, 1768. He was a man of a cultivated mind and liberal religious views, who counted Thomas Jefferson among his friends, and was greatly respected in the colony for his private worth. He succeeded Dinwiddie in 1758, and was lieutenant-governor until his death. He dissolved the assembly in 1764 after it had adopted Patrick Henry's resolutions declaring that the sole right of taxation resided in the colonial legislature; and when Massachusetts invited the other colonies to join in a general congress, in 1765, he refused to summon the newly elected house of burgesses in order that it might appoint delegates. Except in combating disloyalty, he sympathized with the colonists, and was one of the ablest and most popular of the royal governors. He published several financial essays, among them one on "Raising Money for Support of the War" (London, 1757).

FAVILLE, Oran, educator, b. in Manheim, Herkimer co., N. Y., 13 Oct., 1817; d. in Waverly, Iowa, 3 Oct., 1872. He was graduated at Wesleyan university, Middletown, Conn., in 1844, and after teaching in Cazenovia, N. Y., and West Poultney, Vt., became, in 1852, professor of ancient languages in McKendree college, Lebanon, Ill. He was president of Ohio Wesleyan female college, Delaware, Ohio, in 1853–'5, but retired to a farm in Mitchell county, Iowa, on account of his health, and was subsequently county judge, lieutenant-governor of Iowa, and president, and afterward secretary, of the State board of education. In 1863 he was one of the board of visitors to the U. S. military academy. He edited the "Iowa School Journal" in 1863–'7, was state superintendent of public instruction in 1864–'6, and also president of the State teachers' association. He resigned these offices on account of failing health, and lived in retirement from 1867 until his death.

FAWCETT, Edgar, author, b. in New York city, 26 May, 1847. He was graduated at Columbia in 1867, and has since devoted himself to literature. His books include "Short Poems for

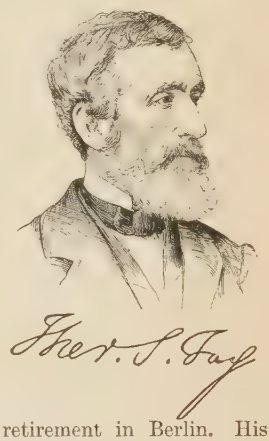
Short People" (New York, 1871); "Purple and Fine Linen," a novel (1873); "Ellen Story" (1876); "Poems of Fantasy and Passion" (Boston, 1878); "A Hopeless Case" (1881); "A Gentleman of Leisure" (1882); "An Ambitious Woman" (1883); "Song and Story," poems, "Tinkling Cymbals," a tale, and "The Adventures of a Widow" (1884); "Rutherford" (1884); "The Buntling Ball," an anonymous satire in verse, and "The New King Arthur," an opera-libretto (New York, 1884–'5); "Social Silhouettes" (Boston, 1885); "Romance and Revery" (1886); and "The House at High Bridge" (1887). He has also written successful plays, including "A False Friend" (1880).

FAXON, Henry W., journalist, b. in Buffalo, N. Y., about 1830; d. in Washington, D. C., 11 Sept., 1864. He entered the navy as an apprentice, but left it after two or three years, and after serving as a telegraph clerk in Troy, N. Y., and then as clerk in a candle-factory, became an editor of the Buffalo "Republic" in 1855. He was afterward on the staff of the Buffalo "Times," and in 1861 became an army correspondent for New York papers. Among his most noted efforts were the "Silver Lake Snake Story" and the "A. P. L. Parin Papers." The snake story, which was the original of the sea-serpent tales that have since become familiar, was published in the Buffalo "Republic," and professed to be a description of a monster seen in Silver Lake, Wyoming co., N. Y.

FAY, Francis Ball, merchant, b. in Southborough, Mass., 12 June, 1793; d. in South Lancaster, Mass., 6 Oct., 1876. His parents were poor, and he had little education. At the age of eighteen he "bought his time" of his father for $80 a year. He attended the public scales in Dock-square, Boston, in 1811–'12, then served as market-man and butcher, and in 1817 became a merchant in Southborough. He was postmaster and town treasurer there in 1817–'21, deputy sheriff of Worcester county in 1824–'30, a member of the legislature in 1830–'1, 1834–'6, and 1840, and of the state senate in 1843–'5 and 1868. He removed to Chelsea in 1831, built one of the first houses there, bought the first ferry-boats running to Boston from that place, and was first president of the Chelsea savings bank. He was elected to congress as a Whig, to fill a vacancy, serving in 1852–'3, and in 1857 was first mayor of Chelsea, but declined a re-election. In 1816–'24 he was an active member of the state militia, reaching the rank of colonel. He endowed the Fay free library at Southborough in 1851, was one of the founders of the State industrial school for girls, and was connected with it as commissioner, trustee, and treasurer in 1854–'64. In 1858 he removed to South Lancaster, that he might be near the institution.

FAY, Jonas, patriot, b. in Hardwick, Mass., 17 Jan., 1737; d. in Bennington, Vt., 6 March, 1818. He received a good education, and became a physician. He was clerk of a Massachusetts company at Fort Edward in 1756, removed to Bennington in 1766, and became prominent among the settlers on the New Hampshire grants, going as their agent to New York in 1772, to lay their grievances before Gov. Tryon. He was clerk of the convention of March, 1774, that resolved to defend by force Ethan Allen, and the others who were outlawed by the legislature of New York. Dr. Fay was surgeon under Allen at Ticonderoga, and afterward in Col. Warner's regiment. He was a member of the convention of January, 1777, which declared Vermont an independent state, and drew up the declaration and petition to congress announcing the act and the reasons for it. He was secretary of the Constitutional convention of July, 1777, one of the council of safety, a member of the state council in 1778–'85, judge of the supreme court in 1782, and of probate in 1782–'7, and agent of the state to congress in January, 1777, October, 1779, June, 1781, and February, 1782. He published, in connection with Ethan Allen, a pamphlet on the New Hampshire and New York controversy (Hartford, Conn., 1780).—His son, **Heman Allen,** b. in Bennington, Vt., in 1778; d. there, 20 Aug., 1865, was a cadet in the U. S. military academy from March, 1807, till June, 1808, when he was graduated and assigned to the artillery. During the war of 1812 he did garrison duty at various forts, and was mustered out on 15 June, 1815. He was chief forage-master of the northern division of the army in 1816–'17, and U. S. military store-keeper at Albany, N. Y., from 1818 till 1842. He published an "Official Account of Battles Fought between the Army and Navy of the United States and Great Britain in 1812–'15" (1815).

FAY, Theodore Sedgwick, author, b. in New York city, 10 Feb., 1807. He received a liberal education, and studied law, but never practised. In 1828 he became associate editor of the New York "Mirror," under the joint control of himself, George P. Morris, and Nathaniel P. Willis. Soon thereafter Fay travelled in Europe, and wrote an extended series of letters of travel, which were published in his paper. He continued as co-editor of the "Mirror" for several years, and eventually became secretary of the American legation in Berlin, Germany, remaining at that post from 1837 until 1853. From 1853 until 1861 he was minister-resident in Bern, Switzerland, since which time he has lived in retirement in Berlin. His publications comprise "Dreams and Reveries of a Quiet Man" (New York, 1832); "The Minute-Book" (1833); "Norman Leslie" (1835); "Sydney Clifton" (1839); "Countess Ida" (1840); "Hoboken, a Romance" (1843); "Robert Rueful" (Philadelphia, 1844); "Ulric, or the Voices," poems (New York, 1851); "Views of Christianity" (1856); "History of Switzerland" (1860); "Great Outlines of Geography" (1867); and "First Steps in Geography" (1873). He has also published a series of papers on Shakespeare. His "Norman Leslie," a story of old New York city, has been popular, and was successfully produced as a play.



FEARING, Albert, philanthropist, b. in Hingham, Mass., 12 March, 1798; d. there, 24 May, 1875. After attending the public school of his native town he became a clerk in Worcester, Mass., and was afterward a ship-chandler in Boston. He retired from this business in 1868, and engaged in manufacturing, accumulating a large fortune, from which he gave liberally. His donations amounted to about $200,000, including $30,000 to the Hingham public library, and an equal sum to the college of Liberia. He was president of the American colonization society and of several charitable organizations, and was

also noted for his many private acts of charity. He was elected to the state senate in 1841, and for many years took an active part in politics, first as a conservative Whig and afterward as a Democrat. He was an earnest supporter of Harrison in 1840, and received a service of plate from his friends for his efforts in the canvass, and was a presidential elector on the Taylor ticket in 1848.

FEARING, Benjamin Dana, soldier, b. in Harmar, Ohio, 10 Oct., 1837; d. there, 9 Dec., 1881. He was graduated at Marietta in 1856, and entered a Philadelphia publishing house. In April, 1861, he enlisted in the 2d Ohio regiment, took part with it in the battle of Bull Run, became adjutant of the 36th Ohio in August, and on 17 Dec. was made major of the 77th Ohio, which he commanded at Shiloh. On 26 Aug., 1862, he was made lieutenant-colonel of the 92d Ohio, which he had assisted in raising, and was promoted to colonel on 22 March, 1863. He defended Hoover's Gap at the head of three regiments, and distinguished himself at Chickamauga, where he was severely wounded. He rejoined his regiment in March, 1864, led it at Resaca, Kenesaw, Atlanta, and Jonesboro, and on 2 Dec. was brevetted brigadier-general of volunteers. He commanded a brigade in Sherman's march to the sea, and was again severely wounded at Bentonville, where he led a charge, of which Anson C. McClurg, in his "Lost Chance of the Confederacy," says, "Upon this movement of Gen. Fearing's brigade, in all probability, turned the fortunes of the day." After the war he engaged in manufacturing in Cincinnati, but illness caused by his wounds forced him to retire in 1869, and finally ended his life. Gen. William T. Sherman spoke of him as "the bravest man that fought on Shiloh's field."

FEARON, Henry Bradshaw, English traveller, b. in London about 1770. He was a London surgeon, and was sent by thirty-nine English families to the United States in 1817 to ascertain what part of this country, if any, would be suitable for their residence. He gave an account of his experiences in "Narrative of a Journey of 5,000 Miles through the Eastern and Western States of America" (London, 1818). Sydney Smith, in a review of this book, said that its author was "no lover of America, and a little given to exaggerate in his views of vices and prejudices." Fearon also published a work on "Cancers" (London, 1784).

FEATHERSTON, Winfield Scott, soldier, b. in Rutherford county, Tenn., 8 Aug., 1821. He was educated at various academies, and in 1836, while at school in Georgia, served for three months as a volunteer against the Creek Indians. He then studied law, and was admitted to the bar in 1840. He was afterward elected to congress as a Democrat, and served in 1847–'51, but was defeated for a third term by the Union candidate. He was a presidential elector on the Democratic ticket in 1852, and was sent by his state to Kentucky in December, 1860, to confer with the authorities on the subject of secession. In May, 1861, he became colonel of the 17th Mississippi regiment. He served in Virginia in 1861–'2, and on 4 March of the latter year was promoted to brigadier-general for gallantry at Ball's Bluff. He was wounded on the fifth day of the battles around Richmond, and in January, 1863, was transferred to Vicksburg at his own request. He commanded an expedition sent to meet Porter's gun-boats, ascending Deer Creek, joined Johnston in Georgia in May, 1864, and continued with that army till the surrender in 1865, commanding a division much of the time. After the war he returned to the practice of law, and was a member of the Mississippi legislature in 1876–'8 and 1880–'2. In 1881 he became judge of the 2d judicial circuit of the state.

FEATHERSTONHAUGH, George William, traveller, b. in 1780; d. in Havre, France, 28 Sept., 1866. In his early life he spent many years in North America, and in 1834–'5 made for the U. S. war department a geological inspection of part of the western country. In his reports, which were printed by order of congress, he is called "United States geologist." The government authorized these examinations to be made only in the territories of the United States; but Featherstonhaugh took notes upon all the country passed over in his journeys, for use when congress should authorize a geological map of the United States. Such a map is now projected (1887), fifty years after Featherstonhaugh's surveys. On account of his thorough knowledge of the country, he was appointed by the British government a commissioner to settle the northern boundary of the United States, under the Ashburton treaty, and for the successful execution of this task was made British consul for the departments of Calvados and Seine, France. His writings on statistical and political subjects were clear and vigorous, and his geological memoirs merited the approval of his friends Buckland and Murchison. His publications include a translation of Cicero's "Republic" (New York, 1828); "Geological Report of the Elevated Country between the Missouri and Red Rivers" (Washington, 1835); "Geological Reconnoissance in 1835 from Green Bay to Côteau de Prairie" (1836); "Observations on the Ashburton Treaty" (London, 1842); "Excursion through the Slave States" (New York, 1844); and "Canoe Voyage up the Minnay Sotor" (2 vols., London, 1847).

FEBIGER, Christian, soldier, b. on the island of Fünen, Denmark, in 1746; d. in Philadelphia, Pa., 20 Sept., 1796. His father died when the son was about sixteen years old, and the boy, after receiving a military education, went to Santa Cruz on the staff of his uncle, who had been appointed governor of that island. He travelled through the American colonies on a tour of observation in 1772, and in the following year engaged in commerce in the eastern states. He joined a Massachusetts regiment on 28 April, 1775, became its adjutant shortly afterward, and distinguished himself at Bunker Hill. He was in Arnold's Quebec expedition, was taken prisoner at the storming of that city on 31 Dec., 1775, and was sent to New York with other prisoners in September, 1776. On 13 Nov. he was appointed a lieutenant-colonel in the Virginia line. He joined his regiment, the 11th Virginia, on being exchanged, 1 Jan., 1777, and fought in the Philadelphia campaign, being made colonel of the 2d Virginia on 26 Sept., after the battle of the Brandywine. He was on the right of Greene's wing at Germantown, led 4,000 men, with two guns, at Monmouth, and commanded the right column in the attack on Stony Point, where he distinguished himself, taking the British commander prisoner in person. He was sent to Philadelphia on 1 Sept., 1780, to forward stores to the army, and was afterward on recruiting duty in Virginia, though he was in the field at intervals, and was present at the surrender of Cornwallis. He retired from active service on 1 Jan., 1783, was brevetted brigadier-general on 30 Sept., and then settled in Philadelphia, where he engaged in business. During his military service Febiger bore the sobriquet of "Old Denmark." He was treasurer of Pennsylvania from 13 Nov., 1789, until his death. —His grandson, **John Carson,** naval officer, b. in

Pittsburg, Pa., 14 Feb., 1821, entered the navy from Ohio as a midshipman, 14 Sept., 1838, and was in the "Concord," of the Brazil squadron, when she was wrecked on the eastern coast of Africa in 1843. He became passed midshipman, 20 May, 1844, and lieutenant, 30 April, 1853. He was on the "Germantown," of the East India squadron, in 1858–'60, and on the sloop "Savannah" in 1861, and on 11 Aug., 1862, was commissioned commander, and assigned to the steamer "Kanawha," of the Western gulf blockading squadron. After commanding various vessels in that and the Mississippi squadron, he was given the "Mattabeset," of the North Atlantic squadron, in 1864, and in that steamer took part, on 5 May, 1864, in the fight between the little fleet of wooden vessels, under Capt. Melancton Smith, and the Confederate ram "Albemarle," in Albemarle sound, N. C. In this engagement the ram was defeated, and her tender, the "Bombshell," captured, and Febiger was commended for his "gallantry and skill" by Capt. Smith and Rear-Admiral Samuel P. Lee. He commanded the "Ashuelot," of the Asiatic squadron, in 1866–'8, and on 6 May of the latter year was promoted to captain. He was inspector of naval reserve lands in 1869–'72, was made commodore, 9 Aug., 1874, was a member of the board of examiners in 1874–'6, and commandant of the Washington navy-yard in 1876–'80. He was promoted to rear-admiral, 4 Feb., 1882, and on 1 July, 1882, was retired on his own application, having been in the service over forty years.

FECHTER, Charles Albert, actor, b. in London, England, 23 Oct., 1824; d. near Quakertown, Pa., 5 Aug., 1879. His father was of German parentage, but born in France. His mother was an Englishwoman. Charles was taken to France at an early age and there educated. He gave himself for a time to the study and practice of the sculptor's art, but had a natural inclination for the stage, and made his *début* at the Salle Molière in 1840 in a piece called "Le Mari de la Veuve." After a tour of the principal cities and visiting Italy, he went in 1844 to Berlin, where he had great success as Duval in "La dame aux Camelias." After performing in London in French, he appeared in an English version of "Ruy Blas" at the Princess theatre, 27 Oct., 1860. In the following year, 20 March, at the same house, he astonished and perplexed London playgoers by his marvellous impersonation of Hamlet in English. It was not the Hamlet to which they had been accustomed, but was nevertheless a grand conception well carried out. In the following October he appeared as Othello, producing a similar effect. He became lessee of the Lyceum in January, 1863, and brought out in succession "The Duke's Motto," "Bell Demonio," and "The Long Strike." Claude Melnotte, in the "Lady of Lyons," became one of his favorite characters. He came to the United States at the close of 1869, and appeared at Niblo's in the character of Hamlet. A few nights before he had seen Edwin Booth in the same character, and had been singularly demonstrative in his approval. His own impersonation of the character was very different, but it was well received. The large audience was enthusiastic, and the critics sought for merits rather than faults. After a tour through the states he returned to Europe. He again visited the United States in 1872, having determined to make this country his home. Wherever he appeared he commanded large audiences and almost fabulous prices; but his American career was not a success in the full sense of the word. As a manager in Boston he failed. As a place of retreat, when not on starring engagements, he purchased a farm in the village of Richmond, Bucks co., three miles from Quakertown, Pa., and in the company of Lizzie Price, whom he had married, he there spent most of his time. He became very corpulent, which unfitted him for some of his favorite characters. He contracted an incurable malady, and, after considerable suffering, died on his farm. As an actor he despised all stage conventionalities, but was sympathetic and realistic. If he had had more restraining, more self-governing power, he would have been greater as an actor and as a man.

FEDERMANN, Nicholas, traveller, b. in Ulm, Swabia, in 1501; d. in Vienna, Austria, in 1550. He early started on a military career, and was engaged in the service of the Welsers, wealthy merchants of Augsburg, to whom Charles V. had granted the province of Venezuela in payment of the sums they had lent him. They were to conquer the country at their own expense, enlist Spanish troops, fit out four vessels, build two cities and three forts within two years after they took possession, and send out 150 German miners. Federmann was appointed captain of one of the companies of the Spanish soldiers, and, accompanied by the miners, embarked at San Lucar de Barrameda, 2 Oct., 1529. His ship was driven on one of the Canary Islands, and afterward attacked by pirates, who made him prisoner; but after paying a heavy ransom was released again, set sail, and reached Santo Domingo in 1530. He then went to Coro, where he was left in order to acclimate the troops, and received the title of captain-general lieutenant. Having many soldiers for whom he could find no employment, he determined to make a journey into the interior or along the southern coast. "My preparations being complete," he says, "on the 12th of September I set out with a hundred men on foot and sixteen on horseback, accompanied by a hundred Indians, who carried our provisions and all that was necessary for our subsistence or defence." It is difficult to determine the point that Federmann and his companions reached, or to identify the tribes through which they passed. It is conjectured that they travelled southwesterly as far as the lesser chains of the Andes, a distance of 500 miles. In some cases the Indians defended themselves fiercely. Federmann lost several of his men, and was seriously wounded. These checks were cruelly avenged on the unfortunate Indians. The Spaniards then turned toward the coast, following it to Coro, which they reached on 17 March, 1531. Here Federmann was detained by a fever until 9 Dec., when he sailed for Santo Domingo and thence to Spain. He reached Seville on 16 Jan., 1532. After an audience with the emperor he returned to Augsburg, where he wrote a narrative of his travels. Alexander Dalfinger, captain-general of Venezuela, under whom he had served, having died, Feder-

mann at once sought the emperor and asked for the vacant post. This appointment he received, but soon after it was revoked at the request of the Welsers, and the office given to Georges de Spire. He determined, however, to return to Venezuela, and, accepting the office of lieutenant under the governor, he reached Coro 22 Dec., 1534, with Spire and 160 soldiers. They were first to attempt discoveries toward the south, and the troops, who were divided into two bodies under the respective commands of the two German officers, were to meet in the neighborhood of Barquisimeto. While Georges de Spire went eastward, Federmann journeyed to the west, with his mind well made up never to rejoin his associate, but to go on a voyage of discovery on his responsibility. Keeping always to the west, and in a continual struggle with the Indians, he overcame prodigious obstacles on his route, which are well depicted in the pages of the Spanish historians, Piedrahita and Castellanos. Finally he arrived in New Granada, and had the good fortune to reach the plateau of Bogotá at the very time that Quesada and Sebastian de Benalcazar appeared there at the head of their troops. One had got there by following the course of the Magdalena river, the other had come through Ecuador. The meeting was by no means a gratifying one to the three chiefs, and heated discussions followed as to which of the three conquerors this rich province should belong. It was finally decided to take the question to Spain to be decided by Charles V. Federmann left with regret a region rich in precious metals, and almost as advanced in civilization as Mexico or Peru, to present himself at the court of Charles V., 1538. He now received the reward of his insubordination; the Welsers, indignant at his treatment of Georges de Spire, threatened him with a ruinous lawsuit, which, however, they were induced to discontinue. The bold captain could not face his misfortunes, which he considered the result of sheer injustice, and the courageous spirit, which had dared without flinching all the dangers of the New World, was quelled by grief and mortification. His work, which he left with his brother-in-law, John Kielpaher, a burgess of Ulm, when he set out on his last trip, was published in German. The title, translated, is "Fine and agreeable narrative of the first voyage of Nicholas Federmann, the younger, of Ulm, to the Indias of the Ocean sea, of all that happened to him in this country up to his return to Spain, written with brevity, and diverting to read" (Haguenau, 1557). This book gives curious details concerning the Indians, their manners, and the means adopted to subdue them. The author expresses himself with a simplicity that wins confidence. A French translation was inserted in the collection, entitled "Voyages, relations et mémoires originaux pour servir à l'histoire de la découverte de l'Amérique, publiés pour la première fois en français" (Paris, 1837). The account of Federmann's second voyage is lost, but a summary of it, with his portrait, may be found in the works of Castellanos and Predrahita.

FEEHAN, Patrick A., R. C. archbishop, b. in Tipperary, Ireland, in 1829. He was educated at Maynooth college, Kildare, and emigrated to the United States in 1852. He selected St. Louis as the scene of his missionary labors, and was appointed president of the Seminary of Carondelet. He acquired great reputation as pastor of the Church of the Immaculate Conception in St. Louis, and in 1865 was consecrated bishop of Nashville, Tenn. The Roman Catholic church made much progress in this state during his administration, and in 1879 the number of churches and priests had nearly trebled. He had founded a college controlled by the Christian Brothers, a convent and refuge of Sisters of the Good Shepherd, and two orphan asylums. He also introduced into his diocese the Sisters of Mercy, the Dominican Sisters, the Sisters of Charity, and the Sisters of St. Joseph, all of whom he placed in charge of academies and parochial schools. In 1880, Chicago was erected into an archiepiscopal see, with two suffragan bishops, and Dr. Feehan was consecrated its first archbishop. During his administration he has created nine new parishes in Chicago alone, and has, in a sense, founded St. Mary's training-school. He was at the plenary council of Baltimore in 1884.

FEGAN, James, soldier, b. in Athlone, Ireland, in 1827; d. in Fort Shaw, Montana, 25 June, 1886. He served in the constabulary in his native country, but came to the United States in early life, and enlisted as a private in the 2d U. S. infantry, 29 Oct., 1851. He re-enlisted eight times, entering the service again as soon as his term expired, and was finally retired on 8 May, 1885. He was sent to the soldiers' home in Washington in 1870, but obtained a discharge and returned to active service. Fegan was a well-known character in his regiment, and many stories are told of his shrewdness and humor. He served with credit in the civil war, and was wounded at Antietam. In March, 1868, at Plum Creek, Kansas, he stood guard single-handed over a deserter he had captured and a powder-train, defended both against a crowd of men who wished to recapture the deserter, and brought his charge safe to camp. For his gallantry he was given the U. S. medal of honor. On 6 Dec., 1882, Fegan was made the subject of a special presidential message to congress.

FEIJÓ, Diego Antonio (fay-ho'), Brazilian statesman, b. in S. Paulo, 10 Aug., 1784; d. there, 10 Nov., 1843. He received his early education in a clerical college in his native city. In 1807 he was ordained priest, and soon afterward began to teach in Parahyba. In 1820 the constitutional revolution triumphed in Portugal, and Feijo was sent as a representative from the province of S. Paulo to the Portuguese assembly, to which he was admitted, 11 Feb., 1822. On 25 April he made an eloquent speech in defence of Brazilian rights, which were threatened by the Portuguese majority. The Brazilian deputies were unsuccessful, and Feijo, with five others, left Lisboa secretly for Falmouth, where, on 22 Oct. of the same year, they published a manifesto explaining their conduct. Feijo afterward returned to Brazil, and retired to Itu. In 1824 Dom Pedro I. submitted to the municipalities of the empire his project of a constitution, which was almost unanimously accepted, except at Itu, where Feijo proposed to amend it. The province of S. Paulo elected him successively to the legislatures of 1826–'9 and 1830–'3. In 1827 he proposed the abolition of clerical celibacy, and in 1828 submitted a project for the reform of municipalities. In 1831 Feijo was appointed by the regency minister of justice, and in this capacity dissolved undisciplined military bodies, checked on 7 Oct. of that year the revolution in the island of Das Cobras, organized on 10 Oct. a body of military police, and in 1832 suppressed another revolt. In 1833 he was appointed life senator, and in 1834 the electors of the empire made him regent of Brazil. On the previous day he had been appointed bishop of Marianna, but had declined the dignity for political reasons. As regent, he soon proclaimed a liberal and advanced programme, but his policy met

with such opposition from the conservatives that he resigned his office, 18 Sept., 1837. He then retired to S. Paulo, and did not appear in the senate again until 1838. In 1842 he edited a political paper called "O Justiciero." In the same year a revolution broke out near Campinas, where Feijo was staying, and, although enfeebled by age and sickness, he took upon himself the responsibility of the movement, and, being defeated, was arrested, taken to Santos, and thence to Rio Janeiro, to be tried by the senate. He succeeded in explaining his conduct before that body, and this proved to be the last act of his political life, for he died soon afterward. Honors were paid to his memory by the government.

FEININGER, Karl William Frederick, musician, b. in Durlach, Baden, Germany, 31 July, 1844. He came to this country in 1853, was educated at St. Mary's college, Columbia, S. C., and afterward studied music in the conservatory at Leipsic, Germany. He led an orchestra in 1863, and in 1864–'5 served in the National army. He afterward taught music for seventeen years, and in 1874 travelled through Brazil, where he met with success as a violinist. Mr. Feininger has developed a new mode of teaching the piano, "based upon absolute knowledge of human character," and is the author of numerous orchestral compositions, including overtures, symphonies, and choruses with orchestral accompaniment, besides many English and German songs. He has also composed an unfinished opera, "Die Brüder." He produced his orchestral compositions with success in Berlin in 1886, those performed at his first concert, 7 Oct., including his "Academische" overture (1866); his "Narciss" overture (1868); a symphony (op. 12), which was highly praised by Franz Liszt (1870); and "Emotive Pictures" (1885).

FEKE, Robert, artist, b. in Oyster Bay, L. I., about 1725; d. in Barbadoes, West Indies, aged about forty-four. He left home when young, was taken prisoner and carried to Spain, where he passed his time in making rude paintings. With the proceeds of these he returned home, settled at Newport, and became a portrait-painter. He was one of the earliest American artists, his first pictures bearing the date 1746. Many of his portraits are in the Bowdoin college collection, and in that of the Rhode Island historical society, Providence. One of the best is that of Lady Wanton, in the Redwood library, Newport.

FELCH, Alpheus, jurist, b. in Limerick, York co., Me., 28 Sept., 1806. His grandfather, Abijah Felch, a soldier of the Revolution, had removed to that region while it was still a wilderness, and Alpheus, who was left an orphan at three years of age, was brought up in his house. Young Felch entered Phillips Exeter academy in 1821, was graduated at Bowdoin in 1827, and in 1830 was admitted to the bar at Bangor, Me. He removed to Monroe, Mich., in 1833, and in 1843 to Ann Arbor, where he has since resided. He was in the legislature in 1835–'7 and in 1838–'9, as one of the state bank commissioners, did much to expose frauds, made possible by a general "wild-cat" banking-law, which he had opposed, and which was afterward declared unconstitutional by the state supreme court. He was auditor-general of the state for a few weeks in 1842, and judge of the state supreme court till 1846, when he resigned to enter upon the office of governor of the state, to which he had been elected, as a Democrat, in the previous year. He resigned this also in 1847, having been chosen to the U. S. senate, where he remained until 1853, serving for four years as chairman of the committee on public lands. At the close of his term President Pierce appointed him on the commission to settle Spanish and Mexican land-claims, under the treaty of Guadalupe Hidalgo, and he became its president. The work of the commission, involving many important decisions, was finished in 1856, and its reports, consisting of forty large volumes, were deposited in the Department of the Interior at Washington. He retired from practice in 1873, and in 1879–'83 was professor of law in Michigan university. Bowdoin gave him the degree of LL. D. in 1877.

FELDER, John Myers, lawyer, b. in Orangeburg district, S. C., 7 July, 1782; d. in Union Point, Ga., 1 Sept., 1851. His grandfather, a native of Switzerland, came to South Carolina about 1720, and was killed during the Revolution while defending his house against an attack by Tories. John was graduated at Yale in 1804, studied at the Litchfield, Conn., law-school, and was admitted to the bar at Columbia, S. C., in 1808. He was a major of volunteers in the war of 1812, and was several times in the legislature between 1812 and 1830. He was then elected to congress as a Democrat, and served from 1831 till 1835, declining a third candidacy. From 1840 till his death he was a state senator. After reaching the head of his profession, Major Felder retired about 1830, became a successful mill-owner and planter, and in time accumulated a fortune.

FELIPE, or **FELIPILLO** (fa-le'-pe, or fa-le-peel'-yo), Peruvian Indian, b. in Poeches, Peru, in 1508, or, according to the historian Gomara, in 1510; d. on an expedition to Chili in 1535. When Francisco Pizarro arrived at Tumbez in 1527, he asked the Indian chiefs, who received him well, for some boys to learn Spanish, so that they might serve him on his return as interpreters. He carried two boys to Spain, where they were baptized, and one of them, receiving the name of Felipe, returned with Pizarro in 1531, and was of great use in the conquest of Peru, saving the life of the conqueror and his followers at the beginning of the campaign by revealing to him a conspiracy of the natives of the island of Puna to cut the Spanish vessels adrift and kill the invaders. After the fall of Cajamarca, 15 Nov., 1532, Pizarro sent Felipillo with Hernando de Soto to treat with the Inca Atahualpa. While on this mission he fell in love with one of the Inca's wives, and, thinking that the latter's death would give him possession of the woman he loved, he began to give the Spanish chiefs an incorrect translation of Atahualpa's words in the different interviews with Soto, in which he assisted as interpreter. He thus excited a suspicion that the Inca was collecting troops and making other secret preparations for the destruction of the invaders, and this was one of the causes of Atahualpa's execution, which was decided upon partly through covetousness, partly, as Gomara says, in the belief that his death would save the lives of the Spaniards. Felipillo had even arranged with some Yanacona chiefs, enemies of Atahualpa, to confirm his calumnies about the Inca's hostile preparation. The historians Garcilaso de la Vega, Herrera, and Gomara, speaking about Felipillo, are all of opinion that he was the only native that assisted in the destruction of his emperor. In 1533 Felipillo was assigned to the service of Almagro, and accompanied him in 1534 on his expedition against Pedro de Alvarado, who had invaded the province of Quito. He deserted Almagro, and gave Alvarado information about the inferior force of the former, proposing to serve as a guide in surprising his little army, but Alvarado, who is

supposed to have known that he was in territory already ceded to Pizarro, preferred to make an advantageous arrangement with Almagro, and caused him at the same time to pardon Felipillo's treason. In Cuzco, Felipillo incited the Inca Manco against the Spaniards by underhand intrigues, and contributed thereby to the revolt of the Indians and the burning of the city in 1535. He also took part in the dissensions between Pizarro and Almagro. When Almagro marched, in September, 1535, to the conquest of Chili, he carried Felipillo with him as interpreter, but a few days after passing the desert Felipillo fled. He was taken prisoner and strangled by Almagro's orders, who knew of his repeated treasons. The historian Gomara says that before his death Felipillo confessed that he had falsely accused Atahualpa.

FELIX, Louis, Baron, b. in St. Pierre, Martinique, 28 Dec., 1765; d. in Mexico, 1 July, 1836. He took orders when very young, and was almoner of the Count de Bentheim, lieutenant-governor of the Dauphine, at the beginning of the revolution of 1789. He then gave up his orders and became clerk of the national convention until 1795, when he joined Hughes, a member of the assembly, in organizing the government of Guadeloupe, and reducing the revolted negroes there to subjection. He took the responsibility of revoking certain measures unpopular with the whites, and managed affairs with such skill that the colony was completely pacified in 1796. Baron Felix remained in Guadeloupe in 1795–'99, devoting himself to administrative and judicial labors. In the mean while Hughes was restive under the sense of the obligations he owed to Felix, and asked to have him recalled to France in 1800. He had scarcely arrived when Napoleon made his *coup d'état* of the 18th Brumaire, and named him a member of the tribune. Felix took an active part in the deliberations of this assembly until it was suppressed in 1803. He was then sent to Mexico as minister and French consul-general. He was afterward French minister at Washington, and kept the post until 1806, but remained consul-general in Mexico till the fall of Napoleon in 1814. He returned to France in 1815, and Prince Talleyrand, who esteemed him highly, sent him as minister to South America, where he remained four years. He was then consul-general and minister extraordinary to the Levant in 1819–'22, consul-general to Mexico in 1825–'30, deputy from Marseilles in 1832–'35, and in 1835–'6 minister to Mexico, where he died. His books relating to this continent are "Aperçu sur les États Unis" (Paris, 1814); "Aperçu sur le Mexique" (1815); "Rapport au ministre des affaires étrangers sur la situation des Français dans le Mexique et l'Amérique du Sud" (1820); "Théorie des gouvernements," in which he compares the governments of Europe with those of the United States and South America, and declares in favor of the New World (1823).

FELLER, Henrietta, missionary, b. in Lausanne, Switzerland, about 1788; d. in Grand Ligne, Canada, 27 March, 1868. She married M. Feller, a magistrate in Lausanne, and soon after his death, and the death of their only child, she came in 1835 to Montreal, and, joining two of her friends, M. and Madame Olivier, began her labors as a teacher and missionary. On account of delicate health, M. and Madame Olivier were compelled to leave Montreal in a short time. Madame Feller determined to continue the school, but did not succeed, and went to St. John's. Financial aid reached her from Switzerland, and, several of the Baptist ministry becoming interested in her welfare, she was enabled to maintain her school until the first rebellion in Lower Canada, when she came to the United States. Late in 1836 she removed to Grand Ligne, again opening a school; and, after various visits to the Atlantic cities for aid, she was successful in raising funds for the erection of a mission-house, of which she became director.

FELLOWS, John, soldier, b. in Pomfret, Conn., in 1733; d. in Sheffield, Berkshire co., Mass., 1 Aug., 1808. He served in the French and Indian war, was a member of the Massachusetts provincial congress in 1775, and soon after the battle of Lexington led a regiment of minute-men to Boston. He was made a brigadier-general, 25 June, 1776, commanding a brigade at the battles of Long Island, White Plains, and Bemis Heights, where he took an active part in the capture of Burgoyne. After the war he was sheriff of Berkshire county.

FELLOWS, John, author, b. in Sheffield, Mass., in 1760; d. in New York city, 3 Jan., 1844. He was graduated at Yale in 1783, and published "The Veil Removed: Reflections on Humphrey's Essay on the Life of Israel Putnam" (New York, 1843); "Exposition of the Mysteries or Religious Dogmas and Customs of the Ancient Egyptians, Pythagoreans, and Druids"; and a work on the authorship of the Junius letters.

FELT, Joseph Barlow, antiquarian, b. in Salem, Mass., 22 Dec., 1789; d. there, 8 Sept., 1869. He was graduated at Dartmouth in 1813, licensed to preach in 1815, and was pastor of Congregational churches at Sharon, Mass., in 1821–'4, and in Hamilton, Mass., in 1825–'34. He was commissioned by Gov. Everett, in April, 1836, to arrange the ancient state papers, then in almost hopeless confusion, and in 1845 spent six weeks in England searching for duplicates of lost records. As a result of his labors, which were ended in 1846, the state archives are now contained in several scores of carefully classified volumes. After serving as librarian of the Massachusetts historical society in 1842–'58, he retired to Salem, where he engaged in literary work. He was president of the New England historic-genealogical society in 1850–'3, recording secretary of the American statistical association in 1839–'59, and a member of many other historical societies. Dartmouth gave him the degree of LL. D. in 1857. Dr. Felt was noted for his thorough acquaintance with New England history. He published "Annals of Salem," called by Bancroft "an accurate and useful work" (Salem, Mass., 1827; 2d ed., 2 vols., 1845–'9); "History of Ipswich, Essex, and Hamilton," including numerous biographies (Cambridge, 1833); "Historical Account of Massachusetts Currency" (Boston, 1839); memoirs of Roger Conant (1848), Hugh Peters (1851), and William S. Shaw (1852); "Genealogical Items for Gloucester and Lynn" (1850–'1); "The Customs of New England" (1853); "Ecclesiastical History of New England" (2 vols., Boston, 1855–'62); and various addresses.

FELTON, Cornelius Conway, scholar, b. in West Newbury, Mass., 6 Nov., 1807; d. in Chester, Pa., 26 Feb., 1862. He was graduated at Harvard in 1827, having partially supported himself through his course by teaching in Concord and Boston, and at the Round-Hill school in Northampton, Mass. In his senior year he was one of the conductors of the "Harvard Register," a students' periodical. After teaching for two years in Geneseo, N. Y., he was appointed Latin tutor at Harvard in 1829, became Greek tutor in 1830, college professor of Greek in 1832, and in 1834 was given the Eliot professorship of Greek literature. He was also for many years regent of the college. In 1853–'4 he

visited Europe, studying the various collections of art and antiquities, and spent five months in Greece, where he devoted himself not only to the topography of the country and the remains of ancient art there, but to its present language and literature, to which he attached great importance.

C. C. Felton

He was an enthusiastic defender of the modern Greeks, by whom he was known, during his stay among them, as the "American professor." He visited Europe a second time in 1858, and in 1860 was elected president of Harvard college, which office he held until his death. President Felton was a member of the Massachusetts board of education, and one of the regents of the Smithsonian institution. His literary labors were extended, and he was one of the most profound and enthusiastic classical scholars in the country. Besides making large contributions to current literature, he published a translation of Menzel's "German Literature" (3 vols., 1840, in George Ripley's "Specimens of Foreign Literature"); "Classical Studies," original and translated selections, in connection with Prof. Sears and Edwards (1843); a translation of Prof. Arnold Guyot's lectures on "The Earth and Man" (1849); a selection from the writings of Prof. Popkin, with a memoir (1852); "Life of William Eaton," in Sparks's "American Biographies" (New York, 1853); a revised edition of Smith's "History of Greece," with a continuation from the Roman conquest to the present time (1855); and "Selections from Modern Greek Writers" (1856). After his death appeared "Familiar Letters from Europe," giving an account of his last trip (Boston, 1864), and "Greece, Ancient and Modern," his most important work, composed chiefly of his lectures before the Lowell institute (2 vols., Boston, 1867). He was also the author of several Greek text-books, including an edition of Homer, with Flaxman's illustrations (1833), which passed through many editions.—His brother, **Samuel Morse,** civil engineer, b. in West Newbury, Mass., 17 July, 1809, was graduated at Harvard in 1834, studied civil engineering, became superintendent and engineer of the Fitchburg railroad in 1843, and left it in 1851 to become the president of the Philadelphia, Wilmington, and Baltimore road, where he remained until 1865. Mr. Felton planned and directed the secret passage of Mr. Lincoln from Harrisburg to Washington previous to his inauguration as president in 1861. He received information that a deep-laid plot existed to seize the capital with its archives and records, and then declare the southern conspirators to be the government *de facto* of the United States. At the same time, all communication between Washington and other places was to be cut off, except a controlled line to the south; and the transportation of troops to defend the capital was to be prevented. He was also informed that, in case his road attempted to carry troops to the defence of Washington, the bridges were to be burned and the trains attacked by parties disguised as negroes. In case Mr. Lincoln was found, he was to be put out of the way. Mr. Felton organized and armed a force of trained men, who, while apparently whitewashing the bridges, were in reality a guard that could be summoned instantly. He also established a secret police force. Mr. Felton avoided a special train from Philadelphia to Washington by delaying a regular train for the nominal purpose of forwarding an "important package." When Mr. Lincoln was safely on the train the telegraph wires in all directions between Harrisburg, Philadelphia, and Washington were cut, and not united again until eight o'clock on the following morning. After they were joined the first message announced the safe arrival of the "important package." The package was merely a bundle of old reports, carefully sealed and directed, and sent by special messenger, but its arrival meant the arrival of Mr. Lincoln at the capital. Mr. Felton also planned and organized the transportation of troops to Annapolis when communication by way of Baltimore was cut off in April, 1861. He was a commissioner of the Hoosac tunnel in 1862, was chosen president of the Pennsylvania steel company in 1865, which office he still holds, and a government commissioner of the Union and Central Pacific railroads in 1869. He was a member of the Centennial board of finance in 1876, and director of the Northern Pacific railroad in 1870–'3, and of the Pennsylvania railroad in 1873–'83. He published "Philadelphia, Wilmington, and Baltimore Railroad Investigation into the Alleged Misconduct of the Superintendent" (Philadelphia, 1854–'5).—Another brother, **John Brooks,** lawyer, b. in Saugus, Mass., in 1827; d. in Oakland, Cal., 3 May, 1877, was graduated at Harvard in 1847, and remained there for two years as a tutor in Greek. Afterward he spent some time in European travel, and was graduated from the Harvard law-school in 1853. During the same year he settled in San Francisco. His knowledge of French and Spanish led to eminence at the bar, of which he remained a member till his death. He was successful both as an advocate and before the higher courts. The large fees that he received were notable even in California. His fee in one case was said in the newspapers of the time to amount to more than a million dollars. He served several times as presidential elector, and was mayor of Oakland, where he lived. He was for many years a regent of the University of California, of which he was one of the founders. Mr. Felton possessed attractive social qualities and brilliant wit. In the city of San Francisco the news of his death was received with public demonstrations of sorrow, the places of amusement were closed, and the flags displayed at half-mast on the day of his funeral.

FENDALL, Josias, colonial governor of Maryland. He was ordered in 1655 by Gov. Stone to seize the public stores at Patuxent, but was made prisoner in the fight that ensued, and, having afterward raised another insurrection, was appointed governor, 10 July, 1656, as a reward for his fancied services to the proprietary government. He was superseded in December, 1660, for having turned against his patron, was tried in December, 1661, convicted of treason, and sentenced to be banished, but, on his petitioning the governor and council, was pardoned and made to pay a moderate fine. For engaging in seditious practices he was afterward banished, and a fine of forty thousand pounds of tobacco was imposed on him in 1681.

FENDALL, Philip Ricard, lawyer, b. in Alexandria, Va., in 1794; d. in Washington, D. C., 16 Feb., 1868. He was graduated at Princeton in

1815, and was admitted to the bar in Alexandria about 1820. Some years later he removed to Washington, D. C., where he filled the office of district attorney in 1841–'5, and 1849–'53. He ranked for years as the ablest advocate of the capital, and wrote much on literary and political topics.

FENDLER, August, German botanist, b. near Konigsberg in 1813; d. in the island of Trinidad, 27 Nov., 1883. He came to the United States, and in 1846 was employed in collecting botanical specimens in Texas and Mexico. He was the author of "The Mechanism of the Universe," a work of an erratic character, and "Meteorology of Colonia Tovar, Venezuela" (1857).

FENN, Harry, artist, b. in Richmond, Surrey, England, 14 Sept., 1838. He was educated at Ilesworth and Richmond, and at the age of eighteen came to the United States. He has achieved great success as an illustrator of books, was one of the founders of the American water-color society, and has been one of its exhibitors nearly every year since its organization. Some of his best work is contained in "Picturesque America," "Picturesque Europe," and "Picturesque Palestine." He has travelled extensively through the United States, Canada, Europe, Egypt, and Palestine, and the Sinaitic peninsula.

FENNELL, James, actor, b. in London, England, in 1766; d. in Philadelphia, Pa., 14 June, 1816. He was well educated, and studied for the bar, but made his first appearance as an actor in 1787 at the Edinburgh theatre, under the assumed name of Cambray. His success was such that he at once found an engagement at Covent Garden theatre, London, where he appeared at the end of the same year under his own name as Othello. He remained several seasons in London, acting and writing for dramatic publications, and later spent some time in Paris. In 1793, Fennell came to this country, and made his first appearance in Philadelphia with eminent success. From 1797 till 1806 he played in New York, Boston, and other cities as a star actor. Afterward he taught reading and elocution in Boston, and for a time kept an academy in Charlestown, Mass. In 1814 he established extensive salt-works near New London, Conn., which led to his financial ruin. In the early part of his career Fennell was an actor of promise. He was of commanding appearance, well educated, and carefully studied his characters. His Othello, Zanga, Glenalvon, and Pierre could hardly be excelled; but any permanent success was prevented by his eccentricity and irregular habits. He published "The Wheel of Truth," a comedy; "Picture of Paris"; "Linden and Clara," a comedy (1791); "Proceedings at Paris" (1792); and "Apology for my Life" (Philadelphia, 1814).

FENNER, Arthur, governor of Rhode Island, b. in Providence, R. I., in 1745; d. there, 15 Oct., 1805. His ancestors were among the earliest inhabitants of Providence. He was at one time clerk of the superior court, and was afterward governor of the state in 1789–1805.—His son, **James,** senator, b. in Providence, R. I., in 1771; d. there, 17 April, 1846, was graduated at Brown in 1789, and was U. S. senator from 1805 till 1807. He was governor of Rhode Island in 1807–'11, 1824–'31, and 1844–'5.

FENNER, Cornelius George, poet, b. in Providence, R. I., 30 Dec., 1822; d. in Cincinnati, Ohio, 4 Jan., 1847. He was graduated at Brown in 1842, studied theology, and became pastor of the 1st Unitarian church in Cincinnati. His wife was the eldest daughter of Albert G. Greene. His best-known poem is "Gulf-weed." He published "Poems of Many Moods" (Boston, 1846).

FENNO, William Augustus, actor, b. in Boston, Mass., 1 March, 1814; d. in New York city, 19 Feb., 1873. His early life was spent with his father's family near Boston, but, at the age of sixteen, a love of adventure led him to ship as a sailor on board a merchantman on a voyage round the world. After a four years' cruise, he studied for the stage, and made his first appearance at the age of seventeen at the Bowery theatre, New York, as Snake in the "School for Scandal." He appeared in Philadelphia, 5 Oct., 1848, at the Arch street theatre, as Romeo, visited California in 1850, and went to England in 1864. His provincial tours were numerous and extended.

FENOUILLET, Émile de (fe-noo-yay'), Canadian author, b. in Hyères, in the department of Var, France, in 1806; d. in Quebec, 25 June, 1859. After pursuing a course of legal studies at Aix, he removed to Montpellier, and soon afterward to Paris, where he became a writer on the "Epoque." Subsequently he accepted a professorship at Bonn, and wrote letters that were published in "L'univers" of Paris. In October, 1854, he arrived in Quebec, and during the next two years was editor-in-chief of the "Journal de Quebec." Soon afterward he was appointed professor of history and literature in Laval normal school.

FENTON, Reuben Eaton, statesman, b. in Carroll, Chautauqua co., N. Y., 1 July, 1819; d. in Jamestown, N. Y., 25 Aug., 1885. His early education was obtained at Pleasant Hill and Fredonia academies, in his native county. He was admitted to the bar in 1841, and began practice in Jamestown, but, finding law uncongenial, he engaged in mercantile pursuits, and in a few years acquired a moderate fortune. Meanwhile he took active interest in politics, and in 1843 was elected supervisor of the town of Carroll, which office he held for eight years. In 1852 Mr. Fenton was elected to congress, and was active in the contest over the Kansas-Nebraska bill, being one of the forty-four northern Democrats that voted against the further extension of slavery. This action resulted in his defeat in 1854, when he was nominated by the Whigs and Democrats against the Know-nothing candidate. The Republicans of his district nominated Mr. Fenton for congress in 1856, and he was elected by a large majority, serving from 1857 till 1864, when he resigned, having been chosen governor of his state. He heartily supported the cause of the Union in the civil war, and stood firmly by President Lincoln and his cabinet in their war measures. He was inaugurated governor at the opening of the year 1865, and was re-elected by an increased majority. In 1868 he was elected to succeed Edwin D. Morgan as U. S. senator, and served from 1869 to 1875. The only public trust held by him after leaving the senate was that of chairman of the U. S. commission at the International monetary conference in Paris in 1878. Mr. Fenton actively promoted the interests of the

R. E. Fenton

community in which he lived. He projected the bringing of two new railroads into Jamestown, and was one of the main contributors toward establishing there a Swedish orphanage. He also served a term as president of the village. His last public address was made on the occasion of Gen. Grant's funeral, when a memorial service was held in Walnut Grove, his place of residence.

FENTON, William Matthew, lawyer, b. in Norwich, Chenango co., N. Y., 19 Dec., 1808; d. in Flint, Mich., 13 May, 1871. He was one of the earliest emigrants to Genesee county, Mich., and, after taking an active part in founding the village that bears his name, he resided there and at Flint, and engaged in the practice of law. In 1848 he was elected lieutenant-governor of Michigan, and re-elected in 1850 and 1851. At the beginning of the civil war he became a member of the state military board, and was one of the principal organizers of the 8th Michigan regiment, which he commanded and which participated in so many battles in various parts that it became known as the "wandering regiment."

FENWICK, Cuthbert, b. in England; d. at Fenwick Manor, Md., in 1655. He was one of the Roman Catholics that accompanied Leonard Calvert to Maryland in 1634. He found a good and powerful friend in Capt. Thomas Cornwaleys, for whom he acted as agent, and was with his patron in the engagement on the Chesapeake, between a pinnace commanded by a partisan of Claiborne, and two armed boats commanded by Cornwaleys for the government. He sat in the assembly of 1648, and in several others. He was speaker of the house of burgesses when it sat separate from the council in 1649, and voted for the toleration act.

FENWICK, Edward D., R. C. bishop, b. in St. Mary's county, Md., in 1768; d. in Wooster, Ohio, 26 Sept., 1832. He was sent to the College of Bornheim, near Antwerp, Belgium, in his sixteenth year. On completing his collegiate course, he joined the Dominican order, and entered the ecclesiastical seminary of Bornheim as a theological student. After his ordination he was appointed professor and procurator of the Dominican college. On the invasion of Belgium by the French revolutionists, he was imprisoned and threatened with death, but, on proof of his American citizenship, was released and went to England, where he joined a convent of his order. Being anxious to introduce the Dominican order into the United States, he persuaded three members to accompany him on his return home. They were well received by Bishop Carroll, who suggested that they should devote themselves to the evangelization of the vast unexplored regions in the west. In 1805, Father Fenwick traversed the entire valley of the Mississippi on a tour of observation with the view of finding a suitable centre for his missionary labors. He selected a farm in Kentucky, paid for it out of his private fortune, and in the spring of 1806 built on it the Dominican convent of St. Rose of Lima, which he made the headquarters of his mission in Kentucky and Ohio. In order to devote himself to the duties of his mission, he resigned the office of provincial, which he held in his order, and lived almost constantly on horseback, penetrating the states of Ohio and Kentucky in every direction, and thus laying the foundation of the Roman Catholic church in the west. He built the first church in Cincinnati in 1819, after previously founding eight other churches, and in 1822 became first bishop of that diocese. He went to Europe in 1823 for pecuniary aid, and returned to Cincinnati in 1826 with ample resources. He at once began the erection of a cathedral, built parochial schools, and founded convents of the Sisters of Charity and of the Dominican nuns. In 1831 he opened the Athenæum, afterward known as the College of St. Francis Xavier. He next went to visit the Indian tribes in the Northwestern territory. At Mackinaw he labored among them for three weeks, selected two to be trained for the priesthood, and sent them to Rome. The rest of his life was spent in missionary work among the Indians, and exhausting labors in every part of his vast diocese. While on one of his visitations he was attacked by cholera, which ended fatally after a few days.—His cousin, **Benedict Joseph,** R. C. bishop, b. in St. Mary's county, Md., 3 Sept., 1782; d. in Boston, Mass., in 1846, entered Georgetown college in 1793, and in 1805 became a student in the Theological seminary of St. Sulpice. He was ordained in 1808, and stationed at St. Peter's church, New York city. While here he founded the New York literary institute, and also began St. Patrick's cathedral in Mulberry street, from plans and designs of his own. He was appointed vicar-general in 1816, and in 1817 became president of Georgetown college, and pastor of Trinity church, Georgetown. In 1818 he went to Charlestown, at the request of his bishop, to compose dissensions which had sprung up among the French- and the English-speaking Roman Catholics of that city. He was completely successful in his efforts, and remained as vicar-general up to 1822, when he returned to Georgetown college, and was appointed procurator-general of the Jesuits in the United States. In 1825 he was consecrated bishop of the diocese of Boston, which then embraced the whole of New England, and contained only four churches. He opened schools in the city of Boston, built in Charlestown the convent and academy of St. Benedict for young ladies, which became one of the first institutions of the kind in the country, and then undertook the task of making a visitation of his diocese. He travelled through every part of it in 1827, spending some weeks among the Passamaquoddy Indians of Maine, and the remnant of the Abnakis, organizing congregations and marking out sites for churches. He procured funds from the Society for the propagation of the faith, with which he was enabled to provide missionaries and churches for the Indians, and when he visited them again in 1831 he found them making rapid progress in civilization. About this time he had erected seventeen new churches. In 1834 the convent of St. Benedict in Charlestown was attacked by a mob and burned during the night. The nuns, however, had been warned of the attack, and escaped without injury. In 1843, Bishop Fenwick founded the College of the Holy Cross, and placed it in charge of the Jesuits. At his death there were fifty churches, an orphan asylum, and numerous Roman Catholic schools, colleges, and academies in his diocese. When Bishop Fenwick was a young priest, he was sent for by Thomas Paine, who was then suffering from the illness of which he died, and afterward described the visit in an interesting letter to his brother, Rev. Enoch Fenwick.

FENWICK, George, colonist, d. in England in 1657. He came to America in 1636 to take charge of the Saybrook plantation, so named after Lords Say and Brook, who with others procured a patent for the territory from Robert, Earl of Warwick, in 1632. After a visit to England he came back in 1639, and henceforth, as patentee and agent for the others, governed and superintended the settlement till 1644, when he sold its jurisdiction and territory to the Connecticut colony for £1,600. His

wife died at Saybrook, and her monument is still to be seen there near the fort. Fenwick was afterward a colonel in the parliamentary army, and was one of the judges of Charles I.

FENWICK, John, colonist, b. in England in 1618; d. in 1683. He obtained in 1673 a grant of land in the western part of New Jersey, and, emigrating there in 1675, founded a Quaker colony at Salem. His title to the proprietorship was disputed by Gov. Andros, who confined him in prison for two years. Soon after conveying his property to William Penn, he died in poverty.

FENWICK, John R., soldier, b. in Charleston, S. C., in 1780; d. in Marseilles, France, 19 March, 1842. He was educated in England, and was distinguished for his literary attainments early in life. He was appointed lieutenant of U. S. marines in 1799, captain in 1809, and lieutenant-colonel of light artillery in December, 1811. He was severely wounded and made prisoner at the battle of Queenstown Heights, 13 Oct., 1812, was brevetted colonel in March, 1813, for gallant conduct on the Niagara frontier, and was on the same date appointed adjutant-general of the army, with the rank of colonel. He was disbanded with this rank in June, 1815, but retained in the army as lieutenant-colonel of light artillery. He was commissioned colonel of the 4th artillery in May, 1822, and brevet-brigadier-general in March, 1823.

FENWICK, Kenneth Neander, Canadian physician, b. in Kingston, Ont., 21 April, 1852. He was educated at Queen's university, Kingston, from which he received the degree of M. A. in 1874, and at the Royal college of physicians and surgeons there, where he was graduated as M. D. in the same year. He then went to England, took the degree of M. R. C. S. in 1875, and spent some time in Paris in hospital practice. He became demonstrator of anatomy in the Medical college of Kingston in 1876, was afterward professor of medical jurisprudence and sanitary science for four years, professor of physiology for a like term, and in 1885 was elected to the chair of obstetrics and diseases of women and children, which he now holds. He was elected a fellow of the Obstetrical society of Edinburgh in 1885, and is now (1887) one of the surgeons to Kingston general hospital.

FERGUSON, Adam, Canadian agriculturist, b. in Edinburgh, Scotland, in March, 1783; d. 26 Sept., 1862. He studied law and was admitted as an advocate, but never practised. In 1833 he came to Canada, and with James Webster, of Guelph, founded the town of Fergus, in what is now the county of Wellington. He was called to the legislative council of Upper Canada in 1841, and after the union of Upper and Lower Canada, held a seat in that body from 1841 till his death. He was widely known as an agriculturist, and was a director on the first board of agriculture. To him is largely due the credit of establishing the agricultural association, of which he was repeatedly president, and the chair of agriculture in University college, Toronto.—His son, **Adam Johnston,** Canadian statesman, b. in Balthayvock house, Perthshire, Scotland, in 1815; d. 30 Dec., 1867, was first educated in Edinburgh, came to Canada in 1833, studied law, and was called to the bar of Upper Canada in 1859. He was lieutenant-colonel of the 4th battalion of the Wellington militia, and, while yet a young man, became a district judge of Upper Canada. Entering into political life, he sided with the Liberal party in Canada, and sat in the lower house of the provincial parliament for Waterloo, from 1849 till 1854, and for the South Riding of Wellington from 1854 till 1857. In 1860 he was elected by acclamation to the legislative council from the Brock division, and re-elected on his appointment to office in 1863. From March till July, 1863, he was receiver-general, when he was appointed provincial secretary in the government of John Sandfield Macdonald. In 1866 he was president of the council in the administration of Sir N. F. Belleau, and in 1867 he became a senator and president of the privy council in the government of the Dominion. Mr. Ferguson exercised much influence with the political party with which he was associated. He assumed the name of Blair after that of Ferguson on succeeding to the estate of Balthayvock in 1862.

FERGUSON, Colin, clergyman, b. in Kent county, Md., 8 Dec., 1751; d. there, 10 March, 1806. He was the son of a Scotch emigrant in very moderate circumstances. His early education was begun at home, but he afterward went to Edinburgh, Scotland, entered the university there, and, after several years' diligent study, returned to Maryland an accomplished scholar. In 1782 he was an instructor in Kent county school at Chestertown. The year following, when Washington college (the oldest in Maryland) was organized, he was chosen professor of languages, mathematics, and natural philosophy. He held this chair for ten years, when he was appointed president. The institution, however, having been deprived of its funds by the legislature of Maryland, Dr. Ferguson resigned in 1804, and spent the remainder of his life in retirement. He studied theology under Rev. William Smith, D. D., rector of Chester parish, and was admitted to deacon's orders in Christ church, Middletown, Conn., 3 Aug., 1785, and to priest's orders, 7 Aug., by Bishop Seabury. He was licensed to preach in St. Paul's parish, Kent co., Md., which was the only parish of which he ever had charge. He received the degree of D. D. from Washington college in 1787, and was an active member of the Episcopal general convention of 1789, at which the constitution of the church was discussed and adopted. Dr. Ferguson was a ready writer, but he published nothing of importance.

FERGUSON, Donald, Canadian legislator, b. in East River, Prince Edward Island, 7 March, 1839. His grandparents, who came from Perthshire, Scotland, settled near Charlottetown in 1807. He was political writer for the "Island Argus" in 1869 and 1870, and was collector of revenue at Charlottetown for a short time. He was elected for King's county in the provincial parliament in June, 1878, and on the resignation of the Davies ministry in March, 1879, he became a member of the executive council and commissioner of public works. Since 1880 he has been provincial secretary and commissioner of public lands. He was elected by acclamation at the general election of 1879, and was appointed provincial secretary and commissioner of crown lands in March, 1880. He was re-elected in June, 1882. He has published "Agricultural Education," a lecture (Charlottetown, 1884), and "Love of Country," a lecture (1885).

FERGUSON, Elizabeth, poet, b. in Philadelphia, Pa., in 1739; d. near Graeme Park, in Montgomery co., Pa., 23 Feb., 1801. Her grandfather was Sir William Keith, colonial governor of Pennsylvania, and her father was Dr. Thomas Graeme, a Scotchman, collector of customs at Philadelphia. At the age of sixteen Mrs. Ferguson's wit and beauty made her a favorite. To divert her mind from a personal disappointment, she became a writer of poems and a translator of French verse, but the close application attendant upon this impaired her health, and she travelled abroad, as the

protégée of her aged friend, Rev. Dr. Richard Peters. Her daily record of travels was written in a happy vein, and contained a vivacious series of contrasts between English and colonial society, which, though urgently solicited for publication, she declined to have printed. Soon after her return home she married a Scotchman, Hugh Henry Ferguson, after which she lived at Graeme Park until the beginning of the Revolution in 1775, when her husband took the side of the crown, she remaining true to her country, and a separation followed. Her husband's American estate was confiscated, but a small part of it was restored to her by the legislature in 1781. After the British entered Philadephia, Mrs. Ferguson was the bearer of an offensive letter from the Rev. Mr. Duché to Gen. Washington. The general sent the letter to congress, and hinted to Mrs. Ferguson that he "highly disapproved the correspondence, and expected it would be discontinued." But she soon proposed to Gov. Johnstone to offer Joseph Reed "ten thousand guineas and the best post in the government" to exert his influence with Gen. Washington, and in other ways "to settle the contest," which brought out the memorable reply of Reed, afterward published by Mrs. Ferguson in a narrative for her own defence. Her life after the Revolution was passed in pursuits of literature and in offices of benevolence. Several of her letters were printed in the "Port-Folio." Her poetical correspondence with the Rev. Nathaniel Evans, under the pen-name of "Laura," was also published. She transcribed the entire Bible, to impress its contents more deeply on her memory. But her most important work was a translation of Fénelon's "Telemaque" into English heroic verse, which occupied her for three years. The manuscript was deposited by her heirs in the Philadelphia Franklin library. More than twenty years after its completion she rewrote four volumes.—Her nephew, **John Young**, who translated D'Argent's "Ancient Geography," died a lieutenant in the British army. The copy of his work in the Philadelphia library contains a memoir by Mrs. Ferguson.

FERGUSON, James, civil engineer and astronomer, b. in Perthshire, Scotland, 31 Aug., 1797; d. in Washington, D. C., 26 Sept., 1867. He was brought to the United States in 1800, was assistant civil engineer on the Erie canal in 1817–'19, assistant surveyor on the boundary commission under the treaty of Ghent in 1819–'22, astronomical surveyor on the same commission in 1822–'27, civil engineer for the state of Pennsylvania in 1827–'32, first assistant of the U. S. coast survey in 1833–'47, and assistant astronomer of the U. S. naval observatory from 1847 till his death. While holding this last office he discovered three asteroids, for which he was awarded the astronomical prize medal by the Academy of sciences of France in 1854, and again, by the same institution, in 1860. Prof. Ferguson was a contributor to Gould's "Astronomical Journal" and to the "Astronomische Nachrichten"; also to the "Episcopal Church Review" and other magazines.

FERGUSON, Patrick, British soldier, d. at King's Mountain, N. C., 7 Oct., 1780. He was a son of James Ferguson, an eminent jurist, and a nephew of Lord Elibank. At the age of eighteen he entered the army in Flanders. He came to this country in the spring of 1777, and was engaged in the battle of the Brandywine in September of that year. In October, 1778, he led a band that destroyed the shipping at Little Egg harbor, burned houses, and laid waste the lands of the patriots. They surprised Pulaski's command, and killed all they could, taking no prisoners. Ferguson was active on the Hudson in 1779, and so distinguished himself at the siege of Charleston in 1780 that he was particularly mentioned by the commander-in-chief, Sir Henry Clinton, and appointed major of the 71st regiment. He was deputed to visit each district in South Carolina, to procure lists of the militia, and to see that the orders of Cornwallis were carried into execution. Any Carolinian thereafter taken in arms against the king might be sentenced to death for desertion and treason. In September, when Cornwallis began his march, he relied on the loyalists of North Carolina to recruit his army. On his left, Maj. Ferguson was sent with 200 of the best troops to the uplands of South Carolina, where he enlisted young men, loyalists who had fled to the mountains for security, and fugitives of the worst character, who sought his standard for the chances of plundering. After a gallant defence, he was defeated and slain in the bloody contest of King's Mountain, the spirit of which victory to the American soldiers was, says Bancroft, "like the rising at Concord, in its effects like the successes at Bennington, and changed the aspect of the war. It encouraged the fragments of the defeated and scattered American army to seek each other and organize themselves anew." Ferguson was reputed to be the best marksman in the army. He invented a musket to be loaded at the breech, which could be fired seven times in a minute with remarkable precision. Just before the battle of the Brandywine, Gen. Washington was taking observations outside the lines, attended by a French officer in hussar uniform. Ferguson, who did not recognize the approaching party, ordered three shots fired at them, but quickly countermanded the order. The hussar made a circuit on his return, but Washington passed very near Ferguson, and was ordered by him to halt, which order was disregarded. There was ample opportunity to take his life, but it was not attempted. On the following day Ferguson learned the name of his distinguished visitor.

FERGUSON, Samuel David, P. E. bishop, b. in Charleston, S. C., 1 Jan., 1842. He emigrated with his parents to Liberia, in Africa, at the age of six years. He received his education in the mission schools under Bishop Payne, was appointed a teacher in 1862, and was ordained deacon by the bishop, 28 Dec., 1865, and priest, 15 March, 1868. During his diaconate he served as assistant minister in St. Mark's parish, Harper, and when made priest, became rector of the same parish. He was president of the standing committee for several years, and also business agent of the mission, and superintendent of the Cape Palmas female orphan asylum and girls' school. Having been elected missionary bishop for West Africa in 1885, he came to the United States, and was consecrated in Grace church, New York city, 24 June, 1885. Soon afterward he returned to Cape Palmas, Liberia, and entered upon the duties of his office.

FERIA, Pedro (fa'-re-a), Mexican bishop, b. in Feria, Estremadura, Spain, in 1524; d. in Chiapas, Mexico, in 1588. He was ordained in the cloister of San Estebande Salamanca on 5 Feb., 1545, received the degree of doctor in theology, and in 1551 was sent to Mexico, entering the missions of the Zapotec Indians, in whose language he preached and published several religious books. He was elected superior of the imperial convent of Mexico, 20 May, 1557, went to Florida as provincial vicar in 1560, and in 1567 was appointed provincial of the province of Santiago in Mexico, returning in 1570 to Spain as ecclesiastical attor-

ney-general. After some time he retired to the convent of Salamanca as director of novices, and was appointed bishop of Chiapas, taking possession of his diocese in 1575. He was called to the third Mexican provincial council in 1585, but on his voyage he broke a leg in Oajaca, and had to remain there for nearly a year to be cured. He wrote from there to the council "Tratado canónico reneitido desde Oajáca al concilio provincial de Mexico" and "De la preferencia de los regulares para los curatos de los Indios," which are printed and preserved in the library of the college of San Gregorio in Mexico, with his "Vocabulario de la lengua Zapoteca," which is still considered as a text-book.

FERLAND, John Antony Baptist, clergyman, b. in Montreal, Canada, 25 Dec., 1805; d. in Quebec in 1865. In 1813 his family left Montreal and settled in Kingston. Here he resided three years, and learned to speak English. In 1816 he entered the seminary of Nicolet, where he remained fourteen years. He was ordained priest, 14 Sept., 1828, and named vicar of Quebec the same day. After holding various pastorates, he was appointed professor in the seminary of Nicolet in 1841, and in 1848 was elected superior. In the preceding year he displayed great courage during the typhus epidemic which had broken out among the Irish emigrants at Grosse-Ile. In 1850 he was transferred from the seminary to the archiepiscopal residence, and was named a member of the archbishop's privy council. He became chaplain of the military hospitals of Quebec in 1855, and was appointed professor in the faculty of arts in the Laval university the same year. He was elected dean of the faculty of arts, 18 March, 1864. Between the years 1858 and 1862 he gave a course of successful public lectures on the period that began with the expulsion of the Acadians and ended with the death of Montcalm. In the midst of his labors he found time to write several books, all relating to Canada, his object being, as he says himself, to make Canada known and loved by his fellow-countrymen. It is on his "Cours d'histoire du Canada" (vol. i., Quebec, 1861; vol. ii., by M. Laverdiere, 1865) that his reputation as an historian chiefly rests. He brought to light a multitude of facts that were previously unknown or misrepresented, rectified a large number of dates, and harmonized and explained the confused accounts of the early settlements. He was the author of "Observations sur une histoire du Canada par l'Abbé Brasseur"; "Voyage au Labrador"; "Journal d'un voyage à la côte de Gaspé"; and "La vie de Mgr. Plessis," all of which were published in Quebec.

FERNALD, Charles Henry, naturalist, b. on Mount Desert, Me., 16 March, 1838. He was educated principally at the Maine Wesleyan seminary, and during the civil war served in the U. S. navy as acting ensign. In 1865 he became principal of Litchfield academy, and in 1866 principal of Houlton academy. He then was called to the chair of natural history in the Maine state college, and held it from 1871 till 1886, when he became professor of zoölogy in the Massachusetts agricultural college. Prof. Fernald is a member of various scientific societies, and received the degree of Ph. D. in 1886 from the Maine state college. He has a large collection of tortricidæ, and has very thoroughly studied these moths. His principal publications are "Catalogue of the Tortricidæ of North America" (Philadelphia, 1882); "Butterflies of Maine" (Augusta, 1884); "Grasses of Maine" (1885); and "Sphingidæ of New England" (1886).

FERNALD, Merritt Caldwell, educator, b. in South Levant, Me., 26 May, 1838. He was graduated at Bowdoin in 1861, and subsequently taught in Levant, Searsport, and Bethel, Me. Later he spent some time in the chemical laboratory at Harvard in the study of analytical chemistry and mineralogy, and also acted as assistant to Prof. Josiah P. Cooke. In 1868 he became professor of mathematics and physics in the Maine state college of agriculture and the mechanical arts, and in 1879 became president of that institution, now known as the Maine state college. He was elected a member of the state board of agriculture in 1869, and has published in its reports papers on subjects connected with his special studies, besides meteorological and mathematical tables, and records of barometrical, geodesic, and astronomical works. President Fernald has been supervisor of schools, and received the degree of doctor of philosophy from Bowdoin in 1881.

FERNANDES, Calabar Domingo, Brazilian soldier, b. in Olinda near the close of the 16th century; d. in Porto Calvo, 22 June, 1635. He was of African descent, and little is known of his early life. He was living in Pernambuco when the Dutch attacked the city in 1630, and, notwithstanding his humble condition, gathered some men, joined the volunteers, and gained a series of victories which forced the invaders back. In 1632 he distinguished himself at the battle of Campo Real, and afterward, with his troops, repulsed the Dutch at several places. He was rewarded for his devotion by the contempt of his countrymen, who were envious of his prowess. Wounded by this conduct, he left the Portuguese and joined the Dutch, whom he led to the capture and plunder of the town of Yguarassu. He captured the fortress of Rio Formoso in Jan., 1633, won an important battle at Itamaraca in June, and in December led the conquerors to the fortress of Reis Magos. In March, 1634, he routed the Portuguese army, which had defeated the Dutch in January of that year, and captured the port of San Augustin. The Portuguese army being threatened on all sides, its commander, Alburquerque, in order to spare the rest of the troops, began to retreat toward Lagunas in June, 1635, but before reaching Porto Calvo he found out that that town had been occupied by Fernandes, thus strengthening the Dutch garrison commanded by Picard. Sebastiao do Souto, a feigned friend of Picard, treacherously allured him and 200 of his men to a place where the Portuguese had prepared an ambush, completely routing them. The garrison of Porto Calvo then had to capitulate, and Fernandes Calabar, who was major of the Dutch army, was taken prisoner and hanged by the Portuguese at Porto Calvo.

FERNÁNDES PINHEIRO, José Feliciano (fer-nan'-dez), Viscount of São Leopoldo, Brazilian statesman, b. in Santos, 9 May, 1774; d. in Porto Alegre, 6 June, 1847. He began his studies in his native country, and completed them at Coimbra, Portugal, where, in 1798, he was graduated as bachelor in canonical laws, but abandoned his ecclesiastical functions and entered the magistracy. He assisted Velloso in establishing the literary institution "Arco do bego," wrote most of the scientific work "Fora Iluminense," and compiled the "Historia Nova e Completa da America." In 1800 he returned to Brazil, and was appointed judge of excise duties of Rio Grande do Sul. In 1802 he was given charge of the organization of a flotilla for coast defence. He was made colonel in 1810, and in 1812 accompanied the army to Montevideo. In 1816 he was chosen a member of a jury for the trial of numerous criminals in Rio Grande do Sul. In 1821 he was elected a member of the Portuguese

legislature for the province of São Paulo, but left Portugal when he heard of the independence of Brazil. On his return he was again elected for São Paulo to the constituent assembly of Brazil. He was appointed president of Rio Grande do Sul, 25 Nov., 1823, and founded the first typographical establishment there, the colony of São Leopoldo, and the charity hospital. On 13 Oct., 1825, he was made counsellor of state, and on 21 Nov. accepted the portfolio of minister of the empire. He exerted his influence for the improvement of public instruction, reorganized the school of medicine, founded a literary academy in the capital, and established chairs of law in São Leopoldo and Olinda. On 20 Nov., 1827, soon after negotiating a treaty of peace with the Argentine republic and a commercial treaty with England, he resigned his office. In 1830 he retired temporarily from the senate, and went for his health to São Pedro, where he was at the time of the revolution of 1831. In 1837 he again took his seat in the senate, and was intrusted with important commissions. In 1838 he founded the Geographical and historical institute. Dom Pedro II. conferred many honors on Fernandes. He was a member of many European scientific societies, and was the author of several works, the most important of which are "Vida e feitos de Alexandre de Gusmão é de Bartholomeu Lourenço de Gusmão"; "Resposta as Breves Annotações que sobre a memoria Gusmão, escrevêra o conselheiro Manoel J. M. da Costa é Sá."

FERNANDES-SARDINHA, Pedro, Brazilian R. C. bishop, b. in Lisbon, Portugal, in 1497; d. on the coast of Brazil in July, 1556. His parents, who were of noble family, destined him for the profession of arms, but he entered the church in early life. On the establishment of a government in Brazil in 1549 the clergy of that country, without a head to govern them, were guilty of the grossest negligence and vices. In 1551 Fernandes-Sardinha was elected and consecrated first bishop of Brazil, and arrived in his diocese on 1 Jan., 1552. Combining severity with prudence, he soon improved the character of the secular clergy as well as of the Jesuits, who were beginning to work in the new region. During the government of Thomé de Sousa everything went favorably, and rapid progress was made in the conversion of the Indians; but in 1553 Duarte da Costa, who was of a dominating and quarrelsome character, became governor, and soon serious differences arose between him and the bishop, and, as the quarrel became daily more bitter, the case was submitted to the crown, and both were ordered to appear at court. Fernandes-Sardinha sailed from Bahia, 2 July, 1556, but the vessel was attacked by violent storms, and on 16 July was wrecked on the reefs near the mouth of the São Francisco river. The crew and passengers were saved, and tried to travel along the coast to Olinda, but after a few days they fell into the hands of cannibals, who slaughtered and ate the prisoners. Only three persons escaped, who afterward related that one of the first to be sacrificed was the bishop, who suffered his fate with resignation, and up to his last moment exhorted and consoled his fellow-sufferers. The place where this tragedy occurred has since been called the bishop's wood. Fernandes, during his episcopacy, established the college of the mission of São Paulo.

FERNÁNDEZ, Diego, Spanish-American historian, b. in Palencia, Spain, about 1530, d. in Sevilla, 1581. He adopted the military profession, went to Peru in 1545, and took part in the campaign of 1553 and 1554, in which Francisco Giron (*q. v.*) was defeated and his party destroyed. The Marquis de Cañete, who was viceroy in 1556, gave him an office, and ordered him to write the history of the events in which he had taken part. He afterward returned to Spain, where Sandoval, the president of the council of the Indias, requested him to write also an account of the troubles caused by Gonzalo Pizarro and his adherents. The work composed by Fernandez is entitled "Primera y Segunda parte de la Historia del Peru" (Seville, 1571). The author gives a detailed account of all that passed in Peru from the arrival of the first viceroy, Blasco Nuñez de Vela, in 1544. Since he took part in several of the events that he describes, and knew all the men of whom he writes, his history is usually regarded as the best account of the conquest of Peru. Garcilaso de la Vega, however, accuses him of partiality, and says that his record of events is colored by his animosity toward individuals. The sale of the work was forbidden by the council of the Indias, and the inhabitants of Spanish America were particularly forbidden to read it.

FERNÁNDEZ, Juan, Spanish soldier, b. in Seville in 1490; d. in 1538. He accompanied Hernando Cortes when the latter conquered Mexico, and also served under Pizarro, but quitted his service and entered that of Pedro Alvarado. Fernandez was an experienced pilot, having frequently made the voyage between Peru and Panama, and Alvarado gave him the command of the fleet, ordering him to explore the coast from Puerto Viejo to the territory governed by Pizarro, and to take possession of it in due form. After fulfilling this mission he was sent to Nicaragua in search of the troops that Alvarado had left in Panama. He was to keep near the coast with his fleet while Alvarado marched by land upon Quito. Diego de Almagro, who belonged to the party of Pizarro, wrote immediately to Rivera, and to his partisans of Pachacama, to arrest and hang Fernandez, whom he considered a deserter from their own party. Shortly afterward Alvarado penetrated into the heart of the country, crossing the Andes by a perilous march. Alvarado subsequently agreed to renounce all his claims and cede his ships to his rival on receipt of one hundred thousand dollars, and Fernandez was thus obliged to enter the service of his former commander, who pardoned him, and in 1535 appointed him captain of a galleon, in which he made two voyages to Spain. He was still discontented under Pizarro, and left him again in 1537, taking service as pilot under Antonio Quesada, governor of Hispaniola. The following year he was appointed adjutant, and accompanied Antonio de Sedeño, who had been ordered by the governor to reduce to submission the island of Trinidad. Instead of fulfilling their mission, they disembarked on the continent in order to discover the province of Meta, which was said to be rich in mines of gold and silver. The party penetrated into the country for some distance, but, after several fights with the Indians, were forced to turn back. Sedeño died in October, 1578, and Fernandez was then proclaimed commander, but survived him but a few days.

FERNANDEZ, Juan, Spanish navigator, b. in Cartagena, 1526; d. in 1576. The jealousy with which the Spanish court retarded the diffusion of intelligence regarding its possessions in America is perhaps the reason why so little is known about his voyages. The following incidents embrace nearly all it is possible to ascertain concerning him. He made frequent voyages along the coast of South America, and, according to the custom of sailors at the time, kept close to the shore. When sailing from Peru to Chili, however, he found that the pas-

sage was rendered extremely long and laborious by the winds that prevailed constantly in these latitudes, and he thought that he would avoid them by standing out from land. His plan was successful, and he arrived in Chili without any difficulty, making the journey in a much less time than when he followed the shore. In one of these voyages, probably about 1563, he discovered the island which bears his name. According to some writers, the Spanish government granted him possession of it, while others say that he met with a refusal. He remained some time on it, however, and when he departed left several goats behind him, which multiplied to such an extent that the island was soon stocked with them. The islands of Saint Felix and Saint Ambrose were discovered by him in 1574. He was so much encouraged by these successes that, in the hope of making still more important discoveries, he sailed from the coast of Chili in 1576, bearing out farther from land than in the preceding voyages. He sailed over about forty degrees toward the west and southwest, and, after a month's journey, landed on a coast which to all appearance was that of a continent. The inhabitants, who were white, well-made, and decently clothed, received the Spaniards kindly. As his ship was very small and badly equipped, Fernandez did not push his researches farther, but, after a short stay, embarked for Chili. He made his companions promise to keep the discovery a secret, and arranged with them to return with a larger expedition, but he was prevented in some way from putting his design in execution, and, after his death, the whole affair was forgotten. According to another version, he partially disclosed his discovery to certain persons who abandoned the idea of pursuing it after his death. These details are found in a work published by Luis Arias, a Spaniard, entitled "Memoir to recommend to the King the Conversion of the Natives of Newly Discovered Islands" (1609; English translation, Edinburgh, 1773). It has been conjectured by some geographers that the coast perceived by Fernandez was that of New Zealand, and they account for the discrepancy between the real distance of New Zealand from South America and the forty degrees over which Fernandez sailed by supposing that Arias, from his ignorance of nautical matters, made an error in his calculations. Another discovery by Fernandez was that of Easter island, forty degrees west from the Chilian coast, which was generally thought to have been sighted first by Roggeneen, a Dutch navigator, in 1722, but Duperrey, a French savant, has restored the credit of its discovery to Fernandez.

FERNÁNDEZ, Próspero, Costa Rican president, b. in San José de Costa Rica, 18 July, 1834; d. there, 11 March, 1885. He studied at the University of Guatemala, and in 1852 entered the military service under the new conscription law. In 1854 he became lieutenant, and in 1855 marched with the auxiliary forces of Costa Rica to Nicaragua to repel the invasion of William Walker and his filibusters. He took part during 1856–'7 in the battles of Santa Rosa, Jan Jacinto, and Rivas, and finally in 1858, during Walker's second invasion, in the capture of his steamers in the river San Juan. In 1870 he took an active part in the revolution headed by Col. Tomás Guardia, which broke out on 27 April against the government of President Jesús Jimenez. Dr. Bruno Carranza was appointed provisional president, but resigned on 8 Aug., and Guardia as commander-in-chief succeeded him, but, in view of the hostility of the national assembly, retired to Alajuela, and was proclaimed dictator by the military forces under Fernandez, 7 Oct. Under Guardia's despotic government, Fernandez, promoted to general of division, held aloof from politics, but was for some time governor of the province of Alajuela, in 1881 was appointed commander-in-chief of the military forces of the republic, and in 1882 elected by popular vote to the presidency for the constitutional term of four years. When Guardia died before the expiration of his term, 6 July, 1884, Lizano assumed the power for some weeks, and on 10 Aug., Fernandez was installed. His government contributed to the material progress of the country. A revolt that broke out in October, 1884, in favor of the expelled Jesuits, was promptly quelled. Before the expiration of his term Fernandez died, and Vice-President Bernardo Soto succeeded him.

FERNÁNDEZ DE CASTRO ANDRADE Y PORTUGAL, Pedro Antonio, count of Lemos, marquis of Sarria and duke of Taurisano, viceroy of Peru, b. in Madrid, 1634; d. in Lima, 6 Dec., 1672. He was educated for the army and enjoyed high favor at court. He was appointed viceroy of Peru by King Charles II. in 1666, and arrived in Lima, 21 Nov., 1667. Soon after his arrival the rebellion of the brothers José and Gaspar Salcedo, rich miners of the province of Paucarcolla, which had begun in 1665, took such proportions that Lemos resolved to go personally to the seat of disturbance. He soon subdued the rebels, and instituted a court, which condemned the chief, José Salcedo, with forty-one others, to death. Gaspar Salcedo was banished for six years, and condemned to a fine of 12,000f. and costs. This sentence was appealed to Spain and reversed, Gaspar Salcedo was set at liberty and fine and costs returned to him, and the natural son of José, a captain of the same name, was in 1703 given by Philip V. the title of marquis of Villarica. Notwithstanding that the injustice committed by Lemos was generally acknowledged, there was in 1679 printed at Lima a work entitled "Estatera juridica en defensa del virey conde de Lemos y del Oidor Ovalle sobre la muerte del maestre de campo Don José Salcedo en 1668." The viceroy had the city of Laycacota, consisting of about 3,000 inhabitants, entirely destroyed, and made Puno capital of the province. After this campaign he visited the provinces of Chucuito and Cuzco, and returned to Lima in 1669. During his absence in campaign, for the first time in the history of the New World, he did not leave the government in the hands of the Andiencia, but appointed his wife, Ana de Borja, a daughter of the Duke of Gandia, regent. He was a fervent Catholic, and entirely in the hands of the Jesuits, going to such an extreme that in the building of the temple of Los Desamparados, near the bridge of Lima, he daily carried building material as a common laborer, and often served as clerk or sacristan at mass with Father Castillo. In the early part of 1670 the news arrived at Lima that the famous English privateer Morgan had taken Chagres, captured Panama, and sacked the city. The viceroy fitted out an expedition of eighteen vessels with nearly 3,000 troops, but it arrived in Panama too late, as Morgan had evacuated the city. Later in the same year renewed rumors of a foreign invasion kept the country alarmed, and the viceroy ordered all the Pacific ports to be put in a thorough state of defence. The new church of Los Desamparados was finished and opened 30 Jan., 1672, and this, as well as the canonization of St. Rosa toward the end of the year, was celebrated by the viceroy with great splendor, but in the last he contracted a sickness of which he died in a few days.

FERNÁNDEZ DE CÓRDOVA, Diego, marquis of Guadalcazar and count of Posadas, viceroy of Mexico and Peru, b. in the last quarter of the 16th century (place unknown); d. in Guadalcazar about 1650. He was a descendant of Gonzalo de Cordova, and was educated for a military career.

In his youth he fought valiantly in the wars of Flanders, and in 1612 was appointed viceroy of Mexico. During his administration in 1613, the engineer Adrian Boot began the works for the drainage of the valley of Mexico, in 1614 the city of Lerma was founded, and in 1616 the Tepehuan Indians revolted, killing their missionaries, but Fernandez soon conquered them. During 1614 there were rumors of the approach of a Dutch fleet in the Pacific, and Fernandez fortified the port of Acapulco. He also equipped three warships there, which, after the fears of war had been dispelled, he sent in March, 1615, on an exploring expedition to the coast of California. In 1620 the aqueduct of the city of Mexico was finished, consisting of 900 arches and costing 250,000f. In 1621, shortly before the death of Philip III., Fernandez was appointed viceroy of Peru, but the sickness and death of his wife detained him for some time, and he did not reach Lima till 25 July, 1622. In 1623, when the war between Spain and Holland was renewed and there was danger of an invasion by a Dutch fleet, the viceroy ordered all important points to be fortified with the greatest activity, and gave a military organization to all the inhabitants of the coast. Fernandez remained personally for four months in Callao, and put everything in good state of defence. Early in 1624 the Dutch fleet, consisting of eleven vessels with 294 guns and 1,600 troops, under command of Admiral Jacob Clerk, appeared before Callao, and anchored at the island of San Lorenzo. The Dutch admiral sent a fire-ship against the boom and chain at the entrance of the harbor, but an unfavorable wind took it to the beach at some distance from the town, where it exploded without doing great damage. Repeated attacks and bombardments of the port were successfully repulsed by the forts and two men-of-war, the "Loreto" and "San Bartolomé," anchored in the bay. Admiral Clerk sent several expeditions against other points of the coast without notable results, and died on board his fleet. His successor, after five months of fruitless hostilities, abandoned the coast and returned to Europe. During the rest of the year Fernandez applied himself to the improvement of his government, founded the monastery of Santa Catalina in Lima, and ordered barracks to be built at Callao for the lodging of negro-slaves arriving from Africa, who had previously been kept by their importers in open camps till their sale. In 1625 he appointed his nephew, Luis de Cordova y Arce, governor of Chili, and when, in 1626, the order arrived from Madrid to take up again the warfare against the Araucanians, Fernandez sent re-enforcements and ammunitions to Chili from Callao. In 1625, Fernandez also succeeded in quelling the civil warfare between the rival factions of the Biscayans and Vicuñas in Potosi, which had lasted for three years, and on 19 Oct. of the same year the new cathedral at Lima, which had been finished by the viceroy, was consecrated. Fernandez also hastened during his administration the construction of the cathedrals of Cuzco, Arequipa, and Guamanga. In 1626 he established the university of San Pedro Nolasco, and in the same year regulated the mail service. He had the bridge over the Apurimac river established at the most convenient point, constructed another at Chancay, and also ordered a yearly visit by one of the supreme judges through the court district to remedy the abuses committed by the judges, priests, and Spaniards generally against the Indians. Fernandez collected all official letters, informations, orders, and consultations during his administration in Mexico and Peru from 1612 till 1628 in three volumes, and sent them to the council of the Indies, besides the official information given to his successors. On 14 Jan., 1629, the new viceroy arrived, and Fernandez delivered to him the government and returned to Spain, where he resided in a palace which he had built in the town of Guadalcazar, near Cordova.

FERNÁNDEZ DE PIEDRAHÍTA, Lucas, South American historian, b. in Bogota in 1624; d. in Panama in 1688. He studied in his native city in the Jesuit college of San Bartolomé, and finished his education in the University of Santo Tomas, where he was graduated as doctor of theology in 1647. During his academical years he published several dramas, which have not been preserved. In 1654 he was appointed prebendary of the cathedral of Bogota, became successively its canon, treasurer, and precentor, and was vicar-general and governor of the archbishopric during the vacancy of the see. He was at the same time the favorite preacher of the city, and this, with his literary merit, obtained for him the friendship of the president of New Granada, Dionisio Pérez Manrique, who arrived from Spain in 1654. In 1660 he was elected dean of the cathedral of Popayan, and in 1663 went to Spain on a commission from the president, staying in Madrid for six years and employing his leisure time in writing his work "Historia del Nuevo Reino de Granada," for which he, as a descendant on the maternal side of the Peruvian Incas, had a special vocation. His work is considered, together with Garcilaso de la Vega's, as the most reliable history of the conquest and of the 17th century, especially as regards New Granada and Ecuador. It was not completed, as after the publication of the first part (Antwerp, 1688) the author died, and it is not known what became of his manuscript. In Spain he was offered the bishopric of Santa Marta, confirmed by the pope, and in 1669 sailed for Cartagena, where he was consecrated. He began to visit, evangelize, and partly civilize the savages in his diocese, and began to rebuild in stone his cathedral which had been constructed of wood and straw. He distributed his whole revenue in charities, and lived in poverty. In 1676 he was promoted to the bishopric of Panama, but before he could leave Santa Marta this city was taken and sacked by the buccaneers Duncan and Cos. The churches were pillaged, the bishop taken prisoner, and the pirates, believing his poor apparel to be a sign of avarice and miserly habit, subjected him to torture, to find out the hiding place of his money and jewelry. As he was unable to pay his ransom he was carried as a pris-

oner to the island of Providence and delivered to the buccaneer chief Morgan. This chief was moved by the venerable appearance of Fernandez, set him at liberty without ransom, and, hearing that he had been appointed bishop of Panama, made him a present of a costly chalice and pontifical robe which had fallen to his share in the sack of Panama in 1670, and conducted him with the greatest respect in one of his ships to Chagres. Scarcely had Fernandez arrived in Panama when he began preaching to the wild tribes of the Isthmus of Darien, spending his whole income in this task. His sermons were heard not only in the pulpit, but also weekly in the streets and public squares of Panama, until he died, poor but venerated by all.

FERNÁNDEZ LIZARDI, José Joaquín, Mexican author, b. in the city of Mexico in 1771; d. there in June, 1827. He was graduated in 1787 at the University of Mexico as bachelor, and in 1789 as licentiate. In 1812 he was deputy magistrate of Tasco, Guerrero, and as such delivered to the revolutionary chief Morelos all the arms and ammunition in that place on 1 Jan. In the same year he moved to the city of Mexico, and began to publish the newspaper "El Pensador Mexicano" (The Mexican Thinker), under which name Fernandez is now generally known. In this paper he advocated free schools and compulsory education, and one of his articles, in which he censured the decree of the viceroy Venegas depriving the revolutionary priests of the right to be judged in clerical courts, caused his imprisonment for seven months. As soon as he regained his liberty in 1813 he published several articles on the plague, at that time ravaging Mexico, and in the following three years published many reviews, the best of which is called "Alacena de Frioleras" ("The Locker for Trifles"). He also published at this time his most famous work, "Periquillo Sarniento" (1816; new ed., illustrated, 2 vols., Mexico, 1884), a collection of fables (1817), and "La Quijotita and Ratos Entretenidos" (1819). After the Spanish constitution was re-established in Mexico, Fernandez published several pamphlets, one of which, a dialogue between Chamorro and Dominiquin, caused his imprisonment for the second time. In the next year he published a paper called "El Conductor Eléctrico," and a series of articles, "Conversaciones del Payo y el Sacristán." His defence of the freemasons (1822) caused his excommunication, but, undaunted by the prosecution of the clergy and reactionary party, he published a second defence, his "Cartas del Pensador al Papista," and "Defensa del Pensador dirigida al Provisor," and "Ataque al Castillo de Ulúa," and a political-moral paper called "El hermano del Penco" (1823). He had to suffer many prosecutions, and often to struggle with poverty, but the lower classes adored him and shared their bread with him. He also published two novels, "Noches Tristes y Dia Alegre" (1823), and "Vida y Hechos del Famoso Caballero Don Catrin de la Fachenda" (Mexico, 1832).

FERNÁNDEZ MADRID, José, South American poet, b. in Cartagena, Colombia, 9 Feb., 1789; d. in Barnes-Terrace, near London, England, 28 June, 1829. In 1810 the University of Bogotá conferred on him the degrees of doctor of laws and doctor of medicine. He was active among those who took part in the war for independence, was elected deputy to the convention of Cartagena in 1811, and then representative to the congress of New Granada. He distinguished himself in the assembly, and became its president. When the government of the united provinces of New Granada was established in 1814, Madrid became representative for Cartagena, and filled the office until 1816. He succeeded Camilo Torres in the presidency of the republic, 14 March, 1816, under critical circumstances. The country was overrun with Spanish troops, and he was obliged to retreat before them to Popayán. He refused to surrender to the Spanish colonel, Latorre, and continued fighting valiantly against superior numbers, until he was finally obliged to resign the presidency to the congressional commission which accompanied him. The patriots were then defeated by Samano, their forces annihilated, and Madrid sought safety in flight, but was soon taken prisoner and transported to Havana in 1816. He lived there several years, supporting himself by practising medicine, but in 1825 he returned to Colombia. He became the confidential agent of the Colombian government in Paris, and at the time of his death in June, 1830, was minister to England. He published a collection of poems under the title "Las Rosas" (Havana, 1822); two tragedies, "Atala" (1822), and "Guatimozin" (Paris, 1827); and articles on "Cultivation," "Commerce," "The Cultivation and Manufacture of Tobacco in Cuba," and "Goitres"; medical notes on "The Yellow Fever," which have been translated into French; a metrical translation of Delille's "Les trois règnes de la nature," and numerous other works. — His son, **Pedro,** author, b. in Havana, Cuba, in 1817; d. in Serrezuela, Colombia, 7 Feb., 1875, received his early education in Havana and Colombia, completing it in the University of Oxford, England. After his return to Colombia in 1842 he was president of the state of Boyaca, member of the Federal congress, and for many years sub-secretary of foreign relations, but declined repeatedly to accept a portfolio himself, as he preferred to lead a studious life, teaching in different colleges and at the University of Bogotá, where he occupied the chair of philosophy and foreign languages. He was of very delicate constitution, and several years before his death failing health forced him to retire to the small village of Serrezuela, in the mountains, about twenty miles from Bogotá, where he died. He contributed several articles to periodicals in Bogotá, on international law, and the territorial rights of Colombia in the question of boundaries with the neighboring republics, of which he had made a profound study, and he also published works on "Nuestras Costas Incultas" and "La Costa de Mosquito."

FERNÁNDEZ-PEÑA Y ANGULO, Juan A. Ignacio, Venezuelan archbishop, b. in Merida in March, 1781; d. in Caracas, 18 Jan., 1849. He studied in the university of his native city, and was graduated as doctor in divinity in 1805 in Bogotá. He was then appointed to several parishes in the provinces of Barinas and Mérida, but, without neglecting his parochial duties, took an active part in the movement for the independence of South America, and in 1811 was sent by the province of Barinas as deputy to the first congress of Venezuela. During the whole struggle for independence he gave his services to his country as a member of the different legislatures of the united republics of Colombia, and, after the erection of Venezuela as an independent republic in 1830, was a deputy to the constituent congress for one legislative period. He served as professor of theology and ecclesiastical law, and afterward as rector of the University of Merida, and was prebendary, dean, and vicar-general of the cathedral of that city. His merits were acknowledged by congress by his nomination on 24 Jan., 1840, as archbishop to the vacant see of Caracas, and he was

consecrated, 2 Jan., 1842, in the cathedral of Pamplona, Colombia. He made many improvements during the eight years of his episcopacy.

FERNOW, Berthold, author, b. in Inowraclaw, province of Posen, Prussia, 28 Nov., 1837. He was the son of Edward Fernow, a royal councillor, and Bertha de Jachman, sister of the vice-admiral of that name. He was educated at the royal gymnasium of Our Lady at Magdeburg, Saxony, and at a similar institution at Bromberg, Posen, in 1858. He then emigrated to the United States, served during the civil war as lieutenant of the 3d U. S. colored troops, and subsequently as topographical engineer. At present he is one of the state librarians, keeper of the historical records at Albany, N. Y., and the editor of the 12th, 13th, and 14th volumes of "Documents Relating to the Colonial History of New York" (Albany, 1877–'85); "State Archives" (vol. i., 1887); and "Albany and its Place in the History of the United States" (1887). Mr. Fernow has also contributed to the "Narrative and Critical History of America," and has written many magazine articles on historical subjects.

FERRAND, Marie Louis, Baron and Count de, governor of Santo Domingo, b. in Besançon, France, 12 Oct., 1753; d. in Palo Hincado, Santo Domingo, 7 Nov., 1808. After finishing his military studies he joined his brother, who was pharmacist-in-chief of the French army, then on its way to the United States under the command of Rochambeau. As a volunteer, he fought through the war of American independence, and became a member of the Society of the Cincinnati. On his return to France he entered a regiment of dragoons. In 1792 he was promoted to a lieutenancy, and in 1793 was made captain. Shortly afterward he was arrested and imprisoned as a royalist, but was liberated and made brigadier-general, serving with distinction in the army of the west. After the peace of Amiens in 1802, he was made governor of Valenciennes. When Bonaparte resolved to reconquer Santo Domingo, the Spanish part of which had just been ceded to France, Ferrand requested to be allowed to join the expedition. After a four months' campaign the French army under Gen. Leclerc had succeeded in completely conquering the island, when the arrest of Toussaint L'Ouverture caused the insurrection to break out afresh. Gen. Leclerc died of the yellow fever after a few hours' illness, and the French, demoralized by disease and divided by the quarrels of their generals, were fleeing before the negroes under Dessalines. Gen. Ferrand tried to defend the French part of the island with his brigade, but was forced to retire to the city of Santo Domingo, the command of which was unanimously offered to him. Dessalines, at the head of an army of 22,000 men, soon invested the city, but after several bloody combats Ferrand obliged him to raise the siege, 18 March, 1803, and for three days pursued the wreck of his army. Ferrand, holding thenceforward undisputed possession of the Spanish part of the island, devoted himself to improving the condition of the unfortunate Spanish colonists. He was made by Napoleon in 1804 lieutenant-general, and then captain-general, of the island, and had full authority to carry out all his plans for reform. He abolished the system of tithes and ecclesiastical rents which until then had been collected for the profit of the state, and by this means encouraged the reclaiming of uncultivated lands. He also fitted out numerous privateers for the purpose of preying on English commerce. He was also created successively baron, count of the empire, and grand commander of the legion of honor. At this time news arrived of great political changes in Spain. The governor of Porto Rico first enlightened Ferrand on this point by a declaration of war. The latter, deprecating the useless shedding of blood, tried to persuade the Spaniard that it was to their mutual interest to live in peace, and to avoid espousing the dissensions of the mother countries. The governor of Porto Rico, however, proceeded to incite an insurrection at Barahonda in October, 1808, and Ferrand was forced to take arms in defence. His army at this time was reduced by disease to about 900 men. He despatched two successive detachments of 125 men each to put down the rebellion, and in the mean time decided to meet the troops just disembarked by the governor of Porto Rico. This movement was strongly opposed by the inhabitants of Santo Domingo, who feared for his safety, but he persisted, and met the enemy, 7 Nov., 1808, at Palo Hincado, with but 500 men to oppose to their 3,000. The first attack was favorable to Ferrand, but an assault of the enemy's cavalry turned both wings of the French corps, and a complete rout ensued. The greater part of the French were killed, and Ferrand, who was on the point of falling into the hands of the enemy, shot himself in despair. His head was cut off on the battle-field and borne in triumph on a pike. Later the Spanish government repudiated this treatment, and paid suitable honors to the remains of the French general. The death of Ferrand was a mortal blow to the prosperity of Santo Domingo. It never again enjoyed a government so capable and at the same time so beneficent. The body of Ferrand was taken to France by his aide-de-camp, Lieut.-Col. Gilbert Guillermin, who in 1815 was one of the seventeen survivors of the 42,000 men that Gen. Leclerc took with him to Santo Domingo in 1802. See "Histoire du Comte Ferrand," by A. de Lacaze (1855), and a similar work by Ferdinand Denis (1850).

FERREIRA, Alexandre Rodrigues (fer-ray'-e-rah), Brazilian traveller, b. in Bahia, Brazil, 27 April, 1756; d. in Lisbon, Portugal, 23 April, 1815. He studied at Coimbra, where he became professor of natural history in 1770. In 1778 he was appointed by the Portuguese government to make researches into the geography and natural history of the region known under the general name of Amazonia. He went to Lisbon, where his instructions awaited him, but his departure was delayed five years, on account of various missions in which the government employed him. The Academy of sciences of Lisbon admitted him to membership on 22 March, 1780. Having completed his preparations, Ferreira embarked at Lisbon, and landed at Santa Maria de Belem on 17 Oct., 1783. He began his labors by the exploration of the island of Marajo or Joannes, and returned to the main-land in 1784 to follow up the great tributaries of the Amazon. He subsequently penetrated into territories that had been completely unknown, and traversed the Sierra de Cuamuru, the Matto-Grosso, the district of Cuyaba, and many other regions to which names had not been given on the imperfect maps of the time. He also made the Indian race a study from a physiological and ethnographical point of view. Discussions had arisen between the cabinets of Lisbon and Madrid concerning the boundary-line of their respective possessions in South America, and Ferreira received orders to decide the question. He spent nine years—from 1783 till 1792—in his investigations, and, after re-establishing the original boundary, continued his labors, suffering the greatest hardships. He returned to Belem in July,

1792, and in March, 1793, to Lisbon, where he was employed in the ministry of marine. He was named in 1796 administrator of the royal cabinet of natural history at Lisbon, and of the botanical gardens attached to it, which he established. But he felt the confinement of this new mode of life, his health failed, and he died suddenly in 1815. The Portuguese government had spent large sums of money in designs and engravings for the works of Ferreira on the Amazons. His death put a stop to their publication, but during more than half a century ethnographical designs taken from his manuscripts continued to appear. Almost all the maps and several of the memoirs, prepared by Ferreira himself, are now lost. His manuscripts, deposited in the archives of the Academy of sciences of Lisbon, have been stolen. The published engravings and maps of his travels now form a part of the collection made by Dom Pedro II., emperor of Brazil. Ferreira is often called the "Brazilian Humboldt." His memoirs include "Descripção da gruta do Inferno, feita em Cuyabá"; "Propiedade e posse das terras do Cabo do Norte pe la Corôa de Portugal; memoria escripta no para em 1792"; and "Viagem a gruta das Onças."

FERREIRA DE ARAUJO GUIMARAES, Manoel (fer-ray'-e-rah), Brazilian soldier and author, b. in Bahia, 5 March, 1777; d. there, 24 Oct., 1838. He went to Portugal to finish his education, and was matriculated at the royal naval academy in 1798. As soon as he had finished his course he was appointed assistant professor of that school, and given the commission of lieutenant. Subsequently he lectured on mathematics, worked for the military society, and published a translation of the work "Analyse de Cousin," but afterward returned to Bahia, where the captain-general of Brazil took him under his protection. Soon afterward he was called to Rio Janeiro and appointed captain of the engineer corps. He organized the naval academy, and opened its classes on 1 March, 1809, and in 1811 became director of the military academy. In 1813 he was promoted to major, and began the editorship of "La Gaceta do Rio de Janeiro" and "Patriota." In 1821, when he had attained the rank of colonel, he asked to be relieved from the direction of the academy, and also ceased his connection with the "Gaceta." Wishing to dedicate himself to the cause of independence, he began the publication of the paper "Espelho." In 1823 he was elected to the Brazilian legislature as a representative from Bahia, was a member of the navy and war commission, and took charge again of the military academy. In 1824 he was made chief of the topographical committee. In 1826 he again became editor of the "Gaceta do Rio de Janeiro," and was promoted brigadier of engineers. Although Ferreira had retired from public service in 1831, the government of Bahia persuaded him to accept the chair of geometry and mechanics at the naval school. On 7 Nov., 1837, a republican revolution began, and, although Brigadier Ferreira remained loyal to his government, his son took part in the movement and was court-martialed, 23 June, 1838. Young Ferreira was ably defended by his father, but was sentenced to death and executed, and the elder Ferreira did not long survive him. He published text-books on astronomy and geodesy (1811), geometry, and applied mechanics (1835).

FERREL, William, scientist, b. in Bedford, now Fulton, county, Pa., 29 Jan., 1817. He studied at Marshall, now Marshall and Franklin, college, and was graduated at Bethany college in 1844. In 1857 he became assistant in the office of the "American Ephemeris and Nautical Almanac," which place he retained for ten years. Subsequently, until 1882, he held a special appointment in the U. S. coast survey for the discussion of the tidal observations. In 1882 he was made assistant, with the rank of professor, in the signal service bureau, where he remained until October, 1886, after which he made Kansas City, Mo., his home. He invented the maxima and minima tide-predicting machine, which is now used by the coast survey in predicting tides. A full description of this machine is given in Appendix 10 of the "Report of the Coast and Geodetic Survey" (1883). Prof. Ferrel has received honorary elections to Austrian, English, and German meteorological societies, and in 1868 was elected to membership in the National academy of sciences. His contributions to science include "Motions of Fluids and Solids relative to the Earth's Surface" (1859); "Determinations of the Moon's Mass from Tidal Observations" (1871); "Converging Series expressing the Ratio between the Diameter and the Circumference of a Circle" (1871); "Tidal Researches" (1874); "Tides of Tahiti" (1874); "Meteorological Researches," Parts I. (1875), II. (1878), and III. (1881); "Temperature of the Atmosphere and the Earth's Surface" (1884); and also "Recent Advances in Meteorology," being Part II. of the "Report of the Chief Signal Officer" (Washington, 1883).

FERRELO, or **FERRER, Bartolomé,** Spanish navigator, b. in Bilbao, Spain (according to Lorenzana, in Coimbra), in 1499; d. in Mexico in 1550 (according to Herrera, in 1548). He was the pilot of João Rodrigo Cabrillo, a Portuguese captain in the service of Spain, who was sent with two ships in 1542 by Mendoza, the viceroy of Mexico, to make discoveries to the north of California. The expedition started on the 27th of June from the port of La Navidad, and sailed along the coast up to Punta del Año-Nuevo, 37° 10′ north of Monterey. The vessels were tossed about, and often separated from each other by the bad weather, and Cabrillo died, on 3 Jan., 1543, on the island of San Bernardo, near the channel of Santa Barbara; but Ferrero, who succeeded him in command, continued his discoveries northward up to lat. 43°, where he saw the coast of Cape Blanco, called by Vancouver, Cape Orford. Excessive cold, want of provisions, sickness, and the unsoundness of his vessel, forced him to return without reaching the parallel mentioned in his instructions. At 41° 30′ he perceived a point of land to which, in honor of the viceroy, he gave the name of Cape Mendocino. From this point he sailed back to La Navidad, situated at 19° 45′, where they arrived, 14 April, 1543, and established the fact that the coast was one continuous line between these two points. In this voyage the Spaniards often saw the natives of the country, who were almost naked, painted their faces, lived by fishing, and inhabited large houses. A full account of the expedition is found in the "History of the Indias," by John van Laët. Humboldt, in his work on Mexico, corrects several erroneous statements of the Dutch historian, which were drawn from the works of old Spanish writers, basing his corrections on certain documents that he had occasion to examine in Mexico.

FERRER, Rafaél (fer-rer'), Spanish missionary, b. in Valencia in 1570; d. in San José, Peru, in 1611. He entered the order of the Jesuits, against the wishes of his father, who wished his son to follow a military career. He went to Quito in 1593 and became a missionary among the Cofanis, a warlike mountain tribe, who had done much damage by their frequent incursions. In 1601, with no other arms than his cross and his

breviary, he penetrated into their territory. On 29 June, 1603, the mission of "San Pablo and San Pedro" of the Cofanis was regularly organized. In 1604 three other villages were brought under the influence of civilization, and the Cofanis ceased to be the terror of the Spanish government. Colonists, as a consequence, poured into the adjacent territory. The viceroy of Quito ordered Ferrer in 1605 to civilize the unconquered tribes along the river Napo, and to make a chart of the basin of that stream. He advanced more than 3,600 miles into the interior, and met with a friendly reception. He also made a map of the places he had traversed, and brought back a tolerably complete herbarium of the plants that he had found, and presented it to the viceroy of Quito. This voyage of exploration lasted thirty-one months. After resting at his mission among the Cofanis he returned to Quito from the north and traversed a hitherto unexplored forest, of which he made a plan. He discovered a large lake and the river Pilcomayo, which, on account of its navigability, was of much service to the colonization of that country. At Quito he received the title of "Chief of the missions of the Cofanis," and was, besides, appointed governor and chief magistrate of the Cofanis. When Father Ferrer returned to his missions in 1610 he devoted himself to the civilization of the few tribes of the Cofanis that up to this time had not come within his influence, and met his death at the hand of a chief whom he had obliged to renounce polygamy. The savage surprised Father Ferrer as he was walking in the neighborhood of San Jose, and cast him from a narrow rock which was used to bridge a torrent. The murderer was massacred by the other Cofanis as soon as they learned of his deed. The account of the explorations of Father Ferrer never saw the light, and the original manuscript was lost. An extract from it was published in the collection of the "Lettres Edificantes" by Father Dettre, published in the last century and reprinted in 1840. Besides this, Father Bernard de Bologne published in the "Bibliotheca Societatis Jesu" the same extract under the title "Relations du père Ferrer de ses voyages dans l'Amazonie et des missions qu'il a fondées en la nation Cofane" (1763), followed by a notice of Ferrer's life. Father Ferrer published "Arte de la Lengua Cofana" (Quito, 1642), and he translated into the language of the Cofanis the catechism, and selections from the gospels for every Sunday in the year. The original manuscript of this translation was discovered in a Spanish convent, and published in Paris.

FERRER, Ventura P., Spanish author, b. in Havana, Cuba, 18 March, 1772; d. there in 1857. He studied in his native city and then went to Spain, where in 1794 he obtained a place among the lifeguards of the king. In 1800 the Madrid government sent him to Mexico on a special commission, and, after fulfilling it, he returned to Spain. In 1805 he was appointed to fill a high office in Cartagena, Colombia, where he founded a society for the propagation of science and literature, and established a printing-house and a newspaper. In 1821 he went to Havana, where he was assigned an office in the finance department of the government, and introduced many important reforms. He published "Viaje á la Isla de Cuba," being vol. xx. of "El Viajero Universal" (Madrid, 1793); "Historia de los Dictadores de Roma" (Cartagena, 1817); "Balanza General del Comercio," the first work of this class ever printed in Cuba (Havana, 1826); "Arte de Vivir en el Mundo" (1830); and several translations from Latin, French, and Italian.

FERRER-MALDONADO, Lorenzo, Spanish navigator, lived in the 16th century. According to Leon Pinelo, he submitted to the council of the Indies a new method of ascertaining longitude, for which a premium of 2,000 ducats had been offered, but his invention seems to have failed, as the premium was not awarded to him. In 1588 he sailed from Acapulco with an expedition to discover a northeast passage to the Atlantic, and on his return wrote "Relacion del Descubrimiento del Estrecho de Anian en 1588," the manuscript of which found its way into the library of the bishop of Segovia and state councillor of Portugal, Geronimo Mascareños. A copy was presented to the French geographer, Buache, who read a memoir concerning it in the Academy of sciences in Paris, 13 Nov., 1790. There is a copy of both papers in the twenty-third volume of manuscripts of the library of the metropolitan church of Mexico. This "Relacion" gave rise to the subsequent explorations of Fuca and Bartolomé Fuentes, but was full of fantastical descriptions, and Ferrer's whole book has been branded as a tissue of improbabilities and downright falsehoods. Ferrer's other work is of a better character, and was printed and published under the title of "Imagen del Mundo sobre la Esfera, Cosmografía, Geografía y Arte de Navegar" (Alcala, 1626).

FERRERO, Edward, soldier, b. in Granada, Spain, 18 Jan., 1831. His parents were Italian, and he was brought to the United States when an infant. His father's house in New York was frequented by Italian political refugees, and he enjoyed the friendship of Garibaldi, Argenti, Albius, and Avazzana. Before the civil war the son conducted a dancing-school, and also taught dancing at the U. S. military academy. At the beginning of the war he was lieutenant-colonel of the 11th New York militia regiment. In 1861 he raised the 51st New York regiment, called the "Shepard rifles," and led a brigade in Burnside's expedition to Roanoke Island, where his regiment took the first fortified redoubt captured in the war. He also commanded a brigade at Newbern, and under Gen. Reno, and in 1862 served in Pope's Virginia campaign. He was in the battles of South Mountain and Antietam, and for his bravery in the latter engagement was appointed brigadier-general, 19 Sept., 1862. He served at Fredericksburg and at Vicksburg, commanded the 2d brigade of Gen. Sturgis's division, 9th army corps, and a division at the siege of Knoxville. He afterward marched the 9th corps over the mountains, without roads and by compass only, to Cincinnati. Ferrero was in command at the defence of Fort Sanders against the desperate assault of Longstreet, and at the battle of Bean's Station, under General Shackleford, by his timely occupation of Kelley's Ford, frustrated Longstreet's attempt to send a detachment across the Holston, and so paralyze the National forces by striking them in the rear. In Grant's final campaign, including the siege of Petersburg, he commanded the colored division of the 9th corps. He was brevetted major-general, 2 Dec., 1864, and mustered out in August, 1865.

FERREYROS, Manuel B. (fer-ray′-e-ros), Peruvian statesman, b. in Lima in 1793; d. there in 1872. He was employed in the treasury offices of the Spanish government in his native city from 1816 till 1821, but, when the viceroy Laserna retired into the interior and independence was proclaimed, 28 June, 1821, Ferreyros joined the patriots and soon became active in politics. In 1822 he was elected deputy to the first constituent congress of Peru, appointed secretary by his colleagues,

and was conspicuous in opposing the reactionary movement of that year, tending to re-establish the Spanish authority in Lima. In 1825 he represented Peru as envoy extraordinary in Colombia, and in 1830 was minister plenipotentiary to Bolivia. In 1835–'8 he strenuously opposed the Peru-Bolivian confederation, and on its disruption on 20 Jan., 1839. he was elected deputy of the new constituent congress of Huancayo, and nominated its president. He was again plenipotentiary to Bolivia in 1840, to the general American congress in 1847, to Chili and New Granada in 1848, to Ecuador in 1858, and deputy to congress in 1860. In the intervals he occupied several times the ministry of the interior, the treasury and foreign relations, was councillor of state, director-general of customs, and for ten years director of public instruction, in which capacity he remodelled the whole system, and introduced valuable reforms in the faculty of philosophy, arts, and law. He also contributed to journals in Lima, and as president of several scientific and literary commissions contributed powerfully to the intellectual development of his country. He was an accomplished linguist and book collector, and left one of the most complete libraries in South America.

FERRIER, James, Canadian senator, b. in Fifeshire, Scotland, 22 Oct., 1800. He was educated in his native country, came to Canada in 1821, and engaged in mercantile pursuits in Montreal. He became a member of the corporation of that city in 1841, mayor in 1847, and lieutenant-colonel of militia the same year. He was appointed a member of the board of the Royal institution for the advancement of learning in 1845, was subsequently its president, and was elected chancellor of McGill university, Montreal, in September, 1884. He is also a member of the council of Victoria college, Cobourg. He has been a director of the Canada board of the Bank of British North America since it was first established, is chairman of the Canada board of the Grand Trunk railway company, and is connected with many other organizations. He was a life member of the legislative council of Canada from 27 May, 1847, until the union in 1867, when he was called to the senate. He was appointed member for Victoria in the legislative council of Quebec in 1867. Mr. Ferrier is a Conservative in politics.

FERRIS, Benjamin, author, d. in Wilmington, Del., in 1867. He was a watchmaker, lived for many years in Philadelphia, and was clerk of the Philadelphia meeting of Friends. He published "History of the Early Settlements on the Delaware, from its Discovery to the Colonization under William Penn" (Wilmington, 1846).

FERRIS, Isaac, clergyman, b. in New York city, 9 Oct., 1798; d. in Roselle, N. J., 16 June, 1873. He entered Columbia when but twelve years of age, joined the military company raised among the students in the war of 1812, and did duty in the forts around New York harbor. His college course was delayed one year by this, and he was graduated in 1816 with the highest honors of his class. He taught in the Albany academy one year, and then studied theology under Dr. James M. Mason, and in Rutgers seminary, was licensed to preach in 1820, and became pastor of the Reformed Dutch church in New Brunswick, N. J., in 1821. He was afterward settled in Albany in 1824–'36, and at the Market street church, New York, in 1836–'53. He went to Holland as commissioner on behalf of American missionaries in the Dutch East Indies in 1842. He was long connected with the Sunday-school union, was president of the city organization from 1837 till 1873, was the originator of the Rutgers female institute, and for a long period its principal and the president of its board of trustees for eighteen years, and was subsequently connected with the Ferris institute. In 1852 he accepted the chancellorship of the University of New York, at that time under serious embarrassment from heavy debts. He collected about $74,000, outside of the rentals and other receipts of the university, and thus relieved it from its financial embarrassments, and materially raised the standard of scholarship. He filled the chair of moral science and Christian evidence during his whole connection with the university, and was also acting professor of constitutional and international law in 1855–'69. He retired from the chancellorship in 1870, but was immediately chosen chancellor emeritus. He removed a year later to Roselle, N. J., where he resided until his death. The degree of D. D. was conferred on him by Union college in 1833, and that of LL. D. by Columbia in 1853. He published numerous occasional sermons, essays, and addresses, including "Appeal to the Ministers in behalf of Sunday-Schools" (Philadelphia, 1834), and a "Report on Separate Action in Foreign Missions" (1857).—His son, **John Mason,** clergyman, b. in Albany, N. Y., 17 Jan., 1825, was graduated at the University of the city of New York in 1843, studied theology at the New Brunswick seminary, was licensed to preach in the Dutch Reformed church in 1849, and served in various parishes from 1849 till 1865, when he was elected secretary of the Board of foreign missions. He became editor of the "Christian Intelligencer" in 1883, and treasurer of the Foreign mission board in 1886. Mr. Ferris is the author of a "History of Foreign Missions," published in the "Manual of the Reformed Church" in 1869 and 1879.

FERRY, Orris Sanford, senator, b. in Bethel, Fairfield co., Conn., 15 Aug., 1823; d. in Norwalk, Conn., 21 Nov., 1875. He was graduated at Yale in 1844, studied law, was admitted to the bar in 1846, and began practice in Norwalk. In 1847 he was appointed lieutenant-colonel of the first division of Connecticut militia, and from 1849 till 1856 was judge of probate for the district of Norwalk. He was elected to the state senate in 1855, serving two years, and in 1857–'9 was district attorney for the county of Fairfield. He was an unsuccessful Republican candidate for congress in 1856, but was elected two years later, serving in 1859–'61, and being again defeated in 1860. When the civil war began, he zealously supported the National government, and in July, 1861, became colonel of the 5th Connecticut regiment, joining Gen. Banks's corps in Maryland. He was promoted to brigadier-general, 17 March, 1862, and was assigned a brigade in Shields's division, from which he was transferred to Peck's division of the 4th army corps under Gen. Keyes. He served till the close of the war, resigned his commission, 15 June, 1865, and on 23 May, 1866, was elected U. S. senator from Connecticut, taking

his seat in March, 1867. During the latter part of the reconstruction period he opposed President Johnson, and voted guilty at his impeachment trial. In 1872 Mr. Ferry was re-elected by a coalition of Independent Republicans and Democrats, but he adhered to Gen. Grant's administration and opposed the Liberal Republican candidates at the presidential election of that year. He voted against the civil rights bill on the ground that it would prejudice the cause of public education. While in the lower house of congress Gen. Ferry served as a member of the committee on revolutionary claims, and the special committee of thirty-three on the rebellious states. While in the senate he was a member of the committees on private land claims, public buildings, and patents, and after his re-election in 1872 was chairman of the latter committee.

FERRY, William Montague, clergyman, b. in Granby, Mass., 8 Sept., 1796; d. in Grand Haven, Mich., 30 Dec., 1867. He was graduated at Union college in 1817, studied theology, and went as a missionary of the Presbyterian church to Michigan in 1821. He established a school for both whites and Indians at Mackinac, and labored successfully for twelve years. His health failing, he was obliged to seek a different employment, and in 1834 purchased with others a tract of land in the Grand River valley, where he founded a settlement and went extensively into the manufacture of lumber. He was one of the first to perceive the future value of the immense pine forests of Michigan, and extended his operations so that in a single year he shipped not less than fifteen million feet of lumber. At his death he left bequests for different benevolent objects, amounting to $120,000.—His son, **Thomas White,** senator, b. in Mackinac, Mich., 1 June, 1827, received a public-school education, and engaged in business pursuits. He was a member of the house of representatives of Michigan in 1850, of the state senate in 1856, and vice-president for Michigan of the Chicago Republican convention of 1860. He represented his state on the congressional committee that accompanied the body of President Lincoln to Springfield, Ill., served in congress from 4 Dec., 1865, till 3 March, 1871, and was re-elected but did not take his seat, having been chosen to the U. S. senate to succeed Jacob M. Howard. He took his seat in the senate, 4 March, 1871. As chairman of the committee on rules he reported a re-classification and revision of the rules of the senate, which were unanimously adopted without amendment. He was a member of the special committee of the senate that framed the resumption act of 14 Jan., 1875, was chosen president *pro tempore*, 9 and 19 March, and again 20 Dec., 1875, and by the death of Vice-President Wilson became acting vice-president, serving as such until 4 March, 1877. While acting vice-president he was called on, in the absence of President Grant, to deliver the address and preside at the Centennial celebration in Philadelphia, 4 July, 1876, and he also presided at the impeachment trial of Sec. Belknap, and over the sixteen joint meetings of congress during the electoral count of 1876–'7. He was re-elected senator, 17 Jan., 1877, and was re-elected president *pro tempore* of the senate, 5 March, 1877, 26 Feb., 1878, 17 April, 1878, and 3 March, 1879. He travelled extensively in Europe, the Holy Land, and Egypt, during the years 1883–'6.

FERSEN, Count Axel, Swedish soldier, b. in Stockholm in 1755; d. there, 20 June, 1810. He was the son of Count Axel, field-marshal of the army of Sweden, was educated at the military academy of Turin, Italy, and soon afterward entered the Swedish army. After brief service he was appointed colonel of the royal regiment of Swedes, the body-guard of Louis XVI., king of France. Count Fersen came to the United States as a member of the staff of Rochambeau, fought under Lafayette at Yorktown, and retired with the French army, after receiving from Washington the order of the Society of the Cincinnati. At the time of the treason of Benedict Arnold he wrote interesting letters to his father in Europe, which have been published, describing agreeably men and manners in the days of the Revolution. On his return to France, Count Fersen became a devoted adherent of the royal family, and in their flight from Paris was the disguised coachman of the fugitives. On their capture, Fersen escaped, and returned to Sweden, where he was made chancellor of Upsala university, became a court favorite, although he was unpopular with the people, and was promoted grand marshal of the kingdom. The sudden death of the crown-prince gave rise to the suspicion that Fersen had poisoned him, which is now acknowledged to be unfounded. At the funeral, Fersen was attacked by a mob with sticks and stones and killed, while the troops looked on with apparent indifference.

FESSENDEN, Samuel, lawyer, b. in Fryeburg, Me., 16 July, 1784; d. near Portland, Me., 13 March, 1869. His father, the Rev. William Fessenden, graduated at Harvard in 1768, was the first minister of Fryeburg, and frequently a member of the Massachusetts legislature. He also served as judge of probate. Samuel received his early education at the Fryeburg academy, and was graduated at Dartmouth in 1806. He studied law with Judge Dana, of Fryeburg, was admitted to the bar in 1809, and began practice at New Gloucester, where he rose to distinction in his profession. In 1815–'16 he was in the general court of Massachusetts, of which state Maine was then a district, and in 1818–'19 represented his district in the Massachusetts senate. For fourteen years he was major-general of the 12th division of Massachusetts militia, to which office he was elected on leaving the senate, and to which he gave much attention. He removed to Portland in 1822, and about 1828 declined the presidency of Dartmouth. He was an ardent Federalist, and one of the early members of the anti-slavery party in Maine. In 1847 he was nominated for governor and for congress by the Liberty party, receiving large votes. For forty years he stood at the head of the bar in Maine. He was an active philanthropist. He published two orations and a treatise on the institution, duties, and importance of juries. The degree of LL. D. was conferred upon him by Bowdoin in 1846.—His son, **William Pitt,** senator, b. in Boscawen, N. H., 16 Oct., 1806; d. in Portland, Me., 8 Sept., 1869, was graduated at Bowdoin in 1823, studied law, and was admitted to the bar in 1827. He practised law first in Bridgeton, a year in Bangor, and afterward in Portland, Me. He was a member of the legislature of that state in 1832, and its leading debater. He refused nominations to congress in 1831 and in 1838, and served in the legislature again in 1840, becoming chairman of the house committee to revise the statutes of the state. He was elected to congress as a Whig in 1840, serving one term, during which time he moved the repeal of the rule that excluded anti-slavery petitions, and spoke upon the loan and bankrupt bills, and the army. He gave his attention wholly to his law business till he was again in the legislature in 1845–'6. He acquired a national reputation as a lawyer and an anti-slavery Whig, and in 1849 prosecuted before

the supreme court an appeal from an adverse decision of Judge Story, and gained a reversal by an argument which Daniel Webster pronounced the best he had heard in twenty years. He was again in the legislature in 1853 and 1854, when his strong anti-slavery principles caused his election to the U. S. senate by the vote of the Whigs and anti-slavery Democrats. Taking his seat in February, 1854, he made, a week afterward, an electric speech against the Kansas-Nebraska bill, which placed him in the front rank of the senate. He took a leading part in the formation of the Republican party, and from 1854 till 1860 was one of the ablest opponents of the pro-slavery measures of the Democratic administrations. His speech on the Clayton-Bulwer treaty, in 1856, received the highest praise, and in 1858 his speech on the Lecompton constitution of Kansas, and his criticisms of the opinion of the supreme court in the Dred Scott case, were considered the ablest discussion of those topics. He was re-elected to the senate in 1859 without the formality of a nomination. In 1861 he was a member of the Peace congress. By the secession of the southern senators the Republicans acquired control of the senate, and placed Mr. Fessenden at the head of the finance committee. During the civil war he was the most conspicuous senator in sustaining the national credit. He opposed the legal-tender act as unnecessary and unjust. As chairmain of the finance committee, Mr. Fessenden prepared and carried through the senate all measures relating to revenue, taxation, and appropriations, and, as declared by Mr. Sumner, was "in the financial field all that our best generals were in arms." When Sec. Chase resigned in 1864, Mr. Fessenden was called by the unanimous appeal of the nation to the head of the treasury. It was the darkest hour of our national finances. Sec. Chase had just withdrawn a loan from the market for want of acceptable bids; the capacity of the country to lend seemed exhausted. The currency had been enormously inflated, and gold was at 280. Mr. Fessenden refused the office, but at last accepted in obedience to the universal public pressure. When his acceptance became known, gold fell to 225, with no bidders. He declared that no more currency should be issued, and, making an appeal to the people, he prepared and put upon the market the seven-thirty loan, which proved a triumphant success. This loan was in the form of bonds bearing interest at the rate of 7·30 per cent., which were issued in denominations as low as $50, so that people of moderate means could take them. He also framed and recommended the measures, adopted by congress, which permitted the subsequent consolidation and funding of the government loans into the four and four-and-a-half per cent. bonds. The financial situation becoming favorable, Mr. Fessenden, in accordance with his expressed intention, resigned the secretaryship in 1865 to return to the senate, to which he had now for the third time been elected. He was again made chairman of the finance committee, and was also appointed chairman of the joint committee on reconstruction, and wrote its celebrated report, pronounced one of the ablest state papers ever submitted to congress. It vindicated the power of congress over the rebellious states, showed their relations to the government under the constitution and the law of nations, and recommended the constitutional safeguards made necessary by the rebellion. Mr. Fessenden was now the acknowledged leader in the senate of the Republicans, when he imperilled his party standing by opposing the impeachment of President Johnson in 1868. He gave his reasons for voting "not guilty" upon the articles, and was subjected to a storm of detraction from his own party such as public men have rarely met. His last service was in 1869, and his last speech was upon the bill to strengthen the public credit. He advocated the payment of the principal of the public debt in gold, and opposed the notion that it might lawfully be paid in depreciated greenbacks. His public character was described as of the highest type of patriotism, courage, integrity, and disinterestedness, while his personal character was beyond reproach. He was noted for his swiftness of retort. He was a member of the Whig national conventions that nominated Harrison (1840), Taylor (1848), and Scott (1852). For several years he was a regent of the Smithsonian institution. He received the degree of LL. D. from Bowdoin in 1858, and from Harvard in 1864.—Another son, **Samuel Clement,** lawyer, b. in New Gloucester, Me., 7 March, 1815; d. in 1881, was graduated at Bowdoin in 1834, and at Bangor theological seminary in 1837, and was pastor of the 2d Congregational church in Thomaston (now Rockland) from then till 1856. In that year he established the "Maine Evangelist," and in 1858 studied law, was admitted to the bar, and began practice. He was elected judge of the municipal court of Rockland, and was a representative from Maine to the 37th congress, serving from July, 1861, till March, 1863. Until the rise of the Republican party he was an abolitionist. In 1865 he was appointed a member of the board of examiners of the U. S. patent-office. In 1879 he was U. S. consul at St. John's, N. B.—Another son, **Thomas Amory Deblois,** lawyer, b. in Portland, Me., 23 Jan., 1826; d. in Lewiston, Me., 28 Sept., 1868, was graduated at Bowdoin in 1845. He studied law, was admitted to the bar, and began practice in Mechanics' Falls, Me., after which he removed to Lewiston. He was a member of the convention that nominated Frémont for president in 1856, in 1858 was appointed aide-de-camp to Gov. Morrill, of Maine, and in 1860 was elected to the legislature. In 1861 he was prosecuting attorney for Androscoggin county, and was elected a representative from Maine to the 37th congress, to fill a vacancy, serving from December, 1862, till March, 1863. He was an able lawyer and eloquent speaker.—William Pitt's son, **James Deering,** b. in Westbrook, Me., 28 Sept., 1833; d. in Portland, Me., 18 Nov., 1882, was graduated at Bowdoin in 1852, studied law, and practised in Portland. He enlisted a company early in the civil war, and entered the service as captain of the 2d U. S. sharp-shooters, 2 Nov., 1861. He served on Gen. David Hunter's staff in the Department of South Carolina in 1862–'3, was present at the attack on Fort McAllister in 1862, at the operations on the Edisto, and at Dupont's attack on Charleston. He was assigned to the duty of organizing and commanding the first regiment of colored troops in 1862, but the government was not then ready to use colored troops. He was promoted to colonel in 1862, and in September, 1863, reported

Mr. P. Fessenden.

to Gen. Hooker, and was engaged in the campaign of Lookout Mountain and Missionary Ridge, and in the Atlanta campaign in 1864. He was promoted brigadier-general of volunteers, 8 Aug., 1864, ordered to Gen. Sheridan in October, and was with him at Cedar Creek. On 13 March, 1865, he was brevetted major-general of volunteers, and was on duty in South Carolina. He was appointed register in bankruptcy for the first district of Maine in 1868, and represented Portland in the legislature in 1872–'4.—Another son of William Pitt, **Francis,** soldier, b. in Portland, Me., 18 March, 1839, was graduated at Bowdoin in 1858, and studied law at Harvard and in New York. He was appointed captain in the 19th U. S. infantry on 14 May, 1861, and was severely wounded at Shiloh. From October, 1862, till July, 1863, he was colonel of the 25th Maine volunteers, and commanded a brigade in front of Washington and near Centreville, Va. He was appointed brigadier-general of volunteers, 10 May, 1864, and major-general, 9 Nov., 1865. In 1864 he was with Gen. Banks in the Red river expedition, and was present at Sabine Cross-Roads, Pleasant Hill, and Monett's Bluff, where, leading his brigade in an assault, he lost a leg. In November, 1864, he was on duty in Washington, and in 1865 was in command of the 1st infantry division, Department of West Virginia, and was afterward assigned to Hancock's 1st veteran corps. He was a member of the Wirtz military commission in Washington in 1865, and assistant commander of the bureau of refugees, freedmen, and abandoned lands in 1866. He was retired with the rank of brigadier-general in the regular army, 1 Nov., 1866. He served as mayor of Portland in 1876, but declined a renomination.—Another son of William Pitt, **Samuel,** soldier, b. in Portland, Me., 6 Jan., 1841; d. in Centreville, Va., 1 Sept., 1862, was graduated at Bowdoin in 1861. He began to study law, but soon entered the military service as 2d lieutenant in the 2d Maine battery, 30 Nov., 1861. He was promoted to 1st lieutenant, 3 June, 1862, was aide to Gen. Zebulon B. Tower in July, 1862, and was mortally wounded in the second battle of Bull Run, 31 Aug.—Samuel Clement's son, **Joshua Abbe,** b. in Rockland, Me., was appointed 2d lieutenant in the 1st U. S. cavalry, 24 March, 1862; 2d lieutenant 5th artillery, 6 Sept., 1862; 1st lieutenant, 30 Nov., 1865; captain, 26 June, 1882; and was wounded at Chickamauga.—Another son, **Samuel,** b. in Rockland, Me., was appointed 2d lieutenant in the 5th Maine battery, 18 Jan., 1865. He is a lawyer and politician in Stamford, Conn.

FESSENDEN, Thomas, clergyman, b. in Cambridge, Mass., in 1739; d. in 1813. He was the son of Rev. William Fessenden, of Cambridge, and uncle to the first Samuel. After graduation at Harvard in 1758, he became pastor in Walpole, N. H., which charge he held from 1767 till 1813. He was author of "The Science of Sanctity" (1804), and "The Boston Self-styled Gentlemen-Reviewers reviewed" (1806).—His son, **Thomas Green,** author, b. at Walpole, N. H., 22 April, 1771; d. in Boston, Mass., 11 Nov., 1837. He was graduated at Dartmouth in 1796, and during his college term wrote a ballad, entitled "Jonathan's Courtship," which was reprinted in England. He studied law in Vermont with Nathaniel Chipman, occupying his leisure in writing humorous poems and other papers for the "Farmer's Weekly Museum" of Walpole, of which Joseph Dennie was then editor. He went to England in 1801, as agent for a new hydraulic machine, which proved a failure and involved him in pecuniary difficulties. While in London he became interested in the construction of a patent mill on the Thames, in which enterprise he was completely ruined. At this time he formed the acquaintance of Benjamin Douglas Perkins, patentee of the metallic tractors, which he advertised in a poem in Hudibrastic verse, entitled "Terrible Tractoration," in which he satirized the medical faculty, who opposed the use of these instruments (published anonymously, London, 1803). Hawthorne says: "It is a work of strange, grotesque ideas, aptly expressed." The poem was enlarged and republished in New York in 1806 as "The Minute Philosopher." He returned to the United States in 1804 and settled in Boston, but afterward edited the "Weekly Inspector" in New York for two years, and in 1812 began to practise law in Bellows Falls, Vt. He removed to Brattleborough, Vt., in 1815, and was editor of the "Reporter" there, but from 1816 till 1822 conducted the "Intelligencer" at Bellows Falls. In the latter year he established, in Boston, "The New England Farmer," with which he remained connected till his death. He edited, also, "The Horticultural Register" and "The Silk Manual," and published "Original Poems"; "Democracy Unveiled" (1806); "Pills, Poetical, Political, and Philosophical; prescribed for the Purpose of purging the Public of Piddling Philosophers, Penny Poetasters, of Paltry Politicians and Petty Partisans. By Peter Pepperbox, Poet and Physician" (Philadelphia, 1809); "American Clerk's Companion" (1815); "The Ladies' Monitor" (1818); and "Laws of Patents for New Inventions" (1822). His last satire was a little poem, entitled "Wooden Booksellers." See an article on Mr. Fessenden, by Nathaniel Hawthorne, included in the volume entitled "Fanshawe, and other Pieces" (Boston, 1876).

FEUCHTWANGER, Lewis, chemist, b. in Fürth, Bavaria, 11 Jan., 1805; d. in New York city, 25 June, 1876. He was the son of a mineralogist, and inherited a taste for natural science, to which he devoted special attention at the University of Jena. After receiving his doctor's degree there in 1827, he came to the United States in 1829, and settled in New York, where he opened the first German pharmacy, and also practised medicine, being particularly active during the cholera epidemic of 1832. Subsequently he devoted his entire attention to chemistry and mineralogy, and became engaged in the manufacture and sale of rare chemicals. He introduced in 1829 the alloy called German silver, and was the first to call the attention of the U. S. government to the availability and desirability of nickel for small coins. In 1837 he issued, by permission of the U. S. government, a large quantity of one-cent pieces in nickel, and in 1864 he had struck off a number of three-cent pieces in the same metal, but they were not put into circulation. After the great fire of 1846 he called the attention of the authorities of New York to the fact that saltpetre would explode under certain conditions. This statement created much discussion; the expression "Will saltpetre explode?" became a by-word, and a play was acted at one of the theatres in which a character representing Dr. Feuchtwanger was presented. He made two large collections of minerals, one of which he exhibited in London at the World's fair in 1851, and the other, which he bequeathed to his daughters, was for a time on exhibition at the Museum of natural history in Central park, New York. Dr. Feuchtwanger was a member of scientific societies in this country and abroad, and contributed papers to Silliman's "American Journal of Science" and to the "Proceedings" of the American association for the advancement of science. He published a

"Popular Treatise on Gems" (New York, 1838); "Elements of Mineralogy" (1839); "Treatise on Fermented Liquors" (1858); and "Practical Treatise on Soluble or Water Glass" (1870).

FEUILLET, Louis Econches, French explorer, b. in Mane, near Forcalquier, Provence, in 1660; d. in Marseilles, 18 April, 1732. He studied at the college of the convent of Minimes, in Avignon, and at the early age of ten astonished his teachers by observations on astronomical subjects. On 20 March, 1680, Feuillee received holy orders and entered the convent of Minimes in order to dedicate himself exclusively to his studies. Soon his discoveries in mathematics and astronomy gave him a wide reputation, and after a voyage to the Levant with the mathematician Cassini, was sent by Louis XIV. on a scientific expedition to the Gulf of Mexico, he sailed from Marseilles, 5 Feb., 1703, and arrived at Martinique on 11 April, 1704. After recovering from an illness which had interrupted his observations, he sailed on board of a buccaneer's ship in September, 1804, and in this queer company visited Puerto Cabello, Santa Marta, Puerto Bello, Carthagena, and other points, landing for a few days wherever the vessel touched, to make observations and collect botanical specimens. He afterward returned to Martinique, and from there sailed on a second visit to Trinidad and other West India islands. He returned to France in June, 1706, and became corresponding member of the Academy of sciences, and mathematician in ordinary to the king. He sailed on a second expedition on 14 Dec., 1707, and arrived at Buenos Ayres on 14 Aug. Louis XIV. placed at Feuillet's disposal a man-of-war, to facilitate his work, and from Buenos Ayres he sailed toward Cape Horn. On 24 Dec. he observed the snowy mountains of Staten Land, and then advanced south several degrees, entering the Antarctic ocean. He determined the positions of several islands, took soundings, and drew a chart of them. In January, 1709, he sailed as far as El Callao, Peru, and made a complete chart of the Chilian coast. He penetrated the interior of Peru as far as the mountains, and then went to Lima. On 3 Jan., 1711, Feuillet reembarked and followed a new route to the southward, going beyond the 59th parallel. He then visited Havana and Puerto Rico, and arrived in France on 27 Aug., 1711, where he was received with great distinction. In 1724, Feuillet was again sent on an expedition to determine the exact position of the island of Ferro, where the French geographers had located the prime meridian. His works are "Journal des observations physiques, mathématiques et botaniques, faites sur les côtes orientales de l'Amérique méridionale et dans les Indes occidentales de 1707 à 1712" (2 vols., Paris, 1714); "Suite du journal des observations physiques" (1725). Both works are illustrated with numerous maps and plates. The journal of Feuillet and its continuation have at the end a separate work entitled "Histoire des plantes médicinales qui sont le plus en usage aux royaumes du Pérou et du Chili, composée sur les lieux par ordre du roi en 1709, 1710 et 1711." The figures of these plants, most of which were new, are drawn with delicacy and truth. Among others are the fuchsia and the datura grandiflora, which were afterward introduced into Europe. The work of Feuillet, with its hundred botanical plates, was afterward published in German (2 vols., Nuremberg, 1756–'7).

FEW, William, senator, b. in Baltimore county, Md., 8 June, 1748; d. in Fishkill, N. Y., 16 July, 1828. He was descended from William Ffew, who came to this country with William Penn. In 1758 the family settled in Orange county, N. C., where he received an excellent education. After studying law he was admitted to the bar, and began practice in Augusta, Ga. In 1776 he was chosen a member of the assembly, and was appointed one of the council. He served in the Revolutionary war as colonel, and distinguished himself in several actions. In 1778 he became surveyor-general and presiding judge of the Richmond county court. He was a delegate from Georgia to the Continental congress from 1780 till 1782, and from 1785 till 1788, and a delegate to the convention that framed the Federal constitution in 1787. In 1788 he was elected one of the first two senators from Georgia, and served in that capacity from 4 March, 1789, till 2 March, 1793. Subsequently he was judge of the circuit court in Georgia from 1794 till 1797, and a member of the convention that framed the constitution of the state of Georgia. In July, 1799, he removed to New York, and was elected to the state legislature from 1802 till 1805. Later he became United States commissioner of loans.

FICKLIN, Joseph, mathematician, b. in Winchester, Ky., 9 Sept., 1833. He was graduated at the Masonic college in Lexington, Mo., in 1858, and was principal of the Trenton, Mo., high school from 1854 till 1859. Subsequently he was elected professor of mathematics in the Bloomington, Ill., female college, which chair he held until 1860, and a similar one in the Christian female college in Columbia during 1864–'5. He then was appointed professor of mathematics and astronomy, and director of the observatory at the University of the state of Missouri, in Columbia, which places he still holds. In 1874 he received the degree of Ph. D., and ten years later that of LL. D. from the University of Wisconsin. He is a fellow of the American association for the advancement of science, and a member of the American astronomical society. Prof. Ficklin has published "The Complete Algebra and Key" (New York, 1874); "Algebraic Problems and Key" (1874); "First Lessons in Arithmetic" (1881); "Elementary Arithmetic" (1881); "Table-Book and Primary Arithmetic" (1881); "Practical Arithmetic" (1881); "Advanced Arithmetic" (1881); "National Arithmetic, with a Key" (1881); and "Elements of Algebra" (1881).

FIELD, Archelaus G., physician, b. in Ontario county, N. Y., 15 Nov., 1829. He studied medicine, and was graduated at Starling medical college in 1854, and at the College of physicians and surgeons, New York, in 1864. He became examining surgeon for pensions in 1866, and held that office for many years. He settled first in Hillsborough, Ohio, and then in Des Moines, Iowa, where he devotes himself to the practice of medicine. In 1876 he was a member of the International medical congress, and he has been president of the Iowa state medical society. His contributions to medical literature have been large, and he has published reports and addresses delivered before the Iowa and American medical societies.

FIELD, Benjamin, politician, b. in Dorset, Vt., 12 June, 1816; d. in Albion, N. Y., in August, 1876. He early settled in Albion, where he became a stone-cutter and carver. Later he obtained contracts for building railroads, thereby acquiring wealth, and was associated with George M. Pullman in the construction of his railway sleeping-cars. In 1854–'5 he was elected to the New York state senate, and in 1867 was a member of the Constitutional convention. He was a prominent member of the Republican state committee,

and was well known as a party manager, devoting the larger share of his time to the promotion of the interests of public men and the political organization of which he was a member.

FIELD, Benjamin Hazard, philanthropist, b. in Yorktown, Westchester co., N. Y., 2 May, 1814. He was educated at home and at North Salem academy, came to New York in 1832, and entered the office of his uncle, whom he succeeded in business in 1836. He retired in 1875. Mr. Field has been connected with many charities in and about New York. He was one of the incorporators of the Home for incurables, has been its president from the beginning, and has built a chapel for its use. He was president in 1886 of the historical society, an incorporator of the American museum of natural history, the Sheltering Arms, and the Society for the prevention of cruelty to children, and is president (1887) of the free circulating library and the eye and ear infirmary. He supported a high school in Yorktown, N. Y., for many years, and has been interested in educational matters. In 1887 he offered to endow a free library and home for the poor in Westchester county.

FIELD, David Dudley, clergyman, b. in East Guilford (now Madison), Conn., 20 May, 1781; d. in Stockbridge, Mass., 15 April, 1867. He was a son of Capt. Timothy Field, who had been an officer in the Revolutionary army, and subsequently settled in Guilford. Young Field was fitted for college with Jeremiah Evarts, father of William M. Evarts, under the instruction of the Rev. John Elliott. The two boys roomed together during their college course, and were graduated at Yale in 1802. Mr. Field then studied theology with the Rev. Charles Backus, of Somers, and was licensed to preach by the association of New Haven east, in September, 1803. After preaching for a short time in Somers, where he married Submit Dickinson, he accepted a call to the Congregational church in Haddam, Conn., and was ordained on 11 April, 1804. Here he remained for fourteen years, resigning in 1818, and then spent five months on a missionary tour through western New York. On his journey homeward he preached in Stockbridge, Mass., where, a few months later, he was to succeed the Rev. Stephen West. The journey from Haddam was made in wagons, filled with his possessions, and in August, 1819, he was installed pastor of the church, then the only one in the village. He ministered to this parish for eighteen years, and then returned to Haddam, and remained there until 1844. During the latter year the congregation was divided, and he took charge of the new church in Higganum until 1851, when he retired, returning to Stockbridge, where he passed his remaining days. Mr. Field received the degree of D. D. in 1837 from Williams. In 1848 he spent some months in Europe with his son Stephen. He had a natural fondness for historical research, and was at one time vice-president of the Connecticut historical society; also a corresponding member of the Massachusetts and Pennsylvania historical societies. Besides occasional sermons and historical addresses, he published "History of the County of Berkshire" (1829); "History of the County of Middlesex" (1839); "History of Pittsfield" (1844); and "Genealogy of the Brainerd Family" (New York, 1857).—His son **David Dudley,** lawyer, b. in Haddam, Conn., 13 Feb., 1805, was his eldest child, and was graduated at Williams in 1825. He studied law first in Albany with Harmanus Bleecker, but after a few months removed to New York, where he completed his studies. Soon after Mr. Field's admission to the bar, in 1828, he became a junior partner in the law firm of Henry and D. Sedgwick, with which he studied. From then until 1885 he was continuously engaged in the active practice of his profession. Mr. Field has attained special prominence in connection with his labors in the cause of law reform. As early as 1839 he wrote a "Letter on the Reform of the Judiciary System," and afterward addressed a committee of the New York legislature on the subject. In 1841 he prepared three bills, which were introduced, but the judiciary committee, to whom they were referred, failed to take any action on them. In 1846 he wrote a series of articles on "The Reorganization of the Judiciary," which were widely distributed in pamphlet-form. His influence was felt in the Constitutional convention of 1846, and their report called for a general code and the "Reform of the Practice." Before the legislature met in January, 1847, he published "What shall be done with the Practice of the Courts? Shall it be wholly Reformed? Questions addressed to Lawyers." In September, 1847, he was appointed commissioner on practice and pleadings, and as such took part in the preparation of the code of procedure. The commission reported the first installment to the legislature in February, and it was enacted in April, 1848. The remainder was reported in four sections at different times until January, 1850, when the completed "Codes of Civil and Criminal Procedure" were submitted to the legislature. Both these codes have been enacted into law. The radical design of the new system of civil procedure was to obliterate the distinction between the forms of action and between legal and equitable suits, so that all the rights of the parties in relation to the subjects of litigation can be determined in one action, instead of dividing them between different suits. This system has been adopted in twenty-four of the states and territories, and is the basis of the legal reform established by the new judicature act in England, and of the practice in several of the English colonies, including India. Eighteen of the states and territories have adopted his code of criminal procedure. For some years following the enactment of these laws he continued to publish numerous pamphlets, including the "Law-Reform Tracts," also frequent articles in the journals, and drafted bills that were introduced into the legislature for the purpose of effecting the completion of codification. In 1857 Mr. Field was appointed by the state of New York head of a commission to prepare a political code, a penal code, and a civil code. These, with the two codes of procedure previously made, were designed to supersede the unwritten or common law. They were completed in 1865, and covered the entire province of American law, and presented to the people in compact form the whole law by which they were governed. The state of New York has, as yet, adopted only the penal code, although other states have drawn largely from

the civil code in their legislation, and in California and Dakota they have adopted them in full. In 1866 he brought before the British association for the promotion of social science, at its meeting in Manchester, England, a proposal for a general revision and reform of the law of nations, similar to that which he had before undertaken in regard to the civil and criminal law. He procured the appointment of a committee, consisting of eminent jurists of different countries, charged with preparing and reporting to the association the outlines of an international code, to be first submitted to their careful revision and amendment, and, when made as complete as possible, to be presented to the attention of the different governments, in the hope of receiving at some time their approval and adoption as the recognized law of nations. The distinguished jurists composing this committee resided in different countries, and hence it was difficult for them to act in concert. In consequence, Mr. Field took the whole matter upon himself, and in 1873, after the lapse of seven years, presented to the Social science congress his "Outlines of an International Code," which attracted the attention of all jurists, and has been translated into French, Italian, and Chinese. It resulted in the formation of an association for the reform and codification of the laws of nations, also having for his object the substitution of arbitration for war in the settlement of disputes between countries. The membership includes jurists, economists, legislators, and politicians, and of this organization Mr. Field was elected first president. An eminent chancellor of England has said that "Mr. Dudley Field, of New York, had done more for the reform of laws than any other man living." Mr. Field has taken much interest in politics. Originally a Democrat, he voted with that party, although he persistently opposed its pro-slavery policy, until the nomination of John C. Frémont, in 1856, whom he supported in the presidential canvass of that year. During the civil war he was a staunch adherent of the administration, and was active with voice, pen, and purse in aid of his country. For eight weeks in 1876 he filled the unexpired term in congress of Smith Ely, who had been made mayor of New York city. He now acted with the Democratic party, and was one of the advocates on that side in the dispute over the presidential election. He has delivered numerous addresses, and has contributed very largely to current literature on political topics. His "Sketches over the Sea" appeared in the "Democratic Review" at the time of his first trip abroad in 1836, and he published "Speeches, Arguments, and Miscellaneous Papers" (2 vols., New York, 1886).—Another son, **Stephen Johnson,** jurist, b. in Haddam, Conn., 4 Nov., 1816, was not three years old when his father removed to Stockbridge, and ten years later accompanied his sister, Emilia, who had married a missionary, to Smyrna, for the purpose of acquiring a knowledge of oriental languages. On his return he entered Williams, and was graduated in 1837, standing first in his class. Subsequently he came to New York, and began the study of law in the office of his brother, David Dudley. After his admission to the bar he became a partner in the firm. This connection was severed in 1848, and he spent some time in European travel. In November, 1849, he sailed from New York for San Francisco, where he practised his profession. A few weeks later he was among those who founded Marysville, becoming its first alcalde, and continuing as such until the organization of the judiciary under the constitution of the state. He was elected a member of the first legislature held after the admission of California into the Union, served on its judiciary committee, and secured the passage of laws concerning the judiciary, and regulating civil and criminal procedure in all the courts of the state. He was also the author of the law that gives authority to the regulations and customs of miners in the settlement of controversies among them, thus solving a perplexing problem. At the close of the session he returned to Marysville, and during the ensuing six years devoted himself to his profession, gaining an extensive practice. In 1857 he was elected judge of the supreme court of California for six years, beginning with January, 1858, but, on the occurrence of a vacancy, he was appointed to fill it in October, 1857. On the resignation of Chief-Justice David S. Terry, in September, 1859, Judge Field succeeded him, and continued in office till his appointment to the supreme bench of the United States by President Lincoln in 1863. Among the prominent decisions in which he has been concerned was the famous test-oath case, in which he gave the casting vote, and wrote the opinion of the court annulling the validity of the "iron-clad" oath. His dissenting opinions in the legal-tender cases, in the confiscation cases, and in the New Orleans slaughter-house case, have also attracted attention. Judge Field was a member of the electoral commission in 1877, and voted with the Democratic minority of the commission. In 1880 his name was placed in nomination for the presidency at the Cincinnati convention, and he received sixty-five votes on the first ballot. He was appointed by the governor of California, in 1873, one of a commission to examine the code of laws of that state, and to prepare amendments to the same for legislative action. He received the degree of LL. D. from Williams in 1864, and in 1869 was appointed professor of law in the University of California.—Another son, **Cyrus West,** merchant, b. in Stockbridge, Mass., 30 Nov., 1819, received his education in his native village, and at the age of fifteen came to New York, where his brother David Dudley secured a situation for him in the employ of Alexander T. Stewart. When he attained his majority he began the manufacture and sale of paper on his own account, and in the course of a dozen years was at the head of a prosperous business. In 1853 he partially retired, and spent six months travelling in South America. The project of carrying a telegraph line across the Atlantic ocean was suggested to him during a conversation with his brother Matthew, in which aid was solicited for the construction of a telegraph route across Newfoundland. The matter was at once presented to Peter Cooper, Moses Taylor, Marshall O. Roberts, and Chandler White, who agreed to contribute $20,000 each, and the enterprise was at once organized, under the title of the New York, Newfoundland, and London Telegraph. Its counsel for the company was his brother, David Dudley, and a committee was immediately sent to Newfound-

Stephen J. Field

land to secure from the local legislature the exclusive right for fifty years to establish a telegraph from the continent of America to Newfoundland, and then to England. Mr. Field thenceforth devoted his time largely to the accomplishment of this purpose. He visited England, solicited financial aid, and finally subscribed, in his own name, for a one-fourth interest in the company. Several unsuccessful efforts were made to lay the cable, but finally communication was established in 1858. For a few weeks messages were sent from one continent to the other, and then the cable ceased to act. The civil war occupied the attention of the country for several years, and it was impossible to proceed further until its termination. Meanwhile, public interest was kept alive by the efforts of Mr. Field. He made repeated visits to England, and delivered addresses on the subject on both sides of the Atlantic. Finally, in 1865, active measures were renewed, and the steamship "Great Eastern" (see illustration) began the delivery of the cable. At mid-ocean, after 1,200 miles had been laid, the cable parted, and the vessel returned to England. In 1866 another expedition started, and on 27 July telegraphic communication was established between the two continents, and has not since been interrupted. Congress voted unanimously to present Mr. Field with a gold medal and the thanks of the nation, while the prime minister of England declared that only the fact that he was a

citizen of another country prevented his receiving high honors from the British government. John Bright pronounced him the "Columbus of modern times, who, by his cable, had moored the new world alongside of the old." The Paris exhibition of 1867 gave him the grand medal, the highest prize it had to bestow. In 1869 he attended the opening of the Suez canal as the representative of the New York chamber of commerce. He became interested in 1876 in the development of the system of elevated railways in New York city, and has devoted much of his thought and capital to their successful establishment. In 1880 he left New York for a trip around the world, and since his return has obtained concessions from the Sandwich islands for the laying of a cable between San Francisco and those islands, with a view toward ultimate extension across the Pacific ocean.—Another son, **Henry Martyn,** clergyman, b. in Stockbridge, Mass., 3 April, 1822, was graduated at Williams in 1838, studied theology in East Windsor and New Haven, Conn., until 1842, and then became pastor of a Presbyterian church in St. Louis, Mo., where he remained for five years. In 1847–'8 he travelled in Europe, and was in Paris during the revolution in February of the latter year, and also in Italy during the similar scenes a few weeks later. His observations and experiences in Rome were published in a pamphlet entitled "The Good and the Bad in the Roman Catholic Church." On his return to the United States he became well acquainted with the families of Wolfe Tone, Thomas Addis Emmet, and other Irish patriots living in New York, and was led to study the history of Ireland during the latter part of the 18th century. In consequence he published "The Irish Confederate, a History of the Rebellion of 1798" (New York, 1851). He was pastor of the church in West Springfield, Mass., in 1851–'4, and then returned to New York to become one of the editors of the "Evangelist," of which he subsequently became the proprietor. He visited Europe again in 1858 and 1867, and in 1877 made a tour around the world. Besides sermons and reviews, he has published "Summer Pictures from Copenhagen to Venice" (New York, 1859); "History of the Atlantic Telegraph" (1866); "From the Lakes of Killarney to the Golden Horn" (1876); "From Egypt to Japan" (1878); "On the Desert" (1883); and "Among the Holy Hills" (1883).

FIELD, Henry Martyn, physician, b. in Brighton, Mass., 3 Oct., 1837. He was a great-grandson of the Rev. Noah Worcester, and was graduated at Harvard in 1859. Subsequently he studied medicine, receiving his degree from the College of physicians and surgeons in New York in 1862. After serving for more than a year in the U. S. army as acting assistant surgeon, he settled in New York, where he practised for four years. In 1867 he removed to Newton, Mass., and there acquired a large general practice, making a specialty of female diseases. He was elected professor of therapeutics in Dartmouth medical college in 1872. Dr. Field was one of the corporators of the Boston gynecological society, and is an active member of several medical societies. His contributions to medical journals include principally papers on his specialty, published in transactions of various societies.

FIELD, James Gaven, lawyer, b. in Walnut, Culpeper co., Va., 24 Feb., 1826. His ancestors were identical with those of the Fields of New York. He attended for a time a classical school, and became a teacher. In 1848 he went to California, and in 1850 was elected one of the secretaries of the convention that framed the first constitution of that state. In the same year he returned to Virginia, and began the study of law, and in 1852 was admitted to the bar. He served as the attorney for the commonwealth in his native county from 1860 till 1865. During the civil war he was actively engaged in the Confederate service, and lost a leg at the battle of Slaughter's Mountain. Since the war he has been attorney-general of the state. Gen. Field is a Baptist, being a zealous and liberal promoter of all the enterprises in which that denomination is engaged.

FIELD, Joseph M., actor, b. in London, England, in 1810; d. in Mobile, Ala., 30 Jan., 1856. His parents were Irish exiles, who brought him to the United States at an early age. He was educated in the common schools of New York city, and thereafter gave his attention to the study of law. At the age of twenty-six he married, and in 1843 made his first appearance as an actor in one of the minor New York theatres. The drama soon became his regular profession, and for years he travelled and performed in most of the large cities of the Union, without attaining distinction. In 1852 Field became manager of a theatre in St. Louis, Mo., where he dramatized and produced many local plays, and established the "Reveille," a daily newspaper, of which he was one of the editors and chief proprietor. In St. Louis he wrote many humorous sketches for his brother's New

Orleans "Picayune." These articles were signed "Straws," and became widely quoted. At the time of his death Field was proprietor of the theatre in Mobile, Ala. He published "The Drama of Pokerville" (Philadelphia, 1847).—His brother, **Matthew C.**, journalist, b. in London, England, in 1812; d. at sea in 1844, was brought to the United States an infant, and, after a course of education in the common schools of New York city, entered a printing-office, where he made his way into journalism. Field occasionally acted in Mobile, New Orleans, and other southern cities. He was for several years one of the editors of the New Orleans "Picayune," and contributed numerous articles in prose and verse to southern periodicals, over the signature of "Phazma."—Joseph's daughter, **Kate,** lecturer, b. in St. Louis, Mo., about 1840, was educated in Massachusetts at various seminaries, and later gave especial attention to musical studies. She made several prolonged visits to Europe, and during her stay there became correspondent of the New York "Tribune," Philadelphia "Press," and Chicago "Tribune." She also furnished sketches for periodicals. In 1874 Miss Field appeared as an actress at Booth's theatre, New York, where she met with some success; and afterward she renewed her dramatic efforts as a variety performer of dance, song, and recitation entertainments. From 1882 until the summer of 1883 she was at the head of an extensive ladies' "Co-operative Dress Association" in New York, which resulted in a disastrous failure. Of late years Miss Field has confined her attention to lecturing on Mormonism and other topics of the day. Her publications include "Planchette's Diary" (New York, 1868); "Adelaide Ristori" (1868); "Mad on Purpose," a comedy (1868); "Pen Photographs from Charles Dickens's Readings" (Boston, 1868); "Haphazard" (1873); "Ten Days in Spain" (1875); and a "History of Bell's Telephone" (London, 1878).

FIELD, Martin, lawyer, b. in Leverett, Franklin co., Mass., in 1773; d. in Fayetteville, Vt., in 1833. He was graduated at Williams in 1798, studied law at Chester, Vt., and began practice at Newfane, Vt., in 1800. He was a popular and successful jury lawyer, and for ten years filled the office of state attorney for Windham county. He was frequently chosen to the general assembly, and also sat in the Constitutional convention of Vermont. After practising continuously for thirty years, he was compelled to retire on account of deafness. He then devoted himself to the study of geology and mineralogy, collecting a fine cabinet, which has since been presented to Middlebury college. He also wrote essays on those subjects.

FIELD, Maunsell Bradhurst, lawyer, b. in New York city, 26 March, 1822; d. there, 24 Jan., 1875. He was graduated at Yale in 1841, spent two years in foreign travel, studied law, and was admitted to the bar in 1847, associating himself in the practice of his profession with John Jay. He again visited Europe in 1848, and a third time in 1854, when he accepted the appointment of secretary to the American legation in Paris, under John Y. Mason. He subsequently became connected with the Spanish legation under Pierre Soulé. In 1855 he was appointed president of the American commissioners to the universal exhibition in Paris. In 1861 he was assigned to the U. S. deputy subtreasurership in the city of New York, and afterward served as assistant secretary of the treasury in Washington, D. C., which office he was compelled to resign in 1865, through failing health. He was four years collector of internal revenue for the 6th district of New York, from which he retired, in 1869, to resume the practice of law. In 1873 he was appointed judge of the 2d district court of New York city to fill a vacancy, and held the office until 1874. Judge Field was in early life a Democrat, but on the second election of President Lincoln voted with the Republicans. He is the author of "Adrian, or the Clouds of the Mind," written in collaboration with the English novelist, G. P. R. James (New York, 1852), and "Memoirs of Many Men and Some Women" (1874). He also published a small volume of poems (1869). His "Memoirs," which are entertaining reminiscences of his sojourn abroad, were widely circulated.

FIELD, Nathaniel, physician, b. in Jefferson county, Ky., 7 Nov., 1805. His father, who was a native of Virginia and served in the Revolutionary war, emigrated to Kentucky in 1784. Nathaniel was educated in the best schools in the state of that day, and was graduated at Transylvania medical school, Lexington, Ky. He first settled in northern Alabama, and practised there three years, when he returned to Kentucky. In the autumn of 1829 he removed to Jeffersonville, Ind., where he afterward resided. He was a member of the legislature from 1838 till 1839. In the spring of the latter year he organized the city government of Jeffersonville, under a charter that he drafted and had passed by the legislature. In 1830 he established the first Christian (or Campbellite) church in that city, and in 1847 the Second Advent Christian church. He served as pastor of the former for seventeen years, and of the latter for forty years, without compensation, believing it to be wrong to earn a livelihood by preaching, or to "make merchandise of the gospel." He voted against the entire township, in 1834, on the proposition to expel the free negroes, and was compelled to face a mob in consequence. He was one of the original abolitionists of the west, and emancipated several valuable slaves that he had inherited. He held a debate, in 1852, with Elder Thomas P. Connelly on the "State of the Dead," and the arguments were published in book-form. He also published a humorous poem, entitled "Arts of Imposture and Deception Peculiar to American Society" (1858). Dr. Field is the author of a monograph on "Asiatic Cholera," has contributed many essays to medical journals, and has prepared in manuscript lectures on "Capital Punishment," "The Mosaic Record of Creation," "The Age of the Human Race," and "The Chronology of Fossils."

FIELD, Richard Stockton, senator, b. in White Hill, Burlington co, N. J., 31 Dec., 1803; d. in Princeton, N. J., 25 May, 1870. He was a grandson of Richard Stockton, one of the signers of the Declaration of Independence, was graduated at Princeton in 1821, studied law in the office of his uncle, Richard Stockton, and was admitted to the bar in 1825. He was for several years a member of the New Jersey legislature, and in 1838 was appointed attorney-general of the state, which office he resigned in 1841. He was a prominent member of the convention that, in 1844, met to adopt the present constitution of the state of New Jersey, and in 1851 was chosen to deliver the first annual address before an association composed of its survivors. From 1847 till 1855 he was professor in the New Jersey law-school. Ever taking a strong interest in educational matters, and especially in the common schools of the state, he was in the latter year made president of the board of trustees of the state normal-school, then just organized, and thenceforward until his death he wrote all its annual reports to the legislature. In November, 1862, he was appointed to the U. S. senate for the un-

expired term of John R. Thompson, who died in office. While a member of that body he delivered an able argument on the discharge of state prisoners, in which he maintained that the right to suspend the writ of habeas corpus resided not in congress, but in the president. On 21 Jan., 1863, he was appointed by President Lincoln U. S. district judge for the district of New Jersey, which office he held until his death. In 1866 he was a delegate to the Philadelphia convention, and throughout his life he was an unflinching advocate of the Union cause. After his elevation to the bench he lived in comparative seclusion in his luxurious home at Princeton. Judge Field was a man of varied and profound learning, gentle, courteous, and dignified, and of a charitable disposition. He was closely identified with the interests of his alma mater, which in return conferred upon him, in 1859, the degree of LL. D. Judge Field, at the time of his decease, was president of the New Jersey historical society, and for many years a valuable contributor to its publications. "The Provincial Courts of New Jersey," etc., forming the third volume of the "Collections" (1849), is probably his most valuable contribution to historical research. Among his best-known addresses, all of which have been printed, are those "On the Trial of the Rev. William Tennent for Perjury in 1742" (1851); "The Power of Habit" (1855); "The Constitution not a Compact between Sovereign States" (1861); "On the Life and Character of Chief-Justice Hornblower" (1865); and "An Oration on the Life and Character of Abraham Lincoln" (1866).

FIELD, Samuel, philanthropist, b. in Delaware county, Pa., 12 Aug., 1823. He is a Philadelphia merchant, a ruling elder of the Walnut street Presbyterian church, and remarkable for his earnestness in forwarding every form of Christian activity. He is exceedingly liberal, and scarcely ever fails to respond to any proper appeal to his sympathies. For many years he has belonged to the Presbyterian board of education, and has taken a leading part in the establishment of the hospital under the management of that denomination. The organization of the Presbyterian home for widows and single women and the Presbyterian orphanage are also largely due to his earnest and judicious efforts. Mr. Field has several times represented his presbytery in the general assembly.

FIELD, Thomas W., educator, b. at Onondaga Hill, N. Y., in 1820; d. in Brooklyn, N. Y., 25 Nov., 1881. He removed to Williamsburg, N. Y., in 1843, and engaged in teaching, surveying, and the cultivation of fruit and flowers. In 1873 he was appointed superintendent of public schools in Brooklyn, N. Y., which office he held at the time of his death. He was an ardent student and collector in American history and ethnology. He published a small volume of poems; "Pear Culture" (1858); "A History of the Battle of Long Island" ("Memoirs of the Long Island Historical Society," vol. ii., 1869); "Historic and Antiquarian Scenes in Brooklyn and Vicinity" (1868); "An Essay toward an Indian Bibliography" (1873); and left a large manuscript volume of "Aphorisms," selected and original.

FIELDING, William Stevens, Canadian journalist, b. in Halifax, 24 Nov., 1848. He was educated in his native city, and has been connected for many years with the Halifax "Morning Chronicle." At the convention of the Liberal party held in Halifax after the resignation of the Thomson government in 1882, he declined the portfolios of premier and provincial secretary. In December of the same year he became a member of the administration of W. T. Pipes, and on the latter's retirement in July, 1884, reorganized the administration, becoming premier and provincial secretary. He was first returned to the Nova Scotia house of assembly in 1882, and was re-elected in 1884.

FIELDS, James Thomas, publisher, b. in Portsmouth, N. H., 31 Dec., 1817; d. in Boston, 24 April, 1881. At the age of four years he lost his father. The lad was educated in a high school in his native place, and in 1834 went to Boston to become clerk in a book-store. In his eighteenth year he read the anniversary poem before the Boston mercantile library association. Soon after he reached the age of twenty-one he became a partner in the publishing firm of Ticknor, Reed & Fields, and continued a member of it till 1870, when he retired. From 1862 until 1870 Mr. Fields was editor of the "Atlantic Monthly." Meanwhile he had lectured before the societies of Harvard and Dartmouth, and in 1867 received from the latter the degree of LL. D. After the close of his publishing career Fields lectured successfully, chiefly on literary subjects, throughout the large cities of the northern states. He had seen much of literary society, had been intimate with many eminent men, and possessed a special faculty of entertaining and instructing his audiences. He made four visits to Europe—in 1847, 1851, 1859, and 1869. His published volumes include "Poems" (Boston, 1849; 2d ed., Cambridge, 1854); "A few Verses for a few Friends" (Boston, 1858); "Yesterdays with Authors" (1872); "Hawthorne" (1876); and "In and out of Doors with Charles Dickens" (1876). In conjunction with Edwin P. Whipple he edited the "Family Library of English Poetry" (1877).—His wife, **Annie Adams,** has published "Under the Olive," poems (Boston, 1880), several pamphlets, and a "Memoir of James T. Fields" (1881).

James T. Fields

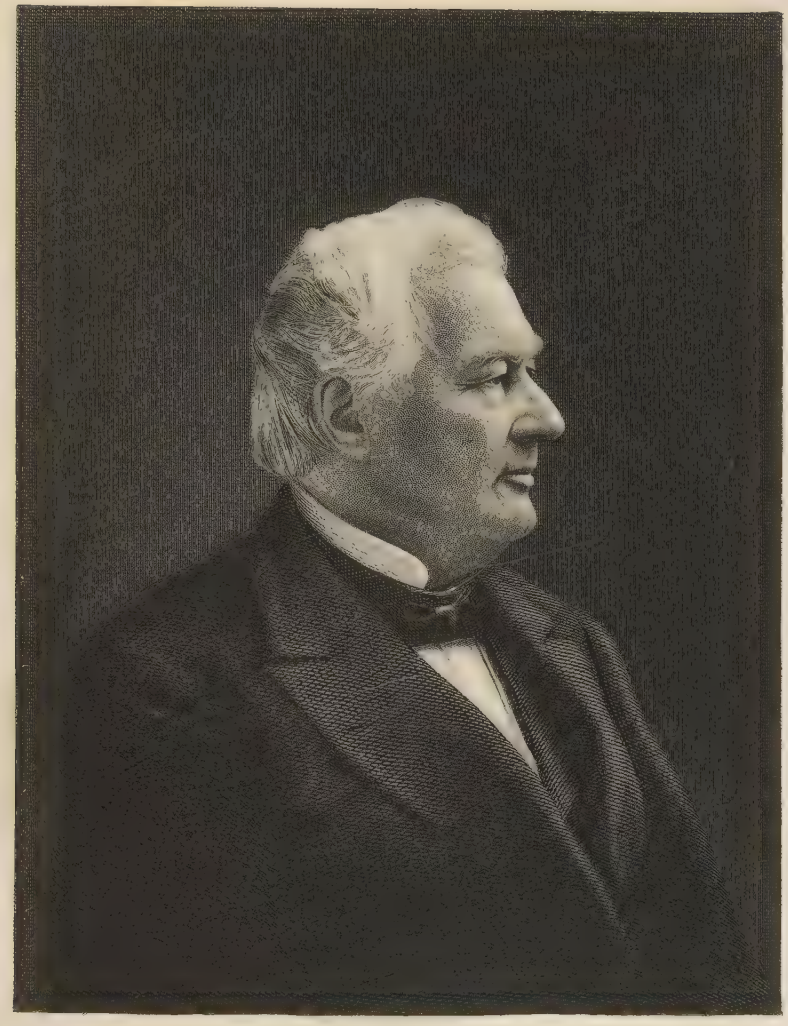
FIGUEIRA, Luiz, Portuguese missionary, b. in Almodovar, Portugal, 1585; d. in Brazil in July, 1643. He belonged to the Jesuit order, and was sent on the Brazilian mission. He was the companion of the Jesuit Pinto, who, while preaching the gospel among the Tayupes, a tribe near Pernambuco, was killed by these cannibals. Figueira fortunately escaped, and returned to Pernambuco. He was appointed superior of the college of that city, and afterward made head of all the Jesuit missions on the Amazon. He then went to Portugal with the object of finding missionaries to share his labors, and was returning with several companions when, just as his ship was entering the mouth of the Amazon, a storm arose, and he was wrecked on an island inhabited by the Aruans. These barbarians massacred Figueira with thirteen of his companions, and devoured their bodies. Figueira wrote "Arte da Grammatica da Lingua Brasilicá" (Lisbon, 1687). The library of the Jesuit college in Rome contains French translations of these other works of Figueira, the originals of which are lost: "Voyages de découvertes à travers les pays des Tayupes" and "Établissements fondés par le père Figueira chez les sauvages au Maranham."

FIGUEROA, Francisco, Mexican historian, b. in Toluca about 1730; d. in the city of Mexico about 1800. He entered in his youth the order of St. Francis, and was at different times lecturer and rector of studies of the College of Tlaltelolco, superior of the convent in Mexico, and provincial of New Spain. When a royal decree of 21 Feb., 1790, ordered the viceroy to collect and send to Spain all the documents that might be useful for compiling the history of Mexico, the task was intrusted to Figueroa, and in less than three years he collected thirty-two folio manuscript volumes in duplicate. One copy was sent to the council of the Indies, and exists to-day, although mutilated, in the Spanish academy of history. The other copy remained in the office of the secretary of the viceroyalty, and was afterward transferred to the national general archives, where they still existed in 1853, but at present their resting-place is unknown. They include diaries of missionaries in the northern provinces (3 vols.); a "History of the Conquest of New Galicia," by Mota Padilla (2 vols.; afterward published by the Mexican geographical society); the Indian songs of Nezahualcoyot and tales of Ixtlilcochitl, "Crónica Mexicana por Hernando Alvarado Tezozomoc," and "Historia Chichimeca por Ixtlilcochitl" (all three published partly in a translation in Kingsborough's "Antiquities of Mexico); "Crónica de Michoacán por Fr. Pablo Beaumont," partly published in Spanish, French, and Italian (3 vols.); "History of the Missions in Old California" (English translation, New York); and "Notes on New California" (partly published in French and English translations). Figueroa was also the author of several theological works, most of the manuscripts of which have disappeared; but one of them is still preserved in the Biblioteca Nacional of Mexico.

FIGUEROA, Francisco Acuña de (fe-ga-ro'-ah), Uruguayan poet, b. in Montevideo in 1791; d. there, 6 Oct., 1862. In 1804 his father sent him to Buenos Ayres to study at the college of San Carlos, but the invasion of that city in 1807 by the British forces obliged him to return to his native city, where he was employed as a subaltern in the administration under his father. He began early to write improvisations and numerous small poems, but, as at that time no printing-office existed in Montevideo, none of his works of that period have been published. During the twenty-two months' siege of that city by the revolutionary forces in 1812–'14, he kept in verse a diary of daily events, which was afterward published under the title "Diario Histórico Razonado del sitio de Montevidéo en 1812–'13 y '14." In June, 1814, when Montevideo surrendered, Figueroa emigrated to Rio Janeiro, where he was employed as secretary of the Spanish envoy. In 1818, after the conclusion of peace, he gave up his idea of going to Spain, and returned to his native city. He was again employed in the administration, and in 1840 was appointed director of the national library and museum, but continued to occupy his leisure by writing poetry. Marmier, in his "Lettres sur l'Amérique du Sud" (Paris, 1851), compares Figueroa with the French poet Marot, and places him at the head of Spanish-American poets. Besides his historical diary mentioned above, he published "Parafrases de los Salmos"; "Parafrases de las Lamentaciones de Jeremías"; and "Las Toráidas," sketches of Paraguayan customs. The poems "La Negra," "El Duelo de Montevidéo," "Himno Nacional del Uruguay," and all his smaller poems, were published under the title of "Mosáico Poético" (1857).

FILLEBROWN, Thomas Scott, naval officer, b. in the District of Columbia, 13 Aug., 1834; d. in New York city, 26 Sept., 1884. He was appointed to the navy from Maine as a midshipman, 19 Oct., 1841; was promoted to passed midshipman, 10 Aug., 1847; became lieutenant, 15 Sept., 1855; lieutenant-commander, 16 July, 1862; commander, 25 July, 1866; captain, 6 Jan., 1874; and commodore, 7 May, 1883. He was present in all the operations on the gulf coast during the Mexican war, and took part in the North Pacific and Paraguay expeditions. In 1863 he was placed in command of the steamboat "Chenango," and while proceeding down New York harbor lost four officers and thirty men through the explosion of a boiler. He also commanded the iron-clad "Passaic," operating against Fort Sumter in May, 1864, the iron-clad "Montauk," in the attack on Battery Pringle, Stono river, S. C., in July of the same year, and the steamer "Sonoma," of the South Atlantic blockading squadron, in 1864–'5. He was also present at the engagement with Confederate batteries in Tagoda river, S. C., in February, 1865. At the close of the war he was assigned to special duty at the navy department in Washington, where he remained until just before his last illness.

FILLMORE, Millard, thirteenth president of the United States, b. in the township of Locke (now Summerhill), Cayuga co., N. Y., 7 Feb., 1800; d. in Buffalo, N. Y., 7 March, 1874. The name of Fillmore is of English origin, and at different periods has been variously written. Including the son of the ex-president, the family can be traced through six generations, and, as has been said of that of Washington, its history gives proof "of the lineal and enduring worth of race." The first of the family to appear in the New World was a certain John Fillmore, who, in a conveyance of two acres of land dated 24 Nov., 1704, is described as a "mariner of Ipswich," Mass. His eldest son, of the same name, born two years before the purchase of the real estate in Beverly, also became a sea-faring man, and while on a voyage in the sloop "Dolphin," of Cape Ann, was captured with all on board by the pirate Capt. John Phillips. For nearly nine months Fillmore and his three companions in captivity were compelled to serve on the pirate ship and to submit, during that long period, to many hardships and much cruel treatment. After watching and waiting for an opportunity to obtain their freedom, their hour at length came. While Fillmore sent an axe crashing through the skull of Burrall, the boatswain, the captain and other officers were despatched by his companions, and the ship was won. They sailed her into Boston harbor, and the same court which condemned the brigands of the sea presented John Fillmore with the captain's silver-hilted sword and other articles, which are preserved to this day by his descendants. The sword was inherited by his son, Nathaniel, and was made good use of in both the French and Revolutionary wars. Lieut. Fillmore's second son, who also bore the name Nathaniel, and who was the father of the president, went with his young wife, Phebe Millard, to what at the close of the past century was the "far west," where he and a younger brother built a log cabin in the wilderness, and there his second son, Millard, was born. Nathaniel Fillmore was one of "God Almighty's gentlemen," whose creed was contained in two words, "do right," and who lived to see his son elevated to a position than which there is none loftier on earth. Of the president's mother, who died in 1831, little is known beyond the fact that she was a sensible and, in her later years, a sickly



Millard Fillmore

woman; with a sunny nature that enabled her to endure uncomplainingly the many hardships of a frontier life, and that her closing days were gladdened by the frequent visits of her second son, who was then in public life, with every prospect of a successful professional and political career.

From a brief manuscript autobiography prepared by "worthy Mr. Fillmore," as Washington Irving described him, we learn that, owing to a defective title, his father lost his property on what was called the "military tract," and removed to another part of the same county, now known as Niles, where he took a perpetual lease of 130 acres, wholly unimproved and covered with heavy timber. It was here that the future president first knew anything of life. Working for nine months on the farm, and attending such primitive schools as then existed in that neighborhood for the other three months of the year, he had an opportunity of forgetting during the summer what he acquired in the winter, for in those days there were no newspapers and magazines to be found in pioneers' cabins, and his father's library consisted of but two books — the Bible and a collection of hymns. He never saw a copy of "Shakespeare" or "Robinson Crusoe," a history of the United States, or even a map of his own country, till he was nineteen years of age! Nathaniel Fillmore's misfortunes in losing his land through a defective title, and again in taking another tract of exceedingly poor soil, gave him a distaste for farming, and made him desirous that his sons should follow other occupations. As his means did not justify him or them in aspiring to any profession, he wished them to learn trades, and accordingly Millard, then a sturdy youth of fourteen, was apprenticed for a few months on trial to the business of carding wool and dressing cloth. During his apprenticeship he was, as the youngest, treated with great injustice, and on one occasion his employer, for some expression of righteous resentment, threatened to chastise him, when the young woodsman, burning with indignation, raised the axe with which he was at work and told him the attempt would cost him his life. Most fortunately for both, the attempt was not made, and at the close of his term he shouldered his knapsack, containing a few clothes and a supply of bread and dried venison, and set out on foot and alone for his father's house, a distance of something more than a hundred miles through the primeval forests. Mr. Fillmore in his autobiography remarks: "I think that this injustice—which was no more than other apprentices have suffered and will suffer—had a marked effect on my character. It made me feel for the weak and unprotected, and to hate the insolent tyrant in every station of life."

In 1815 the youth again began the business of carding and cloth-dressing, which was carried on from June to December of each year. The first book that he purchased or owned was a small English dictionary, which he diligently studied while attending the carding machine. In 1819 he conceived the design of becoming a lawyer. Fillmore, who had yet two years of his apprenticeship to serve, agreed with his employer to relinquish his wages for the last year's services, and promised to pay thirty dollars for his time. Making an arrangement with a retired country lawyer, by which he was to receive his board in payment for his services in the office, he began the study of the law, a part of the time teaching school, and so struggling on, overcoming almost insurmountable difficulties, till at length, in the spring of 1823, he was, at the intercession of several leading members of the Buffalo bar, whose confidence he had won, admitted as an attorney by the court of common pleas of Erie county, although he had not completed the course of study usually required. The writer has recently seen the dilapidated one-story building in Buffalo where Mr. Fillmore closed his career as a school-master, and has also conversed with one of his pupils of sixty-five years ago. The wisdom of his youth and early manhood gave presage of all that was witnessed and admired in the maturity of his character. Nature laid on him, in the kindly phrase of Wordsworth, "the strong hand of her purity," and even then he was remarked for that sweet courtesy of manner which accompanied him through life. Millard Fillmore began practice at Aurora, where his father then resided, and fortunately won his first case and a fee of four dollars. In 1827 he was admitted as an attorney, and two years later as counsellor of the supreme court of the state. In 1830 he removed to Buffalo, and after a brief period formed a partnership with Nathan K. Hall, to which Solomon G. Haven was soon afterward admitted.

By hard study and the closest application, combined with honesty and fidelity, Mr. Fillmore soon became a sound and successful lawyer, attaining a highly honorable position in the profession. The law-firm of Fillmore, Hall & Haven, which continued till 1847, was perhaps the most prominent in western New York, and was usually engaged in every important suit occurring in that portion of the state. In 1853, while still in Washington, Mr. Fillmore made an arrangement with Henry E. Davies to renew, on retiring from the presidency, the practice of his profession in New York in partnership with that gentleman, who, after occupying a judge's seat in the court of appeals, returned to the bar. Family afflictions, however, combined with other causes, induced the ex-president to abandon his purpose. There were doubtless at that time men of more genius and greater eloquence at the bar of the great city; but we can not doubt that Mr. Fillmore's solid legal learning, and the weight of his personal character, would have won for him the highest professional honors in the new field of action.

Mr. Fillmore's political career began and ended with the birth and extinction of the great Whig party. In 1828 he was elected by Erie county to the state legislature of New York, serving for three terms, and retiring with a reputation for ability, integrity, and a conscientious performance of his public duties. He distinguished himself by his advocacy of the act to abolish imprisonment for debt, which was passed in 1831. The bill was drafted by Fillmore, excepting the portions relative to proceedings in courts of record, which were drawn by John C. Spenser. In 1832 he was elected to congress, and, after serving for one term, retired till 1836, when he was re-elected, and again returned in 1838 and 1840, declining a renomination in 1842. In the 27th congress Mr. Fillmore, as chairman of the committee on ways and means —a committee performing at that period not only the duties now devolving upon it, but those also which belong to the committee on appropriations —had herculean labors to perform. Day after day, for weeks and months, Fillmore had to encounter many of the ablest debaters of the house, but on all occasions he proved himself equal to the emergency. It should not be forgotten that, in the opinion of John Quincy Adams, there were more men of talent and a larger aggregate of ability in that congress than he had ever known. Although Mr. Fillmore did not claim to have discovered any

original system of revenue, still the tariff of 1842 was a new creation, and he is most justly entitled to the distinction of being its author. It operated successfully, giving immediate life to our languishing industries and national credit. At the same time Mr. Fillmore, with great labor, prepared a digest of the laws authorizing all appropriations reported by him to the house as chairman of the committee on ways and means, so that on the instant he could produce the legal authority for every expenditure which he recommended. Sensible that this was a great safeguard against improper expenditures, he procured the passage of a resolution requiring the departments, when they submitted estimates of expenses, to accompany them with a reference to the laws authorizing them in each and every instance. This has ever since been the practice of the government.

Mr. Fillmore retired from congress in 1843, and was a candidate for the office of vice-president, supported by his own and several of the western states, in the Whig convention that met at Baltimore in May, 1844. In the following September he was nominated by acclamation for governor, but was defeated by Silas Wright, his illustrious contemporary, Henry Clay, being vanquished at the same time in the presidential contest by James K. Polk. In 1847 Fillmore was elected comptroller of the state of New York, an office which then included many duties now distributed among other departments. In his report of 1 Jan., 1849, he suggested that a national bank, with the stocks of the United States as the sole basis upon which to issue its currency, might be established and carried on, so as to prove a great convenience to the government, with perfect safety to the people. This idea involves the essential principle of our present system of national banks.

In June, 1848, Millard Fillmore was nominated by the Whig national convention for vice-president, with Gen. Taylor, who had recently won military renown in Mexico, as president, and was in the following November elected, making, with the late occupant of the office, seven vice-presidents of the United States from New York, a greater number than has been yet furnished by any other state. In February, 1849, Fillmore resigned the comptrollership, and on 5 March he was inaugurated as vice-president. In 1826 Calhoun, of South Carolina, then vice-president, established the rule that that officer had no authority to call senators to order. During the heated controversies in the sessions of 1849–'50, occasioned by the application of California for admission into the Union, the vexed question of slavery in the new territories, and that of the rendition of fugitive slaves, in which the most acrimonious language was used, Mr. Fillmore, in a forcible speech to the senate, announced his determination to maintain order, and that, should occasion require, he should resume the usage of his predecessors upon that point. This announcement met with the unanimous approval of the senate, which directed the vice-president's remarks to be entered in full on its journal. He presided during the exciting controversy on Clay's "omnibus bill" with his usual impartiality, and so perfectly even did he hold the scales that no one knew which policy he approved excepting the president, to whom he privately stated that, should he be required to deposit a casting vote, it would be in favor of Henry Clay's bill. More than seven months of the session had been exhausted in angry controversy, when, on 9 July, 1850, the country was startled by the news of President Taylor's death. He passed away in the second year of his presidency, suddenly and most unexpectedly, of a violent fever, which was brought on by long exposure to the excessive heat of a fourth of July sun, while he was attending the public ceremonies of the day.

It was a critical moment in the history of our country when Millard Fillmore was on Wednesday, 10 July, 1850, made president of the United States. With great propriety he reduced the ceremony of his inauguration to an official act to be marked by solemnity without joy; and so with an absence of the usual heralding of trumpet and shawm, he was unostentatiously sworn into his great office in the hall of representatives, in the presence of both houses. The chief justice of the circuit court of the District of Columbia—the venerable William Cranch, appointed fifty years before by President John Adams—administered the oath, which being done, the new president bowed and retired, and the ceremony was at an end. Mr. Fillmore was then in the prime of life, possessing that which to the heathen philosopher seemed the greatest of all blessings—a sound mind in a sound body. The accompanying vignette portrait was taken at this time, while the large steel engraving is from a picture made some twenty years later. Of Fillmore's keen appreciation of the responsibility devolving on him we have the evidence of letters written at that time, in which he says he should despair but for his humble reliance on God to help him in the honest, fearless, and faithful discharge of his great duties. President Taylor's cabinet immediately resigned, and a new and exceedingly able one was selected by Mr. Fillmore, with Daniel Webster as secretary of state; Thomas Corwin, secretary of the treasury; William A. Graham, secretary of the navy; Charles M. Conrad, secretary of war; Alexander H. H. Stuart, secretary of the interior; John J. Crittenden, attorney-general; and Nathan K. Hall, postmaster-general. Of these, Mr. Webster died, and Messrs. Graham and Hall retired in 1852, and were respectively replaced by Edward Everett, John P. Kennedy, and Samuel D. Hubbard. Stuart, of Virginia, is now the sole survivor of the illustrious men who aided Mr. Fillmore in guiding the ship of state during the most appalling political tempest, save one, which ever visited this fair land. It is not the writer's wish to reawaken party feelings or party prejudice or to recall those great questions of pith and moment which so seriously disturbed congress and the country in the first days of Fillmore's administration, but yet, even in so cursory a glance as we are now taking of his career, some comment would seem to be called for in respect to those public acts connected with slavery which appear to have most unreasonably and unjustly lost him the support of a large proportion of his party in the northern states. Whatever the wisdom of Mr. Fillmore's course may have been, it is impossible to doubt his patriotism or his honest belief that he was acting in accordance with his oath to obey the constitution of his country. The president's dream was peace—to preserve without hatred and

Millard Fillmore

without war tranquillity throughout the length and breadth of our broad land, and if in indulging this delusive dream he erred, it was surely an error that leaned to virtue's side. There is a legend "that he serves his party best who serves his country best." In Mr. Fillmore's action it is confidently believed that he thought not of party or of personal interests, but only of his bounden duty to his country and her sacred constitution.

One of the president's earliest official acts was to send a military force to New Mexico to protect that territory from invasion by Texas on account of its disputed boundary. Then followed the passage by a large majority of the celebrated compromise measures, including the fugitive-slave law. The president referred to the attorney-general the question of its constitutionality, and that officer in a written opinion decided that it was constitutional. Fillmore and the strong cabinet that he had called around him concurred unanimously in this opinion, and the act was signed, together with the other compromise measures. The fugitive-slave law was exceedingly obnoxious to a large portion of the Whig party of the north, as well as to the anti-slavery men, and its execution was resisted. Slaves in several instances were rescued from the custody of the United States marshals, and a few citizens of Christiana, in Pennsylvania, were killed. Although it was admitted that Fillmore's administration as a whole was able, useful, and patriotic, although his purity as a public man was above suspicion, and no other act of his administration could be called unpopular, still, by the signing and attempted enforcement of the fugitive-slave law and some of its unfortunate provisions, of which even Mr. Webster did not approve, the president, as has been already stated, lost the friendship and support of a large portion of his party in the north.

Mr. Fillmore's administration being in a political minority in both houses of congress, many wise and admirable measures recommended by him failed of adoption; nevertheless we are indebted to him for cheap postage; for the extension of the national capitol, the corner-stone of which he laid 4 July, 1851; for the Perry treaty, opening the ports of Japan, and for various valuable exploring expeditions. When South Carolina in one of her indignant utterances took Mr. Fillmore to task for sending a fleet to Charleston harbor, and he was officially questioned as to his object and authority, the answer came promptly and to the purpose, "By authority of the constitution of the United States, which has made the president commander-in-chief of the army and navy, and who recognizes no responsibility for his official action to the governor of South Carolina." With stern measures he repressed filibustering, and with equal firmness exacted from other countries respect for our flag. Mr. Fillmore carried out strictly the doctrine of non-intervention in the affairs of foreign nations, and frankly stated his policy to the highly-gifted Kossuth, who won all hearts by his surpassing eloquence. At the same time, however, it was clearly shown how little the administration sympathized with Austria by the celebrated letter addressed to her ambassador, Hulsemann, by Daniel Webster, who died soon after. His successor as secretary of state was Edward Everett, whose brief term of office was distinguished by his letter declining the proposition for a treaty by which England, France, and the United States were to disclaim then and for the future all intention to obtain possession of Cuba. In his last message, however, the president expressed an opinion against the incorporation of the island with this Union.

Nothing in Mr. Fillmore's presidential career was, during the closing years of his life, regarded by himself with greater satisfaction than the suppressed portion of his last message of 6 Dec., 1852. It was suppressed by the advice of the cabinet, all of whom concurred in the belief that, if sent in, it would precipitate an armed collision, and he readily acquiesced in their views. It related to the great political problem of the period—the balance of power between the free and the slave states. He fully and clearly appreciated the magnitude of the then approaching crisis, and in the document now under consideration proposed a judicious scheme of rescuing the country from the horrors of a civil war, which soon after desolated so large a portion of the land. His perfectly practicable plan was one of African colonization, somewhat similar to one seriously entertained by his successor, Mr. Lincoln. Had President Fillmore's scheme been adopted, it is quite possible that it would have been successful, and that our country might have been blessed with peace and prosperity, in lieu of the late war with its loss of half a million of precious lives and a debt of more than double the amount of the estimated cost of his plan of colonization. Mr. Fillmore retired from the presidency, 4 March, 1853, leaving the country at peace with other lands and within her own borders, and in the enjoyment of a high degree of prosperity in all the various departments of industry. In his cabinet there had never been a dissenting voice in regard to any important measure of his administration, and, upon his retiring from office, a letter was addressed to him by all its members, expressing their united appreciation of his ability, his integrity, and his single-hearted and sincere devotion to the public service.

The surviving member of Fillmore's cabinet, who also sat in the 27th congress with him, in a communication, with which he has favored the writer, says: "Mr. Fillmore was a man of decided opinions, but he was always open to conviction. His aim was truth, and whenever he was convinced by reasoning that his first impressions were wrong, he had the moral courage to surrender them. But, when he had carefully examined a question and had satisfied himself that he was right, no power on earth could induce him to swerve from what he believed to be the line of duty. . . . There were many things about Mr. Fillmore, aside from his public character, which often filled me with surprise. While he enjoyed none of the advantages of early association with cultivated society, he possessed a grace and polish of manner which fitted him for the most refined circles of the metropolis. You saw, too, at a glance, that there was nothing in it which was assumed, but that it was the natural outward expression of inward refinement and dignity of character. I have witnessed, on several occasions, the display by him of attributes apparently of the most opposite character. When assailed in congress he exhibited a manly self-reliance and a lofty courage which commanded the admiration of every spectator, and yet no one ever manifested deeper sensibility, or more tender sympathy, with a friend in affliction. . . . He seemed to have the peculiar faculty of adapting himself to every position in which he was called to serve his country. When he was chairman of the committee of ways and means, members of congress expressed their sense of his fitness by declaring that he was born to fill it. When he was elected vice-president, it was predicted that he would fail as the presiding officer of the senate, yet he acquitted himself in this new and untried position in such a

manner as to command the applause of senators. And when advanced to the highest office of our country, he so fulfilled his duties as to draw forth the commendation of the ablest men of the opposite party. . . . For the last two years of my official association with Mr. Fillmore," adds Mr. Stuart, "our relations, both personal and political, were of an intimate and confidential character. He knew that I was his steadfast friend, and he reciprocated the feeling. He talked with me freely and without reserve about men and measures, and I take pleasure in saying that in all my intercourse with him I never knew him to utter a sentiment or do an act which, in my judgment, would have been unworthy of Washington."

His gifted contemporary, Henry Clay, thought highly of Fillmore's moderation and wisdom, said his administration was an able and honorable one, and on his death-bed recommended his nomination for the presidency (by the Baltimore convention of 1852), as being a statesman of large civil experience, and one in whose career there was nothing inconsistent with the highest purity and patriotism. After leaving Washington for the last time, Webster said to a friend that Fillmore's administration—leaving out of the question his share of its work—was the ablest the country had possessed for many years. The same great statesman, in his speech at the laying of the corner-stone of the capitol extension, said: "President Fillmore, it is your singularly good fortune to perform an act such as that which the earliest of your predecessors performed fifty-eight years ago. You stand where he stood; you lay your hand on the corner-stone he laid. Changed, changed is everything around. The same sun, indeed, shone upon his head which shines upon yours. The same broad river rolled at his feet, and now bathes his last resting-place, which now rolls at yours. But the site of this city was then mainly an open field. Streets and avenues have since been laid out and completed, squares and public grounds inclosed and ornamented, until the city, which bears his name, although comparatively inconsiderable in numbers and wealth, has become quite fit to be the seat of government of a great and united people. Sir, may the consequences of the duty which you perform so auspiciously to-day equal those which flowed from his act. Nor this only: may the principles of your administration and the wisdom of your political conduct be such that the world of the present day and all history hereafter may be at no loss to perceive what example you made your study."

It should be stated as a part of Mr. Fillmore's public record that he was a candidate for nomination as president at the Whig convention of 1852; but although his policy, the fugitive-slave law included, was approved by a vote of 227 against 60, he could not command 20 votes from the free states. Four years later, while at Rome, he received the news of his nomination for the presidency by the American party. He accepted the nomination, but before the close of the campaign it became evident that the real struggle was between the Republicans and Democrats. Many, with whom Fillmore was the first choice for president, cast their votes for Gen. Frémont or James Buchanan, believing that there was no hope of his election, and, although he received the support of large numbers in all the states, Maryland alone gave him her electoral vote. In the summer of 1864 Col. Ogle Tayloe, of Washington, wrote to Mr. Fillmore on the subject of the presidential nomination, and his response was: "I can assure you in all sincerity that I have no desire ever to occupy that exalted station again, and more especially at a time like this." Apropos of letters, the writer has had the privilege of perusing a collection of confidential correspondence written by President Fillmore during a score of years while in public life; and, after a most careful examination, has failed to find a single passage that would not stand the light of day, not a word of ignoble office-seeking, no paltry tricks to gain notoriety, no base designs of fattening upon public plunder.

Having thus glanced at the professional and political career of Mr. Fillmore, it now only remains to allude very briefly to his private life from 1853 onward. "The circles of our felicities make short arches." Who shall question the wise axiom of Sir Thomas Browne, the brave old knight of Norwich, a favorite author with the president? Three weeks after the close of his administration he sustained a severe affliction in the loss of his wife, Abigail Powers, the daughter of a clergyman, whom he married 5 Feb., 1826, and who was emphatically her husband's "right-hand." She had long been a sufferer from ill health and was looking forward most eagerly to a return to her old home, when she was taken away to those temples not made with hands. Irving says that she received her death-warrant while standing by his side on the cold marble terrace of the capitol, listening to the inaugural address of Mr. Fillmore's successor. To this Christian lady the White House is indebted for the books which to-day make the library one of the most attractive rooms in the presidential mansion. In the following year their only daughter, who had grown to womanhood, also passed away, leaving a memory precious to all who had the privilege of her acquaintance. His home now lonely from the loss of those who spread around it sunshine and happiness, induced Mr. Fillmore to carry out a long-cherished project of visiting the Old World, and in May, 1855, he sailed in the steamer "Atlantic." During his visit to England he received numerous and gratifying attentions from the queen and her cabinet ministers, and was proffered the degree of D. C. L. by the University of Oxford, through its chancellor, the late Earl of Derby. This honor he however declined, as did Charles Francis Adams a few years later.

Abigail Fillmore

We can not dwell as we could wish on Mr. Fillmore's patriotic attitude during the early years of the late war; of his warm interest in all the charitable Christian work of the city in which he passed nearly half a century; of his establishing the Buffalo historical society; how, as the first citizen of Buffalo, he was called upon to welcome distinguished visitors, including Mr. Lincoln, when on his way to Washington in 1861, and frequently to preside over conventions and other public gatherings, for the control of which he was so admirably qualified by his thorough parliamentary abilities, his widely extended knowledge, his broad views, and a personal urbanity which nothing could disturb; of the method and exactness, the precision

and punctuality, with which he conducted his private affairs, as in earlier years he had performed his professional and public duties; of another visit to Europe in 1866, accompanied by his second wife, Caroline C. McIntosh, who survived him for seven years; of his manner of life in dignified retirement, surrounded by all the comfort and luxuries of a beautiful and well-appointed mansion, including a large library, and with an attached wife to share his happy home (see accompanying illustration). In a letter written to his friend Mr. Corcoran, of Washington, but a few weeks before the inevitable hour came, he remarks: "I am happy to say that my health is perfect. I eat, drink, and sleep as well as ever, and take a deep but silent interest in public affairs, and if Mrs. Fillmore's health can be restored, I should feel that I was in the enjoyment of an earthly paradise." The ex-president accepted an invitation to meet the surviving members of his cabinet and a few other valued friends at the residence of Mr. Corcoran. The month of January, 1874, was designated as the date of the meeting, but was afterward changed to April, by Mr. Fillmore's request. Before that time he was no longer among the living. After a short illness, at ten minutes past eleven o'clock, on Sunday evening, 8 March, Millard Fillmore

"Gave his honors to the world again,
His blessed part to heaven, and slept in peace."

He was gathered to his fathers at the ripe age of seventy-four years, and passed away without the knowledge that his former partner, Judge Hall, with whom he had been so long and so closely united in the bonds of friendship, as well as in professional and political life, had also, a few days previous, rested from his labors, and was then lying in the Forest Hill cemetery, where the ex-president now sleeps by his side.

Among the chief magistrates of our country there appear more brilliant names than Fillmore's, yet none who more wisely led on the nation to progress and prosperity, making her name great and preserving peace in most perilous times, without invoking the power of the sword, or one who could more truthfully say, "These hands are clean." Without being a genius like Webster or Hamilton, he was a safe and sagacious statesman. He possessed a mind so nicely adjusted and well balanced that he was fitted for the fulfilment of any duty which he was called to perform. He was always ready to give up everything but conviction when once convinced. A single public act honestly and unflinchingly performed cost him his popularity. Posterity, looking from a distance, will perhaps be more just. All his acts, whether daily and common or deliberate and well-considered, were marked with modesty, justice, and sincerity. What Speaker Onslow said of Sir Robert Walpole was equally true of President Fillmore. "He was the best man from the goodness of his heart, to live with and under, of any great man I ever knew." His was an eminently kindly nature, and the last time the writer saw him, in 1873, he was relieving, with a liberal hand, the necessities of an old and unfortunate friend. He was a sound, practical Christian "without knowing it," as Pope remarked of a contemporary. His temper was perfect, and it is doubtful if he left an enemy on earth. Frederick the Great announced with energy that "Peter the First of Russia, to govern his nation, worked upon it like aquafortis upon iron." Fillmore, to win his way, like Lincoln and Garfield, from almost hopeless poverty to one of the most eminent positions of the world, showed equal determination, oftentimes working for weeks and months together, till long past midnight, which happily his powers of physical endurance permitted him to do with impunity, and affording a fine illustration of the proud boast of our country, that its loftiest honors are the legitimate objects of ambition to the humblest in the land, as well as to those favored by the gifts of fortune and high birth. See Chamberlain's "Biography of Millard Fillmore" (Buffalo, 1856); Benton's "Abridgment of the Debates of Congress from 1789 to 1856," vol. xvi. (New York, 1861); Thompson's "The Presidents and their Administrations" (Indianapolis, 1873); Von Holst's "Constitutional and Political History of the United States," vol. iv. (Chicago, 1885).

FILSON, John, explorer, b. in Chester county, Pa., in 1747; d. in Ohio, in October, 1788. He was an early explorer of the western country, and before he was thirty-seven had traversed the territory now occupied by the states of West Virginia, Kentucky, Ohio, Illinois, Indiana, Tennessee, Mississippi, and Louisiana. After spending several years in Kentucky collecting information for a history of the country, he purchased from Mathias Denman a one-third interest in the site of Cincinnati, which he called Losantiville, a name formed by Filson from the Latin "os," mouth, the Greek "anti," opposite, and the French "ville," city, from its position opposite the mouth of the Licking river. While exploring the country between this place and the Great Miami, he disappeared, 1 Oct., 1788, having been killed, it is supposed, by hostile Indians. After his disappearance his interest in the site of Cincinnati was transferred by his partners, Denman and Patterson, to Israel Ludlow, and his heirs never reaped any benefit from the subsequent increase in the value of the land. Mr. Filson was the author of "The Discovery, Settlement, and Present State of Kentucke" (Wilmington, Del., 1784; London, 1793; Paris, 1785); "A Map of Kentucky" (Philadelphia, 1784); and "A Topographical Description of the Western Territory of North America," in association with George Imlay (1793). He also left in manuscript "A Diary of a Journey from Philadelphia to Vincennes, Ind., in 1785"; "An Account of a Trip by Land from Vincennes, Ind., to Louisville, Ky., in 1785"; "A Journal of Two Voyages by Water from Vincennes to Louisville," and an account of an attempted voyage in 1786. See "Life and Writings of John Filson," by R. T. Durrett (Louisville, 1884).

FIMES, Ambrosio de-Villalpando (fee-mes), count of Ricla, captain-general of Cuba, b. in Zaragoza, Spain, in 1720; d. in Madrid in 1780. He entered the army, and in 1760 represented Spain at the court of Russia. In July, 1763, after the peace between England and Spain was signed at Paris, the count of Ricla took possession of the island of Cuba, in the name of the king of Spain, as governor and captain-general. He filled this

high office until September, 1766, and during his short administration repaired the fortifications of the city of Havana, laid the foundations of the great fortress known as "La Cabaña," organized the department of finances, the police, the militia, the hospitals, and in 1764 founded "La Gaceta de la Havana." One of the most important streets in Havana is called for him "Calle de Ricla."

FINCH, Francis Miles, poet, b. in Ithaca, N. Y., 9 June, 1827. He was graduated at Yale in 1849, studied law, and was admitted to the bar in Ithaca. In 1881 he was elected an associate judge of the court of appeals of the state of New York. On the establishment of Cornell university, he was chosen secretary of its board of trustees. In July, 1853, he read a poem at the centennial celebration of the Linonian society of Yale, in which several lyrics were introduced, including one on Nathan Hale, the patriot spy of the Revolution. This at once achieved wide popularity. He has also written other well-known lyrics, including "The Blue and the Gray," and a college smoking-song, beginning "Floating away like the fountain's spray."

FINCK, Henry Theophilus, journalist, b. in Bethel, Shelby co., Mo., 22 Sept., 1854. He was graduated at Harvard in 1876, and in 1877–'8 was a resident graduate at Cambridge, as student of sociology. The Harris fellowship having been awarded to him, he studied physiological psychology at Berlin, Heidelberg, and Vienna from 1878 till 1881. He is on the editorial staff of the New York "Evening Post" and "Nation," his chief writings being musical criticisms, which are characterized by a strong leaning toward the Wagnerian school. He has published a philosophical work entitled "Romantic Love and Personal Beauty" (New York and London, 1887), and a collection of musical essays entitled "Wagner and other Musicians" (1887). He has contributed to periodicals papers on the "Development of the Color Sense" and the "Gastronomic Value of Odors."

FINDLAY, William, governor of Pennsylvania, b. in Mercersburg, Pa., 20 June, 1768; d. in Harrisburg, Pa., 12 Nov., 1846. After receiving a common-school education, he became a farmer, and early took part in politics as a Democrat. His first office was that of brigade-inspector of militia. He was elected to the legislature in 1797 and 1803, and in 1807–'17 was state treasurer. He was governor from 1817 till 1820, and in the latter year was an unsuccessful candidate for re-election. Party spirit ran high during his administration, and in 1817 his opponents secured the appointment of a committee to investigate the late treasurer's conduct of his office. This investigation, though Gov. Findlay offered no witness in his behalf, resulted in a report that his conduct had been "not only faithful, but meritorious and beneficial to the state." The building of the state capitol was begun during Gov. Findlay's administration, and its corner-stone was laid by him. He was elected to the U. S. senate in 1821, and served one term, and in 1827–'40 was treasurer of the U. S. mint at Philadelphia.—His brother **James,** soldier, b. in Mercersburg, Pa., about 1775; d. in Cincinnati, Ohio, 28 Dec., 1835, removed to Cincinnati in 1793, was a member of the territorial legislative council in 1798, and after the admission of Ohio to the Union was often in the legislature. He served under Gen. William Hull at Detroit in the war of 1812 as colonel of the 2d Ohio regiment. He was U. S. receiver of public moneys for the Cincinnati district from the first establishment of public land offices till 1824, and was then elected to congress as a Jackson Democrat, and served four terms, 1825–'33. He was the unsuccessful Democratic candidate for governor of Ohio in 1834.—Another brother, **John,** d. in Chambersburg, Pa., 5 Nov., 1838, was a member of congress from Pennsylvania in 1821–'7.—William's son, **John King,** jurist, b. near Mercersburg, Pa., 12 May, 1803; d. in Spring Lake, N. J., 13 Sept., 1885, was graduated at the U. S. military academy in 1824, and assigned to the 1st artillery. He was assistant professor of chemistry, mineralogy, and geology at West Point from 29 Aug. till 4 Nov., 1824, of geography, history, and ethics till 17 April, 1825, and was on topographical duty till 13 May, 1828, when he resigned, and in 1831 was admitted to the Pennsylvania bar. He was recorder of Lancaster in 1841–'5, judge of the Philadelphia district court in 1845–'51, and president of the 3d judicial district of Pennsylvania in 1857–'62. After this he practised his profession in Philadelphia. Judge Findlay was a captain of militia in 1840–'5 and 1852–'6. He published an enlarged edition of Archbold's "Law of Nisi Prius" (2 vols., Philadelphia, 1852).—John King's nephew, **John Van Lear,** b. near Williamsport, Md., 21 Dec., 1839, was graduated at Princeton in 1858, and became a lawyer in Baltimore. He has been collector of internal revenue there, a member of the legislature, and orator for his state on "Maryland day" at the Centennial exhibition in 1876, and was elected to congress as a Democrat, serving from 1883 till 1887.

Wm Findlay

FINDLEY, Thomas Maskell, educator, b. in West Mahoning, Pa., 29 Sept., 1847. He was graduated at Monmouth college, Illinois, in 1874, and at Princeton theological seminary in 1879, having previously taught for two years. He was ordained pastor of the Presbyterian church at Indianola, Iowa, 22 June, 1880, and on 10 Oct., 1883, was appointed president of the University of southern Dakota, at Pierre, which he had founded and organized. In 1885 he became pastor of the 9th Presbyterian church, St. Paul, Minn. Some of Mr. Findley's articles contributed to the newspaper press have been widely copied.

FINDLEY, William, politician, b. in the north of Ireland about 1750; d. in Unity township, Westmoreland co., Pa., 5 April, 1821. He came to Pennsylvania in early life, served in the Revolution, and at its close removed to the western part of the state, where he soon became active in politics. He was a member of the legislature and of the State convention that adopted the Federal constitution, which he actively opposed as a step toward centralization. He was eleven times elected to congress, serving in 1791–'9 and 1803–'17. Mr. Findley was an earnest supporter of Thomas Jefferson, and a fluent speaker. He published a "Review of the Funding System" (1794); "History of the Insurrection of the Four Western Counties of Pennsylvania" (Philadelphia, 1796); and several pamphlets on matters of political interest.

FINDLEY, William Thornton, clergyman, b. in West Middletown, Pa., 2 June, 1814. He removed with his parents to Ohio in 1824, was gradu-

ated at Franklin college, Ohio, in 1839, and was licensed to preach in the Associate Reformed church on 12 June of that year. He has held pastorates at Chillicothe, Springfield, and Xenia, Ohio, and Newark, N. J., and in 1867–'8 edited the "Family Treasure," published in Cincinnati. He has published about twenty sermons.—His brother, **Samuel,** educator, b. in West Middletown, Pa., 26 Oct., 1818, was graduated at Franklin college, Ohio, in 1839, studied at Alleghany, Pa., theological seminary, and on 12 Oct., 1842, was ordained as a clergyman of the Associate Reformed church. He was principal of Edinburg academy, Wooster, Ohio, in 1846–'8, of Chillicothe female college in 1850–'3, president of Madison college, Antrim, Ohio, in 1853–'6, and pastor of a Presbyterian church in Pittsburg, Pa., in 1857–'61, editing at the same time, for two years, the "Pennsylvania Teacher." He was professor of logic and rhetoric in the Western university of Pennsylvania in 1861–'3, taught in 1863–'5, was professor in the Western military academy, Dayton, Ohio, in 1865–'70, and has held various pastorates. Dr. Findley is a corresponding member of the American entomological society, and has published "Rambles among the Insects" (Philadelphia, 1878).

FINE, John, jurist, b. in New York city, 26 Aug., 1794; d. in Ogdensburg, N. Y., 4 Jan., 1867. He was graduated at Columbia in 1809, studied in the Litchfield, Conn., law-school, and began practice in Ogdensburg, N. Y., in 1815. He was county treasurer in 1821–'33, first judge of the court of common pleas of St. Lawrence county in 1824–'37, and again from 1844 till the abolition of the court in 1847, having in the mean time been elected to congress as a Democrat, and served one term in 1839–'41. He was state senator in 1848, and after that time occupied several local offices of trust, till age and failing eyesight prevented his taking an active part in public affairs. Judge Fine was an active member of the Presbyterian church, and a prominent delegate to its general assembly. He published a volume of "Lectures on Law" (1852).

FINK, Albert, civil engineer, b. near Frankfort-on-the-Main, Germany, 27 Oct., 1827. He was graduated at the Polytechnic institute, Darmstadt, in 1848, where he studied architecture, and emigrated to this country in 1849. He soon found employment as draughtsman in the service of the Baltimore and Ohio railroad, and became chief office assistant of Benjamin H. Latrobe. In this capacity he had the superintendence of the design and construction of buildings and bridges. That portion of the road between Cumberland and Wheeling being then in process of construction, Mr. Fink designed and supervised the building of the first important iron bridges in this country, that over the Monongahela river and the viaduct over Trey Run. After this portion of the road was completed, the section from Grafton to Parkersburg was begun, and many of the bridges and tunnels were built under his supervision. During this time Mr. Fink was also consulting engineer of the Norfolk and Petersburg railway, then building, and designed the bridge at Norfolk. In 1857 he left the service of the Baltimore and Ohio road, and became assistant to Geo. McLeod, chief engineer of the Louisville and Nashville road. While connected with the latter corporation he built the Green river bridge, that over the Cumberland at Nashville, and the great bridge over the Ohio at Louisville. During the civil war he served as chief engineer and superintendent of the road and machinery department. During this period bridges were destroyed, connections severed, and the operating force kept constantly on the alert to guard against disaster and repair the gaps. The money loss involved by these depredations, the damage caused by which Mr. Fink was called upon to make good, was estimated at not less than $620,450. In 1865 he was made general manager, and in 1870 elected vice-president. The financial crisis of 1873 led him to study the question of the cost of transportation, and he subsequently issued two pamphlets on the subject. About the same time the growing evils of unrestrained railway competition forced upon his mind the necessity for a remedy, and suggested the possibility of co-operation instead of warfare on the part of rival corporations. This led him to devise his plan for the creation of the Southern railway and steamship association, which was adopted. In October, 1875, Mr. Fink resigned the office of vice-president and general manager of the Louisville and Nashville road, and undertook the organization and management of the above-named association, with the title of "general commissioner." In June, 1877, he set out on a visit to his native land. Arrived in New York, he was waited on by Messrs. Vanderbilt, Jewett, Scott, and Garrett, presidents of the four great trunk-lines of railway, who requested that he should remain in that city and attempt the organization of a "pool" of the west-bound traffic of these roads, on the plan of a division of tonnage, which he had succeeded in putting into operation in the south. Mr. Fink accordingly accepted the commissionership of the trunk-lines, and has been able to effect a complete revolution in the traffic management of the more important American railways.

Albert Fink

FINK, Frederick, artist, b. in Little Falls, N. Y., 18 Dec., 1817; d. in 1849. He studied medicine in Albany, but became a merchant, and afterward studied painting with Samuel F. B. Morse, and later in Europe. He painted many excellent genre pictures, the most notable of which are "The Artist's Studio," "The Shipwrecked Mariner," and "The Negro Wood-Sawyer."

FINK, Michael (in religion, Louis Maria), R. C. bishop, b. in Trifsterberg, Bavaria, in 1834. He studied in the Latin school and gymnasium of Ratisbon, and came to the United States in 1852. He joined the order of St. Benedict shortly afterward, and made his profession in the abbey of St. Vincent, Westmoreland county, Pa., in 1854. He finished his theological studies in 1857, and was ordained priest. He was then stationed at Bellefonte, Pa., and at Newark, N. J. He was next sent to Covington, Ky., where he established a convent of Benedictine nuns, and built a church. He then went to Chicago as pastor of St. Joseph's church, and his missionary labors were so successful that the church could not contain the numbers who came to hear him, whereupon he built a new and costly one, with schools attached to it. He was next appointed prior of the Benedictine monastery of Atchison, Kan., and also vicar-general of the vicar-apostolate of Kansas. He became coadjutor bishop in 1871, and was transferred to the newly

erected see of Leavenworth in 1877. Under his care the number of his co-religionists in that diocese increased from 35,000 to 80,000.

FINLEY, Jesse Johnson, senator, b. in Wilson county, Tenn., 18 Nov., 1812. He was educated at Lebanon, Tenn., and in 1836–'7 was captain of a company of mounted volunteers from Tennessee that served in the Seminole war in Florida. On his return he studied law, was admitted to the bar in 1838, and in 1840 removed to Mississippi county, Arkansas, where he was elected to the state senate in 1841. The following year he resigned and went to Memphis, Tenn., where he practised law. He was elected mayor in 1845, and after the expiration of his term of office in 1846 removed to Marianna, Jackson co., Fla. In 1850 he was elected to the state senate, and in 1852 was presidential elector on the Whig ticket. In 1853 he was appointed judge of the western circuit of Florida to fill a vacancy, and was subsequently elected to the same office for two terms without opposition. He was appointed judge of the Confederate court for the district of Florida in 1861, but resigned in March, 1862, and volunteered as a private in the army. He was promoted successively to captain, colonel, and brigadier-general. At the close of the war Judge Finley went to Lake City, Fla., and in 1871 removed to Jacksonville in the same state. He was then elected to congress as a Conservative Democrat, and served in 1875–'9. In 1880 he was nominated against his wishes and took his seat, but was subsequently unseated by the rival candidate. In March, 1887, he was selected by the governor to supply the vacancy in the United States senate that had been occasioned by the expiration of the term of Charles W. Jones, until a choice could be made by the legislature.

FINLEY, John, poet, b. in Brownsburg, Rockbridge co., Va., 11 Jan., 1797; d. in Richmond, Ind., 23 Dec., 1866. He received a common-school education, removed about 1818 to Cincinnati, Ohio, and in 1823 to Richmond, Ind. He was one of the editors and proprietors of the Richmond "Palladium" in 1831–'4, a member of the legislature for three years, and enrolling clerk of the state senate for an equal period. He was clerk of the Wayne county courts in 1838–'45, and mayor of Richmond from 1852 till his death. Mr. Finley's poems were collected in a volume entitled "The Hoosier's Nest and Other Poems" (Cincinnati, 1865). The best known of these is "Bachelor's Hall."

FINLEY, Robert, clergyman, b. in Princeton, N. J., in 1772; d. in Athens, Ga., 3 Oct., 1817. His father, James Finley, came to this country from Scotland in 1769. Robert was graduated at Princeton in 1787, and taught until 1793, when he became a tutor in the college, studying theology at the same time. He was licensed to preach on 16 Sept., 1794, and on 16 June, 1795, was ordained pastor of the Presbyterian church at Baskingridge, N. J., where he also conducted a successful school. In 1815 he suggested the formation of Bible-classes throughout the church, and his plan was recommended by the general assembly. He had been for some time interested in plans for improving the condition of the free negroes, and, having conversed and corresponded with many prominent men in regard to the colonization scheme, went to Washington in 1816 to secure for it government sanction. The result of his efforts was the formation, on 28 Dec., 1816, of the American colonization society, and in January, 1817, he established an auxiliary society in New Jersey. In July, 1817, he became president of Franklin college, Athens, Ga. He was a trustee of Princeton from 1806 till he resigned, in 1817, on his departure for Georgia, and, in accepting his resignation, the college gave him the degree of D. D. Dr. Finley was a man of decision and energy, and held high rank as a preacher. Besides several sermons, he published "Thoughts on the Colonization of the Free Blacks," a pamphlet that had much to do with awakening public attention to his enterprise (1816).—His son, **Robert Smith,** clergyman, b. in Baskingridge, N. J., 9 May, 1804; d. in Talladega, Ala., 2 July, 1860, was graduated at Princeton in 1821, studied law, and was admitted to the bar in Cincinnati, but abandoned his profession for the ministry, and was ordained as a Presbyterian clergyman in 1842. He was for some time a missionary among the slaves near Natchez, Miss., and edited for six years, in St. Louis, the "Liberian Advocate," a journal devoted to his father's scheme of colonization. He was pastor at Metuchen, N. J., in 1850–'8, and in the latter year became principal of the Presbyterian female institute at Talladega, Ala.

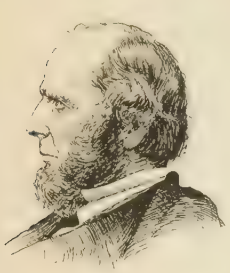
FINLEY, Robert W., clergyman, b. in Bucks county, Pa., 9 June, 1750; d. in Germantown, Ohio, 8 Dec., 1840. His mother, who had some acquaintance with medicine, opened a hospital for wounded soldiers during the Revolutionary war, and ministered to them with her own hand. Robert received a classical and theological education at Princeton, being licensed to preach as a Presbyterian, and in 1777 volunteered to go as a missionary to the new settlements in the Carolinas and Georgia. During this time Mr. Finley, who was an earnest patriot, was often with Gen. Marion in his expeditions, and narrowly escaped death at the hands of Tories in the partisan warfare then raging in that district. He removed to Virginia about 1784, two years later to Ohio, and in 1788 to Kentucky, where, after suffering from the depredations of wolves and savages, he finally settled in Bourbon county. Here, besides preaching to two congregations, he conducted a classical school, said to have been the first in Kentucky. He removed to a place near Chillicothe, Ohio, in 1796, and in 1808 became a Methodist, joining the Ohio conference as an itinerant preacher about 1812. He labored for years with great success, and, when almost eighty years old, set off on horseback, as a missionary, for Sault Ste. Marie, where he formed a circuit and appointed a camp-meeting.—His son, **James Bradley,** clergyman, b. in North Carolina, 1 July, 1781; d. in Cincinnati, Ohio, 6 Sept., 1856, was educated by his father, entered the Ohio Methodist conference in 1809, and in 1816–'21 was presiding elder of the Steubenville, Ohio, and Lebanon districts. He was a missionary to the Wyandot Indians in 1821–'7, and retained the superintendency of the mission till 1829, subsequently continuing in the itinerant ministry till 1845, when he became chaplain of the Ohio penitentiary. He retained this office till 1849, and then acted as conference missionary and pastor in southern Ohio till his death. His principal publications are "History of the Wyandot Mission" (Cincinnati, 1840); "Memorials of Prison Life" (1850); "Autobiography," edited by Rev. W. P. Strickland (1853); "Sketches of Western Methodism" (1854); and "Personal Reminiscences illustrative of Indian Life" (1857).—Another son, **John P.,** educator, b. in South Carolina, 13 June, 1783; d. 8 May, 1825, removed with his parents to the west, was educated by his father, and in 1810–'22 taught in schools and academies in Ohio, and also preached with success. He was given the chair of languages in Augusta college, Ky., in 1822, and in 1823 became an itinerant minister of the Methodist Episcopal church.

FINLEY, Samuel, educator, b. in County Armagh, Ireland, in 1715; d. in Philadelphia, Pa., 17 July, 1766. His parents, who were of Scottish extraction, gave him a good education in his native country, and in 1734 he came to Philadelphia and studied for the ministry, which he had from childhood determined to enter. He was licensed to preach on 5 Aug., 1740, ordained by the New Brunswick presbytery, 13 Oct., 1742, and in 1743 was sent to Milford, Conn., "with allowance that he also preach for other places thereabout when Providence may open a door for him." Taking advantage of this permission, he accepted an invitation to preach to the "second society" in New Haven; but, as this society was not recognized by the authorities, he was arrested, under a law forbidding itinerants to preach in any parish without the regular pastor's consent, indicted by the grand jury, tried, and sentenced to be carried out of the colony as a vagrant. In June, 1744, Mr. Finley settled as pastor of a church at Nottingham, Md., where he remained seventeen years conducting an academy, which acquired great reputation, and at which he prepared many young men for the ministry. In July, 1761, he was chosen to the presidency of Princeton, to succeed Samuel Davies, and the college prospered under his care. In 1763 the University of Glasgow gave him the degree of D. D., the first instance in which this honor was conferred on an American Presbyterian clergyman. Dr. Finley corresponded largely with eminent men in this country and Europe, and, though he published nothing but sermons, was esteemed an able writer. His discourse "On the Death of President Davies" (1761) was afterward prefixed to an edition of the latter's works.—His nephew, **Samuel,** soldier, b. in Westmoreland county, Pa., 15 April, 1752; d. in Philadelphia, Pa., 2 April, 1829, was educated by his uncle, President Finley, and settled in Martinsburg, Va. He served with distinction in the Virginia cavalry during the Revolution, and rose to the rank of major. The last three years of the war he spent as a prisoner on Long Island. Gen. Washington, whose personal friend he was, appointed him receiver of public moneys in the northwest, and he went, about 1796, to what is now Chillicothe, Ohio, where he had been given large tracts of government land for his services in the Revolution. During the war of 1812–'15 he served as a general of militia, raising and commanding a troop of light-horse against the border Indians, who were considered allies of the British.—His brother, **John,** also a major in the Continental army, afterward became an Indian trader, and in 1767, two years before Daniel Boone went to Kentucky, made a tour through that region, and brought back such glowing accounts that Boone was induced to settle there. He was one of the earliest settlers in the "Blue Licks" of Kentucky.—**Clement Alexander,** son of the younger Samuel, surgeon, b. in Newville, Cumberland co., Pa., 11 May, 1797; d. in Philadelphia, Pa., 8 Sept., 1879, was educated at Dickinson college, Pa., and received his medical degree from the University of Pennsylvania in 1818. He entered the army on 10 Aug. of that year as surgeon's mate of the 1st infantry, became assistant surgeon, 1 June, 1821, and surgeon, with the rank of major, 13 July, 1832. He was medical director in the field, with Gen. Jesup, Gen. Scott, and Gen. Taylor, in the Black Hawk, Seminole, and Mexican wars, and spent nearly eight years on the frontier of Arkansas, Louisiana, and Florida. Dr. Finley was with the commands that established Fort Leavenworth, Fort Gibson, and Jefferson Barracks, and in 1834 accompanied Gen. Henry Dodge on one of the earliest expeditions to the Rocky mountains. He was made surgeon-general of the army, 15 May, 1861, and on 14 April, 1862, was retired from active service on his own application. He was brevetted brigadier-general on 13 March, 1865, "for long and faithful service," and in 1876 was granted the retired pay of a full brigadier-general.—Clement Alexander's niece, **Martha,** author, b. in Chillicothe, Ohio, 26 April, 1828, went with her father, Dr. James B. Finley, to Circleville, Ohio, about 1829, and in 1836 to South Bend, Ind., where she was educated. After his death in May, 1851, she taught for several years, writing for the press in the evenings and holidays. Her first effort was a short newspaper-story published in New York in 1854. Miss Finley left Indiana in 1853, and lived in Philadelphia most of the time till 1876, when she removed to Elkton, Md. Under the pen-name of "Martha Farquharson" (the Gælic translation of her surname), she has written "Elsie Dinsmore" (New York, 1868), with several sequels, the last of which is "Elsie's Kith and Kin" (1886); "Casella; or, The Children of the Valleys" (Philadelphia, 1869); "An Old-Fashioned Boy" (Philadelphia, 1871), with its sequel, "Our Fred" (New York, 1874); "Wanted, a Pedigree" (Philadelphia, 1872); "The Mildred Series" (6 vols., New York, 1878–'86); "The Thorn in the Nest," a novel (New York, 1886); and about sixty volumes of Sunday-school books, including the "Do-Good Library" (9 vols., Philadelphia, 1868) and the "Pewit's Nest Series" (12 vols., 1876).

FINN, Henry J., actor, b. in New York city in 1782; d. on Long Island sound, 13 Jan., 1840. He received his early education at schools in New Jersey, and studied at Princeton. Thereafter he began the study of law in New York city. He appeared on several occasions under an assumed name, as an actor of small parts, at the old Park theatre. At this time his father died, and, as his mother was impoverished, she and her son set sail for England. In London, Finn at first was a teacher, cultivated a taste for painting, and joined a company of travelling players. Eventually his ability procured him an engagement at the London Haymarket theatre. In 1811 he appeared in Montreal, and thereafter played at other places, being in Savannah, Ga., in 1818–'20. During the latter year he was for a brief period co-editor of the "Georgian." In 1821 the actor went again to London, occasionally playing in dramas at the Surrey theatre, and practising the art of miniature painting for a livelihood. In 1822 he once more returned to his native land. He appeared as an actor in Boston, where for years he was a manager and performer. In Boston he set up, successfully, for a wit and punster in the manner of Thomas Hood, and relinquished heroic parts for comic and eccentric characters. Among these new assumptions were Paul Pry, Billy Black, Mawworm, and Dr. Pangloss. For ten years afterward his time was devoted to starring tours in large cities, and monologue variety entertainments in smaller places. He accumulated a handsome competence. Returning toward his Newport home, where he was proprietor of a straw-hat factory, he was lost on the steamer "Lexington," which was burned on Long Island sound. He left a widow and twelve children. Finn wrote several dramas that were successfully produced but never published. His "Comic Annuals" were favorably received, but their witticisms, puns, and sayings, being largely imitative, have perished.

FINNEY, Charles Grandison, clergyman, b. in Warren, Litchfield co., Conn., 29 Aug., 1792; d. in Oberlin, Ohio, 16 Aug., 1875. He removed with

his father to Oneida county, N. Y., in 1794, and when about twenty years old engaged in teaching in New Jersey. He began to study law in Jefferson county, N. Y., in 1818, but, having been converted in 1821, studied theology, was licensed to preach in the Presbyterian church in 1824, and began to labor as an evangelist. He met with great success in Utica, Troy, Philadelphia, Boston, and New York. On his second visit to the last city, in 1832, the Chatham street theatre was bought and made into a church for him, and the New York "Evangelist" established as an advocate of the revival. His labors here resulted in the establishment of seven "free Presbyterian" churches, and in 1834 he became pastor of the Broadway Tabernacle, which had been built especially for him. Mr. Finney accepted, in 1835, the professorship of theology at Oberlin, which had just been founded by his friends, and retained it until his death. Here he assisted in establishing the "Oberlin Evangelist," and afterward the "Oberlin Quarterly." He also became pastor of the Congregational church in Oberlin in 1837, but continued at intervals to preach in New York and elsewhere. He spent three years in England as a revivalist, in 1849–'51 and 1858–'60, adding to his reputation for eloquence, and in 1851–'66 was president of Oberlin. Prof. Finney relied greatly on doctrinal preaching in his revivals, as opposed to animal excitement, and his sermons were plain, logical, and direct. He was an Abolitionist, an anti-mason, and an advocate of total abstinence. His chief works are "Lectures on Revivals," which have been translated into several foreign languages (Boston, 1835; 13th ed., 1840; enlarged ed., Oberlin, 1868); "Lectures to Professing Christians" (Oberlin, 1836); "Sermons on Important Subjects" (New York, 1839); and "Lectures on Systematic Theology" (2 vols., Oberlin, 1847; London, 1851). After his death were published his "Memoirs," written by himself (New York, 1876).



C. G. Finney

FINOTTI, Joseph M., author, b. in Ferrara, Italy, in 1817; d. in Denver, Col., in 1879. He studied with a view of entering the Austrian army, but afterward changed his plans and entered the Jesuit college, Rome. He joined the Jesuit order, and, on the completion of his theological studies, came to the United States in 1845. He was ordained priest, and stationed at St. Mary's church, Alexandria, Va., where he had charge of an extensive mission both in Virginia and in Maryland. He built St. Ignatius's church, in Prince George county, Md. He left the Jesuit society in 1852, and went to Boston, where he became a member of the bishop's household and literary editor of the Boston "Pilot." He was also pastor of the Brookline and other missions, and established the Catholic cemetery of Holyrood. His health failing, he was sent to St. Mary's seminary, Cincinnati, whence he went to Omaha, and finally to Central City, Col., in 1877, and had charge of that parish up to the time of his death. His principal works are a "French Grammar," published in Italy; "A Month of Mary" (1853); "Life of Blessed Paul of the Cross" (1860); "Italy in the Fifteenth Century"; "Diary of a Soldier" (1861); "The French Zouave" (1863); "Herman the Pianist" (1863); "The Spirit of St. Francis of Sales" (1866); "Works of the Rev. Arthur O'Leary"; and "Life of Blessed Peter Claver." His most important work, never completed, was his "Bibliographia Catholica Americana." He published one volume of it in 1872.

FIRM, Joseph L., inventor, b. in Williamsburg, N. Y., 19 March, 1837. He was educated in the public schools, served an apprenticeship in the press-room of Harper Brothers, and in 1859 was engaged in the Frank Leslie publishing house. Since that date his connection with the house has been continuous. He has devoted much time to improvements in printing machinery, and invented and secured patents on perfecting presses, web perfecting presses, and paper-folders. He is also the inventor of a process of printing on glass from electrotype plates, in colors or otherwise.

FIRMIN, Giles, author, b. in Suffolk county, England, in 1615; d. in Ridgwell, Essex, England, in April, 1697. He entered Cambridge university in 1629, but left before taking his degree. In 1632 he came to New England in company with John Wilson, but returned to England before October 1633. In 1637 he again crossed the sea, and was employed, with John Higginson, to take notes of the proceedings of the synod in that year. He settled at Ipswich, where he practised medicine. He married the daughter of the Rev. Nathaniel Ward, and was clerk of the writs at Ipswich in 1641–'2. He sailed for England in 1644, but was wrecked off the coast of Spain, and did not reach his destination till the following summer. In 1646 he lived at Colchester, Essex, and in 1651 was settled as pastor at Shalford. He was dismissed by the congregation there in 1662, and afterward practised medicine and preached at Ridgwell. He was the author of many published sermons and theological treatises. His most important work was "The Real Christian" (1670), several times reprinted in England and once in Boston, Mass. See a memoir by John W. Dean (Boston, 1866).

FISH, Asa Israel, lawyer, b. in Philadelphia, Pa., in February, 1820; d. there, 5 May, 1879. He was graduated at Harvard in 1842, studied law at the law-school there, was admitted to the bar in Philadelphia in 1846, and began practice in that city. From 1853 till 1862 he was one of the editors of the "American Law Register." Among his many contributions to legal literature are notes to "Troubat and Haly's Practice," "Tidd's Practice," "Selwyn's Nisi Prius," and "Williams on Executors and Administrators." He was well known as a Shakespearian scholar.

FISH, Benjamin, engineer, b. near Trenton, N. J., in 1785; d. in Trenton, 22 June, 1880. In 1812, during the war with England, he was employed in transporting commissary and ordnance stores for the government. During the construction of the first railroads in the United States he undertook to connect New York and Philadelphia by rail. It is related concerning his management of the line that his rule was to wait one hour for a train, and then send out a locomotive to look for it, and that once, when asked by a conductor how long he should wait, his answer was, "Wait, sir, till you learn something." Mr. Fish was largely interested in various railroad and canal enterprises. He represented the town of Nottingham in the New Jersey legislature in 1833.

FISH, Henry Clay, clergyman, b. in Halifax, Vt., 27 Jan., 1820; d. in Newark, N. J., 2 Oct., 1877. His father was a Baptist clergyman. The son studied at an academy, taught for two years in

Massachusetts, and then entered the Union theological seminary in New York, where he was graduated in 1845. On the following day he was ordained pastor of the Baptist church at Somerville, N. J., and remained there till January, 1851, when he entered on the pastorate of the 1st Baptist church in Newark, N. J. In 1858 the degree of D. D. was conferred upon him by the University of Rochester, N. Y. At the beginning of the civil war he actively supported the National government, spread the flag of the United States on his altar, and caused the National anthems to be sung in his church services. On 1 June, 1864, he was drafted into the military service, and, determining at once to go to the field, he notified the officers of the church to that effect. He was persuaded with great difficulty to relinquish his purpose, and allow a substitute to be sent in his stead. He was a man of great industry, and was actively engaged in advancing the interests of education and missions. He also did much by his writings to popularize life insurance. Beside a large number of tracts and sermons, he was the author of "Primitive Piety Revived," a prize essay (1855; Dutch translation, Utrecht, 1860); "The Price of Soul Liberty, and Who Paid it" (1860); "Harry's Conversion" (1872); "Harry's Conflicts" (1872); "Hand-book of Revivals" (1874); and "Bible Lands Illustrated" (1876). Among his numerous compilations, abounding with annotations, are "History and Repository of Pulpit Eloquence" (1856); "Pulpit Eloquence of the Nineteenth Century" (1857); "Select Discourses translated from the French and German" (1858); and "Heaven in Song" (1874).

FISH, Melanthon Williams, physician, b. in Kortright, Delaware co., N. Y., 20 March, 1828. He was educated in the Wesleyan seminary at Albion, Mich., studied medicine in the Rush medical college, Chicago, Ill., where he was graduated in 1854, travelled extensively in Europe, Asia, Africa, and America, and in 1856 went to Shanghai, China, where he filled for three years the office of inspector of the imperial customs. He was also for a time U. S. vice-consul in that city. In 1862, after residing six years in China, he returned to the United States, and entered the national army, in which he served as regimental, brigade, and division surgeon till the end of the war. He then settled in Oakland, Cal., where he became in 1872 professor of physiology in the medical department of the University of California.

FISH, Nicholas, soldier, b. in New York city, 28 Aug., 1758; d. there, 20 June, 1833. He entered the College of New Jersey at the age of sixteen, but soon left and began the study of law in the office of John Morin Scott. In the spring of 1776 he was appointed aide-de-camp to Gen. Scott; on 21 June of that year, major of brigade under the same officer; on 21 Nov., major of the 2d New York regiment, and at the close of the war was a lieutenant-colonel. He was in both battles of Saratoga, in 1778 was a division inspector under Steuben, commanded a body of light-infantry at the battle of Monmouth, served in Sullivan's expedition against the Indians in 1779, was attached to the light-infantry under Lafayette in 1780, and in 1781 took an active part with his regiment in the operations that resulted in the surrender of Cornwallis. He was major of the detachment under Hamilton which gallantly stormed a British redoubt at Yorktown. Col. Fish was an excellent disciplinarian, was an intimate friend of Alexander Hamilton, and possessed in a high degree the confidence of Washington. He was appointed adjutant-general of the state of New York in April, 1786, an office which he held many years. He was a supervisor of the revenue under Washington in 1794, and an alderman of New York city from 1806 to 1817. He married Miss Stuyvesant, a descendant of the Dutch colonial governor of New Amsterdam. Col. Fish was an active member of many of the benevolent, literary, and religious institutions of his native city, and became president of the New York society of the Cincinnati in 1797.—His son, **Hamilton,** statesman, b. in New York city, 3 Aug., 1808, was graduated at Columbia in 1827, studied law, and was admitted to the bar in 1830. He was for several years a commissioner of deeds. In politics he was a Whig, and was the defeated candidate of that party for the state assembly in 1834. In 1842 he was elected a representative in congress from the sixth district of New York over John McKeon, the Democratic candidate, and served one term. In 1846 he was a candidate for lieutenant-governor. The Whig candidate for governor, John Young, was elected, but Mr. Fish, who had incurred the hostility of the anti-renters by his warm denunciation of their principles, was defeated. His successful competitor, Addison Gardiner, a Democrat who had received the support of the anti-renters, resigned the office in 1847 on becoming a judge of the court of appeals, and Mr. Fish was elected in his place. In 1848 he was chosen governor by about 30,000 majority, the opposing candidates being John A. Dix and Reuben H. Walworth. In 1851 he was elected U. S. senator in place of Daniel S. Dickinson. In the senate he opposed the repeal of the Missouri compromise, and acted with the Republican party from its formation to the end of his term, though he was not especially prominent in the party. When his senatorial term expired in 1857 he went to Europe with his family, and remained till shortly before the beginning of the civil war. On his return he took an active part in the campaign that resulted in the election of Abraham Lincoln. In January, 1862, in conjunction with Bishop Ames, he was appointed by Sec. Stanton a commissioner to visit the U. S. soldiers imprisoned at Richmond and elsewhere, "to relieve their necessities and provide for their comfort." The Confederate government declined to admit the commissioners within their lines, but intimated a readiness to negotiate for a general exchange of prisoners. The result was an agreement for an equal exchange, which was carried out substantially to the end of the war. In 1868 he aided in the election of Gen. Grant, was appointed secretary of state by him in March, 1869, and was reappointed at the beginning of his second term in March, 1873, serving from 11 March, 1869, to 12 March, 1877. He introduced a system of examinations of applicants for consulates, to test their knowledge of subjects connected with their duties. On 9 Feb., 1871, the president appointed him one of the commissioners on the part of the United States to negotiate the treaty of Washington, which was signed by him on 8 May of that year.

He effected a settlement of the long-standing northwestern boundary dispute, giving the island of San Juan to the United States, and successfully resisted an effort by Great Britain to change the terms of the extradition treaty by municipal legislation. In the settlement of the Alabama question he procured the acceptance of a doctrine by the Geneva tribunal, securing the United States against claims for indirect damages arising out of Fenian raids, or Cuban filibustering expeditions. In November, 1873, he negotiated with Admiral Polo, Spanish minister at Washington, the settlement of the "Virginius" question. He was for some years president of the New York historical society, and was president-general of the New York society of the Cincinnati.—Hamilton's son, **Nicholas,** b. in New York city, 17 Feb., 1846, was graduated at Columbia in 1867, and at Harvard law-school in 1869. He was appointed assistant secretary of the United States legation at Berlin on 1 July, 1871, and became secretary of the legation in July, 1874. He was afterward appointed minister to Switzerland and Belgium.

FISHBURN, William, soldier, b. in 1760; d. in Walterborough, S. C., 3 Nov., 1819. He was on the staff of Gen. Anthony Wayne, to whom he was aide-de-camp at the capture of Stony Point, and afterward attained the rank of major-general. He was a member of the convention that framed the constitution of South Carolina, and subsequently a member of the legislature.

FISHER, Alexander Metcalf, educator, b. in Franklin, Mass., in 1794; d. 22 April, 1822. He was graduated at Yale in 1813, spent one year in the divinity-school, and was a tutor in the college from 1815 till 1817, when he became professor of mathematics, natural philosophy, and astronomy. This chair he held until his death by drowning in the shipwreck of the "Albion" off the Irish coast. He contributed papers on mathematics and physics to Silliman's "Journal of Science."

FISHER, Alvan, artist, b. in Needham, Mass., 9 Aug., 1792; d. in Dedham, Mass., 16 Feb., 1863. He was intended for a mercantile career, but began the study of painting at the age of eighteen with an ornamental painter named Pennyman. In 1814 he began as a portrait-painter, and soon afterward undertook barn-yard scenes, winter landscapes, and cattle-pieces. In 1825 he went to Paris to study. He subsequently returned to portrait-painting, which he practised for many years in Boston. One of his best works is a portrait of Spurzheim, painted after death, from recollection, in 1832.

FISHER, Charles, Canadian statesman, b. in Fredericton, New Brunswick, in September, 1808; d. there, 8 Dec., 1880. He was graduated at King's college, New Brunswick, studied law, and was admitted to the bar. He was elected to parliament in 1837, and in March, 1865, was rejected for advocating a union of the British provinces. He was re-elected soon afterward, was a member of the executive council in 1848–'51, and was appointed in 1852 a commissioner to codify the provincial statutes. He was attorney-general in 1854–'61, and in April, 1866. He was a delegate, on the question of union, in 1864, and again in 1866, to London, where its terms were arranged; and in July, 1865, was a delegate to the Trade convention at Detroit.

FISHER, Charles Harris, physician, b. in Killingly, Windham co., Conn., 30 June, 1822. He obtained a classical education by his own exertions, and studied medicine under Alfred C. Post, of New York, in the University medical college in New York city, at Harvard, and the medical department of Dartmouth college, where he was graduated in 1848. He established himself at Scituate, R. I., giving special attention to surgery and uterine diseases, and, after practising there for thirty years, removed to Providence. He served in the state senate in 1869–'70 and 1877–'9, became a member of the state board of education in 1870, and the same year was appointed chairman of the Rhode Island fish commission. He was also president of a bank for many years, and has been chairman of various library and benevolent associations, and superintendent of public schools. On the establishment of the state board of health, in 1878, he was appointed a member, and became secretary. In 1880 he was made state registrar and commissioner of public health on the creation of those offices. He prepared the annual reports of the vital statistics of Rhode Island from 1878 to 1885, and those of the state board of health since 1879.

FISHER, Clara, actress, b. in London, England, in 1811. She first appeared in burlesque plays in London at the age of six, and thereafter, for about five years, acted in the principal theatres of Great Britain and Ireland. In 1822 she returned to Drury Lane theatre, London, performing the characters of boys and soubrettes. In 1828 Miss Fisher came to the United States and made her appearance at the New York Park theatre in operettas, burlesques, and extravaganzas, most of her characters being in extreme contrasts, and requiring rapid changes of costume. With the many she was particularly successful in the delivery of Scottish heroic song. Her "Hurrah for the Bonnets of Blue" and "All the Blue Bonnets are over the Border" were great favorites. Of her ballads, "The Dashing White Sergeant," "Buy a Broom," "Since then I'm doomed," and "Home, Sweet Home," became universally popular. In this manner, for several years, Miss Fisher travelled throughout the Union with great popularity. Children were named for her, and young ladies affected her lisp and manner. Eventually, however, her budget of songs was too often rehearsed, her half dozen plays were worn to weariness, and she had nothing new to offer. In 1834 she was married to James C. Maeder, an Irish musician, and then betook herself to playing parts in the legitimate drama with only qualified success. At the instigation of her husband, she ventured to appear in opera, but beside skilled vocalists her voice showed great imperfection, both as to quality and education, and she was soon compelled to retire. Her last appearance on the stage was in 1851, in New York city. It is difficult to account for the "Clara Fisher craze" of 1830, for it was founded on limited dramatic ability and moderate personal attractions. Hers were only the comparatively small accomplishments of ballad singing, romping, and dancing, in plays that were adapted to her capability.

FISHER, David, politician, born in Somerset county, Pa., 3 Dec., 1794; d. near Mt. Holly, Clermont co., Pa., 7 May, 1886. He removed to Ohio, where he grew up a pioneer farmer, and received but a scanty education. He became a lay preacher and a newspaper contributor, and in 1842 entered the Ohio house of representatives. In 1846 he was elected as a Whig to the National house of representatives, serving from 6 Dec., 1847, till 3 March, 1849. He was an ardent protectionist in politics, and was noted as a philanthropist.

FISHER, Ebenezer, clergyman, b. in Charlotte, Me., 6 Feb., 1815; d. in Canton, N. Y., 21 Feb., 1879. He became a Universalist clergyman, and in 1858 was chosen to be the first president of the theological school connected with St. Lawrence university, at Canton, N. Y. He published "The

Christian Salvation: a Discussion with J. H. Walden" (Boston, 1869). A "Biography of Dr. Fisher" was published in Boston in 1880.

FISHER, Frances C., author, b. in Salisbury, N. C. She is the eldest daughter of Col. Charles F. Fisher, who was killed at the battle of Bull Run. Her first novel, "Valerie Aylmer" (New York, 1870), written for amusement, under the pen-name of "Christian Reid," proved eminently successful. She afterward published, in serial form, in "Appletons' Journal," a novel entitled "Morton House," a story of southern life of thirty years ago (1871). Her other works are: "Mabel Lee" (1871); "Ebb Tide" (1872); "Nina's Atonement" (1873); "A Daughter of Bohemia" (1873); "Carmen's Inheritance" (Philadelphia, 1873); "A Gentle Belle" (New York, 1875); "Hearts and Hands" (1875); "A Question of Honor" (1875); "Land of the Sky" (1875); "After Many Days" (1877); "Bonny Kate" (1878); "A Summer Idyl" (1878); "Hearts of Steel" (1882); "Armine" (1884); "Roslyn's Fortune" (1885); and "Miss Churchill" (1887).

FISHER, George Jackson, physician, b. in North Castle, Westchester co., N. Y., 27 Nov., 1825. He was descended from an old Dutch family of Westchester county, N. Y., and studied medicine with Dr. Nelson Nivison, and in the medical department of the University of New York, where he was graduated in 1849. He began practice in Mecklenburg, N. Y., and removed to Sing Sing in 1851, where he was physician and surgeon to the state prison in 1853–'4. He was U. S. examining surgeon for twenty years, and in 1874 was president of the New York state medical society. He is the author of "Biographical Sketches of Deceased Physicians of Westchester County" (New York, 1861); "On Animal Substances Employed as Medicines by the Ancients" (1862); "Diploteratology, an Essay on Compound Human Monsters," printed in the "Transactions" of the New York state medical society (1865–'8); "On the Influence of Maternal Mental Emotion in the Production of Monsters" (1870); "Teratology" (1875); "A Brief History of the Discovery of the Circulation of the Blood" (1877); "Sketches of some of the Old Masters of Anatomy, Surgery, and Medicine" (1880–'3); and "History of Surgery," in the "International Encyclopædia of Surgery" (1886).

FISHER, George Park, theologian, b. in Wrentham, Mass., 10 Aug., 1827. He was graduated at Brown in 1847, and studied theology in the divinity-school of Yale, and in that at Andover, Mass. In 1852 he visited Germany, where he continued his theological studies. On his return from Europe he was appointed professor of divinity in Yale, and ordained pastor of the college church, 24 Oct., 1854. He filled this office till 1861, when he was elected professor of ecclesiastical history in Yale divinity-school. He has been a frequent contributor to the "New Englander," and became one of its editors in 1866. He has also published numerous articles in the "North American Review," the "British Quarterly," the "Bibliotheca Sacra," and the "Princeton Review." In 1865 he issued a volume entitled "Essays on the Supernatural Origin of Christianity, with special reference to the Theories of Renan, Strauss, and the Tübingen School" (enlarged ed., 1871). He published a "Life of Benjamin Silliman" in 1866; "The History of the Church in Yale College"; and "Discourses on the Lives of Drs. N. W. Taylor and J. W. Gibbs." He delivered, in 1871, a course of lectures at the Lowell institute, Boston, on the Reformation, and from these resulted a volume on the "History of the Reformation" (1873). In 1877 he delivered twelve Lowell lectures on the "Rise of Christianity, and its Historical Environment." His later works are "The Beginnings of Christianity, with a View of the State of the Roman World at the Birth of Christ" (1877); "Faith and Rationalism" (1879); "Discussions in History and Theology" (1880); "The Christian Religion" (1882); "The Grounds of Theistic and Christian Belief" (1883); and "Outlines of Universal History" (1885).

FISHER, John Charlton, Canadian journalist, b. probably in England; d. at sea in September, 1849. After founding and editing the New York "Albion," he went to Canada in 1823 to take charge of the "Official Gazette," published at Quebec. In 1831 he was requested to cease publishing his political articles, as they did not accord with the views of the party then in power in Great Britain, and thereafter the "Gazette" was reduced to a mere official sheet. He edited the "Quebec Mercury" for a few years, and in 1841 began the "Conservative," a weekly paper. He was at one time president of the Quebec literary and historical society.

FISHER, John Dix, physician, b. in 1799; d. 3 March, 1850. He was graduated at Brown in 1820, studied medicine, and received his degree from Harvard in 1825. He aided in organizing the Perkins institution for the blind in Boston, Mass., having first visited Europe to inform himself of the methods of instructing the blind that were practised there. He participated in the management of the institution, and was also visiting physician to the Massachusetts general hospital. He was the author of a "Description of the Distinct, Confluent, and Inoculated Small-pox, Varioloid Disease, Cow-pox, and Chicken-pox" (Boston, 1834).

FISHER, Jonathan, clergyman, b. in New Braintree, Mass., 7 Oct., 1768; d. in Blue Hill, Me., 22 Sept., 1847. He was the son of a Revolutionary officer who died in the service, was educated by his uncle, Joseph Avery, the minister of Holden, Mass., and developed a remarkable aptitude for handicraft work. He began late to prepare for college, and was graduated with honor at Harvard in 1792. He then studied theology at Cambridge, acquiring unusual familiarity with the Hebrew language, and was installed as the Congregational minister at Blue Hill in 1796. While in college he devised a phonetic alphabet and system of stenography, which he used in writing his sermons. He pursued for years the compilation of a Hebrew lexicon on the plan developed at the same time by other philologists, whose publications caused him to abandon the project of publishing his work. He painted portraits, and engraved on wood the illustrations to a work that he published on "Scripture Animals." He also published a volume of "Miscellaneous Poems," chiefly on biblical subjects.

FISHER, Joshua, physician, b. in Dedham, Mass., 17 May, 1748; d. in Beverly, Mass., 15 March, 1833. He was graduated at Harvard in 1766, studied medicine, and began practice. When hostilities with Great Britain began in 1775 he volunteered as surgeon on a privateer, and was captured, but escaped to France, again entering the service. After the war he settled in practice at Beverly, Mass., and attained a high reputation in his profession. He was an ardent student of nature, and at his death bequeathed $20,000 to found at Harvard a professorship of natural history, comprehending the three kingdoms—animal, vegetable, and mineral—or a part of them. He was president of the Massachusetts medical society. He published a "Discourse on Narcotics" (1806). See "A Brief Memoir of Joshua Fisher, M. D.," by Dr. Walter Channing.

FISHER, Joshua Francis, author, b. in Philadelphia, Pa., 17 Feb., 1807; d. there, 21 Jan., 1873. He was graduated at Harvard in 1825, studied law, and was admitted to the Philadelphia bar in 1829, but never practised. Mr. Fisher was one of the incorporators of the Pennsylvania institution for the instruction of the blind, the second of its kind in America. He remained one of its trustees until his death, was president for one year, and rendered important services to the institution by his examination of the systems of instruction in Europe during three foreign tours, and the reports of his conclusions. Early in life he became interested in historical studies, particularly those relating to America and to Pennsylvania, and was one of the earliest and most industrious members of the Historical society of Pennsylvania. In 1829, when only twenty-two years old, he delivered before the society "An Account of the Early Poets and Poetry of Pennsylvania," which was published in the "Memoirs" of the society. His contributions to the society were numerous and valuable. The most important was his address on the "Private Life and Domestic Habits of William Penn" (1836). Mr. Fisher was one of the earliest advocates of minority representation, and, with perhaps one exception, the first American writer on that subject. He published "The Degradation of our Representative System and its Reform," proposing a plan of reform different from those of all other writers, which attracted much attention among students of the subject in this country and in Europe (1863); "Reform of Municipal Elections" (1866); and "Nomination of Candidates" (1868).

FISHER, Michael Montgomery, educator, b. near Rockville, Ind., 8 Oct., 1834. He was graduated at Hanover college, Ind., in 1855, and was chosen professor of Latin at Westminster college, Fulton, Mo. In 1860 he was ordained pastor of the Presbyterian church at Fulton, at the same time retaining his professorship. In 1870 he founded Independence female college. He was also the founder of Bellewood female college, near Louisville, Ky. In 1874 he returned to Westminster college, and in 1877 became professor of Latin in the University of Missouri. He has published "The Three Pronunciations of Latin" (St. Louis, 1878; 3d ed., New York, 1884), and is also the author of an historical work on "Education," and is now (1887) engaged on a series of Latin text-books.

FISHER, Nathaniel, clergyman, b. in Dedham, Mass., 8 July, 1742; d. in Salem, Mass., 20 Dec., 1812. He was the son of a farmer of Dedham, and was an uncle of Fisher Ames. He was graduated at Harvard in 1763, and employed as a missionary teacher in Nova Scotia about the beginning of the Revolutionary war. In 1777 he was ordained by Dr. Robert Lowth, the bishop of London, and had charge of the churches at Annapolis and Granville, Nova Scotia, from 1778 till 1782, when he returned to Massachusetts. He was immediately invited to the rectorship of St. Peter's church in Salem, and installed there after taking the oath of allegiance. He was prominent in organizing the Protestant Episcopal church in New England. A volume of his sermons was published after his death, edited by his friend and parishioner, Judge Joseph Story (1818).

FISHER, Philip, clergyman, b. in Madrid, Spain, at the close of the 16th century; d. in Maryland in 1652. Although he was known on the records of the Jesuit society and in Maryland as Philip Fisher, his real name appears to have been Thomas Copley. He was descended from an old English Roman Catholic family. When Lord Baltimore applied to the provincial of the Jesuits in England for missionaries, on behalf of the Roman Catholic settlers, Father Fisher furnished the means by which the first missionaries were sent out and maintained. He came to Maryland, 8 Aug., 1637, accompanied by Father Thomas Knolles. He was appointed superior of the mission, and obtained for it several thousand acres of land under Lord Baltimore's conditions of plantation. These lands were cleared and put under cultivation by his direction, and for two centuries met the cost of maintaining worship in these parts of Maryland. In 1639 his term as superior expired, and he was stationed at the chapel of St. Mary's, the capital of the colony, but resumed his office in 1642. During the rebellion of Clayborne he fell into the hands of Ingle, Clayborne's lieutenant, who treated him as a criminal, and put him in irons. After being confined for some time, he was sent to England, where he was indicted under a statute which made it death for a priest ordained abroad to come into England. He pleaded that he had not come of his own will, and the judges directed an acquittal. He was, however, kept in prison for some time, and on his release was sentenced to perpetual banishment. On the suppression of Clayborne's rebellion he returned to America, landed on the coast of Virginia in January, 1648, and made his way with difficulty to St. Mary's. The rest of his life was spent among his Indian converts.

FISHER, Redwood S., statistician, b. in Philadelphia, Pa., in 1782; d. there, 17 May, 1856. He was a merchant of Philadelphia, but removed to New York city, edited a daily newspaper, and took an active part in public affairs. He published several volumes on political economy and statistical subjects, one of which is "The Progress of the United States of America from the Earliest Periods, Geographical, Statistical, and Historical" (New York, 1854). He also edited a "Gazetteer of the United States" (New York).

FISHER, Samuel Reed, clergyman, b. in Norristown, Pa., 2 June, 1810; d. in Tiffin, Ohio, 5 June, 1881. He was graduated at Jefferson college in 1834, licensed to preach in 1836 by the synod of the Reformed church, and in 1840, after preaching four years at Emmettsburg, Md., became connected with the publication office of the Reformed church, which had just been established at Chambersburg, Pa. During the same year he became associated with the Rev. Dr. Schneck in the editorship of the "Reformed Church Messenger," and was chosen stated clerk of the church. From 1845 he had the special management of the publication interests of the church, was most of the time sole editor of the "Messenger," and held the office of stated clerk until his death. Besides several sermons preached on special occasions, Dr. Fisher prepared and published the following works: "Exercises on the Heidelberg Catechism" (Chambersburg, Pa., 1844); "Heidelberg Catechism Simplified" (1850); "The Rum-Plague," a temperance story, translated from the German of Zschokhe (New York, 1853); and "The Family Assistant" (1855). His death occurred while he was in attendance at the general synod of the church.

FISHER, Samuel Ware, educator, b. in Morristown, N. J., 5 April, 1814; d. at College Hill, near Cincinnati, Ohio, 18 Jan., 1874. His father was a Presbyterian pastor at Morristown. The son was graduated at Yale in 1835, and he entered Princeton theological seminary, but after two years went to the Union theological seminary, New York city, where he was graduated in 1839. Before leaving the seminary he was called to the pastorate

of the Presbyterian church in West Bloomfield, now Montclair, N. J. He was pastor there for three and a half years, and then for four years in Albany, where he achieved a high reputation as a pulpit orator. From Albany he was called in 1847 to Cincinnati, as a successor to Rev. Dr. Lyman Beecher. This pastorate he always considered the most effective work of his ministry, but resigned in 1858 to accept the presidency of Hamilton college, Clinton, N. Y. Here his scholarship, his eloquence, and his executive ability effected a more liberal endowment and increased efficiency. In September, 1867, finding his pulpit work more congenial, Dr. Fisher resigned and accepted a call from the Westminster Presbyterian church in Utica, but in May, 1870, he was stricken with paralysis. From the first attack he recovered, but did not regain the full use of his speech, and therefore resigned his pastorate in 1871, and was able to partially resume his duties, but a second attack compelled his resignation of all active duties, and he removed to Cincinnati. He was the author of "Three Great Temptations of Young Men, with several Lectures addressed to Business and Professional Men" (Cincinnati, 1852). Only a few of his sermons, orations, and addresses were published. A volume of "Occasional Sermons and Addresses" appeared in New York in 1860, and a course of sermons on the "Life of Christ" at Utica after his death.—His nephew, **Samuel Sparks,** lawyer, b. in St. Joseph county, Mich., 11 April, 1832; drowned in the Susquehanna river, in Luzerne county, Pa., 14 Aug., 1874, studied law in Philadelphia, went to Cincinnati in 1854, and was for many years engaged there in the managing of patent cases. He was colonel of the Ohio national guard, and during the last four months of the civil war, was in active service as acting brigadier-general on the eastern shore of Virginia. In 1869 he was appointed by President Grant commissioner of the patent-office, but resigned early in 1871, to devote his attention to private business. He was following up the Susquehanna on a pleasure journey with his son when both were drowned. He published six volumes of "Reports of Cases Arising under Letters-Patent for Inventions in the Circuit Courts of the United States" (Cincinnati, 1868–'74).

FISHER, Theodore Willis, physician, b. in Westboro, Mass., 29 May, 1837. He was graduated in medicine at Harvard in 1861, was in that year resident physician of the city institutions in Boston harbor, a surgeon in the volunteer army in 1862–'3, and from 1863 to 1870 assistant superintendent of the Boston lunatic hospital. He then established himself in practice in Boston, making a specialty of mental diseases, and became examining physician for the board of directors for public institutions, and a frequent expert in the courts in cases of insanity. In 1881 he became superintendent of the Boston lunatic hospital. Since 1884 he has been clinical instructor in mental diseases in Harvard. He prepared a report to the state board of health on the "Ventilation of Steam Cars" in 1875, contributed "Reports on Progress in Mental Diseases" to the Boston "Medical and Surgical Journal" annually from 1873 to 1877, besides an article on "Aphasia, or the Physiology of Speech," and other papers published in journals devoted to his specialty. He also published a popular treatise called "Plain Talks about Insanity" (1872).

FISHER, Thomas, author, b. in Philadelphia, Pa., 21 Jan., 1801; d. there, 12 Feb., 1856. He entered upon commercial pursuits, and at the same time was an active member of the Academy of natural sciences. He published "Dial of the Seasons" (Philadelphia, 1845); "Song of the Sea-Shells," and other poems (1850); and "Mathematics Simplified and made Attractive" (1853).

FISHER, William Mark, painter, b. in Boston, Mass., 15 Dec., 1841. He is of Irish parentage. He first studied at the Lowell institute, Boston, then with George Innes, and in 1864 at Paris in the Life school and with Gleyre. After painting for some years in Boston, Mass., Mr. Fisher went to London, where he has exhibited in the Royal academy. He has painted landscapes from studies in the neighborhood of Paris, also genre paintings and cattle-pieces, including "Noon" (1872); "On the Cam" (1876); and "The Meadows" (1877).

FISK, Clinton Bowen, lawyer, b. in York, Livingston co., N. Y., 8 Dec., 1828. His parents removed to Michigan in his infancy. After a successful career as merchant, miller, and banker in Michigan, he removed to St. Louis in 1859. Early in the war he became colonel of the 33d Missouri regiment in the National army, was promoted to be brigadier-general in 1862, and brevetted major-general of volunteers in 1865. After the war he was assistant commissioner under Gen. O. O. Howard in the management of the Freedman's bureau in Kentucky and Tennessee. He afterward removed to New Jersey. Gen. Fisk actively aided in establishing Fisk university, Nashville, Tenn., in 1865, and it was named for him. He has been identified with its financial and educational interests, and is president of its board of trustees. He is also a trustee of Dickinson college, of Drew theological seminary, and also of Albion college, Mich. He is trustee of the American missionary association, and also a member of the book committee of the M. E. church. He has rendered conspicuous service to Methodism in his efforts toward a reunion of the northern and southern branches of the church. He has also been identified with the temperance movement, and was the Prohibition candidate for the governorship of New Jersey in 1886. Since 1874 he has been president of the board of Indian commissioners.

FISK, Ezra, clergyman, b. in Shelburne, Mass., 10 Jan., 1785; d. in Philadelphia, Pa., 5 Dec., 1833. He was graduated at Williams in 1809, studied theology, and was licensed to preach in the Presbyterian church on 19 April, 1818. He was then ordained as an evangelist, and entered on mission work in Georgia and Philadelphia. He became in 1813 pastor of the Presbyterian church in Goshen, N. Y., where he remained twenty years. In May, 1833, Dr. Fisk was elected to the professorship of ecclesiastical history and church government in the Western theological seminary, and was on his way to enter on the duties of the office when he died. He published an oration, delivered at Williams college in 1825; a lecture on the "Inability of Sinners" (Philadelphia, 1832), etc.

FISK, James, jurist, b. about 1762; d. in Swanton, Vt., 1 Dec., 1844. He was self-educated, studied law, and rose to eminence in the profession. He was a member of the lower house of congress from 1805 till 1809, and served from 1811 till 1815. He was appointed by President Madison judge of the territory of Indiana in 1812, but declined the office after confirmation in 1815–'16. He was one of the judges of the supreme court of Vermont, and in 1817 was chosen U. S. senator, but resigned after one year's service, and subsequently was collector of customs for eight years in the district of Vermont.—His son, **Wilbur,** educator, b. in Brattleboro, Vt., 31 Aug., 1792; d. in Middletown, Vt., 22 Feb., 1839, was graduated at Brown in 1815, and studied law, but, after a long

and serious illness, abandoned the profession and entered the itinerant ministry in 1818, when he was licensed as a local preacher in the Methodist Episcopal church. He took high rank as a pulpit orator, was pastor for two years in Craftsbury, Vt., and in 1819 removed to Charlestown, Mass. At the conference of 1820 he was admitted into full membership, ordained as a deacon in 1822, and from 1823 till 1827 was presiding elder of the Vermont district, which then comprised the whole of Vermont east of the Green mountains. He was placed upon the superannuated list, but was requested, in so far as health would allow, to act as agent for Newmarket academy, at that time the only Methodist institution in New England. While here, he was chosen to make the address of welcome to Lafayette in 1824. He was also a delegate to the general conference in that year, and was chosen to write the address to the British conference. He was chaplain of the Vermont legislature in 1826, and was one of the founders and principal of the Wesleyan academy in Wilbraham, Mass., 1826–'31, and a delegate to the general conference of 1828, when he was elected bishop of the Canada conference, but declined. In 1829 he also refused the presidency of La Grange college, Alabama, and a professorship in the University of Alabama. In 1830 he was chosen first president of the Wesleyan university, in whose organization he had materially aided. The duties of that office were entered upon in 1831; the institution under his direction became the most influential of any in the Methodist denomination in America. At the general conference of 1832 his appeals in behalf of Indian missions resulted in the organization of the Oregon mission, and he was at this time instrumental in founding Williamstown academy. For years he was useful to educational interests at large by recommending or furnishing professors and presidents to the rapidly multiplying colleges of the far west. In search of health, he passed the winter of 1835–'6 in Italy, and the summer of 1836 in England, when he also represented the M. E. church of the Wesleyan conference as a delegate. He was elected bishop of that church in 1836, but declined. In 1839 he became a member of the board of education of Connecticut. He was said to be unsurpassed in eloquence and fervor as a preacher, and was often compared to Fénélon, being endowed with like moral and mental traits. The degree of D. D. was conferred on him by Augusta college, Kentucky, in 1829, and by Brown in 1835. His published works are: "Inaugural Address" (New York, 1831); "Calvinistic Controversy" (1837); "Travels in Europe" (1838); "Sermons and Lectures on Universalism: Reply to Pierpont on the Atonement, and other Theological and Educational Works and Sermons." His account of his European travels had a wide circulation and was greatly admired. His "Life and Writings" were published by the Rev. Joseph Holdich, D. D. (New York, 1842).

FISK, Pliny, missionary, b. in Shelburne, Mass., 24 June, 1792; d. in Beirût, Syria, 23 Oct., 1825. He was graduated at Middlebury college in 1814, and at Andover theological seminary in 1818. He was appointed, with Levi Parsons, by the American board, to the Palestine mission in 1818, and sailed from Boston for Smyrna, 3 Nov., 1819. After travelling extensively in Greece, Egypt, Palestine, and Syria, he joined, in May, 1825, the mission already established at Beirût, and died there of fever in the following October. Mr. Fisk was eminently fitted to be a missionary in the east, as he preached in Italian, French, Greek, and Arabic. On the day of his death he completed an "English and Arabic Dictionary," and wrote numerous papers for the "Missionary Herald." A life of Pliny Fisk was published by Alvin Bond (Boston, 1828).—His niece, **Fidelia,** missionary, b. in Shelburne, Mass., 1 May, 1816; d. there, 9 Aug., 1864, was graduated at Mount Holyoke seminary in 1839, and subsequently taught there. In 1843 she resigned her post and went to Persia as a missionary among the Nestorians, where she labored fifteen years, much of the time as teacher in a female seminary. She was the first principal of the seminary at Oroomiah. In 1858 she returned to the United States with broken health. She published "Memorial of Mount Holyoke Seminary" and "Woman and her Saviour in Persia," and at the time of her death was engaged in writing "Recollections of Mary Lyon" (Boston, 1866). See a memoir of Miss Fisk, by the Rev. Daniel T. Fiske, D. D., entitled "Faith working by Love" (1868).

FISK, Samuel, soldier, b. in Shelburne, Mass., 23 July, 1828; d. in Fredericksburg, Va., 22 May, 1864. He was graduated at Amherst in 1848, was in Andover theological seminary from 1850 till 1852, was tutor at Amherst from 1852 till 1855, then travelled a year in Europe and the east, and was pastor of the Congregational church at Madison, Conn., in 1857. He entered the National army as a private in the 14th Connecticut regiment in 1862, became captain, was for some time a prisoner in Richmond, distinguished himself in several battles, and fell at the head of his company on the second day of the battle of the Wilderness, 6 May, dying in the hospital. His letters from Europe and the east, first published in the Springfield "Republican" under the pen-name of "Dunn Browne," appeared in a volume in 1857. His "Experiences in the Army," under the same assumed name, were published in 1866.

FISKE, Daniel Willard, scholar, b. in Ellisburg, Jefferson co., N. Y., 11 Nov., 1831. When very young he disclosed an uncommon aptitude for the acquisition of languages, and a precocious interest in both literature and politics. He pursued his school education at Cazenovia seminary and at Hamilton college, but left that institution in his sophomore year to go abroad and study the Scandinavian languages. At Copenhagen he enjoyed the friendship of Prof. Rafu, the distinguished Danish archæologist. With little aid except some occasional correspondence with the New York "Tribune," he sustained himself during 1849–'52, passing two years in the University of Upsala, giving lessons in English and lecturing on American literature, and speaking Swedish so well that he commonly passed with the students for a Swede. In 1852 he returned to New York and took a place in the Astor library, where he remained as assistant until 1859, still pursuing his studies in languages, and in making a collection of Icelandic books, which soon became the most considerable in this country. So enthusiastically had he directed his attention to that enlightened island that it was said that few natives were more familiar with its geography, history, politics, and literature than he. In 1859–'60 he was general secretary of the American geographical society. In 1861–'2 he was again abroad, and attached to the American legation at Vienna under Minister John Lothrop Motley. Returning, he was editor of the daily "Journal" of Syracuse, N. Y., in 1864–'6, and through 1867 had charge of the Hartford, Conn., "Courant," from which he was called in 1868, after another extensive tour abroad, which embraced Egypt and Palestine, to the professorship of the north European

languages, and the place of chief librarian, at Cornell university. To his unremitting labors for years in the class-room, as librarian, and as director of the University press, no inconsiderable degree of the success of the institution is due. During this time he took a deep interest in the reform of the civil service, and was a most influential writer and lecturer in its behalf. In 1879 he was again abroad for five months, and visited Iceland. He had been a principal promoter in this country of the contribution of a library on the celebration of the National millennium, and upon his arrival he was the guest of the nation and accorded honors seldom if ever given before by one nation to a private citizen of another. His health failing from his severe application to college duties, he went abroad again in 1880. In that year, in Berlin, he married Miss Jennie McGraw, of Ithaca, N. Y., who died in September, 1881. In 1881 he resigned his offices at Cornell and took up his permanent residence in Florence, Italy. Although his chief work has been that of a scholar and bibliopole, he has been a voluminous contributor to various Swedish, Icelandic, and German journals, and to the American press. He was one of the famous chess tournament of 1857, and, in conjunction with Paul Morphy, edited the "American Chess Monthly" in 1857–'60, and compiled the "Book of the American Chess Congress" (New York, 1859). He has edited various university publications, such as the "Ten-Year Book of Cornell," the "Register," etc., and many bibliographical publications, such as the "University Library Bulletin," the "Bibliographia Psiupsilonica," etc. He was one of the chief promoters of the chapter-house system in the Greek letters societies. He is now engaged in completing his two private book collections, one relating to Petrarch, the other to Icelandic history and literature—the most considerable collections in existence relating to those subjects — and is printing privately a series of "Bibliographical Notices" illustrating his collections. Prof. Fiske has received the degree of A. M. from Hamilton and that of Ph. D. from Cornell.

FISKE, John, naval officer, b. in Salem, Mass., 10 April, 1744; d. there, 28 Sept., 1797. He was a son of the Rev. Samuel Fiske, of the first church, Salem. In 1775 he was a master mariner, and became captain of the "Tyrannicide," the first war-vessel commissioned by the state of Massachusetts, 8 July, 1776. He made many successful cruises in her, and was engaged in several sanguinary combats. On 10 Dec., 1777, he took command of the state ship "Massachusetts," a larger and a better vessel. After the war he engaged in commerce, and became wealthy. He was commissioned major-general of militia in 1792.

FISKE, John, author, b. in Hartford, Conn., 30 March, 1842. He is the only child of Edmund Brewster Green, of Smyrna, Del., and Mary Fiske Bound, of Middletown, Conn. The father was editor of newspapers in Hartford, New York, and Panama, where he died in 1852, and his widow married Edwin W. Stoughton, of New York, in 1855. The son's name was originally Edmund Fiske Green; in 1855 he took the name of his maternal great-grandfather, John Fiske. He lived at Middletown during childhood and until he entered Harvard, where he was graduated in 1863. He was graduated at the Harvard law-school in 1865, having been already admitted to the Suffolk bar in 1864, but has never practised law. His career as author began in 1861, with an article on "Mr. Buckle's Fallacies," published in the "National Quarterly Review." Since that time he has been a frequent contributor to American and British periodicals. In 1869–'71 he was university lecturer on philosophy at Harvard, in 1870 instructor in history there, and in 1872–'9 assistant librarian. On resigning the latter place in 1879 he was elected a member of the board of overseers, and at the expiration of the six-years' term was re-elected in 1885. Since 1881 he has lectured annually on American history at Washington university, St. Louis, Mo., and since 1884 has held a professorship of American history at that institution, but continues to make his home in Cambridge. He lectured on American history at University college, London, in 1879, and at the Royal institution of Great Britain in 1880. Since 1871 he has given many hundred lectures, chiefly upon American history, in the principal cities of the United States and Great Britain. The largest part of his life has been devoted to the study of history; but at an early age inquiries into the nature of human progress led him to a careful study of the doctrine of evolution, and it was as an expounder of this doctrine that he first became known to the public. In 1871 he arrived at the discovery of the causes of the prolonged infancy of mankind, and the part played by it in determining human development; and the importance of this contribution to the Darwinian theory, now generally admitted, was immediately recognized by Darwin and Spencer. His published books are: "Tobacco and Alcohol" (New York, 1868); "Myths and Myth-Makers" (Boston, 1872); "Outlines of Cosmic Philosophy, based on the Doctrine of Evolution" (2 vols., London, 1874; republished in Boston); "The Unseen World" (Boston, 1876); "Darwinism, and Other Essays" (London, 1879; new and enlarged edition, Boston, 1885); "Excursions of an Evolutionist" (Boston, 1883); "The Destiny of Man viewed in the Light of his Origin" (Boston, 1884); "The Idea of God as affected by Modern Knowledge" (Boston, 1885); and "American Political Ideas viewed from the Standpoint of Universal History" (New York, 1885). Mr. Fiske has in preparation a "History of the American People."

FISKE, Nathan, clergyman, b. in Weston, Mass., 9 Sept., 1733; d. in Brookfield, Mass., 24 Nov., 1799. He was graduated at Harvard in 1754, studied theology, was licensed to preach in the Congregational denomination, and began his ministry in Brookfield, Mass., in May, 1758. He organized a society for mutual advancement and intellectual culture, which published its productions, and continued the publication of essays and addresses the rest of his life. With little interruption they appeared in the Worcester "Gazette," the "Massachusetts Magazine," and the "Spy." His ministerial work was continued without interruption, and he delivered a sermon on the day of his death. He received the degree of D. D. from Harvard in 1792. Dr. Fiske's published works include "An Historical Sermon on the Settlement and Growth of Brookfield" (1775); "Oration on the Capture of Lord Cornwallis" (1781); a volume of sermons (1794); "Dudleian Lecture at Harvard" (1796); and a volume of essays entitled "The Moral Monitor," published after his death (2 vols., 1801). The last-named work was used extensively as a school-reader.—His son, **Nathan Welby,** clergyman, b. in Weston, Mass., 17 April, 1798; d. in Jerusalem, Palestine, 27 May, 1847. He was graduated at Dartmouth in 1817, and had charge of an academy in Newcastle, Me., for a year. He was chosen tutor at Dartmouth in 1818, which post he held two years, and was graduated at Andover theological seminary in 1823. In November of that

year he was ordained as an evangelist, and went to Savannah, Ga., to preach among the seamen and others not belonging to any church. In April, 1824, while yet in Savannah, he declined an invitation to supply the pastorate in Concord, N. H., during the session of the legislature, and on the same day he declined the solicitation to represent the American foreign mission board as a missionary to Palestine or to China. He was also offered the professorship of mathematics and natural philosophy in Middlebury college, Vt., but declined it, and became professor of Latin and Greek in Amherst in 1824, adding to his duties as instructor the department of belles-lettres from 1825 till 1833, and from 1833 till 1836 was professor of languages (including the modern) at Amherst. He was transferred to the chair of intellectual and moral philosophy, and held it from 1836 till the time of his death. In 1846, on account of failing health, he visited Palestine, where he died, and was buried in Jerusalem on Mount Sion. He was the father of the author Helen Hunt Jackson (*q. v.*). He published a "Manual of Classical Literature," based upon the German work of J. J. Eschenburg, with additions and a supplemental volume of plates (Philadelphia, 1836; 4th ed., 1843); "Sermons" (1850); "Young Peter's Tour Around the World"; and "Story of Aleck; or, The History of Pitcairn's Island." His biography was published, with selections from his sermons and other writings, by Heman Humphrey, D. D. (Amherst, 1850).

FISKE, Oliver, physician, b. 2 Sept., 1762; d. in Boston, Mass., in 1836. He was a son of the Rev. Nathan Fiske, of Brookfield, Mass., served for a short time in the army during the Revolutionary war, and at its close entered Harvard, where he was graduated in 1787. He began practice in Worcester in 1790, was mainly instrumental in establishing the Massachusetts medical society, and was elected its president soon after its organization. In 1803 he was appointed special justice of the court of common pleas, and during the five years succeeding 1809 was a member of the executive council. He was corresponding secretary of the Linnæan society of New England, counsellor of the American antiquarian society, and a member of the American academy of arts and sciences. He published an oration delivered at Worcester in 1797, an essay on "Spotted Fever," forming part of the "Transactions of the Massachusetts Medical Society," and other writings.

FITCH, Asa, naturalist, b. at Fitch's Point, N. Y., 24 Feb., 1809; d. 8 April, 1879. He was at first an agriculturist and country physician, but relinquished medical practice in 1838 to devote his time to scientific agriculture and the study of natural history. He was made New York state entomologist in 1854, and for many years published annual reports on insects injurious to vegetation. Most of these have been collected at intervals, and issued in three volumes by the state authorities.

FITCH, Benjamin, philanthropist, b. in New York, 13 June, 1802; d. in New York city, 7 Nov., 1883. His father, Stephen Fitch, was a Quaker, and had him educated at the Quaker settlement in Mt. Lebanon, Conn. He was taken to Buffalo in 1812 by his father, who went there to see Red Jacket, the Seneca chief, in behalf of the government. He was in Buffalo when it was burned by the British in 1813. He went to Albany, and subsequently to New York, where he became clerk in a store. In 1824 he opened a general country store in Buffalo, and subsequently engaged in the dry-goods business in Rochester, Buffalo, New York, and Chicago, retiring with a large fortune in 1853. Returning from Europe at the outbreak of the civil war, he induced many volunteers to enlist in the service by promising to care for their families, which led to his founding, in 1866, the Fitch home in Darien, Conn., for soldiers' orphans. He added a public hall and an art gallery, and also built a church in Darien. He gave the land and building for the Fitch crèche, founded in 1880. In 1881 he founded the Fitch institute, which was organized on the plan of the Cooper institute in New York. On the occasion of his last visit to Buffalo he gave $15,000 to the Charity organization society. He made liberal annual gifts of money to the children of the Fitch home.

FITCH, Ebenezer, educator, b. in Norwich, Conn., 26 Sept., 1756; d. in West Bloomfield, N. Y., 21 March, 1833. He was descended from James, minister of Saybrook and of Norwich, was graduated at Yale in 1777, and was a tutor there in 1780–'83 and 1786–'91. In 1791 he became principal of Williamstown academy, and when this became Williams college, in June, 1793, he was elected its first president, an office which he held until 1815, when he resigned to become pastor of the Presbyterian church in West Bloomfield, N. Y. He resigned this charge in 1827, but preached occasionally after that almost till the time of his death.

FITCH, Eleazar Thompson, educator, b. in New Haven, Conn., 1 Jan., 1791; d. there, 31 Jan., 1871. He was graduated at Yale in 1810, and afterward was a teacher at East Windsor Hill, and subsequently in the New Haven Hopkins grammar-school. In 1812 he entered Andover theological seminary, where, after completing the regular course, he remained, pursuing advanced studies, giving assistance in instruction, and preaching, until his election, in 1817, to succeed President Dwight in the office of professor of divinity at Yale. One branch of his work was to teach theology to graduates, and in this his classes increased so that he was led to urge upon the corporation the founding of a theological department, which was organized in 1822. In this department he filled the chair of homiletics, at the same time being college preacher and pastor, and giving instruction in the academical department in natural theology and the evidences of Christianity. He delivered to successive classes a series of sermons in systematic theology, and some of his doctrinal views thus presented becoming publicly controverted, he was compelled to defend them as publicly. Impaired health compelled him to resign his office as professor, yet he retained his connection with the theological seminary as lecturer until 1861, and with the theological faculty as professor emeritus until his death. At his resignation he became a member of the "Circle of retired Clergymen and Laymen," in whose meetings he took an active part. He wrote theological reviews and other articles for periodicals, and a volume of his sermons was published in 1871.

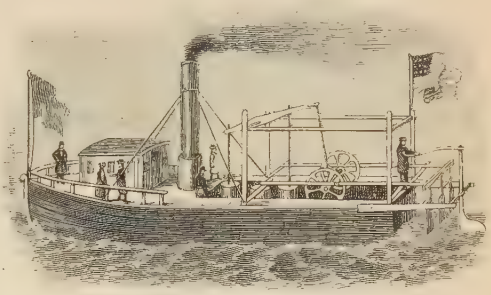
FITCH, Elijah, clergyman, b. in 1745; d. in Hopkinton, Mass., 16 Dec., 1788. He was graduated at Yale in 1765, and became a minister of the Congregational church in Hopkinton in 1771, where he remained till his death. He was the author of "The Beauties of Religion, a long Poem addressed to Youth," and also of a short poem entitled "The Choice" (Providence, 1789).

FITCH, Graham Newell, senator, b. in Le Roy, N. Y., 5 Dec., 1809. He received a classical education, studied at the medical college in Fairfield, N. Y., and settled at Logansport, Ind., in 1834, where he still (1887) resides. From 1844 till 1847 he was a professor in Rush medical college,

Chicago, and from 1878 till 1883 taught the art and science of surgery in the Indiana medical college. He was an Indiana presidential elector in 1844, 1848, and 1856, and a delegate to the National Democratic convention, New York, in 1868. From 1836 till 1839 he was a member of the legislature of Indiana, and held a seat in congress from 3 Dec., 1849, till 3 March, 1853. He was subsequently elected United States senator from Indiana, and served as such from 9 Feb., 1857, till 3 March, 1861. In the autumn of that year Dr. Fitch raised the 46th regiment of Indiana volunteers, with other troops, and was commissioned colonel. He remained in the field until November, 1862, when he was compelled to resign on account of injuries received. He commanded the land forces at the capture of Fort Pillow, at Memphis, Tenn., and also at St. Charles, Ark.

FITCH, James, clergyman, b. in Bocking, Essex, England, 24 Dec., 1622; d. in Lebanon, Conn., 18 Nov., 1702. He came to New England in 1638, and supplemented his previous excellent classical education by seven years of study under Hooker and Stone. He was pastor at Saybrook in 1646–'60, and was afterward installed as the first minister of Norwich. He preached to the Mohegans in their own language, induced them to cultivate land, and gave them some of his own. He published "First Principles of the Doctrine of Christ" (Boston, 1679), and several sermons.

FITCH, John, inventor, b. in East (now South) Windsor, Conn., 21 Jan., 1743; d. in Bardstown, Ky., in June or July, 1798. He received a common-school education, was apprenticed to a watchmaker, and after twenty-five years of home life rendered miserable by the ill-treatment of his father and elder brother, crowned the wretchedness of his condition by an unfortunate marriage, and in 1769 became a wanderer. Settling at Trenton, N. J., he was there exercising his trade of watch-maker at the beginning of the Revolution. The demand for arms induced him to become a gunsmith for the American forces, which exposed his property to destruction when the British entered the village in December, 1776. He joined the New Jersey troops, with whom he endured the rigors of a winter camp at Valley Forge, and afterward resumed his trade in Bucks county, Pa., occasionally traversing the country afoot to repair watches and clocks. Finally, under appointment of the state of Virginia as a deputy surveyor, he set out for Kentucky, knapsack on back and compass in hand, in the spring of 1780, and, after making extensive surveys between the Kentucky and Green rivers, returned to Philadelphia in the autumn of 1781. The next spring he invested in flour and goods the £150 (Pennsylvania currency) which represented the $4,000 he had gathered in Continental currency, and began another tour of western adventure. At the mouth of the Muskingum the party was attacked by Indians, two of his companions were killed, nine taken prisoners, and his goods destroyed. Fitch had the address to conciliate the leader of the band, and the endurance to sustain the rigors of the captivity, from which he escaped, and in the winter of 1782–'3, penniless and dejected, reached Warminster, Pa. Here, 15 April, 1785, he conceived the idea of steam as a motive-power, at first for carriages, but soon for vessels. His first model of a steamboat, completed this year, bore wheels at the sides; but these, being found to labor too much in the water, were replaced (in his experiments of July, 1786, upon a skiff with a steam-engine of 3-inch cylinder) with paddles. He now besieged the Continental congress, as well as the Pennsylvania legislature, for pecuniary aid to his project, and addressed the leading scientific and public men of that day, everywhere and at all times boldly affirming the practicability of sea navigation by steam vessels. Yet, though he elicited much interest among the best minds, his fervid predictions secured no money, and he acquired the reputation of being insane. Finally, by the construction, engraving, and sale of a map of the northwestern territory, all of which was done with his own hand, the impressions being



taken on a cider-press, he raised about $800, in February, 1787, formed a company of forty shares, and began a boat of sixty tons. Meanwhile, in 1786, the state of New Jersey, and in 1787 the states of New York, Delaware, Pennsylvania, and Virginia, had granted him the sole and exclusive rights to their waters for fourteen years for purposes of navigating by means of steam. Fitch's second boat, 45 feet long and 12 feet beam, with six oars or paddles on each side, and an engine of 12-inch cylinder, made its trial-trip on the Delaware, at Philadelphia, 22 Aug., 1787, in the presence and to the great satisfaction of the members of the convention to frame the Federal constitution, then in session there. A still larger boat in October, 1788, and still another in April, 1790 (see illustration), continued to demonstrate with their increased speed and facility the value of Fitch's invention, the latter boat being run during the whole summer as a regular passenger-boat between Philadelphia and Burlington, with a speed of eight miles an hour. Another boat, "The Perseverance"—designed for both freight and passengers on the Mississippi, under the Virginia patent, which gave Fitch the exclusive right of navigating "the Ohio river and its tributaries"—was unfortunately so damaged by a storm as not to be available before the expiration of the default clause in that patent. The stockholders became discouraged, and, Fitch's resources being exhausted, the project was abandoned. In 1791 he received a patent for his inventions from the United States, which was of little avail, and subsequently was lost by fire. In 1793 he went to France, there to build a steamboat; but, arriving in the midst of the revolutionary troubles, was unable to carry out his project, and, depositing his plans and specifications with the American consul at L'Orient, went to London. During this absence his drawings and papers were loaned by the consul to Robert Fulton, then in Paris, in whose possession they were for several months. In 1794, disappointed and penniless, Fitch returned to America, working his passage as a common sailor, and withdrew to his lands at Bardstown, Ky., which he found in the occupation of others; but in 1796 he again constructed a steamboat from a ship's yawl, which was moved by a screw-propeller on the Collect Pond in New York city. In the spring of 1798 he made and tried,

upon a small stream near Bardstown, a three-foot model of a steamboat; but some time between 25 June and 18 July of the same year he committed suicide by poison, died in a tavern, unattended by relative or friend, and was buried in Bardstown, where no stone marks his resting-place. How mournfully prophetic are the following words from his journal: "The day will come when some more powerful man will get fame and riches from MY invention; but nobody will believe that poor John Fitch can do anything worthy of attention." There have been several later claimants to the invention of steamboats, noticeably Robert Fulton; but when, in 1817, the original patents, drafts, specifications, and models, both of Fitch's and of Fulton's boats, were exhibited before a committee of the New York legislature, raised upon the petition of Gov. Ogden, of New Jersey, in which both parties were represented by the ablest legal talent of the day, and witnesses of the highest character and personal knowledge of the facts were examined, the committee finally reported that "the steamboats built by Livingston and Fulton were in substance the invention patented to John Fitch in 1791, and Fitch during the term of his patent had the exclusive right to use the same in the United States." Fitch's life has been written by Thompson Westcott (Philadelphia, 1857), and by Charles Whittlesey in Sparks's "American Biography." See also an article in O'Callaghan's "Documentary History of New York" (vol. 2, 1849).

FITCH, John Lee, artist, b. in Hartford, Conn., 25 June, 1836. He studied four years in Munich and Milan under Prof. Albert Zimmermann and his two brothers, Max and Richard. His professional life has been spent in Hartford and in New York city. He is an associate of the National academy of design, and treasurer of the Artists' fund society of New York. He was for twelve years chairman of the art committee of the Century club, but declined re-election. He has achieved reputation as a painter of forest scenes, and is a close student of nature. His largest picture, "In the Woods," was exhibited at Philadelphia in 1876. Among his other works: are "On Gill Brook" (1866); "A Mountain Brook" (1870); "The Outlet" (1871); "In the Cañon, Granville, Mass." (1873); "Waiting for a Bite" (1874); "A Stray Sunbeam" (1875); "Twilight on John's Brook" (1878); "Cliff Side" (1880); "Willows on the Croton" (1884); and "Near Carmel, N. Y." (1886).

FITCH, Leroy, naval officer, b. in Indiana in October, 1835; d. in Logansport, Ind., 13 April, 1875. He was graduated at the naval academy in 1856, promoted to be master, 5 Sept., 1859, lieutenant, 21 Sept., 1862, and commander, 28 Aug., 1870. He served in the Mississippi squadron during the civil war, taking part in the capture of Forts Donelson and Pillow, the reduction of Island No. 10, and the victory over the Confederate fleet at Memphis, Tenn. On the morning of 19 July, 1863, being then in command of the steamer "Moose," he succeeded in intercepting Morgan, and frustrated his attempts to cross the Ohio at Buffington Island, having followed him for more than five hundred miles up the river. He seized Morgan's train and a portion of his guns, crippling his strength, leading to his capture. For these signal services he received complimentary letters from Gens. Burnside, Cox, and Sec. Welles. He also defended Johnsonville, Tenn., from the attack of Gen. Forrest, was present at the engagement before Nashville during the operations of Hood, and participated in many minor skirmishes with guerillas on the Mississippi, Cumberland, and Tennessee rivers. He also accompanied several land expeditions in the same section.

FITCH, Samuel, loyalist, b. in Boston, Mass., in 1720; d. in Halifax, Nova Scotia, probably in 1786. He received his education in Boston, and practised law in that city with success. In 1774, at the height of Hutchinson's unpopularity, Mr. Fitch was one of the signers of the address approving his course, and warmly espoused the royalist cause. In 1776 he removed to Halifax, Nova Scotia, where he held, under the king, the office of solicitor, or counselor at law, to the board of commissioners. He was proscribed and banished from the United Colonies in 1778, and was included in the conspiracy act of 1779. The same year (1779) he went to England, visited Hutchinson in his retirement and decline, and was appointed to deliver the loyalist address to the king. In 1783 he paid another official visit to England, remained two years, returning to Halifax in 1785, where he died.

FITCH, Simon, surgeon, b. in Horton, Nova Scotia, 2 Jan., 1820. He received his professional education in London, Paris, and the University of Edinburgh, where he was graduated in August, 1841. He settled in the same year in St. John's, New Brunswick, removed to Portland, Me., in 1855, to the city of New York in 1874, and in 1877 to Halifax, Nova Scotia. In 1871 he introduced an improvement in the double tubular trocar, by removing the projecting canula from the outside to the inside of the puncturing tube. In 1875 he invented the "Dome Trocar," with application to ovariotomy, aspiration, and transfusion, and the same year devised a coupling for instantaneous attachment and detachment of the aspirator needle. He is also the inventor of the "Handy Aspirator" (1877), the "Trocar Catheter" (1882), the "Clamp Forceps," and the "Wire Suture Twister." In 1840–'1 he was resident surgeon of the Edinburgh maternity hospital, and in 1851–'2 surgeon to the St. John's hospital, New Brunswick. He was surgeon in 1864 to the 5th corps military hospital at Fredericksburg, Va., held the same office at Fort Preble, Me., in 1867, and is at present (1887) consulting surgeon of the Provincial and city hospital, Halifax, Nova Scotia; is member of many medical societies, and has contributed to the literature of his profession works entitled "Peculiarities of the Operations of Three Great Ovariotomists: Wells, Atlee, Keith" (Philadelphia, 1872), and "Paracentesis, Aspiration, and Transfusion" (1877).

FITCH, Thomas, governor of Connecticut, b. in Norwalk, Conn., in June, 1699; d. there in July, 1774. He was graduated at Yale in 1721, studied law, and after middle life filled successively the offices of chancellor, judge of the superior court, and chief justice of his state. His principles were loyal, and, notwithstanding the growing unpopularity of his opinions, he was elected governor in 1754, and held office till 1766. In 1765, Ingersoll, the royal stamp-master of Connecticut, put himself under the protection of Gov. Fitch, and in the same year, at the general assembly held in Hartford, the governor took the oath of office prescribed in the stamp-act. Col. Putnam afterward waited on him to express the sentiments of the people as to this matter, and told him that if he refused to admit the "Sons of Liberty," who were coming to destroy the stamped paper, his house would be levelled to the dust in five minutes. In consequence of persisting in the protection of Ingersoll and holding to his loyalist sentiments, the general assembly of 1766 forced him from public life by electing William Pitkin governor of the state in his stead. Gov. Fitch at once retired to

private life. A monument, raised by public subscription, which is still standing in the private cemetery of his home in Norwalk, Conn., commemorates his "large acquirements, virtuous character, and strict fidelity in discharge of important trusts." His descendants and the collateral branches of his family are still among the most public-spirited citizens of Norwalk. See Van Rensselaer's "Ancestral Sketches" (New York, 1882).

FITCH, Thomas Davis, physician, b. in Troy, Bradford co., Pa., 14 July, 1829. He was educated in his native town and at Knox college, Galesburg, Ill., to which state his father had removed in 1846. After studying medicine and practising in Wethersfield, Ill., he was graduated at Rush medical college, Chicago, in 1854. In the same year he removed to Kewanee, Ill., and in December, 1861, entered the army as surgeon of the 42d Illinois regiment, but resigned in May, 1863. A year later he removed to Chicago, where he has since resided. He has been surgeon and lecturer on obstetrics in various Chicago hospitals, and was one of the originators in 1870 of the Woman's hospital medical college in the same city, in which institution he has filled the chair of gynecology, and the office of trustee, since its organization. Dr. Fitch is a member of several medical associations, has contributed frequently to the literature of his specialty, and is the author of "Antagonism of Opium and Quinia," a paper read before the Chicago medical society in 1865.

FITTON, James, clergyman, b. in Boston, Mass., in 1803; d. there, 15 Sept., 1881. He was ordained by Bishop Fenwick in 1827, and in 1828 was sent as a missionary to the Passamaquoddy Indians. He subsequently labored among the scattered Roman Catholics of New Hampshire and Vermont, and soon the territory between Boston and Long Island was placed under his charge, with Hartford as the centre of his district. In 1855 he removed to East Boston, where he ministered until his death. He was instrumental in establishing the College of the holy cross at Worcester, and the first Roman Catholic newspaper.

FITZ, Henry, telescope-maker, b. in Newburyport, Mass., in 1808; d. in New York city, 6 Nov., 1863. He began life as a printer, but, being of an inventive turn, learned the trade of locksmith, at which he worked for many years. In 1835 he made his first reflecting telescope, and in the winter of 1844 invented a method of perfecting object-glasses for refracting telescopes, constructing the first one out of the bottom of an ordinary tumbler. In 1845 he exhibited at the American institute fair an instrument that brought him the favorable notice of eminent astronomers, and he thenceforth devoted himself to making telescopes as a business with remarkable success. He finally succeeded in producing instruments of sixteen-inch aperture, and also made two of thirteen inches —one for the Dudley observatory at Albany, and the other for an association of gentlemen at Allegheny City, Pa. There is one of his manufacture, of twelve inches aperture, at Ann Arbor, and he completed another for the Vassar female college. Mr. Fitz's methods were entirely his own devising. When seized with his final illness, he was about to sail for Europe to select a glass for a twenty-four-inch telescope, and to procure patents for a camera, involving a new form of lens.

FITZGERALD, Lord **Edward,** Irish patriot, b. near Dublin, Ireland, 15 Oct., 1763; d. there, 4 June, 1798. He was a younger son of the first Duke of Leinster, and lost his father at the age of ten. His mother married again, and removed to the Continent, where Edward was carefully educated by his step-father. He entered the army on his return to England in 1779, and in 1781 sailed with his regiment for America, where he soon obtained the appointment of aide-de-camp on the staff of Lord Rawdon. He gained in the Revolutionary war no little reputation for personal courage, readiness of resource, and humane feeling, and was severely wounded in the battle of Eutaw Springs, S. C. After the surrender of Yorktown, he joined the staff of Gen. O'Hara in the island of St. Lucia, in 1783, but returned in the same year to Ireland. He was elected as member for Athy to the Irish parliament, and afterward rejoined his regiment at Halifax. He subsequently travelled through the United States, going down the Mississippi river to New Orleans. In 1790 he returned to Ireland, and was again returned to parliament. Having at a public meeting avowed his sympathy with the republicans, and renounced his title, in common with several other English officers, he was dismissed from the army. In 1796 he joined the "United Irishmen," was afterward elected their president, and was sent to France to negotiate a treaty with the Directory for a French invasion of Ireland. The scheme was betrayed to the English ministry, and several of the leaders were arrested, but Fitzgerald, having concealed himself in a house in Dublin, still continued to direct the movement. A price was set on his head, the place of his retreat discovered, and, after a severe struggle in which he was mortally wounded, he was captured by police officers and committed to prison, 19 May, 1798, where he died in June. See "The Life and Death of Lord Edward Fitzgerald," by Thomas Moore (2 vols., London, 1831).

FITZGERALD, Edward, R. C. bishop, b. in Limerick, Ireland, in 1833. He came to the United States in 1849, entered the College of the Barrens, Mo., in 1850, and finished his ecclesiastical studies in Mount St. Mary's college, Emmettsburg. He was ordained priest in 1857, and was appointed pastor of a Roman Catholic church in Columbus, Ohio, which had been laid under an interdict by the archbishop of Cincinnati. Father Fitzgerald was entirely successful in restoring harmony among his parishioners, and inducing them to submit to the archbishop. He remained over nine years at Columbus, and in 1867 was consecrated bishop of Little Rock, Ark. Owing to the civil war, the number of Roman Catholics in his diocese had decreased to little more than a thousand, with five priests and three religious institutions. He used every exertion to attract immigration to the state, with such success that in 1884 the Roman Catholic population was over 7,000, with twenty-three priests and thirty-seven churches. He introduced the monks of the Benedictine order, established a house of the Fathers of the Holy Ghost at Marienstadt, for the purpose of holding special missions among his flock, and also introduced the Sisters of Charity, the Sisters of St. Joseph, and the Benedictine nuns, whom he placed in charge of asylums and schools. He visited Rome to take part in the deliberations of the Vatican council, and was also a member of the third plenary council of Baltimore in 1884.

FITZGERALD, Thomas, senator, b. in Germantown, Herkimer co., N. Y., 10 April, 1796; d. in Niles, Mich., 25 March, 1855. His father, an Irish soldier in the Revolutionary army, was wounded and pensioned. The son received a common-school education, and served with credit in the war of 1812 under Gen. Harrison. After its conclusion he studied law, and was admitted to the bar. He then removed to Indiana, where he was elected to the

first legislature that met in Indianapolis, and in 1832 went to Michigan, beginning the practice of his profession at St. Joseph. In 1837 he was made a regent of the University of Michigan, and from 20 June, 1848, till 3 March, 1849, served as a member of the U. S. senate, having been appointed by the governor to fill the vacancy caused by the resignation of Gen. Lewis Cass. Before going to Washington he was named as a commissioner to inquire into the condition of what were known as "wild-cat" banks, and by his perseverance and industry succeeded in effecting the virtual extermination of those discreditable institutions. Senator Fitzgerald was appointed by President Pierce a judge in one of the territories, but refused. He was subsequently probate judge of Berrien county, Mich., and was a leader in the Democratic party.

FITZGIBBON, James, British soldier, b. in 1780; d. about 1860. He was almost wholly self-educated, was the son of a farmer, and enlisted in the army when he was seventeen years old. He served in the war against Napoleon I., and in the American war of 1812–'15, and in 1816 retired as captain of the Glengarry, Canada, fencibles. He afterward became assistant adjutant-general of militia in Upper Canada. In 1837, during the Mackenzie rebellion, his foresight and precautionary measures saved the city of Toronto from the disaffected, for which service he was awarded 5,000 acres of land by the city council, received the thanks of parliament, and the present of a valuable sword. The grant of land was subsequently disallowed. Gen. Fitzgibbon was chief clerk of the lower house of the Canadian parliament in 1816–'29, and clerk of the upper house in 1829–'35. In 1850 he was created a military knight of Windsor, and subsequently resided in England.

FITZHUGH, Edward Henry, judge, b. in Caroline county, Va., 21 Sept., 1816. He studied law, practised for many years at Wheeling, W. Va., removed to Richmond, Va., in 1861, and served in an important capacity in the quartermaster's department of the Confederate army, from 1861 till 1865. He was judge of the chancery court of the city of Richmond from 1870 till 1883, when he returned to the practice of his profession. Judge Fitzhugh has been active in the councils of the Presbyterian church, and in 1867 was elected a member of the executive committees of "publication and education" of the general assembly.

FITZHUGH, George, sociologist, b. in Prince William county, Va., 2 July, 1807; d. in Huntsville, Walker co., Texas, 30 July, 1881. He was largely self-taught, the only education he received as a child being gained in what were known as the "field schools" of his native county. That the amount of knowledge thus acquired was probably not great, may be inferred from the fact that Fitzhugh, when only nine years of age, was frequently left in sole charge of the other pupils during the extended absence of the teacher. In spite of these early disadvantages, he succeeded in securing a good education, studied law, and practised his profession for many years in Port Royal, Va., making a specialty of criminal cases. During President Buchanan's administration Mr. Fitzhugh was employed in the office of Attorney-General Black, in the land-claim department. About this time he made his only visit to the northern states, lecturing in Boston, and visiting his relative by marriage, Gerrit Smith. At the house of the latter he met Mrs. Harriet Beecher Stowe. These acquaintanceships derive their significance from his peculiar political opinions. Mr. Fitzhugh was a frequent contributor to the press, writing for the "New York Day-Book," "Richmond Examiner," "De Bow's Review," and other journals and periodicals. He was "an eccentric and extreme thinker," claiming that slavery is the natural and rightful condition of society, which, when not founded on human servitude, tends to cannibalism. He did not base his argument upon the inferiority of the negro, but maintained that the laboring classes of mankind, irrespective of color, should be slaves, as in Greece and Rome. During the civil war he wrote: "It is a gross mistake to suppose that 'abolition' is the cause of dissolution between the north and the south. The Cavaliers, Jacobites, and Huguenots of the south naturally hate, contemn, and despise the Puritans who settled the north. The former are master races, the latter a slave race, the descendants of the Saxon serfs." His opinion of free labor may be gathered from the following extracts from his "Sociology for the South": "The free laborer rarely has a house and home of his own; he is insecure of employment; sickness may overtake him at any time and deprive him of the means of support; old age is certain to overtake him if he lives, and generally finds him without the means of subsistence; his family is probably increasing in numbers, and is helpless and burdensome to him. In all this there is little to incite to virtue, much to tempt to crime; nothing to afford happiness, but quite enough to inflict misery. Man must be more than human to acquire a pure and a high morality under such circumstances." And again: "Slavery without domestic affection would be a curse, and so would marriage and parental authority. The free laborer is excluded from its holy and charmed circle. Shelterless, naked, and hungry, he is exposed to the bleak winds, the cold rains, and hot sun of heaven, with none that love him, none that care for him. His employer hates him because he asks high wages or joins strikes; his fellow-laborer hates him because he competes with him for employment. Foolish abolitionists! bring him back, like the prodigal son. Let him fare at least as well as the dog, and the horse, and the sheep. Better to lie down with the kids and the goats, than stand naked and hungry without. As a slave, he will be beloved and protected. Whilst free, he will be hated, despised, and persecuted. Such is the will of God and order of Providence. It is idle to inquire the reasons." Mr. Fitzhugh published "Sociology for the South, or the Failure of Free Society" (Richmond, 1854), and "Cannibals All, or Slaves Without Masters" (1856).

FITZHUGH, William, lawyer, b. in Bedford, England, 9 June, 1651; d. in Stafford county, Va., in October, 1701. He was a lawyer by profession, settled in that portion of Stafford county now comprised in King George county, and founded the Fitzhugh family of that state. He was also a merchant, planter, and shipper. A manuscript volume of his correspondence, covering the period from 1679 till 1699, has been preserved, and a copy of the letters is in the collections of the Virginia historical society. Mr. Fitzhugh acted as counsel for Maj. Robert Beverley, father of the historian of Virginia and secretary of the colonial council, who was indicted for "cutting" tobacco-plants, and found guilty of that and other "high misdemeanors," including a refusal to deliver up the records of the council. Although he had been an active and efficient partisan of Gov. Berkeley in the popular uprising stigmatized as "Bacon's rebellion," he was sternly dealt with, being long imprisoned and disfranchised. He was finally released on asking pardon of the council on his bended knees.

FITZHUGH, William Henry, philanthropist, b. in Chatham, Stafford co., Va., 8 March, 1792; d. in Cambridge, Md., 21 May, 1830. He was a son of William F. Fitzhugh, a patriot of the Revolution, was graduated at Princeton in 1808, and settled on the patrimonial domain of "Ravensworth," Fairfax co., Va. He was elected vice-president of the American colonization society, and took an active interest in it, supporting it both with voice and pen. In 1826 he published a series of essays in behalf of the cause, over the signature of "Opimius," in the columns of the Richmond "Inquirer." He was also the author of an address delivered on the ninth anniversary of the association, and of a review of "Tazewell's Report" in the "African Repository" (August and November, 1828). In one of his essays he expresses the opinion that "the labor of the slave is a curse on the land on which it is expended," which seems like a truism now, but was bold doctrine then.

FITZPATRICK, Benjamin, senator, b. in Green county, Ga., 30 June, 1802; d. in Autauga county, Ala., 25 Nov., 1869. He removed to Alabama in 1818, when it was a territory, read law in the office of Judge Benson, of Montgomery, and, after he was admitted to the bar in 1821, became a partner of Henry Goldthwaite, who afterward rose to eminence in his profession. Mr. Fitzpatrick was the next year elected solicitor of the Montgomery circuit, and re-elected in 1823. Meanwhile he married a daughter of Gen. John Elmore, formerly of South Carolina. In 1829 he found the labors of his profession too severe for his declining health, and retired to his plantation in Autauga county, near Montgomery, where he engaged successfully in agriculture. In 1840, as a candidate for presidential elector on the Democratic ticket, he engaged in an active canvass in behalf of Mr. Van Buren, and took part in an animated discussion with Henry W. Hilliard, candidate for elector in the same district on the Whig ticket, who ardently advocated the claims of Gen. Harrison. In 1841 Mr. Fitzpatrick was elected governor of Alabama by a majority of nearly 7,000 over Col. McLung, of Huntsville, and in 1843 was re-elected without opposition. On the death of Hon. Dixon H. Lewis, in 1848, Gov. Chapman appointed Mr. Fitzpatrick to fill the unexpired term in the senate of the United States. In 1853 he was appointed by Gov. Collier to succeed William R. King in the senate, and was elected by the legislature to fill the unexpired term. In 1855 he was elected to the senate for a full term of six years. He was elected president of the senate *pro tempore*, and served in four successive sessions. At the Democratic national convention, held in Baltimore in 1860, Mr. Fitzpatrick was nominated for vice-president on the ticket with Mr. Douglas, who was a candidate for the presidency; but he promptly declined, and Herschel V. Johnson, of Georgia, was nominated in his place. When Alabama adopted her ordinance of secession in 1861, Mr. Fitzpatrick withdrew from the senate and returned home. At the close of the civil war he took part once more in public affairs, was elected by the people of Autauga county to the convention called to frame a new constitution, and was chosen president of the convention. When it had finished its work he retired to his plantation, where he passed his last years in broken health, but still attending to the duties that pressed upon him as cheerfully as possible in view of the decline of his fortunes resulting from the war. Mr. Fitzpatrick was distinguished for integrity, unswerving loyalty to truth, and manly bearing in public affairs.

FITZPATRICK, John Bernard, R. C. bishop, b. in Boston, Mass., 1 Nov., 1812; d. there, 13 Feb., 1866. He studied in the Boston Latin-school in 1828–'9, and in the latter year was sent to Montreal college, where he was appointed professor of rhetoric and belles-lettres while still a pupil. He completed his course of study in Montreal in 1837, and then took a course in the Grand seminary of St. Sulpice, Paris. He returned in 1839, and was ordained in 1840. His first mission was at the Boston cathedral. He was afterward appointed pastor of East Cambridge, where he succeeded in composing dissensions of long standing. He was nominated coadjutor bishop of Boston in 1844, and in 1846 succeeded Bishop Fenwick. His administration was signaled by many lamentable occurrences. In 1854 the Roman Catholic church of Dorchester was blown up by unknown persons, and the "Ellsworth outrage" took place, in which a priest was inhumanly treated by his fellow-citizens. He visited Rome in 1854, and on his return had a remarkable controversy with the Boston school board, which resulted in the repeal of rules that were obnoxious to the Roman Catholic pupils. The Roman Catholic population increased so rapidly under his administration that in 1853 two new dioceses were created out of that of Boston. When he entered on his episcopate there were forty priests and forty churches in his diocese; at its close there were three hundred priests and three hundred churches. He had also erected one of the finest orphan asylums in the country, a large reformatory, a hospital, a college, and had increased the number of religious communities and orders fivefold.

FITZSIMMONS, Thomas, statesman, b. in Ireland in 1741; d. in Philadelphia, Pa., in August, 1811. He emigrated to this country and became a merchant in Philadelphia. During the Revolutionary war he commanded a company of volunteers. He was for many years a member of the Pennsylvania assembly, a delegate to the Continental congress in 1782–'3, and to the Constitutional convention in 1787. From 1789 till 1795 he sat in the National congress. In 1780 the firm of George Meade & Co., of which Mr. Fitzsimmons was a member, subscribed £5,000 toward supplying the Continental army with necessary equipments. Mr. Fitzsimmons was president of the Philadelphia chamber of commerce, and also of the North American insurance company.

FLAGET, Benedict Joseph, R. C. bishop, b. in Contournat, Auvergne, France, 7 Nov., 1763; d. in Nazareth, Ky., 11 Feb., 1850. He was first educated in the college of Billom, and afterward took a course of philosophy in the University of Clermont. He then studied theology at the Sulpitian college in the same city, and became a member of that order in 1783. He continued his studies at Issy, near Paris, and in 1788 was ordained priest. He was professor of dogmatic theology for two years in the University of Nantes, and filled the same office in the seminary of Angers at the beginning of the French revolution. He was obliged to fly, and came in 1792 to Baltimore, Md., whence he was at once sent by Dr. Carrol as chaplain to Vincennes, then a military post in the northwest. During six months of delay at Pittsburg he acted as chaplain to the Catholics in the army of Gen. Wayne, who was organizing a force to attack the Indians. His congregation at Vincennes was composed of 700 half-breeds, who were little better than savages, and his success in civilizing them was considerable. He was recalled in 1795 and sent to Georgetown college, where he was professor for three years. In 1798 he accompanied two other

Sulpitians to Havana for the purpose of establishing a college in that city, but they met with opposition from the native clergy, and were forbidden to perform any priestly function. Father Flaget's two companions withdrew from the island, but, as he was prostrated by yellow fever, they had to leave him behind. On his recovery he became tutor to the sons of a wealthy Cuban, and, on the death of the archbishop, was restored to his sacerdotal privileges. During this period he rendered great service to the Orleans princes, which were warmly reciprocated when Louis Philippe became king of the French. Father Flaget left Havana in 1801, taking with him twenty-three young Cubans to be educated at Georgetown college. The ensuing seven years were spent in college duties and missionary labors. About the year 1804 he had petitioned to be received into the order of Trappists, the severest in the Roman Catholic church, but in 1808 he was appointed bishop of Bardstown, Ky., and though he made several efforts to be released, and went to Europe for this purpose, he was consecrated on his return in 1810. He arrived at Bardstown in the following year. The number of priests in his diocese, which extended from the Atlantic states to the Mississippi, and from the lakes to the thirty-fifth parallel, was only seven, with ten chapels, and six more in course of erection. To meet the demand for priests he gave great attention to the diocesan seminary. In 1817 he was able to send missionaries to the French and Indian communities living around the great lakes, as well as to supply Indiana and Michigan. By his request he was given an assistant, Father David, in 1819, and in the following years he was engaged in a correspondence with Rome relative to the creation of new sees. He was the first to suggest the erection of an archiepiscopal see in the west. His advice was also sought by the propaganda with regard to affairs external to the church in the United States, and a controversy that existed for some time between the Sulpitians of Canada and the bishop of Quebec was decided according to his suggestion. He attended the first provincial council at Baltimore in 1829, and in the following year, owing to declining health, resigned his see. His resignation was accepted, but so great was the opposition of the clergy and laity of the west that he was compelled to withdraw it. During the cholera epidemic of 1833 his attention to the afflicted of all classes and creeds excited general admiration. In 1834 he received a new coadjutor in the person of Bishop Chabrat. Up to this time he had erected four colleges, a large female orphan asylum and infirmary, eleven academies for girls, and had introduced three religious sisterhoods and four religious orders of men. He was in Europe from 1835 till 1839, and in 1841 the seat of his diocese was removed from Bardstown to Louisville. In 1843 he built a convent and hospital at his own expense, and in 1848 was instrumental in establishing a colony of Trappists at Gethsemane, fourteen miles from Bardstown. The remainder of his life, owing to his infirmities and his extreme age, was passed in strict retirement.

J. Benedict J. Flaget

FLAGG, Azariah Cutting, politician, b. in Clinton county, N. Y., in 1790; d. in New York city, 24 Nov., 1873. When he was nine years old his father removed to Richmond, Vt., and at the age of eleven he was apprenticed to a printer in Burlington. Here he remained until about 1811, when he removed to Plattsburg, N. Y., and served as a soldier in the war of 1812, participating in several engagements. In 1812 or 1813, Mr. Flagg established the Plattsburg "Republican," of which he was for many years the editor and owner. In 1823–'4 he represented Clinton county in the assembly, and in 1826 was appointed by Gov. De Witt Clinton secretary of state, which office he held until 1833. He was comptroller of the state in 1834–'9, and again in 1842–'6. During almost his entire public life, and especially after his removal to the city of New York, in 1846, Mr. Flagg was one of the leaders of the Democratic party in the state, and also bore the reputation of being one of its ablest financiers. For many years he discussed the political questions of the day in the columns of the Albany "Argus." He was one of the most determined opponents of the U. S. bank, rendered efficient aid to De Witt Clinton in moulding public opinion with regard to his canal policy, and later was outspoken in his opposition to the pro-slavery tendencies of the Democratic party. He was elected comptroller of the city of New York in 1852, and re-elected in 1855. Soon after leaving office, in 1859, he became blind, but never lost his interest in current political events.—His nephew, **Willard Cutting,** agriculturist, b. in Moro, Madison co., Ill., 16 Sept., 1829; d. there, 30 March, 1878, was graduated at Yale in 1854, and then took charge of his father's extensive farm. He soon became prominent in local politics, was collector of internal revenue for the 12th district of Illinois in 1862–'9, and a member of the state senate in 1869–'73. He wrote frequently for the press on agricultural and political subjects, was one of the originators of the "farmers' movement" in the west, and was chosen, in 1873, first president of the Illinois state farmers' association. He served, in addition, as trustee of the Industrial university, Champaign, Ill., president of the National agricultural congress, and secretary of the American pomological society. He was for many years horticultural editor of the "Prairie Farmer," and for a few months before his death was editor-in-chief of the "American Encyclopædia of Agriculture," for which he had collected much valuable material. He was considered one of the best pomologists of the day.

FLAGG, Edmund, author, b. in Wiscasset, Me., 24 Nov., 1815. He was graduated at Bowdoin in 1835, and soon afterward taught in Louisville, Ky., where he also contributed to the "Louisville Journal," with which his connection continued for nearly thirty years. He read law in St. Louis, where he was admitted to the bar in 1837. He edited the St. Louis "Commercial Bulletin" in 1838, served with George D. Prentice as associate editor of the "Louisville Literary News-Letter" in 1838–'9, practised law in Vicksburg, Miss., in 1840–'1, and at the same time was editor of the "Whig," in which capacity he was severely wounded in a duel with the editor of the Vicksburg "Sentinel." He owned and conducted the "Gazette" at Marietta, Ohio, in 1842, and the St. Louis "Evening Gazette" in 1844–'5. He subsequently acted as the official reporter of the courts

of St. Louis, reported a volume of debates in the Constitutional convention of Missouri, and in 1849 was secretary of legation at Berlin. In 1850–'1 he was U. S. consul at Venice, and also correspondent for several New York journals. On his return, in February, 1852, he at once took charge of a Democratic paper in St. Louis, and edited it during the presidential campaign of that year. He was afterward placed at the head of the bureau of statistics in the Department of state at Washington, and prepared, by order of congress, a report on the commercial relations of the United States with all foreign nations (4 vols., 1856–'7). This, with reports on the cotton and tobacco trades, and numerous annual statements respecting foreign commerce and emigration, have made Mr. Flagg's name familiar to merchants, not only throughout the country, but in Europe. Having resigned his office in the state department, Mr. Flagg acted, in 1858–'60, as Washington correspondent of the western press. From 1861 till 1870 he had charge of copyrights in the Department of the interior, and has since resided near Falls Church, Fairfax co., Va., where he has practised law. In 1836 Mr. Flagg wrote "Sketches of a Traveller" for the "Louisville Journal," afterward included in "The Far West" (New York, 1838). He also contributed to Park Benjamin's "New World" a series of seven historical romances, based on the dramas of Victor Hugo. In 1848 he was awarded a prize of $100 for a novel entitled "The Howard Queen," and in 1850 a similar prize for "Blanche of Artois." He also wrote "Edmond Dantes," a sequel to "Monte Christo" (Philadelphia, 1849; new ed., 1884); "Venice, the City of the Sea, 1797–1849," his chief work (2 vols., New York, 1853); "North Italy since 1849"; and "De Molai, the Last of the Military Grand Masters," an historical romance, the last two not yet published. He has also written "Mary Tudor" and other dramas, which have been put on the stage, and has in preparation his "Reminiscences."

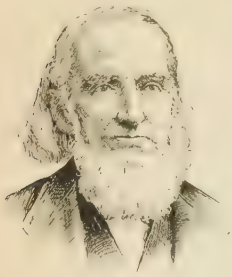
FLAGG, George Whiting, artist, b. in New Haven, Conn., 26 June, 1816. He passed his boyhood in Charleston, S. C., afterward studied art with his uncle, Washington Allston, and excited admiration by his precocity, as shown in a portrait of Bishop England, and other efforts. "A Boy Listening to a Ghost Story," "A Young Greek," and "Jacob and Rachel at the Well," belong to this period of his career. A picture entitled the "Murder of the Princes," from "Richard III.," procured him the patronage of Luman Read, of New York, through whose aid he spent three years in study in Europe, and afterward lived for six years in London. He afterward returned to New Haven, and subsequently removed to New York city. His works comprise historical and genre pictures, with some portraits. Among those best known may be mentioned "Landing of the Pilgrims"; "Landing of the Atlantic Cable"; "Washington Receiving his Mother's Blessing," which has been frequently engraved; "The Good Samaritan"; and "Columbus and the Egg" (1867). "The Match Girl," "Haidee," and "The Scarlet Letter" were painted in London. Mr. Flagg was elected a member of the National academy of design in 1851. The "London Art Journal" refers to his "Haidee" as "a single figure painted with much tenderness." The same authority said of his "Columbus": "It is generally low in tone, but rich and harmonious in color, and the heads are distinguished by much nobility of character." On account of ill health, Mr. Flagg has painted but little of late years.—His brother, **Jared Bradley,** artist, b. in New Haven, Conn., 16 June, 1820, studied painting with George Whiting Flagg, and also received instruction from Washington Allston. When only sixteen years old, he exhibited in the National academy a portrait of his father, which was favorably noticed by the critics. He settled in Hartford, but in 1849 removed to New York, and the following year was elected an academician. He pursued the study of theology at intervals in connection with that of art, and entered the ministry of the Protestant Episcopal church in 1854. He received the degree of A. M. from Trinity college in 1861, and that of S. T. D. from Columbia in 1863. For ten years he devoted himself to the discharge of his duties, when he returned to the practice of his art. Dr. Flagg has occasionally painted ideal figure pictures, but still makes portraits a specialty. Among the more notable of the latter are pictures of several of the judges of the New York court of appeals, including a three-quarter length of Chief-Justice Church, which have been placed in the new capitol; a life-size full-length of William M. Evarts, also to be hung in the capitol (1887); and several portraits of Commodore Vanderbilt, one of which hangs in the directors' room at the Grand Central depot, New York. His other pictures include "Holy Thoughts" and "Paul before Felix" (1849), and "Angelo and Isabella" (1850).

FLAGG, Henry Collins, lawyer, b. near Charleston, in the parish of St. Thomas, S. C., 5 Jan., 1792; d. in New Haven, Conn., 8 March, 1863. He was graduated at Yale in 1811, studied law, and began practice in New Haven. He took an active part in politics, opposing the Federalist party in Connecticut, both as a public speaker and as editor and proprietor of the "Connecticut Herald." He was also clerk of the New Haven county court. In 1824 he returned to South Carolina, where he practised law until 1833, when he again took up his residence in New Haven, in order to educate his children. He retired from the bar in 1842. From 1834 till 1839 he held the office of mayor. His attachment to his native state was strong, but his devotion to the Union was stronger, and, in common with his friend, John L. Petigru, he steadfastly opposed the nullifiers of 1832.

FLAGG, John Foster Brewster, physician, b. in Boston, Mass., 12 May, 1804; d. in West Chester, Pa., 8 Sept., 1872. He was educated in his native city, and received the degree of M. D. from the Rhode Island medical society. Between 1850 and 1860 he was professor of anatomy and physiology in the Philadelphia college of dentistry, and subsequently held a chair in the Pennsylvania college of dental surgery. He is the author of a standard work entitled "Ether and Chloroform, their Employment in Surgery, Dentistry, Midwifery, etc." (Philadelphia, 1851).

FLAGG, Wilson, naturalist, b. in Beverly, Mass., 5 Nov., 1805; d. in North Cambridge, Mass., 6 May, 1884. He was educated at Phillips Andover academy, and entered Harvard in 1823, but remained there only three months, leaving to devote himself to the study of medicine; he, however, never practised. In early manhood he made a pedestrian tour alone from Tennessee to Virginia, and thence home. He also delivered lectures about the same time on natural science. Meanwhile he had developed a taste for political discussion, and became a frequent contributor to the Boston "Weekly Magazine" and the Boston "Post." In 1840 he ceased writing on political subjects, and turned his attention almost exclusively to the agricultural journals. His papers in "Hovey's Magazine of Horticulture" formed the basis of

his first book. Many of his articles also appeared in the "Atlantic Monthly." From 1844 till 1848 he was employed in the Boston custom-house. In 1856 he removed to Cambridge, Mass., where he afterward resided. He was the author of "Studies in the Field and Forest" (Boston, 1857); "Woods and By-Ways of New England" (1872); and "Birds and Seasons of New England" (1875). He also edited "Mount Auburn, its Scenes, its Beauties, and its Lessons." Most of the matter contained in the three volumes first mentioned has been republished, with some new material, under the title "Halcyon Days," "A Year with the Trees," and "A Year with the Birds" (3 vols., Boston, 1881).—His son, **Isaac,** educator, b. in Beverly, Mass., 7 Sept., 1843, was a student at Phillips Andover academy, and graduated at Harvard in 1864. After serving as tutor in Greek at Harvard from 1865 till 1869, he studied in the universities of Berlin and Göttingen during 1870–'1. He has since been professor of Greek at Cornell university, and has edited "The Hellenic Orations of Demosthenes" (Boston, 1864) and "The Seven Against Thebes of Æschylus" (Boston, 1885).



Wilson Flagg

FLANAGHAN, James Winright, lawyer, b. in Gordonsville, Va., 5 Sept., 1805. In 1814 his parents removed to Kentucky, where he received a limited education, engaged in mercantile pursuits, and was a justice of the peace for twelve years. He was a member of the circuit court of Breckinridge county from 1833 till 1843, when he removed to Harrison county, Kentucky, and after spending one year settled in Henderson, Rusk co., Texas, where he was the first to sell merchandise. He also became interested in cotton-planting. He was a member of the state house of representatives in 1851–'2, and of the state senate in 1855–'6. In 1857 he was a presidential elector, and a delegate to the peace congress of 1861. He was a member of the State constitutional conventions of 1866 and 1868. In 1869 he was elected to congress for the state at large, and in that year he also held the office of lieutenant-governor. He was elected to the U. S. senate as a Republican, serving from 1870 till 1875, and was a member of the committees on mines and mining, and post-offices, and chairman of the committee on education and labor. After his service he retired to his farm near Longview, Texas, and occasionally appears in court, notwithstanding his advanced age. He was an "old-line Whig" before he united with the Republican party.—His son, **Webster,** politician, b. in Cloverport, Breckenridge co., Ky., 9 Jan., 1832, was admitted to the bar in 1851, and became interested in politics, holding important local offices. At the beginning of the civil war he was commissioned brigadier-general of volunteers in the Confederate service. In 1865 he was appointed judge of the 5th judicial district of Texas. He was elected to the State constitutional convention in 1869, and two years afterward became lieutenant-governor of the state. He was chairman of the delegation to the Republican convention which met in Philadelphia in 1872, and served as member of the Texas senate till 1875, when he represented his district in another constitutional convention, thus assisting in the formation and adoption of two state constitutions. In 1880 he was a Texas member of the "Grant guard" at the Chicago convention. The civil service was brought under discussion, and when Mr. Barker, from Massachusetts, declared that certain ones had an "eye to the offices," Mr. Flanaghan denounced the resolution, and asked, "What are we here for?" which question was received with great applause, and brought him prominently into notice for the time. In 1884 he was a member of the Chicago convention, and supported Gen. Arthur, who appointed him collector of internal revenue for the 4th district of Texas in 1884, which office he held one year. Since then he has devoted himself to his stock farm, and has introduced fine horses and Jersey cattle into the state. From 1876 till 1880 he was president of the Henderson and Overton railroad.

FLANDERS, Benjamin Franklin, statesman, b. in Bristol, N. H., 26 Jan., 1816. He was graduated at Dartmouth in 1842, removed to New Orleans in 1843, studied law, was admitted to the bar, and began practice, at the same time devoting much of his time to teaching in the public schools of the city, of which he was for several years the principal, being finally chosen superintendent in the 3d municipality, an office which he declined. He was part proprietor and one of the editors of the New Orleans "Tropic," a short-lived newspaper. In 1862 he was compelled to leave New Orleans for the north because of his devotion to the Union, but on the capture of that city he returned, and in the same year the Federal military authorities made him treasurer of New Orleans. This office he resigned in a few months, having been elected a representative to congress, as a Unionist, taking his seat within a fortnight of its final adjournment, in March, 1863. In that year Sec. Chase appointed him supervising special agent of the treasury department for Louisiana, Mississippi, and Texas, which place he resigned in 1866. In June, 1867, Gen. Philip H. Sheridan created him military governor of Louisiana, superseding J. Madison Wells, an office which he assumed without inauguration ceremonies, and resigned in six months. By the choice of Gov. Warmoth, he was made mayor in May, 1870, and in November following was elected for two years. In 1873 Gen. Grant appointed him U. S. assistant treasurer in New Orleans, and this office he held until 1885.

FLANDERS, Henry, lawyer, b. in Plainfield, Sullivan co., N. H., 13 Feb., 1826. He was educated at Kimball academy and at the seminary in Newbury, Vt. He studied law, chiefly with his father, Charles Flanders, who was graduated at Harvard in 1808, and a well-known member of the New Hampshire bar. In 1850 he settled in Philadelphia, where he has since practised. He is the author of a "Treatise on Maritime Law" (Boston, 1852); a "Treatise on the Law of Shipping" (Philadelphia, 1853); "Chief Justices of the United States Supreme Court" (1855–'8); "Memoirs of Cumberland" (1856); "An Exposition of the Constitution of the United States" (1860); and a "Treatise on the Principles of Insurance" (1871).

FLANDRAU, Thomas Macomb, physician, b. in New York, 8 July, 1826. His youth was spent in Georgetown, D. C. He studied under George J. Abbott in Washington, and was graduated at the National medical college in Washington in 1848. After practising in Georgetown, he settled in Rome, N. Y., in 1853, making specialties of sur-

gery and obstetrics, and has since resided there, with the exception of five years spent in Brockport, N. Y. In 1862 he was commissioned surgeon of the 146th New York regiment, was promoted surgeon of brigade in 1863, and surgeon-in-chief of the 2d division, 5th corps, Army of the Potomac, in 1864. In 1865 he was discharged from the service, having been brevetted lieutenant-colonel of U. S. volunteers for meritorious service in the field. In 1866 he was appointed U. S. pension examining surgeon, which office he now holds (1887). He was a delegate to the International medical congress at Philadelphia in 1876. Dr. Flandrau is a member of the New York state medical society, of the American medical association, and of the Oneida county medical society, of which he was president in 1870.—His brother, **Charles Eugene,** lawyer, b. in New York city, 15 July, 1828, was educated in Georgetown, D. C. From 1841 till 1844 he was a sailor before the mast. He learned a trade in 1845–'7. After studying law in Whitesboro, N. Y., he was admitted to the bar in 1851, settled in St. Paul, Minn., in 1853, and was a member of the territorial council of Minnesota in 1856, U. S. Indian agent for the Sioux tribe in 1856–'7, a member of the Constitutional convention of Minnesota in 1857, and judge of the supreme court of the territory and state of Minnesota from 1857 till 1864. In 1862 he defeated the Sioux Indians in the battle of New Ulm, Minn., which saved the town of that name. In 1867 he was elected president of the first board of trade of Minneapolis. He was chairman of the Democratic state central committee in 1868–'9.

FLASCH, Kilian, R. C. bishop, b. in Retzstadt, Bavaria, in 1831. He came with his parents to the United States in 1847, studied in the college of Notre Dame, Indiana, and afterward in the seminary of Milwaukee, began his theological studies in the Salesianum, Milwaukee, in 1856, and was ordained priest in 1859. He was assigned to missionary work at Laketown, where he remained until 1860, when he was appointed professor in the Salesianum. He resigned in 1867, and took charge of an orphan asylum near Milwaukee. In 1879 he was appointed rector of the Salesianum, and in 1881 consecrated bishop of La Crosse.

FLASH, Henry Lyden, poet, b. in Cincinnati, Ohio, 20 Jan., 1835. His parents were residents of the West Indies, who removed to New Orleans in 1837. Henry was graduated at the Western military institute of Kentucky in 1852. At the beginning of the civil war he entered the Confederate army, and served as a volunteer aide on the staffs of Gen. William J. Hardee and Gen. Joseph Wheeler. At its close he edited the "Confederate" in Macon, Ga. He engaged in business in New Orleans from 1866 until his retirement in 1886, and at present (1887) resides in Los Angeles, Cal. Mr. Flash is best known under the pen-names of "Lyden Eclair" and "Harry Flash." He has published a volume of poems (New York, 1860).

FLEET, Thomas, printer, b. in Shropshire, England, 8 Sept., 1685; d. in Boston, Mass., 21 July, 1758. He learned the business of printing in Bristol, England, and came to America at the age of twenty-seven and established himself in "Pudding Lane" (now Devonshire street), Boston. He married Elizabeth Goose, daughter of a wealthy Bostonian, 8 June, 1715. His mother-in-law, who lived at his house, spent her whole time in the nursery and in wandering about the house, pouring forth, in unmelodious strains, an abundance of rhymes for the amusement of Fleet's infant son, greatly to the annoyance of the whole neighborhood, and of Fleet in particular. He endeavored for a long time, by every means in his power, to put an end to it; but his good mother-in-law would not be silenced. Finally he conceived the idea of quietly writing down her songs, which he did, and published them in book-form under the title, "Songs for the Nursery; or, Mother Goose's Melodies for Children. Printed by T. Fleet, at his Printing House, Pudding Lane [now Devonshire Street], 1719. Price, two coppers." The book was popular and remunerative. In 1731 Fleet built himself a mansion on the corner of Water street, having for his sign a heart and crown. Here he lived with his family, prosecuted printing and editing, and maintained a shop and an auction-room. In 1733 he became proprietor and publisher of the "Weekly Rehearsal," which two years afterward was changed to the "Boston Evening Post," and in its management he continued until his death. He possessed a vein of keen though coarse wit, that was suited to the times, and aided the popularity of the paper. —His eldest son, **Thomas,** over whose cradle the celebrated "Mother Goose Melodies" were gathered, aided his father, and after his death succeeded him in the management of the paper. From 1779 till 1801 his descendants published "Fleet's Annual Register," and printed the first edition of Hutchinson's "History of Massachusetts."

FLEMING, John, printer. He was one of the publishers of the Boston "Chronicle" in 1767, the first paper that was published twice a week in New England. In the second year of its publication it espoused the royal cause, and in 1770 was suspended. Fleming found it prudent to retire, and went to England in 1773, and subsequently to France, where he resided until his death.

FLEMING, Michael, R. C. Canadian bishop, b. in Ireland about 1785; d. in St. John's, Newfoundland, in 1850. He was nominated coadjutor to the vicar apostolic of Newfoundland in 1821, and in 1829 succeeded to the vicariate. At this time Newfoundland was without schools, and had only a few churches. The knowledge that he had acquired of the condition of the peninsula during his coadjutorship enabled him to introduce several reforms. He divided it into thirteen districts, and built churches, presbyteries, and schools in each. In 1834 he obtained permission from the government to build a cathedral, a convent, and schools, and an episcopal residence, on some land near St. John's which was valueless for other purposes. But shortly afterward the government retracted the concession, and he went to London to solicit the execution of the promise. He was successful, and on his return in 1841 laid the foundation of his cathedral, which when finished was one of the noblest edifices in America. In 1846 he sent missionaries to Labrador. In 1849, Pius IX. erected the city of St. John's into a bishopric and nominated him its first bishop.

FLEMING, Sandford, Canadian engineer, b. in Kirkcaldy, Fifeshire, Scotland, 7 Jan., 1827. He received his early training there, and served an apprenticeship as a surveyor and engineer. He emigrated to Canada in 1845, and in 1852 was appointed one of the engineering staff of the Northern railway, then known as the Ontario, Simcoe, and Huron railway. Subsequently he visited the Red river settlement, for the purpose of ascertaining the practicability of connecting that section with the rest of Canada. In 1863 he went to Great Britain to present the memorial of the inhabitants of Red river settlement, petitioning for railway communication, to the imperial government, but was not successful. On his return he was commissioned to make a preliminary survey of a pro-

jected line of railway to connect the maritime provinces with Canada, and this he accomplished: but the work of construction was not prosecuted to any great extent until the completion of the road had been rendered imperative in 1867 by the conditions imposed upon the Dominion government by the articles of union with the maritime provinces. Under Mr. Fleming's supervision, as chief engineer, the Intercolonial railway was successfully completed, and was formally opened on 1 July, 1876. While this railway was under construction, Mr. Fleming was ordered in 1871 to survey a line that would connect old Canada with the Pacific ocean. This work he had most successfully prosecuted, when political exigencies arose, and he resigned in 1880. Though he was not afterward connected with the Canada Pacific railway, the ultimate success of that great enterprise was owing largely to his skill. In recognition of his ability as an engineer, he was made in 1877 a companion of the order of St. Michael and St. George; in 1880 he was elected chancellor of Queen's university, Kingston, Ontario; in 1881 he represented the Canadian institute and the American meteorological society at the International geographical congress at Venice; and in 1884 the Dominion at the International prime-meridian conference at Washington, D. C. The same year he received the degree of LL. D. from St. Andrew's university. He has published "England and Canada," besides reports on his engineering enterprises.

FLEMING, Thomas, soldier, b. in Botetourt county, Va., in 1727; d. there in August, 1776. He commanded 200 men at the battle of Point Pleasant, with the Indians, in 1774. Point Pleasant is at the junction of the Great Kanawha and Ohio rivers. The whites were commanded by Gen. Andrew Lewis, of Augusta county, Va., and the Indians by Cornstalk. The soldiers of Col. Fleming's division concealed themselves behind trees and held out their hats, which the Indians fired at. The hats dropped, the Indians ran out to scalp their victims, and were tomahawked by the settlers, who were all backwoodsmen. The first division was commanded by Col. Charles Lewis, kinsman and neighbor of Col. Fleming. The Indians numbered about 1,000; the whites, 400. Col. Fleming's division was attacked on the bank of the river, a low bottom, hemmed in on both sides by mountains. After leading his soldiers with great bravery and discretion in two charges, Col. Fleming was severely wounded, two balls passing through his arm and one through his breast. After cheering on the officers and soldiers, he retired from the field. In March, 1776, he was appointed colonel of the 9th Virginia regiment in the Revolutionary army. He died of disease that had been contracted by fatigue and exposure in camp.

FLEMING, William, statesman, b. in 1734; d. 2 Feb., 1824. He was graduated at William and Mary college in 1763, was a member of the house of burgesses and of the Virginia conventions in 1775–'6, member of the committee on independence in May, 1776, became judge of the general court and presiding judge of the court of appeals, and served as a delegate from Virginia to the Continental congress in 1779–'81.

FLEMING, William Maybury, actor, b. in Danbury, Conn., 29 Sept., 1817; d. in New York, 7 May, 1866. He began his professional career at about twenty years of age, and became known chiefly for his personations of Romeo, Claude Melnotte, Edgar in "King Lear," the Bastard in "King John," Hamlet, Richelieu, Sir Giles Overreach, Sir Edward Mortimer, Mathias in "The Bells," Rolla, Jack Cade, and a few special rôles of poetic character. In 1852 he assumed control of the National theatre, Boston, which he directed for several years. After visits to England and California, he became lessee and manager of the Savannah athenæum and the Macon theatre simultaneously, acting occasionally as a star on his own stage. At the beginning of the civil war he relinquished his business interests in the south at pecuniary loss, and soon afterward entered the National service as a paymaster, rising to the rank of colonel. His death resulted from injuries received in Gen. Sherman's Georgia campaign in 1864–'5.—His son, **Maybury,** is a dramatic critic, now (1887) on the editorial staff of the New York "Mail and Express."

FLETCHER, Asaph, physician, b. in Westford, Mass., 28 June, 1746; d. in Cavendish, Vt., 5 Jan., 1839. He was elected in 1780 to the convention that formed the constitution of Massachusetts, and labored earnestly to introduce into that instrument the principle of absolute freedom of worship. In 1787 he removed to Cavendish, Vt., where he soon became prominent. He was a member of the Vermont convention that applied to congress for admission of that state into the Union, and also of a subsequent convention for revising the state constitution. Here, as in Massachusetts, he ably advocated the principles of religious liberty. He was one of the presidential electors that made James Monroe president of the United States.—His son, **Richard,** lawyer, b. in Cavendish, Vt., 8 Jan., 1788; d. in Boston, Mass., 21 June, 1869, was graduated from Dartmouth college in 1806, and, having studied law with Daniel Webster, was admitted to the bar in 1809. He practised in Salisbury, N. H., till 1819, and then removed to Boston, Mass., where he spent the remainder of his life. He was distinguished in commercial and maritime law, and particularly in the law of marine insurance. He was a member of the legislature, and in 1836 was elected to congress as a Whig, defeating Charles Sumner, and serving one term. In 1848 he was appointed judge of the Massachusetts supreme court, which office he held until his resignation in 1853. He then resumed his practice, but retired in 1858. He was a trustee of Brown in 1848–'57, and for a short time was an overseer of Harvard. The degree of LL. D. was conferred on him by Brown in 1839, by Dartmouth in 1846, and by Harvard in 1849. Judge Fletcher was never married. He was active in all benevolent enterprises, and bequeathed more than $100,000 to Dartmouth. He published a speech to his constituents, delivered in Faneuil Hall (Boston, 1837).—Another son, **Horace,** clergyman, b. in Cavendish, Vt., 28 Oct., 1796; d. 27 Nov., 1871, studied law, was admitted to the bar, and continued in the practice of his profession for fifteen years. He then abandoned it, and was ordained pastor of the Baptist church in Townshend, Vt., where he remained until his death. He was one of the most useful and respected ministers in his native state. He was chosen state senator in 1855. In 1860, Madison university conferred upon him the degree of D. D.—Another son **Ryland,** governor of Vermont, b. in Cavendish, Vt., 18 Feb., 1799; d. in Proctorsville, Vt., 19 Dec., 1885, studied in the Norwich military academy, and became a farmer. He was active as an anti-slavery agitator, was chosen to the state senate, and lieutenant-governor of Vermont from 1854 till 1856, when he was elected governor of the state by the Free-soil party, serving until 1858. From 1861 till 1864 he was a representative in the legislature. In 1864 he was a presidential elector on the Republican ticket.

FLETCHER, Benjamin, governor of New York, lived in the 17th century. Col. Fletcher, who was a soldier of fortune, was appointed governor by William and Mary, and, after soliciting troops, presents for the Indians, and war stores, arrived in New York on 29 Aug., 1692. He visited the Mohawk tribe, was entertained by the warriors, and learned their character and dialect. When Schuyler went to the relief of the Indians against the French, Fletcher joined him at Schenectady, on 17 Feb., 1793, and assisted the Indians, who gave him the name of "Great White Arrow." During his administration the sum of £600 for the defence of the frontier was granted by the assembly. Fletcher had much difficulty in bringing the different colonial factions to an agreement. He said he ruled "a divided, contentious, and impoverished people." He endeavored to obtain control of the Connecticut militia, which had been improperly granted him in his commission; but the assembly of that colony refused to acknowledge his right, and sent Winthrop to England to lay the matter before the council, who decided in favor of Connecticut. In 1692, Col. Fletcher received a commission from William and Mary to assume the government of Pennsylvania and the annexed territories, which had been urged by the enemies of Penn as necessary for the safety of the colony. He arrived in Philadelphia in April, 1793, in great pomp, and the government was immediately surrendered to him. Annoyed by the subserviency of Lloyd and Markham, Penn wrote to Fletcher cautioning him to "tread softly," as the territory and government were his. Fletcher summoned the assembly, and thus excited the opposition of the council, which protested against calling the legislature in defiance of the laws made by Penn. The assembly met, and Fletcher demanded money to defray the expenses incurred in the expedition against the French in Albany. This demand was fortified by a letter from Queen Mary, in which she expressed her will that all the colonies should contribute troops and money in defence of the frontier, according to the dictates of the governor of New York. A bill of a penny a pound for the support of the government, and a poll-tax of six shillings, which yielded over £700, was passed. Fletcher appointed William Markham deputy governor, and then returned to his colony. He again met and addressed the assembly in the following year. During his stay in Pennsylvania he presided at the trial of the printer, William Bradford. Desirous of introducing printing into his colony, Fletcher took Bradford to New York, where he set up the first press, and printed the corporation laws. Fletcher was passionate, reckless, and avaricious, and was accused of paying little attention to the navigation laws, and of protecting piracy for his private gain. He denied this, but his association with Kidd and Tew, and the abundance of Arabian and East India goods in the colony, seemed to justify the suspicion. He was finally deposed, and Bellomont appointed in his stead. His zeal for the extension of the Anglican church in the colony proved an era in the religious history of New York. He built a small chapel in the fort in 1693, for which the queen sent books, plate, and other furniture. This was burned in 1741, and little is known of its history. In 1697 a charter was granted for building a church on "King's farm," which was called Trinity church, and the present building of this name stands on the same ground. The seal and autograph are from a patent of city property granted to Samuel Bayard of New York in 1697.

Ben: Fletcher

FLETCHER, James Cooley, clergyman, b. in Indianapolis, Ind., in 1823. He was graduated at Brown in 1846. After studying theology two years at Princeton, he went to Europe to complete his theological course and perfect himself in the French language, in order to become a missionary in Hayti. He returned to the United States in 1850, and in 1851 abandoned the mission to Hayti, and went to Rio de Janeiro as chaplain missionary of the American and foreign Christian union, and of the American seamen's friend society. He returned to the United States in 1854, but during 1855–'6 travelled 3,000 miles in Brazil distributing Bibles as the agent of the American Sunday-school union. In 1862 he travelled 2,000 miles up the Amazon, and made a collection of rare objects in natural history for Professor Agassiz. The result of his labor was Agassiz's exploration of Brazil in 1865. In 1864–'5 Mr. Fletcher was the means of inducing the Brazilian government to join the United States in establishing a line of steamships between New York and Rio de Janeiro. He was agent of the American tract society in 1868–'9, U. S. consul at Oporto, Portugal, in 1869–'73, and missionary at Naples in 1873–'7, after which he again returned to the United States and made his home in Indianapolis. He has been a constant contributor to the periodical press, and has published, in connection with Rev. D. P. Kidder, "Brazil and the Brazilians" (Philadelphia, 1857; 8th ed., 1868).—His daughter, **Julia Constance,** author, b. about 1850, is a resident of Rome, and a favorite in the literary society of that city. Her novels, written under the pen-name of "George Fleming," include "Kismet" (Boston, 1877); "Mirage" (1878); "The Head of Medusa" (1880); "Sonnets of Gaspara Stampa" (1881); "Vestigia" (1884); and "Andromeda" (1885).

FLETCHER, John, Canadian jurist, b. in Rochester, Kent, England, in 1787; d. in Sherbrooke, Canada, 11 Nov., 1844. He was educated in London, studied law, was called to the bar, and had a large practice in London before removing to Canada in 1810. On arriving there he was admitted to the Canadian bar, and was for years one of the most distinguished lawyers in the country. On the erection of the eastern townships of Lower Canada into the separate district of St. Francis in 1823, he was appointed its judge. He was also one of the justices of the court of Queen's bench, and of the provincial court of appeals.

FLETCHER, Thomas Clement, governor of Missouri, b. in Jefferson county, Mo., 21 Jan., 1827. He received a common-school education, was clerk of the circuit and county courts from 1849 till 1856, and was admitted to the bar in 1857. He

was colonel of the 31st Missouri regiment in the National army from 1862 till 1864, when he became colonel of the 47th Missouri, and in that year was brevetted brigadier-general of volunteers. In 1863 he was captured and taken to Libby prison. In 1865–'9 he was governor of Missouri, and issued the proclamation abolishing slavery in that state. Gov. Fletcher was a delegate to the National Republican convention of 1860 and 1864. He was the first speaker in the first Republican convention held in a slave-state, and although his parents were slave-owners, he had been an ardent abolitionist since his boyhood. He has made many political speeches, most of which were published, but they have never been collected in book-form.

FLETCHER, William A., jurist, b. in Massachusetts; d. in Ann Arbor, Mich., about 1855. He was engaged in mercantile affairs until he removed to Michigan in 1820, when he studied law. For many years he was one of the most successful lawyers in Detroit, and became attorney-general of the territory. On the adoption of the first state constitution in 1835 he was appointed chief justice of the supreme court, and was employed by the legislature to prepare the first codification of the laws of Michigan. In 1842 he retired from the bench and resumed his law practice. He published "Revised Statutes of Michigan" (Detroit, 1838).

FLETCHER, William Baldwin, physician, b. in Indianapolis, Ind., 18 Aug., 1837. He was educated in the Lancaster academy in Massachusetts, and, after graduating at the New York college of physicians and surgeons, began to practice in Indianapolis. During the war he served in various capacities as scout and volunteer engineer, and had charge of one department of secret service. In July, 1861, he was captured by the Confederates, and imprisoned for nine months. Subsequently he served on the medical staff in various departments. He was a delegate to the session of the American medical association held in Boston in 1865. He represented Marion county in the state senate in 1882–'3, and since 1882 he has been devoted to the investigation of cerebral circulation. In 1883 he was appointed superintendent of Indiana Hospital for the insane, and since that time has published several pamphlets on the management of the insane. Among his contributions to medical journals are: "The Discovery of Various Entozoa found in Pork"; "Human Entozoa"; "Report of Five Cases of Trichiniasis"; and he has published a monograph on the "History of Asiatic Cholera" (Cincinnati, 1863).

FLEURIEU, Charles Pierre Claret, Comte de, French naval officer, b. in Lyons, 22 Jan., 1738; d. in Paris, 18 Aug., 1810. He entered the navy at the age of thirteen years, and became a lieutenant in 1759. The peace of 1763 gave him occasion to apply himself to office work and study, and he assisted the engineer Ferdinand Berthoud, in 1766, in his invention of the marine watch or chronometer. In 1768 he was appointed to the command of the frigate "Isis" on an expedition to experiment with the new instrument, sailing from Aix in November of that year. He took observations at Martinique, Santo Domingo, Porto Rico, Havana, Jamaica, Colon, and New Orleans, and after touching at NewYork, Boston, and Newfoundland, returned to Aix on 11 Oct., 1769. The results of this expedition were important to geography, as he established the exact position of all the points visited, and published them in his later works. In 1776 Fleurieu was appointed inspector-general of ports and navy-yards, and from 1778 till 1783 he elaborated all the plans for the naval war against England, to assist the struggle for the independence of the United States. In 1790–'1 he was minister of the navy, and in 1793 was imprisoned under the reign of terror, but was released in 1794, and under the directory was appointed to the bureau of longitudes. He was a member of the council of 500 in 1797, and in 1800 was called by Bonaparte to the council of state. In 1805 he was minister plenipotentiary for the signature of the treaty ceding Louisiana to the United States, and on his return became intendant of the imperial house, senator, in 1806 admiral, and in 1808 governor of the Tuileries. His body was buried in the Panthéon. His works are "Voyage entrepris en 1768 et '69 pour éprouver en mer les horloges marines" (2 vols., Paris, 1773); "Longitude exacte des divers points des Antilles, et de l'Amérique du Nord" (1773); "Les Antilles, leur flore et faune" (1774); "Le Neptune Américo-Septentrional" (1780); and "Histoire des adventuriers espagnols, qui conquèrurent l'Amérique" (1800). Fleurieu also published a fine "Atlas of the Caribbean Sea and the Coasts of North America and Newfoundland" (1776), and "Voyage autour du monde d'Étienne Marchand," with an atlas and notes on the discoveries on the northwest coast of America from 1537 till 1791 (1798).

FLEURY, Ernest de, Baron de Lisle, traveller, b. in Lyons, France; d. in New York city, 14 Sept., 1867. He was educated in Paris, and inherited a large property. In 1844 or 1846 he came to the United States, visited California, and was subsequently employed in locating the Nicaragua route. He travelled entensively in Central and South America. In 1858 he settled in the city of Mexico, and in 1864 espoused the cause of Maximilian, joining the imperial army, and being commissioned captain. Just before the downfall of the emperor he was promoted to the colonelcy of a regiment of chasseurs. At the surrender of Maximilian he became a prisoner of war, was tried by court-martial, and sentenced to be shot; but two days before the date fixed for his execution he bribed the guard, escaped in disguise to Vera Cruz, and sailed by way of Havana to New York. He took passage for France by the next steamer, but died suddenly before the day of departure.

FLEURY, Louis de, chevalier and viscount, soldier, b. in France about 1740. He was descended from Hercule André de Fleury, a French nobleman, who was the tutor of the grandson of Louis XIV., and subsequently made cardinal and prime minister. He was major in the regiment Rouergue. Soon after the news of the American revolt reached France he came to this country, was kindly received by Washington, and accepted a commission. He was educated for an engineer, and, as his talents were brought into requisition, he proved himself a brave and intelligent soldier. He was engaged at Fort Mifflin on the Delaware, and in the battle of the Brandywine. In token of his gallantry at the latter place, congress presented him with a horse. He was sub-inspector under Steuben in 1777 and 1778, adjutant-general of Lee's division, 4 June, 1778, and second in command of a light-infantry corps in the Rhode Island expedition, and afterward commanded a battalion of light-infantry under Washington. When Rochambeau arrived in 1780, Fleury left the American service and became an officer under him. At the storming of Stony Point in July, 1779, he commanded the van of the right column, and was the first to enter the British works, striking their colors with his own hand. He returned to France, having received a congressional vote of thanks.

FLINN, Andrew, clergyman, b. in Maryland in 1773; d. in Charleston, S. C., 24 Feb., 1820. When he was an infant his parents removed to Mecklenburg county, N. C. He was graduated at the University of North Carolina in 1799, studied theology, and was licensed to preach by the presbytery of Orange in 1800. In 1803 he was ordained pastor of the church at Fayetteville, N. C., but was obliged to divide his duties by teaching, in order to support himself. In 1811 he was installed pastor of the Scotch Presbyterian church of Charleston, S. C., and became known through the state as an attractive pulpit orator. In 1812 he was moderator of the general assembly of the Presbyterian church. He continued pastor of the church in Charleston till the time of his death.

FLINT, Abel, clergyman, b. in Windham, Conn., 6 Aug., 1765; d. in Hartford, 7 March, 1825. He was graduated at Yale in 1785, and in the following year was appointed tutor in Brown, where he remained until 1790. He then studied theology, and in 1791 became pastor of the 2d Congregational church in Hartford, Conn. He was secretary of the Connecticut missionary society at its organization in 1798, and held this office for several years. He was an editor of the "Connecticut Evangelical Magazine" in 1800, and about this time assisted in the preparation of the "Hartford Selection of Hymns," which passed through several editions. He was one of the founders of the Connecticut Bible society in 1809, and was actively engaged in its management. The degree of D. D. was conferred upon him by Union in 1818. He published "Geometry and Trigonometry, with a Treatise on Surveying" (1806), and a selection and translation from Massillon and Bourdaloue's sermons.

FLINT, Austin, physician, b. in Petersham, Mass., 20 Oct., 1812; d. in New York city, 13 March, 1886. He studied at Amherst and Harvard, and was graduated at the medical department of the latter institution in 1833. His professional career began in Northampton, and was continued in Boston until 1836, when he removed to Buffalo, and remained there till 1844. He then accepted a call to the chair of the institutes and practice of medicine at the Rush medical college in Chicago, but a year later returned to Buffalo. In 1846 he established the "Buffalo Medical Journal," which he subsequently conducted until 1856. In connection with Dr. James P. White and Dr. Frank H. Hamilton, he founded, in 1847, the Buffalo medical college, in which, for six years, he was professor of the principles and practice of medicine, and clinical medicine. In 1852 he was called to fill a similar chair in the Louisville university, but in 1856 returned to Buffalo and became professor of pathology and clinical medicine. From 1858 till 1861 he spent the winters in New Orleans as professor of clinical medicine in the school of medicine there, and visiting physician to the Charity hospital. In 1859 he removed to New York, and two years later was appointed professor of pathology and practical medicine in the Long Island college hospital, in which relation he continued until 1868. At the same time he became professor of the principles and practice of medicine in the Bellevue hospital medical college, and also visiting physician to the hospital itself. These offices he held until his death. Dr. Flint was also consulting physician to the Charity hospital, to the Hospital for the ruptured and crippled, to St. Mary's hospital, and to St. Elizabeth's hospital. In 1872 he was elected president of the New York academy of medicine, and held that office until 1885, when he resigned, on the adoption of the medical code sanctioning consultations with physicians of other than the "regular" school, and he was president of the American medical association in 1884. Besides being a corresponding member of numerous medical societies abroad, he was connected with many American medical and scientific bodies, and his name was on the rolls of the county and state medical associations from the time they were organized. In 1876 he was a delegate to the International medical congress which met in Philadelphia, and delivered an address on "Medicine." He attended the medical congresses held in London in 1881 and in Copenhagen in 1884, and had been elected to preside at the congress to be held in Washington in 1887. His contributions to medical literature were very large, and his essays "On the Variations of Pitch in Percussion and Respiratory Sounds" and "On the Clinical Study of the Heart Sounds in Health and Disease" received the first prizes of the American medical association in 1852 and 1859. His larger works include "Clinical Reports on Continued Fever" (Buffalo, 1852); "Clinical Report on Chronic Pleurisy" (1853); "Clinical Report on Dysentery" (1853); "Physical Exploration and Diagnosis of Diseases affecting the Respiratory Organs" (Philadelphia, 1856; 3d ed., 1868); "Practical Treatise on Diseases of the Heart" (1859; 2d ed., 1870); "Treatise on the Principles and Practice of Medicine," of which more than 40,000 copies have been sold (1866; 5th ed., 1881); "Contributions Relating to Camp Diseases" (New York, 1867); "Essays on Conservative Medicine and Kindred Topics" (Philadelphia, 1874); "Phthisis, its Morbid Anatomy, Etiology, Symptomatic Events and Complications, Fatality and Prognosis, Treatment and Physical Diagnosis" (1875); "Manual of Auscultation and Percussion" (1876); "Clinical Medicine, a Systematic Treatise on the Diagnosis and Treatment of Diseases" (1879); "Physical Exploration of the Lungs by Means of Auscultation and Percussion" (1882); and "Medical Ethics and Etiquette" (New York, 1883).—His son, **Austin,** physician, b. in Northampton, Mass., 28 March, 1836, accompanied his parents to Buffalo, where he received his early education. He entered Harvard in 1852, but left at the end of his first year, and spent some time in the study of civil engineering. In 1854 he began his medical studies in Buffalo, continued them in Louisville, and was graduated at the Jefferson medical college, in Philadelphia, in 1857. Subsequently, until 1860, he edited the "Buffalo Medical Journal," which afterward was transferred to New York and merged in the "American Medical Monthly." In 1858 he was appointed one of the attending surgeons of the Buffalo city hospital, and during the same year was appointed professor of physiology in the Buffalo medical college. He came to New York in 1859, was elected to the chair of physiology in the New York medical

Austin Flint

college, and to a similar chair in the New Orleans school of medicine in 1860, but resigned the latter at the beginning of the civil war. As a student in Louisville, he had developed a special taste for physiology, and had experimented on living animals with Prof. Lunsford P. Yandell. While in New Orleans he experimented on alligators, and developed some important points with reference to the influence of the pneumogastric nerves upon the heart. Dr. Flint was the first physiolgist in the United States to operate on the spinal cord and the spinal nerves in living animals, and early in 1861 spent several months studying in Paris under Charles Robin and Claude Bernard. On the organization of the Bellevue hospital medical college, in 1861, he became professor of physiology and microscopic anatomy, and also secretary and treasurer of the faculty. For eight years he delivered lectures on physiology in the Long Island college hospital. In 1874 he became surgeon-general of New York state. His experimental work has received high praise. In 1862 his investigations on "A New Excretory Function of the Liver" was presented to the French academy of sciences for the Monthyon prize, and in 1869 it received honorable mention and 1,500 francs. He published in 1869 an elaborate review of the history of the discovery of the motor and sensory properties of the roots of the spinal nerves, in which the discovery was ascribed to François Magendie instead of to Sir Charles Bell, who has generally been regarded as its author. During the same year he conducted a series of experiments upon the glycogenic function of the liver, in which he endeavored to harmonize various conflicting observations, and is considered to have settled the question. Dr. Flint is a member of medical and scientific societies, has been a large contributor to medical journals, and has published numerous monographs. He was the author of articles in the "American Cyclopædia," and his works include "The Physiology of Man" (New York, 1866–'74); "Manual of Chemical Examination of the Urine in Disease" (1870; 6th ed., 1884); "Text-Book of Human Physiology" (1876; 3d ed., 1881); "On the Source of Muscular Power" (1878); and "On the Physiological Effects of Severe and Protracted Muscular Exercise" (1871).

FLINT, Billa, Canadian senator, b. in Elizabethtown, Leeds co., Ont., 9 Feb., 1805. He was educated in his native town, and became a merchant. He has been president of the Belleville board of police, and also its reeve and mayor; was warden of Hastings county in 1873, and was member of the county council for twenty-four years. He was also reeve of Elzevir for twenty-one years, ending in 1879. He represented Hastings in the Canadian assembly from 1847 till 1851, and South Hastings from 1854 till 1858. He was an unsuccessful candidate in 1861 for the legislative council of Canada, but in 1862 was elected and represented the Trent division until the union of 1867, when he was called to the senate.

FLINT, Charles Louis, b. in Middleton, Mass., 8 May, 1824. His ancestors were among the early settlers of Salem. He was brought up on his father's farm, and obtained a collegiate education through his own exertions, graduating at Phillips Andover academy in 1845, and at Harvard in 1849. He studied law, but, having acquired some distinction by his contributions to agricultural journals, was appointed secretary of the Massachusetts board of agriculture, which office he held from 1853 till 1881. He was one of the original organizers of the Massachusetts agricultural college at Amherst, was its secretary for nearly twenty years, and for one year served as president. In addition to full and valuable annual reports, he has published "The Agriculture of Massachusetts" (3 vols., Boston, 1853–'4); "Treatise on Grass and Forage Plants" (New York, 1857); "Milch Cows and Dairy Farming" (Boston, 1859); a new edition of Harris's "Insects Injurious to Vegetation"; and, with George B. Emerson, a "Manual of Agriculture."

FLINT, Henry, educator, b. in Dorchester, Mass., in 1675; d. 13 Feb., 1760. He was graduated at Harvard in 1693, appointed a fellow of that college in 1700, and in 1705–'54 was a tutor there. He published a volume of sermons (1739).

FLINT, Henry Martyn, author, b. in Philadelphia, 24 March, 1829; d. in Camden, N. J., 12 Dec., 1868. He studied law, was an editor of the Chicago "Times" in 1855–'61, and then acted as correspondent for various newspapers. He published a "Life of Stephen A. Douglas" (Philadelphia, 1860); "The History and Statistics of the Railroads of the United States" (1868); and "Mexico under Maximilian" (1869).

FLINT, Jacob, clergyman, b. in Reading, Mass., 7 Aug., 1767; d. in Marshfield, Mass., 11 Oct., 1835. He was graduated at Harvard in 1794, and ordained pastor of the Unitarian Congregational church in Cohasset, 10 June, 1798. He published a history of Cohasset in the Massachusetts historical collection, and two discourses on the history of Cohasset (1821, reprinted in 1868).—His son, **Joshua Barker,** surgeon, b. in Cohasset, Mass., 13 Oct., 1801; d. in Louisville, Ky., 19 March, 1864, studied with his father, and was graduated at Harvard in 1820. He was appointed usher in the English classical school at Boston, of which George B. Emerson was the principal, and remained there for two years, after which he studied medicine. He received his medical degree at Harvard in 1825, and practised in Boston for twelve years, during which he served several terms in the legislature. In 1837 he was called to the chair of surgery in the Louisville medical institute, which he held until 1849. He was then elected to the same chair in the Kentucky school of medicine, and remained there until his death. He was the author of "Practice of Medicine" (2d ed., 1868).

FLINT, John James Bleecker, Canadian lawyer, b. in Belleville, Ont., 29 Dec., 1838. He received his education at the Belleville grammar-school, and at Victoria college, Cobourg. He began to practise law in 1862, was made town councillor in 1868, and held that office until 1872, when he was elected mayor of Belleville. In 1884 he was appointed police-magistrate. He is a Liberal in politics. He has been active in several philanthropic enterprises, and has aided in erecting a hospital and home for the friendless.

FLINT, Timothy, clergyman, b. in Reading, Mass., 11 July, 1780; d. in Salem, Mass., 16 Aug., 1840. He was graduated at Harvard in 1800, entered the ministry of the Congregational church, and settled in Lunenburg, Mass., in 1802. He was a diligent student in natural science, and his chemical experiments led ignorant persons to charge him with counterfeiting coin. He prosecuted them for slander. Ill-feeling, increased by political differences, arose between him and his parishioners, which caused him to resign his charge in 1814. He then preached in various parts of New England, and in 1815 went to the west as missionary, and spent seven or eight years in the Ohio and Mississippi valleys. In 1825 he returned to Massachusetts, broken in health and fortune. He then gave his attention to literature. In 1825 he removed to Cincinnati, where he edited the "Western Review"

for three years. He went to New York in 1833, and conducted a few numbers of the "Knickerbocker Magazine." Afterward he resided in Alexandria, Va., but spent most of his summers in New England. His publications are "Recollections of Ten Years passed in the Valley of the Mississippi" (Boston, 1826; reprinted in London, and translated into French); "Francis Berrian; or, The Mexican Patriot" (Boston, 1826); "Condensed Geography and History of the Western States in the Mississippi Valley" (2 vols., Cincinnati, 1828; 2d ed., 1832); "Arthur Clenning" (2 vols., Philadelphia, 1828); "George Mason; or, The Young Backwoodsman" (1829); "Shoshonee Valley" (Cincinnati, 1830); a translation of Droz's "Essay on the Art of Being Happy" (Boston, 1832); "Indian Wars in the West" (Cincinnati, 1833); "Lectures on Natural History, Geology, Chemistry, and the Arts" (Boston, 1833); a translation of "Celibacy Vanquished; or, The Old Bachelor Reclaimed" (Philadelphia 1834); and a "Memoir of Daniel Boone" (Cincinnati, 1834). He contributed a series of papers on "American Literature" to the London "Athenæum" in 1855.—His son, **Micah P.,** lawyer, b. in Lunenburg, Mass., in 1807; d. in 1830, was educated by his father, and travelled with him in the south and west. He studied law, and was admitted to the bar in Alexandria, Miss. He published "The Hunter, and Other Poems" (Boston, 1826), and contributed to the "Western Review."

FLOHR, George Daniel, clergyman, b. in Germany in 1759; d. in Wytheville, Va., in 1826. He studied medicine in Paris, and witnessed the execution of Louis XVI. The accidental and terrible death of an individual in the crowd standing near him, a part of whose mangled body was thrown upon him, so affected him that he changed all his plans for the future. He at once abandoned the thought of a medical career, and resolved to consecrate himself to the ministry, emigrating to the United States and going to Madison county, Va., where he studied theology under the direction of the Rev. William Carpenter, teaching in Culpeper until his preparation for the ministry was completed. He was licensed to preach by the synod of Pennsylvania, and immediately engaged in missionary service in southwestern Virginia. In 1799 he accepted a call to Wythe county, where he labored faithfully until his death. He exercised great influence upon all classes of society, and was frequently called upon to settle difficulties as a judge and lawyer as well as a clergyman. He preached altogether in German, and dressed according to the old German custom. He possessed an extensive knowledge of French, and was well read in Greek and Latin. A volume of his sermons was published after his death.

FLORENCE, Thomas Birch, statesman, b. in Philadelphia, 26 Jan., 1812; d. in Washington, 3 July, 1875. He was educated in the public schools, apprenticed to a hatter, and went into business for himself in 1833. For several years he was prominent in the temperance cause, and a member of a secret organization of workmen, called "The Brotherhood of the Union." After several ineffectual efforts to enter congress, he was elected as a Democrat in 1850, and served from 1851 till 1861, when he retired from politics and established and edited the Washington "Constitutional Union," and in 1868 the Washington "Sunday Gazette." In 1874 he was defeated by so small a majority for congress, by Chapman Freeman, the Republican candidate, that he would have contested the election had he not died of gangrene, caused by an accident that occurred during the canvass.

FLORENCE, William Jermyn, actor, b. in Albany, N. Y., 26 July, 1831. He became a member of the Murdoch dramatic association in New York city, made his first appearance in Richmond, 6 Dec., 1849, as Peter in "The Stranger," and soon acquired distinction as a versatile comic actor. He afterward appeared in Providence, successfully playing Macduff to Booth's Macbeth. Returning to New York, he appeared at Brougham's Lyceum in Irish characters. He married, on New Year's day, 1853, Mrs. Malvina [Pray] Littell, a danseuse attached to Wallack's theatre, and on 8 June following the two appeared at the National theatre, New York, as the Irish Boy and the Yankee Girl. In 1856 they went to England, and appeared in Drury Lane theatre, London, for fifty nights, to crowded houses, afterward performing in various theatres throughout the United Kingdom. Mr. Florence's best-known parts are those of Bardwell Slote in "The Mighty Dollar" and Captain Cuttle in "Dombey and Son," while Mrs. Florence is a favorite as Mrs. General Gilflory. She is a sister of Mrs. Barney Williams.

FLORENCIA, Francisco, clergyman, b. in Florida (probably in St. Augustine) in 1620; d. in Mexico in 1695. He entered the Jesuit order in 1643, and became famous as a professor of theology and philosophy. He was appointed procurator for the Jesuit province of Mexico, at Madrid and afterward at Rome; was next stationed at Seville as procurator of all the provinces of his order in the Indies, but returned to Mexico in 1680. He was the author of numerous works, the principal of which are: "Menologio de los varones mas señalados de la Compañía de Jesus en N. España" (Barcelona, 1661), and "Historia de la Compañía de Jesus en la N. España" (Mexico, 1694).

FLORES, Ignacio, South American administrator, b. in Satacunga, Ecuador, early in the 18th century; d. in Buenos Ayres in 1786. He completed his education in Spain, and became professor in a college in Madrid, but entered the army and returned to South America, rising gradually to the rank of colonel. In 1782 he was appointed president of Charcas, Upper Peru, which was then in a disturbed state, owing to the consequences of Tupac-Amaru's Indian revolt. He subdued the Indians after a bloody struggle, and restored order; but the Spanish judges of the audiencia, jealous of the position acquired by a Spanish-American, represented to the viceroy of Peru that Flores, instead of being the pacificator, had been one of the promoters of the insurrection. He was in consequence deposed and ordered to present himself in Buenos Ayres, where he arrived early in 1784, but died before his trial, which had been intentionally delayed. While in college he wrote a novel, "Viajes de Enrique Wanton," a delicate satire on England, France, and Spain.

FLORES, José, Mexican physician, b. in Chiapas, Mexico, about 1730; d. in Guatemala about 1795. He studied medicine in his native city, was called to a professorship at the University of San Carlos de Guatemala in 1775, and appointed president of the board of medicine of Central America. He made many journeys through that country, studying botany, formed a rich herbarium for the university, and gave impulse to the teaching of anatomy by constructing with his own hands three models for his classes. Flores wrote many scientific works, which are preserved in manuscript at the library of San Carlos. The only one published is "Específico Nuevamente Descubierto en el Reino de Guatemala para la curación radical del horrible mal del Cancro" (Mexico, 1782; reprinted in 1802).

The work asserts that cancer can be radically cured by eating a kind of lizard found near San Cristobal Amatitlan in Guatemala.

FLORES, Juan José, Spanish-American soldier, b. in Puerto Cabello, Venezuela, 19 July, 1800; d. at sea in 1864. He was forced to enlist in a Spanish regiment under command of Calzada; but at the beginning of the battle of Chire, in 1815, he remained in the rear, walked to where Gen. Ricaurte was stationed in Pore, and was taken into the service. He fought for the liberty of New Granada in 1819, made the campaign of Trujillo and Merida in 1820, became colonel in 1822, and in 1823 commander of Pasto, New Granada, where he was defeated. But he soon recovered, and was second in command in the victorious campaign of Ibarra. In 1824 he resumed command of a part of the army, and put an end to the war. In 1825 he was appointed commanding-general of Ecuador, and re-established peace in the country. He was made brigadier-general in 1826, and in 1827 fought against the insurgents of Lima, and, after much bloodshed, re-established order. In 1828 he became commander-in-chief of the army, continuing the war with Peru and repelling the invaders. He negotiated the treaty of Jiron, and when peace was concluded was appointed commander of Ecuador. In 1830 Ecuador became independent, and Flores was elected its first president. In 1832 the country was involved again in war, until 1835, when Flores restored peace and resigned the government. In 1839 and 1843 he was elected president of the republic again, and in the latter year again suppressed a rebellion; but in 1845 he resigned his office and went to Europe. In 1860 he returned to Quito and captured Guayaquil from the insurgents.—His son, **Antonio,** b. in Quito in October, 1833, was educated at the college of his native city and in Paris. After experience as a professor and journalist, he was appointed minister to Washington (1860–'4). In 1881 and 1882 he was elected senator in the congress of Ecuador, but was exiled by Veintemilla. He returned in May, 1883, joined the revolutionary forces, and participated in the siege of Guayaquil. He was elected to the National convention, in 1884 was again appointed minister to Washington, Paris, London, and Rome, and in 1887 to Belgium, where he negotiated a treaty of commerce. He has published "Compendio de Historia Universal" (1860); "Las Letras Españolas en los Estados Unidos," and "La Naturalización en los Estados Unidos" (New York, 1881); "El Gran Mariscal de Ayacucho" (1885); and is now (1887) writing "La Diplomácia Americana y los Diplomáticos Americanos."

J. J. Flores

FLORES, Venancio (flo'-rez), Uruguayan soldier, b. in Paysandu in 1809; d. in Montevideo, 19 Feb., 1868. He was the son of a rich cattle-owner, and passed his youth on the pampas. In 1853 he led an insurrection, and when the president fled to a neutral man-of-war for protection, Flores declared the executive chair vacant. He then had himself appointed president, but in 1855 his government was overthrown, and he retired to Buenos Ayres. In 1858 he invaded the republic for a second time, but was soon defeated. When the war between Buenos Ayres and the Argentine Confederation began, Flores volunteered to serve under Mitre, and in 1863 invaded Uruguay for a third time, but was defeated at Las Piedras on 16 Aug. When war between the republic and Brazil began, Flores, assisted by a Brazilian and Argentine force, blockaded Montevideo and forced Villalba, who had taken charge of the government provisionally, to enter into an arrangement by which Flores was elected president, Flores entered into the triple alliance against Paraguay, 1 May, 1865, and was in command of the allied armies at the capitulation of the Paraguayan army, for which he received from the emperor of Brazil the cross of the Cruceiro. During his absence in the field Vidal had been elected president *pro tempore;* but on his return in 1866, Flores forced the former to resign the government into his hands. In consequence of a revolution, headed by his sons, he resigned the presidency, 15 Feb., 1868, before his term was ended, and was assassinated in a street tumult, four days afterward.

FLORES-ALATORRE, Juan José, Mexican lawyer, b. in Aguascalientes, 1 June, 1766; d. in the city of Mexico, 8 July, 1854. He graduated at the University of Mexico in 1790, was appointed defender of the poor in 1794, and in 1799 public defender of the criminals of his tribunal. He was made judge of the same court in 1801, commissioned to inspect the treasury of Sombrerete in 1807, and in 1808 was promoted criminal judge for the supreme court of Mexico. He was deputy for Zacatecas to the constituent cortes of Cadiz in 1813, and in 1814 was elected president of the Academy of jurisprudence. In 1818 he became a member of the supreme court of Guadalajara. The Emperor Iturbide appointed him one of the members of the supreme court of the empire, and during the political disturbances of the following years Flores was left undisturbed in his office, which he left in 1840, with a pension. He left ready for publication a "Diccionario Legislativo."

FLOURNOY, Thomas Stanhope, lawyer, b. in Prince Edward county, Va., 15 Dec., 1811; d. in Pittsylvania county, Va., 13 March, 1883. He was educated at Hampden-Sidney college, studied law, and was admitted to practice at Halifax Court House, Va. He was distinguished throughout the circuit, which was noted for its brilliant bar, as a speaker of much eloquence, and for his great success as a criminal lawyer. Though a Whig, through his personal popularity he was elected to congress in 1846 in a largely Democratic district. In 1856 he was nominated by the Whig and Know-Nothing parties as candidate for governor of Virginia against Henry A. Wise, who was elected. Mr. Flournoy was a member of the convention of Virginia in 1860–'1, and used all his influence to prevent the secession of the state. When it finally declared for the Confederacy, he joined the army of northern Virginia as a private, but was appointed colonel, and was in active service throughout the war.

FLOWER, Frank Abial, author, b. in Cottage, Cattaraugus co., N. Y., 11 May, 1854. He was educated at the Towanda union and Fredonia normal schools, learning the printer's trade at the same time. Subsequently he settled in Wisconsin, where for several years he edited a newspaper. In 1883

he was appointed commissioner of labor and industrial statistics, and reappointed in 1885. His reports in this connection have received favorable comment. He has also held other appointments, and is curator of the Wisconsin state historical society. Mr. Flower is the author of several local histories, and has published "Old Abe, the Wisconsin War Eagle" (Milwaukee, 1880); "Life of Matthew H. Carpenter" (Madison, 1883); and a "History of the Republican Party" (Springfield, 1884).

FLOWER, George, colonist, b. in Hertfordshire, England, about 1780; d. in Grayville, White co., Ill., 15 Jan., 1862. He was born in affluent circumstances, and, after travelling on the Continent for the benefit of husbandry, he came to the United States in 1817 as the associate of Morris Birkbeck, in order to found an English colony in Albion, Edwards co., Ill. Here he built an elegant mansion, and his large wealth gave him a commanding position. In addition to the improved husbandry, this farm was stocked with the finest fleeces of England and Spain. His wisdom and benevolence exerted great influence upon the new settlement. When the attempt to legalize African slavery in Illinois was made in 1823, he was instrumental in securing its defeat. In the financial changes of the new country his wealth was lost, and for many years he lived in retirement with his children in Indiana and Illinois. In December, 1861, Mr. and Mrs. Flower made a visit to their daughter, Mrs. Aguiel, in Grayville, White co., Ill., and early in January, 1862, they both became ill on the same day, and a week later died on the same day. He wrote a "History of the English Settlement in Edwards County, Illinois, founded in 1817 and 1818 by Morris Birkbeck and George Flower" (Chicago, 1882).—His son, **Edward Fordham,** b. near Hertford, England, 31 Jan., 1805; d. in London, 26 March, 1883, spent his early life in Illinois, and then resided for nearly half a century at Stratford-on-Avon, where he was well known for his hospitalities to Shakespearian visitors. Bryant, Emerson, Longfellow, and Sumner were among his American guests. He was four times chosen mayor of the borough. Mr. Flower advocated with energy a more humane treatment of horses, especially in the abolition of bearing-reins and severe bits, upon which subject, and also upon the improvement of road-making, he published several widely circulated pamphlets. One of his three sons is president of the Zoölogical society of London.

FLOWER, Roswell Pettabone, congressman, b. in Theresa, Jefferson co., N. Y., 7 Aug., 1835. His ancestor emigrated from England to Hartford, Conn., in 1686. Roswell lost his father when eight years old, became a clerk in a store at fourteen, and afterward received a high-school education. After working in a brick-yard, and as a post-office clerk, he was for ten years a jeweller, and afterward became a broker in New York city. In 1881–'3 he was a member of congress, having been elected as a Democrat over William W. Astor. In 1886 he was appointed one of the electric-subway commissioners in New York city. Mr. Flower gave $50,000 for the erection of the St. Thomas home on 59th street, New York.

FLOWERS, Samuel Bryce, physician, b. in Wayne county, N. C., 31 Oct., 1835. He was educated at Wake Forest college, N. C., and was graduated in medicine at the University of Pennsylvania in 1859. In that year he settled in Camden, Ark., but returned to North Carolina in 1862, and served as surgeon in the Confederate army during the civil war. He is a member of the board of health of Wayne county, of the Wayne county medical society, of the North Carolina medical society, of which he was elected vice-president in 1875, and of the Eastern medical association, of which he was vice-president in 1877. He has contributed to the "Philadelphia Medical and Surgical Reports," and to the "Virginia Medical Monthly."

FLOY, James, clergyman, b. in New York city, 20 Aug., 1806; d. there, 14 Oct., 1863. He was educated at Columbia, and then spent three years in Europe studying, especially botany, at the royal gardens at Kew. In 1835 he was received into the New York conference of the Methodist Episcopal church, and for eighteen years was pastor of churches in Middletown, New Haven, Brooklyn, and New York. In 1848 he was placed on the committee to revise the Methodist hymn-book, in 1854 was appointed presiding elder of the New York district of New York east conference, and in 1856 became editor of the "National Magazine," and corresponding secretary of the American tract society. He also edited a denominational paper called "Good News." In 1860 he published his "Guide to the Orchard and Fruit-Garden," and edited the posthumous works of the Rev. Stephen Olin, D. D. In 1861 he returned to his pastorate in New York city, in which he continued till his death. Dr. Floy was one of the ablest and earliest of the anti-slavery clergymen, suffering the unpopularity, and afterward enjoying the success, of the cause.

FLOYD, John, soldier, b. in Beaufort, S. C., 3 Oct., 1769; d. in Camden county, Ga., 24 June, 1839. His father was Col. Charles Floyd, who was ruined pecuniarily by the Tories of the Revolution. The family removed to Georgia in 1791, and by boat-building at the mouth of the St. Illa river retrieved their fortunes. John, one of several sons, received little early education, but had a bold and indomitable spirit, which soon made itself felt in the community. In 1813 he was elected brigadier-general of the Georgia militia. He commanded at the battle of Autossee, Ala., against the Creek Indians, 29 Nov., 1813, where he was severely wounded. On 27 Jan. of the next year he commanded at Camp Defiance, in battle with the same Indians. From 1820 till 1827 he was a member of the Georgia legislature, and in 1827–'9 of congress. Afterward he was major-general of militia.

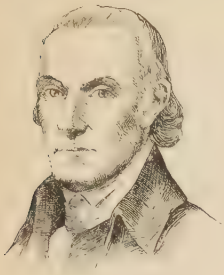
FLOYD, John, statesman, b. in Jefferson county, Va., in 1770; d. at Sweet Springs, Va., 16 Aug., 1837. He served in congress from Virginia from 1817 till 1829, as a states rights Democrat, in 1829–'34 he was governor of Virginia. He was a personal friend of Presidents Jefferson, Madison, and Jackson, but became incensed by the proclamation of the latter against the nullification of South Carolina, and opposed him for his second term. South Carolina voted for Mr. Floyd for the presidency in 1832. He married Letitia, sister of Gen. Frank Preston, of Virginia.—Their son, **John Buchanan,** statesman, b. in Blacksburg, Va., 1 June, 1807; d. near Abingdon, Va., 26 Aug., 1863. He was graduated at the College of South Carolina in 1826, removed to Arkansas in 1836, and resided there three years, when he returned to Virginia and practised law in Washington county. He served in the state legislature in 1847–'9 and 1853, and was governor of Virginia in 1850–'3. He was a member of the electoral college in 1856, and a supporter of James Buchanan for the presidency, who appointed him secretary of war. He held this office from 1857 till the autumn of 1860, when, having declared for secession, he resigned, and returned to his home in Abingdon, Va. In the winter of 1861 he was indicted in Washington, on the charge of having secretly, during the latter portion of his adminis-

tration of the war department, prepared the means to aid secession leaders, dispersed the army into remote parts of the country, where the troops could not readily be conveyed to the Atlantic coast, and transferred from northern to southern arsenals 113,000 muskets; and that he was privy to the abstraction of $870,000 in bonds from the department of the interior during the latter part of 1860. Immediately on learning of these charges, Mr. Floyd went to Washington, appeared before the court, gave bail, and demanded trial. In January, 1861, a committee of the house of representatives made an investigation, and completely exonerated Mr. Floyd from each charge of the indictment. In 1861 he was appointed brigadier-general in the Confederate army, and was engaged at the battle of Carnifex Ferry, 10 Sept., 1861. At the battle of Fort Donelson, 16 Feb., 1862, he reached the field when the engagement had begun, and found the position untenable and the Confederate army in a *cul de sac* from which nothing but the hardest fighting could extricate it. He gave orders to that effect, and, after two days' heavy fighting, succeeded in opening a way for the extrication of his troops by a movement to his left. Afterward Gen. Pillow ordered back the main body of the Confederate army which was under his command to its original position, leaving Gen. Floyd's troops without support on the ground they had gained, whereupon he retreated, with little comparative loss to his own command. Two weeks afterward Gen. Floyd was censured by Mr. Davis for this act, and relieved from command.—His wife, **Sally Buchanan,** b. near Abingdon, Va., 14 Feb., 1802; d. there, 7 May, 1879. She was the third daughter of Gen. Frank Preston, of Abingdon, granddaughter of Gen. William Campbell, who commanded at King's Mountain, and niece of Patrick Henry. Her brothers were William C. Preston, senator, and Gen. John S. Preston, of South Carolina. Gen. and Mrs. Floyd had no children, but adopted two orphan relatives—John Preston Johnson, an artillery officer of the United States army, who was killed at Contreras in the Mexican war, and Eliza, his sister, who married Judge Robert Hughes, of the United States district court, of Norfolk, Va.

FLOYD, Richard, colonist, b. in Brecknockshire, Wales, about 1620; d. in Seatolcott (now Setauket), Suffolk co., N. Y., about 1690. He came to this country in 1654, and with Richard Woodhull and fifty-two others to Setauket, which they founded in 1655. He was the first of the Floyd family on Long Island, and a man of intelligence and vigor. At the beginning of the settlement he was chosen judge of Suffolk county, and colonel of militia, and held the offices during his life.—His eldest son, **Richard,** b. in Setauket, 12 May, 1661; d. there, 28 Feb., 1737, was appointed judge of the common pleas in 1723, and was also colonel of the militia of Suffolk county. He married, 12 May, 1686, Margaret Nicoll (1662–1718), oldest daughter of Matthias Nicoll, secretary of the Duke of York's commissioners who captured New York from the Dutch, and the first secretary of the English province of New York.—Their eldest son, **Richard,** third of the name, b. 29 Dec., 1703; d. 21 April, 1771, likewise became judge of the common pleas in 1752, and colonel of the militia of Suffolk county, which offices, like his father and grandfather, he held during his life. He was a man of integrity and honor, easy of access, and generous to those who stood in need of aid. He married the daughter of Col. Samuel Hutchinson, of Southold.—Their eldest son, **Richard,** fourth of the name, b. about 1736; d. in Maugerville, New Brunswick, 30 June, 1791, like his ancestors, was judge of the common pleas (appointed in 1764), and colonel of the militia of Suffolk county. He was noted for his affability, politeness, fine manners, and profuse hospitality. The great estate of the family in the manor of St. George had descended to him, and his house was famed for its always open doors. Here he entertained Gov. Tryon and all his chief officers on his march down Long Island. Its position, and the politics of its owner, exposed it to the attacks of the whale-boat expeditions from Connecticut, and three times he was robbed of his cattle, sheep, and slaves. He was included in the act of attainder, and at the peace of 1783, when the act became operative, he removed to New Brunswick and settled on the St. John's river.—His wife, whom he married on 26 Sept., 1758, was **Arabella,** daughter of Judge David Jones, of Fort Neck, Queens co., and sister of Judge Thomas Jones, of the supreme court of New York, author of the "History of New York during the Revolutionary War"; and upon her male issue, her father by will entailed his estate at Fort Neck in default of issue to her brother, Judge Thomas Jones, on condition of adding the name of Jones to their own. The latter had no issue by his wife Anne, daughter of Gov. James de Lancey. Consequently **David Richard,** only son of Richard Floyd and Arabella Jones, b. 14 Nov., 1764; d. in 1826, became David Richard Floyd-Jones, which double patronymic the family has since borne. This change was also confirmed by special act of the legislature of New York in 1788. Hence the junior branches only of this family for the last hundred years, and at present, bear the name of Floyd.—**Thomas Floyd-Jones,** eldest son of the last, b. in 1788; d. in 1851, succeeded to the estate of Fort Neck, and at his death the entail by its terms came to an end.—His eldest son, **David Richard Floyd-Jones,** lawyer, b. in 1813; d. 8 Jan., 1871, was member of assembly for New York in 1841, 1842, 1843, and in 1857, state senator in 1844–'7, inclusive, member of the Constitutional convention of 1846, secretary of state in 1860–'1, and lieutenant-governor of New York in 1863–'4.—**Henry Floyd-Jones,** second son of Thomas Floyd-Jones, and uncle of the Lieut.-Gov. Floyd-Jones, b. in 1792; d. in 1862, was member of assembly in 1829, state senator and member of the court of errors from the old first district, consisting of Kings, Queens, New York, and Richmond counties, from 1836 till 1840, and brigadier-general of militia.

FLOYD, William, signer of the Declaration of Independence, b. in Brookhaven, Suffolk co., N. Y., 17 Dec., 1734; d. in Weston, Oneida co., N. Y., 4 Aug., 1821. He was the son of Nicoll Floyd, of Brookhaven, who was second son of Richard Floyd, second of the name, received from his father only a moderate-sized farm, and was engaged in its cultivation during the earlier part of his life. Being a strong Congregationalist, like many Suffolk county people, and fixed in his convictions on all subjects, he embraced warmly the cause of independence when the Revolution began, until which time he had taken no active part in political affairs. He was about forty years of age when he first entered political life by being sent as a delegate to the Philadelphia congress of 1774. The next year he was a deputy to the New York provincial convention to choose delegates to the 1st Continental congress of 1775, and was by it appointed a delegate to that body. He continued by successive reappointments a member of every Continental congress up to 1782 inclusive. At the same time, from 1777 till 1783,

he was state senator under the first constitution of New York, being regularly appointed by that body for the southern district, then wholly within the British lines, so that no elections could be held. From 1784 till 1788 he was duly elected to the same office from the same district. In 1787 and 1789 he was chosen a member of the council of appointment. In the presidential elections of 1792, 1800, and 1804 he was chosen one of the presidential electors, and in 1801 he sat for Suffolk county in the Constitutional convention of that year. He was an early and warm supporter of Jefferson. His education being only that of the country schools of his youth, he was not a speaker nor orator, nor an accomplished writer. But in the work of the different bodies in which he served he was noted for his assiduity, sound advice, and unflagging labor and thorough knowledge of the business before them. He was eminently a practical man, and his firmness and resolution were very great. Although somewhat unpolished in manner, he at the same time possessed a natural gravity and dignity which made itself felt. After the war he was appointed major-general of the militia on Long Island, and in his youth he was a captain. But his military services were confined to heading a detachment of militia that was suddenly called to repel a boat invasion from a British ship at the outset of the war. Except at the beginning, for a short time, he received nothing from his farm during the war, as it was within the British lines, and appropriated to the use of Connecticut refugees as "rebel property." He was, therefore, often during the war in great straits, having nothing but his pay as a delegate in congress. At its close he bought a very large tract of confiscated land in Oneida county, to which, in 1804, he finally removed with his children, and where he resided till his death. He was married twice, first to Hannah Jones, of Southampton, who died in 1781, and secondly to Joanna Strong, of Setauket, by each of whom he left issue.



FLUSSER, Charles W., naval officer, b. in Annapolis, Md., in 1833; d. near Plymouth, N. C., 18 April, 1864. He removed to Kentucky when a child, and was appointed a midshipman in the navy, 19 July, 1847. His first cruise was made in the "Cumberland." He was promoted to lieutenant, 16 Sept., 1855, and in 1857 became assistant professor at the U. S. naval academy. He was in the brig "Dolphin" in 1859–'60, and during his succeeding leave of absence the civil war began. He refused the offer of a high command in the Confederate service, applied for active duty, and was assigned to the command of the gun-boat "Commodore Perry," with which vessel he took part in the attack by Com. Goldsborough that preceded the capture of Roanoke Island on 7 Feb., 1862. In October he took part in the shelling of Franklin, Va., and afterward commanded the "Perry" in the North Carolina waters. He was killed while in command of the gun-boat "Miami" in battle with the iron-clad "Albemarle" in Roanoke river.

FLYNN, Edmund James, Canadian statesman, b. in Percé, Lower Canada, 16 Nov., 1847. He was educated at the seminary of Quebec, and at Laval university, where he was graduated in June, 1873. He was called to the bar in September of that year, and in 1874 was appointed professor of Roman law in Laval university, which chair he still fills. He was elected to the provincial parliament in 1878, and was a member of the executive council and commissioner of crown lands in the Chapleau government from 31 Oct., 1879, till 31 July, 1882. He was commissioner of railways from February, 1884, till July, 1886, and is now (1887) solicitor-general. He received the degree of LL. D. from Laval university in 1878.

FOBES, Perez, educator, b. in Bridgewater, Mass., 21 Sept., 1742; d. 23 Feb., 1812. He was graduated at Harvard in 1762, became a teacher, studied theology, and was ordained in November, 1766, as pastor of the Congregational church in Raynham, Mass. He was a zealous patriot, and in 1777 volunteered as chaplain in the Revolutionary army, notwithstanding his feeble health. In 1786 Dr. Fobes was chosen vice-president of Brown university, and shortly afterward was elected to the professorship of natural philosophy. In 1795 he was elected a fellow of the university, which office he held until his death. In the following year he was called to the supervision of Bristol academy, which he retained so long as his health permitted. He was a thorough scholar, and had a rare talent for communicating knowledge. Brown gave him the degree of LL. D. in 1792. Dr. Fobes published "Topographical Description of Raynham, with its History" (in Massachusetts historical collections, 1794); "Scripture Catechism" (1804; abridged ed., 1809); and sermons, including two before the legislatures of Massachusetts (1775) and Rhode Island (1795).

FOCHER, Jean (fo-shay'), Flemish monk, b. in Ghent in 1501; d. in the city of Mexico, 30 Sept., 1572. He studied in his native city and in Leyden, was graduated as doctor in canonical and common law, and in 1526 entered the order of St. Francis, going in 1531 to Mexico to offer his services as a missionary. His erudition became soon apparent to his superiors, who sent him as professor to their newly established college of Santiago de Tlaltelolco, where he instructed the sons of the native emperors and caciques who had been sent by order of Charles V. to this college. He soon became the oracle of the Mexican prelates and men of letters, and his sense of justice was so inflexible that once, when his decision on a point of law went against the dictate of the superior of his convent, he preferred undergoing a disciplinary chastisement rather than change his decision. At his death nothing but his Bible and body of law were found in his cell, and such was his reputation as an authority on literary and canonical points that one of the most illustrious clergymen of Mexico, Alonso de la Veracruz, exclaimed, on hearing of his death, "Now that Father Focher is dead we shall all be in utter darkness." Focher wrote numerous works, part of which were sent to Spain, and many of them lost; part exist in manuscript in the Biblioteca Nacional of Mexico. A few of the most noteworty are "Itinerarium catholicum proficicientibus ad infideles convertendos" (Mexico; reprinted, Seville, 1574); "Arte de la Lengua Mexicana" (MS. in Biblioteca Nacional of Mexico); "De Fratre professo ab Ordine ejecto, matrimonium contrahere volente" (MS. in the library of the Franciscan convent of Tezcoco); "Responsa ad Fr. Michaelem de Zárate super dubia

quaedam juris" (manuscript in Biblioteca Nacional of Mexico); and "Enchiridion baptismi adultorum; ann. 1544. scriptum" (manuscript in the Franciscan library of Toledo, Spain).

FOGG, George Gilman, senator, b. in Meredith, N. H., 26 May, 1815; d. in Concord, N. H., 5 Oct., 1881. He was graduated at Dartmouth in 1839, and became principal of Hebron academy, and then professor of English literature in the academy at New Hampton. After studying law privately and at the Harvard law-school, he was admitted to the bar in 1842, and practised in Gilmanton. He was in the legislature in 1846, and soon afterward was appointed secretary of state. He then became editor-in-chief of the "Independent Democrat," published first at Manchester and afterward at Concord, and held that post from 1854 till 1861. He was reporter of the state supreme court in 1855–'9, and in 1856 was clerk of the congressional committee sent by the house of representatives to Kansas. He was a delegate to the Buffalo Free-soil convention of 1848, to the Pittsburg convention of 1852, the Philadelphia Republican convention of 1856, and to the Chicago convention of 1860. He was a member of the Republican national committee from 1856 till 1864, and was at one time its secretary. He declined the office of commissioner of patents, and was appointed by President Lincoln U. S. minister to Switzerland, serving from 1861 till 1865. During the succeeding year he was appointed by the governor of New Hampshire to the U. S. senate in place of Daniel Clark, resigned, and served till 1867. In 1866 he was a delegate to the Philadelphia loyalists' convention. He was actively connected with the New Hampshire historical society, and was a trustee of Bates college, Lewiston, Me., to which he gave $5,000, and which gave him the degree of LL. D. After his return from Europe he resumed the editorship of the "Independent Democrat" till it was united with the "Statesman" in 1871, and was then for one year the principal political writer for the combined paper, when he resigned and retired. Mr. Fogg was a man of strong convictions and honest purposes, and a vigorous and fearless writer. He never married.

FOLEY, Margaret E., artist, b. in New Hampshire; d. in Menan, Austrian Tyrol, in 1877. She was entirely self-taught, and began her career in a humble way, carving small figures in wood, and modelling busts in chalk. Later she removed to Boston, where she suffered many privations, and earned a scanty support by carving portraits and ideal heads in cameo. At the end of seven years she went to Rome, where she spent the rest of her professional life, becoming the friend and associate of Harriet Hosmer, Gibson, Story, Mrs. Jameson, and William and Mary Howitt. In the summer of 1877, her health failing, she accompanied the Howitts to their home in Austrian Tyrol, where she died. Among her portrait busts are those of S. C. Hall, Charles Sumner, and Theodore Parker. The medallions of William and Mary Howitt, Longfellow, and William Cullen Bryant, and her ideal statues of "Cleopatra," "Excelsior," and "Jeremiah," are the best specimens of her cameo work.

FOLEY, Thomas, R. C. bishop, b. in Baltimore in 1823; d. there in 1879. He studied in St. Mary's seminary, Baltimore, and was ordained priest in 1846. He was first placed over the mission of Rockville, and afterward appointed assistant pastor to St. Patrick's church, Washington. After 1848 he was chancellor of the archdiocese of Baltimore, and in 1867 he was appointed vicar-general. Afterward, when the diocese of Chicago had been thrown into confusion by the insanity of Bishop Duggan, Father Foley was commissioned to restore order, and in 1869 he was nominated coadjutor-bishop of Chicago. He was consecrated in 1870. After the Chicago fire had destroyed seven churches and several schools and asylums, he set at once to work to rebuild them. He erected the cathedral of the Holy Name, and founded five new convents and seven academies. During his administration the number of priests in the diocese increased from 142 to 206, and the churches from 200 to 300.

FOLGER, Charles James, jurist, b. in Nantucket, Mass., 16 April, 1818; d. in Geneva, N. Y., 4 Sept., 1884. In 1831 he removed with his father to Geneva, N. Y. He was graduated at Geneva (now Hobart) college in 1836, studied law in Canandaigua, was admitted to the bar in Albany in 1839, and, after practising a short time in Lyons, settled in Geneva in 1840. In 1843 he became a judge of the court of common pleas in Ontario county, and soon afterward was also made master and examiner in chancery, which offices were abolished by the constitutional convention of 1846. He was also county judge in 1852–'6. He was a Democrat till 1854, when he joined the newly formed Republican party. He was a state senator in 1861–'9, acting for four years of the time as president *pro tempore*, and was chairman of the judiciary committee during the whole period. He was a member of the New York constitutional convention of 1867, and chairman of its judiciary committee. By the appointment of President Grant he was U. S. assistant treasurer in New York city from 1869 till 1870. He was elected associate judge of the state court of appeals in 1871, and on the death of Chief-Justice Church, in 1880, he was designated by Gov. Cornell to fill the unexpired term of that officer. In November of that year he was re-elected to the bench of the court of appeals for the full term of fourteen years, but resigned in 1881 on his appointment by President Arthur to the treasury portfolio, which he retained till his death. The New York state Republican convention in September, 1882, nominated him for governor, but through a defection in his party he was defeated by Grover Cleveland by nearly 200,000 majority. He took his defeat so much to heart that, in the opinion of those who knew him well, his health was seriously affected thereby.

Chas. J. Folger

FOLGER, Peter, colonist, b. in England in 1617; d. in Nantucket, Mass., in 1690. He left Norwich, England, in 1635, with his father, settled in Watertown, Mass., and removed to Martha's Vineyard in 1641, where he taught, surveyed land, and assisted Thomas Mayhew, the missionary, in his labors among the Indians. He afterward became a Baptist minister, and in 1663 he removed to Nantucket, having been offered by the proprietors a half-share of land if he would serve there as surveyor and interpreter. He was one of five commissioners to lay out land; it was voted that,

"whatever shall be done by them, or any three of them, Peter Folger being one, shall be accounted legal and valid." He was also a clerk of the courts for a time. Cotton Mather, in his "Ecclesiastical History of the Province in New England," refers to Folger as pious and learned. He was familiar with the scriptures, taught them to the youths, and occasionally preached. Among other lesser pieces, he published a poem entitled "A Looking-Glass for the Times; or, The Former Spirit of New England revived in this Generation" (1675; 2d ed., 1763). Of it Benjamin Franklin, in his autobiography, says: "The poem, in familiar verse, appeared to be written with a manly freedom and a pleasing simplicity, agreeably to the tastes of the times and the country. The author addresses himself to the governors of the colonies, speaks for liberty of conscience, and in favor of the toleration of sects, among them the Quakers and Anabaptists, who had suffered persecution."—His daughter, **Abiah,** b. in Nantucket, 15 Aug., 1667, married Josiah Franklin, and became the mother of Benjamin Franklin.—His great-grandson, **Peleg,** sailor, b. in Nantucket, Mass., 13 Oct., 1733; d. there, 26 May, 1789. His life was passed on a farm until he was twenty-one years old, when he changed from land to sea, and for several years was engaged in the cod and whale fisheries. He kept a journal of his voyages, which is written in a much more scholarly manner than could be expected from his limited education. Some of the verses that he introduced into his journal were quoted in Macy's "History of Nantucket," and seem to be those of a scholar rather than a sailor. On his retirement from the sea, his counsel was much sought by his neighbors. He was a member of the society of Friends.

FOLGER, Walter, lawyer, b. in Nantucket, Mass., 12 June, 1765; d. 8 Sept., 1849. He attended the common schools, studied higher mathematics, navigation, and French by himself, and became a proficient scholar. He was for many years a watch and clock maker, and in 1788 began an astronomical clock, which he completed in 1790. He calculated and published an almanac for 1790, and assisted in compiling others. He then studied medicine and surgery, and practised gratuitously; also studied law, and followed this profession in the courts of Massachusetts and Rhode Island till about 1828. He was one year a representative in the Massachusetts legislature, state senator in 1809–'15, was for six years a judge of the court of common pleas and of the court of sessions in Nantucket county, and at one time chief justice of both of these courts. He represented his state in congress from 1817–'21, having been elected as a Democrat. During the war of 1812 he established a factory at home, where carding, spinning, and weaving were carried on by himself and his sons. His power-looms were among the earliest in this country, and he manufactured many kinds of cotton and woollen goods. He kept a record of the weather for twenty-one years (1827–'48), was for some time principal of Nantucket academy, and during two winters, in the evenings, taught navigation and nautical astronomy to several shipmates. He made observation on the comet of 1811, and afterward calculated the orbit of another comet. In his seventieth year he began a genealogy of the people of Nantucket, on which he continued to write till his death. He contributed mathematical problems to various newspapers and scientific journals in Boston and New York, and was the author of "Description of Nantucket," in the Massachusetts historical collections (1794), and "Observations of the Solar Eclipse of 1811."

FOLLEN, Charles Theodore Christian, educator, b. in Romrod, Germany, 4 Sept., 1796; d. in Long Island sound, 13 Jan., 1840. He was the second son of Christopher Follen, an eminent jurist. He was educated at the preparatory school at Giessen, where he distinguished himself for proficiency in Greek, Latin, Hebrew, French, and Italian. At the age of seventeen he entered the University of Giessen, and began the study of jurisprudence, but presently, on hearing the news of Napoleon's defeat at Leipsic, he enlisted in a corps of riflemen. A few weeks after enlisting, his military career was cut short by an acute attack of typhus fever, which seemed for a time to have completely destroyed his memory. After his recovery he returned to the university, where he took the degree of doctor of civil law in 1817. In the following year he lectured on the pandects in the University of Jena. Here he was arrested on suspicion of complicity with the fanatical assassin, Sand, in the murder of Kotzebue. The suspicion was entirely groundless. After his acquittal he returned to Giessen, but soon incurred the dislike of the government through his liberal ideas in politics. His brother had already been thrown into jail for heading a petition begging for the introduction of a representative government. Dr. Follen, perceiving that he was himself in danger, left Germany and went to Paris, where he made the acquaintance of Lafayette. In 1820 the French government ordered all foreigners to quit France, and Dr. Follen repaired to Zurich, where he became professor of Latin in the cantonal school of the Grisons. He was soon afterward transferred to the University of Basel, as professor of civil law, and here, in association with the celebrated De Wette, he edited the literary journal of the university, and published an essay on the "Destiny of Man," and another on "Spinoza's Doctrine of Law and Morals." In 1824 the governments of Russia, Austria, and Prussia demanded of the Swiss government that Dr. Follen should be surrendered to "justice" for the crime of disseminating revolutionary doctrines, and, finding the Swiss government unable to protect him, he made his escape to America, and, after devoting a year to the study of the English language, was appointed instructor in German at Harvard. He studied divinity with Dr. W. E. Channing, began preaching in 1828, and also served as instructor in ecclesiastical history in the Harvard divinity-school. In 1830 he was appointed professor of German literature at Harvard. There was no regular foundation for such a professorship; it was merely continued from time to time by a special vote of the corporation. About this time Dr. Follen became prominently connected with the anti-slavery movement, which was then extremely unpopular at Harvard, and in 1834 the corporation refused to continue his professorship. Thrown thus upon his own resources, after nearly ten years of faithful and valuable service at the university, Dr. Follen supported himself for a time by teaching and writing, living at Watertown, Milton, and Stockbridge. In 1836 he was formally ordained as a Unitarian minister, and preached occasionally in New York, Washington, and Boston. He continued conspicuous among the zealous advocates of the abolition of slavery. In 1840 he was settled over a parish in East Lexington, Mass., but while on his way from New York to Boston he lost his life in the burning of the steamer "Lexington." He published a "German Reader" (Boston, 1831; new ed., with additions by G. A. Schmitt, 1858); and "Practical Grammar of the German Language" (Boston,

1831). His complete works, containing lectures on moral philosophy, miscellaneous essays and sermons, and a fragment of a treatise on psychology, and a memoir by his widow, were published after his death (5 vols., Boston, 1842).—His wife, **Eliza Lee Cabot,** author, b. in Boston, 15 Aug., 1787; d. in Brookline, Mass., 26 Jan., 1860, was the daughter of Samuel Cabot, of Boston, and married Dr. Follen in 1828. After her husband's death she educated their only son, whom, with other pupils, she fitted for Harvard. She edited the "Child's Friend" in 1843–'50. Mrs. Follen was an intimate friend of William Ellery Channing, and was a zealous opponent of slavery. Besides the memoir of her husband, mentioned above, she published "The Well-Spent Hour" (Boston, 1827); "The Skeptic" (1835); "Poems" (1839); "To Mothers in the Free States" (1855); "Anti-Slavery Hymns and Songs" (1855); "Twilight Stories" (1858); and "Home Dramas" (1859).

FOLLET, David Lyman, jurist, b. in Sherburne, N. Y., 17 July, 1836. He was educated at Cazenovia seminary, N. Y., admitted to the bar in Binghamton in 1858, and settled in Norwich, N. Y. He has been assessor of internal revenue for the 19th district, and in 1874 was elected a justice of the supreme court of New York.

FOLSOM, Abby, reformer, b. in England about 1792; d. in Rochester, N. Y., in 1867. She came to the United States about 1837, became noted as an advocate of anti-slavery reform, and was well known for her addresses at the meetings of the American anti-slavery society, about 1842–'5. She married a Mr. Folsom, a resident of Massachusetts, and afterward rarely appeared in public. She published a "Letter from a Member of the Boston Bar to an Avaricious Landlord" (Boston, 1851).

FOLSOM, Charles, scholar, b. in Exeter, N. H., 24 Dec., 1794; d. in Cambridge, Mass., 8 Nov., 1872. He was graduated at Harvard in 1813. During his college vacations he taught in Sudbury, Mass., and after graduation had charge of the academy at Hallowell, Me., for one year. He began the study of divinity in 1814, and became chaplain in the U. S. navy, and midshipman's teacher of mathematics on the ship "Washington," in 1816. He was chargé d'affaires in Tunis in 1817–'19. David G. Farragut was one of the youngest of Mr. Folsom's pupils on board the "Washington," and was given permission, at his own request, to leave the ship and remain with his teacher at Tunis. In after years Farragut was never weary of acknowledging his affectionate obligation to his friend and teacher. Mr. Folsom was tutor in Harvard from 1821 till 1823, and in 1825 was instructor in Italian. He was librarian of Harvard in 1823–'6, and of the Boston athenæum from 1845 till 1856. After 1826 he was a member of the firm of Folsom, Wells & Thurston, proprietors of the university press, and was engaged in the examination, correction, and partial editing of various classical works. Throughout his life he was accustomed to give much time to the version and criticism of the proofs of the works of various authors, among whom Quincy, Sparks, Norton, Palfrey, and Prescott have rendered special tribute to his ability. From 1841 till 1845, with his wife, he conducted a school for young ladies in Boston. Late in life he was engaged with others in the preparation of Worcester's Dictionary. He was the author of the inscriptions upon the monuments erected to three presidents of Harvard—Dunster, Willard, and Webber—and was frequently called upon for aid in similar labors, as also in the deciphering and interpretation of ancient inscriptions. At the close of the civil war Admiral Farragut gave Mr. Folsom a silver vase, handsomely engraved from sketches made by Farragut himself. Mr. Folsom was co-editor with William Cullen Bryant of the "U. S. Literary Gazette" in Boston and New York in 1824, and edited, with Andrews Norton, the "Select Journal of Foreign Periodical Literature" in 1833. He published "Cicero's Select Orations," with notes (Boston, 1811), and "Additional Selections from Livy," with notes (Cambridge, 1829).—His wife, **Susannah Sarah,** daughter of Prof. Joseph McKean, of Harvard, married Mr. Folsom in 1824, and has written both prose and poetry. During Mrs. Eliza Lee Follen's absence in Europe she edited volumes thirteen and fourteen of the "Child's Friend" (Boston, 1850), and wrote an "Ode for Ladies Fair" (1840). She also contributed to Miss A. W. Abbot's "Autumn Leaves" (Cambridge, 1853), and to Arthur Gilman's "The Cambridge of 1776" (Cambridge, 1876).—Their son, **Charles William,** engineer, b. in Cambridge, Mass., 17 April, 1826, was graduated at Harvard in 1845, and was engaged in the construction of railroads in New York, Virginia, and Ohio from 1848 till 1854, and in Nova Scotia from 1855 till 1856. He served in the National army during the civil war, was receiver of railroads in Virginia and Tennessee for the U. S. government in 1869, and superintendent of Mount Auburn cemetery, near Boston, from April, 1870, till April, 1873. He has been employed in the sewer department of Boston since 1876.—Another son, **Norton,** physician, b. in Boston, Mass., 15 April, 1842, studied in the Lawrence scientific school of Harvard, and was graduated at Harvard medical school in 1864. He was surgeon of the 45th colored troops in 1864–'5, and acting medical director of the 25th army corps, receiving the brevet of lieutenant-colonel. He was in Texas when mustered out of service, and became a surgeon in the Liberal Mexican army under Gen. Escobedo. He was resident physician at the Massachusetts general hospital in Boston in 1869–'76, and since that time has practised his profession in that city. Dr. Folsom has invented sanitary appliances, and published "Essay on the Senses of Smell and Taste," which gained the Boylston society prize (Boston, 1863), and "Plans and Suggestions for Johns Hopkins Hospital, Baltimore" (New York, 1875).

FOLSOM, George, antiquarian, b. in Kennebunk, Me., 23 May, 1802; d. in Rome, Italy, 27 March, 1869. He was graduated at Harvard in 1822, studied law in Saco, Me., and practised his profession in Framingham, and afterward in Worcester, Mass. In the latter town he was associated with the American antiquarian society, was its chairman, and edited the second volume of its series. He removed to New York in 1837, became an active member of the historical society of that city, and virtually quitted his profession for historical literature. In 1844 he was elected to the state senate, and in 1850 appointed by President Taylor chargé d'affaires at the Hague, where he remained until 1854. After travelling in Europe two years, he returned to the United States, and renewed his connection with various literary and charitable associations. He repeatedly returned to Europe, and collected a valuable library, but was deterred by ill health from active historical studies. He was president of the American ethnological society and of the citizen's savings bank, and published "Sketches of Saco and Biddeford" (Saco, Me., 1830); "Dutch Annals of New York" (New York, 1841); "Letters and Dispatches of Cortez," translated from the Spanish (1843); "Political Condition of Mexico" (Boston, 1842); and an "Address on

the Discovery of Maine," which was delivered before the New York historical society, 6 Sept., 1846.

FOLSOM, Joseph L., soldier, b. in Meredith, Belknap co. (then a part of Strafford county), N. H., 19 May, 1817; d. in San José, Cal., 19 July, 1855. He was graduated at the U. S. military academy in 1840, and assigned to the infantry, serving in the Florida war against the Seminoles until 1841, and then on the northern frontier until 1844. In that year he was appointed assistant instructor of infantry tactics at West Point. He was transferred to the quartermaster's department, with the rank of captain, in 1846, and served in California during the war with Mexico. From 1846 till 1848 he was also collector of customs for the port of San Francisco. He was one of the first to appreciate the discovery of gold in California, and to impart the news officially to the government. He was identified with the early history and development of San Francisco, where he was a large property owner, and one of the wealthiest citizens of California. Folsom City, on the American river, near the locality where gold was discovered, was named for him.

FOLSOM, Nathaniel, Revolutionary soldier, b. in Exeter, N. H., in 1726; d. there, 26 May, 1790. His earliest ancestors in America wrote the name Foulshame. In the French war of 1755 he commanded a company at Fort Edward, was distinguished at the defeat and capture of Baron Dieskau, and appointed general of militia, before the Revolution. He served during the siege of Boston, in 1775, until he was relieved by Sullivan in July, was a member of the Continental congresses of 1774–'5 and 1777–'8, was a councillor in 1778, and served as president of the Constitutional convention of New Hampshire in 1783.

FOLSOM, Nathaniel Smith, clergyman, b. in Portsmouth, N. H., 12 March, 1806. He was graduated at Dartmouth in 1828 and at Andover theological seminary in 1831, and ordained on 26 Sept. of that year. After acting as a missionary in Liberty county, Ga., in 1831–'2, he was pastor of a Presbyterian church in Cleveland, Ohio, in 1832–'3, professor in Lane theological seminary in 1833, and held the chair of biblical literature in Western Reserve college in 1833–'6. He held Congregational pastorates at Francestown, N. H., in 1836–'8, and Providence, R. I., in 1838–'40, was pastor of a Unitarian church at Haverhill, Mass., in 1840–'6, and edited the "Christian Register" in Charlestown, Mass., in 1846–'8. He was professor of biblical literature in Meadville, Pa., theological seminary in 1848–'61, and in 1862 was a teacher in Concord, Mass., also acting as pastor of a church there in 1867–'8. In 1875 he removed to Boston. Dr. Folsom has contributed to current literature, and has published "Critical and Historical Interpretation of the Prophecies of Daniel" (Boston, 1842).—His son, **Charles Follen,** physician, b. in Haverhill, Mass., 3 April, 1842, was graduated at Harvard in 1862. He taught among the freedmen in the south from 1862 till 1865, when he returned to Massachusetts, studied medicine, and, after his graduation at Harvard medical school in 1870, began general practice in Boston. In 1873–'5 he attended lectures in Vienna, Berlin, and Munich. He was lecturer on hygiene in Harvard in 1877–'85, and lecturer and assistant professor of mental diseases from 1879 till 1882. He has been secretary of the Massachusetts board of health, and of the state board of health, lunacy, and charity, and has been a member of the national board since 1882. Dr. Folsom is visiting physician to various hospitals and asylums, and is a member of the State medical society, and of numerous medical societies. His writings have been chiefly confined to health reports and articles on hygiene and mental diseases. Several of his lectures have been reprinted, one of them, on "Mental Diseases," for the use of students in the Harvard medical school. This was first published in Pepper's "American System of Medicine." He has written papers on "Limited Responsibility," "General Paralysis," and "Insanity in England and America"; "Letters from Europe," which appeared in the Boston "Medical and Surgical Journal," and has published in book form "The Present Aspect of the Sewage Question as Applied to Boston" (Boston, 1877).

FOLTZ, Clara Shortridge, lawyer, b. in Henry county, Ind., 16 July, 1849. She removed to Mount Pleasant, Iowa, with her father, Rev. Elias W. Shortridge, and was educated chiefly at Howe seminary in that town. She taught in 1863 in Mercer county, Ill., and in December, 1864, married. She went with her husband to Oregon in 1872, and soon afterward to San José, Cal., contributing to the "New Northwest" and the San José "Mercury." About 1876 she was thrown on her own resources, and, though having the care of four children, she determined to study law, aiding herself by lecturing. She went before the legislature of 1877–'8, secured the passage of an act permitting women to practise law, and was the first to take advantage of it, being admitted to the bar on 5 Sept., 1878, after passing creditably a strict examination. In 1880 she was clerk of the assembly judiciary committee, and in the same year removed to San Francisco, where she spoke for the Republicans during the canvasses of 1880, 1882, and 1884. In 1886 she became a Democrat, and in the winter of that year lectured in Wisconsin, Illinois, and Iowa. She has been successful at the bar, and is an effective public speaker.

FOLTZ, Jonathan Messersmith, surgeon, b. in Lancaster, Pa., 25 April, 1810; d. in Philadelphia, Pa., 12 April, 1877. He entered the U. S. navy as assistant surgeon, 4 April, 1831, and landed with the storming party at Qualah Battoo, Sumatra, being specially commended in Capt. Shubrick's official dispatch. He was made surgeon, 8 Dec., 1838, and was attached to the frigate "Raritan," of the Brazil squadron, in 1844–'7, and to the "Jamestown," of the same squadron, in 1851–'4. He was fleet-surgeon of the Western Gulf squadron in 1862–'3, and was with Farragut on the "Hartford" in all his battles during those years. He occupied the same place on the "Franklin" during Farragut's voyage to Europe in 1867–'8, and in 1870–'1 was president of the naval medical board. He became medical director on 3 March, 1871, and chief of the bureau of medicine and surgery, with the rank of commodore, on 25 Oct. of that year. He was placed on the retired list, 25 April, 1872. Dr. Foltz published "Endemic Influence of an Evil Government" (New York, 1843).

FOLWELL, William Watts, educator, b. in Romulus, Seneca co., N. Y., 14 Feb., 1833. He was graduated at Hobart in 1857, and in 1859 became adjunct professor of mathematics there. He spent the years 1860–'1 in the study of philology at Berlin and in travel, and during the civil war served in the 50th N. Y. engineers, reaching the rank of major. He then engaged in business, but in 1869 accepted the chair of mathematics in Kenyon college, Ohio, and in the same year was appointed to the presidency of the University of Minnesota, after resigning which he remained professor of political science and librarian. He has published "Public Instruction in Minnesota" (1875), and "Lectures on Political Economy."

FONERDEN, John, physician, b. in Baltimore, Md., in 1804; d. in New York city, 6 May, 1869. He was graduated in medicine at the University of Maryland in 1823, was city physician of Baltimore during the cholera epidemic of 1832, co-editor of the Baltimore "Colonization Journal" in 1835, professor of obstetrics in Washington university, Baltimore, in 1845–'6, and resident physician of the Maryland hospital for the insane from 1846 till his death. He was distinguished as a philanthropist, particularly in his treatment of the insane. He published a "Memoir of Dr. Samuel Baker" in the "Baltimore Athenæum" of 2 Jan., 1836, and a "Report" as physician of the hospital for the insane (1860).

FONSECA, Juan Rodríguez (fon-sa'-ka), Spanish archbishop, b. in Toro, near Seville, in 1451; d. in Burgos, 4 March, 1524. He was successively dean of the chapter of the cathedral of Seville, bishop of Badajoz, of Cordova, of Palencia, of Burgos, and archbishop of Rosanna. When Christopher Columbus applied for the second time for aid to enable him to undertake the discovery of the New World, Fonseca, then dean of Seville, was consulted by Isabella as to the feasibility of the enterprise. He denounced Columbus as a visionary, violently opposed the consideration of the proposition, and never forgave the discoverer for obtaining consent for his scheme. He solicited and obtained from the queen the control of the equipment of the expedition, and left no stone unturned to secure its failure. It is well known that Fonseca's efforts nearly succeeded, the crews mutinying more than once, and demanding a return to Spain. After the death of Isabella, Fonseca, having been made privy council to King Ferdinand, was enabled to vent his hatred on the family of Columbus. In consequence of his resentment he conceived a strong hatred of the Indians of the New World, and proposed to the council the most sanguinary measures against them. It being his duty to select the missionaries for the New World, he chose bigoted fanatics, and took pains to impress on them that the Indians were but slightly superior to animals. He also brought his malevolence to bear against Hernando Cortes, who finally appealed to Charles V., and obtained in 1520 the dissolution of the council of which Fonseca was president. He was, nevertheless, a member of the new council, where his animosity to the Indians, if less prominent, was quite as active as before. A characteristic saying of Fonseca's was, that "what the Indians needed was not a baptism with water, but one in their own blood." Fonseca's acquirements were remarkable for the time in which he lived, and he was considered during his life as a man of whose learning Spain might well be proud.

FONSECA, Mariano José Pereira da, Brazilian statesman, b. in Rio Janeiro, 18 May, 1773; d. there, 16 Sept., 1848. He was graduated at the royal college of Mafra, Portugal, in 1793, and in 1794 matriculated at the recently founded scientific academy of Brazil. On 4 Dec. of the following year the viceroy caused the arrest and indictment of the principal members of that school for suspected conspiracy, and Fonseca remained in strict confinement in the island of Das Cobras until released by a royal order in July, 1797. He then went into business until 1802, when he was elected member of the council of agriculture and commerce, and censor of the press. He was elected to the provisional junta in 1821, was appointed minister of the treasury on 13 Nov., 1823, and the same year became a member of the council of state, and was one of the authors of the imperial constitution of 25 March, 1824. He was one of the first founders of the national bank, raised the credit of the country abroad, organized the custom-houses, and co-operated in the rearrangement of the mail service and in the improvement of commerce and agriculture. He left the cabinet on 23 Nov., 1825, and on 22 Jan., 1826, was elected to the senate, where he distinguished himself more as a profound thinker than as an orator. He was created a viscount, and afterward became marquis of Marica. His philosophical works include "Las Maximas" and "Pensamentos."

FONSECA LIMA É SILVA, Manoel da, Brazilian soldier, b. in Rio de Janeiro, 10 July, 1793; d. there in 1862. At a very early age he entered the army, became captain, and took part in the campaign against the revolution of Pernambuco in 1817. In 1823 he organized in Bahia the emperor's battalion, with which he made the campaign of independence. For his services he was made lord-chamberlain of the emperor, and promoted lieutenant-colonel. In 1825 he went with his battalion to Montevideo and the Argentine Republic, where he remained in active service until 1828, when he was promoted brigadier. Soon afterward he took part in the pronunciamento of Campo de Sant Anna, and, after the abdication of Dom Pedro I., adhered to the government and the Liberal party. He was minister of war in 1831 and 1835, and also minister *pro tempore* of the navy, until November of the following year, when he was appointed minister of interior, but resigned in 1837. He organized in 1848 the national guard of the capital, and in 1851 was appointed commander-in-chief, and promoted general. In 1854 the titles of baron of Suruhy and grandee of the empire were bestowed upon him.

FONVIELLE, Louis Eugène, knight of, French filibuster, b. in Thouars in 1655; d. in Rio de Janeiro, 18 March, 1711. He went to seek fortune with his relative, De Pointis, governor of St. Christophe, in 1674, was given command of a privateer, and soon acquired such a reputation that Pointis, jealous of his popularity, sent him away. He joined the buccaneers in 1677, was elected a chief, equipped a vessel, and made a successful cruise in the West Indies against the Spaniards. On his return to Santo Domingo in 1678 he found the colony in full revolt against the new governor, and used his great popularity with the buccaneers to restore peace. Fonvielle was appointed lieutenant of the royal navy in 1779, but in 1781 resumed his privateering expeditions, and became supreme chief of the buccaneers. Through him the French governor, Ducasse, could always obtain the assistance of the filibusters. When De Pointis's expedition against Cartagena was resolved upon in 1697, Ducasse received orders to join it, and Fonvielle sailed with him, with a strong force of buccaneers. After the capitulation of the city, Fonvielle was left by Ducasse to garrison the outer fort and keep the buccaneers away; but, when De Pointis tried to defraud them of their part of the booty, they defied his authority, and plundered the city. When Philip V. became king of Spain, Fonvielle served his cause as faithfully as he had fought the Spanish before, and with a force of small ships assisted Ducasse in 1702 to defeat Admiral Benbow, and carry a convoy with the new viceroy into Cartagena. In 1710 Fonvielle, with 250 filibusters, joined the expedition of Duclerc against Rio Janeiro, and on 19 Sept. entered the city with the French troops; but in the principal square they were surprised by a cross-fire from fortified buildings, and retired to the custom-

house, where they were surrounded by superior forces, and capitulated on the following day. But the terms of the surrender were violated, and Duclerc and Fonvielle were assassinated.

FOOT, Joseph Ives, clergyman, b. in Watertown, Conn., 17 Nov., 1796; d. near Knoxville, Tenn., 21 April, 1840. He removed with his parents in 1810 to West Granville, Mass., and was educated at Phillips Andover academy and at Union college, where he was graduated in 1821. He then studied theology at Andover, was ordained on 30 Sept., 1824, and labored as a home missionary in South Carolina and New Hampshire in 1824–'6. He was pastor of Congregational churches in West Brookfield, Mass., in 1826–'32, Salina, N. Y., in 1833–'5, and in Cortland, N. Y., in 1835–'7. He then removed to Westport, Conn., where he united with the Presbyterian church, and in 1839 became pastor at Knoxville, Tenn. In July of that year he was chosen president of Washington college, Tenn., but did not decide to accept the office till the following year. He was on his way to the college when he was thrown from his carriage, and died on the following day. The college had given him the degree of D. D. Dr. Foot published various sermons, including three on "Perfectionism" (1834), and an historical discourse on the town of Brookfield (1828), and contributed to the "Literary and Theological Review," and other periodicals. A selection from his manuscript sermons, with a memoir by his brother, the Rev. George Foot, was published after his death (Philadelphia, 1841).

FOOT, Samuel Alfred, jurist, b. in Watertown, N. Y., 17 Dec., 1790; d. in Geneva, N. Y., 11 May, 1878. He was graduated at Union in 1811, studied law in Milton, N. Y., and with his brother, Ebenezer Foot, of Albany, and was admitted to the bar in 1813. He was district attorney for Albany county in 1819–'21, removed to New York city in 1825, and in 1844 to Geneva, N. Y. He was judge of the court of appeals in 1851, and in 1856–'7 served two terms in the legislature, where he introduced resolutions condemning the Dred Scott decision. Judge Foot became a member of the African colonization society in 1851, and was president of the American Bible society in 1843–'7. He warmly espoused the National cause in 1861, and had five sons in the army, three of whom lost their lives. At the time of his death he was probably the oldest practising lawyer in the state. He received the degree of LL. D. from Hobart in 1834, and from Union in 1853. His autobiography was printed privately (2 vols., New York, 1873).

FOOT, Solomon, senator, b. in Cornwall, Addison co., Vt., 19 Nov., 1802; d. in Washington, D. C., 28 March, 1866. He was graduated at Middlebury in 1826, was principal of Castleton, Vt., seminary in 1826–'8, tutor in Vermont university in 1827, and in 1828–'31 held the chair of natural philosophy in the Vermont academy of medicine, Castleton. He was admitted to the bar in the latter year, and began practice in Rutland, where he lived until his death. He was a member of the legislature in 1833, 1836–'8, and 1847, speaker of the house in 1837–'8 and 1847, delegate to the State constitutional convention in 1836, and state attorney for Rutland in 1836–'42. He was then elected to congress as a Whig, and served from 1843 till 1847. He was an unsuccessful candidate for clerk of the house in 1849, was then chosen U. S. senator from Vermont, and served from 1851 till his death, becoming a Republican in 1854. He was chairman of important committees, and was president *pro tempore* of the senate during a part of the 36th congress and the whole of the 37th. Senator Foot was prominent in debate, and took an active part in the discussions on the admission of Kansas to the Union in 1858. He was chosen president of the Brunswick and Florida railroad company about 1854, and visited England to negotiate the bonds of the company.

FOOTE, Arthur William, musician, b. in Salem, Mass., 5 March, 1853. He studied composition with Stephen A. Emery, and later with Prof. John K. Paine at Harvard, where he was graduated in 1874, and in 1875 took the degree of A. M. for a special course in music. He then settled in Boston, and studied the organ and piano-forte under B. J. Lang. His published works include about twenty compositions for the piano-forte, songs, vocal quartettes, three pieces for violoncello and piano-forte, three pieces for violin and piano-forte, a string quartette, a trio for piano-forte, violin and violoncello, which was played at the meeting of the Music-teachers' national association, 1 July, 1886, and at one of the London Monday popular concerts in February, 1887, and a scene from "Hiawatha" for male chorus, solo, and orchestra, produced by the Apollo club, Boston, in May, 1886. Among his unpublished works are a suite for string orchestra, played in one of the Boston symphony concerts in May, 1886, and in one of the London symphony concerts in January, 1887, and an overture for orchestra, "In the Mountains." He has also translated Jean Paul Richter's "Fugue" (Boston, 1875).

FOOTE, Elial Todd, physician, b. in Gill, Mass., 1 May, 1796; d. in New Haven, Conn., 17 Nov., 1877. He went with his parents in 1798 to Sherburne, N. Y., where he was educated, studied medicine there and in New York city, and began practice in Jamestown, N. Y., in 1815, being the first physician there. He was a member of the legislature in 1820 and in 1826–'7, associate judge of common pleas in 1818–'23, and in the latter year became first judge of Chautauqua county, holding the office till 1843, when he retired. He owned the land on which a large part of the present city of Jamestown is built, and was active in public improvements there. Three churches of the town are built on land given by him for the purpose. Dr. Foote was known as the "father of Chautauqua county." He was also active in the temperance and anti-slavery movements. He removed in 1845 to New Haven, Conn., and resumed the practice of medicine. He was a founder of the New Haven colony historical society, and a member of many other societies. He collected much material relating to the early history of Chautauqua county, which formed the basis of the history of that county by A. W. Young (Buffalo, 1875).

FOOTE, Elisha, commissioner of patents, b. in Lee, Mass., 1 Aug., 1809; d. in St. Louis, Mo., 22 Oct., 1883. He was educated at the Albany institute, and studied law with Judge Daniel Cady in Johnstown, N. Y., meanwhile supporting himself by teaching and surveying. After being admitted to the bar, he settled in western New York, and was district attorney and then judge of the court of common pleas of Seneca county. His specialty was patent law, and he made several valuable inventions. In 1864 he was appointed to the board of appeals at the U. S. patent office, where from July, 1868, until April, 1869, he was commissioner.

FOOTE, George Anderson, physician, b. in Warren county, N. C., 16 Dec., 1835. He was graduated at Jefferson medical college, Philadelphia, in 1856, and was a surgeon in the Confederate army during the civil war. He was publicly thanked by

the general commanding the troops at Plymouth, N. C., for his gallantry. He was on the ram "Albemarle" when she was blown up by Lieut. Cushing, and assisted in capturing Cushing's party. He has been president of the North Carolina medical society, and has contributed to periodical literature under the pen-name of "Civis." His publications include a pamphlet on "Higher Education," and an article on "Hypodermic Medication."

FOOTE, Henry Stuart, senator, b. in Fauquier county, Va., 20 Sept., 1800; d. in Nashville, Tenn., 20 May, 1880. He was graduated at Washington college, Lexington, Va., in 1819, admitted to the bar in 1822, and in 1824 went to Tuscumbia, Ala., where he edited a Democratic newspaper. He removed to Jackson, Miss., in 1826, and acquired an extensive practice, but was also active in politics, and in 1844 was a presidential elector. He was chosen to the U. S. senate as a Unionist in 1847, took part in favor of the compromise measures of 1850, and served as chairman of the committee on foreign relations. He resigned his seat in the senate in the autumn of 1852 to canvass his state as a Union candidate for the governorship, his opponent being Jefferson Davis, who had been persuaded to take the place of Gen. John A. Quitman on the secession ticket, when it became evident that the latter must be defeated. Foote was elected and served one term, till 1854, when he removed to California, but returned to Mississippi in 1858, and practised law at Vicksburg. He strongly opposed secession in the southern convention at Knoxville in May, 1859, and when the question was seriously agitated in Mississippi he removed to Tennessee. But he subsequently was elected to the Confederate congress, where he was noticeable for his hostility to Jefferson Davis, and finally for his opposition to the continuance of the war. He was in favor of accepting the terms offered by President Lincoln in 1863 and 1864. After the war he resided for a time in Washington, D. C., and supported the administration of Gen. Grant, who made him superintendent of the U. S. mint at New Orleans. He held this office till shortly before his death, when failing health compelled him to return to his home near Nashville. Gov. Foote was an able criminal lawyer, an astute politician, and a popular orator. He had a violent temper, and during his political career fought several duels, two of which were with Sargent S. Prentiss, one with John A. Winston, and one with John F. H. Claiborne. He also had a personal encounter with Thomas H. Benton on the floor of the U. S. senate. He published "Texas and the Texans" (2 vols., Philadelphia, 1841); "The War of the Rebellion, or Scylla and Charybdis" (New York, 1866); "Bench and Bar of the South and Southwest" (St. Louis, 1876); and "Personal Reminiscences."

H. S. Foote

FOOTE, Henry Wilder, clergyman, b. in Salem, Mass., 2 June, 1838. He was graduated at Harvard in 1858 and at the divinity-school in 1861, and entered the Unitarian ministry, becoming in that same year pastor of King's chapel, Boston, where he still remains (1887). He has been president of the Boston benevolent fraternity of churches, and, besides occasional sermons and pamphlets, has published "Annals of King's Chapel" (2 vols., Boston, 1882–'7).

FOOTE, Samuel Augustus, senator, b. in Cheshire, Conn., 8 Nov., 1780; d. there, 15 Sept., 1846. He was graduated at Yale in 1797, and became a merchant in New Haven. He served in the legislature for many years, and was speaker of the house in 1825–'6. He was elected to congress as a Whig, and served in 1819–'21, and again in 1823–'5. In 1827–'33 he served one term in the U. S. senate, but was defeated as a candidate for re-election by Nathan Smith. He was in congress again in 1833–'4, but resigned on being elected governor of Connecticut, which office he filled for one term. He was a presidential elector on the Clay and Frelinghuysen ticket in 1844. It was he who in 1830 offered the resolutions "on the public lands" that occasioned the great debate between Hayne and Webster.—His son, **Andrew Hull,** naval officer, b. in New Haven, Conn., 12 Sept., 1806; d. in New York city, 26 June, 1863, was entered as midshipman, 4 Dec., 1822, on the elder Com. David Porter's squadron that was sent out in 1823 to break up the piratical nests among the West India islands. He was promoted lieutenant in 1830, and in 1849 was appointed captain of the brig "Perry," in which he cruised off the African coast for two years, doing effective service in the suppression of the slave-trade. He was put in command of the sloop-of-war "Plymouth" in 1856, and arrived at Canton, China, on the eve of the hostilities between the Chinese and English. He exerted himself to protect American property, and was fired on by the Barrier forts while thus engaged. He obtained permission from Com. Armstrong to demand an apology, and when it was refused he attacked the forts, four in number, with the "Portsmouth" and the "Levant," breached the largest, and carried them by storm. His loss was 40, while that of the enemy was 400. At the beginning of the civil war he was chosen by the government to command the western flotilla. The equipment and organization of this flotilla taxed the energies of Flag-officer Foote to the utmost, and he always spoke of it as his greatest work. In the beginning of February, 1862, in connection with the land forces under Grant, he moved upon Fort Henry on the Tennessee, and upon the 6th, after a hotly contested engagement before the army came up, he carried the fort with his gunboats. His bravery and conduct were conspicuous; and this proved to be his most important achievement in the war. The same impetuosity marked the succeeding action on the 14th, in the combined assault upon Fort Donelson, where for an hour and a half

A. H. Foote

he engaged the fort and contributed greatly to the demoralization of its garrison, but several of the boats having been disabled, the fleet was compelled to withdraw, and Foote himself was wounded. He then aided Pope on the Mississippi, and, after a series of ineffectual attempts, Island No. 10 was surrendered to him on 7 April. His wound became so serious that he was obliged to give up his western command. On 16 June, 1862, he received a vote of thanks from congress, and was made a rear-admiral, and on 22 June he was appointed chief of the bureau of equipment and recruiting. On 4 June, 1863, he was chosen to succeed Rear-Admiral Dupont in command of the fleet off Charleston, and while on his way to assume this command he died in New York. He was a man of a high type of Christian character, with most genial and lovable traits, but uncompromisingly firm in his principles, especially in regard to temperance reform in the navy, where he was the means of abolishing the spirit-ration. Admiral Smith said of him: "Rear-Admiral Foote's character is well known in the navy. One of the strongest traits was great persistence in anything he undertook. He was a man who could neither be shaken off nor choked off from what he attempted to carry out. He was truly a pious man, severely an honest man, and a philanthropist of the first order. He was one of our foremost navy officers—none before him." The work he did for his country was mainly in being the first to break the Confederate line of defence, and in an hour of great depression, by a well-timed and brilliant—even if minor—action, to raise the hope and prestige of success. In a word, he was a courageous and successful officer, thoroughly devoted to his profession, and uniting the best characteristics of the old and new schools of the U. S. navy. During a period of four years after 1852, when he remained at home, he wrote "Africa and the American Flag" (1854). His biography has been written by Prof. James M. Hoppin (New York, 1874).

FOOTE, Thomas Moses, journalist, b. in Clinton, N. Y., in 1809; d. in Buffalo, N. Y., 20 Feb., 1858. His father, Moses Foote, a captain in the Revolutionary army, was one of the founders of Clinton in 1787. Thomas was graduated at Hamilton college in 1825, and received his medical diploma from the College of physicians and surgeons, Fairfield, N. Y., but devoted himself to journalism, becoming an editor of the Buffalo "Commercial" in 1836, and soon afterward a proprietor, retaining his connection with it until his death. He was chargé d'affaires at New Granada in 1849–'50, and in 1852 held the same office in Vienna, editing in the interval the Albany "State Register." Mr. Foote's editorial writings were distinguished for wit and grace of diction. He was a man of extensive reading and an entertaining talker.

FOOTE, William Henry, clergyman, b. in Colchester, Conn., 20 Dec., 1794; d. at Romney, W. Va., 18 Nov., 1869. He was graduated at Yale in 1816, taught school for a short time in Winchester, Va., in 1818, and in the same year entered the theological seminary at Princeton, but was compelled to leave by impaired health. He was then licensed to preach, and engaged in missionary labor among the backwoodsmen of the northern neck of Virginia. In 1824 he was ordained pastor of the Presbyterian church at Romney, W. Va., and established at the same time a school for both sexes, which became a large and prosperous institution. In 1838 he was appointed agent of the central board of foreign missions of the Presbyterian church, and during this work, which led him to visit many counties in the state, he collected the materials for his sketches of Virginia. In 1845 he returned to Romney as pastor and superintendent of the academy, and there continued till 1861, when he became agent for Hampden-Sidney college. Although he was a Union man throughout the civil war, he shared the fate of his adopted state, and during the siege of Petersburg was chaplain to a Confederate regiment. At the close of the war he returned to Romney, where he remained till his death. Hampden-Sidney gave him the degree of D. D. in 1847. His published works are "Sketches, Historical and Biographical, of the Presbyterian Church in Virginia" (2 vols., Philadelphia, 1850–'5), and "Sketches in North Carolina" (New York, 1846).

FORAKER, Joseph Benson, governor of Ohio, b. near Rainsborough, Highland co., Ohio, 5 July, 1846. He worked on a farm in his boyhood, and when sixteen years of age enlisted in the 89th Ohio regiment, and served in the army of the Cumberland until the close of the war. He was made sergeant on 26 Aug., 1862, 1st lieutenant, 14 March, 1864, and on 19 March, 1865, was brevetted captain "for efficient services during the campaigns in North Carolina and Georgia." When his regiment was mustered out he was aide-de-camp on Gen. Henry W. Slocum's staff. After the war he spent two years at Wesleyan university, Delaware, Ohio, and then entered Cornell, where he was graduated with the first class in 1869. He was admitted to the bar in the same year, and in 1879–'82 was judge of the Cincinnati superior court, resigning the office on account of his health. He was the unsuccessful Republican candidate for the governorship of Ohio in 1883, but was again a candidate for the office in 1885, when he was elected.

J. B. Foraker

FORAN, Joseph K., Canadian lawyer, b. in Greenpark Aylmer, province of Quebec, in 1857. He was sent in 1867 to St. Joseph's college, Ottawa, where he studied ten years. After graduation, he went in 1877 to Laval university, Quebec, and studied law. In 1881 he was called to the Lower Canadian bar. While in Laval he wrote numerous poems, which were published in British and Canadian periodicals. Among his principal poems afterward were a "Lament for Longfellow" and "Indian Translations." Between 1879 and 1883 he published a series of essays on monuments, coins, art, and many other subjects. From 1883 till 1885 he lived among the Canadian Indians, perfecting himself in a knowledge of their dialects and customs. Since his return he has delivered many lectures. He has published "An Essay upon Obligations" (Toronto, 1886); "Irish-Canadian Representatives, their Past Acts, Present Stand, and Future Prospects"; and "The Spirit of the Age"; and has ready for publication (1887) two novels based on his experiences among the Indians, entitled "Tom Ellis, a Story of the North-West Rebellion," and "Simon, the Abenakis."

FORBES, Charles Edwin, philanthropist, b. in West Bridgewater, Mass., 25 Aug., 1795; d. in Northampton, Mass., 13 Feb., 1881. He was gradu-

ated at Brown in 1815, studied law in Enfield and Northampton, Mass., and was admitted to the bar in 1818. He was county attorney and also a member of the legislature in 1826, judge of the court of common pleas in 1847, and of the state supreme court in 1848. He left an estate of $300,000, most of which he bequeathed to establish a free public library in Northampton. This library was incorporated by act of the Massachusetts legislature on 3 May, 1881.

FORBES, Edwin, artist, b. in New York city in 1839. At eighteen years of age he began the study of art, and devoted himself to animal painting. In 1859 he became a pupil of A. F. Tait. At the beginning of the civil war he joined the Army of the Potomac, and remained in the south as special artist for Frank Leslie, the publisher, till 1864. His sketches of his experiences during this period were preserved in a series of copper-plate etchings, which were exhibited at the Centennial exposition of 1876, and awarded a medal. Gen. W. T. Sherman bought the first proofs for the United States government, and they are now in the War Department at Washington. "The Reliable Contraband," "Coming through the Lines," and the "Sanctuary," are the most effective of these sketches. Others are, "A Night March," "Returning from Picket Duty," and "The Reveille." His "Lull in the Fight," a scene in the battle of the Wilderness, was exhibited at the National academy, New York and at the Boston athenæum (1865). In 1877 he was elected an honorary member of the London etching club. His studio is in Brooklyn, and since 1878 he has devoted himself to landscape and cattle pictures. His later works are: "Early Morning in an Orange County Pasture" (1879); "On the Skirmish Line"; "Stormy March"; "Roughing"; "On the Meadows" (1880); and "Evening in the Sheep Pasture" (1881).

FORBES, Eli, clergyman, b. in Westborough, Mass., in October, 1726; d. in Gloucester, Mass., 15 Dec., 1804. He served against the French and Indians in 1745, and on his return from the war entered Harvard, where he was graduated in 1751. He then studied theology, and was ordained, 3 June, 1752, as the first minister of the second parish in Brookfield, Mass. In 1758–'9 he twice acted as chaplain of a provincial regiment, and in 1762 conducted a successful mission to the Oneida Indians, among whom he established a church and two schools. In March, 1776, Mr. Forbes, having been charged by some of his congregation with being a Tory, asked and obtained an honorable dismissal, and on 5 June of that year became pastor at Gloucester, Mass., where he remained until his death, also officiating frequently in vacant parishes near by. Harvard gave him the degree of D. D. in 1804. Dr. Forbes published various sermons, including one on the "Character of Washington" (1800), a memoir of Joshua Eaton, prefixed to seven of the latter's sermons, and a "Family Book," containing discourses, doctrinal, evangelical, practical, and historical (1801).

FORBES, Gordon, British soldier, b. in 1738; d. in Ham, Middlesex, England, 17 Jan., 1828. He became an ensign in the 33d foot in 1756, captain in the 72d in 1762, and served at Havana and in Louisiana. He was made major on 9 Nov., 1776, was twice wounded in Burgoyne's expedition, and became lieutenant-colonel in September, 1781. He then served in the East Indies, was made colonel in 1785, major-general in 1794, and commanded the forces at Santo Domingo in 1798–1800. He was promoted to lieutenant-general in 1801, and received a general's commission in 1812.

FORBES, James Fraser, Canadian physician, b. in Gibraltar in 1820. He was the son of an officer in the 64th regiment, who, after retiring from the service, was collector of customs at Yarmouth, Nova Scotia. Mr. Forbes has been coroner and health officer for Liverpool and Queens county, N. S., for over twenty-six years, and was elected president of the bank of Liverpool in 1874. He was first returned to the Dominion parliament in 1867, was re-elected in 1872, and again in 1874, and was defeated in 1878, but was re-elected in 1882.

FORBES, John, British soldier, b. in Petincrief, Fifeshire, Scotland, in 1710; d. in Philadelphia, Pa., 11 March, 1759. He became a physician, but abandoned his profession to enter the army, and was made lieutenant-colonel of the Scotch greys in 1745. In the German war he was on the staff of Lord Stair, Gen. Ligonier, and Gen. Campbell, was made colonel of the 17th foot, 25 Feb., 1757, and acted as quartermaster-general under the Duke of Cumberland. He was appointed brigadier-general in America, 28 Dec., 1757, and was adjutant-general in the expedition against Louisburg. In the autumn of 1758 he was placed in command of the expedition against Fort Duquesne, numbering 1,200 highlanders, 350 royal Americans, and about 5,000 provincials, including about 2,000 Virginians under the command of Washington. When Forbes arrived at Raystown, Pa., with his army, in September, 1758, he was carried in a litter, as he was already prostrated by the illness that shortly afterward caused his death, but his head was clear and his will firm, and he retained command of the expedition. After Bouquet's disastrous reconnoissance (see Bouquet, Henry) the army reached Loyalhanna on 5 Nov., and it was decided to pass the winter there, when news of the weakness of the fort induced Forbes to push forward. Passing the field where the bones of Braddock's men lay unburied, the expedition finally reached Fort Duquesne on 25 Nov. The work had been blown up and abandoned by the French on the previous day, and Washington's men marched in and took possession. Forbes renamed the place Fort Pitt (now Pittsburg), in honor of William Pitt, who had planned the campaign, and, after concluding treaties with the Indian tribes on the Ohio, returned to Philadelphia, where he died shortly afterward. He was noted in the army for his obstinacy, and was nicknamed "The Head of Iron."

FORBES, John, librarian, b. in Scotland in 1771; d. in New York, 4 Oct., 1824. He was graduated at Columbia in 1794, and from that year till his death was librarian of the New York society library, being prominent during that time among literary men in New York city.—His son, **Philip Jones,** b. in New York city, 13 Jan., 1807; d. in Brooklyn, L. I., in June, 1877, entered the U. S. military academy in 1823, but was not graduated. From 1828 till 1855 he was librarian of the New York society library.—Philip Jones's son, John, b. in New York city, 24 April, 1846, is now (1887) assistant librarian in the same institution.

FORBES, John Colin, Canadian artist, b. in Canada, 23 Jan., 1846. He was entirely self-taught in art, until the production of his first work, a portrait of his father, after which he spent two years in study at the Royal academy in London and elsewhere in Europe. After his return to Canada he painted "The Foundering of the Hibernia," which was exhibited at the Centennial exhibition in Philadelphia in 1876; "The Cañon in the Royal Gorge"; "The Mount of the Holy Cross"; "Mount Stephen"; "The Glacier of the

Selkirk"; "Beware"; "Sweet Sixteen"; and "The Lily." He has also painted portraits of Lord Dufferin, Sir John A. Macdonald, Alexander McKenzie, Edward Blake, Sir Hector Langevin, Sir Charles Tupper, Sir David L. McPherson, and Lady Helen Blackwood, daughter of Lord Dufferin. He is a member of the Royal Canadian academy of arts, and resides at Toronto.

FORBES, Samuel Franklin, surgeon, b. in Canton, Hartford co., Conn., 8 June, 1829. He was graduated in medicine at the University of the city of New York in 1850, and in 1852 settled in Toledo, Ohio, where in 1853–'8 he was U. S. marine surgeon. He was county physician in 1855–'61, surgeon of the 67th Ohio regiment in 1861–'3, and city physician in 1867–'9. In 1886 he was mayor of Toledo. Dr. Forbes is the author of a "New Amputation through the Foot," which was described in a paper read by him before the State medical society in 1875, and is now taught in nearly all the medical colleges of the United States.

FORBES, Stephen Alfred, naturalist, b. in Silver Creek, Ill., 29 May, 1844. He was educated at Beloit academy and Rush medical college, and received the degree of Ph. D. from the Indiana state university. During the civil war he held the appointment of captain in the Illinois volunteer cavalry. In 1877 he founded the Illinois state laboratory of natural history, and became its director, which office he has since held. Dr. Forbes also instituted the natural history survey of Illinois, of which he has charge, and he is likewise professor of zoölogy and entomology in the university of Illinois. In 1882 he became state entomologist, and is the author of the "Annual Reports of the State Entomologist on the Noxious and Beneficial Insects of the State of Illinois" (Springfield, 1882–'5). Beside many zoölogical and educational papers contributed to various journals, he has published "Studies of the Food of Birds, Fishes, and Insects" (Peoria, 1883); "Studies of the Contagious Diseases of Insects" (1886); and has edited the "Bulletin of the Illinois State Laboratory of Natural History" (vols. i. and ii.), and "Report on the Natural History Survey of Illinois" (vol. i., Ornithology, Springfield, 1887).

FORCE, Peter, historian, b. near Little Falls, Essex co., N. J., 26 Nov., 1790; d. in Washington, D. C., 23 Jan., 1868. His father, William Force, was a veteran of the Revolution, and in talking with him the boy acquired a fondness for the history of that period. He removed with his parents to New Paltz, Ulster co., N. Y., and afterward to New York city, where, on leaving school at the age of sixteen, he was apprenticed to a printer. While foreman of an office in Bloomingdale, he printed the second edition of Irving's "Knickerbocker's History of New York," and in 1812 was president of the New York typographical society. He removed to Washington in November, 1815, under an arrangement with his employer, W. A. Davis, who had obtained a contract for the government printing, and in 1820–'8 compiled and printed the "Biennial Register," which had been begun under an act of congress in 1816. The name of "Blue Book," suggested by Mr. Force, was officially recognized in 1820 [and the title has since been adopted by the English government for a different kind of publication]. He also published an annual "National Calendar" in 1820–'36, and in 1823 established the "National Journal," which he edited and published till 1830, supporting the administration of John Quincy Adams. Many years before this he had begun to collect books and papers on American history and antiquities, and in 1833 he was authorized by act of congress to compile a vast work, to be known as the "American Archives, a Documentary History of the English Colonies in North America." The plan embraced six series of six or more volumes each, covering the period from the discovery of America to the final ratification of the constitution of the United States. Mr. Force at once began a personal examination of the public archives in the thirteen original states, and by means of his agents ransacked the country for pamphlets, rare books, letters, newspaper files, and maps bearing on the history of the colonies. These he gathered in seven rooms adjoining his residence in Washington. One who knew him says of this library: "Excepting when visited by the friends of its proprietor, members of congress addicted to historical pursuits, or literary pilgrims from abroad, its silence was only broken by the presence of an assortment of dogs and cats, which enjoyed the full range of the establishment, and whose characters seemed to have been influenced by the solemn wisdom of the tomes among whom they lived." Between 1837 and 1853, in conjunction with Matthew St. Clair Clarke, he had issued the whole of the fourth series of his work and part of the fifth, comprising nine folio volumes, and covering the years from 1765 to 1776; but in 1853, owing to a misunderstanding about the law authorizing the publication, it was discontinued by Sec. Marcy. Mr. Force, though cruelly disappointed, continued to increase his collection of material, even mortgaging his real estate for means to do so, and in 1867 it was bought by the government for $100,000 and placed in the library of congress. It contains 22,000 books and 40,000 pamphlets, most of them rare, and is considered by some the most valuable collection of its kind in existence. Mr. Force held various civil and military offices in Washington, rising to the rank of major-general of militia, and being mayor of the city in 1836–'40. In the latter year he was the first president of the "National institute for the promotion of science." Beside the volumes that constitute his life-work, he published "Tracts and other Papers relating principally to the Origin, Settlement, and Progress of the Colonies in North America" (4 vols., Washington, 1836–'46); "Grinnell Land: Remarks on the English Maps of Arctic Discoveries in 1850–'1" (1852); "Notes on Lord Mahon's History of the American Declaration of Independence" (London, 1855); and a paper in the Smithsonian contributions to knowledge, entitled "Record of Auroral Phenomena" (Washington, 1856).—His son, **William Quereau,** scholar, b. in Washington, D. C., 7 March, 1820; d. there, 15 Dec., 1880, was graduated at Columbian college in 1839. From January, 1843, till July, 1845, he edited and published the "Army and Navy Chronicle and Scientific Repository." From 1857 till 1868 he had charge of the department of meteorology in the Smithsonian institution. Mr. Force was a trustee of Columbian college in 1851–'62, and was for several years its secretary and treasurer. He published "Builders' Guide" (Washington, 1842) and "The Picture of Washington" (1848), and in 1845–'57 aided his father in preparing the "American Archives."—Another son, **Manning Ferguson,** soldier, b. in Washington, D. C., 17 Dec., 1824, was graduated at Harvard in 1845, and at the law-school in 1848. He was appointed major of the 20th Ohio regiment in 1861, promoted to lieutenant-colonel, and engaged at Fort Donelson and Shiloh. He was then made colonel, was with Gen. Grant in his campaign in southwestern Tennessee and his expedition into northern Mississippi

in 1862–'3, took part in the siege of Vicksburg, and on 11 Aug., 1863, was made brigadier-general of volunteers. He was with Sherman in his Atlanta campaign and his march to the sea, was brevetted major-general of volunteers, 13 March, 1865, and commanded a district in Mississippi till he was mustered out of service, 11 Jan., 1866. He was judge of the court of common pleas of Hamilton county, Ohio, in 1867–'77, and judge of the superior court of Cincinnati from that year till 1887. He has published "From Fort Henry to Corinth," being vol. ii. of "Campaigns of the Civil War" (New York, 1881), and several pamphlets, mostly historical, including "Prehistoric Man," "Darwinism and Deity," "The Mound-Builders" (Cincinnati, 1873); "Some Early Notices of Ohio Indians"; "To What Race did the Mound-Builders belong?" (1879); "Marching across Carolina" (1883); "Personal Recollections of the Vicksburg Campaign" (1885); "Letters of Amerigo Vespucci," an address delivered before the Ohio historical and philosophical society (1885); and "Sketch of the Life of Justice John McLean" (Cambridge, 1885). He has edited Walker's "Introduction to American Law" (Boston, 1878), and Harris's "Principles of Criminal Law" (Cincinnati, 1880).

FORD, Corydon La, physician, b. in Lexington, Greene co., N. Y., 29 Aug., 1813. He removed with his parents to Otsego county in 1815, and, after attending Canandaigua academy and studying with several physicians, entered Geneva medical college, where he was graduated in 1842. He was demonstrator of anatomy there in 1842–'8, and in Buffalo medical college in 1847–'51, professor of anatomy in Castleton, Vt., medical college in 1849–'61, and of anatomy and physiology in Berkshire medical institution, Pittsfield, Mass., in 1860–'7. He held the same chair in the Bowdoin college medical school in 1864–'70, and in 1854 accepted the chair of anatomy in the University of Michigan, to which that of physiology was added in 1860. In 1868–'86 he also lectured annually in Long Island college hospital, Brooklyn, N. Y., and in the latter year became professor emeritus in that institution. Michigan university gave him the degree of LL. D. in 1881. Dr. Ford is considered one of the ablest teachers of anatomy in the country, and is the author of "Questions on Anatomy, Histology, and Physiology, for the use of Students" (last ed., Ann Arbor, 1878); "Syllabus of Lectures on Odontology, Human and Comparative" (1884); and "Questions on the Structure and Development of the Human Teeth" (1885).

FORD, Edward Lloyd, publisher, b. in Oswestry, Shropshire, England, 10 March, 1845; d. in Morristown, N. J., 16 Dec., 1880. He came to New York in early youth, and studied for a few years under Prof. J. H. Patton. He enlisted in the 99th regiment of Pennsylvania volunteers in 1861, and within a year was promoted to a lieutenancy, and detailed on Gen. Meade's staff. He was taken prisoner at Chancellorsville, 2 May, 1863, and sent to Libby prison, Richmond, but was exchanged early in the September following, and returned to his post of duty. In 1863 he was discharged from the volunteer service, promoted to a captaincy on the staff of Gen. Birney, and served in the 10th army corps. Broken health forced him to leave the army in December, 1864. In 1867 he became a partner in the newly established publishing-house of J. B. Ford & Co., and, by his business ability and fertility of invention, contributed largely to the success of the "Christian Union." He had a genius for mechanics, and made many improvements in printing, notably in devices for the rapid delivery of sheets from a printing-machine. He invented and patented folding combinations, folding and pasting apparatus, and devices for printing two sheets simultaneously, and for folding and pasting one within the other.

FORD, Gordon Lester, lawyer, b. in Lebanon, Conn., 16 Dec., 1823. He removed to New York city in 1835, studied law in that city, and was admitted to practice in 1850. In 1852 he was chosen president of the New London, Willimantic, and Palmer railroad company. In 1869 he received the appointment of collector of U. S. internal revenue in Brooklyn, N. Y. From 1873 till 1881 he was the business manager of the New York "Tribune," and in 1883 became president of the Brooklyn, Flatbush, and Coney Island railroad.—His wife, **Emily Ellsworth,** author, b. in Greenfield, Mass., 26 Aug., 1826, is a daughter of Prof. William C. Fowler. She has published, besides poems, stories, and essays, a volume of verses entitled "My Recreations" (New York, 1872). A later volume was printed privately.—Their son, **Worthington Chauncey,** author, b. in Brooklyn, N. Y., 16 Feb., 1858, prepared a revised edition of Wells's "Natural Philosophy," compiled the "American Citizen's Manual" (New York, 1883), and has published "The Standard Silver Dollar" (1884) and other economic tracts. For a year and a half he was a member of the editorial staff of the New York "Herald." In September, 1885, he became chief of the bureau of statistics in the department of state at Washington, D. C.—Another son, **Paul Leicester,** b. in Brooklyn, N. Y., 23 March, 1865, has published a bibliography of the works written by and relating to Alexander Hamilton (Brooklyn, 1887), and a volume on the genealogy of his great grandfather, Noah Webster.

FORD, John Thomson, theatrical manager, b. in Baltimore, Md., 16 April, 1829. In 1852 he became manager of a minstrel troupe, and was afterward manager of the old Richmond, Va., theatre and the Holliday street theatre, Baltimore, which he twice rebuilt. In 1858 he was elected president of the city council, and for two years was acting mayor. He also built three theatres in Washington, D. C., including Ford's theatre, of which he was the manager at the time of President Lincoln's assassination. He was arrested on suspicion of complicity in that crime, but, after being detained forty days in Carroll prison, was released, as there was not the slightest evidence against him. He has since been manager of various theatres. Mr. Ford was the first to bring Mary Anderson into public notice. He has been a state director of the Maryland penitentiary for eighteen years, and is active in philanthropic work in Baltimore. He has written much for the periodical press.

FORD, Joshua Edwards, missionary, b. in Ogdensburg, N. Y., 3 Aug., 1825; d. in Geneseo, N. Y., 3 April, 1866. He was graduated at Williams in 1844, and at Union theological seminary, New York, in 1847, and in that year sailed for Syria, under the auspices of the American board of commissioners for foreign missions. His first station was at Aleppo, where he was also forwarding-agent, postmaster, and banker for several other stations. He spent six months there, and when the Turkish mission was formed was transferred to Beirut, where he remained for four years, and then removed to Sidon. He went to England in 1861 to present the claims of the Syrian missions, and in 1865 returned to the United States on account of illness in his family. He edited several books in the Arabic language, and wrote a work in that tongue, entitled "Fasting and Prayer."

FORD, Philip, English merchant, d. about 1707. He was a Quaker, and was for several years William Penn's agent in London. Penn, becoming financially embarrassed, signed a deed of sale of his province to Ford, and took from him a lease for three years. Penn afterward paid him £17,000, but Ford claimed that £10,500 more were due him, and his son and widow arrested Penn in January, 1708. To avoid their extortion, Penn put himself within the limits of Fleet prison, and the Fords unsuccessfully petitioned the queen to put them in possession of Pennsylvania, at the same time offering to sell it to Isaac Norris for £8,000. Penn afterward lost his case in the court of chancery.

FORD, Samuel Howard, clergyman, b. in Missouri in 1823. He was educated at the University of Missouri, in 1843 was ordained to the Baptist ministry and became pastor in Jefferson City, Mo., and was afterward connected with churches in St. Louis and Cape Giradeau, Md., and Louisville, Ky. In 1853 he became associated in the editorship of the "Western Recorder" and "Christian Repository." At the beginning of the civil war he removed to Memphis, Tenn., and in 1864 was pastor of the St. Francis street Baptist church in Mobile, Ala. He then returned to Memphis, and was pastor there till failing health compelled his resignation in 1873. He now (1887) resides in St. Louis. —His wife, **Sally Rochester,** author, b. in Rochester Springs, Boyle co., Ky., in 1828. Her maiden name was Rochester. She was graduated at the female seminary in Georgetown, Ky., in 1849, and in 1855 married Mr. Ford, with whom she has edited "The Christian Repository" and "The Home Circle" since that date. Mrs. Ford is president of the Woman's missionary society of the south. She has published "Grace Truman" (New York, 1857); "Mary Bunyan" (1859); "Morgan and his Men" (Mobile, Ala., and New York, 1864); and "Ernest Quest" (New York, 1877).

FORD, Seabury, governor of Ohio, b. in Cheshire, Conn., 15 Oct., 1801; d. in Burton, Ohio, 8 May, 1855. He removed to Burton when a boy, and after his graduation at Yale in 1825 practised law in that town. He was in the Ohio legislature most of the time from 1830 till 1847, was presiding officer, at different times, of both its branches, and was also at one time major-general of militia. He was elected governor of the state in 1848, and served in 1849–'50. Immediately after the expiration of his term he had a paralytic shock, from the effects of which he died. He was an ardent friend of Henry Clay, and was instrumental in carrying the state of Ohio for him in 1844.

FORD, Thomas, governor of Illinois, d. in Peoria, Ill., in January, 1851. His parents emigrated to Illinois in 1804, when he was a child, and he became a successful lawyer there, and was active in politics almost from the organization of the state. He was judge of the state supreme court, and governor in 1842–'6. He published a "History of Illinois from 1818 to 1847" (Chicago, 1854).

FORD, Timothy, lawyer, b. in Morristown, N. J., 4 Dec., 1762; d. 7 Dec., 1830. His family residence was used by Washington as his headquarters in 1777. In 1780 he volunteered in a company of Washington's body-guards, and was wounded in a brief action at Springfield, N. J. He was graduated at Princeton in 1783, studied law in New York, and then removed to South Carolina, where he became eminent, practising for many years only in the Equity court. He was a member of the legislature and the Charleston city council, a trustee of Charleston college, president of various literary societies, and a founder of the Charleston Bible society. —His brother, **Gabriel Hogarth,** jurist, b. in Morristown, N. J., 3 Jan., 1765; d. there, 27 Aug., 1849, was graduated at Princeton in 1784, studied law, and was admitted to the bar in May, 1789. He became presiding judge of the court of common pleas for the eastern district of the state, and in 1820–'40 was a justice of the supreme court.—Gabriel Hogarth's son, **Lewis de Saussure,** physician, b. in Morristown, N. J., 30 Dec., 1801; d. in Augusta, Ga., 21 Aug., 1883, was graduated in medicine at the college of physicians and surgeons, New York city, in 1822, and in the same year removed to Hamburg, S. C. He went to Augusta, Ga., in 1827, and assisted in organizing there the Medical college of Georgia, in which he afterward held the chairs of chemistry and practice of medicine. He was a surgeon in the Confederate army from 1861 till the end of the civil war, and had charge of hospitals in Richmond and elsewhere. He was twice mayor of Augusta. The University of Georgia gave him the degree of LL. D. in 1868. Dr. Ford contributed many valuable essays on paroxysmal fevers to the "Southern Medical and Surgical Journal" in 1836–'45.

FORD, William Henry, physician, b. in Philadelphia, Pa., 7 Oct., 1839. He was graduated at Princeton in 1857, and at Jefferson medical college, Philadelphia, in 1860, and in 1862 was appointed an acting medical cadet in the U. S. army. He became assistant surgeon of the 44th Pennsylvania regiment in 1863, was soon afterward promoted to surgeon, and served until after the battle of Gettysburg. He studied in Europe in 1865–'8, was an editor of the Philadelphia "Medical Times" in 1870–'1, assistant demonstrator in the Philadelphia school of anatomy in 1869–'71, and compiler of vital statistics for the city in 1872–'5. He was chairman of the Centennial medical commission's committee on sanitary science in 1876, and a member of the Philadelphia board of health in 1871–'87, serving as its secretary in 1875–'7 and as its president in 1877–'9 and 1886–'7. He is a member of numerous medical and charitable societies, and has contributed to medical journals, principally on sanitary subjects. He is the author of the treatise on "Soil and Water" in Buck's "Hygiene and Public Health" (New York, 1879), and of "Healthy Dwelling-Houses, and how to Build, Drain, and Ventilate them" (Philadelphia, 1885).

FOREMAN, Stephen, clergyman, b. in Oo-you-gilogie, near Rome, Ga., 22 Oct., 1807; d. in Park Hill, Indian Territory, 8 Dec., 1881. His mother was a full-blooded Cherokee, his father white. His first teaching was in the mission-school, and he afterward spent a year and a half at Union seminary. He spent one year, 1831–'2, at Princeton, then two years in the theological department of Marysville college, Tenn., was licensed by Union presbytery, Tenn., in September, 1833, and two years later ordained as an evangelist. From 1834 till 1838 he labored among his people at Candy's Creek church. In the latter year his nation was compelled to remove to Arkansas, where he followed them and served as their pastor until the beginning of the civil war, when he became missionary in Texas, then returned to his former home among his people, where he lived for the remainder of his life. He was in part supported by the American board of commissioners for foreign missions, and during the last years of his life built a church out of his funds, and preached in it.

FORESTI, Eleutario Felice, Italian patriot, b. in Conselice, near Ferrara, Italy, in 1793; d. in Genoa, Italy, 14 Sept., 1858. He was graduated at the University of Bologna, studied law, and en-

tered on the practice of his profession in Ferrara. In 1816 he was made prætor of Crespino, and soon entered prominently into political affairs. In 1816 he became a member of the Carbonari, and was arrested and imprisoned. After two years in a dungeon, and an unsuccessful attempt to take his own life, he was condemned to die on the public square of Venice, but when, with others, he was taken out for execution, the sentence was changed to "carcere duro" in Spielberg for twenty years. From the scaffold he and his companions were transferred to the island of St. Michael. On the death of the reigning emperor, Foresti and others were liberated, but condemned to perpetual exile in the United States, whither they were shortly sent. Soon after his arrival in New York, Foresti became professor of Italian in Columbia, and was a popular teacher for more than twenty years. In 1858 he received the appointment of U. S. consul at Genoa. The degree of LL. D. was conferred on him. He wrote "Twenty Years in the Dungeons of Austria," for the "Watchman and Crusader" in 1856, and also published "Chrestomazia Italiana" (1846) and edited an edition of Ollendorff's Italian grammar (New York, 1846).

FORESTIER, Henri Joseph, French painter, b. in Puerto Hincado, Santo Domingo, in 1797; d. in Petit-Bourg, Guadeloupe, 23 Dec., 1874. His father, a rich planter of the Spanish part of Santo Domingo, sent him to Paris in 1809 to study art. After studying under David, in 1810–'12, he went to the school of the Beaux arts, where he took the second prize, and in 1813 the gold medal for his picture "The Death of Jacob." After two years in Rome he returned, in 1816, to his own country, where he remained for eleven years. Then, owing to the insecurity of the government, he sold everything he possessed, retired to Petit-Bourg, Guadeloupe, and devoted himself to his art. Forestier was considered one of David's best pupils. He had all the technique of his master, added to the fire of the ardent creole nature. His best pictures are scenes of colonial life and tropical landscapes. Among his works are "Ecce Homo" (1831); "Un nègre buvant le premier Tafia," which took the second medal at the Paris salon (1837); "Funérailles de Guillaume le conquérant" (1841); "Paysages de Saint-Domingue" (1854); "Coucher de soleil sous les tropiques" (1855); "Le bon samaritain," ordered for the prefecture of the Seine; and "Une vierge à la crèche," in the cathedral of Fort de France, Martinique. His "Jesus Christ guerissant une possedée" (1827) was purchased by the French government for the national museum in the palace of the Luxembourg, and gained for the artist the cross of the legion of honor. Forestier published a "Histoire de la Guadeloupe," continued by A. Lacour, counsellor of the imperial court of Basse Terre (2 vols., Basse Terre, 1851).

FOREY, Elie Frederic, French soldier, b. in Paris, 10 Jan., 1804; d. there, 20 June, 1872. He studied at the Louis le grand lyceum in Paris, and in 1822 entered the military school of Saint Cyr. He left it in 1830 and served as sub-lieutenant in the 2d light dragoons, of which he was drill-master. After distinguishing himself in Algiers he returned to France for his health, in 1844, with the rank of colonel. He became a major-general in 1848, formed with his command part of the garrison of Paris, and was one of the generals who, at the *coup-d'état* of 2 Dec., 1851, helped place Napoleon III. on the throne. On 22 Dec., 1852, he was made lieutenant-general and grand officer of the legion of honor. In 1854 he commanded the reserves of the army of the east, and was for a time commander-in-chief of the whole French army before Sebastopol. He fought through the campaign in Italy in 1859, and on 16 Aug. was made senator of the empire, and decorated with the grand cross of the legion of honor. When Napoleon resolved to send out his expedition to Mexico, Forey was made general-in-chief of the invading army, 31 Oct., 1861. From the first he was opposed to the expedition, his good sense leading him to see that it would probably prove disastrous; but Louis Napoleon intimated to him that only by accepting the command could he obtain the staff of a marshal of France. He landed at Vera Cruz in January, 1862, with 30,000 men admirably equipped. On 29 Jan. he issued a proclamation saying that he had only come to restore order, that life and property should be respected, and that the Mexicans should be free to choose the form of government that best suited them. This proclamation had a favorable effect. The government of the United States approved highly of it, but Napoleon was greatly exasperated. He wrote with his own hand to Gen. Forey, reprimanding him severely, and threatening him with an immediate recall if his future acts should be in accordance with his promises. Forey, on receipt of this mandate, suppressed all sympathy with the Mexican cause, and confiscated the property of all Mexicans who would not aid him. After the surrender of Puebla by the Republicans, 17 May, 1863, Forey marched on Mexico, which was taken by Gen. Bazaine, 12 July, 1863. After the fall of Puebla, Gen. Forey, becoming disgusted with his task, demanded to be recalled, and his request was granted. On 2 July he formed a provisory government, composed of three Mexicans, Almonte, the archbishop of Mexico, and Gen. Salas. On 1 Oct. he delivered the command of the army to Gen. Bazaine, and sailed from Vera Cruz for France. He was made marshal and commander of the 2d division of the army, 24 Dec., 1863. On various occasions he spoke long and eloquently in the senate in behalf of the Mexicans, and in the session of 10 Feb., 1866, boldly declared that to subjugate Mexico it would be necessary to send thither an army of 150,000 men, and if that could not be done the project would have to be abandoned. Napoleon chose the latter alternative.

FORMAN, David, soldier, b. near Englishtown, N. J.; d. about 1812. He commanded the New Jersey militia at Germantown, and was known by the nickname of "Black David" among the Jersey loyalists, owing to his excessive cruelty toward those who did not favor the Revolution. After the war he was a judge of the county court, and a member of the council of state. He was also one of the original members of the order of Cincinnati.

FORMES, Charles John, singer, b. in Mühlheim, Germany, 7 Aug., 1810. He is popularly known as Karl Formes. He received his early musical education in Cologne and Vienna, and sang in church choirs till 1841, when he attracted attention in Cologne as a concert singer. His appearance in opera soon followed, and in 1843 he became a member of the Mannheim theatre, and in 1844 joined the opera in Vienna. Incautious expressions of sympathy with revolutionary movements caused his sudden retirement, and after an engagement in Hamburg he was invited to join a German opera-company in London, where, in 1849, he first performed at Drury Lane. In 1850, Formes became a member of the Italian opera of Covent Garden, and in the same year sang at the Philharmonic concerts. At this time it was the opinion of critics that for volume, compass, and sonor-

ous quality, Formes's deep bass was altogether unequalled. In "Robert le Diable," "Don Giovanni," and the "Huguenots," he dwarfed all competition. His stately presence and intuitively fine dramatic action, both in comedy and tragedy, added to the completeness of his representations. Nor was he less imposing in rendering the dramatic songs of Robert Franz, Schubert, and other German composers, and in the oratorios of Händel, Haydn, and Mendelssohn. In 1857 he came to the United States, making his first appearance in Meyerbeer's "Robert le Diable," at the Academy of Music in New York city. He subsequently sang with much success in the principal cities of the Union. After a time his representations suffered from carelessness, and his business affairs seemed to lack proper management; his voice also was impaired by frequent hoarseness and habitual flatness of intonation. These conditions lost him pre-eminence, and his last years in New York city were spent as a teacher of vocal music. Of late years Formes has resided chiefly in this country, and is now (1887) an inhabitant of the far west.

FORNÁRIS, José (for-nah'-res), Cuban poet, b. in Bayamo, Cuba, in 1826. He studied at the University of Havana, was admitted to the bar in 1853, settled in that city, and devoted himself to literature and teaching. His first volume of poems was published in 1851; a second volume (1857) made him popular throughout the island. A third, under the title of "Flores y Lágrimas," was published in 1862, and shortly afterward his "Cantos del Siboney," in which the habits and traditions of the primitive inhabitants of Cuba are described. "La Hija del Pueblo," a drama (1865), and "Amor y Sacrificio," a drama (1866), were his next productions. In 1871 Fornaris travelled in Europe, and in 1878 published in Paris "El Arpa del Hogar," and later another volume of poems under the title of "Cantos Tropicales." He returned to Havana in 1881, where he still lives (1887).

FORNEY, John Weiss, journalist, b. in Lancaster, Pa., 30 Sept., 1817; d. in Philadelphia, 9 Dec., 1881. He began life as a shop-boy in a village store, but, being ambitious, gave up the work and at the age of sixteen entered the printing-office of the Lancaster, Pa., "Journal." In his twentieth year he purchased the Lancaster "Intelligencer," a strongly Democratic journal, and in 1840 he published the paper in whose office he had entered as apprentice seven years before, in connection with his previous purchase, under the name of the "Intelligencer and Journal." His journal attained a wide reputation, and in 1845 President Polk appointed him deputy surveyor of the port of Philadelphia. He then disposed of his paper, bought a half share in the "Pennsylvania," one of the most decided of the Democratic journals in the state, and conducted it editorially until 1851. In that year he was chosen clerk of the house of representatives and re-elected two years later, serving until 1855. During this term of office he continued to write for the "Pennsylvania," and edited the Washington "Union," the foremost Democratic paper at the capital. While clerk of the house of representatives it became Mr. Forney's duty to preside during the protracted struggle for the speakership in 1855, which resulted in the election of Nathaniel P. Banks, when, by his tact as presiding officer, he won the applause of all parties. In 1856 he returned to Pennsylvania and was chosen chairman of the Democratic state committee. In January, 1857, he was the Democratic candidate for U. S. senator, but was defeated by Simon Cameron. In August, 1857, he began the publication of the "Press," an independent Democratic journal in Philadelphia. Having exhausted his fund in the political campaign, he purchased the type on credit, and the paper was printed for months in the office of the "Sunday Dispatch." The "Press" ardently espoused the opinions of Stephen A. Douglas, and supported Buchanan's administration up to the adoption of the Lecompton constitution, and the effort to secure the admission of Kansas into the Union under it. Mr. Forney resolutely opposed that measure, and his action caused a disruption of the friendly relations which had previously existed between the president and himself. Few men in the country contributed more than Mr. Forney to strengthen the Republican party, and to prepare it for the contest of 1860. In December, 1859, he was again elected clerk of the house of representatives, and soon afterward started in Washington the "Sunday Morning Chronicle," which was afterward, in October, 1862, converted into a daily. He was elected secretary of the U. S. senate in 1861, and for six years was one of the most influential supporters of the administration. On the death of Mr. Lincoln, Mr. Forney supported Andrew Johnson for a short time, but afterward became one of the foremost in the struggle which resulted in the president's impeachment. He sold the "Chronicle" in 1870, and in March, 1871, became collector of the port of Philadelphia. He held the office but one year, but during that time perfected the system of direct transportation of imports in bond without appraisement and examination at the port of original entry. When the Centennial exhibition was proposed, he was one of its most active promoters, and went to Europe in its interests in 1875. On his return he sold his interest in the "Press," and in 1879 established "The Progress," a weekly paper, in Philadelphia. In 1880 he supported Winfield S. Hancock for the presidency. He was the author of "Letters from Europe" (Philadelphia, 1869); "What I saw in Texas" (1872); "Anecdotes of Public Men" (2 vols., New York, 1873); "A Centennial Commissioner in Europe" (Philadelphia, 1876); "Forty Years of American Journalism" (1877); and "The New Nobility" (New York, 1882).

FORNEY, Peter, soldier, b. in Lincoln county, N. C., in April, 1756; d. there, 1 Feb., 1834. He was of Huguenot descent, and during the war of the Revolution served in the American army. He afterward engaged in the manufacture of iron, and was a member of the legislature of North Carolina in 1794–'6, and of the state senate in 1801–'2. He was elected to congress from North Carolina, and served from 24 May, 1813, till 3 March, 1815. He was a presidential elector on the Jefferson, Madison, Monroe, and Jackson tickets.—His son, **Daniel M.,** soldier, b. in Lincoln county, N. C., in May, 1784; d. in Lowndes county, Ala., in October, 1847. He was a major in the war of 1812, and was elected a representative in congress from North Carolina for two successive terms, serving from 4 Dec., 1815, till 1818, when he resigned. He was appointed by President Monroe in 1820 a commissioner to treat with the Creek Indians, and was a member of the state senate of North Carolina in 1823–'6. He removed to Alabama in 1834.—His grandson, **William Henry,** soldier, b. in Lincolnton, N. C., 9 Nov., 1823. He was graduated at the University of Alabama in 1844, and during the war with Mexico served as 1st lieutenant in the 1st Alabama volunteers. He afterward studied law, was admitted to the bar in 1848, and engaged in practice for twenty-five years. He was elected to the legislature in 1859, entered the Confederate army as captain in 1861, and rose

to the rank of brigadier-general. He surrendered with Lee at Appomattox in 1865, and in 1865–'6 was a state senator. He was chosen to congress as a Democrat in 1874, and has served by successive re-elections till the present time (1887).

FORRES, Juan de, clergyman, b. in Spain; d. in Nicaragua in 1560. He was named vicar-general of the province of Nicaragua, the monks of which were supposed to have relaxed from the austerity of their rules. He had full powers, in case he did not succeed in restoring the ancient discipline among them, to send them to Spain and confiscate their movable property for the benefit of the stricter Dominicans of Guatemala. The Dominicans of Nicaragua claimed that the climate did not permit a rigid observance of the rule, that they had rendered great services to the country, and that they were punctual in observing necessary rules. He did not reply to their protest, and, when the rigorous ordinances he issued were not observed, he emptied all the convents of their inhabitants, whom he sent back to Spain, and, taking possession of the valuables in them, returned to Guatemala. The father-general of the order was far from approving the severity with which Forres acted, and summoned him to Rome. The latter received new instructions and returned to Nicaragua in 1559. He then showed as much zeal in providing the Dominicans for the vacant convents as he had exhibited energy in turning the monks out of their homes before. After his death, however, in the following year, the Dominicans abandoned Nicaragua.

FORREST, Edwin, actor, b. in Philadelphia, 9 March, 1806; d. there, 12 Dec., 1872. He was descended from Scottish ancestry. His father died, leaving the support of the family to the mother, a German woman of humble birth but of fine mental endowments, who developed qualities of hardihood that were reproduced in her gifted son. Edwin was educated at the common schools in Philadelphia, and early evinced a taste for the theatre. Kean was at that time in the meridian of his fitful career; Conway, Cooper, and the elder Booth were playing under the management of Wood and Warren, both actors of great merit. Constant attendance at the performances of these artists fired Forrest's ambition and aroused his enthusiasm for the dramatic profession, to the deep grief of his pious mother. At an early age he had given pain to his parents by taking an humble part in a dramatic performance. Unable to withstand the attractions of the mysterious calling, he, in 1820, made his first regular appearance on the stage as Douglas in John Home's tragedy of that name. His success was immediate. His youth, his robust and manly physique, his clear, resonant voice, his fair and handsome face, won the great audience at once. He then began the professional career that was as severe in its hardships as it was brilliant in its results. The theatres of New York and Philadelphia were already crowded with trained and successful actors; Forrest therefore set out at once for the south and west. His tour through a rough country, with the inconveniences of long distances, the necessity of presenting his plays in rude halls, an insufficient support, and poor scenery, was not altogether successful; but the discipline to mind and body was felt in all his subsequent career. After a few years of this hard novitiate he emerged once more into the scenes where his later glories were to culminate. In November, 1826, he made his first metropolitan experiment as Othello at the old Bowery theatre, and gained an instant success. The management employed him at a salary far below his worth, and he was at once offered increased payment at another theatre; but he refused to break his word, and carried out the contract to his own detriment. This strict sense of honor was characteristic of him throughout his career. His New York success was repeated in every city he visited, and after a few years of profitable labor, during which he had encouraged native talent by liberal offers for new American plays, he went to Europe for rest and travel and larger observation, and was received with much courtesy by actors and scholars. He returned to Philadelphia in 1831, and played there and in New York and elsewhere with triumphant success until September, 1836, when he sailed for England, this time professionally, and made his first appearance as Spartacus, in the tragedy of "The Gladiator," at Drury Lane theatre, London. The play proved unpopular, but his own rôle was a distinguished success. During a season of ten months he performed in that historic theatre the parts of Macbeth, Othello, and King Lear. His social triumphs were as great as were his professional; he was entertained by Macready and Charles Kemble, and at the end of the season was complimented by a dinner at the Garrick club, presided over by Talfourd. During this engagement he married, in June, 1837, Miss Catherine Norton Sinclair, daughter of John Sinclair, the popular singer. He returned to Philadelphia in November of the same year and began an engagement. His wife made a deep impression wherever she was presented, and it was argued that domestic happiness would be the fitting crown of his public career. But these predictions were disappointed. The marriage proved unhappy, and a divorce, followed by public scandal, ensued. He visited London a second time in 1845, accompanied by his wife, who was welcomed in the intellectual circles of English and Scotch society. He acted at the Princess's theatre in London. He met with great success in Virginius and other parts, but when he attempted to personate Macbeth, a character unsuited to his physique and style of acting, the performance was hissed by the audience. Forrest attributed the hissing to the professional jealousy and machinations of Macready, although that artist had been kind and helpful to him when he first came before London audiences. A few weeks later, when Macready was playing Hamlet in Edinburgh, Forrest stood up in a private box and hissed the English actor. This act of spiteful resentment evoked contemptuous reproaches from the British press and destroyed the respect in which he had been held by the public. An acrimonious letter that he printed in the "Times" aggravated, instead of justifying, his offence. A portion of the American public believed that national jealousy and professional intrigue had in-

terfered with the success of their favorite tragedian in England. In May, 1849, when Macready was acting Macbeth in the Astor place opera-house, the friends of Forrest hissed and interrupted the performance. The Astor place riot ensued, which resulted in the death of twenty-two men and the wounding of thirty-six others. In the succeeding year Mrs. Forrest brought her suit for divorce, which her husband met with a cross-suit. The trial occupied the courts for two years, and was finally decided in favor of the wife on all points and a decree for the payment of $3,000 alimony per annum. In this trial Charles O'Conor, the counsel for the defendant, won a national reputation by winning the case against John Van Buren, and securing for the lady an honorable verdict and a liberal alimony. Forrest left the court-room defeated and calumniated, but was lionized by the masses. On his appearance during the last period of the lawsuit at the Broadway theatre as Damon, the house was crowded to suffocation, and his success for sixty nights exceeded anything ever known in the history of the theatre. But the wealth that poured in upon him and the applause of his followers did not soften a temper soured by domestic sorrow. His quarrel with Macready and his part in the Astor place riot had added to his notoriety, while they weakened his fame, and still further embittered his temper. In 1853 he played Macbeth, with a strong cast and fine scenery, at the Broadway theatre for four weeks—an unprecedented run at that date—and at the end of this engagement he retired from the stage for several years. He became interested in politics, being spoken of as a candidate for congress, and did not return to professional life until 1860, when he appeared at Niblo's Garden, New York, as Hamlet, and played the most successful engagement of his life. Hereditary gout developed itself in a malignant form in 1865, during an engagement at the Holliday street theatre, Baltimore, the sciatic nerve was paralyzed, and he never regained the use of his hand or his steady gait. His California tour in 1866 was a failure. He played his last New York engagement in February, 1871, the plays being "Richelieu" and "Lear"; the weather was cold, and the houses empty. On the night of 25 March, 1871, he appeared in Boston at the Globe theatre, as Lear, played this part six times, and was announced for Richelieu and Virginius; but on the intervening Sunday caught cold. He struggled through the former rôle on Monday night, and rare bursts of eloquence lighted the gloom, but he labored piteously against the disease which was fast conquering him. Being offered stimulants, he signed them away, with the words, "If I die, I will still be my royal self." This was his last appearance as an actor. He recovered from the severe attack of pneumonia; but the craving for public applause, which was his only happiness, induced him to give readings from Shakespeare in several large cities. The scheme failed, and was abandoned, to his deep mortification. A stroke of paralysis ended his life suddenly and without pain. His servant found him dead, alone, and apparently asleep, in his home in Philadelphia. The large sums that he had earned on the stage were judiciously and fortunately invested, and resulted in his amassing a large fortune. He had purchased, about 1850, a site on the banks of the Hudson, on which he erected a castellated structure. This estate, which he named Fonthill, he afterward sold at a large advance for a convent. In 1855 he purchased a mansion in Philadelphia, to which he retired after his temporary abandonment of the stage. There he collected the largest dramatic library in the United States. By avoiding New York and by legal evasions he succeeded in escaping the payment of alimony to his wife, but left his estate heavily in

her debt. His will, besides bequests to his friends, contained a plan by which his fortune, in the hands of trustees, was to be used in the erection and support of a home for aged actors, to which purpose he devoted his Philadelphia home; but the claims of his living wife crippled the legacy, and some awkward provisions of the will weakened the purpose of the testator. Edwin Forrest was what his own inherited nature and the bias of his life made him. He was turbulent, colossal, and aggressive, but allied to humanity by a great tenderness of soul. His greatest parts were Lear, Othello, and Coriolanus. The characters of Tell and Virginius were also suited to his powers. A favorite part with himself was Aylmere in "Jack Cade," a tragedy written for him by Judge Robert T. Conrad, which he first played in New York soon after his marriage. The Roman died with him. With him properly begins the royal line of American dramatic monarchs. A "Life of Edwin Forrest" was published by J. Rees (Philadelphia, 1874), and one by William R. Alger (1875). See also his biography, by Lawrence Barrett, in "The American Actor Series" (Boston, 1883).

FORREST, French, naval officer, b. in Maryland in 1796; d. in Georgetown, D. C., 22 Dec., 1866. He became a midshipman, 9 June, 1811, and fought bravely in the war of 1812, distinguishing himself under Com. Perry in the battles on Lake Erie, and in the action between the "Hornet" and the "Peacock" on 24 Feb., 1813. He was advanced to a lieutenancy, 5 March, 1817, made commander, 9 Feb., 1837, and captain, 30 March, 1844. During the war with Mexico he was adjutant-general of the land and naval forces, and superintended the transportation of troops into the interior of that country. At the beginning of the civil war, when Virginia seceded, he joined the Confederates, and was given the command of the navy. He took charge at Norfolk navy-yard, and afterward was appointed to the command of the James river squadron. He then became acting assistant secretary of the navy.

FORREST, Nathan Bedford, soldier, b. in Bedford county, Tenn., 13 July, 1821; d. in Memphis, Tenn., 29 Oct., 1877. While yet quite young he removed with his family to Mississippi, where his father soon afterward died, leaving Nathan mainly responsible for the support of the household. In 1842 he removed to Hernando, Miss., and established himself as a planter, remaining there till about 1852, when he went to Memphis, Tenn., and became a real estate broker and dealer in slaves. When the civil war broke out he had amassed a considerable fortune. In June, 1861, he joined the Tennessee mounted rifles, and in July

following he raised and equipped, at the request of Gov. Harris, a regiment of cavalry, and was made lieutenant-colonel. In October he moved with his men to Fort Donelson, where he remained until the approach of Gen. Grant, and whence he was allowed to escape with his men before the flag of truce was sent. After a raiding excursion, during which he visited Nashville, Huntsville, and Iuka, he took part in the battle of Shiloh. He was assigned to the command of the cavalry at Chattanooga in the following June, participated in the attack on Murfreesboro on 13 July, 1862, and on 21 July was made brigadier-general. In September he was in command at Murfreesboro, and on 31 Dec. was engaged at Parker's Cross-Roads. He fought at Chickamauga on 19 and 20 Sept., 1863, and in November was transferred to northern Mississippi. In the following month he was made major-general and assigned to the command of Forrest's cavalry department. He was in command of the Confederate forces that attacked Fort Pillow in April, 1864, and, while negotiations for the surrender of the fort were in progress under a flag of truce, moved troops into favorable positions that they could not have gained at any other time. Maj. Bradford, the commander of the fort, refused to surrender, whereupon the works were taken by assault, and the garrison, consisting mainly of colored troops, were given no quarter. The excuse given by Forrest's men was, that the flag of the fort had not been hauled down in token of surrender. During the operations of Hood and Thomas in Tennessee he proved a great source of annoyance to the National commanders, and in February, 1865, he was promoted to the rank of lieutenant-general. He was finally routed by Gen. James H. Wilson on 2 April, 1865, and on 9 May he surrendered at Gainesville. After the war he was president of the Selma, Marion, and Memphis railroad, but resigned in 1874. He was a delegate from Tennessee to the New York Democratic national convention of 4 July, 1868. Some of Gen. Forrest's official documents are very amusing for their peculiar orthography and phraseology. In his dispatch announcing the fall of Fort Pillow, the original of which is still preserved, he wrote: "We busted the fort at ninerclock and scatered the niggers. The men is still a cillanem in the woods." Accounting for prisoners, he wrote: "Them as was cotch with spoons and brestpins and sich was cilld and the rest of the lot was payrold and told to git." See "Campaigns of N. B. Forrest," by T. Jordan and J. B. Pryor (New York, 1868).

FORREST, Uriah, soldier, b. in St. Mary's county, Md., in 1756; d. near Georgetown, D. C., in April, 1805. He attained the rank of colonel in the Maryland line during the Revolution, received a wound at the battle of Germantown, 4 Oct., 1777, from the effects of which he never recovered, and lost a leg at the Brandywine. He was a delegate to the Continental congress from 1786 till 1787, and from 1793 till 1795, when he resigned. He was then appointed general of militia, and was frequently a member of the Maryland legislature. From 1800 till 1805 he was clerk of the circuit court of the District of Columbia.

FORRY, Samuel, physician, b. in Berlin, Pa., 23 June, 1811; d. 8 Nov., 1844. He was educated at the University of Pennsylvania, and was ten years in the U. S. army as assistant surgeon and surgeon. He afterward practised his profession in New York city. He contributed many articles to medical journals, originated and conducted for two years the New York "Journal of Medicine," and in 1844 received from Harvard the Boylston prize for an essay on vaccine. He is the author of "The Climate of the United States and its Endemic Influences" (New York, 1842) and "Meteorology" (1843).

FORSHEY, Caleb Goldsmith, engineer, b. in Somerset county, Pa., 18 July, 1812; d. in Carrollton, La., 25 July, 1881. He was educated at Kenyon college, Ohio, and at the U. S. military academy, where he entered in 1833, but was not graduated. He was professor of mathematics and civil engineering at Jefferson college, Miss., in 1836–'8, and was from that time engaged for many years in engineering works in Mississippi, Louisiana, and Texas. He was in charge of the U. S. survey of the Mississippi delta in 1851–'3, was chief engineer of the Galveston, Houston, and Henderson railway in 1853–'5, and designed the bridge across Galveston West bay. In 1855 he established the Texas military institute and conducted it till 1861, when, though opposed to secession, he entered the Confederate service as a lieutenant-colonel of engineers. He was employed on the James river and as chief engineer on the staff of Gen. Magruder, and planned the defences of the Texas frontier and the operations for the recapture of Galveston and the Texas coast. Since the war he has been engaged in railway construction in Texas, on the improvements at the mouth of the Mississippi, and during 1874–'5 was in the U. S. engineer service on the Red river and Galveston bay. He was the first vice-president and one of the founders of the New Orleans academy of sciences, and has contributed largely to the scientific journals of the south and southwest. He assisted in the preparation of "The Physics of the Mississippi River" (Washington, 1861).

FORSTER, Archibald McDonald, Canadian inventor, b. in Markham, Ont., 11 May, 1843. He was educated in the Markham and Uxbridge grammar-schools, and after leaving school went to work in his father's foundry and machine-shop. In 1866 he invented a preparation for cleaning scale from steam boilers, and in 1868 a self-oiling cup for machinery. In 1877 he established a brass foundry in Hamilton, in which, in addition to other articles, he manufactures several of his own inventions.

FORSTER, William, missionary, b. in Tottenham, England, in 1784; d. in Knox county, Tenn., in 1854. In 1803 he became a minister of the society of Friends, and thenceforth his life was devoted to missionary and benevolent labors throughout the British Isles, the continent of Europe, and the United States. He first visited the latter country in 1820, again about 1840, and for the last time in 1853, when he had interviews with the president and several governors of southern states about the condition of the slaves. He was wealthy, noted for his benevolence, and was the intimate friend of Elizabeth Fry, Sir Fowell Buxton, and Joseph John Gurney. He was the father of the British statesman, William Edward Forster. He published "A Christian Exhortation to Sailors, etc." (London, 1856). See "Memoirs of William Forster" (London, 1865).

FORSYTH, Benjamin, soldier, b. in Stokes county, N. C., d. near Oldtown, N. Y., 28 June, 1814. He was a member of the legislature of North Carolina, 1807–'8, and was appointed a lieutenant of infantry from North Carolina in April, 1808, and became a captain of riflemen in July of that year. He commanded in the successful assault on Gananoque, Upper Canada, in September, 1812, and also at the capture of the British guard at Elizabethtown, Canada, in February, 1813. For the latter service he was brevetted lieutenant-colonel. He also distinguished himself at the capture of Fort George, 27 May, 1813, and at the attack on York on 27 April of the same year. He was killed in a battle with a superior force of British and Indians. —His only son, **James N.,** after his father's death, was adopted as a child of the state by the legislature of North Carolina, and provision was made for his education at the public expense. He entered the university in 1824, subsequently was appointed a midshipman in the navy, and was on board the sloop "Hornet," which was lost at sea.

FORSYTH, James W., soldier, b. in Ohio about 1835. He was graduated at the U. S. military academy in 1856, and assigned to the infantry. He was promoted to 1st lieutenant on 15 March, 1861, was for two months assistant instructor to a brigade of Ohio volunteers, and on 24 Oct. was made captain. He was on Gen. McClellan's staff during the peninsular and Maryland campaigns, was brevetted major on 20 Sept., 1863, for gallantry at Chickamauga, and in 1864–'5 was assistant adjutant-general of volunteers and chief-of-staff to Gen. Sheridan. He took part in the Richmond and Shenandoah campaigns, and was lantry at Opequan, Fisher's Hill, and Middletown, brevetted brigadier-general of volunteers for gal- 19 Oct., 1864; colonel in the regular army, 1 April, 1865, for services at Five Forks, and brigadier-general on 9 April, for services during the war. He was given the full commission of brigadier-general of volunteers on 19 May, and in 1866–'7 was assistant inspector-general of the Department of the Gulf. He was aide to Gen. Sheridan in 1869–'73, military secretary of the division of the Missouri in 1873–'8, and was then assigned to frontier duty, taking part in the Bannock campaign of 1878. In 1886 he became colonel of the 7th cavalry. He has published "Report of an Expedition up the Yellowstone River in 1875" (Washington, 1875).

FORSYTH, John, statesman, b. in Frederick county, Va., 22 Oct., 1780; d. in Washington, D. C., 21 Oct., 1841. His father was an Englishman, but fought in the American army in the Revolution. John removed to Georgia with his family when he was four years old. He was graduated at Princeton in 1799, studied law, and was admitted to the bar at Augusta, Ga., in 1802. He was elected attorney-general in 1808, and was afterward chosen to congress as a Democrat, serving from 1813 till 1818, when he became U. S. senator. He resigned in 1819, having been appointed minister to Spain, and conducted the negotiations which resulted in the cession of Florida to the United States. He served in congress again from 1823 till 1827, when he was elected governor of Georgia, and in 1829 was again chosen U. S. senator in place of J. M. Berrien, who had resigned. He opposed nullification, voted for Henry Clay's compromise act of 1833, and supported Jackson in the debate regarding the removal of deposits from the U. S. bank. He was a delegate to the anti-tariff convention at Milledgeville, Ga., in 1832, but withdrew on the ground that it did not fairly represent the people of Georgia. He resigned his senatorship on 27 June, 1834, to become secretary of state under President Jackson, and continued to serve under Van Buren till 3 March, 1841.—His son, **John,** editor, b. in Georgia in 1813; d. in Mobile, Ala., 2 May, 1879, was for many years one of the foremost Democratic editors of the south. In 1856 he was appointed minister to Mexico, but in 1858 demanded his passports, and withdrew from the legation. In 1861, with Marshall J. Crawford, of Georgia, he represented the Confederate states as commissioner to the National government, but his request for an unofficial interview with Sec. Seward was declined. He removed to Mobile after the civil war and engaged in journalistic work until feeble health compelled him to retire.

FORSYTH, John, clergyman, b. in Newburg, N. Y., in 1811; d. there, 17 Oct., 1886. He was graduated at Rutgers in 1829, studied theology at the University of Edinburgh, under the Rev. Thomas Chalmers, and in Glasgow, under Dr. Thomas Dick, and was licensed to preach in April, 1833, by the presbytery of Aberdeen, Scotland. He then returned to the United States and was ordained in 1834 by the presbytery of New York. He held pastorates in Philadelphia in 1834–'6, and in Newburg, N. Y., in 1836–'47, occupying at the same time the chair of biblical literature in the theological seminary of the Reformed church at that place. He was professor of Latin at Princeton from 1847 till 1853, again professor at Newburg in 1853–'5, and in 1860–'3 held the chair of the English language and literature in Rutgers. He was appointed chaplain and professor of moral philosophy at West Point in 1871, and served there till 1881, when he was retired with the pay of colonel. He was for many years president of the Board of education of Newburg, and is the author of numerous pamphlets and sermons, an American edition of Dick's "Theology," with a life of the author (2 vols., New York, 1836); "History of the Public Schools of Newburg" (Newburg, 1863); "Lives of the Early Governors of New York," published in the Newburg "Daily Union" in 1863; and a translation and enlargement of Moll's "Exposition of the Psalms" (in Lang's "Commentary," 1871). He also contributed largely to current literature.

FORT, George Franklin, governor of New Jersey, b. in Pemberton, N. J., in May, 1809; d. in New Egypt, Ocean co., N. J., 22 April, 1872. He was educated in his native county, and was graduated in medicine at the University of Pennsylvania in 1830. He became a successful practitioner, and, while actively engaged, was elected to the assembly from Monmouth county. In 1844 he was a member of the State constitutional convention, and was subsequently elected to the state senate. In 1850 he was elected governor of New Jersey, serving two terms, till 1854, and was afterward a judge of the court of errors and appeals. He held other public offices, and was an active member of the prison reform committee. Princeton gave him the honorary degree of A. M. in 1847. He was the author of "Early History and Antiquities of Freemasonry" (Philadelphia, 1875).

FORT, Greenberry Lafayette, soldier and politician, b. in French Grant, Scioto co., Ohio, 11 Oct., 1825; d. in Lacon, Ill., 13 Jan., 1883. In May, 1834, his parents left Ohio and settled in Marshall county, Ill., where he was brought up on a farm and attended school. He then studied law, was admitted to the bar, and began practice in Lacon, where he was elected sheriff in 1850, was clerk of the circuit court in 1852, and county judge in 1857–'61. In his first case Abraham Lincoln was

the opposing counsel, and David Davis the presiding judge. On the first call for troops in 1861, he volunteered in the National army, served in the Army of the Tennessee on both field and staff duty through all its campaigns, and was chief quartermaster of the 15th army corps on the march from Atlanta to the sea, and until the final surrender of Johnston's army. He was afterward ordered with Sheridan's command to Texas, where he was mustered out as colonel and brevet brigadier-general of volunteers at Galveston in 1866. He was elected to the state senate of Illinois in that year, and was afterward chosen to congress as a Republican, serving from 1873 till 1879.

FORT, Tomlinson, physician, b. in Warren county, Ga., 11 July, 1787; d. in Milledgeville, Ga., 11 May, 1859. His father was a soldier of the Revolution. Tomlinson was graduated in medicine at the University of Pennsylvania in 1810, and practised in Milledgeville, where he acquired distinction as a physician. He commanded a company in the Indian campaign in Florida in 1812, and was wounded in the knee. He was for several years a member of the state house of representatives, and served in congress from 1827 till 1829, having been elected on a general ticket. He then resumed practice, was chosen president of the state bank of Georgia in 1832, and held the office till his death. He published a work on "The Practice of Medicine" (Milledgeville).

FORTIN, Pierre, Canadian statesman, b. in Verchères, Quebec, in December, 1823. He was educated at Montreal seminary and at McGill college, where he was graduated in medicine in 1845. He served as a surgeon at Grosse Isle during the prevalence of the fever in 1847–'8. In 1849 he aided in forming a special mounted constabulary force for quelling disturbances in Montreal and its vicinity, and commanded a troop of this force. In 1852 he was appointed stipendiary magistrate for the lower river and Gulf of St. Lawrence, and organized the service for the protection of the sea and river fisheries in that district. He was engaged in this service from 1852 till 1867, when he resigned, and had under his command the armed steamer "Doris" and the armed schooner "La Canadienne," in which latter vessel he was wrecked in November, 1861. In 1858 he was instructed by the Canadian government to visit officially the French colonies of St. Pierre Miquelon and Longlake, and that portion of the seaboard of Newfoundland known as the French coasts, and to report the conditions under which the French fisheries and fish trade were carried on. In 1859 he established on all the coasts and in the rivers of the province of Quebec a system of licenses for salmon fishing, and in 1862 he began a series of descriptions from nature of the marine animals, fishes, mollusca, and crustacea of the lower river and the Gulf of St. Lawrence, which were printed in some of his annual reports to the government. He was a member of the executive council and commissioner of crown lands for the province of Quebec in 1873–'4, and was elected speaker of the legislative assembly in November, 1875, but resigned in 1876. While speaker he founded the marine library of the province of Quebec, and was also one of the founders of the Geographical society of Quebec and its first president. He represented Gaspé in the Canadian parliament from 1867 until the general election of 1874, when he retired in order to confine himself exclusively to the legislative assembly, in which he sat from 1867 until 1881. He was re-elected to the Dominion parliament in 1878 and 1882. He is a Conservative.

FORTÍQUE, Mariano Fernández (for-te'-ka), Venezuelan bishop, b. in Caracas, Venezuela, in 1790; d. there in November, 1866. He studied at the seminary of Santa Rosa and the University of Venezuela. He spoke and wrote Latin with remarkable correctness, as well as French and other modern languages. In 1815 he was ordained a presbyter, and in 1834 was appointed rector of the parish of San Pablo, and also synodical examiner. In the same year he was elected to the national legislature. In 1842 he was consecrated bishop of Guayana. At various times during his life he was senator, president of congress, and state counsellor. He secured the endowment of the much-needed Seminary of Caracas. His few literary productions reveal vast learning and a noble character.

FORTOUL, Pedro (for-toal'), Colombian soldier, b. in Rosario de Cucuta, Colombia, in May, 1780; d. there, 5 Jan., 1837. He was of French descent, entered the Cucuta militia as a lieutenant in August, 1810, and by successive promotions attained the grade of general of division, 30 Oct., 1829. He was with the forces that operated in the north of New Granada in 1812, and his bravery won him distinction. He took part in the following battles: San Antonio de Cucuta, 1812; Capacho and Carrillo, 1813; Balaga, 1814; Cachiri, 1815; Yagual and Apure, 1816; Barinas, 1818; Pantano de Vargas and four others in 1819. In that year he was the leader of the campaign in the north, and in 1822 and 1824 commander-in-chief of the campaign in Cucuta. At the close of this campaign he became governor of the province of Boyaca, and held the office for five years. Gen. Fortoul suffered great hardships during his campaigns. After the battle of San Antonio de Apure in 1816, he emigrated toward Casanare, accompanied by his wife and children and others equally unfortunate. Many died of hunger and fatigue, and the survivors saved themselves by eating human flesh. Fortoul was reduced to extreme poverty by the destruction of his property during the war.

FORWARD, Walter, statesman, b. in Connecticut in 1786; d. in Pittsburg, Pa., 24 Nov., 1852. He received an academic education, removed to Pittsburg, and became the editor of the "Tree of Liberty," a Democratic newspaper. He then studied law, was admitted to the bar in 1806, and practised till 1822, when he was elected to congress as a Democrat to fill a vacancy, and served till 1825. In the presidential elections of 1824 and 1828 he supported John Quincy Adams, and was thenceforward identified with the Whig party. He was active in the State constitutional convention of 1837, and in 1841 was appointed by President Harrison first comptroller of the treasury, serving till his appointment by President Tyler to the treasury portfolio in September of the same year. On retiring from the cabinet in March, 1843, he resumed his practice at the bar. President Taylor made him chargé d'affaires in Denmark in November, 1849, but he

resigned in 1851, to accept the office of president-judge of the district court of Alleghany county, Pa., to which he had been elected. He published a report on the tariff that was considered an able document (Washington, 1842).

FORWOOD, William Stump, physician, b. near Darlington, Harford co., Md., 27 Jan., 1830. He studied medicine in Harford county, and was graduated at the University of Pennsylvania in 1854, and also in the same year from Dr. Joseph Warrington's obstetric institute in Philadelphia. He began practice in Darlington, Md., and continued there till 1869, when, after living in Philadelphia till December, 1870, he removed to Gosport, Clarke co., Ala., but in 1873 returned to Darlington, where he still (1887) resides. In 1866 he aided in organizing the Medical society of Harford county, of which he became president, and was for several years its secretary. He also aided in the organization of the Clarke county, Ala., medical society, and was its first president. He was president of the Pennsylvania and Maryland union medical association in 1882, and is a member of many other medical societies. He was president of the Harford historical society at its organization in 1885, and still (1887) holds that office. During 1886 he read valuable papers before the society, including "The History of Harford County" and "The History of the Passage of Gen. Lafayette with his Army through Harford County in 1781." In 1867 and 1870 he made extended explorations in Mammoth Cave, Kentucky, and afterward published "An Historical and Descriptive Narrative of the Mammoth Cave of Kentucky" (Philadelphia, 1870; 4th ed., enlarged, 1875).

FOSDICK, William Whiteman, poet, b. in Cincinnati, 28 Jan., 1825; d. there, 8 March, 1862. His mother, Julia Drake, was an actress. He was graduated at Transylvania University in 1845, studied law in Louisville, and began practice in Covington, Ky., and afterward in Cincinnati. About this time Mr. Fosdick gained some distinction as a poet by a drama entitled "Tecumseh." He travelled in Mexico in 1847–'9, and from 1851 till 1858 practised law in New York city. He then returned to Ohio, and edited in Cincinnati the "Sketch Club," an illustrated paper that was supported by the artists of that city. He published "Malmiztic the Toltec," a novel (Cincinnati, 1851), and "Ariel, and other Poems" (New York, 1855).

FOSS, Cyrus David, M. E. bishop, b. in Kingston, N. Y., 17 Jan., 1834. His father was an itinerant Methodist preacher of Huguenot extraction. The son was graduated at Wesleyan university in 1854, and for three years he was employed as an instructor in Amenia seminary, N. Y., the latter part of that time as its principal. He entered the travelling ministry in the New York conference in the spring of 1857, and was stationed at Chester, Orange co., N. Y., in 1857–'9. He was then transferred to New York east conference, and was for the next six years in the city of Brooklyn, and afterward in several churches in New York city, from 1865 till 1875. In the latter year he was elected president of Wesleyan university, and served in that office with marked ability and success till the general conference of May, 1880, when he was elected and ordained a bishop. His residence has since been at Minneapolis, Minn., but his episcopal duties have called him to travel through all parts of the country, and also to visit the foreign missions of his church in Europe and in India. Bishop Foss is recognized as a man of superior abilities, an able preacher, and an earnest and devout Christian. He was a member of the general conference in 1872, 1876, and 1880. He received the degree of D. D. from Wesleyan university in 1870, and that of LL. D. from Cornell college, Iowa, in 1879. He has contributed to current literature, and has published sermons and addresses, including "Songs in the Night," a Thanksgiving sermon, (New York, 1862), and his inaugural address as president of Wesleyan university (1876). — His brother, **William Jay,** clergyman, b. in Verbank, N. Y., 23 Nov., 1835; d. in Poughkeepsie, N. Y., 1 June, 1859, was graduated at Wesleyan university in 1856, and was a teacher in Amenia seminary, N. Y., in the same year. In 1857 he became a pastor of the Methodist Episcopal church in Portland, Conn., and a tutor in Wesleyan university. In 1858 he joined the New York conference, and was stationed at Lake Mahopac, N. Y., in 1859, and later in Poughkeepsie, that state.

C. D. Foss

FOSTER, Abiel, clergyman, b. in Andover, Mass., 8 Aug., 1735; d. in Canterbury, N. H., 6 Feb., 1806, was graduated at Harvard in 1756, studied theology, and was a pastor of the Congregational church in Canterbury, N. H., for eighteen years. After 1780 he was frequently in the New Hampshire legislature, was a delegate from that state to the Continental congress in 1783–'5, and in 1784 was appointed a judge of the court of common pleas for Rockingham county, of which he became chief justice. He was elected a representative in the 1st congress, and served from August, 1789, till March, 1791. He was a delegate to the State constitutional convention, and was president of the state senate in 1793–'4. He was then again elected to congress, and served from 1795 till 1803.

FOSTER, Asa Belknap, Canadian senator, b. in Dummerton, Vt., in 1817; d. in Montreal, Canada, 2 Nov., 1877. He was educated in Lower Canada, to which he removed in 1821, and settled in Frost Village. In 1841 he engaged in railroad construction in Massachusetts, Maine, and Vermont, and on his return to Canada in 1856 engaged in the same business there. He was elected a member to the Canada assembly from Shefford county, Lower Canada, in 1858, but resigned in 1860, and was returned to the legislative council for Bedford district. After the confederation he was called to the senate of the Dominion, but retired from it in 1875, when he received the contract for the Georgian Bay branch of the Canadian Pacific railway.

FOSTER, Benjamin, clergyman, b. in Danvers, Mass., 12 June, 1750; d. in New York city, 26 Aug., 1798. He was graduated at Yale in 1774, and ordained as a Baptist minister in Leicester, Mass., in October, 1776, remaining there till 1782. He subsequently held pastorates in Danvers and Newport, and from 1788 till his death was pastor of the 1st Baptist church in New York city. He was an accomplished scholar, particularly in the Greek, Hebrew, and the Chaldean languages, and was eminent as a preacher. During the prevalence of yellow fever in 1798 in New York city, he declined to leave his post, and while visiting the sick

was exposed to the pestilence, and died, after an illness of a few days, one month after his wife's death by the same malady. Brown gave him the degree of D. D. in 1792. He was the author of "The Divine Right of Immersion"; "Primitive Baptism Defined"; and "A Dissertation on the Seventy Weeks of Daniel" (Newport, 1787).

FOSTER, Charles James, journalist, b. in Bicester, England, 24 Nov., 1820; d. in Astoria, N. Y., 12 Sept., 1883. He came to the United States in 1847, resided in Boston for some years, then went to Cincinnati and Columbus, Ohio, and finally settled in New York city. He edited Woodruff's "Trotting Horse of America" in 1868, and again in 1875, also Bogardus's "Field, Cover, and Trap Shooting" in 1874. He wrote for "The Spirit of the Times," and in 1876 established the "New York Sportsman." He was considered to be the best-informed man in the country on the subject of racing. He was the author of the sketch of J. H. Hackett in his "Notes upon Shakespeare's Plays and Actors" (New York, 1863).

FOSTER, Ellen Horton, temperance advocate, b. in Lowell, Mass., 3 Nov., 1840. She is a daughter of Jotham Horton, was educated at Lima, N. Y., removed to Clinton, Ia., and in 1869 married E. C. Foster. She studied law, and was admitted to practice in 1874, and argued a case in the supreme court in 1875. Since 1875 she has been a successful leader in the temperance cause, and has lectured in almost every State and territory of the Union, and has also been counsel for the Woman's Christian temperance union of the United States. She is the author of various pamphlets and magazine articles on the subject of temperance.

FOSTER, Ephraim H., senator, b. about 1795; d. in Nashville, Tenn., 4 Sept., 1854. He studied law, was admitted to the bar, and practised in Nashville. In 1829 he was speaker of the Tennessee house of representatives. He was elected to the U. S. senate in 1837 as a Whig, but resigned in 1839 because he would not obey the instructions of the legislature. In 1843 he was re-elected. On his return to Nashville in 1845 he was the Whig candidate for governor, but was defeated.

FOSTER, George Eulas, Canadian statesman, b. in Wakefield, Carleton co., New Brunswick, 3 Sept., 1847. He was graduated at the University of New Brunswick in June, 1868, and in 1872–'3 studied at the universities of Edinburgh and Heidelberg. He then taught school for several years, was principal of the Ladies' high school, Fredericton, New Brunswick, and held the professorship of classics and history in the University of New Brunswick from 1872 till January, 1879, when he resigned. He has been a leader in temperance agitation both in Canada and the United States, and is president of the International temperance association. He was elected to the Dominion parliament in 1879, resigned, and was re-elected in 1882, and in December, 1885, became minister of marine and fisheries. He is a Liberal-Conservative, and favors a civil-service system conforming, as far as possible, to that of Great Britain. He is the author of the "Prohibitionist's Hand-Book" (1880), and has also published various speeches.

FOSTER, Hannah, author, b. in 1759; d. in Montreal, Canada, in 1840. She was a daughter of Grant Webster, of Boston, and married John Foster, a minister in Brighton, Mass., from 1784 till 1827. Mrs. Foster published "The Coquette, or the History of Eliza Wharton," founded on fact (2d ed., with a preface by Mrs. Jane E. Locke, 1855); "The Boarding-School" (1796); and "Lessons of a Preceptress" (1798).

FOSTER, Henry, English navigator, b. in Woodplumpton, Lancashire, in 1797; drowned in Chagres river, Isthmus of Panama, 5 Feb., 1831. He entered the royal marines at an early age, and after the peace of 1815 devoted his time chiefly to astronomical studies. The gold medal of the Royal society of Great Britain was presented to him in recognition of his services in the Arctic expedition of Capt. Ross, 1818–'19. Subsequently the English government was requested by the Royal society to send out an expedition for the purpose of ascertaining the exact formation and outline of coasts and the direction of the principal ocean currents, these results to be obtained by a series of observations taken in both hemispheres, and Foster was chosen as commander. The corvette "Chanticleer" was fitted out at Portsmouth. A crew of hardy, resolute seamen and a company of distinguished scientists, among whom was Surg. W. H. B. Webster, composed the expedition. Foster set sail 27 April, 1828, and touched at the islands of Madeira, Teneriffe, St. Anthony, and San Fernando de Naronha. He called afterward at Rio de Janeiro, where he remained a month, taking geodesic notes and observations. Thence he went to Santa Catalina, Montevideo, and Staten Land. Having rounded Cape Horn, he bore to the south, and on 5 Jan., 1829, entered the straits of Brownfield and recognized the archipelago of New Shetland. After taking notes of the position of the islands named Livingston, Cornwallis, King George, Robert, and Deception, and analyzing the volcanic substances of their formation, he touched at Trinity island, which he christened and of which he took possession in the name of England, ignoring the fact of its previous discovery by Spanish and Portuguese navigators, and determining its exact position. He remained for two months on these coasts, busied with astronomical and geodesic observations, and returned, on 2 March, to Cape Horn, where he met his fellow-countryman, Capt. King, with two vessels, engaged in exploring the coasts. He afterward visited St. Helena, Ascension island, Fernando de Narouha, Maranhao, Para, the Gulf of Paria, Trinidad, Cuba, Porto Rico, La Guayra, and Porto Bello. He made several excursions on the Isthmus of Panama, and then sailed for Colon, which he reached on 5 Feb. Immediately on landing, he took a canoe and went up Chagres river with a view to exploring its course. His foot slipped on the edge of a tent that shaded his companions, and he fell overboard and was drowned. He was buried on the shore, where the English government has erected in his honor a superb mausoleum. The thorough knowledge he acquired of northern latitudes on his arctic expedition was of incalculable value in enabling him to correct numerous errors in the computation of southern latitudes. He was the first European that explored and obtained exact data on the formation of the islands south of Cape Horn. The result of many of his observations was lost to science in consequence of his untimely death. Surgeon Webster, authorized by the English government, published Foster's journal of the expedition, completed from his own notes after his death, "Relation of a Journey through the South Atlantic, made upon the Royal Corvette 'Chanticleer' during the years 1828–'31" (2 vols., 8vo, with maps and illustrations, London, 1834). This work is one of the most complete of those that treat on southern latitudes, and is supplemented by an article on the natural history and chemistry of the regions that Foster had explored. The book was translated into French by A. de Lacaze (1849).

FOSTER, Henry Allen, senator, b. in Hartford, Conn., 7 May, 1800. He removed to Cazenovia, N. Y., in early life, and, after receiving a common school education, entered the law office of David B. Johnson, and was admitted to the bar in 1822. He was a member of the state senate from 1831 till 1834, and again from 1841 till 1844. He was a representative in congress from 1837 till 1839, having been elected as a Democrat, and in 1844 was appointed United States senator in place of Silas Wright, Jr., serving till 1847. From 1863 till 1869 he held the office of judge of the fifth district of the supreme court. He has resided for many years in Rome, N. Y.

FOSTER, Isaac, physician, b. in Charlestown, Mass., about 1740; d. in February, 1781. He was graduated at Harvard in 1758, studied medicine in this country and abroad, and settled in Charlestown, where he practised for several years. He was a delegate to the convention of the county of Middlesex in August, 1774, and to the first provincial congress of Massachusetts in October of that year. Dr. Foster was appointed a surgeon in 1775, and was for some months at the head of the military medical department, while Gen. Ward commanded at Cambridge, and before the arrival of Gen. Washington. On 20 April, the day after the battle of Concord, by urgent request of Gen. Ward and Dr. Warren, he attended the men who had been wounded, and gave up his private practice, which was very large. On 18 June, the day after the battle of Bunker Hill, he was appointed by the committee of safety to attend those who had been wounded there, and was afterward given the post of surgeon of the state hospital, then just opened. In October he was appointed by Gen. Washington director-general *pro tempore* of the American hospital department. Congress shortly afterward appointed Dr. Morgan to that place, but Dr. Foster was still the oldest surgeon in the hospital. Again, in 1777, Gen. Washington appointed him to take charge of the hospitals in the eastern department. He retired from public life in 1780, being in feeble health, but did not resign his commission. Several men eminent in the medical profession studied with Dr. Foster, among them William Eustis and Josiah Bartlett, the younger.

FOSTER, James P., naval officer, b. in Bullitt county, Ky., 8 June, 1827; d. in Indianapolis, Ind., 2 June, 1869. He removed with his family, in childhood, to Bloomington, Ind., and entered the navy in 1846. He had reached the rank of lieutenant in 1861, and in July, 1862, was commissioned a lieutenant-commander, and in October of the same year was ordered to the Mississippi squadron, commanded by Admiral Porter. He was placed in command of the "Neosho," from which he was soon transferred to the iron-clad ram "Chillicothe," and in March, 1863, distinguished himself by the valuable service performed by his vessel during the Yazoo expedition. Later in the year he was placed in command of the gun-boat "Lafayette," and rendered valuable assistance during the bombardment and siege of Vicksburg. After the war he was ordered to the naval academy, and placed in charge of the training-ships. He was then promoted to commander, ordered to the "Osceola," and joined the Brazilian squadron, where he contracted the disease from which he died.

FOSTER, Jedediah, jurist, b. in Andover, Mass., 10 Oct., 1726; d. in Brookfield, Mass., 17 Oct., 1779. He was graduated at Harvard in 1744, studied law, and practised at Brookfield. He was a member of the Worcester county convention in August, 1774, and a delegate to the provincial congress in the same year. At this time he was elected one of the executive council by the house of representatives, and with several others he was negatived by Gov. Gage, but re-elected in 1775. He was an active and useful representative, and served on most of the committees of each provincial congress. In 1775 he was appointed in conjunction with others to visit Lake Champlain and vicinity as an investigating agent. In 1776 he was appointed a judge of the superior court, was for some time a judge of probate and a justice of the court of common pleas in Worcester county, and a member of the convention that framed the constitution of Massachusetts.—His son, **Theodore,** lawyer, b. in Brookfield, Mass., 29 April, 1752; d. in Providence, R. I., 13 Jan., 1828, was graduated at Brown in 1770, studied law, was admitted to the bar, and began practice in Providence, R. I. For several years, as one of the overseers of Brown, he was among its most active friends. He was a member of the state house of representatives in 1776–'82, was town clerk of Providence for many years, and was appointed judge of the court of admiralty in May, 1785. He was elected U. S. senator from Rhode Island in 1790, and was twice re-elected, his term of service expiring in 1803. He was again a member of the legislature from 1812 till 1816, from the town of Foster, which bore his name. He was an antiquarian student, and collected the materials for a "History of Rhode Island," but never completed it. Dartmouth gave him the degree of A. M. in 1786.—Another son, **Dwight,** jurist, b. in Brookfield, Mass., 7 Dec., 1757; d. there, 29 April, 1823, was graduated at Brown in 1774, studied law with his brother Theodore in Providence, and afterward in Northampton, Mass. He was admitted to the bar in 1778, in Providence, and was commissioned a justice of the peace there in 1779. On his father's death in that year he removed to Brookfield, and, although only twenty-two years of age, was at once chosen to fill the former's place in the constitutional convention. He was made justice of the peace for the county of Worcester in 1781, and in 1792 was made special justice of the court of common pleas. In June of the same year he was appointed high sheriff of the county. He served in each branch of the Massachusetts legislature, and in 1793–'9 was a representative in congress, having been chosen as a Federalist. He was a delegate to the State constitutional convention in 1799, and in the same year was elected to the U. S. senate in place of Samuel Dexter, resigned, serving from 1800 till 1803, when he resigned. He was chief justice of the court of common pleas for Worcester county, from 1801 till 1811, and in 1818 a member of the Massachusetts executive council. Judge Foster also held other offices of public trust, but his last years were spent in retirement. Harvard conferred on him the degree of A. M. in 1784.

FOSTER, John Gray, soldier, b. in Whitefield, N. H., 27 May, 1823; d. in Nashua, N. H, 2 Sept., 1874. He was graduated at the U. S. military academy in 1846, assigned to the engineer corps, and served in the Mexican war under Gen. Scott, being engaged at Vera Cruz, Cerro Gordo, Contreras, Churubusco, and Molino del Rey, where he was severely wounded. He received the brevets of 1st lieutenant and captain for gallantry. He was assistant engineer in Maryland in 1848–'52, and on coast-survey duty in Washington, D. C., in 1852–'4, and after promotion to a 1st lieutenancy acted as assistant professor of engineering at West Point in 1855–'7. At the beginning of the civil war he was stationed at Charleston, S. C., and safely removed the garrison of Fort Moultrie to Fort Sumter dur-

ing the night of 26–27 Dec., 1860. He was brevetted major for the distinguished part he took in this transfer, and was one of the defenders of the fort during its subsequent bombardment. He was made brigadier-general of volunteers, 23 Oct., 1861, commanded a brigade in Burnside's North Carolina expedition, and received the brevet of lieutenant-colonel for his services at Roanoke island. While in command of the Department of North Carolina, with the rank of major-general of volunteers, in 1862–'3, he conducted several important expeditions. He had charge of the combined departments of Virginia and North Carolina from July till November, 1863, and afterward of the army and department of the Ohio, which he relinquished in December, 1864, on account of severe injuries from the fall of his horse. After the termination of his sick leave he commanded the Department of the South, co-operating efficiently with Gen. Sherman, and preparing to assist in the reduction of Charleston under Sherman's orders, when suffering caused by his old wound obliged him to transfer the command to Gen. Quincy A. Gillmore. In 1865 he was brevetted brigadier-general in the regular army for gallant services in the capture of Savannah, Ga., and major-general for services in the field during the rebellion. He was in command of the Department of Florida in 1865–'6, and on temporary duty in the engineer bureau of Washington in 1867. He afterward served as superintending engineer of various river and harbor improvements. His submarine engineering operations in Boston and Portsmouth harbors were conducted with great ability and were eminently successful. He contributed articles to periodical literature on engineering topics, and published "Submarine Blasting in Boston Harbor" (New York, 1869).

FOSTER, Jacob Post Giraud, lawyer, b. in New York city, 8 April, 1827; d. there, 26 Feb., 1886. He was graduated with the first honors at Columbia in 1844, studied law in Harvard law-school, and was admitted to the bar in 1848. He practised in New York city, and gained a high reputation, especially as an insurance lawyer.

FOSTER, John Watson, diplomatist, b. in Pike county, Ind., 2 March, 1836. He was graduated at the Indiana state university in 1855, and, after one year at Harvard law-school, was admitted to the bar and began practice in Evansville. He entered the National service in 1861 as major of the 25th Indiana infantry. After the capture of Fort Donelson he was promoted to lieutenant-colonel, and subsequently was made colonel of the 65th Indiana mounted infantry. Later he was appointed colonel of the 136th Indiana regiment. During his entire service he was connected with the western armies of Grant and Sherman. He was commander of the advance brigade of cavalry in Burnside's expedition to East Tennessee, and was the first to occupy Knoxville in 1863. After the war he became editor of the Evansville "Daily Journal," and in 1869 was appointed postmaster of that city. He was sent as U. S. minister to Mexico by President Grant in 1873, and reappointed by President Hayes in 1880. In March of that year he was transferred to Russia, and held that mission until November, 1881, when he resigned to attend to private business. On his return to this country, Col. Foster established himself in practice in international cases in Washington, D. C., acting as counsel for foreign legations before courts of commissions, in arbitrations, etc. President Arthur appointed him minister to Spain, and he served from February, 1883, till March, 1885, when he resigned and returned to the United States, having negotiated an important commercial treaty with the Spanish government. This treaty elicited general discussion and was strongly opposed in the senate. That body failed to confirm it, and it was afterward withdrawn by President Cleveland for reconsideration. Some weeks later Gen. Foster was instructed to return to Spain to reopen negotiations for a modified treaty. This mission, however, was unsuccessful, and Mr. Foster remained abroad but a few months.

FOSTER, John Wells, geologist, b. in Brimfield, Mass., 4 March, 1815; d. in Chicago, Ill., 29 June, 1873. He left the Wesleyan university in 1834, having completed the scientific course, and, removing to Zanesville, Ohio, was admitted to the bar in 1835. His scientific studies were continued in moments of leisure from his legal practice. In 1837 he became an assistant in the geological survey of Ohio, and made a very thorough report on the great central coal-bed of Ohio, with a detailed section of the carboniferous limestone near Columbus as far as the uppermost bed of coal near Wheeling. He was occupied with this work until 1844, when he returned to Massachusetts and followed civil engineering, meanwhile giving attention to the study of metallurgy and geology. In 1845 he was sent to the Lake Superior region, in the interests of several mining companies, and examined the copper deposits then recently discovered. Two years later, with Josiah D. Whitney, he was appointed by the U. S. government to assist Charles T. Jackson in a geological survey of the Lake Superior region, and in 1849 the completion of the work was intrusted to them. The results were published, by direction of congress, as a "Report on the Geology and Topography of a Portion of Lake Superior Land District in the State of Michigan; Part I., Copper Lands" (Washington, 1850), and Part II., "The Iron Region, together with the General Geology" (1852). These reports first clearly established the richness and variety of the mineral resources of that region, and still remain an authority. Subsequently Mr. Foster returned to Massachusetts, and became one of the organizers of the "Native American" movement; but in 1855, as he differed with them on the slavery question, he withdrew with Henry Wilson, and was active in the formation of the Republican party. In 1855 he was a candidate for congress from the Springfield district, but was defeated by a small majority. Three years later he removed to Chicago, and for some time was land commissioner for the Illinois Central railway. He spent much time in studying the mounds and other evidences of ancient races in the Mississippi valley. Mr. Foster was a member of numerous scientific societies, and for some time president of the Chicago academy of sciences. In 1869 he was president of the American association for the advancement of science, and the subject of his presidential address was "Recent Advances in Geology." He contributed papers to scientific journals, and published monographs on American ethnology and antiquities, and also "The Mississippi Valley, its Physical Geography, including Sketches of the Topography, Botany, Climate, Geology, and Mineral Resources; and of the Progress of Development in Population and Material Wealth" (Chicago and London, 1869); "Mineral Wealth and Railroad Development" (New York, 1872); and "Prehistoric Races of the United States" (Chicago, 1873).

FOSTER, Lafayette Sabine, statesman, b. in Franklin, Conn., 22 Nov., 1806; d. in Norwich, Conn., 19 Sept., 1880. His father, Capt. Daniel, was an officer of the Revolution, who was descended

on his mother's side from Miles Standish, and served with distinction at the battles of White Plains, Stillwater, and Saratoga. The son earned the means for his education by teaching, was graduated with the first honors at Brown in 1828, studied law, and was admitted to the bar at Centreville, Md., while conducting an academy there in 1830. He returned to Connecticut, completed his legal studies in the office of Calvin Goddard, who had been his first preceptor, was admitted to the Connecticut bar in November, 1831, and opened an office in Hampton in 1833, but in 1834 settled at Norwich. He took an active interest in politics from the outset of his professional life, was the editor of the Norwich "Republican," a Whig journal, in 1835, and in 1839 and 1840 was elected to the legislature. He was again elected in 1846 and the two succeeding years, and was chosen speaker. In 1851 he received the degree of LL. D. from Brown university. In 1851–'2 he was mayor of Norwich. He was twice defeated as the Whig candidate for governor, and in 1854 was again sent to the assembly, chosen speaker, and elected to the U. S. senate on 19 May, 1854, by the votes of the Whigs and Free-soilers. Though opposed by conviction to slavery, he resisted the efforts to form a Free-soil party until the passage of the Kansas-Nebraska bill. He delivered a notable speech in the senate on 25 June, 1856, against the repeal of the Missouri compromise, and opposed the Lecompton constitution for Kansas in 1858. He was a member of the Republican party from its organization in 1856, and in 1860 was again elected to the senate. In December, 1860, he spoke in approval of the Powell resolution to inquire into the distracted state of the country, though he was one of the few who at that time believed that the southern leaders would force a disruption of the Union, and was in favor of resisting the extension of slavery beyond the limits recognized in the constitution, even at the cost of civil war. Mr. Foster was intimately connected with the administration, and was often a spokesman of Mr. Lincoln's views. On 11 March, 1861, he moved the expulsion of Senator Lewis T. Wigfall, of Texas. In 1863 he advocated an appropriation for the gradual manumission of slaves in Missouri. In 1864, on the question of the repeal of the fugitive slave act, he spoke in favor of preserving the earlier law of 1793, and thereby incurred the reproaches of the radical members of his party. He also opposed the bill granting the voting franchise to colored citizens of the District of Columbia without an educational qualification. He served on the committees on Indian affairs and land claims, and was chairman of the committee on pensions, and during the civil war of that on foreign relations. In 1865 he was chosen president of the senate *pro tempore*. After Andrew Johnson became president, Mr. Foster was acting vice-president of the United States. During the subsequent recess he travelled on the plains as member of a special commission to investigate the condition of the Indians. His senatorial term of office expired in March, 1867, and he was succeeded by Benjamin F. Wade in the office of vice-president. On account of his moderate and conservative course in the senate his re-election was opposed by a majority of the Republicans in the Connecticut legislature, and he withdrew his name, though he was urged to stand as an independent candidate, and was assured of the support of the Democrats. He declined the professorship of law at Yale in 1869, but after his retirement from the bench in 1876 delivered a course of lectures on "Parliamentary Law and Methods of Legislation." In 1870 he again represented the town of Norwich in the assembly, and was chosen speaker. He resigned in June of that year in order to take his seat on the bench of the supreme court, having been elected by a nearly unanimous vote of both branches of the legislature. His most noteworthy opinion was that in the case of Kirtland against Hotchkiss, in which he differed from the decision of the majority of the court (afterward confirmed by the U. S. supreme court) in holding that railroad bonds could not be taxed by the state of Connecticut when the property mortgaged was situated in Illinois. In 1872 he joined the Liberal Republicans and supported Horace Greeley as a candidate for the presidency. In 1874 he was defeated as a Democratic candidate for congress. He was a judge of the Connecticut superior court from 1870 till 1876, when he was retired, having reached the age of seventy years, and resumed the practice of law. In 1878–'9 he was a commissioner from Connecticut to settle the disputed boundary question with New York, and afterward one of the three commissioners to negotiate with the New York authorities for the purchase of Fisher's Island. He was also a member of the commission appointed in 1878 to devise simpler rules and forms of legal procedure for the state courts. By his will he endowed a professorship of English law at Yale, bequeathed his library to the town of Norwich, and gave his home for the free academy there. See "Memorial Sketch" (printed privately, Boston, 1881).

L. F. S. Foster

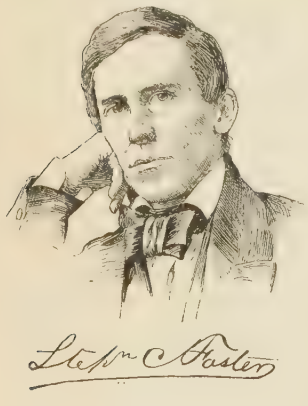
FOSTER, Randolph Sinks, clergyman, b. in Williamsburg, Ohio, 22 Feb., 1820. He was educated at Augusta college, Ky., and in 1837 entered the itinerant ministry of the Methodist Episcopal church in the Kentucky conference, was transferred soon afterward to the Ohio conference, and in 1850 to New York. From 1837 till 1850 he was pastor of churches in Hillsboro, Portsmouth, Lancaster, Springfield, and Cincinnati, and from 1850 till 1857 in New York and Brooklyn. In 1856 he was elected president of the Northwestern university, Evanston, Ill.; but three years later he resumed the pastorate, and was stationed in New York and Sing Sing. The general conference of 1868 appointed him delegate to the British Wesleyan conference, and in the same year he was elected professor of systematic theology in Drew theological seminary, Madison, N. J. In 1870 he was appointed president of this institution, retaining the chair of theology. He was a delegate to the general conferences of 1864, 1868, and 1872. In May, 1872, he was elected bishop of the M. E. church, and soon afterward was chosen to make episcopal visitations in Norway, Sweden, Denmark, Germany, Switzerland, Italy, India, and South America. He subsequently resided in Cincinnati, Ohio, and in Boston, Mass. He has published "Objections to Calvinism as it is," a polemical work, which grew out of a controversy (Cincinnati, 1849); "Christian Purity" (New York, 1851; revised ed.,

1869); "Ministry for the Times" (1852); and "Theism," in the "Ingham Lectures" (1872). He is also the author of "Beyond the Grave," in which he discusses with force and freedom profound questions in Christian eschatology (1879); "Centenary Thoughts for the Pulpit and the Pew of Methodism" (1884); and "Studies in Theology" (1886).

FOSTER, Robert Sandford, soldier, b. in Vernon, Jennings co., Ind., 27 Jan., 1834. He was educated at the Vernon common-school. During the civil war he fought with Indiana troops, and was made brigadier-general of volunteers on 12 June, 1863. He was brevetted major-general of volunteers on 13 March, 1865, resigning on 25 Sept., and being appointed lieutenant-colonel of the 27th regular infantry, but declined. Since the war he has resided in Indianapolis, was its treasurer from 1867 till 1872. He was U. S. marshal for the district of Indiana from 1881 till 1885.

FOSTER, Stephen, educator, b. in Andover, Mass., 15 Feb., 1798; d. in Knoxville, Tenn., 11 Jan., 1835. He was graduated at Dartmouth in 1821, and at Andover seminary in 1824, was ordained at Boxford, Mass., on 30 Sept., 1824, went as a teacher to Virginia, and after remaining two years near Estillville, Scott co., was chosen professor of Latin and Greek in Greenville college, Tenn. In 1827 he took the same chair in East Tennessee college (now the University of Tennessee), at Knoxville, and became president of the college in 1834.

FOSTER, Stephen Collins, song-composer, b. in Pittsburg, Pa., 4 July, 1826; d. in New York city, 13 Jan., 1864. At the age of thirteen he was sent to school in Towanda, Pa., and afterward to Athens, Pa. At fifteen he entered Jefferson college at Cannonsburg, Pa., but soon returned to his native place to pursue his favorite studies with private tutors. Possessing a natural fondness for music, he learned, unaided, to play on the flageolet, and thrummed the guitar and banjo as an accompaniment to ditties of his own composition. But he soon realized the limitations of musical self-instruction, and thereafter devoted several years of study to the voice and to piano-forte music. In 1842, when he was a merchant's clerk in Cincinnati, Ohio, his first song, "Open thy Lattice, Love," appeared in Baltimore, Md. Two others, "Uncle Ned" and "O Susannah!" were immediately taken up by travelling negro minstrels, and became universally popular. This success fixed Foster's destiny; he relinquished his career in business and devoted himself entirely to musical composition. In 1850 Foster married and removed to New York city, but the couple soon tired of their new home and returned to Pittsburg. About this time he composed his "Old Folks at Home." For the privilege of singing it in public, Christy's minstrels paid him $500. In 1861 appeared "Old Black Joe," the last of his negro melodies; thereafter he confined himself to the composition of sentimental ballads. In 1860 Foster, with his wife and child, returned to New York city, where the family remained until he died. He wrote in succession about 125 pieces, one fourth of which were negro ditties, and the others home ballads. So popular did many become, both here and abroad, that they were introduced at concerts by the most eminent vocalists, and rendered into foreign languages. Of "O Susannah!" "Nelly was a Lady," "Uncle Ned," "Nelly Bly," "Old Dog Tray," "Old Kentucky Home," "Willie, we have missed You," and "Old Folks at Home," hundreds of thousands of copies were printed. The last-named was by far the most profitable piece ever published in this country. Foster wrote both the words and music of all his pieces. His method of composition was to jot down the melody as it came to him, and thereafter invent suitable words. He adhered to simple chords for accompaniments, and kept the airs within the range of ordinary voices. The subjects appeal to home life and popular taste, and the versification is smooth and musical. His negro ditties are characterized by archness, humor, and unusual refinement. In some of his compositions, notably so in the beautiful serenade "Come where my Love lies Dreaming," Foster rises to a higher plane than that of a writer of ditties, and commands the admiration of scientific musicians. He was a man of culture, familiar with the French and German languages, and a respectable artist in water-colors.



FOSTER, Stephen Symonds, abolitionist, b. in Canterbury, N. H., 17 Nov., 1809; d. near Worcester, Mass., 8 Sept., 1881. He learned the carpenter's trade, then studied with the intention of becoming a minister, was graduated at Dartmouth in 1838, and studied theology in the Union theological seminary, New York; but, because he was precluded from advocating abolition in the pulpit, he deserted that profession in order to engage in the anti-slavery contest. He was an earnest orator, a master of denunciation and invective, and was frequently the victim of mob violence. He is described in one of Lowell's anti-slavery poems as

> "A kind of maddened John the Baptist,
> To whom the harshest word comes aptest,
> Who, struck by stone or brick ill starred,
> Hurls back an epithet as hard,
> Which, deadlier than stone or brick,
> Has a propensity to stick."

While in the theological seminary he induced some of his classmates to join with him in a meeting to protest against the warlike preparations then going on, arising from the dispute with Great Britain over the northeastern boundary. The refusal of the faculty to allow the chapel to be used for such a meeting made him dissatisfied with the churches because they countenanced war, and when he became an anti-slavery agitator of the moral-force school, instead of a Congregational minister, he directed his attacks chiefly against the church and the clergy, because they upheld slavery. Since the people of the New England towns could not be induced to attend anti-slavery lectures, he was accustomed to attend church meetings and claim there a hearing for the enslaved, and was often expelled by force, and several times imprisoned for disturbing public worship. Other abolitionists adopted the same plan of agitation, which was very effective. He lived for many years on a farm in the suburbs of Worcester. He published articles in periodicals on the slavery question, and in 1843 a pamphlet entitled "The Brotherhood of Thieves, a True Picture of the American Church and Clergy," in the form of a letter to Nathaniel Barney, a reprint of which was issued by Parker Pillsbury

(Concord, 1886).—His wife, **Abby Kelley**, reformer, b. in Pelham, Mass., 15 Jan., 1811; d. in Worcester, Mass., 14 Jan., 1887. Her parents, who were descendants of Irish Quakers, removed to Worcester while she was an infant. Her education was finished at the Friends' school in Providence, R. I., after which she taught for several years in Worcester and Millbury, and in a Friends' school in Lynn, Mass. She resigned her post about 1837, and began lecturing as an anti-slavery advocate, being the first woman to address mixed audiences in favor of abolition. Though sincere in her convictions and womanly in her delivery, she suffered many indignities in Connecticut during her lectures. While speaking in Pennsylvania, she met Stephen S. Foster, whom she married in New Brighton, Pa., 21 Dec., 1845. The two continued their public addresses, and on one tour in Ohio Mrs. Foster spoke every day for six weeks. They settled on a farm near Worcester, which was their home up to the time of Mr. Foster's death. About 1850 Mrs. Foster began to be actively interested in the cause of woman suffrage, making many speeches in its advocacy, and that of prohibition. She took an extreme view of these questions, and in argument was pronounced and aggressive. Alike in their belief regarding woman suffrage and their protests against taxation without representation, both Mr. and Mrs. Foster refused to pay taxes on their home estate because the wife was not permitted to vote, and this resolution was followed by the sale of the home for two consecutive years, but it was bought in by friends, and finally redeemed by Mr. Foster. Mrs. Foster's last public work was an effort made to raise funds to defray the expenses of securing the adoption of the 15th amendment in the doubtful states. In June, 1886, she attended an anti-slavery reception in Boston. The day preceding her fatal illness she finished a sketch of her husband for this work. Personally Mrs. Foster was amiable and unassuming, but never lacked the courage to proclaim and defend her advanced opinions. James Russell Lowell pays this tribute to Mrs. Foster:

> "A Judith there, turned Quakeress,
> Sits Abby in her modest dress.
> No nobler gift of heart or brain.
> No life more white from spot or stain,
> Was e'er on freedom's altar lain
> Than hers—the simple Quaker maid."

FOSTER, Thomas Flournoy, lawyer, b. in Greensborough, Ga., 23 Nov., 1790; d. in Columbus, Ga., in 1847. He was graduated at Franklin college in 1812, attended law lectures in Litchfield, Conn., was admitted to the bar in 1816, and practised in Greensborough. He was for many years a member of the Georgia legislature. In 1828 he was elected a representative in congress, and was twice re-elected. In 1835 he removed to Columbus, and in 1841 was again sent to congress, and served out his term. He delivered a notable speech in defence of state rights, in answer to a memorial for the release of the missionaries Worcester and Butler, who were imprisoned under a judgment of the state courts, and still held in custody, although the supreme court of the United States had reversed the decision. This speech was published (Washington, 1832). He took a prominent part in the controversy over the removal of the deposits from the U. S. bank, and in other questions before congress.

FOSTER, William Sewell, soldier, b. in New Hampshire; d. in Baton Rouge, La., 26 Nov., 1839. He was appointed a lieutenant of infantry on 12 March, 1812, became a captain a year later, and was brevetted major for gallantry in the defence of Fort Erie. He was promoted major on 7 July, 1826, and lieutenant-colonel on 8 June, 1836. On 25 Dec., 1837, he received the brevet of colonel for distinguished service in Florida, particularly in the battle of Okechobee.

FOUCHER, Jean, explorer, b. in Cambrai, Flanders, in 1508; d. in Entre Rios, Uruguay, in 1567. He was in the expedition that accompanied Sebastian Cabot when that navigator, after going up the Parana river, discovered the Paraguay. He fixed his abode at the mouth of the Rio de la Plata, where he earned a hard living as a pilot for several years, but returned to his native country in 1529. He intended settling at Cambrai, and was studying for the bar, when he learned that the Spanish government intended colonizing the banks of the Paraguay. He immediately went to Spain and offered his services to the chief of the expedition, Don Pedro de Mendoza, who engaged him as pilot to guide his fleet up the La Plata. The expedition, which left Seville 24 Aug., 1534, comprised 14 ships, carrying 2,500 Spaniards of both sexes and of all ages, 150 Flemish, and 76 horses. Don Pedro de Mendoza landed 7 Nov. at the mouth of the Rio de la Plata, and set to work forthwith to build the city of Santa Maria de Buenos Ayres. Foucher, who had acquitted himself with zeal of his duties as pilot, received as a reward the mission of exploring the interior of the country. He set out, 14 June, 1538, across the country of the Guaranis, where he built a fort. He afterward crossed the countries of the Samococes and the Sibococes —warlike Indians, who disputed his passage step by step—and penetrated as far as the Cordilleras of Peru. He surprised and defeated the Payaguas Indians in November, 1538, destroyed their villages, gathered the bones of Ayolas and his companions who had been massacred there nine months previously, and gave them decent burial. Foucher returned to La Plata in the spring of 1539, and was chosen aide-de-camp by the governor, Don Alvaro Nuñez Cabeza de Vaca, in 1548. Foucher, who had all the qualities for a successful colonizer, and thoroughly understood the Indian nature, decided that they would be easily won over by kindness, and would make useful auxiliaries. He succeeded in imparting his views to the governor, who thenceforward treated them with great humanity, and defended them from the exactions of the other Spanish captains. This caused discontent among the latter. A conspiracy was formed, and Don Alvaro and Foucher were arrested by their own officers, judged, deposed, and sent back to Spain in 1544. The council of the Indies took cognizance of the affair, and Don Sandoval, the president, after hearing Foucher, acquitted him, gave him an indemnity, and empowered him to return to Paraguay, which he did in 1545. The governor, Don Domingo Martinez de Irala, received him favorably, and employed him in explorations. Foucher reduced several Indian tribes to subjection, and established them in the territory of Entre Rios, of which he had been made governor in 1546. The popular affection for him is evident from the Indian songs that have been collected and preserved since his death.

FOURNIER, Telesphore, Canadian jurist, b. in St. Francois, Rivière du Sud, Montmagne, Quebec, in 1823. He was educated at Nicolet college, and called to the bar of Lower Canada in 1846. He was appointed queen's counsel in 1863, has been "batonnier" of the Quebec bar, and president of the general council of the bar of the province of Quebec. He was elected to the Canadian parliament for the county of Bellechasse in August, 1870, and represented this constituency till his elevation

to the bench. He became minister of inland revenue in November, 1873, and retained this portfolio till July, 1874, when he was appointed minister of justice, which place he held until transferred to the post-office department in May, 1875. While he was minister of justice he introduced and carried through parliament the supreme court act and the insolvency act in 1875. He also held a seat in the Quebec assembly, and represented Montmagne in it from general election in 1871 until November, 1873, when he resigned. In October, 1875, he was appointed puisne judge of the supreme court of Canada, an office that he now (1887) holds.

FOUVILLE, Jean Baptiste, French naturalist, b. in Hambye, Manche, 15 Feb., 1794; d. in Brazil in 1837. He inherited a fortune, and in 1820 set out on extensive travels, visiting Europe, Brazil, Paraguay, Chili, Persia, and India. On his return to Paris he published "Voyages autour du monde" (1825); "A travers l'Amérique du Sud" (1825); and "Du Brésil à Santiago, avec cartes" (2 vols., 1826); and was elected a member of the Geographical society. He sailed in May, 1826, on board the "Jules" for Buenos Ayres. The ship arrived on 29 Oct. at La Plata, then blockaded by the Brazilians, and in trying to run the blockade was captured. Fouville on his former visit had been the guest of the Brazilian admiral, and the rigors of war were now relaxed in his behalf. After a short stay at Montevideo as a prisoner he was liberated, and set out for Buenos Ayres, where he arrived 25 Dec., 1826. He was successful in several commercial operations, and left for Rio Janeiro, 12 Aug., 1827, immediately after his marriage with Miss Alice Laboissiere. After making a large collection of Brazilian plants, he sailed, 15 Oct., for Farnce, where he presented it to the Paris museum of national history, and published "Explications de l'herbier des plantes Brésiliennes de J. B. Fouville" (Paris, 1829). The Geographical society invited him to take charge of an expedition to the Congo, and he passed two years exploring the interior of Africa, his wife dying during his stay. On his return to Paris in May, 1831, he published the result of his explorations, "Voyages au Congo et dans l'Afrique equinoxial" (4 vols., 1831). Fouville sailed again for Brazil in March, 1833, penetrated into the interior, and spent four years exploring the lands watered by the Amazon. He was killed by negroes whose cupidity was aroused by his baggage, and his body thrown into the Amazon in June, 1837. His last manuscripts, after many vicissitudes, fell into the hands of the traveller S. Rany, who sent them to Ferdinand Denis, who published them: "Histoire des nations Indiennes de l'Amazone" (1862); "Flore du Brésil" (1862); "Voyages au Brésil" (1863); and "Moeurs et coutumes des Indiens de l'Amérique du Sud" (1863).

FOWLE, Daniel, printer, b. in Charlestown, Mass., about 1715; d. in Portsmouth, N. H., in June, 1787. He was an apprentice with Samuel Kneeland, and began business for himself in Boston in 1740. From 1742 to 1750 he was a partner with Gamaliel Rogers, and in 1748–'50 joint publisher with him of the "Independent Advertiser." In 1743–'6 they published the "American Magazine." They were the first in America to print the New Testament. In 1755 he was arrested, by order of the Massachusetts house of representatives, on suspicion of having printed a pamphlet entitled "The Monster of Monsters," severely animadverting on some members of the house. He was released in a few days, but left Boston in disgust, went to Portsmouth, N. H., and on 7 Oct., 1756, began the publication of the "New Hampshire Gazette."—His nephew, **Robert,** editor, was a partner with his uncle in the publication of the "New Hampshire Gazette," which was the only newspaper in New Hampshire at the beginning of the Revolution. As Daniel was a Whig and his nephew a loyalist, the partnership was terminated, and Robert established himself as a printer at Exeter. The paper currency of the period was printed in his office, and, as it was counterfeited soon afterward, suspicion rested on him as a participant in the crime, and he fled to the British lines in New York, and thence to England.

FOWLE, William Bentley, educator, b. in Boston, Mass., 17 Oct., 1795; d. in Medford, Mass., 6 Feb., 1865. He was apprenticed to a bookseller, and after the latter's death carried on the business till 1823, when he engaged in teaching, having for many years made a study of the theories and methods of education and mental culture. In 1842 he began the publication of the "Common School Journal," which was edited by Horace Mann till 1848, and then by himself for the succeeding four years. He wrote and lectured in furtherance of the principles advocated by Horace Mann, and rendered important assistance to that reformer. When teachers' institutes were established, he delivered many lectures at their meetings. Through his efforts the monitorial system of instruction was introduced into the public and private schools of Boston. He was a member of the Massachusetts legislature in 1843. About 1851 he opened a monitorial school in Boston, which he conducted successfully till 1860, when he retired to Medford and devoted himself to literary labor. He published, besides his lectures, as many as forty-eight books of instruction. His first publication was an improved edition of Boyer's "French and English Dictionary"; his latest, a series of outline maps. He was engaged at the time of his death in preparing a "Book of Dialogues."

FOWLER, Andrew, clergyman, b. in Guilford, Conn., about 1765; d. in Charleston, S. C., in 1851. He was graduated at Yale in 1783. Having studied for the Protestant Episcopal ministry, he was ordained deacon, 21 June, 1789, and priest, 11 June, 1790, by Bishop Provoost, of New York. While in college he performed the duties of a lay reader in New Haven and West Haven. After taking orders, he was rector of the united churches at Peekskill and Highlands, and subsequently of the church at Bedford, N. Y. After residing on Long Island and in Philadelphia, he became rector of churches in Spotswood, Shrewsbury, and Middletown, N. J. For a brief period he was in charge of the church in Bloomingdale, N. Y., but in February, 1807, he was elected rector of St. Bartholomew's parish, S. C. In 1812 he accepted missionary work in connection with the Protestant Episcopal society for the advancement of Christianity in South Carolina, and was usefully occupied during his last years at different points in the state, including Camden, Columbia, and Chatham.

FOWLER, Charles Henry, M. E. bishop, b. in Burford, Canada, 11 Aug., 1837. In 1841 he was taken with his father's family to Illinois, where he spent his early years on a farm. After studying at Rock River seminary in Mount Morris, he entered Genesee college, Lima, N. Y., where he was graduated in 1859. He soon afterward began the study of law at Chicago, but soon after this he was converted and at once changed his purpose, began a course of preparation for the ministry, and in 1861 was graduated at Garrett Biblical institute, Evanston, Ill. The same year he was admitted on trial into the Rock River conference of the Methodist

Episcopal church, and was appointed successively to churches in Chicago, till in 1872 he was elected president of Northwestern university. He held this office till 1876, when he was elected by the general conference to the editorship of the New York "Christian Advocate." Four years later he was elected one of the corresponding secretaries of the missionary society of the Methodist Episcopal church, and in 1884 he was elected and ordained bishop. He received the degree of D. D. from the Northwestern university, and afterward that of LL. D. from Syracuse university, N. Y. He was a delegate to the general conferences of 1872, 1876, 1880, and 1884. Since his elevation he has travelled through all parts of the country in the performance of his official duties, and has also visited South America. His residence is at San Francisco, and he has devoted a large share of his labors to the interests of the Methodist Episcopal church in the Pacific states.

C. H. Fowler

FOWLER, Henry, clergyman, b. in Stockbridge, Mass., in 1824; d. in Vineyard Haven, Mass., 4 Aug., 1872. He was graduated with honors at Williams in 1847, went to New York, and entered upon a literary career. He was editor of "Holden's Magazine," and a contributor to other journals and periodicals. About 1852 he removed to Chicago, and was editor and part proprietor of the "Tribune" for a year or more. From this place he was called to the professorship of political economy in the University of Rochester, N. Y., which he filled for nearly five years, studying meanwhile in Rochester theological seminary. In 1858 he was licensed and called to the pastorate of the 2d Presbyterian church in Auburn, N. Y. He married, in 1858, a daughter of Prof. Chester Dewey. His pastorate in Auburn continued till 1871, when he resigned in consequence of failing health. He was the author of "The American Pulpit," a volume of biographical and descriptive sketches of living pulpit celebrities, with portraits (New York, 1856).

FOWLER, Joseph Smith, senator, b. in Steubenville, Ohio, 31 Aug., 1822. He was graduated at Franklin college, Ohio, in 1843, and for four years filled the chair of mathematics in that institution. He then studied law in Kentucky, but began practice in Tennessee. When the civil war began, he ardently espoused the National cause, and in September, 1861, in consequence of a proclamation of Jefferson Davis for the expulsion of loyal people, he removed to Springfield, Ill. In April, 1862, he returned to Tennessee, was made comptroller of the state under Gov. Andrew Johnson, and took a leading part in reorganizing the state government in the interests of the Union. He was elected to the U. S. senate in 1865, but was not admitted to his seat until July, 1866.

FOWLER, Lyttleton, clergyman, b. in Smith City, Tenn., 12 Sept., 1802; d. in Texas, 19 Jan., 1846. He became a member of the Methodist church in 1819, was licensed to preach in Kentucky on 30 Sept., 1826, was ordained as deacon in October, 1828, stationed at Louisville the following year, and ordained an elder in October, 1830. In 1832 he went to Tennessee, and in August, 1833, as a missionary to Texas. In 1838 he was appointed by the Mississippi conference superintendent of the Texas mission. After the organization of the Texas conference he was presiding elder of various districts. He attended, in 1844, the last conference before the division of the church, and in 1845 the Louisville convention, at which the Methodist Episcopal church south was organized.

FOWLER, Orin, clergyman, b. in Lebanon, Conn., 29 July, 1791; d. in Washington, D. C., 3 Sept., 1852. He was graduated at Yale in 1815, studied theology under President Dwight, taught in the academy in Fairfield, Conn., for a year, was licensed to preach on 14 Oct., 1817, made a missionary tour in the Mississippi valley in 1818, and in 1819 was settled over a Congregational church in Plainfield, Conn. He was dismissed by this society in 1831, but was immediately called to a church in Fall River, of which he remained pastor until he entered congress. In 1841 he delivered three discourses containing a history of Fall River since 1620, and an account of the boundary dispute between Massachusetts and Rhode Island. He was appointed by a committee of citizens to defend the interests of the town before the boundary commissioners, published a series of articles on the subject in the Boston "Atlas," and was elected in 1847 to the state senate, where he secured the rejection of the decision of the boundary commission by a unanimous vote. His constituents were so pleased with his ability as a legislator that they elected him in 1848 as a Free-soil Whig to the National house of representatives, and re-elected him for the following term. He was an advocate of temperance laws, and a strong opponent of slavery. In March, 1850, he replied to Daniel Webster's speech in justification of the fugitive-slave law. He was the author of a "Disquisition on the Evils attending the Use of Tobacco" (1833), and "Lectures on the Mode and Subjects of Baptism" (1835). His "History of Fall River, with notices of Freeborn and Tiverton," was republished in 1862 (Fall River).

FOWLER, Orson Squire, phrenologist, b. in Cohocton, Steuben co., N. Y., 11 Oct., 1809. He was graduated at Amherst in 1834, and immediately began to lecture on phrenology. In 1835 he and his brother Lorenzo opened an office in New York. In 1836 they wrote and published "Phrenology Proved, Illustrated, and Applied." In October, 1838, he issued in Philadelphia the first number of the "American Phrenological Journal," which was published in that city till 1842, when it was removed to New York, and continued by the firm of O. S. and L. N. Fowler, which became Fowlers & Wells in 1844, and, by the retirement of the Fowlers, S. R. Wells in 1863. Besides his labors as an editor and a prolific author, Mr. Fowler lectured on his specialty and allied subjects in the United States and Canada for many years. In 1863 he removed to Boston, Mass., and in 1875 to Manchester, Mass. Among his many volumes on phrenology and kindred subjects are "Memory and Intellectual Improvement" (Philadelphia, 1841); "Physiology, Animal and Mental" (1842); "Matrimony, or Phrenology applied to the Selection of Companions" (1842); "Self-Culture and Perfection of Character" (1843); "Hereditary Descent, its Laws and Facts applied to Human Improvement" (1843); "Love and Parentage" (1844); "The Self-Instructor in Phrenology and Physiology," with his brother (1849); "Sexual Science" (Philadelphia, 1870); "Amativeness"; "Human Science"; and

"Creative Science, or Manhood, Womanhood, and their Inter-Relations."—His brother, **Lorenzo Niles**, b. in Cohocton, 23 June, 1811. He accompanied Orson on lecturing tours, and lectured alone throughout the United States and the British-American provinces. In 1863 he settled in London, and lectured in all parts of Great Britain. Several of his lectures were published in London. In addition to the works written in conjunction with his brother, he is the author of the "Synopsis of Phrenology and Physiology" (1844); "Marriage, its History and Philosophy, with Directions for Happy Marriages" (1846); and "Lectures on Man." As a member of the firm of Fowlers & Wells he was engaged in publishing "Life Illustrated," a weekly journal, and the monthly periodicals the "American Phrenological Journal" and the "Water-cure Journal," which was superseded by the "Science of Health."—**Lydia Folger**, wife of Lorenzo N., b. in Nantucket, Mass., in 1823; d. in London, England, 26 Jan., 1879, was a graduate of Syracuse medical college, and practised medicine. She lectured on physiology and on diseases of women and children, and published "Familiar Lessons on Phrenology and Physiology" (1847), and "Familiar Lessons on Astronomy" (1848).

FOWLER, Philemon Halstead, clergyman, b. in Albany, N. Y., 9 Feb., 1814; d. in Utica, N. Y., 19 Dec., 1879. He was graduated at Hobart college in 1832, was a tutor there for one year, and studied theology at Princeton seminary, where he was graduated in 1836. He held pastorates in Washington, D. C., and Elmira, N. Y.; and from 1851 till 1874, when he was compelled to resign on account of failing health, was pastor of a church in Utica, N. Y. He was a member of the joint committee on reunion in 1866, and was moderator of the new-school Presbyterian general assembly when the two wings of the church reunited in 1870. He was the author of a "History of Presbyterianism in Central New York," and of several other small volumes and published discourses.

FOWLER, Samuel, physician, b. near Newburg, N. Y., 30 Oct., 1779; d. in Franklin, N. J., 21 Feb., 1844. He studied medicine in Philadelphia, and, after being licensed in 1800, began to practise in Hamburg, N. J. A few years later he removed to Franklin, where he subsequently resided, enjoying a high reputation on account of his scientific knowledge. He interested himself in politics, and represented his county in the upper branch of the New Jersey legislature, and also his state in congress, to which he was twice elected as a Jackson Democrat, serving from 2 Dec., 1833, till 4 March, 1837. As a mineralogist he held deservedly a high rank. The zinc-mines in Franklin were once owned by him, and his descriptions of the minerals found in their vicinity, particularly the franklinite, said to have been named by him, led to the development of its metallurgy. The rare mineral, fowlerite, was discovered by him. He contributed frequent descriptions of New Jersey minerals to scientific and other journals.

FOWLER, Samuel Page, antiquarian, b. in Danvers, Mass., 22 April, 1800. He carried on the business of tanning and currying in his native town, held various local offices, and was a member of the legislature in 1837–'9, and of the State constitutional convention in 1853. He was one of the founders of the Essex institute, and for ten years president of the board of trustees of the Peabody institute of Danvers. He wrote articles for the "Historical Collections" of the Essex institute, and a sketch of the "Life and Character of the Rev. Samuel Parris, of Salem Village, and his Connection with the Witchcraft Delusion of 1692"; and annotated Robert Calef's "More Wonders of the Invisible World" (Salem, 1861).

FOWLER, Thomas Powell, lawyer, b. in Newburg, N. Y., 26 Oct., 1851. He was graduated at Columbia law-school in 1874, and became a practising lawyer in New York city. He has been a director of various railway companies, became receiver of the Shenango and Allegheny road in 1884, and since 1886 has been president of the New York, Ontario, and Western railway.

FOWLER, William Chauncey, educator and author, b. in Killingworth (now Clinton), Conn., 1 Sept., 1793; d. in Durham, Conn., 15 Jan., 1881. His parents settled at Durham when he was four years old. He was graduated at Yale in 1816, and studied theology there, at the same time performing the duties of rector of the Hopkins grammar-school. He was graduated at the theological school in 1818, was a tutor at Yale from 1819 till 1823, pastor of a Congregational church in Greenfield, Mass., in 1825–'7, professor of chemistry and natural philosophy in Middlebury college, Vt., from 1827 till 1838, and then of rhetoric and oratory in Amherst college till 1843. He subsequently engaged in literary labors, residing at Amherst till 1858, and afterward in Durham. He was a member of the Massachusetts assembly in 1851, and of the Connecticut senate in 1864. For his father-in-law, Noah Webster, he edited the university edition of Webster's "Dictionary" (New York, 1845). He published an "English Grammar"; a treatise on "The English Language in its Elements and Forms" (1850); "Memorials of the Chaunceys" (1856); "The Sectional Controversy, or Passages in the Political History of the United States" (1862); genealogical works on "William Fowler, the Magistrate, and his Descendants," "Wives of the Fowlers," and "Wives of the Chaunceys"; "History of Durham" (Hartford, 1866); and "Local Law in Massachusetts and Connecticut" (Albany, 1872).—His son, **William Worthington,** author, b. in Middlebury, Vt., 24 June, 1833; d. in Durham, Conn., 18 Sept., 1881, was educated at Phillips Andover academy and at Amherst, where he was graduated in 1854. He studied law at Amherst and in New York city, where he was admitted to the bar in 1857. He practised his profession in New York till 1864, then became a broker, and in 1871 abandoned that business for literature and journalism, settling in Durham. In 1879 he was a member of the Connecticut senate. He was for twelve years the New York financial correspondent of the Boston "Commercial Bulletin," and was the author of "Ten Years in Wall Street" (Hartford, 1870); "Life and Adventures of Benjamin F. Moneypenny"; "Fighting Fire" (1873); "Woman on the American Frontier" (1877); "Twenty Years of Inside Life in Wall Street" (New York, 1880); and a pamphlet on "The Fowlers of Buckinghamshire, England."

FOWLES, James H., clergyman, b. in Nassau, New Providence, in 1812; d. in 1854. He was the son of a lieutenant in the British army, was graduated at Yale in 1831, licensed to preach by the presbytery of New York in 1833, and afterward ordained in the Protestant Episcopal church by Bishop Bowen, of South Carolina. He preached in that state till 1845, when he succeeded Stephen H. Tyng in Philadelphia. He was the author of "Protestant Episcopal Views of Baptism Explained and Defended" (Philadelphia, 1846). A collection of thirty "Sermons Preached in the Church of the Epiphany, Philadelphia," accompanied by a memoir, was published after his death (1855).

FOX, Charles James, lawyer, b. in Antrim, N. H., 11 Oct., 1811; d. in Nashua, N. H., 17 Feb., 1846. He was graduated at Dartmouth in 1831, studied law, and in 1834 formed a partnership with Daniel Abbot, of Nashua, N. H., which was continued through his life. He was county solicitor in 1835–'44, a member of the commission to revise the New Hampshire statutes in 1841–'2, travelled in Egypt in 1843, and in the West Indies the following year. With the Rev. Samuel Osgood he compiled "The New Hampshire Book, Specimens of its Literature" (Nashua, 1842). He was the author of "History of Dunstable" (1846), and the "Town Officer" (Concord, 1843).

FOX, Ebenezer, patriot, b. in East Roxbury, Mass., in 1763; d. there in 1843. He served for three years as a seaman, resided in his native town from 1784 till 1837, and was postmaster of Boston in 1831–'6. He wrote the "Revolutionary Adventures of Ebenezer Fox" (Boston, 1848).

FOX, George, founder of the society of Friends, b. at Drayton-in-the-clay, now called Fenny Drayton, Leicestershire, England, in July, 1624; d. in London, 13 Jan., 1691. His father, Christopher Fox, was a weaver. At an early age the boy was placed with a shoemaker who also dealt in wool, and Fox was employed by him for some time as a shepherd.

He kept aloof from the other workmen, and meditated much on Scripture topics, gradually forming the doctrines which he afterward preached. When about nineteen he gave up his occupation, for some years lived a wandering life in woods and solitary places, practising extreme self-denial, and at the age of twenty-three appeared as a preacher at Manchester. The populace crowded to hear him, and he was arrested and imprisoned as a disturber of the peace. When released, he proceeded to travel through England, preaching his doctrines and making many converts. He was many times imprisoned, usually for refusing to make oath or to pay tithes, and in 1663–'6 was confined in different prisons about three years. The term Quakers is said to have been applied to his followers for the first time at Derby in 1650, in consequence of his telling Justice Bennet to "quake at the word of the Lord." In 1669 he married the widow of a Welsh judge who had often befriended him, and whose wife and daughters had become believers in his teachings. In 1671 he sailed for the Barbadoes, where many joined his society. While at this place he drew up a paper setting forth the belief of the Friends as to the fundamental doctrines of Christianity. He then visited the colonies of Maryland, New Jersey, and New England, advancing his views wherever he went. A large oak in Flushing, Long Island, under which he preached two centuries before, and which was preserved as an historical monument, was destroyed by fire in October, 1873. After preaching again in England, Holland, and Germany, he finally, a few years before his death, established himself in London. His published works, containing his journal, correspondence, and all his doctrinal writings, are numerous and curious. They were partially collected in three volumes folio (London, 1694–1706). An edition in eight octavo volumes was published in Philadelphia in 1852. For a full account of his various writings and publications, see Joseph Smith's "Catalogue of Friends' Books," vol. i., pp. 644–697.

FOX, George Henry, physician, b. in Ballston Spa, N. Y., 8 Oct., 1846. He was graduated at the University of Rochester in 1867, and two years afterward received the degree of M. D. from the University of Pennsylvania. During 1870–'3 he was a student of medicine in the universities of Berlin, Vienna, Paris, and London, and in 1874 he began practice in New York city, and a year later became surgeon to the New York dispensary. He was appointed clinical professor of diseases of the skin in the Woman's medical college of the New York infirmary in 1877, and clinical professor of dermatology at Starling medical college of Columbus, Ohio, in 1879. In 1880 he was appointed clinical professor of diseases of the skin in the New York college of physicians and surgeons, and in 1885 professor of skin diseases in the Post-graduate medical school in the same city. Dr. Fox has been unusually successful in the adaptation of new photographic processes to the illustration of medical works, and has published "Photographic Illustrations of Skin Diseases" (New York, 1880; 2d ed., 1886); "Photographic Illustrations of Cutaneous Syphilis" (1881); "Illustrated Medicine and Surgery" (1882–'3); and "Electrolysis in the Removal of Superfluous Hair, etc." (Detroit, 1887).

FOX, George L., actor, b. in Boston, Mass., 3 July, 1825; d. in Cambridge, 24 Oct., 1877. He made his first appearance in 1830, in the Tremont theatre, Boston, as one of the children in the "Hunter of the Alps," for the benefit of Charles Kean. At the age of twenty-five he played in the "Demon of the Desert" at the National theatre in New York. At the beginning of the civil war he went as lieutenant of the 8th New York infantry, and took part in the battle of Bull Run. On 26 July, 1861, he left military life, and appeared on the following evening at the new Bowery theatre. He afterward became manager of the old Bowery, and later was associated with Lingard at the new Bowery. In 1867–'8 he was stage manager of the Olympic, and made an immediate success in the part of the clown in the pantomime "Humpty-Dumpty." During the season of 1876 he was playing at Booth's theatre in New York city, when he was stricken with paralysis. Softening of the brain followed, and he ended his days in an asylum.—His brother, **Charles Kemble,** actor, b. in Boston, Mass., 15 Aug., 1833; d. 17 Jan., 1875, went on the stage at the age of six years, and played the child in the "Carpenter of Rouen" at the old Eagle theatre in Boston. His first appearance in New York was made at the old National theatre, 18 July, 1853, as Cute in "Uncle Tom's Cabin." In 1858 he was a member of the company at the old Bowery, and in 1859 was engaged at the new Bowery. He afterward appeared at the Olympic in pantomimes, and at the Globe theatre in Boston, 16 May, 1874, in "Humpty-Dumpty at Home," that house being then under the management of his brother. Charles Kemble Fox was the author of the pantomime in which both brothers won popularity and fortune.

FOX, Gustavus Vasa, naval officer, b. in Saugus, Mass., 13 June, 1821; d. in New York city, 29 Oct., 1883. He was appointed midshipman in the U. S. navy, 12 Jan., 1838, and served on various

stations, on the coast survey, in command of mail stations, and in the war with Mexico until 10 July, 1856, when, after a service of nineteen years, he resigned with the rank of lieutenant, his commission being dated the day previous to his resignation. After leaving the navy he accepted the position of agent of the Bay state woollen mills at Lawrence, Mass. In February, 1861, he was sent for by Gen. Scott, and consulted in reference to sending supplies and troops to Fort Sumter, but the expedition was forbidden by President Buchanan. When Mr. Lincoln became president, Fox was sent to Fort Sumter to communicate with Maj. Anderson, and on his return was directed to carry out the plan previously formed. The plan was virtually thwarted by the withdrawal of one of the ships (the "Powhatan"), which was to have taken part. The expedition had not reached Charleston when the Confederates, notified of its coming, opened fire on Fort Sumter, and the only thing accomplished was the bringing away of Maj. Anderson and his command after the surrender. After communications with Washington had been cut off, Fox applied to William H. Aspinwall and William B. Astor, who fitted out the steamer "Yankee," of which he was appointed acting captain, and in which he sailed for Chesapeake bay. He was at this time appointed by President Lincoln to the post of assistant secretary of the navy, which he held until the end of the war. His services in this position were extremely valuable, and a member of Mr. Lincoln's cabinet once spoke of him as follows: "Fox was the really able man of the administration. He planned the capture of New Orleans, the opening of the Mississippi, and in general the operations of the navy. He had all the responsibility of removing the superannuated and inefficient men he found in charge, had the honor of selecting Farragut, and was often consulted by Gen. Grant. He performed all his duties with an eye only to the requirements of the hour, and with no view to the advancement of any interest of his own." He was an able assistant to Sec. Welles, whose administration of the navy department owed to him much of its success. Soon after the close of the war Capt. Fox was sent on a special mission to Russia to convey to the czar, Alexander II., the congratulations of the U. S. congress on his escape from assassination. The voyage was made on the "Miantonomoh," the first monitor to cross the Atlantic. It is said that Capt. Fox might have obtained from the U. S. government an admiral's commission had he not refused to ask for it. One result of his visit to Russia was the purchase of Alaska by the U. S. government. In the negotiations concerning this purchase Capt. Fox took an active interest. He afterward became manager of the Middlesex mills, and a partner with E. R. Mudge, Sawyer & Co., where he remained several years. See Joseph F. Loubat's "Narrative of Fox's Mission to Russia in 1866" (New York, 1873).

FOX, Henry Stephen, British diplomatist, d. in Washington, D. C., 13 Oct., 1846. He was the son of Gen. Henry Fox, and nephew to Charles James Fox, the British statesman. He was the first minister plenipotentiary of Great Britain to Buenos Ayres, was afterward transferred to Rio de Janeiro, and thence to the United States in 1836. He conducted the difficult negotiation growing out of the burning of the steamer "Caroline," the case of McLeod, and other disputes that were caused by the Canadian rebellion of 1837, which he brought to a happy conclusion, preserving the friendly relations of the United States and Great Britain.

FOX, Luke, English navigator, b. about 1585; d. after 1635. He was a seaman from his youth, and his thoughts were early turned toward the discovery of a northwest passage, which he continued to believe practicable to the end of his life, notwithstanding his ill success. Having procured a vessel from Charles I., furnished with whatever was necessary for the enterprise, he left Deptford, 5 May, 1631, arriving at Hudson's bay on 22 June following. During the exploration of this bay he discovered, on 27 July, an island, which he named "Sir Thomas Rowe's Welcome," and named the cape which bounded its northern extremity "Wostenholme's Ultima Vale." Proceeding northward, he discovered and named various points situated in the large island since known as Cumberland island, but, despairing of penetrating the polar sea by Hudson's bay, he determined to return, and arrived in the Downs on 21 Oct. He published an account of his voyage (London, 1635).

FOX, Margaret, spiritualist, b. in 1836. She and her sister Katharine (b. 1839) were the youngest children of John D. Fox, of Hydeville, Wayne co., N. Y. When Margaret was about twelve years old the family were startled by mysterious rappings heard nightly on the floor of one of the bedrooms. All endeavors to trace them to any physical source proved unavailing. On the night of 31 March, when the raps occurred, Kate Fox imitated them by snapping her fingers, and the raps responded by the same number of sounds. The ages of different members of the family were asked, and the answer in every instance given correctly—a knock for each year. Various experiments were tried, and investigations made, but the occult power refused to act save in the presence of the two sisters. The family removed to Rochester, and the raps followed, while heavy bodies were also moved, without appreciable agency. In November, 1849, the sisters appeared in a public hall, when the same phenomena were freely manifested, and subjected to tests. Committees reported that they were unable to trace the sounds to any mundane agency. In May, 1850, the two girls went to New York city, and the alleged spiritual manifestations became the subject of extended public discussion. Observations, facts, and descriptions were published far and wide, and "mediums" through whom spiritual manifestations were said to occur sprang up all over the country. Men of learning and intelligence followed in the train with the ignorant. The elder of the sisters was dissuaded from following the "spirit mediumship" by Dr. Kane, the Arctic explorer, previous to his expedition to the north in 1853. During his absence her education was provided for by his arrangement and at his expense. On his return in 1855 she asserted that a marriage had taken place, and, although this was denied by his relatives, she continued to bear his name after his death. "The Love Life of Dr. Kane" (New York, 1865), containing letters and fac-similes, was published in proof of her claim.

FOX, Mary Hewins, actress, b. in Hartford, Conn., in 1842. Her maiden name was Hewins. She made her first appearance on the stage at the old Museum in Troy, N. Y., and afterward appeared at Laura Keene's Varieties in New York. She married Charles K. Fox, the comedian, but separated from him, and afterward married Mr. Burnham, of New York city, and retired from the stage. She has written many poems of merit, and dramatized several works, which have been successfully produced on the stage.

FOX, Thomas Bailey, clergyman, b. in Boston, Mass., in 1808; d. in Dorchester, Mass., in 1876. He was graduated at Harvard in 1828, and at the Cambridge divinity-school in 1831, and became pastor of the first religious society of Newburyport, Mass., where he remained until 1845. He then removed to Boston, where he gathered a congregation, and established a church in Indiana Place, which was soon afterward merged into the Church of the Disciples, to which it transferred its house of worship. He began to write for the press while yet an undergraduate, and was for several years a regular correspondent of the "Christian Inquirer," of New York. He was for three years the editor of the "Christian Register" in Boston, and for a much longer period an assistant editor and contributor to the "Christian Examiner," of which he was for six years proprietor, and much of the time actually, though not nominally, the editor. He was for many years editor of the "Boston Transcript," and furnished not only articles on topics of the day, but many on subjects of enduring interest, together with numerous book-notices and biographical sketches. His first book was a "Sketch of the Reformation," which was republished in England with some worthless alterations. His other publications were "The Ministry of Jesus" (Boston, 1837); "The Sunday-School Prayer-Book" (1838); "Hints for Sunday-School Teachers" (1840); "Allegories and Christian Lessons for Children" (1845); "The Acts of the Apostles" (1846); and "The School Hymn-Book, for Normal, High, and Grammar Schools" (1850).

FOXCROFT, George Augustus, humorist, b. in Boston in 1815; d. 13 March, 1878. He received an academic education, was clerk in a Boston store in 1831–'6, and in 1837 purchased a farm in Dedham, and lived on it till 1846. Subsequently, for some years, he was a broker in Boston, but finally devoted himself almost exclusively to journalism. He wrote many articles for the daily press on monetary topics, and amusing sketches of domestic life and character, under the pen-name of "Job Sass." He may be regarded as the originator of what has been called "phonetic humor."

FOXCROFT, Thomas, clergyman, b. in Cambridge, Mass., 26 Feb., 1697; d. in Boston, 18 June, 1769. He was graduated at Harvard in 1714, and on 20 Nov., 1717, became pastor of the 1st Congregational church in Boston, where he remained till his death. He was learned, devout, and a good logician, and was admired both for his talents and for the elegance of his manners. He published thirty-two sermons, including "Observations, Historical and Practical, on the Rise and Primitive State of New England, a Century Sermon" (1730).—His son, **Samuel,** d. 2 March, 1807, was graduated at Harvard in 1754, and was for twenty-eight years minister of New Gloucester, Me.

FOYE, James Clark, educator, b. in Great Falls, N. H., 1 March, 1841. He was graduated at Williams in 1863, and in 1863–'5 was professor of natural science in Wesleyan female college, Cincinnati. For two years he was president of the Jonesborough female college, and in 1867 was elected to the chair of chemistry in Lawrence university, becoming in 1879 vice-president of that institution. He has published "Tables for Determination, Description, and Classification of Minerals" (Chicago, 1875); "Chemical Problems" (New York, 1879); and "Handbook of Mineralogy" (1886).

FRAILEY, James Madison, naval officer, b. in Maryland, 6 May, 1809; d. in Philadelphia, Pa., 26 Sept., 1877. He entered the U. S. navy as a midshipman, 1 May, 1828, became passed midshipman in 1836, lieutenant in 1839, commander in 1861, captain in 1866, and a commodore in 1872. He served in the naval battery before Vera Cruz, and commanded the steamer "Quaker City," of the South Atlantic blockading squadron, in 1862–'4. This vessel was struck by a shell and partially disabled in an attack by Confederate rams off Charleston, 31 Jan., 1863. He commanded the "Tuscarora" in both attacks on Fort Fisher, and the steam sloop "Saranac," of the North Pacific squadron, in 1867–'8. He was appointed to the command of League Island naval station on 30 April, 1870, and was retired from the service, 6 May, 1871.

FRALEY, Frederick, merchant, b. in Philadelphia, Pa., 28 May, 1804. After studying law for his own gratification, he engaged in business. In 1824 he was one of the founders of the Franklin institute, and was for many years its treasurer. He was elected to the city council in 1834, and, as chairman of its finance committee in 1837, when the suspension of specie payments had brought the city to the verge of insolvency, he proposed, as a measure of relief, the issue of certificates of debt in small denominations, which was successfully adopted. In the same year he was elected by the Whigs to the state senate. During his term of service in Gov. Joseph Ritner's administration the trouble known as the "Buck-shot war" arose, and, at the request of his colleagues, Mr. Fraley prepared an address to the people giving an account of it, and afterward served as chairman of the committee of investigation. In 1847, on the completion of Girard college, he was elected one of the board of directors of the institution, prepared the plan that was adopted for its organization and management, and for several years remained at the head of its direction. During a vacancy in the presidency he took that place in the college for six months. He was active in the movement that culminated in 1854 in the consolidation of the city with all the districts within the bounds of the county. Mr. Fraley was one of the founders of the Union club, and its successor, the Union League of Philadelphia. He was chosen a delegate in 1868 to the commercial convention held in Boston for the establishment of a National board of trade, and was chosen first president of that board, and by unanimous re-election has continued in that office until the present time (1887). He was one of the most active promoters and organizers of the Centennial exhibition of 1876, and in 1873 was elected treasurer of the Centennial board of finance. He has been a trustee of the University of Pennsylvania since 1853, which in 1880 gave him the degree of LL. D., and since 1879 he has been president of the American philosophical society.

FRANCE, Joseph, French soldier, b. in Fort de France, Martinique, in 1797; d. there in December, 1868. In 1815 he entered the colonial gendarmerie of the island, and in 1834 had attained the rank of colonel. He commanded for ten years all the armed police force of the island. In 1844 he published "La vérité sur les faits, ou l'esclavage à nu," which created a sensation, for it

described the horrors of slavery in the French colonies. He also published a copy of the reports he had made in his official capacity, in which he vigorously denounced slavery. France was the object of daily ovations by the negroes, who had begun to show signs of discontent. The governor of the colony, becoming alarmed, arrested the colonel and sent him to France, where he was tried and suspended from his duties. On his return to Martinique he found himself in straitened circumstances, and a subscription was raised among the colored class to aid him. When the revolution of 1848 emancipated the slaves, he was chosen their delegate to the legislative assembly. He returned to Martinique in 1852, and until his death was a member of the general council of the colony. From 1860 till 1862 he was chief clerk of the administration, and from 1862 till 1868 private counsellor to the governor. France is the author of "Histoire de la Guadeloupe" (4 vols., Paris, 1855); "Les corsaires français dans les Antilles" (1857); "Histoire de la flibuste" (1860); "Questions coloniales" (1860); and "Statistique physique et politique de la Martinique" (1861).

FRANCHÈRE, Gabriel, explorer, b. in Montreal, 3 Nov., 1786; d. in St. Paul, Minn., in 1856. He was educated in Montreal, and trained to commercial pursuits by his father. In 1810 he bound himself for five years to the Pacific fur company, formed by John Jacob Astor, and was a member of the expedition sent to develop the fur-trade beyond the Rocky mountains. He returned to New York with several of his companions in less than two months, and in September, 1810, sailed on the "Tonquin" for the Columbia river, where the expedition arrived in March, 1811, after suffering many hardships. Franchère was one of the witnesses to the transfer of Astoria to the Northwest company, after the breaking out of hostilities between the United States and England, and remained for some time in the service of that company, but finally resolved to return to Canada. In order to reach Montreal he travelled a distance of 5,000 miles by the overland route in canoes or on foot. Franchère removed to Sault Ste. Marie in 1834, and engaged in the fur-trade. He afterward established the commercial house of Franchère and Company in New York city. A large number of French Canadians having emigrated to the United States after the rebellion of 1837, he established the Société St. Jean-Baptiste with the object of preserving the religion, language, and nationality of his compatriots. He was the last survivor of the Astor expedition. He published "Relation d'un voyage à la Côte du Nord-Ouest de l'Amérique septentrionale dans les années 1810–'14" (1820; English translation, edited by J. V. Huntington, New York, 1854). This was the first history of the Astor expeditions, and the first work containing detailed accounts of the interior of Oregon. It forms the basis of Washington Irving's "Astoria," and supplied Thomas H. Benton with materials for his great speech on the Oregon question.

FRANCIA, José Gaspar Rodríguez (fran'-the-a), dictator of Paraguay, b. in Asuncion in 1757 or 1758; d. there, 20 Sept., 1840. He boasted that he was of French extraction, but his father is supposed to have been born in Brazil, and to have emigrated to Paraguay. His mother was a Spanish creole. He studied for the priesthood at the seminary of his native city, and afterward in the University of Cordova, where he received the degree of D. D., and was for a short time professor of theology. He then practised law, and was appointed to several public offices. When the independence of Paraguay was declared Francia was elected secretary of the revolutionary junta, who were scarcely able to read and write. In October, 1813, the junta was abolished, and Yegros and Francia appointed joint consuls for a year; but Francia was the moving spirit of the government, and in 1814 he was made dictator for three years, at the end of which time he contrived to secure a re-election for life. He ruled the state with a despotic sway, but husbanded the national resources with great sagacity. No export or import trade was allowed without the dictator's license, and an exorbitant duty and death awaited those who were detected leaving the country without his permission. The opponents of his rule were either shot or imprisoned. Some of Francia's prisoners were subjected to the most cruel tortures, and his apparent delight in torture gave rise to the belief that, like some of his brothers, he was occasionally deranged. On the other hand, he was generally humane toward the poor. He had once been fond of gambling and social and sensual enjoyments, but now he resided in the palace of the former Spanish governors in complete seclusion, attended only by four servants. His barber, a mulatto, was the principal channel of his communication with the outer world. He had great mental powers, which he cultivated by study and reading. He was especially fond of the French literature of the 18th century, and an admirer both of Robespierre and Napoleon. The anecdotes of his eccentricities were almost as numerous as the reports of his cruelties. Two Swiss surgeons, Renger and Longchamp, whom he detained from 1819 to 1825, published an "Essai Historique sur la Révolution de Paraguay et le Gouvernement Dictatorial du Docteur Francia" (Paris, 1827). Two young Scotchmen, J. P. and W. P. Robertson, who went to Paraguay on a commercial venture and were expelled by the dictator, gave appalling accounts of his administration in "Letters on Paraguay" (2 vols., London, 1838); "Francia's Reign of Terror" (1839); and "Letters on South America" (3 vols., 1843).

FRANCIS, Convers, clergyman, b. in West Cambridge, Mass., 9 Nov., 1795; d. in Cambridge, 7 April, 1863. He studied at Medford academy, and was graduated at Harvard in 1815. Afterward he studied theology in the Cambridge divinity-school, and on 23 June, 1819, was ordained pastor of the Unitarian church in Watertown, Mass., where he remained twenty-three years. In 1842 he was appointed professor of pulpit eloquence and the pastoral care in Harvard, which chair he continued to hold to the end of his life. He was a brother of Lydia Maria Child, the philanthropist and author. Harvard gave him the degree of D. D. in 1837. He contributed to religious periodicals, and published "Errors of Education," a discourse at the anniversary of the Derby academy in Hingham (1828); "Historical Sketch of Watertown" (1830); "Dudlean Lecture at Cambridge" (1833); "Life of Rev. John Eliot, the Apostle to the Indians," in the fifth volume of Sparks's "American Biography" (1836); memoirs of Rev. John Allyn, D. D., of Duxbury (1836), Dr. Gamaliel Bradford (1846), and Judge Davis (1849); and "Life of Sebastian Rale" (Boston, 1848). See William Newell's "Memoirs of Convers Francis" ("Massachusetts Historical Society's Proceedings, 1864–'5"), and John Weiss's "Discourse on the Death of Convers Francis" (Boston, 1863).

FRANCIS, James Bicheno, civil engineer, b. in Southleigh, Oxfordshire, England, 18 May, 1815. He was educated at Radley Hall and Wantage academies, Berkshire, and, after gaining a practical

knowledge of civil engineering, came to the United States in April, 1833. On his arrival he secured employment on the New York, Providence, and Boston railway, in 1834 went to Lowell as assistant engineer on the hydraulic and other works, and in 1837 was appointed chief engineer of locks and canals on Merrimack river. In 1845 he was appointed agent of the canal company, and continued in that capacity and as chief engineer until he was retired from active duty in 1884. At present (1887) he is the consulting engineer in all important work connected with the hydraulic improvements of Lowell. Mr. Francis may be regarded as the founder of a new school of hydraulic engineers. In gauging the flow of water, by weirs and floating tubes, the volumes treated by him have been unparalleled, and he has reduced the possible error from the ten per cent. often allowed in previous experiments, to two per cent. He was president of the American society of civil engineers from November, 1880, till January, 1882, and, besides his contributions to periodical technical literature, has published "Lowell Hydraulic Experiments" (New York, 1855; enlarged ed., 1868), and "The Strength of Cast-Iron Pillars" (1865).

James B. Francis.

FRANCIS, John Morgan, journalist, b. in Prattsburg, Steuben co., N. Y., 6 March, 1823. His father, Richard, a native of Wales, was a midshipman in the British navy, served in Admiral Rodman's flag-ship, and, resigning about the close of the Revolutionary war, emigrated to the United States and settled near Utica, N. Y. The son was educated in the common schools and in Prattsburg academy, and when fourteen years old was apprenticed to a printer. In 1843 he became editor of the "Wayne Sentinel" at Palmyra, N. Y., in 1845 an editorial writer on the "Rochester Advertiser," and in 1846 on the Troy "Budget," of which he was subsequently editor and associate proprietor. After serving editorially on the Troy "Post" and the Troy "Whig," he established the Troy "Times" in 1851, and has been its controlling proprietor and editor-in-chief ever since. He was city clerk of Troy in 1851–'5, and was a member of the New York state constitutional convention of 1867–'8. In 1871 he was appointed by President Grant U. S. minister to Greece, which office he resigned in November, 1873. He was minister to Portugal in 1882–'4, and to Austria-Hungary in 1884–'5. He made the tour of the world in 1875–'6.

FRANCIS, John Wakefield, physician, b. in New York city, 17 Nov., 1789; died there, 8 Feb., 1861. His father was a German, who emigrated to this country soon after the close of the Revolutionary war. The son was apprenticed to a printer, but subsequently entered Columbia in advance in 1807, and was graduated in 1809. He soon afterward began the study of medicine in the office of Dr. Hosack, whose partner he was till 1820. He was graduated in medicine in 1811, at the College of physicians and surgeons. In 1810 he became associated with Dr. Hosack in editing the "American Medical and Philosophical Register," a quarterly which was continued for four years. In 1813 he was appointed lecturer in the institutes of medicine and materia medica at the College of physicians and surgeons, and soon afterward, when the medical faculty of Columbia was consolidated with that institution, he was appointed professor of materia medica in the united body. After delivering one course of lectures he sailed for Europe in 1816, and while there studied under Abernethy, and formed the acquaintance of the most eminent physicians and literary men of the time. On his return he re-entered on his duties as professor, first of the institutes of medicine, afterward of medical jurisprudence, in 1817, and then of obstetrics from 1819 to 1826. In the latter year the whole faculty resigned, and the majority of them formed the Rutgers medical school, with Dr. Francis as professor of obstetrics and forensic medicine for four years, when the school was closed by the legislature. He afterward devoted himself to the practice of his profession and to literature. He actively promoted the interests of the New York historical society, the New York lyceum of natural history, the Woman's hospital, the State inebriate asylum, and the Typographical society, of which he was a member till his death. His taste in art was fine and his judgment correct, and young painters and sculptors always found in him a friend. He was the first president of the New York academy of medicine after its organization in 1847, and was elected an associate of numerous medical and scientific associations abroad as well as in the United States. He was a fine conversationalist and was a social favorite. In 1822–'4 he was one of the editors of the "Medical and Physical Journal." Trinity college gave him the degree of LL. D. in 1850. Dr. Francis was intimately acquainted with the history and antiquities of New York, and was looked upon as an oracle in matters relating to his native city. He was the author of biographical sketches of many of the distinguished men of his time, and of articles in medical periodicals. His published works are "Use of Mercury" (New York, 1811); "Cases of Morbid Anatomy" (1814); "Febrile Contagion" (1816); "Notice of Thomas Eddy" (1823); "Denman's Practice of Midwifery," with notes (1825); "Letter on Cholera Asphyxia of 1832" (1832); "Observations on the Mineral Waters of Avon" (1834); "The Anatomy of Drunkenness"; "Old New York, or Reminiscences of the past Sixty Years" (1857; enlarged ed., 1858; reprint, with a memoir by H. T. Tuckerman, 1865); and numerous addresses. — His son, **Valentine Mott,** physician, b. in New York city, 25 April, 1834, was graduated in medicine at the University of New York in 1859. After practising in New York for several years he removed to Newport, R. I. He was correspondent of an American newspaper while travelling on the continent of Europe in 1869–'70, and is the author of "Hospital Hygiene" (New York, 1859), and "Fight for the Union," a poem (1863).—Another son, **Samuel Ward,** physician,

John W. Francis

b. in New York city, 26 Dec., 1835; d. in Newport, R. I., 25 March, 1886, was graduated at Columbia in 1857, and at the medical department of the University of New York in 1860. He began practice in New York city, but subsequently removed to Newport, R. I. He was physician in the New York dispensary in 1860–'2, and at other times. Dr. Francis patented twelve surgical inventions, and published "Mott's Clinics" (New York, 1860); a medical essay on "Water" (1861); "Inside and Out" (1863); "Biographical Sketches of Living New York Surgeons" (1866); "Biographical Sketches of Living New York Physicians" (1867); "Life and Death" (1870); and "Curious Facts Concerning Man and Nature" (1874–'5).

FRANCIS, Joseph, inventor, b. in Boston, Mass., 12 March, 1801. At eleven years of age he exhibited a fancy boat at a fair, and at the age of eighteen received from the Massachusetts mechanics' institute the first prize for a fast row-boat. He afterward established a boat-yard in New York, and was requested by the secretary of the navy to go to Portsmouth navy-yard and build wooden life-boats for the frigate "Santee" and the line-of-battle ship "Alabama." Soon after this he invented a portable boat that could be taken apart, and a method of building boats over a frame or mould with inch-square strips of cedar nailed edge to edge, the joining showing neither nail-heads or seams, and requiring no calking. These boats, all of which were life-boats, came into general use. His greatest achievements were in the construction of life-saving appliances. These consisted of life-boats, life-cars, and surf life-boats. Of the life-boats the first that he made was of wood, and was called the "Hydrogen" life-boat. The interior was fitted with copper air-tubes, and the invention proved successful. As a result of later experiments, the use of wood in the construction of his boats quickly gave way to iron, although the use of iron in the manufacture of vessels of any kind was practically unknown at that time. To Mr. Francis may be conceded the first use of iron floating vessels. Another improvement was added by having the spaces at the bow and stern of the boats made into reservoirs of air, as well as the spaces at the sides, enabling the boat to sustain a great load in the heaviest sea. In 1838 Mr. Francis invented the life-car by which to land people safely from a wreck. He began with experiments on wooden life-boats, and finally, in 1842, invented the corrugated metallic life-car, with space for four adults. His first perfect metallic life-car was placed on the coast of New Jersey, near Long Branch, in the autumn of 1849, at his own expense, the government refusing to aid him in any way. The boat was not called into use until January, 1850, when the British emigrant vessel "Ayrshire" was wrecked on Squan Beach in a violent winter storm. There were 201 persons on board, and 200 were saved by means of the life-car. The one loss of life that occurred was that of a man who insisted on attempting to ride through the surf on the outside of the car, when his family were inside. This car was for a long time preserved in the museum in Central park, New York, but on 10 July, 1885, it was deposited, as a relic, in the National museum in Washington. During the first four years of the use of life-boats (1850–'3) they were instrumental in saving 2,150 lives, besides an immense amount of valuable cargo. Mr. Francis's metallic life surf-boat, invented in 1845, was designed for riding lightly on the wildest sea. In 1845 Mr. Francis obtained patents in the United States, England, France, Germany, and Russia, for his method of constructing vessels of corrugated sheet-metal, and for the machinery by which they were produced. His inventions for the machinery and for the application of the hydraulic press were adjuncts of the greatest importance. Life-boats built on the principle of the corrugated sheet-metal were furnished by him for the Dead sea and Arctic expeditions, to the war, navy, and treasury departments, and to several European governments. Mr. Francis has extended the application of corrugated metal to the building of steamers, floating docks, harbor-buoys, and pontoon-wagons, and his inventions have been adopted by every civilized country. Among his many other inventions are a military hood made of cloth for the protection of sentinels in a storm, a circular yacht, and a double-joint row-lock. He has received numerous medals and decorations from European sovereigns. The order of knighthood of St. Stanislaus, with its medal and diploma, was conferred upon him in 1861, and on 4 Feb., 1856, he received a gold snuff-box, diamond-studded, and valued at 17,500 francs, from Napoleon III. He has also received a large number of medals from the American and other institutes, a medal and diploma from the European shipwreck society for all nations, in France in 1842, and a second in England, designated "Benefactor," by the Imperial Royal European society, on 1 July, 1842. In addition to these honors from foreign countries, congress, in March, 1887, a few hours before its adjournment, passed a joint resolution thanking him for his "life-long services to humanity and to his country," and authorizing the president to present him with a gold medal. But President Cleveland withheld his signature from the bill until the specified time after the adjournment, and Mr. Francis thus failed to receive the gold medal awarded him. He has written many articles for periodicals, and has published "Life-Saving Appliances" (New York, 1885).

Joseph Francis

FRANCIS, Tench, lawyer, b. probably in Ireland; d. in Philadelphia, Pa., 16 Aug., 1758. He was the son of John Francis, dean of Sirmore and rector of St. Mary's church, Dublin. His brother, Richard Francis, was an eminent lawyer, and author of "Maxims in Equity," and another brother, Rev. Philip Francis, was the father of Sir Philip Francis, the reputed author of the "Junius Letters." Tench was educated in England, and prepared for the bar, after which he emigrated to Talbot county, Md., and became attorney for Lord Baltimore, in Kent. He was clerk of Talbot county from 1726 till 1734, and in 1734 represented his county in the Maryland legislature. He subsequently settled in Philadelphia, was attorney-general of Pennsylvania from 1741 till 1755, and recorder of Philadelphia from 1750 till 1755. He was an eminent lawyer, and, according to Franklin's "Gazette," 24 Aug., 1758, served in his several offices "with the highest reputation." — His son, **Tench,** merchant, b. in

Fansley, Talbot co., Md., in 1730; d. in Philadelphia, 1 May, 1800, for many years acted as agent for the Penn family in connection with their proprietary interests. He became the first cashier of the "Bank of North America," which office he held until his death. He is said to have contributed £5,000 for the support of the Revolutionary army. —Another son, **Turbutt,** soldier, b. in 1740; d. in 1797, was named for his mother, a Miss Turbutt. Before the war of the Revolution he was a lieutenant in the British army, but afterward fought with his countrymen for independence, rose to the rank of colonel, and his correspondence with Sir Philip Francis shows that in 1770 Col. Francis had purchased for his cousin, Sir Philip, a tract of 1,000 acres in Maryland, for which 125 or 130 guineas were to be paid. He was also anxious that his relative should secure from the English government a grant of land, which he thought might be purchased from the Indians for from 2,000 to 3,000 guineas. This tract, which he described as "a prodigious fine country," was north of the Ohio and between the Scioto and the Wabash. The colonel also asked his correspondent to "obtain for us the carrying-place of Niagara" and "a grant of the Salt Lake, and the land for one mile around it, in the Onondago country." To this Sir Philip replied that, although he had really very little "interest" (influence) with the authorities, he would take the matter into consideration. About a year afterward, it appears, Col. Francis had succeeded to some extent in improving his own prospects, as Sir Philip writes to a relative, under date of 1 May, 1771: "If you have not made a thousand compliments to Tubby Francis for me upon his change of condition, you deserve to be hanged. I have used that honest fellow infamously; but really, between ourselves, I cannot prevail upon myself to talk to a man who makes so light of getting large provinces into his possession." Subsequently, when Sir Philip had become a member of the "new council" of India, he again wrote to Col. Turbott, saying: "At present I am bound to the Ganges; but who knows whether I may not end my days on the banks of the Ohio? It gives me great comfort to reflect that I have relatives who are honest fellows in almost every part of the world. In America the name of Francis flourishes. I don't like to think of the quantity of salt water between us. If it were claret, I would drink my way to America."—**John Brown,** grandson of the younger Tench, senator, b. in Philadelphia, Pa., 31 May, 1791; d. in Spring Green, in Warwick, R. I., 9 Aug., 1864, lost his father in infancy, and was adopted by his maternal grandfather, Nicholas Brown. He was educated in the schools of Providence and in Brown university, where he was graduated in 1808. He spent a year in the counting-house of his kinsmen, Messrs. Brown & Ives, of Providence, and subsequently attended the law-school at Litchfield, Conn. In 1821 he went to live at Spring Green, a family estate on the shores of Narragansett bay. In the same year he was elected to the legislature from the town of Warwick, and was annually chosen till 1829, when he resigned. In 1831 he was a member of the state senate, and in the spring of 1832 was elected governor by a coalition of the Anti-masons and the Democrats. He had been a Federalist and a National Republican, but after this he was known as a Democrat. He was re-elected governor every year till 1838, when the state fell into the hands of the opposite party. In the free-suffrage troubles of 1842 he again appeared in the state senate as a member of the "Law and Order" party, and in 1844 he was chosen by the legislature to fill the vacancy in the U. S. senate occasioned by the resignation of William Sprague. He held a seat in that body during the remainder of the session then pending, and the whole of the short session of the succeeding winter, his time expiring 4 March, 1845, was subsequently, for eight or nine years, again in the state senate, and continued to wield an important influence in the politics of Rhode Island. In 1856 he declined a re-election and withdrew from public life. From 1828 till 1857 he was a trustee of Brown university, and from 1841 till 1854 held the office of chancellor in that body.

FRANCISCO, Peter, soldier, b. in 1761; d. in Richmond, Va., in 1832. His origin is obscure, but it is supposed that he was kidnapped from Portugal and taken to Ireland. He resolved to come to America, and indentured himself to a sea-captain. On arriving in City Point, near Petersburg, Va., he was taken to the poor-house, where he remained until he was bound to Judge Anthony Winston, of Buckingham county, on whose estate he labored until the beginning of the Revolution. He obtained permission from his master to enlist in the Continental army in 1777, and served with Lafayette at the battles of Brandywine, Yorktown, Monmouth, where he was wounded by a musket-ball, Cowpens, and Stony Point, where he was second to enter the fortress, and received a bayonet-wound. After serving in skirmishes under Col. Morgan, he volunteered under Col. Mayo, of Powhatan, and was present at Gen. Gates's defeat at Camden. Here he saved the life of Col. Mayo, and that officer afterward presented him with 1,000 acres of land on Richland creek, Ky. On hearing of Cornwallis's march through the south he volunteered under Col. Watkins, and took part in the battle of Guilford, N. C. His bravery was equal to his strength, which was herculean. He could shoulder a cannon weighing 1,000 pounds, and the blade of his sword was five feet in length. Many anecdotes are related of his physical power. On his return to Virginia in 1781, he stopped at a tavern in Amelia, and was made prisoner by a detachment of Tarleton's dragoons, who were stationed there. While one of the Tories was stooping to take off his silver shoe-buckles, Francisco drew his sword and cleft the man through the head. He frightened the rest of the party and made his escape, although Tarleton's corps was in full view. This exploit was illustrated in an engraving which was a favorite ornament of that period, and was published by James Webster, of Pennsylvania (1814). On some occasions he was more successful in restoring public order than the civil authorities. Through the influence of Charles Yancey he was appointed sergeant-at-arms in the Virginia house of delegates, which office he held until his death. John Randolph, of Roanoke, brought the attention of congress to Francisco's military career, and applied for a pension for him.

FRANCO, Bernardo de Sousa (frank'-o), Viscount, Brazilian statesman, b. in Pará, 28 June, 1805; d. in Rio Janeiro, 9 May, 1875. He studied at Pará. In 1823, being involved in a conspiracy, he was sent with 257 others to Lisbon, but was set at liberty in 1824, returned to Brazil, and was graduated in law at Olinda academy in 1835. He had already distinguished himself as editor of the "Voz do Beberibe" and of the "Diario de Pernambuco." In 1839 he was appointed president of the province of Pará, and contributed largely to its improvement. In 1844 he was president of the province of Alagoas, and soon afterward was attacked by the rebel Vicente Ferreira

and his troops. Franco defended himself as well as he could, but, lacking the means necessary to continue the defence, he retired on board a man-of-war. He had belonged to the Conservative party, but on account of its corruption went over to the other. He was a member of all the legislatures, and was one of the most eloquent orators of South America. From 31 May till 29 Sept. he was minister of foreign relations. On July 5, 1855, the emperor appointed him senator for Pará, and on 4 May, 1857, he became secretary of the treasury, and in 1864 counsellor of state. In 1866 Franco was appointed president of the province of Rio Janeiro, which had been impoverished by the war with Paraguay, but soon improved. In 1865 he resigned the presidency of Rio Janeiro, as this office was incompatible with his duties as counsellor of state. On 28 Sept., 1871, emancipation, for which Franco and other distinguished Brazilians had labored so hard, was decreed. In 1872 he was made Viscount Franco by the emperor.

FRANCO, Francisco de Mello, Brazilian physician, b. in Paracatu, 7 Sept., 1757; d. in Ubatuba, 22 July, 1823. He studied medicine at the University of Coimbra, Portugal, where also he cultivated poetry and published "Reino da Estupidez" (1778), which was condemned by the Inquisition, and the author was imprisoned in 1779. In 1785, after his release, he was graduated as doctor, and settled in Lisbon, where in 1795, he became court physician. He was one of the founders of the Geographical academy. In 1817 he accompanied to Brazil the Archduchess Mary Leopoldine, affianced bride of the prince-royal Dom Pedro. When, in 1820, the constitutional struggle in Portugal began, Franco by his writings encouraged the Liberal party, and he also declared for the democratic ideas when the same movement occurred in Brazil in 1821. The king immediately dismissed Franco from service at the palace, and he was reduced to comparative poverty. He published "Flora portugueza é brazileira" (12 vols.); "Traitado de educação physica dos meninos para uso da nação portugueza"; "Ensaio sobre as febres, com observações acerca da topographica é clima do Rio Janeiro"; "Elementos de Hygiene"; and a volume of poems (1777).

FRANCO DE SÁ, Joaquim (fran'-co-da-sah'), Brazilian magistrate, b. in Alcantara, Brazil, 25 Dec., 1807; d. in Rio Janeiro, 10 Nov., 1851. He studied in Portugal, but in 1828 returned to Brazil, and was graduated in law at the Academy of Olinda in 1832. In 1833 he became public prosecutor at Maranhão, next year judge of the district court for São Luiz, and afterward held many places of public trust. In 1841 he was elected a deputy in the national parliament, and in 1844 was appointed president of the province of Parahyba, where he introduced reforms. When his native province, Maranhão, became a prey to hostile parties, Franco was called to the presidency, 27 Oct., 1846. He formed the "Liga-liberal-maranheuse" of the best elements of the opposing parties, and this society soon became his firm supporter in the preservation of public order, which in a few months was fully restored. Franco gave a great impulse to public instruction, establishing many schools, and under his administration the first newspaper, "O Progreso," was published in the province. In less than two years he made the province one of the most prosperous and flourishing of the empire. He resigned the presidency, 1 Oct., 1848, and retired to private life.

FRANKLAND, Sir **Charles Henry,** bart., collector of the port of Boston, b. in Bengal, India, 10 May, 1716; d. in Bath, England, 11 Jan., 1768. He was a lineal descendant of Oliver Cromwell, and his father was governor of the East India company's factory in Bengal. The intellectual attainments of the son won him such friends as Horace Walpole, Henry Fielding, and Lord Chesterfield, whom he was said to resemble both in manners and appearance. On the death of his father in Bengal in 1738, he inherited a large fortune, and was offered the governorship of Massachusetts and the collectorship of the port of Boston. He accepted the latter office, and in 1741 came to Boston with Sir William Shirley, who was given the former. Frankland identified himself with King's Chapel under Roger Price, and contributed toward its support. While visiting Marblehead, which was authorized to erect a fortification for the defence of its harbor, Frankland became interested in a girl of about sixteen who was scrubbing the tavern floor. Although meanly clad, Agnes Surriage possessed great beauty and wit, and Frankland sought permission of her parents to have her educated. On the death of his uncle, Sir Thomas Frankland, in 1746, he succeeded to the baronetcy. In 1751 he bought a large estate in Hopkinton, Mass., where he built a fine mansion, and furnished it in costly style. The grounds were embellished with walks, fruit-trees, rare shrubbery, and hedges of box, which in 1862 had attained a height of ten feet. In 1752 he retired to this estate with Agnes Surriage, and lived in great luxury, following the chase and indulging in various sports. The will of his uncle being contested, he returned to England in 1754, where he attempted to introduce Agnes Surriage to his relatives, one of whom had married the Earl of Chichester. She was treated with disdain, and as soon as his affairs were settled, Frankland left England for a continental tour. For some time he resided in Lisbon. On the morning of the great earthquake, 1 Nov., 1755, he attended high mass, and was buried under the ruins of the house of Francesco de Ribeiro, which fell as he rode past. He was rescued by Agnes Surriage, whom he shortly afterward married. He then returned to England, where, as Lady Frankland, Agnes was cordially received by his relatives. In 1756 he returned to Boston, where Lady Frankland was received into the best society of that city. Frankland bought the Clarke mansion in Garden court, but in 1757 resigned his office and obtained an appointment as consul-general in Portugal. In 1763 he visited Boston, and, after spending some time in his house at Hopkinton, went to Bath, England, where he resided till his death. The story of Lady Frankland has been versified by Oliver W. Holmes, and she is the heroine of "Agnes Surriage," a novel, by Edwin L. Bynner (Boston, 1887). See a "Memoir" by Elias Nason (Albany, 1865).

FRANKLIN, Benjamin, statesman and philosopher, b. in Boston, Mass., 17 Jan., 1706; d. in Philadelphia, Pa., 17 April, 1790. (See representation of birthplace on page 531.) His family had lived for at least three centuries in the parish of Ecton, Northamptonshire, England, on a freehold of about thirty acres. For several generations the head of the family seems to have been the village blacksmith, the eldest son being always bred to that business. Benjamin's grandfather, Thomas, born in 1598, removed late in life to Banbury, in Oxfordshire, while his eldest son, Thomas, remained on the estate at Ecton. This Thomas received a good education, and became a scrivener. He came to be one of the most prominent men in his county, and formed a friendship with the Earl of Halifax. In mental characteristics he is said

to have borne a strong likeness to his immortal nephew. The second son, John, was a dyer of woollens, and lived in Banbury. The third son, Benjamin, for some time a silk-dyer in London, emigrated to Boston at an advanced age, and left descendants there. He took a great interest in politics, was fond of writing verses, and invented a system of short-hand. The fourth son, Josiah, born in 1655, served an apprenticeship with his brother John, at Banbury, but removed to New England in 1682. From the beginning of the Reformation the family had been zealous Protestants, and in Mary's reign had incurred considerable danger on that account. Their inclination seems to have been toward Puritanism, but they remained in the Church of England until late in the reign of Charles II., when so many clergymen were dispossessed of their holdings for non-conformity, and proceeded to carry on religious services in conventicles forbidden by law. Among these dispossessed clergymen in Northamptonshire were friends of Benjamin and Josiah, who became their warm adherents and attended their conventicles. The persecution of these non-conformists led to a small Puritan migration to New England, in which Josiah took part. He settled in Boston, where he followed the business of soap-boiler and tallow-chandler. He was twice married, the second time to the daughter of Peter Folger, one of the earliest settlers of New England, a man of some learning, a writer of political verses, and a zealous opponent of the persecution of the Quakers. By his first wife Josiah Franklin had seven children; by his second, ten, of whom the illustrious Benjamin was the youngest son. For five generations his direct ancestors had been youngest sons of youngest sons. As a child he showed such precocity that his father at first thought of sending him to Harvard and educating him for the ministry; but the wants of his large family were so numerous that presently he felt that he could not afford the expense of this. At the age of ten, after little more than a year at the grammar-school, Benjamin was set to work in his father's shop, cutting wicks and filling moulds for candles. This was so irksome to him that he began to show symptoms of a desire to run away and go to sea. To turn his mind from this, his father at length decided to make him a printer. He was an insatiable reader, and the few shillings that found their way into his hands were all laid out in books. His elder brother, James, had learned the printer's trade, and in 1717 returned from England with a press, and established himself in business in Boston. In the following year Benjamin was apprenticed to his elder brother, and, becoming interested and proficient in the work, soon made himself very useful. He indulged his taste for reading, which often kept him up late into the night. Like so many other youthful readers, he counted Defoe and Bunyan among his favorites, but presently we find him studying Locke's "Essay on the Human Understanding," and the Port Royal logic. While practising himself in arithmetic and the elements of geometry, he was also striving to acquire a prose style like that of Addison. He wrote little ballads and songs of the chap-book sort, and hawked them about the streets, sometimes with profit to his pocket. At the same time an inborn tendency toward free-thinking was strengthened by reading Shaftesbury and Collins, until some worthy people began to look askance at him and call him an infidel. In 1721 James Franklin began printing and publishing the "New England Courant," the third newspaper that appeared in Boston, and the fourth in America. For this paper Benjamin wrote anonymous articles, and contrived to smuggle them into its columns without his brother's knowledge of their authorship; some of them attracted attention, and were attributed to various men of eminence in the colony. The newspaper was quite independent in its tone, and for a political article that gave offence to the colonial legislature James Franklin was put into jail for a month, while Benjamin was duly admonished and threatened. Finding himself somewhat unpopular in Boston, and being harshly treated by his brother, whose violent temper he confesses to have sometimes provoked by his sauciness, Benjamin at length made up his mind to run away from home and seek his fortune. He raised a little money by selling some of his books, and in October, 1723, set sail in a sloop for New York. Unable to find employment there as a printer, he set out for Philadelphia, crossing to Amboy in a small vessel, which was driven upon the coast of Long Island in a heavy gale. Narrowly escaping shipwreck, he at length reached Amboy in the crazy little craft, after thirty hours without food or drink, except a drop from a flask of what he called "filthy rum." From Amboy he made his way on foot across New Jersey to Burlington, whence he was taken in a row-boat to Philadelphia, landing there on a Sunday morning, cold, bedraggled, and friendless, with one Dutch dollar in his pocket. But he soon found employment in a printing-office, earned a little money, made a few friends, and took comfortable lodgings in the house of a Mr. Read, with whose daughter Deborah he proceeded to fall in love. It was not long before his excellent training and rare good sense attracted the favorable notice of Sir William Keith, governor of Pennsylvania. The Philadelphia printers being ignorant and unskilful, Keith wished to secure Franklin's services, and offered to help set him up in business for himself and give him the government printing, such as it was. Franklin had now been seven months in Philadelphia, and, his family having at length heard news of him, it was thought best that he should return to Boston and solicit aid from his father in setting up a press in Philadelphia. On reaching Boston he found his brother sullen and resentful, but his father received him kindly. He refused the desired assistance, on the ground that a boy of eighteen was not fit to manage a business, but he commended his industry and perseverance, and made no objection to his returning to Philadelphia, warning him to restrain his inclination to write lampoons and satires, and holding out hopes of aid in case he should behave industriously and frugally until twenty-one years of age.

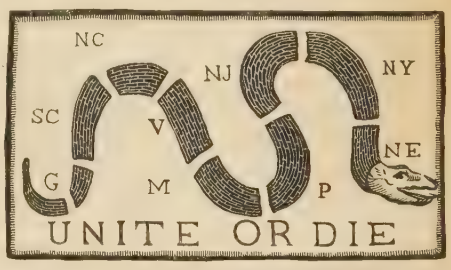
On Franklin's return to Philadelphia, the governor promised to furnish the money needful for establishing him in business, and encouraged him to go over to London, in order to buy a press and type and gather useful information. But Sir William was one of those social nuisances that are lavish in promises but scanty in performance. It was with the assurance that the ship's mail-bag carried letters of introduction and the necessary letter of credit that young Franklin crossed the ocean. On reaching England, he found that Keith had deceived him. Having neither money nor credit wherewith to accomplish the purpose of his journey or return to America, he sought and soon found a place as journeyman in a London printing-house. Before leaving home he had been betrothed to Miss Read. He now wrote to her that it would be long before he should return to America. His ability and diligence enabled him to earn money

quickly, but for a while he was carried away by the fascinations of a great city, and spent his money as fast as he earned it. In the course of his eighteen months in London he gained much knowledge of the world, and became acquainted with some distinguished persons, among others Dr. Mandeville and Sir Hans Sloane; and he speaks of his "extreme desire" to meet Sir Isaac Newton, in which he was not gratified. In the autumn of 1726 he made his way back to Philadelphia, and after some further vicissitudes was at length (in 1729) established in business as a printer. He now became editor and proprietor of the "Pennsylvania Gazette," and soon made it so popular by his ably-written articles that it yielded him a comfortable income. During his absence in England, Miss Read, hearing nothing from him after his first letter, had supposed that he had grown tired of her. In her chagrin she married a worthless knave, who treated her cruelly, and soon ran away to the West Indies, where he died. Franklin found her overwhelmed with distress and mortification, for which he felt himself to be partly responsible. Their old affection speedily revived, and on 1 Sept., 1730, they were married. They lived most happily together until her death, 19 Dec., 1774.

As Franklin grew to maturity he became noted for his public spirit and an interest at once wide and keen in human affairs. Soon after his return from England he established a debating society, called the "Junto," for the discussion of questions in morals, politics, and natural philosophy. Among the earliest members may be observed the name of the eminent mathematician, Thomas Godfrey, who soon afterward invented a quadrant similar to Hadley's. For many years Franklin was the life of this club, which in 1743 was developed into the American philosophical society. In 1732 he began publishing an almanac for the diffusion of useful information among the people. Published under the pen-name of "Richard Saunders," this entertaining collection of wit and wisdom, couched in quaint and pithy language, had an immense sale, and became famous throughout the world as "Poor Richard's Almanac." In 1731 Franklin founded the Philadelphia library. In 1743 he projected the university that a few years later was developed into the University of Pennsylvania, and was for a long time considered one of the foremost institutions of learning in this country.

From early youth Franklin was interested in scientific studies, and his name by and by became associated with a very useful domestic invention, and also with one of the most remarkable scientific discoveries of the 18th century. In 1742 he invented the "open stove, for the better warming of rooms," an invention that has not yet entirely fallen into disuse. Ten years later, by wonderfully simple experiments with a kite, he showed that lightning is a discharge of electricity; and in 1753 he received the Copley medal from the Royal society for this most brilliant and pregnant discovery.

A man so public-spirited as Franklin, and editor of a prominent newspaper besides, could not long remain outside of active political life. In 1736 he was made clerk of the assembly of Pennsylvania, and in 1737 postmaster of Philadelphia. Under his skilful management this town became the center of the whole postal system of the colonies, and in 1753 he was made deputy postmaster-general for the continent. Besides vastly increasing the efficiency of the postal service, he succeeded at the same time in making it profitable. In 1754 Franklin becomes a conspicuous figure in Continental politics. In that year the prospect of war with the French led several of the royal governors to call for a congress of all the colonies, to be held at Albany. The primary purpose of the meeting was to make sure of the friendship of the Six Nations, and to organize a general scheme of operations against the French. The secondary purpose was to prepare some plan of confederation which all the colonies might be persuaded to adopt. Only the four New England colonies, with New York, Pennsylvania, and Maryland, sent commissioners to this congress. The people seem to have felt very little interest in the movement. Among the newspapers none seem to have favored it warmly except the "Pennsylvania Gazette," which appeared with a union device and the motto "Unite or Die!" At the Albany congress Franklin brought forward the first coherent scheme ever propounded for securing a permanent Federal union of the thirteen colonies.



The plan contemplated the union of all the colonies under a single central government, under which each colony might preserve its local independence. The legislative assembly of each colony was to choose, once in three years, representatives to attend a Federal grand council, which was to meet every year at Philadelphia, as the city most convenient of access from north and south alike. This grand council was to choose its own speaker, and could neither be dissolved nor prorogued except by its own consent, or by especial order of the crown. The grand council was to make treaties with the Indians, and regulate trade with them; and it was to have sole power of legislation on all matters concerning the colonies as a whole. To these ends it could lay taxes, enlist soldiers, build forts, and nominate civil officers. Its laws were to be submitted to the king for approval; and the royal veto, in order to be effective, must be exercised within three years. To this grand council each colony was to send a number of representatives, proportioned to its contributions to the continental military service, the minimum number being two, the maximum seven. With the exception of such matters of general concern as were to be managed by the grand council, each colony was to retain its powers of legislation intact. In an emergency any colony might singly defend itself against foreign attack, and the Federal government was prohibited from impressing soldiers or seamen without the consent of the local legislature. The supreme executive power was to be vested in a president or governor-general, appointed and paid by the crown. He was to have a veto on all the acts of the grand council, and was to nominate all military officers, subject to its approval. No money could be issued save by joint order of the governor-general and council. "This plan," said Franklin, "is not altogether to my mind; but it is as I could get it." To the credit of its great author, it should be observed that this scheme—long afterward known as the "Albany plan"—contemplated the formation of a self-sustaining Federal

government, and not of a mere league. It aimed at creating "a public authority as obligatory in its sphere as the local governments were in their spheres"; and in this respect it was much more complete than the articles of confederation under which the thirteen states contrived to live from 1781 till 1789. But public opinion was not yet ripe for the adoption of such bold and comprehensive ideas. After long debate, the Albany congress decided to adopt Franklin's plan, and copies of it were sent to all the colonies for their consideration; but nowhere did it meet with popular approval. A town-meeting in Boston denounced it as subversive of liberty; Pennsylvania rejected it without a word of discussion; not one of the assemblies voted to adopt it. When sent over to England, to be inspected by the ministers of the crown, it only irritated and alarmed them. In England it was thought to give too much independence of action to the colonies; in America it was thought to give too little. The scheme was, moreover, impracticable, because the desire for union on the part of the several colonies was still extremely feeble; but it shows on the part of Franklin wonderful foresightedness. If the Revolution had not occurred, we should probably have sooner or later come to live under a constitution resembling the Albany plan. On the other hand, if the Albany plan had been put into operation, it might perhaps have so adjusted the relations of the colonies to the British government that the Revolution would not have occurred.

The only persons that favored Franklin's scheme were the royal governors, and this was because they hoped it might be of service in raising money with which to fight the French. In such matters the local assemblies were extremely niggardly. At the beginning of the war in 1755, Franklin had been for some years the leading spirit in the assembly of Pennsylvania, which was engaged in a fierce dispute with the governor concerning the taxation of the proprietary estates. The governor contended that these should be exempt from taxation; the assembly insisted rightly that these estates should bear their due share of the public burdens. On another hotly disputed question the assembly was clearly in the wrong; it insisted upon issuing paper money, and against this pernicious folly governor after governor fought with obstinate bravery. In 1755 the result of these furious contentions was that Braddock's army was unable to get any support except from the steadfast personal exertions of Franklin, who used his great influence with the farmers to obtain horses, wagons, and provisions, pledging his own property for their payment. Until the question of the proprietary estates should be settled, the operations of the war seemed likely to be paralyzed. In 1757 Franklin was sent over to England to plead the cause of the assembly before the privy council. This business kept him in England five years, in the course of which he became acquainted with the most eminent people in the country. His discoveries and writings had won him a European reputation. Before he left England, in 1762, he received the degree of LL. D. from the universities of Oxford and Edinburgh. His arguments before the privy council were successful; the sorely vexed question was decided against the proprietary governors; and on his return to Pennsylvania in 1762 he received the formal thanks of the assembly. It was not long before his services were again required in England. In 1764 Grenville gave notice of his proposed stamp-act for defraying part of the expenses of the late war, and Franklin was sent to England as agent for Pennsylvania, and instructed to make every effort to prevent the passage of the stamp-act. He carried out his instructions ably and faithfully; but when the obnoxious law was passed in 1765, he counselled submission. In this case, however, the wisdom of this wisest of Americans proved inferior to the "collective wisdom" of his fellow-countrymen. Warned by the fierce resistance of the Americans, the new ministry of Lord Rockingham decided to reconsider the act. In an examination before the house of commons, Franklin's strong sense and varied knowledge won general admiration, and contributed powerfully toward the repeal of the stamp-act. The danger was warded off but for a time, however. Next year Charles Townshend carried his measures for taxing American imports and applying the proceeds to the maintenance of a civil list in each of the colonies, to be responsible only to the British government. The need for Franklin's services as mediator was now so great that he was kept in England, and presently the colonies of Massachusetts, New Jersey, and Georgia chose him as their agent. During these years he made many warm friendships with eminent men in England, as with Burke, Lord Shelburne, Lord Howe, David Hartley, and Dr. Priestley. His great powers were earnestly devoted to preventing a separation between England and America. His methods were eminently conciliatory; but the independence of character with which he told unwelcome truths made him an object of intense dislike to the king and his friends, who regarded him as aiming to undermine the royal authority in America. George III. is said to have warned his ministers against "that crafty American, who is more than a match for you all." In 1774 this dread and dislike found vent in an explosion, the echoes of which have hardly yet died away. This was the celebrated affair of the "Hutchinson letters."

For several years a private and unofficial correspondence had been kept up between Hutchinson, Oliver, and other high officials in Massachusetts, on the one hand, and Thomas Whately, who had formerly been private secretary to George Grenville, on the other. The choice of Whately for correspondent was due to the fact that he was supposed to be very familiar at once with colonial affairs and with the views and purposes of the king's friends. In these letters Hutchinson had a great deal to say about the weakness of the royal government in Massachusetts, and the need for a strong military force to support it; he condemned the conduct of Samuel Adams and the other popular leaders as seditious, and enlarged upon the turbulence of the people of Boston; he doubted if it were practicable for a colony removed by 3,000 miles of ocean to enjoy all the liberties of the mother country without severing its connection with her; and he had therefore reluctantly come to the conclusion that Massachusetts must submit to "an abridgment of what are called English liberties." Oliver, in addition to such general views, maintained that judges and other crown officers should have fixed salaries assigned by the crown, so as to become independent of popular favor. There can be no doubt that such suggestions were made in perfect good faith, or that Hutchinson and Oliver had the true interests of Massachusetts at heart, according to their lamentably inadequate understanding of the matter. But to the people of Massachusetts, at that time, such suggestions could but seem little short of treasonable. Thomas Whately died in June, 1772, and all his papers passed into the custody of William, his brother and executor. In the follow-

ing December, before William Whately had opened or looked over the packet of letters from Hutchinson and his friends, it was found that they had been purloined by some person unknown. It is not certain that the letters had ever really passed into William Whately's hands. They may have been left lying in some place where they might have attracted the notice of some curious busybody, who forthwith laid hands upon them. This point has never been satisfactorily cleared up. At all events, they were brought to Franklin as containing political intelligence that might prove important. At this time Massachusetts was furiously excited over the attempt of Lord North's government to have the salaries of the judges fixed and paid by the crown instead of the colonial assembly. The judges had been threatened with impeachment should they dare to receive a penny from the royal treasury, and at the head of the threatened judges was Oliver's younger brother, the chief justice of Massachusetts. As agent for the colony, Franklin felt it to be his duty to give information of the dangerous contents of the letters now laid before him. Although they purported to be merely a private and confidential correspondence, they were not really "of the nature of private letters between friends." As Franklin said, "they were written by public officers to persons in public station, on public affairs, and intended to procure public measures"; they were therefore handed to other public persons, who might be influenced by them to produce those measures; their tendency was to incense the mother country against her colonies, and, by the steps recommended, to widen the breach, which they effected. The chief caution "from the writers to Thomas Whately" with respect to privacy was, to keep their contents from "the knowledge of the colonial agents in London," who, the writers apprehended, "might return them, or copies of them, to America." Franklin felt as Walsingham might have felt on suddenly discovering, in private and confidential papers, the incontrovertible proof of some popish plot against the life of Queen Elizabeth. From the person that brought him the letters he got permission to send them to Massachusetts, on condition that they should be shown only to a few people in authority, that they should not be copied or printed, that they should presently be returned, and that the name of the person from whom they were obtained should never be disclosed. This last condition was most thoroughly fulfilled. The others must have been felt to be mainly a matter of form; it was obvious that, though they might be literally complied with, their spirit would inevitably be violated. As Orlando Hutchinson writes, "we all know what this sort of secrecy means, and what will be the end of it"; and, as Franklin himself observed, "there was no restraint proposed to talking of them, but only to copying." The letters were sent to the proper person, Thomas Cushing, speaker of the Massachusetts assembly, and he showed them to Hancock, Hawley, and the two Adamses. To these gentlemen it could have been no new discovery that Hutchinson and Oliver held such opinions as were expressed in the letters; but the documents seemed to furnish tangible proof of what had long been suspected, that the governor and his lieutenant were plotting against the liberties of Massachusetts. They were soon talked about at every town-meeting and on every street-corner. The assembly twitted Hutchinson with them, and asked for copies of these and other such papers as he might see fit to communicate. He replied, somewhat sarcastically, "If you desire copies with a view to make them public, the originals are more proper for the purpose than any copies." Mistaken and dangerous as Hutchinson's policy was, his conscience acquitted him of any treasonable purpose, and he must naturally have preferred to have the people judge him by what he had really written rather than by vague and distorted rumors. His reply was taken as sufficient warrant for printing the letters, and they were soon in the possession of every reader in England or America who could afford sixpence for a political tract. On the other side of the Atlantic they aroused as much excitement as on this, and William Whately became concerned to know who could have purloined the letters. On slight evidence he charged a Mr. Temple with the theft, and a duel ensued in which Whately was wounded. Hearing of this affair, Franklin published a card in which he avowed his own share in the transaction, and in a measure screened all others by drawing the full torrent of wrath and abuse upon himself. All the ill-suppressed spleen of the king's friends was at once discharged upon him. Meanwhile the Massachusetts assembly formally censured the letters, as evidence of a scheme for subverting the constitution of the colony, and petitioned the king to remove Hutchinson and Oliver from office. In January, 1774, the petition was duly brought before the privy council in the presence of a large and brilliant gathering of spectators. The solicitor-general, David Wedderburn, instead of discussing the question on its merits, broke out with a violent and scurrilous invective against Franklin, whom he derided as a man of letters, calling him a "man of three letters," the Roman slang expression for *f-u-r*, a thief. Of the members of government present, Lord North alone preserved decorum; the others laughed and clapped their hands, while Franklin stood as unmoved as the moon at the baying of dogs. He could afford to disregard the sneers of a man like Wedderburn, whom the king, though fain to use him as a tool, called the greatest knave in the realm. The Massachusetts petition was rejected as scandalous, and next day Franklin was dismissed from his office of postmaster-general.

They are in error who think it was this personal insult that led Franklin to favor the revolt of the colonies, as they are also wrong who suppose that his object in sending home the Hutchinson letters was to stir up dissension. His conduct immediately after passing through this ordeal is sufficient proof of the unabated sincerity of his desire for conciliation. The news of the Boston tea-party arriving in England about this time, led presently to the acts of April, 1774, for closing the port of Boston and remodelling the government of Massachusetts. The only way in which Massachusetts could escape these penalties was by indemnifying the East India company for the tea that had been destroyed; and Franklin, seeing that the attempt to enforce the new acts must almost inevitably lead to war, actually went so far as to advise Massachusetts to pay for the tea. Samuel Adams, on hearing of this, is said to have observed: "Franklin may be a good philosopher, but he is a bungling politician." Certainly in this instance Franklin showed himself less far-sighted than Adams and the people of Massachusetts. The moment had come when compromise was no longer possible. To have yielded now, in the face of the arrogant and tyrannical acts of April, would have been not only to stultify the heroic deeds of the patriots in the last December, but it would have broken up the nascent union of the colonies; it would virtually have surrendered them, bound hand and foot, to the tender

mercies of the king. That Franklin should have suggested such a step, in order to avoid precipitating a conflict, shows forcibly how anxious he was to keep the peace. He remained in England nearly a year longer, though many things were done by the king's party to make his stay unpleasant. During the autumn and winter he had many conversations with persons near the government, who were anxious to find out how the Americans might be conciliated without England's abandoning a single one of the wrong positions that she had taken. This was an insolvable problem, and when Franklin had become convinced of this he reluctantly gave it up and returned to America, arriving in Philadelphia on 5 May, 1775, to find that the shedding of blood had just begun. On the next day the assembly of Pennsylvania unanimously elected him delegate to the 2d Continental congress, then about to assemble. He now became a zealous supporter of the war, and presently of the Declaration of Independence. When congress, in July, decided to send one more petition to the king, he wrote a letter which David Hartley read aloud in the house of commons. "If you flatter yourselves," said Franklin, "with beating us into submission, you know neither the people nor the country. The congress will await the result of their *last* petition." A little more than two years afterward, in December, 1777, as parliament sat overwhelmed with chagrin at the tidings of Burgoyne's surrender, Hartley pulled out this letter again and upbraided the house with it. "You were then," said he, "confident of having America under your feet, and despised every proposition recommending peace and lenient measures." When this unyielding temper had driven the Americans to declare their independence of Great Britain, Franklin was one of the committee of five chosen by congress to draw up a document worthy of the occasion. To the document, as drafted by Jefferson, he seems to have contributed only a few verbal emendations. The Declaration of Independence made it necessary to seek foreign alliances, and first of all with England's great rival, France. Here Franklin's world-wide fame and his long experience of public life in England enabled him to play a part that would have been impossible for any other American. He had fifteen years of practice as an ambassador, and was thoroughly familiar with European politics. In his old days of editorial work in Philadelphia, with his noble scholarly habit of putting every moment to some good use, he had learned the French language, with Italian and Spanish also, besides getting some knowledge of Latin. He was thus possessed of talismans for opening many a treasure-house, and among all the encyclopædist philosophers of Paris it would have been hard to point to a mind more encyclopædic than his own. Negotiations with the French court had been begun already, through the agency of Arthur Lee and Silas Deane, and in the autumn of 1776 Franklin was sent out to join with these gentlemen in securing the active aid and co-

operation of France in the war. His arrival, on 21 Dec., was the occasion of great excitement in the fashionable world of Paris. By thinkers like D'Alembert and Diderot he was regarded as the embodiment of practical wisdom. To many he seemed to sum up in himself the excellences of the American cause—justice, good sense, and moderation. It was Turgot that said of him, "Eripuit cœlo fulmen, sceptrumque tyrannis." As symbolizing the liberty for which all France was yearning, he was greeted with a popular enthusiasm such as perhaps no French man of letters except Voltaire has ever called forth. Shopkeepers rushed to their doors to catch a glimpse of him as he passed along the sidewalk, while in evening salons jewelled ladies of the court vied with one another in paying him homage.

As the first fruits of his negotiations, the French government agreed to furnish two million livres a year, in quarterly instalments, to aid the American cause. Arms and ammunition were sent over, and Americans were allowed to fit out privateers in French ports, and even to bring in and sell their prizes. Further than this France was not yet ready to go. She did not wish to incur the risk of war with England until an American alliance could seem to promise her some manifest advantage. This surreptitious aid continued through the year 1777, until the surrender of Burgoyne put a new face upon things. The immediate consequence of that great event was an attempt on the part of Lord North's government to change front, and offer concessions to the Americans, which, if they had ever been duly considered, might even at this late moment have ended in some compromise between England and the United States. Now, if ever, was the moment for France to interpose, and she seized it. On 6 Feb., 1778, the treaty was signed at Paris which ultimately secured the independence of the United States. For the successful management of this negotiation, one of the most important in the annals of modern diplomacy, the credit is almost solely due to Franklin. Another invaluable service was the negotiation of loans without which it would have been impossible for the United States to carry on the war. As the Continental congress had no power to levy taxes, there were but three ways in which it could pay the expenses of the army: (1) By requisitions upon the state governments; (2) by issuing its promissory notes, or so-called "paper money"; (3) by foreign loans. The first method brought in money altogether too slowly; the second served its purpose for a short time, but by 1780 the continental notes had became worthless. The war of independence would have been an ignominious failure but for foreign loans, and these were made mostly by France and through the extraordinary sagacity and tact of Franklin. It is doubtful if any other man of that time could have succeeded in getting so much money from the French government, which found it no easy matter to pay its own debts and support an idle population of nobles and clergy upon taxes wrung from a groaning peasantry. During Franklin's stay in Paris the annual contribution of 2,000,000 livres was at first increased to 3,000,000, and afterward, in 1781, to 4,000,000. Besides this, which was a loan, the French government sent over 9,000,000 as a free gift, and guaranteed the interest upon a loan of 10,000,000 to be raised in Holland. Franklin himself, just before sailing for France, had gathered together all the cash he could command for the moment, beyond what was needed for immediate necessities, and amounting to nearly £4,000, and put it into the United States treasury as a loan.

On the fall of Lord North's ministry in March, 1782, Franklin sent a letter to his friend, Lord Shelburne, expressing a hope that peace might soon be made. When the letter reached London, the new ministry, in which Shelburne was secretary of state for home and colonies, had already been formed, and Shelburne, with the consent of the cabinet, replied by sending over to Paris an agent to talk with Franklin informally, and ascertain the terms upon which the Americans would make peace. The person chosen for this purpose was Richard Oswald, a Scottish merchant of frank disposition and liberal views. In April there were several conversations between Oswald and Franklin, in one of which the latter suggested that, in order to make a durable peace, it was desirable to remove all occasion for future quarrel; that the line of frontier between New York and Canada was inhabited by a lawless set of men, who in time of peace would be likely to breed trouble between their respective governments; and that therefore it would be well for England to cede Canada to the United States. A similar reasoning would apply to Nova Scotia. By ceding these countries to the United States, it would be possible, from the sale of unappropriated lands, to indemnify the Americans for all losses of private property during the war, and also to make reparation to the Tories whose estates had been confiscated. By pursuing such a policy, England, which had made war on America unjustly, and had wantonly done it great injuries, would achieve not merely peace, but reconciliation with America, and reconciliation, said Franklin, is "a sweet word." This was a very bold tone for Franklin to take; but he knew that almost every member of the Whig ministry had publicly expressed the opinion that the war against America was unjust and wanton; and being, moreover, a shrewd hand at a bargain, he began by setting his terms high. Oswald seems to have been convinced by Franklin's reasoning, and expressed neither surprise nor reluctance at the idea of ceding Canada. The main points of this conversation were noted upon a sheet of paper, which Franklin allowed Oswald to take to London and show to Lord Shelburne, first writing upon it an express declaration of its informal character. On receiving this memorandum, Shelburne did not show it to the cabinet, but returned it to Franklin without any immediate answer, after keeping it only one night. Oswald was presently sent back to Paris, empowered as commissioner to negotiate with Franklin, and carried Shelburne's answer to the memorandum that desired the cession of Canada for three reasons. The answer was terse: "1. *By way of reparation.*—Answer: No reparation can be heard of. 2. *To prevent future wars.*—Answer: It is to be hoped that some more friendly method will be found. 3. *As a fund of indemnification to loyalists.*—Answer: No independence to be acknowledged without their being taken care of." Besides, added Shelburne, the Americans would be expected to make some compensation for the surrender of Charleston, Savannah, and the city of New York, still held by British troops. From this it appears that Shelburne, as well as Franklin, knew how to begin by asking more than he was likely to get. England was no more likely to listen to a proposal for ceding Canada than the Americans were to listen to the suggestion of compensating the British for surrendering New York. But there can be little doubt that the bold stand thus taken by Franklin at the outset, together with the influence he acquired over Oswald, contributed materially to the brilliant success of the American negotiations. This is the more important to be noted in connection with the biography of Franklin, since in the later stages of the negotiations the initiative passed almost entirely out of his hands, and into those of his colleagues, Jay and Adams. The form that the treaty took was mainly the work of these younger statesmen; the services of Franklin were chiefly valuable at the beginning, and again, to some extent, at the end. There were two grave difficulties in making a treaty. The first was, that France was really hostile to the American claims. She wished to see the country between the Alleghanies and the Mississippi divided between England and Spain; England to have the region north of the Ohio, and the region south of it to remain an Indian territory under the protectorate of Spain, except a narrow strip on the western slope of the Alleghanies, over which the United States might exercise protectorship. In other words, France wished to confine the United States to the east of the Alleghanies, and forever prevent their expansion westward. France also wished to exclude the Americans from all share in the fisheries, in order to prevent the United States from becoming a great naval power. As France, up to a certain point, was our ally, this antagonism of interests made the negotiation extremely difficult. The second difficulty was the unwillingness of the British government to acknowledge the independence of the United States as a condition that must precede all negotiation. The Americans insisted upon this point, as they had insisted ever since the Staten Island conference in 1776; but England wished to withhold the recognition long enough to bargain with it in making the treaty. This difficulty was enhanced by the fact that, if this point were conceded to the Americans, it would transfer the conduct of the treaty from the colonial secretary, Shelburne, to the foreign secretary, Fox; and these two gentlemen not only differed widely in their views of the situation, but were personally bitter enemies. Presently Fox heard of the private memorandum that Shelburne had received from Franklin but had not shown to the cabinet, and he concluded, quite wrongly, that Shelburne was playing a secret part for purposes of his own. Accordingly, Fox made up his mind at all events to get the American negotiations transferred to his own department; and to this end, on the last day of June, he moved in the cabinet that the independence of the United States should be unconditionally acknowledged, so that England might treat as with a foreign power. The motion was lost, and Fox prepared to resign his office; but the very next day the death of Lord Rockingham broke up the ministry. Lord Shelburne now became prime minister, and other circumstances occurred which simplified the problem. In April the French fleet in the West Indies had been annihilated by Rodney; in September this was followed by the total defeat of the combined French and Spanish forces at Gibraltar. This altered the situation seriously. England, though defeated in America, was victorious as regarded France and Spain. The avowed object for which France had entered into alliance with the Americans was to secure the independence of the United States, and this point was now substantially gained. The chief object for which Spain had entered into alliance with France was to drive the English from Gibraltar, and this point was now decidedly lost. France had bound herself not to desist from the war until Spain should recover Gibraltar; but now there was little hope of accomplishing this, except by some fortunate bargain in the treaty. Vergennes now tried to sat-

isfy Spain at the expense of the United States, and he sent a secret emissary under an assumed name to Lord Shelburne, to develop his plan for dividing the Mississippi valley between England and Spain. This was discovered by Jay, who counteracted it by sending a messenger of his own to Shelburne, who thus perceived the antagonism that had arisen between the allies. It now became manifestly for the advantage of England and the United States to carry on their negotiations without the intervention of France, as England preferred to make concessions to the Americans rather than to the house of Bourbon. By first detaching the United States from the alliance, she could proceed to browbeat France and Spain. There was an obstacle in the way of a separate negotiation. The chevalier Luzerne, the French minister at Philadelphia, had been busy with congress, and that body had sent instructions to its commissioners at Paris to be guided in all things by the wishes of the French court. Jay and Adams, overruling Franklin, took the responsibility of disregarding these instructions; and the provisions of the treaty, so marvellously favorable to the Americans, were arranged by a separate negotiation with England. In the arrangement of the provisions, Franklin played an important part, especially in driving the British commissioners from their position with regard to the compensation of loyalists. After a long struggle upon this point, Franklin observed that, if the loyalists were to be indemnified, it would be necessary also to reckon up the damage they had done in burning villages and shipping, and then strike a balance between the two accounts; and he gravely suggested that a special commission might be appointed for this purpose. It was now getting late in the autumn, and Shelburne felt it to be a political necessity to bring the negotiation to an end before the assembling of parliament. At the prospect of endless discussion, which Franklin's suggestion involved, the British commissioners gave way and accepted the American terms. Affairs having reached this point, it remained for Franklin to lay the matter before Vergennes in such wise as to avoid a rupture of the cordial relations between America and France. It was a delicate matter, for, in dealing separately with the English government, the Americans laid themselves open to the charge of having committed a breach of diplomatic courtesy; but Franklin managed it with entire success.

On the part of the Americans the treaty of 1783 was one of the most brilliant triumphs in the whole history of modern diplomacy. Had the affair been managed by men of ordinary ability, the greatest results of the Revolutionary war would probably have been lost; the new republic would have been cooped up between the Atlantic and the Alleghanies; our westward expansion would have been impossible without further warfare; and the formation of our Federal union would doubtless have been effectively hindered or prevented. To the grand triumph the varied talents of Franklin, Adams, and Jay alike contributed. To the latter is due the credit of detecting and baffling the sinister designs of France; but without the tact of Franklin this probably could not have been accomplished without offending France in such wise as to spoil everything.

Franklin's last diplomatic achievement was the negotiation of a treaty with Prussia, in which was inserted an article looking toward the abolition of privateering. This treaty, as Washington observed at the time, was the most liberal that had ever been made between independent powers, and marked a new era in international morality. In September, 1785, Franklin returned to America, and in the next month was chosen president of Pennsylvania. He was re-elected in 1786 and 1787. In the summer of the latter year he was a delegate to the immortal convention that framed the constitution of the United States. He took a comparatively small part in the debates, but some of his suggestions were very timely, as when he seconded the Connecticut compromise. At the close of the proceedings he made a short speech, in which he said: "I consent to this constitution, because I expect no better, and because I am not sure that it is not the best." His last public act was the signing of a memorial addressed to congress by an anti-slavery society of which he was president. This petition, which was presented on 12 Feb., 1790, asked for the abolition of the slave-trade, and for the emancipation of slaves. The southern members of congress were very indignant, and Mr. Jackson, of Georgia, undertook to prove, with the aid of texts from Scripture, the sacredness of the institution of slavery. On 23 March, Franklin wrote an answer, which was published in the "National Gazette." It was an ingenious parody of Jackson's speech, put into the mouth of a member of the "divan of Algiers," and fortified by texts from the Koran. This characteristic article, one of the most amusing he ever published, was written within four weeks of his death.

The abilities of Franklin were so vast and so various, he touched human life at so many points, that it would require an elaborate essay to characterize him properly. He was at once philosopher, statesman, diplomatist, scientific discoverer, inventor, philanthropist, moralist, and wit, while as a writer of English he was surpassed by few men of his time. History presents few examples of a career starting from such humble beginnings and attaining to such great and enduring splendor. The career of a Napoleon, for example, in comparison with Franklin's, seems vulgar and trivial. The ceaseless industry of Franklin throughout his long life was guided to an extraordinary degree by the clear light of reason, and inspired by a warm and enthusiastic desire for the improvement of mankind. He is in many respects the greatest of Americans, and one of the greatest men whose names are recorded in history. In accordance with his wishes, Franklin's remains were deposited beside those of his wife and daughter, in the yard of Christ church, at the corner of 5th and Arch streets, Philadelphia, under a plain marble stone inscribed "Benjamin and Deborah Franklin." (See accompanying illustration.) In early life he had

written a fanciful epitaph for himself, which was published in the "New England Courant" and has become famous: "The body of Benjamin Franklin, printer, like the cover of an old book, its contents torn out, and stripped of its lettering and gilding, lies here, food for worms. But the work shall not be lost; for it will, as he believed, appear once more in a new and more elegant edition, revised and corrected by the Author."

Franklin left a charming "Autobiography," covering the earlier part of his life down to his arrival in London in 1757. The best edition is the one edited by John Bigelow (Philadelphia, 1868). His works were edited by Jared Sparks (10 vols., Boston, 1850). In 1885 a large mass of unedited manuscripts, by Franklin or relating to him, collected by the late Henry Stevens, of Vermont, for a long time a resident in London, was purchased by congress. A new edition of Franklin's complete works, edited by John Bigelow and containing much new material obtained from the Stevens manuscripts, is now in course of publication (10 vols., New York, 1887). See Condorcet's "Éloge de Franklin" (Paris, 1790); Bauer's "Washington und Franklin" (Berlin, 1803–'6); Schmaltz's "Leben Benj. Franklin's" (Leipsic, 1840); Parton's "Life and Times of Benjamin Franklin" (2 vols., New York, 1864); Mignet's "Vie de Franklin" (Paris, 1873); and Hale's "Franklin in France" (Boston, 1887).

FRANKLIN, Jesse, statesman, b. in Orange county, Va., 24 March, 1760; d. in Surry county, N. C., in September, 1823. His father removed to North Carolina just before the Revolution. Jesse served as major in the Revolutionary war, was a member of the house of delegates of North Carolina in 1794, 1797, and 1798, and a member of the state senate in 1805–'6, a member of congress from 7 Dec., 1795, till 3 March, 1797, U. S. senator from 4 March, 1799, till 3 March, 1805, and again from 4 March, 1807, till 3 March, 1813, acting a part of the time as president *pro tempore* of the senate. In 1816 he was appointed by the president a commissioner to treat with the Chickasaw Indians, and in 1820 he was elected governor of North Carolina.

FRANKLIN, John, pioneer, b. in Canaan, Conn., 26 Sept., 1749; d. in Athens, Pa., 1 March, 1831. He removed to the Wyoming valley in 1775, settled in Huntington, and was an active participant in the settlement of that region. During the Revolution he was a captain in the 24th regiment of Connecticut militia, was with his company in the Sullivan campaign, and was severely wounded in the shoulder at the battle or skirmish at Chemung. He was a justice of the peace, colonel of militia, and several times member of assembly. He was an active, energetic, and resolute man, with talents of a high order, much beloved and confided in by the people. He and Col. Jenkins stood side by side in their resistance to the encroachments of the "Pennimites" upon their rights and possessions, and for thirty years sustained the rights of the settlers against the proprietors and the state who were led by Alexander Patterson, Gen. John Armstrong, and Col. Timothy Pickering. Franklin was kidnapped by Pickering with a band of frontier roughs, 2 Oct., 1787, taken to Philadelphia, imprisoned, loaded with irons, and detained fourteen months without trial.

FRANKLIN, Sir **John,** English explorer, b. at Spilsby, Lincolnshire, 16 April, 1786; d. in the arctic regions, near lat. 69° 37′ N., lon. 98° 4′ W., 11 June, 1847. He was destined for the church, but his father yielded to the boy's desire to become a sailor, and procured him admission to the navy as a midshipman at the age of fourteen. He first served on board the "Polyphemus," and was at the battle of Copenhagen, 2 April, 1801. Two months later he joined the "Investigator," and was commissioned by the English government to explore and map the coasts of Australia. After nearly two years spent in this service, he sailed for home in the store-ship "Porpoise"; but that vessel was wrecked, 18 Aug., 1803, on a reef about 200 miles from the coast of Australia, where Franklin and his companions remained for fifty days. He was finally rescued and carried to England, where he joined the ship-of-the-line "Bellerophon," and in 1805 took part in the battle of Trafalgar. He served as 2d lieutenant in the "Bedford" on the coast of the United States during the war of 1812–'15, and commanded the boats of the "Bedford" in a fight with the U. S. gun-boats at New Orleans, one of which he boarded and captured. He was wounded in this engagement, and for his gallantry was made a 1st lieutenant. In 1818, the British government having fitted out an expedition to attempt the passage to India by crossing the polar sea to the north of Spitzbergen, Franklin was appointed to the command of the "Trent," one of the two vessels of the expedition, the other, the "Dorothea," being commanded by Capt. Buchan. After passing lat. 80° N. the "Dorothea" received so much damage from the ice that her immediate return to England was decided on. Franklin begged to be permitted to continue the voyage with the "Trent" alone, but Capt. Buchan would not consent, his vessel being almost in a sinking condition. In 1819 he was appointed to the command of an expedition to travel overland from Hudson's bay to the Arctic ocean, through Rupert's Land, and explore the coast of America eastward from the Coppermine river, while Lieut. Parry was despatched with two vessels to Lancaster sound. The expedition wintered the first year on the Saskatchewan river, and was fed by the Hudson's bay company; the second winter was spent on the "barren grounds," the party subsisting on game and fish procured by their own exertions, or purchased from their native neighbors. In the following summer the expedition descended the Coppermine river, and surveyed a considerable extent of the sea-coast to the eastward. Franklin returned to England in 1822. Shortly after his arrival he was made a post-captain, and elected a fellow of the Royal society. In 1825 he submitted a "plan for an expedition overland to the mouth of the Mackenzie river, and thence by sea to the northwest extremity of America, with the combined object also of surveying the coast between the Mackenzie and Coppermine rivers." The proposition was accepted, and he was appointed to superintend the expedition. He embarked at Liverpool, 16 Feb., 1825, descended the Mackenzie river, and traced the coast-line through thirty-seven degrees of longitude, from the mouth of the Coppermine river, where his former survey began, to near the 150th meridian, and approached within 160 miles of the most easterly point attained by Capt. Beechey, who was co-operating with him from Behring's straits. (See Beechey, Frederick William.) In 1829 he was knighted, and received the degree of D. C. L. from Oxford university, and the gold medal of the Geographical society of Paris. His next official employment was on the Mediterranean station in 1830, in command of the "Rainbow." In 1836 he was made governor of Tasmania, in which office he continued till 1843. He was a very popular governor, and originated and carried out many measures of importance to the colony. In 1845 he was appointed to the command of a new expedition to discover the north-

west passage. The ships chosen were the "Erebus" and "Terror," which were fitted out in the strongest and most complete manner, and manned by picked crews, amounting, officers and men, to 138 persons, with a transport-ship to convey additional stores as far as Disco in Greenland. They sailed from Sheerness, 19 May, 1845. Franklin's orders were to return in 1847. He was last seen by a whaler in Baffin bay, 26 July, 1845, and passed his first winter in a cove between Cape Riley and Beechey island. In 1848, no tidings of the expedition having reached England, the anxiety of the public led to the fitting out of several expeditions in search of him. Between 1848 and 1854 about fifteen expeditions were sent out by England and America in the hope of rescuing, or at least finding traces of, the missing explorers. In 1854, Dr. Rae, in conducting an exploring party of the Hudson's bay company, found some relics of the party. After long and persistent endeavors on the part of Lady Franklin, of the British government, and of private explorers, the mystery was finally solved by the expedition of McClintock in 1859, sent out by Lady Franklin in 1857. He discovered, on the shore of King William's Land, a record deposited in a cairn by the survivors of Franklin's company, dated 25 April, 1848, saying that Sir John died 11 June, 1847; that the ships were abandoned 22 April, 1848, when the survivors, 105 in number, set out for Great Fish river. Many relics were found of this party, who perished, one by one, on their southward journey, after leaving their vessels. Further intelligence was gained by the Stewart expedition in 1854, which found shoes, cooking utensils, etc., among the Esquimaux, bearing the Franklin mark. The natives declared that the party died of starvation. It appears that to Sir John belongs the honor of being the first to discover a northwest passage, and this is awarded him in the inscription on the monument erected to him in Waterloo place, London, in 1860. He attained the rank of rear-admiral. See Capt. F. L. McClintock, "Narrative of the Fate of Sir John Franklin" (London and Boston, 1860); Capt. S. Osborn, "The Career, Last Voyage, and Fate of Sir John Franklin" (London, 1860); also the works of Kane, Richardson, and Inglefield. The titles of the works published by Sir John are "Captain John Franklin's Narrative of a Journey to the Shores of the Polar Sea, 1819–'22, with an Appendix on various Subjects relating to Science and Natural History" (London, 1823); and "Captain John Franklin's Narrative of a Second Expedition to the Shores of the Polar Sea, 1825–'7" (Philadelphia, 1828, and London, 1829).

FRANKLIN, Thomas Levering, clergyman, b. in Philadelphia, Pa., 10 April, 1822. After his graduation at Trinity, in 1841, he was ordained deacon by Bishop Meade, in Alexandria, Va., in 1844, and priest in Camden, N. J., in the following year. His charges have been Trinity church, Moorestown, N. J.; St. Ann's, Amsterdam, N. Y.; St. John's, Mount Morris, N. Y.; Christ church, Madison, Ind.; and the Church of the Evangelists, Philadelphia, where he still remains (1887). He has travelled extensively through the United States and built churches and rectories. He founded the Jane Grey School, Mount Morris, N. Y., in 1866, and was its rector till 1870. For six years he edited the "Episcopal Register," and he has contributed to religious and secular journals. He received the degree of D. D. from Hobart in 1871.

FRANKLIN, William, the last royal governor of New Jersey, b. in Philadelphia in 1729; d. in England, 17 Nov., 1813. He was an illegitimate son of Dr. Benjamin Franklin. About a year after his birth his father married, took the child into his house, and brought him up as a son. In his childhood he was remarkably fond of books, and of an adventurous disposition. During the French war of 1744–'8 he obtained a commission in the Pennsylvania forces, with which he served in one or two campaigns on the Canadian frontier, and rose to be captain before he was of age, gaining praise for his conduct at Ticonderoga. From 1754 till 1756 he was comptroller of the general post-office, and during part of that period was clerk of the provincial assembly. In 1757 he accompanied his father to London, where he was admitted to the bar in 1758. He then visited Scotland, and became acquainted with the Earl of Bute, who recommended him to Lord Fairfax, and the latter secured for him, unsolicited, the appointment of governor of New Jersey in 1762, to which province he returned the next year. His appointment caused great disgust, probably from his birth as well as his time-serving conduct and courtier-like propensities, as he had been originally a Whig, but became a Tory on being made governor. In the revolutionary contest he remained loyal to Great Britain, and some of his letters, containing strong expressions of Tory sentiments, having been intercepted, a guard was put over him in January, 1776, by the new government, to prevent his escape from Perth Amboy, and he was declared an enemy to his country. He gave his parole that he would not leave the province, but in June he issued a proclamation, as governor of New Jersey, summoning a meeting of the abrogated legislative assembly. For this he was arrested by order of the provincial congress of New Jersey and removed to Burlington. He was soon afterward sent to East Windsor, Conn., where he was strictly guarded for about two years, till in November, 1778, he was exchanged. Gov. Franklin remained in New York till August, 1782, and for a short period served as president of the board of loyalists in New Jersey, when he sailed for England, in which country he continued to reside till his death. The English government granted him £1,800 in remuneration of his losses, and a pension of £800 per annum. William Franklin's adhesion to the royal cause led to an estrangement between him and his father, but in 1784 the two became partially reconciled. Dr. Franklin bequeathed to William his lands in Nova Scotia, and released him from all debts that his executors might find to be due from him, and added this clause in his will: "The part he acted against me in the late war, which is of public notoriety, will account for my leaving him no more of an estate he endeavored to deprive me of." He was the author of "A Humble Attempt at Scurrility, in Imitation of those Great Masters of the Art, the Rev. Dr. S—th, the Rev. Dr. Al—n, the Rev. Mr. Ew—n, the Rev. D. J. D—oe, and the heroic J—n D—n, Esq., being a Full Answer to the Observations on Mr. H's Advertisement. By Jack Retort, Student in Scurrility. Quilsilvania, 1765. A defence of Dr. Franklin, by his son. Printed at Philadelphia." The initials in the title severally signify Smith, Alison, Ewing, Dove, John Dickinson, and Hughes. Gov. Franklin also published "The Answer of his Excellency William Franklin, Esq." (Philadelphia).—His son, **William Temple,** d. in Paris, France, 25 May, 1823, accompanied his grandfather to Paris, acting as his secretary. He published editions of Franklin's works (London and Philadelphia, 1816–'19).

FRANKLIN, William Buel, soldier, b. in York, Pa., 27 Feb., 1823. He was graduated at

the U. S. military academy in 1843 at the head of his class, among the members of which were Ulysses S. Grant, Christopher C. Augur, and James A. Hardie. He served in the topographical engineers until the outbreak of the civil war, the dates of his various commissions being as follows: 2d lieutenant, 21 Sept., 1846; 1st lieutenant, 3 March, 1853; and captain, 1 July, 1857. He was brevetted 1st lieutenant, 23 Feb., 1847, for gallantry at the battle of Buena Vista. In the Mexican war he was attached to the staff of Gen. Taylor as a topographical engineer, was engaged in making reconnoissances, and carried Taylor's orders on the battle-field of Buena Vista. His other service prior to 1861 was such as ordinarily falls to an engineer officer. He was engaged in surveys on the western plains and mountains, as assistant professor at West Point, as engineer-secretary of the light-house board, and in charge of the construction of light-houses and public buildings. At the beginning of the civil war he was stationed in Washington in charge of the construction of the capitol, the treasury department, and the general post-office. He was appointed colonel of the 12th infantry, 14 May, 1861, brigadier-general of volunteers, 17 May, 1861, and major-general of volunteers, 4 July, 1862. He received the brevet of brigadier-general in the regular army, 30 June, 1862, for his gallant conduct in the battles before Richmond, and of major-general, 13 March, 1865, for services during the rebellion. His first active service was at Bull Run, where he commanded a brigade in Heintzleman's division, and was engaged in the heaviest part of the battle, around the Henry house. On the organization of the Army of the Potomac he received a division, and, when the 6th army corps was formed, he was placed in its command, retaining it throughout the year 1862. He was in most of the battles on the peninsula—Yorktown, West Point, White Oak Bridge, Savage's Station, Malvern Hill, and Harrison's Landing. After his return to Maryland with the army, he was in command on the field of Crampton's Gap, South Mountain, 14 Sept., 1862, and was engaged in the battle of Antietam, 17 Sept., 1862. At the battle of Fredericksburg, 13 Dec., 1862, he commanded the left grand division, consisting of his own corps, the 6th, under William F. Smith, and the 1st corps, under John F. Reynolds. (See Burnside.) Gen. Burnside complained to the committee on the conduct of the war that Franklin did not obey his orders in this battle, and the latter was sharply censured by the committee. He was also one of the generals removed by Burnside for insubordination, and the failure of the president to approve the order of removal led to Burnside's resignation of his command. After being on waiting orders for several months, Gen. Franklin was returned to active service in July, 1863, and on 15 Aug., 1863, was assigned to the command of the 19th army corps. He took part in the Red river expedition of 1864, and was wounded in the battle of Sabine Cross-Roads, 8 April, 1864. He

W. B. Franklin

was obliged to leave the army on account of illness, 29 April, 1864, and remained on leave of absence till 2 Dec., when he was assigned to duty on a retiring board at Wilmington, Del. During his leave he was captured by Confederate raiders while he was riding on the Philadelphia and Baltimore railroad, 11 July, 1864, but escaped from them on the following night. He resigned, 15 March, 1866, and since has been engaged as vice-president of the Colt's fire-arms company at Hartford, Conn., and in various other manufacturing enterprises. He has had charge of the construction of the new state-house at Hartford, was state commissioner at the Centennial exposition of 1876, presidential elector in 1876, adjutant-general of Connecticut in 1877 and 1878, and president of the board of managers of the National home for disabled soldiers in 1880–'7. He has contributed various articles to the "American Cyclopædia" and to periodical literature on military subjects.—His brother, **Samuel Rhoads,** naval officer, b. in York, Pa., 25 Aug., 1825, was appointed midshipman, 18 Feb., 1841, attached to the frigate "Cumberland," of the Pacific squadron, in 1841–'3, and to the frigate "United States" and store-ship "Relief," in the Pacific, in 1845–'7. He was present at the demonstration on Monterey during the Mexican war, promoted to passed midshipman, 10 Aug., 1847, and assigned to duty on the "Independence," of the Mediterranean squadron for 1849–'52, and to the coast survey, 1853–'5. He was commissioned master, 18 April, 1855, and lieutenant, 14 Sept. following, served in the naval academy in 1855–'6, on the sloop "Falmouth," of the Brazil squadron, in 1857–'9, on the "Macedonian" in 1859–'60, and on the steam sloop "Dacotah," on the Atlantic coast, in 1861–'2. He was a volunteer on board the "Roanoke" in the action with the "Merrimac" in March, 1862, in which the "Congress" and the "Cumberland" were destroyed. He became executive officer of the "Roanoke," and engaged with the forts at Sewell's point, but the sloop grounded, and did not get fairly into action. He was commissioned lieutenant-commander, 16 July, 1862, commanded the "Aroostook," of the James river flotilla, in 1862, the "Aroostook," of the western Gulf blockading squadron, in 1863, and was on special duty in New Orleans in 1864. During the operations in Mobile bay in the spring of 1865 he was on the staff of acting rear-admiral Thatcher, and was the naval representative in the demand for the surrender of the city of Mobile. He was made commander, 26 Sept., 1866, and given the steamer "Saginaw," of the north Pacific squadron, in 1866–'7, on ordnance duty at Mare Island, Cal., in 1868–'9, was advanced to the grade of captain, 13 Aug., 1872, and commanded the "Wabash" and afterward the "Franklin" until transferred to duty as hydrographer to the bureau of navigation at Washington, D. C. He was promoted to commodore, 15 Dec., 1880, assigned to special duty in the bureau of equipment department, and became president of the board of examiners, 16 June, 1883. He received the appointment of rear-admiral, 24 Jan., 1885, was assigned to duty as superintendent of the naval observatory, and in 1886 became commandant of the European station. In August, 1887, he will be of legal age to be retired.

FRANSIOLI, Joseph, clergyman, b. in the canton of Ticino, Switzerland, 30 Nov., 1817. He studied in the College of Pollegio and the seminaries of Monza and Milan, and in 1840 was ordained priest. His first missionary work was in his native canton, but he was soon promoted to the rectorship of the Church of St. Maurice, where

he remained twelve years. He was then appointed principal of the Normal school by the government of Milan, and had three hundred teachers under his control. He filled this post for two years, and did much to advance popular education. He was compelled to resign it through ill health, and, with the consent of his bishop, he sailed for the United States in the following year. Shortly after landing he went to Brooklyn and was assigned to duty in the parish of St. Charles. In 1859 he was appointed to open a new parish in the neighborhood of Hicks and Warren streets. In the following year the parish of St. Peters was founded, and a large church erected with a congregation of 3,000, which under his ministry has increased to 17,000, thus forming the largest parish in the diocese of Brooklyn. In 1886, at a cost of over $60,000, he built the academy that adjoins St. Peter's church, in which about 2,000 children receive free instruction. During the war he established a home for orphans, and afterward erected St. Peter's hospital. In 1878 he purchased, at a cost of $80,000, the remainder of the block on which St. Peter's church stands, and all the buildings on it were devoted to charitable purposes. He is now (1887) about to erect on this estate a hospital at a cost of $200,000. He afterward secured possession of the chapel of the Church of the Pilgrims, and, after completely remodelling it and building additions, converted it into a library, school, and kindergarten.

FRASER, Charles, artist, b. in Charleston, S. C., 20 Aug., 1782; d. there, 5 Oct., 1860. In his youth he made sketches of the scenery about Charleston. He studied law, and three years later began the study of art, but was discouraged and resumed his legal studies. He was admitted to the bar in 1807, and retired from practice in 1818 with sufficient competency to continue art. He devoted much attention to miniature painting, in which he was successful. In 1825 he painted a portrait of Lafayette, and subsequently a great number of citizens of South Carolina. He produced many landscape and genre pictures. In 1857 his works were exhibited in Charleston. For a short time he resided in Boston. He contributed to various periodicals, published addresses, and "Reminiscences of Charleston."

FRASER, Christopher Finlay, Canadian statesman, b. in Brockville, Ont., in October, 1839. Early in life he was apprenticed to a printer, but began the study of law in 1859, and was called to the bar of Upper Canada in 1865. He was first elected to the legislative assembly of Ontario for South Grenville in 1872, but was unseated on petition. He was returned for the same constituency in October, 1872, re-elected in 1875, represented Brockville in 1879, and again in 1883. He was appointed a member of the provincial executive council in November, 1873, and was provincial secretary and registrar from that date till April, 1874; he was then appointed commissioner of public works, which office he has since retained. Mr. Fraser was instrumental in organizing the Ontario Roman Catholic league for political purposes, and has been ever since regarded as the political director of his co-religionists in that province. He is a bencher of the law society of Ontario, president of the Roman Catholic literary society of Brockville, and one of the directors of the Ontario bank.

FRASER, Simon, British soldier, b. in 1729; d. in Saratoga, N. Y., 7 Oct., 1777. He was the youngest son of Alexander Fraser, of Balwain and Glendo, of the Lovat family, by a daughter of Angus Mackintosh, of Killachy, from whom the celebrated Sir James Mackintosh was directly descended. He entered the army at an early age, became lieutenant of the 78th foot, 5 Jan., 1757, captain, 22 April, 1759, major, 8 Feb., 1762, and lieutenant-colonel, 14 July, 1768. He served with distinction in Holland and Germany, was in the expedition against Louisburg, and accompanied Gen. Wolfe to Quebec. He did garrison duty at Gibraltar for several years, and was afterward stationed in Ireland, whence he embarked for America with the 24th regiment, 5 April, 1776, arriving at Quebec on 28 May. Soon after his arrival in Canada he was appointed by Carleton, 10 June, 1776, a brigadier-general for America only. His last commission was that of colonel in the army, his appointment being gazetted 22 July, 1777. He assisted in driving the Americans out of Canada in 1776, and was in command in the severely contested action at Three Rivers. Having acquired a high reputation for judgment and cool daring, he was selected by Burgoyne to command the light brigade, which formed the right wing of the British army. He thus was constantly in the advance, rendering most efficient service, and, had his advice been followed, the blunder of advancing on Bennington with heavy mounted German dragoons, on an expedition requiring the greatest celerity of movement, would never have been committed. After the evacuation of Ticonderoga he pursued the retreating Americans under St. Clair, and, assisted by his German ally, Gen. Riedesel, gained a signal victory at Hubbardton, 7 July, 1777. He opened the battle of 19 Sept. by engaging Morgan's skirmishers, and in the action of 7 Oct. was shot and mortally wounded by "Tim Murphy," one of Morgan's riflemen, in obedience to special instructions from that officer. During the succeeding night he was tenderly ministered to by the Baroness Riedesel, who did all in her power to alleviate his sufferings, and at eight o'clock of the following morning he died. He was buried at sunset, by his particular request, on a knoll overlooking the Hudson, Chaplain Brudenell officiating. As the funeral cortege moved up the hill the American batteries opened fire, but ceased as soon as the nature of the gathering was known. To Burgoyne the loss of Fraser was a severe blow, and contemporary military writers affirm that, had he lived, the British would have made good their retreat into Canada. It was said of him that he had always shown as great skill in conducting a retreat as bravery in leading an attack, having, during the seven years' war, brought off in safety 500 chasseurs in sight of the French army. Gen. Fraser's temper was warm, open, and communicative, but reserved in matters of confidence. Burgoyne paid him a touching tribute in his "Narrative," and in his report to Lord George Germaine, dated Albany, 20 Oct., 1777, said: "The extensive merits which marked the public and private character of Brig.-Gen. Fraser will long remain upon the memory of this army, and make his loss a subject of particular regret." He married in 1769 Mrs. Grant, of London, who survived him, and who, in 1781, married at Edinburgh an advocate named George Buchan

Sim. Fraser

Hepburn. The statement that the remains of Gen. Fraser were removed to England after the Revolutionary war is without foundation.

FRASER, William, Canadian R. C. bishop, b. in Scotland about 1790; d. in Antigonish, Nova Scotia, 4 Oct., 1857. He was consecrated vicar-apostolic of Nova Scotia in 1821, with the title of bishop of Fanes. He devoted himself exclusively to the Scottish members of his flock, rarely stirring from the Scottish settlement of Antigonish, in the northern part of the peninsula. The Irish Catholics complained bitterly of their bishop, and reproached him with taking no interest in them. Finally they laid their complaints before the pope, who erected Halifax into a bishopric with the object of forcing Bishop Fraser to reside in it. Father William Walsh, an Irish priest, was also appointed coadjutor in 1842. The appointment of a coadjutor annoyed Bishop Fraser, who appealed against it to Rome, and in the mean time refused to recognize Father Walsh. In order to settle these difficulties the pope divided the province of Nova Scotia into two dioceses, Antigonish being united to Cape Breton and erected into the diocese of Arishat, with Dr. Fraser as titular bishop.

FRAZEE, John, sculptor, b. in Rahway, N. J., 18 July, 1790; d. in Compton Mills, R. I., 24 Feb., 1852. He was a farmer and a stone-cutter in New Brunswick, N. J., in early life, but afterward removed to New York city and opened a marble-yard on Broadway. From 1819 till 1823 his work consisted chiefly of mantel-pieces and monuments. He was long unsurpassed in beauty of finish and in the delicacy of his lettering. Turning his attention to sculpture, he produced in 1824, for St. Paul's church, a mural tablet and bust of John Wells, which was an elaborate and highly finished work. In 1834 he modelled several busts of eminent men for the library of the Boston athenæum, among which were those of Daniel Webster, Prescott, Lowell, Story, Bowditch, and T. H. Perkins. Subsequently he made busts of John Marshall, Lafayette, De Witt Clinton, John Jay, Gen. Jackson, Bishop Hobart, Dr. Stearns, and Dr. Milnor. He was the architect of the New York custom-house, in which he served for some time as an officer.

FRAZER, John Fries, scientist, b. in Philadelphia, Pa., 8 July, 1812; d. there, 12 Oct., 1872. His grandfather, Lieut.-Col. Persifor Frazer, served during the Revolutionary war in the 5th Pennsylvania regiment under Col. Anthony Wayne. John was graduated at the University of Pennsylvania in 1830. During his college career, and for some time afterward, he acted as laboratory assistant to Prof. Alexander D. Bache, and in that capacity aided in determining with accuracy, for the first time in the United States, the periods of the daily variations of the magnetic needle, and the connection of the aurora borealis with magnetic forces. He also assisted Dr. Robert Hare, who at that time held the chair of chemistry in the University of Pennsylvania. Subsequently he studied law with John M. Scott, and also followed a medical course. He was admitted to the bar, but absence from Philadelphia at the time when the examinations were held prevented his receiving a medical degree. In 1836, when the first geological survey of Pennsylvania was organized, he became first assistant geologist under Prof. Henry D. Rogers, but held the office only one year, when he resigned to accept the professorship of chemistry and natural philosophy in the Philadelphia high school. In 1844, Prof. Bache having been appointed superintendent of the coast-survey, his vacant chair of chemistry and natural philosophy was offered to Prof. Frazer, who thenceforth became connected with the University of Pennsylvania. At the time of his death he was senior professor, was vice-provost from 1855 till 1868, and acting provost during the year 1859–'60. In addition to his duties in the university he delivered many courses of lectures on physical and chemical science in the Franklin institute, and from 1850 till 1866 edited its "Journal." His studies to keep abreast of the progress of the sciences that he taught fully occupied his time, and in consequence he was unable to carry on any original researches, or to devote his attention to the preparation of papers. He received the degree of Ph. D. from the University of Lewisburg in 1854, and that of LL. D. from Harvard in 1857. Prof. Frazer was elected a member of the American philosophical society in 1842, and its secretary in 1845, becoming vice-president in 1855. He was one of the original members of the National academy of sciences, and served on several of its committees which furnished reports to the U. S. government. See the sketch by Prof. John L. Leconte in the "Biographical Memoirs of the National Academy of Sciences" (vol. i., Washington, 1877).—His son, **Persifor,** geologist, b. in Philadelphia, Pa., 24 July, 1844, was graduated at the University of Pennsylvania in 1862, and at once became an aide on the U. S. coast-survey, serving in the South Atlantic squadron till June, 1863. He joined the cavalry and remained in active service at the front during the Gettysburg campaign. In October, 1863, he was made acting ensign in the U. S. navy, and served in the Mississippi squadron until the end of the war, when he was honorably discharged in November, 1865. Subsequently he spent three years in Germany, studying principally in the Royal Saxon school of mines in Freiberg, where he completed his course in 1869. On his return to the United States he was appointed mineralogist and metallurgist on the U. S. geological survey, and wrote the report on these subjects in 1869. In 1870 he was appointed professor of chemistry in the University of Pennsylvania, and four years afterward resigned this chair to become assistant on the geological survey of the state. He presented a thesis to the scientific faculty of Lille in the University of France, for which, in 1882, he received the degree of doctor of natural sciences. This was the first time that this degree was ever awarded to one not a native of France. He was connected with the Franklin institute as professor of chemistry, and also as one of the editors of its "Journal" in 1881, and its board of managers. His investigations have included researches on the cause of the white color of the moon by day; on the application of composite photography to testing the genuineness of signatures; and on carbon buttons to register delicate variations of pressure. Prof. Frazer is a member of numerous scientific societies, both in the United States and Europe, and secretary of the committee representing American geologists in the International congress. Besides memoirs published in various journals and transactions, he has published "Tables for Determination of Minerals" (Philadelphia, 1874), and the volumes C, CC, CCC, and C4 of the geological survey of Pennsylvania (1874–'80).

FRECHETTE, Louis Honoré, Canadian author, b. in Levis, Quebec, 16 Nov., 1839. His paternal ancestor was among the first settlers of New France. Louis was educated at Nicolet college and at Laval university, studied law, and was admitted to the bar of Lower Canada in September, 1864. From 1866 till 1871 he resided in Chicago,

and attended to the foreign correspondence of the Illinois central railway. He returned to Canada in 1871, was elected in 1874 to the Dominion parliament for the county of Levis, and represented it until 1879, when he was defeated. In 1878 he went to reside in Montreal, and in 1885 to Nicolet, Quebec. M. Frechette edited "Le journal de Quebec" in 1861'–2, "Le journal de Levis" in 1864–'5, "L'Amérique" in Chicago in 1868–'70, and "La patrie" in Montreal in 1884–'5. He has also been a contributor to "L'Opinion publique," of Montreal, and has written occasionally for other periodicals. Two volumes of his poems, "Les fleurs boréales" and "Les oiseaux de neige," were crowned by the French academy at Paris in 1880. The author was granted the last Montyon prize unanimously. McGill university, Montreal, and Queen's university, Kingston, conferred upon him the degree of LL. D. His volumes of poems include "Mes loisirs" (Quebec, 1863); "La voix d'un exile" (1869); "Pêle mêle" (Montreal, 1877); and "Les oubliés" and "Voix d'outre-mer" (1886). His published dramas and comedies are "Félix Poutré" (1862); "Papineau" (1880); "The Thunderbolt" (1882); and "Un Dimanche matin à l'hôtel du Canada." His prose works include "Lettres à Basile" (1872), and "Petite histoire des Rois de France." He has translated into French "A Chance Acquaintance," by William D. Howells, and "Old Creole Days," by George W. Cable.

FREDET, Peter, author, b. in Sebasat, Auvergne, France, in 1801; d. in Ellicott's Mills, Md., in 1856. He received his preparatory education in the College of Clermont, and afterward entered the ecclesiastical seminary of Clermont-Ferrand. After his promotion to the priesthood he joined the Society of St. Sulpice, and was sent as professor to the Sulpitian seminary of Rodez. Here he remained six years, when he embarked for the United States, and arrived in Baltimore in 1831. He spent the remainder of his life as professor of various branches of ecclesiastical learning in St. Mary's seminary, Baltimore, and published an "Ancient History" and a "Modern History" (1842). These works were at once adopted as text-books in all the Roman Catholic colleges of the United States, and also in the Roman Catholic university of Ireland. His other works are controversial or theological, and include "Inspiration and Canon of Scripture"; "Original Texts and Translations of the Bible"; "Interpretation of Scripture"; "Necessity of Baptism"; "Effects of Baptism and the Obligations attached to it"; "Lay Baptism"; and "Doctrine of Exclusive Salvation."

FREEDLEY, Edwin Troxell, author, b. in Philadelphia, Pa., 28 July, 1827. His youth was spent in Bucks county, where he attended school. He afterward entered Treemount seminary, Norristown, and studied law at Harvard in 1845. He then removed to Cincinnati and became part proprietor of a large steam marble-mill. He settled in Philadelphia in 1851. In 1860 he published, in connection with Edward Young, the "Manufacturers' Gazette," which was discontinued in 1861. He has been interested in forming societies for the dissemination of useful knowledge. His publications are "Practical Treatise on Business" (Philadelphia, 1851; republished in England); "The Business Man's Legal Adviser" (1854); "Leading Pursuits and Leading Men" (1856); "Philadelphia and its Manufactures" (1857; 2d ed., 1867); "Opportunities for Industry" (1858); "History of American Manufactures" (3 vols., 1867); "Common Sense in Business" (1877); and "Home Comforts" (2 vols., 1877, 1 vol., 1880).

FREEMAN, Alice Elvira, educator, b. in Colesville, Broome co., N. Y., 21 Feb., 1855. She was graduated at the University of Michigan in 1876, and was appointed teacher of Greek, Latin, and mathematics at Geneva Lake, Wis., where she remained one year. From 1877 till 1879 she was the principal of the high-school at East Saginaw, Mich. She became professor of history in Wellesley in 1879, which post she held until 1881. In that year she became acting president of the college, and in 1882 she accepted the presidency. The degree of Ph. D. was conferred on her by the University of Michigan in 1882, and that of doctor of letters by Columbia at its centennial celebration in 1887, on which occasion she appeared on the platform among the invited guests.

FREEMAN, Barnardus, clergyman, b. at Gilhuis, in Hanover, in 1660; d. at New Utrecht, L. I., in January, 1743. He was at one time a tailor in Westphalia, but was ordained by the classis of Lingen, 16 March, 1698. At the call of Gerrit Bancker, of Albany, he resolved to go to America. He reached Schenectady, 28 July, 1700, and at once began his labors as dominie of the Reformed Dutch church, which was then independent of the Amsterdam classis. He was of great natural abilities, and, in addition to a knowledge of English, Dutch, and German, he mastered the Mohawk tongue, and soon began teaching and catechising the Mohawks. With the aid of the half-breed interpeter Hillities, he translated portions of the Anglican liturgy and the Bible into their tongue. His influence over the Indians was spiritually powerful, in addition to its being a strong factor in promoting their friendship with the Dutch and English. He married 25 couples, baptized 101, and received 14 adults, all Indians, into the church. After his removal, they petitioned for his return to them. Under a commission from Lord Cornbury, dated 25 Dec., 1705, he removed to Long Island, and officiated as dominie in the Reformed churches of New Utrecht, Flatbush, Bushwick, and Brooklyn. This act of the governor was a part of his settled policy to obtain control over the Dutch churches, and to establish episcopacy. He used his influence to have an American classis established, so that the Dutch churches in America would be free from the jurisdiction of the classis of Amsterdam. He was made pastor emeritus in 1741, after forty-one years' service. A portrait in oil of Mr. Freeman, showing a vigorous physique, exists. He published parts of the English liturgy in Mohawk (1705); "De Spizel der Self-Kennis" (Mirror of Self-Knowledge) (1720); "De Weegshale der Gerade Gods" (Balance of God's Grace) (1721); and "Verdigiging" (Defence against the church of Raritan) (1726).

FREEMAN, Florence, sculptor, b. in Boston, Mass., in 1836. After receiving instruction in sculpture from Richard S. Greenough, she went to Italy with Charlotte Cushman, and studied for one year in Florence with Hiram Powers. In 1862 she opened a studio in Rome, where she has spent her professional life. She has executed several bas-reliefs of Dante; a bust of Sandalphon; "The Sleeping Child"; "Thekla, or the Tangled Skein"; and several chimney-pieces, one of which, "Children and the Yule Log and Fireside Spirits," was at the Centennial exhibition in Philadelphia (1876).

FREEMAN, Fortunatus, sea-captain, b. in Yarmouth, England; d. in New York city, 22 July, 1874. He came to the United States at an early age, first commanded vessels sailing from Baltimore, and was subsequently commander of the ships "Sea," "Marmion," "Resolute," "Guy Mannering," and "Silas Wright," all from New York.

When captain of the "Sea," he took over the last presidential message ever carried by a sailing vessel. He was afterward commander of the steamers "Colorado" and "Minnesota." The latter took fire in mid-ocean, and after twelve hours' heroic exertion, in which Capt. Freeman distinguished himself, the flames were subdued.

FREEMAN, George Washington, P. E. bishop, b. in Sandwich, Mass., 13 June, 1789; d. in Little Rock, Ark., 29 April, 1858. His early manhood was spent in secular occupation, but he afterward went to North Carolina and studied for the ministry of the Protestant Episcopal church. He was ordained deacon in Christ church, Raleigh, N. C., by Bishop Ravenscroft, 8 Oct., 1826, and priest in Christ church, Newbern, N. C., 20 May, 1827, by the same bishop. For two years he served as missionary in the diocese of North Carolina. In 1829 he was elected rector of Christ church, Raleigh, which office he filled until 1840. He then removed to Columbia, Tenn., and thence, a year later, to Swedesborough, N. J. After a short stay in the latter place, he accepted a call to become rector of Immanuel church, Newcastle, Del. He was soon afterward elected missionary bishop of Arkansas and the Indian territory, and was consecrated in St. Peter's church, Philadelphia, 26 Oct., 1844. He received the degree of D. D. from the University of North Carolina in 1839.

FREEMAN, James, clergyman, b. in Charlestown, Mass., 22 April, 1759; d. in Newton, Mass., 14 Nov., 1835. He received his first education in the public Latin-school of Boston, and was graduated at Harvard in 1777, after which he visited Cape Cod and drilled a company about to join the colonial troops. In 1780 he went to Quebec, where he was captured and detained till 1782, when he went to Boston and became lay-reader of King's chapel. This was originally an Episcopal church, founded in 1686. He became a Unitarian in his views, and induced the Episcopal society of this church to alter its liturgy in 1785, and, as the bishop refused to ordain him, he was consecrated with a peculiar service by his own wardens and people, 18 Nov., 1787. He was the first minister in the United States to avow the name of Unitarian, and through his means the first Episcopal church in New England became the first Unitarian church in this country. He continued sole minister of King's chapel until 1809, when the Rev. Samuel Cary was given him as a colleague. After the death of Mr. Cary in 1815 Dr. Freeman served alone till 1824, when Rev. Francis W. P. Greenwood was associated with him. In 1826 Dr. Freeman gave up his duties to his colleague, owing to failing health, and retired to a country residence near Boston, where he spent the rest of his life. Dr. Freeman printed no controversial sermons, and seldom preached them. He was thoroughly liberal and intimate with the best men of all denominations, though he disliked what he called "the cant of liberality." He was a member of the first school committee of Boston, chosen in 1792, the schools previous to this time having been managed by the selectmen of the town. He was a member of the Academy of arts and sciences, and one of the founders of the Massachusetts historical society, to which he rendered valuable service. He received the degree of D. D. from Harvard in 1811. He was an accomplished scholar, and his style was a model of pure English. Besides many contributions to periodical literature, he published a "Description of Boston" ("Boston Magazine," 1784); a "Sermon on the Death of Rev. John Eliot, D. D." (1813); and a volume of "Sermons and Charges" (1832), which were criticised by Robert Southey in a letter to the Lord Bishop of Limerick, 6 March, 1833.

FREEMAN, James Edward, artist, b. in Nova Scotia in 1808; d. in London, England, 21 Nov., 1884. His parents removed to Otsego, N. Y., where his early life was spent. After many hardships and difficulties he made his way to New York, where he entered the National academy of design. He became an associate in 1831 and was elected an academician in 1833. For a while he painted in western New York, and removed to Rome in 1836, where he resided until his death. He was a painter of genre pictures and portraits. Among his works are "The Beggars," "The Flower Girl," "The Savoyard Boy in London," "Young Italy," "The Bad Shoe," "The Crusaders' Return," "Study of an Angel," "Study of a Head of Judith," "The Mother and Child" (1868), and "The Lucchese Peasants on the Sands of the Sezchio" (1883). He published "Gatherings from an Artist's Portfolio" (New York, 1877).—His wife, **Horatia Augusta Latilla,** sculptor, b. in London, England, 28 Aug., 1826, was of Italian and English parentage. She was married in 1847, and, devoting her life to sculpture, has executed several works that show artistic talent. Among these are "The Princes in the Tower," "The Triumph of Bacchus," and "The Culprit Fay," which is the most ideal of her productions. She has also made fonts, chimney-pieces, and vases, both in marble and wood.

FREEMAN, Nathaniel, physician, b. in Dennis, Mass., 8 April, 1741; d. in Sandwich, Mass., 20 Sept., 1827. He studied medicine and in 1765 settled in Sandwich, where he studied law with his relative, Col. James Otis. He was an active patriot during the Revolution, held command of a regiment of militia in the expedition to Rhode Island, and served as brigadier-general of militia from 1781 till 1793. He performed various services in the legislature, was judge of probate for forty-seven years, judge of the common pleas for thirty years, and a member of congress from Massachusetts from 1795 till 1799. He was one of the best extempore speakers of the day, and was distinguished as a physician and surgeon. He was the author of "A Charge to the Grand Jury at Barnstable" (Barnstable, 1802).—His son, **Frederick,** clergyman, b. in Sandwich, Mass., in 1800; d. there, in 1883, was engaged as a school-teacher and for a time studied law. Subsequently he taught in the academy at Newbern, N. C., and was finally made its principal. In 1823 he began to preach, and in the next year was ordained pastor of the Presbyterian church in Plymouth, Mass., where he remained ten years. He afterward took orders in the Protestant Episcopal church, and held charges in Philadelphia, Bangor, and Augusta. He then returned to Sandwich, where he established a collegiate institute in 1834. He was the author of a "History of Cape Cod"; "Annals of Barnstable County" (1858–'62); "Genealogy of the Freeman Family" (1875); and "Civilization and Barbarism illustrated by Especial Reference to Metacomet and the Extinction of his Race" (1878).

FREEMAN, Samuel, jurist, b. in Falmouth (now Portland), Me., 15 June, 1743; d. there, 2 Sept., 1831. He was an active patriot during the Revolutionary struggle, was secretary of the Cumberland county convention in 1774, a member of the provincial congress in 1775, and of the Massachusetts house of representatives in 1776 and 1778. When the courts were reorganized in 1775 he was appointed clerk, which office he held for forty-five years. He was register of probate until commis-

sioned judge in 1804, remaining in the latter office till 1820. From 1776 till 1805 he was postmaster of Portland. He was an active and efficient friend of Bowdoin college. His publications include "The Massachusetts Justice" (1803); and "Probate Directory" (1803); and he edited the "Journal of Rev. Thomas Smith" (1821).

FREEMAN, William Grigsby, soldier, b. in Virginia in 1815; d. in Cornwall, Pa., 12 Nov., 1866. He was graduated at the U. S. military academy in 1834, and assigned to the 4th artillery. He served in the Florida war, and was made 1st lieutenant for gallantry on several occasions. In 1840 he became instructor of infantry and artillery tactics at West Point, and in the following year served on the northern frontier at Buffalo, during the Canada border disturbances. From 1841 till 1849 he served as assistant in the adjutant-general's office in Washington, D. C. He was afterward chief of staff to Gen. Scott, commanding the army headquarters at New York. He was brevetted major in 1847, and lieutenant-colonel in 1848, "for meritorious conduct, particularly in the performance of his duty in the prosecution of the war with Mexico." He made a tour of inspection of the Department of Texas in 1853, and served as assistant adjutant-general from 1853 till 1856, when he resigned on account of failing health, which prevented his taking part in the civil war.

FREIRE, Luiz José Junqueira, Brazilian poet, b. in São Salvador da Bahia, 31 Dec., 1832; d. there, 24 July, 1855. At the age of seven he was disabled by a severe illness, and at fourteen he could not read; but after that he made rapid progress. In 1848 he entered the Lyceum of Bahia, where he studied especially the Latin and Portuguese poets, and in a short time was able to recite from memory some of their best productions. At the age of seventeen he published poems, which were received with general favor; but about that time he fell passionately in love with a young lady who did not return his affection, and he consequently renounced the world and entered a cloister, 29 March, 1851. But his superiors, seeing his disgust with monastic life, obtained, in 1854, permission for his perpetual secularization, and he left the cloister. He continued writing, but his health was undermined, and he died eight months after leaving the convent. The greater part of his manuscripts are lost, or probably suppressed by opponents of his ideas. Dr. Franklin Doria collected and published the following: "Estudo," "Contradicções Poeticas," and "Inspirações do Claustro." The last-named work has been translated into several languages.

FREIRE, Nicolas, Peruvian soldier, b. in Lima in 1810; d. there about 1880. His parents, to escape Spanish persecution, had emigrated to Chili, and young Freire received his education in the University of Chili. But early in life he was enrolled in the Chilian army, participating in the campaign of Chiloe in 1825 and in the battle of Lircay in 1830, and after the latter event returned to his country. From 1849 till 1853 he was Peruvian consul-general in Chili, in 1854 military commander of the northern provinces of Peru, in 1855 assistant secretary and afterward minister of war, which place he held until 1856, when he was appointed general of division and military commander-in-chief of the southern departments, becoming next year chief of staff of the army of operation of the south. In 1858 he was appointed prefect of the department of Lima, and in 1860 intrusted again with the ministry of war. In 1862 he went as prefect and commander of the navy station to Callao, but returned toward the end of the year to the ministry of war, which he held until 1864, when he was elected senator for the department of Cajamarca. In 1868 he was elected a member of the supreme council of war, prefect of Moquegua, and commanding general of artillery. In 1872 he was appointed inspector-general of the army and navy, and next year minister of war and the navy, which office he held until the expiration of President Pardo's term in 1876, when he retired to private life.

FREIRE, Ramón, Spanish-American soldier, b. in Santiago, Chili, 29 Nov., 1787; d. there, 9 Dec., 1851. In 1811 he enlisted in the Chilian army, and within two years was promoted to lieutenant, having taken part in several battles. With the grade of captain he served in the battle of Rancagua, where, under command of O'Higgins, he cut his way through the ranks of the enemy. After this disastrous campaign he emigrated to the Argentine Republic. In 1815 he joined a company of privateers, commanded by H. Buchard, engaged in capturing Spanish vessels on the Pacific. In 1816 he joined the army of San Martin, and in December of the same year received from this general an order to penetrate into Chili by the southern Cordilleras and take Talca, which he accomplished, 11 Feb., 1817, at the same time that San Martin routed the Spanish army in Chacabuco. Afterward he destroyed the remainder of the Spanish army in several sharply contested battles. He was made a member of the Legion of Merit, which replaced the titles of nobility. On 27 Nov., 1820, in command of a small regiment, he defeated an army of 2,000 men under command of Benavides. In 1823, on the abdication of Gen. O'Higgins, Freire was elected dictator. Toward the close of 1825 he left Valparaiso with a force of 3,000 men and drove the Spaniards from the archipelago of Chiloe, and on his return from this expedition resigned the supreme magistracy and retired to private life. In 1827 he was again elected dictator, but resigned, and in 1830, when the Conservative party got possession of the supreme power, the Liberals rose in arms under Gen. Freire, but, after several months of bloody struggle, they were defeated at Lircay. Freire was taken prisoner and banished to Peru. In 1836 he attempted another insurrectionary movement against the conservative government, hiring two vessels in Peru, and landing with an armed force at Chiloe; but the government at once arrested him, and he was banished again. In 1842 he once more returned to his native country.

FREIRE DE ANDRADA, Gomez (fray'-re), Portuguese soldier, b. in Lisbon, 19 Dec., 1636; d. at Para, Brazil, 3 Jan., 1702. He was a nephew of the famous historian Jacintho Freire de Andrada. He served in the artillery, and soon reached the highest grades as an officer. In May, 1685, he was made captain-general of Maranhão, and in June, 1687, of Para. This important post he filled until his death, serving his country most efficiently, and doing for the north of Brazil what his cousin of the same name was doing for the south. Para and the other cities under his jurisdiction owed important improvements to him. He brought under cultivation immense stretches of land hitherto unproductive, introduced the cultivation of rice, and encouraged that of cocoa and coffee. He took particular interest in the Indian question, subdued the ferocious tribe of Tayupes, and founded at Belem an ethnographic museum, which, though still incomplete, has been of great service to science. Under his administration the population of

the province of Para increased threefold. His life, written by Father Domingos de Teixeyra, contains much valuable information on the rebellion of Beekman against Freire de Andrada, which may be regarded as the first attempt of the Brazilians to establish their independence. It also contains the only authentic documents relative to the first difficulties between France and Portugal concerning the regions about Cape North.—His cousin, **Gomez,** count of Bobadella, Portuguese statesman, b. in Coimbra in 1685; d. in Rio Janeiro, 1 Feb., 1763, studied at Coimbra, and entered the army at an early age. In 1707 he distinguished himself in the war between Portugal and Spain, in 1708 was promoted colonel, and in 1712 to general. On 8 May, 1733, he was appointed governor of Rio Janeiro, and in 1735 was also given the administration of the rich province of Minas Geraes. He erected in Rio Janeiro many fine buildings and monuments, and made important improvements in the bay. In 1744 the mines of the district of Paracatu were discovered, and Freire organized a scheme for working them, and published a description of his system, which is even to-day an authority on mining engineering. On 17 Jan., 1752, he founded the first Brazilian academy, called Dos Selectos da Rio Janeiro, which association established in 1754 the first printing-office in Portuguese America. In 1754 a boundary dispute led to war with Spain, and Freire marched against the territory of the seven missions, gaining the victory in four battles. As a reward for this service he was made count of Bobadella in 1757. The loss of the colony of Sacramento by Portugal in October, 1762, was such a serious blow to Freire that he died in a few months.

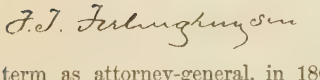
FREITES, Pedro María, Venezuelan patriot, b. in Barcelona in 1790; d. in Caracas, 7 May, 1817. His father was a Spanish colonel and governor of Barcelona, and Freites was also employed in the Spanish administration; but when, in 1811, the independence of Venezuela was declared, he joined the republican army. He took part in Bolivar's expedition to Venezuela, and commanded the infantry of Piar in the battle of Juncal, 27 Sept., 1816, in which Morales's forces were annihilated. When Bolivar, in the beginning of 1817, resolved to evacuate Barcelona, he left there a battalion of 700 men under the command of Freites, who had been promoted to brigadier-general. Freites's forces were not sufficient to defend the whole city, and he therefore occupied Casa Fuerte, an intrenched fort constructed out of the convent of St. Francis, where also many of the principal families of Barcelona took refuge. This was captured by the Spanish on 7 April after a desperate resistance, but Freites made a desperate sally and had already nearly gained the neighboring woods, when he fell, and all his followers were overpowered and killed. Freites and the governor, Rivas, were spared and sent as prisoners to Caracas, where the captain-general, Moxo, ordered their execution.

FREJES, Francisco (fréh-es), Mexican historian, b. in Guadalajara; d. in Zacatecas in 1845. He was a Franciscan monk in the convent of his native city, where he distinguished himself as a pulpit orator. His love of study caused him to obtain his transfer to the convent of Guadalupe, in Zacatecas, where he had the advantage of a valuable library containing many manuscripts of the time of the conquest. He was appointed chronicler of the convent in 1835, and in 1838 became its superior. Here he finished his "Historia Breve de la Conquista de los Estados Independientes del Imperio Mejicano" (new ed., Guadalajara, 1878). He is a clear and impartial writer, and as some material, which never had become public, was at his command, his history may be considered the most authentic one. Frejes also published "Memoria Histórica de los Sucesos más notables de la Conquista particular de Jalisco por los Españoles" (1842), and a pamphlet on education.

FRELINGHUYSEN, Theodorus Jacobus, clergyman, b. in West Friesland in 1691; d. in New Jersey in 1747. After receiving a thorough classical education he began the study of theology, was ordained to the ministry in the Reformed Dutch church at the age of twenty-six, and was for about two years the pastor of a church in his native land. A movement to establish a missionary of the Reformed Dutch church in the new settlements on the Raritan river in New Jersey resulted in the choice of Mr. Frelinghuysen, who removed thither in 1720, and thus became the founder of the Frelinghuysen family in New Jersey. The field of his pastoral charge extended over the greater part of Somerset and Middlesex counties. He was an indefatigable worker, and remarkably successful in all his difficult undertakings. George Whitfield and Jonathan Edwards speak of him as "one of the greatest divines of the American church." He was an early advocate for the establishment in America of an ecclesiastical judicatory possessing larger powers than had hitherto been granted by the church in Holland. As a member of the first convention of his church held in New York, he gave efficient support to a measure which resulted in the independence of that church in the New World. He is spoken of as a man of great fearlessness of spirit, of eloquence as a speaker, and of vigor as a writer. Mr. Frelinghuysen had five sons who were ordained to the ministry, and two daughters who married ministers. Three of his sermons, in the Dutch language, were published in New York as early as 1721, two others in 1729, and all these were translated into English and published in 1730. Ten sermons, in Dutch, were published in New York in 1733, and a second edition of the same in Holland, under approval and with the commendation of the theological faculty of the University of Groningen, who called them "The noble fruit brought from the New World to our doors." Two sermons were published in Utrecht in 1738, four in Philadelphia in 1745. All these were translated into English by Rev. William Demarest, and published by the board of publication of the Reformed Dutch church in 1856, with an introduction by Dr. Thomas De Witt, and a biographical sketch by the translator.—His second son, **John,** b. in Three Mile Run, N. J., in 1727; d. on Long Island, in September, 1754, was sent to Holland to complete his academic course, and in 1750 was ordained to the ministry by the classis of Amsterdam. Soon afterward he returned to his native country, and entered on his duties as the successor of his father, fixing his residence at Somerville, N. J. In addition to his pastoral work, he undertook the education of young men for the ministry, and to his labors in this direction Queen's college, now Rutgers, is largely indebted for its establishment. While on a journey, in September, 1754, he was suddenly taken sick and died.—John's only son, **Frederick,** lawyer, b. in Somerset county, N. J., 13 April, 1753; d. 13 April, 1804, was graduated at Princeton in 1770, entered on the study of the law, and was admitted to the bar at the age of twenty-one. When he had barely completed his twenty-third year he was chosen a member of the Provincial congress of New Jersey, where he was placed on the important committee of public safety. The following year (1776)

he was chosen to the same body, which adopted a constitution and changed its title from "Provincial congress" to the "Convention of the state of New Jersey." In 1778 he was elected, on joint ballot of the legislature, to represent New Jersey in the Continental congress. He was strongly averse to accepting this position, declaring that the trust was too important for his years and abilities. In the following year he resigned it, but in 1782 and 1783 his name may be found on the rolls of the Continental congress as a representative from New Jersey. He was instrumental, it is said, in raising a corps of artillery, of which he became captain, and at the head of which, while still holding his seat in the Provincial congress, he took part in the battle of Trenton. There is a tradition that it was by a shot from his pistol that Col. Rahl, the commander of the Hessian forces, was mortally wounded. Having been made colonel in the militia of his native county, he became actively engaged in the war. He was present in the skirmishes at Springfield and Elizabethtown, as well as at the battle of Monmouth Court-House in June, 1778. After the war had been brought to a close he received appointments to various offices in the county and state, and in 1793 was chosen to a seat in the senate of the United States, but, on account of family bereavements, resigned this position in 1796. In 1794, when Gen. Washington undertook to put an end to the whiskey insurrection in Pennsylvania, he summoned, among other forces employed for that purpose, the militia of New Jersey, placing Gov. Howell at their head, and giving to Mr. Frelinghuysen a major-general's command. In 1804 he fell seriously sick, and, on taking to his bed, predicted that the end was at hand, and that he would die on his ensuing birthday. The prediction was verified.—Gen. Frederick's eldest son, **John,** lawyer, b. near Millstone, Somerset co., N. J., 21 March, 1776; d. there, 10 April, 1833, was graduated from Queen's college (now Rutgers) in 1792, and admitted to the bar in 1797. By reason of his great aversion to public speaking he figured but little in the courts, but as an office lawyer enjoyed an extensive practice. For many years he was a member of the state council, and for three consecutive terms, of five years each, was surrogate of his county. Inheriting from his father, Gen. Frederick Frelinghuysen, a great fondness for military life, he promptly offered his services at the beginning of the second war with Great Britain, and was for many months encamped with a regiment of New Jersey militia, which he commanded, at Sandy Hook, with a view to preventing the enemy's vessels from passing up the bay to attack New York. At the close of the war he was made a brigadier-general. He was a man of profound piety, and while on duty at Sandy Hook frequently conducted public services at the head of his regiment. So tenderly did he care for his soldiers that the sick among them were sheltered in his own tent, and made to eat at his own table. He freely used his own means to relieve their wants, even going so far as to embarrass his estate for this purpose.—Gen. Frederick's second son, **Theodore,** lawyer, b. in Franklin, Somerset co., N. J., 28 March, 1787; d. in New Brunswick, N. J., 12 April, 1861, was sent at the age of eleven to the grammar-school connected with Queen's college (now Rutgers), where he remained two years, but, on the resignation of the rector of the school, returned to his home at Millstone. Having no great disposition to apply himself to study, he persuaded his father to give him the privilege of remaining at home and becoming a farmer. But consent to this plan had been only partially obtained when his father was called away on public business. His step-mother, a wise and estimable woman, believing that this arrangement would not be a judicious one, packed young Theodore's trunk and sent him to the classical academy recently established at Baskingridge, N. J., by the Rev. Dr. Robert Findley. Here he completed his preparatory studies, and in 1802 was admitted to the junior class of the College of New Jersey, at Princeton, from which he was graduated with high honors in 1804. In the mean time, his father having died, his elder brother, John, a lawyer, had taken charge of the homestead at Millstone. In the office of this brother he began the study of law, and, after being admitted to the bar, removed to Newark, N. J., where he married, and entered upon the practice of his profession, in which he soon attained eminence. In 1817 he was appointed attorney-general by a legislature whose majority was opposed to him in politics. Twice afterward he was reappointed on the expiration of his term of office, and finally resigned it in 1829, having been elected a senator of the United States. Prior to this, however, he had declined the office of justice of the supreme court, tendered to him in 1826. The first important matter on which he addressed the senate was the bill for the removal of the Indians beyond the Mississippi river. This speech availed nothing, however, except to bring its author prominently before the nation, and to give to him the title of the "Christian statesman." He also took an active part in the discussion of the pension bill, the president's protest, the removal of the deposits from the U. S. bank, the compromise, and the tariff. His senatorial term expired in 1835, when he resumed his professional labors in Newark. In 1836 Newark was incorporated as a city. In the following year Mr. Frelinghuysen was elected its mayor, and in 1838 he was re-elected to the same position. In 1839 he was unanimously chosen chancellor of the University of New York, and while in the occupancy of this office was, in May, 1844, nominated by the Whig national convention at Baltimore for the vice-presidency of the United States on the same ticket with Henry Clay. He continued in the discharge of his duties as chancellor of the university until 1850, when he accepted the presidency of Rutgers college, and in the same year was formally inducted into that office, continuing in it until the day of his death. Mr. Frelinghuysen was an earnest advocate of the claims of organized Christian benevolence, and it is said of him that no American layman was ever associated with so many great national organizations of religion and charity. He was president of no less than three of these during some period of their existence, while his name may be found on

the lists of officers of all the rest with scarcely an exception. For sixteen years he was president of the American board of commissioners for foreign missions. From April, 1846, till his death he was president of the American Bible society; from 1842 till 1848, of the American tract society; from 1826 till near the close of his life, vice-president of the American Sunday-school union; and for many years vice-president of the American colonization society. In the work of all these institutions he took an active part. His remains were buried in the grounds of the 1st Reformed Dutch church in New Brunswick, N. J. See a memoir of him by Rev. Talbot W. Chambers, D. D. (1863).—**Frederick Theodore,** son of Gen. Frederick's third son, Frederick, lawyer, b. in Millstone, N. J., 4 Aug., 1817; d. in Newark, N. J., 20 May, 1885, was but three years of age when his father died, and was at once adopted by his uncle, Theodore. He was graduated at Rutgers in 1836, studied law with his uncle, Theodore, at Newark, and was admitted to the bar in 1839. In this year his uncle was called to the chancellorship of the University of New York, and the young attorney succeeded to his practice. He was chosen city attorney in 1849, and in the following year was also elected city counsel. Not long afterward he became the retained counsel of the New Jersey central railroad company, and of the Morris canal and banking company, and became generally known throughout the state. His name was mentioned as a candidate for attorney-general of New Jersey in 1857, and in 1861 was appointed to that office. In this same year Mr. Frelinghuysen was a member of the peace congress in Washington, where he was a conspicuous figure. On the expiration of his term as attorney-general, in 1866, he was reappointed by Gov. Marcus L. Ward, but in the same year was appointed by the governor to the U. S. senate to fill the vacancy caused by the death of William Wright. He took his seat in the senate in December, 1866, and was elected in the winter of 1867 to fill the unexpired term of Mr. Wright, which would end on 4 March, 1869. He now resigned the office of attorney-general to occupy one which, it is said, had long been the summit of his ambition. At the expiration of his term in 1869 the majority of the legislature of New Jersey was opposed to him in politics, and, as a matter of course, his re-election was impossible. In 1870 President Grant nominated him as minister to England, and the nomination was promptly confirmed by the senate without the usual reference to the committee. Mr. Frelinghuysen, however, declined the appointment; why he did so was a question that was variously answered by political friends and foes. Years afterward it became known that it was at the request of his wife, who was unwilling to expose her children to the various influences to be encountered during a residence at a foreign court. On 25 July, 1871, he was again elected U. S. senator for the full term of six years. During his service in the senate he was a member of the judiciary committee, and of those on the finance, naval affairs, claims, and railroads, and was chairman of the committee on agriculture. He was also a member of the committee on foreign relations, and acting chairman of the same during the negotiation of the Alabama claims by the joint high commission. When he came into the senate the civil war had ended, but he brought with him the feelings which had governed him throughout its progress, and took an active part in the work of restoring the Union. In the impeachment trial of President Johnson he voted for conviction. He was always prominent in the debates of the senate, and introduced into that body several measures of great importance. In the matter of the Washington treaty, in the French arms controversy, in the currency question, he was especially active. A bill was introduced by him to restore a gold currency, and so well sustained by argument that a measure similar to his own was subsequently adopted. A tariff for protection always received his support, and he left nothing undone to promote the industries of his own state. The civil-rights bill, introduced by Charles Sumner, was personally intrusted to him by that gentleman, and was advocated by Mr. Frelinghuysen until it passed the senate. He introduced a bill against polygamy, and secured its passage in the senate; also a bill to return to Japan what is known as the Japanese indemnity fund, which also passed. The soundness of his argument in the Sue Murphy case was at first doubted, but it was afterward conceded that he was right in denying the claims of even loyal persons at the south for damages resulting from the war, insisting that they must suffer as did loyal persons at the north, and that the results of the war must rest where they fall. He succeeded in defeating this bill, and thus saved the country from innumerable claims of a similar character, which would have exhausted the national treasury. The trouble which arose in 1877 in regard to counting the electoral vote seems to have been anticipated by Mr. Frelinghuysen in the summer of the previous year, and, to avoid it, he introduced a bill referring the decision of any such controversy to the president of the senate, the speaker of the house, and the chief justice. The senate adjourned before the bill could be acted upon. When, in 1877, his anticipations were realized, he was one of the joint committee of the senate and house that reported a bill creating the electoral commission, and he was appointed a member of that commission. In 1877, a majority of the legislature of New Jersey being again Democratic, he was succeeded by John R. McPherson. On 12 Dec., 1881, President Arthur invited Mr. Frelinghuysen to a seat in the cabinet as secretary of state, and this appointment was promptly confirmed by the senate. Peaceful and prosperous as was the administration of President Arthur, yet the labors of Mr. Frelinghuysen were none the less arduous, and, though always regarded as a man of great physical vigor, he retired from them thoroughly exhausted. Surrendering his seat to his successor in the cabinet on 4 March, 1885, he went at once to his home in Newark, N. J., where, on his arrival, he found himself too ill to receive the citizens and friends who had filled his house to welcome him. For many weeks he lay in a lethargic condition, which continued until the end. Like all his ancestors, Mr. Frelinghuysen was the possessor of a strong religious sentiment. He was a close student of the Bible, and an active member of that



branch of the church in which so many of his forefathers had been bright and shining lights. He took a lively interest in educational matters, and in charitable and benevolent institutions. He was president of the American Bible society, and for thirty-four years a trustee of Rutgers college. His published writings are not numerous, nor did he give much time to literary work. Many of his speeches were never written until after they had been delivered; but he never spoke, as he once told the writer, without engraving on his memory, in their exact order, every word that he was about to utter; and so tenacious was that memory that, whenever he deemed it important to commit anything to writing, the manuscript was for him thereafter a useless paper.

FREMIN, James, missionary, b. in France; d. in Quebec, Canada, 2 July, 1691. He was a member of the Society of Jesus, and was sent as a missionary to Canada, but at what time is unknown. In 1656–'8 he lived among the Onondagas, was then for two years at Moscow, and next at Three Rivers and Cape de la Madeleine. At the earnest request of the Cayuga chief, Garaconthié (*q. v.*), he set out in company with Father Peter Raffein to establish a mission among the Cayugas in 1666. In 1667 he was selected to renew the mission in the Mohawk valley, which had been founded by Gogues. He remained a month at Fort Saint Anne, on Isle La Mothe, where he conducted the first Roman Catholic mission in Vermont. He was then taken by his guides to Gandouagué, where a congregation of Algonquin and Huron captives had already been formed. These he gathered in an isolated cabin, and prepared for baptism. He then visited Tionnontoguero, the capital, and in a general assembly of the six villages of the Mohawks, held 14 Sept., he reproached the tribe for their faithlessness and cruelty, and spoke at length on the advantages of peace. Father Fremin, who was already skilled in the Huron and Onondaga dialects, learned the Mohawk very quickly, thus obtaining extraordinary influence among the tribe. As soon as the mission of St. Mary of the Mohawks was firmly established, he sent one of his associates to Albany to gain the friendship of the English, and another to Quebec to announce the results that he had obtained. In October, 1668, set out for the Seneca country, where he was received with great honor. It was at his suggestion that Catharine Ganneaktena (*q. v.*) founded the village of La Prairie for Indian converts. He was recalled to the St. Lawrence in 1670, but returned to the mission of La Prairie, where he remained several years. He made numerous voyages to France in the interests of this mission, and is said to have been again employed among the Iroquois.

FRÉMONT, John Charles, explorer, b. in Savannah, Ga., 21 Jan., 1813. His father, who was a Frenchman, had settled in Norfolk, Va., married Anne Beverley Whiting, a Virginian lady, and supported himself by teaching his native language. After his death, which took place in 1818, his widow removed with her three infant children to Charleston, S. C. John Charles entered the junior class of Charleston college in 1828, and for some time stood high, especially in mathematics; but his inattention and frequent absences at length caused his expulsion. He then employed himself as a private teacher of mathematics, and at the same time taught an evening school. He became teacher of mathematics on the sloop-of-war "Natchez" in 1833, and after a cruise of two years returned, and was given his degree by the college that had expelled him. He then passed a rigorous examination at Baltimore for a professorship in the U. S. navy, and was appointed to the frigate "Independence," but declined, and became an assistant engineer under Capt. William G. Williams, of the U. S. topographical corps, on surveys for a projected railroad between Charleston and Cincinnati, aiding particularly in the exploration of the mountain passes between North Carolina and Tennessee. This work was suspended in 1837, and Frémont accompanied Capt. Williams in a military reconnoissance of the mountainous Cherokee country in Georgia, North Carolina, and Tennessee, made rapidly, in the depth of winter, in anticipation of hostilities with the Indians. On 7 July, 1838, while engaged with Jean Nicolas Nicollet in exploring, under government authority, the country between the Missouri and the northern frontier, he was commissioned by President Van Buren as 2d lieutenant of topographical engineers. He went to Washington in 1840 to prepare his report, and while there met Jessie, daughter of Thomas H. Benton, then senator from Missouri. An engagement was formed, but, as the lady was only fifteen years of age, her parents objected to the match; and suddenly, probably through the influence of Col. Benton, the young officer received from the war department an order to make an examination of the river Des Moines on the western frontier. The survey was made rapidly, and shortly after his return from this duty the lovers were secretly married, 19 Oct., 1841. In 1842, Frémont was instructed by the war department to take charge of an expedition for the exploration of the Rocky mountains, particularly the South pass. He left Washington on 2 May, and in four months had carefully examined the South pass and explored the Wind River mountains, ascending their highest point, since known as Frémont's peak (13,570 ft.). His report of the expedition was laid before congress in the winter of 1842–'3, and attracted much attention both at home and abroad. Immediately afterward, Frémont determined to explore the unknown region between the Rocky mountains and the Pacific, and set out in May, 1843, with thirty-nine men. On 6 Sept., after travelling over 1,700 miles, he came in sight of Great Salt lake. His investigations corrected many vague and erroneous ideas about this region, of which no accurate account had ever been given, and had great influence in promoting the settlement of Utah and the Pacific states. It was his report of this expedition that gave to the Mormons their first idea of Utah as a place of residence. After leaving Great Salt lake, he explored the upper tributaries of the Columbia, descended the valley of that river to Fort Vancouver, near its mouth, and on 10 Nov. set out on his return. His route lay through an almost unknown region leading from the Lower Columbia to the Upper Colorado, and was crossed by high and rugged mountain-chains. Deep snow soon forced him to descend into the great basin, and he presently found himself, in the depth of winter, in a desert, with the prospect of death to

his whole party from cold and hunger. By astronomical observation he found that he was in the latitude of the bay of San Francisco; but between him and the valleys of California was a snow-clad range of mountains, which the Indians declared no man could cross, and over which no reward could induce them to attempt to guide him. Frémont undertook the passage without a guide, and accomplished it in forty days, reaching Sutter's Fort, on the Sacramento, early in March, with his men reduced almost to skeletons, and with only thirty-three out of sixty-seven horses and mules remaining. Resuming his journey on 24 March, he crossed the Sierra Nevada through a gap, and after another visit to Great Salt lake returned to Kansas through the South pass in July, 1844, having been absent fourteen months. The reports of this expedition occupied in their preparation the remainder of 1844. Frémont was given the double brevet of 1st lieutenant and captain in January, 1845, at the instance of Gen. Scott, and in the spring of that year he set out on a third expedition to explore the great basin and the maritime region of Oregon and California. After spending the summer in exploring the watershed between the Pacific and the Mississippi, he encamped in October on the shore of the Great Salt lake, and after crossing the Sierra Nevada with a few men, in the dead of winter, to obtain supplies, left his party in the valley of the San Joaquin while he went to Monterey, then the capital of California, to obtain from the Mexican authorities permission to proceed with his exploration. This was granted, but was almost immediately revoked, and Frémont was ordered to leave the country without delay. Compliance with this demand was impossible, on account of the exhaustion of Frémont's men and his lack of supplies, and it was therefore refused. The Mexican commander, Gen. José Castro, then mustered the forces of the province and prepared to attack the Americans, who numbered only sixty-two. Frémont took up a strong position on the Hawk's peak, a mountain thirty miles from Monterey, built a rude fort of felled trees, hoisted the American flag, and, having plenty of ammunition, resolved to defend himself. The Mexican general, with a large force, encamped in the plain immediately below the Americans, whom he hourly threatened to attack. On the evening of the fourth day of the siege Frémont withdrew with his party and proceeded toward the San Joaquin. The fires were still burning in his deserted camp when a messenger arrived from Gen. Castro to propose a cessation of hostilities. Frémont now made his way northward through the Sacramento valley into Oregon without further trouble, and near Tlamath lake, on 9 May, 1846, met a party in search of him with despatches from Washington, directing him to watch over the interests of the United States in California, there being reason to apprehend that the province would be transferred to Great Britain, and also that Gen. Castro intended to destroy the American settlements on the Sacramento. He promptly returned to California, where he found that Castro was already marching against the settlements. The settlers flocked to Frémont's camp, and in less than a month he had freed northern California from Mexican authority. He received a lieutenant-colonel's commission on 27 May, and was elected governor of California by the American settlers on 4 July. On 10 July, learning that Com. Sloat, commander of the United States squadron on that coast, had seized Monterey, he marched to join him, and reached that place on 19 July, with 160 mounted riflemen. About this time Com. Stockton arrived at Monterey with the frigate "Congress" and took command of the squadron, with authority from Washington to conquer California. At his request Frémont organized a force of mounted men, known as the "California battalion," of which he was appointed major. He was also appointed by Com. Stockton military commandant and civil governor of the territory, the project of making California independent having been relinquished on receipt of intelligence that war had begun between the United States and Mexico. On 13 Jan., 1847, Frémont concluded with the Mexicans articles of capitulation, which terminated the war in California and left that country permanently in the possession of the United States. Meantime Gen. Stephen W. Kearny, with a small force of dragoons, had arrived in California. A quarrel soon broke out between him and Com. Stockton as to who should command. Each had instructions from Washington to conquer and organize a government in the country. Frémont had accepted a commission from Com. Stockton as commander of the battalion of volunteers, and had been appointed governor of the territory. Gen. Kearny, as Frémont's superior officer in the regular army, required him to obey his orders, which conflicted with those of Com. Stockton. In this dilemma Frémont concluded to obey Stockton's orders, considering that he had already fully recognized that officer as commander-in-chief, and that Gen. Kearny had also for some time admitted his authority. In the spring of 1847 despatches from Washington assigned the command to Gen Kearny, and in June that officer set out overland for the United States, accompanied by Frémont, whom he treated with deliberate disrespect throughout the journey. On the arrival of the party at Fort Leavenworth, on 22 Aug., Frémont was put under arrest and ordered to report to the adjutant-general at Washington, where he arrived on 16 Sept., and demanded a speedy trial. Accordingly a court-martial was held, beginning 2 Nov., 1847, and ending 31 Jan., 1848, which found him guilty of "mutiny," "disobedience of the lawful command of a superior officer," and "conduct to the prejudice of good order and military discipline," and sentenced him to be dismissed from the service. A majority of the members of the court recommended him to the clemency of President Polk. The president refused to confirm the verdict of mutiny, but approved the rest of the verdict and the sentence, of which, however, he remitted the penalty. Notwithstanding this, Frémont at once resigned his commission, and on 14 Oct., 1848, set out on a fourth expedition across the continent, at his own expense, with the object of finding a practicable passage to California by way of the upper waters of the Rio Grande. With thirty-three men and 120 mules he made his way through the country of the Utes, Apaches, Comanches, and other Indian tribes then at war with the United States. In attempting to cross the great Sierra, covered with snow, his guide lost his way, and Frémont's party encountered horrible suffering from cold and hunger, a portion of them being driven to cannibalism. All of his animals and one third of his men perished, and he was forced to retrace his steps to Santa Fé. Undaunted by this disaster, he gathered another band of thirty men, and after a long search discovered a secure route by which he reached the Sacramento in the spring of 1849. He now determined to settle in California, where, in 1847, he had bought the Mariposa estate, a large tract of land containing rich gold-mines. His title to this estate was contested, but after a long litigation it was decided in his favor in 1855 by the supreme

court of the United States. He received from President Taylor in 1849 the appointment of commissioner to run the boundary-line between the United States and Mexico, but, having been elected by the legislature of California, in December of that year, to represent the new state in the U. S. senate, he resigned his commissionership and departed for Washington by way of the isthmus. He took his seat in the senate, 10 Sept., 1850, the day after the admission of California as a state. In drawing lots for the terms of the respective senators, Frémont drew the short term, ending 4 March, 1851. The senate remained in session but three weeks after the admission of California, and during that period Frémont devoted himself almost exclusively to measures relating to the interests of the state he represented. For this purpose he introduced and advocated a comprehensive series of bills, embracing almost every object of legislation demanded by the peculiar circumstances of California. In the state election of 1851 in California the Anti-slavery party, of which Frémont was one of the leaders, was defeated, and he consequently failed of re-election to the senate, after 142 ballotings. After devoting two years to his private affairs, he visited Europe in 1852, and spent a year there, being received with distinction by many eminent men of letters and of science. He had already, in 1850, received a gold medal from the king of Prussia for his discoveries, had been awarded the "founder's medal" of the Royal geographical society of London, and had been elected an honorary member of the Geographical society of Berlin. His explorations had gained for him at home the name of the "Pathfinder." While in Europe he learned that congress had made an appropriation for the survey of three routes from the Mississippi valley to the Pacific, and immediately returned to the United States for the purpose of fitting out a fifth expedition on his own account to complete the survey of the route he had taken on his fourth expedition. He left Paris in June, 1853, and in September was on his march across the continent. He found passes through the mountains on the line of latitudes 38° and 39°, and reached California in safety, after enduring great hardships. For fifty days his party lived on horse-flesh, and for forty-eight hours at a time were without food of any kind. In the spring of 1855 Frémont with his family took up his residence in New York, for the purpose of preparing for publication the narrative of his last expedition. He now began to be mentioned as an anti-slavery candidate for the presidency. In the first National Republican convention, which met in Philadelphia on 17 June, 1856, he received 359 votes to 196 for John McLean, on an informal ballot, and on the first formal ballot Frémont was unanimously nominated. In his letter of acceptance, dated 8 July, 1856, he expressed himself strongly against the extension of slavery and in favor of free labor. A few days after the Philadelphia convention adjourned, a National American convention at New York also nominated him for the presidency. He accepted their support in a letter dated 30 June, in which he referred them for an exposition of his views to his forthcoming letter accepting the Republican nomination. After a spirited and exciting contest, the presidential election resulted in the choice of Mr. Buchanan by 174 electoral votes from nineteen states, while Frémont received 114 votes from eleven states, including the six New England states, New York, Ohio, Michigan, Iowa, and Wisconsin. Maryland gave her eight electoral votes for Mr. Fillmore. The popular vote for Frémont was 1,341,000; for Buchanan, 1,838,000; for Fillmore, 874,000. In 1858 Frémont went to California, where he resided for some time. In 1860 he visited Europe. Soon after the beginning of the civil war he was made a major-general of the regular army and assigned to the command of the newly created western department. After purchasing arms for the U. S. government, in Europe, he returned; he arrived in St. Louis on 26 July, 1861, and made his headquarters there, fortifying the city, and placing Cairo in security by a demonstration with 4,000 troops. After the battle of Wilson's Creek, on 10 Aug., where Gen. Nathaniel Lyon was slain, Frémont proclaimed martial law, arrested active secessionists, and suspended the publication of papers charged with disloyalty. On 31 Aug. he issued a proclamation assuming the government of the state, and announcing that he would emancipate the slaves of those in arms against the United States. President Lincoln wrote to him, approving all of the proclamation except the emancipation clause, which he considered premature. He asked Frémont to withdraw it, which he declined, and the president annulled it himself in a public order. In the autumn Frémont moved his army from the Missouri river in pursuit of the enemy. Meanwhile many complaints had been made of his administration, it being alleged that it was inefficient, though arbitrary and extravagant, and after an investigation by the secretary of war he was, on 2 Nov., 1861, relieved from his command just as he had overtaken the Confederates at Springfield. It is claimed by Frémont's friends that this was the result of a political intrigue against him. On leaving his army, he went to St. Louis, where he was enthusiastically received by the citizens. In March, 1862, he was given the command of the newly created "mountain district" of Virginia, Kentucky, and Tennessee. In the early part of June his army engaged a superior force under Gen. Jackson for eight days, with constant sharp skirmishing, the enemy retreating slowly and destroying culverts and bridges to cause delay. The pursuit was terminated with a severe engagement on the evening of 6 June, in which Jackson's chief of cavalry, Gen. Ashby, was killed, and by the battle of Cross-Keys on 8 June. It is claimed by Gen. Frémont that if McDowell's force had joined him, as promised by the president, Jackson's retreat would have been cut off; as it was, the latter made good his escape, having accomplished his purpose of delaying re-enforcements to McClellan. On 26 June the president issued an order creating the "Army of Virginia," to include Frémont's corps, and giving the command of it to Gen. Pope. Thereupon Frémont asked to be relieved, on the ground that he could not serve under Gen. Pope, for sufficient personal reasons. His request having been granted, he went to New York to await further orders, but received no other command during the war, though, as he says, one was constantly promised him. On 31 May, 1864, a convention of Republicans, dissatisfied with Mr. Lincoln, met at Cleveland and tendered to Gen. Frémont a nomination for president, which he accepted. In the following September a committee of Republicans representing the administration waited on him and urged his withdrawal, as "vital to the success of the party." After considering the matter for a week, he acceded to their request, saying in his letter of withdrawal that he did so "not to aid in the triumph of Mr. Lincoln, but to do my part toward preventing the election of the Democratic candidate."

Since 1864 Gen. Frémont has taken little part in public affairs, but has been active in railway mat-

ters. He procured from the Texas legislature a grant of state land in the interest of the Memphis and El Paso railway, which was to be part of a proposed trans-continental road from Norfolk to San Diego and San Francisco. The French agents employed to place the land-grant bonds of this road on the market made the false declaration that they were guaranteed by the United States. In 1869 the senate passed a bill giving Frémont's road the right of way through the territories, an attempt to defeat it by fixing on him the onus of the misstatement in Paris having been unsuccessful. In 1873 he was prosecuted by the French government for fraud in connection with this misstatement. He did not appear in person, and was sentenced by default to fine and imprisonment, no judgment being given on the merits of the case. In 1878–'81 Gen. Frémont was governor of Arizona. He has published "Report of the Exploring Expedition to the Rocky Mountains in 1842, and to Oregon and North California in 1843–'4" (Washington, 1845; New York, 1846; London, 1849); "Col. J. C. Frémont's Explorations," an account of all five of his expeditions (2 vols., Philadelphia, 1859); and "Memoirs of my Life" (New York, 1886). See also the campaign biographies by John Bigelow (New York, 1856), and Charles W. Upham (Boston, 1856).—His wife, **Jessie Benton,** b. in Virginia in 1824, has published "Story of the Guard; a Chronicle of the War," with a German translation (Boston, 1863); a sketch of her father, Thomas H. Benton, prefixed to her husband's memoirs (1886); and "Souvenirs of my Time" (Boston, 1887).

John Charles Frémont

FRENCH, Benjamin Franklin, historian, b. in Richmond, Va., 8 June, 1799. He received a classical education and studied law, but abandoned it on account of failing health. From his early manhood he contributed to magazines and newspapers. He removed to Louisiana in 1830, and engaged in planting and commerce, continuing his literary work and collecting an extensive library, which he afterward presented to the Fiske free library of New Orleans. In 1853 he removed to New York, and, retiring from business, devoted himself to historical writing. He published "Biographia Americana" (New York, 1825); "Memoirs of Eminent Female Writers" (Philadelphia, 1827); "Beauties of Byron, Scott, and Moore" (New York, 1828); "Historical Collections of Louisiana" (1846–'58); "History and Progress of the Iron Trade of the United States" (1858); and "Historical Annals of North America" (1861).

FRENCH, Daniel Chester, sculptor, b. in Exeter, N. H., 9 June, 1850. He studied under Dr. William Rimmer in Boston, and in the studio of Thomas Ball, at Florence, Italy, but returned to the United States in 1876 and opened a studio in Washington. He was a member of the art club of that city, and executed a number of small groups in parian and plaster. The most popular of these works are two groups of dogs, "The Owl in Love," and "Dick Swiveller and the Marchioness." In 1878 he returned to Florence, and has since resided in that city. His sculptures include "The Minute Man of Concord," an heroic statue in bronze, which was unveiled in Concord in 1875; "The May Queen"; "Elsie Venner"; "Peace and War," a colossal group, which is now in the custom-house in St. Louis; "The Waking of Endymion"; and a life-size statue of Gov. Chase, of Michigan, for the National memorial gallery at Washington.

FRENCH, David, scholar, b. in Delaware in 1700; d. at New Castle, Pa., 23 Aug., 1742. He was the son of Col. John French, who was well known in the Delaware counties, as they were then called. Between 1720 and 1730 he wrote six poetical translations, which were printed in the lyric works of John Parke, an early poet of Pennsylvania (1786). Two of these translations are from the elegies of Ovid and four from the odes of Anacreon. Parke inserts them with the remark: "These poems were consigned to oblivion, through the obliterating medium of rats and moths, under the sequestered canopy of an antiquated trunk." In the records of his death and burial in Chester church he is described as "prothonotary of the court at New Castle."

FRENCH, John William, clergyman, b. in Connecticut about 1810; d. in West Point, N. Y., 8 July, 1871. He was graduated at Trinity in 1832, studied theology in the Protestant Episcopal seminary in New York city, and was admitted to holy orders in 1835. In 1836 he was elected professor of ethics in Bristol college, Pa. This institution soon failed, and after holding pastorates in Portland, Me., and Washington, D. C., he was appointed in August, 1858, chaplain of the military academy at West Point, and professor of geography, history, and ethics, to which was afterward added the department of constitutional and international law. In 1860 he received the degree of D. D. from Trinity college.

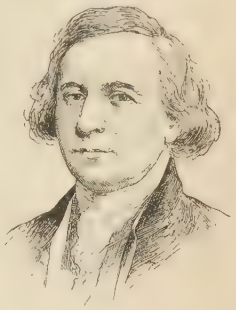
FRENCH, L. Virginia, poet, b. on the eastern shore of Maryland in 1830; d. at McMinnville, Tenn., 31 March, 1881. Her maiden name was Smith. Her maternal grandfather, Capt. Thomas Parker, was an officer in the Revolutionary army. She was educated at Washington female seminary, Pa. In 1848 she removed to Memphis, Tenn., established a school, and under the signature of "Inconnue" contributed to local magazines and newspapers. In 1852 she became an associate editor of the "Southern Lady's Book," a fashion magazine published in New Orleans, and in January, 1853, married John L. French, of McMinnville, Tenn., and for some time edited the "Crusader," a magazine published at Atlanta, Ga. Her collected works are "Wind Whispers," poems (New York, 1856); "Iztalilxo," a tragedy (1859); and "Legends of the South" (Atlanta, 1867).

FRENCH, Mansfield, clergyman, b. in Manchester, Vt., 21 Feb., 1810; d. at Pearsall's, L. I., 15 March, 1876. In his youth he studied at the Bennington seminary, and at twenty began theological studies at the divinity-school of Kenyon college, Ohio. He was the founder of Marietta college, Granville female seminary, and principal of Circleville female college, Ohio. In 1845 he united with the Methodist Episcopal church, and entered the itinerant ministry in the North Ohio conference. During the next three years he was president of the Xenia, Ohio, female college, and agent for Wesleyan university. He was afterward agent for Wilberforce university, the first college opened to the negro race in America. In 1858 he removed to New York city with a religious monthly, of which he was editor and proprietor, called "The Beauty of Holiness." There he became a strong

anti-slavery agitator, and after the capture of Port Royal, at the earnest solicitation of Lewis Tappan and other abolitionists, he went to Washington and laid before President Lincoln his views of the nation's duty toward "contraband" slaves. In June, 1862, he visited Port Royal, inspected the condition of the negroes, and resolved to return to the north and induce teachers to go back with him. On 10 Feb., 1862, he organized a large meeting at Cooper Institute, New York city, where his account of the need of instruction among the colored people excited such interest and sympathy that at once the "National freedman's relief association" was formed, and he was elected general agent. In March, 1863, he again sailed for Port Royal, this time accompanied by a large corps of teachers. He next attempted to have the negroes placed on the abandoned plantations, and taught methodical farming under white superintendents. In this plan he met with much military and civil opposition, but finally met with partial success. Mr. French was the personal friend of President Lincoln, of Sec. Stanton, and Salmon P. Chase. At one period during the civil war Mr. French organized an expedition to intercept telegraphic communications between the Confederate forces, and delivered their messages at Washington. He was popularly known as "Chaplain French."

FRENCH, William Henry, soldier, b. in Baltimore, Md., 13 Jan., 1815; d. there, 20 May, 1881. He was graduated at the U. S. military academy in 1837, and entered the army as 2d lieutenant of artillery. He served in the Seminole war in Florida and on the Canada border in 1837–'8. During the Mexican war he was aide-de-camp to Gen. Franklin Pierce, and on the staff of Gen. Patterson; was engaged in the siege of Vera Cruz, in the battles of Churubusco and Contreras, and brevetted major for gallantry at the capture of the city of Mexico. Between 1850 and 1852 he again served against the Seminole Indians in Florida, and was on garrison and frontier duty till 1861, when he was appointed brigadier-general of volunteers, and served in the Army of the Potomac during the peninsular campaign. He was engaged at the battles of Yorktown, Fair Oaks, Oakgrove, Gaines's Mill, Peach Orchard, Savage Station, Glendale, and Malvern Hill. In the Maryland campaign he commanded a division of Sumner's corps at the battles of Antietam and Fredericksburg, September, 1862, and in the next month was appointed major-general of volunteers. He served in the Rappahannock campaign, in the battles of Fredericksburg and Chancellorsville, commanded the 3d army corps in its operations at Mine Run, from November, 1863, till May, 1864, when he was mustered out of volunteer service. He commanded the 2d artillery on the Pacific coast from 1865 till 1872, and in 1875, having passed through the successive military grades, was appointed lieutenant-colonel, in command at Fort McHenry, Baltimore. In July, 1880, at his own request, being over sixty-two years of age, he was retired.

FRENEAU, Philip, poet, b. in New York city, 2 Jan., 1752; d. near Freehold, N. J., 18 Dec., 1832. He was graduated at Princeton in 1771. Some of his published poems were written before he left college. He made a voyage to the Danish West Indies in 1776, and there wrote several of his longest poems. In 1778 he visited Bermuda, and on his return became a contributor to "The United States Magazine," edited by Hugh H. Brackenridge. On a second voyage in 1780 to the West Indies he was captured by an English cruiser, and his experiences as a prisoner are recorded in bitter terms in "The British Prison-Ship." On regaining his liberty the next year, he wrote frequently in prose and verse for the "Freeman's Journal." After the close of the war he was variously employed as an editor, and master of a vessel in voyages to the West Indies and to the southern states until 1790, when he became editor of the New York "Daily Advertiser." Jefferson became interested in him, and appointed him translator for the state department, and at the same time Freneau assumed the editorship of the "National Gazette." The violence of this paper's attacks on the Federalists aroused Hamilton's ire, who accused Freneau of being the pensioned tool of Jefferson, which compelled the latter to write an explanatory letter to Washington. Freneau's next newspaper undertaking was the "Jersey Chronicle," which he published for a short time at his residence, Mount Pleasant, N. J. In 1797 he issued in New York the "Time-piece and Literary Companion," but his connection with it was brief. Between this time and his death in 1832 he seems to have done little of public interest. He lost his life from exposure, having got astray in a bog meadow on returning to his home from the village near which he lived. His first literary publication, "A Poem on the Rising Glory of America" (Philadelphia, 1771), was written for the college commencement. Brackenridge has been considered the joint author in this production, on the strength of a statement on the title-page to Brackenridge's poem on "Divine Revelation," which reads: "By the same person . . . who, Sept. 25, 1771, delivered a small poem on 'The Rising Glory of America.'" Freneau undoubtedly composed the poem, as he included it in his collected poems, published by himself at Monmouth, N. J. Brackenridge merely recited the piece at the commencement. Freneau published "Voyage to Boston," a poem (New York, 1774; reprinted in Philadelphia, 1775); "General Gage's Confession" (New York, 1775); "The British Prison-Ship," a poem in four cantos (1781); "The Poems of Philip Freneau, written chiefly during the Late War" (1786; reprinted, with a preface by J. R. Smith, in London, 1861); "A Journey from Philadelphia to New York, by Robert Slender, Stocking-weaver" (1787; republished in 1809, under the title "A Laughable Poem, or Robert Slender's Journey from Philadelphia to New York"); "The Miscellaneous Works of Mr. Philip Freneau" (1788); "The Village Merchant," a poem (1794); "Poems written between the Years 1768 and 1794" (1795; new ed., Monmouth, N. J., 1799); "Letters on Various Interesting and Important Subjects, by Robert Slender" (1799); "Poems written and published during the American Revolutionary War" (1809); and "A Collection of Poems on American Affairs" (New York, 1815). Evert A. Duyckinck edited an edition of his "Poems of the American Revolution" (New York, 1865). Freneau also made a translation of Abbé Robins's "Voyages and Travels" (Philadelphia, 1783).—His brother, **Peter,** journalist, b. in New Jersey in 1757; d. in Charles-



Philip Freneau

ton, S. C., in 1813, after completing his education, went to South Carolina, where he was elected secretary of state. About 1795 he became part proprietor of the Charleston "Gazette," which journal he edited with singular ability and fairness till 1810, when he sold out his interest. He then leased a saw-mill and cottage at Pinckney's Ferry, and died of malaria contracted there.

FREY, Joseph Samuel Christian Frederick, clergyman, b. in Mayn-Stockheim, Franconia, Germany, in 1773; d. in Pontiac, Mich., 5 June, 1850. His father, Samuel Levi, was a Jewish teacher, and expounder of rabbinical law. His mother supported the family by keeping a small shop. At six years of age he read the five books of Moses in the original, and was daily instructed by a private tutor in the Jewish law and Talmud, every opportunity being used to inspire him with a hatred of Christianity. At the age of nine the study of Mischna and Gemara, digests of Jewish traditions, were added to his theological text-books. On attaining early manhood he removed to Hesse and taught Hebrew children, as private tutor. At twenty-one he became a leader in the synagogue, read the prayers and law, and spent a whole year in learning the Jewish method of killing fowls, or beasts. About this period, while journeying from Hamburg to Schwerin, in the hope of obtaining at the latter town a more lucrative office, he met a Christian, who suggested to him novel ideas regarding the Messiah. He was impressed with the doctrines of the new religion, and, after three or four years of mental struggle, adopted them as his own. In May, 1798, he was baptized and received into the Protestant communion. In 1799 he entered the theological seminary established in Saxony by Baron von Shiernding for the education of missionaries, studied there for one year, and then went to London, with the intention of going to Africa as a missionary. He afterward changed his purpose and decided to remain in England and become an evangelist to his own people. His family, on learning his apostasy, enacted all the ceremonies which would have been performed at his death. For the next seven years he labored in connection with the London missionary society, travelling through the United Kingdom, preaching to whatever Jewish congregations he could muster, suffering much obloquy and privation and meeting with little encouragement. In 1816 he removed with his family to New York, established the Mulberry street Congregationalist church, and was ordained its pastor in 1818. In 1820 he founded the American society for meliorating the condition of the Jews. The object of this association was to establish an asylum for Christian Hebrews from all parts of the world. The enterprise proved a failure, and occupied several years of fruitless labor. In 1827, Mr. Frey, convinced of the necessity of immersion, left the Congregationalist church and became a Baptist. He held several small charges as a member of that denomination, and in 1837 resigned his pastorate to go to Europe as an agent for the American society for the conversion of the Jews. He remained abroad three years, but the mission was not favorably received. He returned to New York, lectured weekly in the South Baptist church to such Jews as he could induce to form his congregation, went on missionary journeys through the southern and southwestern states, and finally settled in Pontiac, Mich., where he taught Hebrew in the preparatory department of the State university. His published works are "Narrative of my Life" (New York, 1809); "Hebrew Bible" (1811); "Hebrew Grammar" (1813–'23); "Judah and Israel" (1837); "Lectures of Scripture Types" (1841); and "Report of the Agency in Europe" (1842).

FRÉZIER, Amédée François (fray-zee-ay), French military engineer, b. in Chambery, France, in 1682; d. in Brest, 26 Oct., 1773. He was the son of a Scotch refugee who had fled to Savoy. Amédée was educated in Paris, and served as lieutenant of infantry from 1702 till 1707, when he entered the engineer corps. In 1712 the government sent him to examine the condition of the Spanish colonies in America. After visiting the principal points in Peru, Chili, and Brazil, he returned to Marseilles on 17 Aug. He pointed out several mistakes in the "Relation" of Father Feuillée, and this led to a bitter controversy between the two travellers. Frézier introduced the large Chili strawberry into France. In 1719 he was stationed at Santo Domingo as engineer-in-chief, and made a map of the island, to which he added a plan of the city of Santo Domingo. On his return, in 1728, he received the cross of St. Louis. He was appointed director of the fortifications of Brittany in 1739, and engaged in this work until 1764, when he was retired as a lieutenant-colonel. In 1752 he was elected a member of the French academy. He published many scientific papers, and several works, including "Relation du voyage de la Mer du Sud, aux côtes du Chili, et du Pérou, fait pendent les années, 1712, 1713, et 1714" (Paris, 1714; 2d ed., enlarged, 1732; Dutch translation, Amsterdam, 1718; German translation, Hamburg, 1718; English translation, with a supplement by Edmund Halley, London, 1718). His "Reponse au P. Feuillée" was added to the Paris edition of 1832. He also published a "Lettre concernant l'histoire des tremblements de terre de Lima" (1755).

FRIAS, Felix (free'-as), Argentine publicist, b. in Buenos Ayres in 1820; d. in Paris in 1881. Early in life he became an opponent of the dictator Rosas, and in 1838 was obliged to seek refuge in Montevideo. There he became acquainted with Gen. Lavalle, and accompanied him in 1839, as secretary, on his invasion of the Argentine Republic. When Lavalle was assassinated on 9 Oct., young Frias rescued his remains and carried them to Bolivia at great risk. He then engaged in literature in Chili, continued his opposition to Rosas, and after the overthrow of the dictator in the battle of Monte Caseros, 3 Feb., 1852, returned to his native country, where he became editor-in-chief of "El Orden." He was afterward minister to Chili, during the protracted discussion of the boundary question between the two countries, served several times as deputy to the National congress, and once as its president. Frias dreamed of an intimate alliance between the church and liberty, and his opinions savored of asceticism. During the serious conflicts at Buenos Ayres, caused by the presidential elections of 1880, he made strenuous exertions to avert civil war, and after the attainment of his object retired to Europe to recruit his health. Among his historical works are "La gloria del Tirano Rosas."

FRIAS, Francisco, Count of Pozos Dulces, Cuban author, b. in Havana in September, 1809; d. in Paris in 1877. He was sent to Baltimore, Md., to be educated, and in 1829 he returned to Cuba and pursued agricultural studies. In 1842 he went to Paris and remained there several years, devoting his time to mechanics, physics, and chemistry. In 1848 he returned to Cuba, and in the next year the Havana lyceum awarded him a first prize for his "Memoria sobre la Industria Pecuaria." The governor of Havana imprisoned him for six months in Morro Castle in 1853, on account of his anti-slavery

ideas, and banished him in 1854. In 1861 he returned to Cuba and assumed the editorship of "El Siglo," the organ of the Liberal party. In November, 1865, the Madrid government called a council to discuss political and financial reforms to be established in Cuba, and Count Pozos Dulces was among the delegates sent to Spain. There he advocated the introduction of white laborers and the abolition of slavery in the Spanish colonies. He returned to Cuba in 1867, and went to Paris in 1869, where he published several political, economical, and scientific memoirs. He was the author of a work entitled "Population and the Cultivation of Land" (Paris), and "Colección de Escritos sobre Agricultura" (2 vols., 1860).

FRIAS, Tomás, Bolivian statesman, b. in Potosi, 14 Jan., 1805; d. in La Paz, 15 Aug., 1884. He began in early life to take an active part in politics, assisting in 1828, after the overthrow of Sucre's government by Gamarra, to re-establish constitutional authority. In 1832 he was appointed by Gen. Santa Cruz secretary of legation in Paris, and was afterward several times deputy to congress, and secretary of state under the administrations of Velasco in 1840, José Ballivian in 1841–'6, and Linares in 1858–'60. In 1861 he was sent as minister plenipotentiary to Chili, and in 1871 was again called to be secretary of state by Gen. Morales, who afterward appointed him president of the council of state. He temporarily assumed the executive power when Morales was assassinated on 25 Nov., 1872, and when Adolfo Ballivian was elected constitutional president, Frias delivered the executive power to him in May, 1873, and was by him appointed vice-president. When Ballivian, toward the end of that year, was prevented by sickness from attending to his official duties, Frias assumed the presidency, and on the death of the former, 14 Feb., 1874, occupied the executive chair for the remainder of his term. His administration was one of the most progressive that Bolivia ever had. In February, 1879, he was appointed minister to France, and as such signed a treaty of friendship and commerce between Spain and his country. On his return he retired to private life.

FRICK, Charles, physician, b. in Baltimore, Md., 8 Aug., 1823; d. there, 25 March, 1860. He studied at Baltimore college, and became a civil engineer, but in 1843 he began the study of medicine, and was graduated at the University of Maryland in 1845. He early gave his attention to auscultation, which was first introduced into Baltimore by his brother-in-law. In 1847, with three others, he organized the Maryland medical institute, a preparatory school of medicine, and took in it the department of practical medicine. In 1849–'56 Dr. Frick was attending physician to the Maryland penitentiary. In 1855–'6 he took a conspicuous part in the Baltimore pathological society, and in the latter year was selected to fill the chair of materia medica in the Maryland college of pharmacy, which he had aided in organizing. In 1858, after his return from an extended European tour, he accepted the professorship of materia medica and therapeutics in the University of Maryland, and at the same time took charge of the medical department of the Baltimore infirmary as visiting physician. He published "Renal Diseases" (1850), and contributed papers to the "Journal of Medical Science" and other scientific periodicals.

FRIES, John, insurgent, b. in Bucks county, Pa., about 1764; d. in Philadelphia about 1825. He was of German descent, and was brought up on a farm, though his tastes seem to have led him to local politics or a military life. Contemporaneous writers describe him as a tall, handsome young man, who rode about the village of Lower Milford with a feather in his hat and a sword at his side. In the spring of 1799 the collection of what was known as the "house- or window-tax" was forcibly resisted in Northampton and the adjoining counties of Bucks and Montgomery. When government officers came to measure the houses, armed companies of citizens seized and imprisoned them. Fries was the captain of one of these regiments, and, pistol in hand, rode at the head of the insurrectionists, capturing officials and subjecting them to punishment whenever any attempt was made to enforce the law. In February, 1798, a public meeting was held at the house of John Kline, of the township of Lower Milford, and a paper drawn up and signed by fifty-two persons, in which each signer bound himself to resist the "window-tax" at any cost. John Fries assisted in drawing up the paper, and pledged himself to raise 700 men to support the cause. At the head of this company of armed men he went to Quakertown, arrested the assessors, and liberated several prisoners whom the sheriff had in charge. The next day he set out for Northampton, and was on his way to Bethlehem with his troop when he was met by a deputation from the U. S. marshal, urging him to return. This he refused to do till the marshal should consent to release what prisoners he had in charge, and urged his men to fire on the deputation if the marshal should refuse. The prisoners were finally given up when resistance seemed futile, and Fries's troop dispersed amid the huzzas of the insurgents and their sympathizers. After this, the militia was called out, and Fries was arrested and put on trial for high treason, in May, 1799. He was pronounced guilty, and a new trial was held in April, 1800, with the same result. Fries was resentenced to be hanged, but, against the advice of every member of his cabinet, President Adams pardoned him, and issued a general amnesty for all the offenders. Fries subsequently opened a tin-ware shop in Philadelphia, and became rich and respectable.

FRIEZE, Henry Simmons, educator, b. in Boston, Mass., 15 Sept., 1817. After his father's death, in 1830, he was clerk in a store in Pawtucket, R. I., and organist in various churches. He afterward entered Brown, where he was graduated at the head of his class in 1841. From his graduation till 1845 he was instructor in the university, and then, for nine years, Latin principal in the university grammar-school. In 1854 he resigned to accept the chair of the Latin language and literature in the University of Michigan, where he still (1887) remains. On the resignation of President Haven in 1869, Prof. Frieze acted as president of the university until 1871. In that year, owing largely to his influence, most of the privileges of the university were opened to women, and in 1886 they were received into all its departments. Prof. Frieze was the author of the system of inspection by which an official connection has been established between the university and the high schools of the state. In 1880–'1, in the absence of President Angell on a diplomatic mission to China, Prof. Frieze again acted as president of the university. He has taken much interest in musical matters there, acting for twenty years as organist, and organizing the University musical society. He has also been active in art matters. The degree of LL. D. was conferred on him by Chicago university and Kalamazoo college in 1870, by Brown university in 1882, and by the University of Michigan in 1885. Dr. Frieze has contributed to various educational and philological magazines,

and has published occasional addresses, including "Ancient and Modern Education," one on "Art Museums," and a memorial address on the "Life and Works of Henry Philip Tappan, First President of the University of Michigan." He is the author of valuable annual reports to the board of regents, and has published editions of Virgil's "Æneid" (1860) and Quintilian (1867), and "The Story of Giovanni Dupre," a 19th century Florentine sculptor (London, 1886).

FRINK, John, physician, b. in Rutland, Mass., 7 Sept., 1731; d. there in 1807. He studied medicine with Dr. Goffe, of Marlborough, Mass., and was one of the founders of the Massachusetts medical society. He was a member of the convention that formed the constitution of Massachusetts, and the first president of the Worcester county medical society. He was a justice of the peace when that was considered a mark of distinction, and as a physician and a citizen was highly esteemed.

FRISBIE, Levi, clergyman, b. in Branford, Conn., 6 July, 1748; d. in Ipswich, Mass., in 1806. He was graduated with the first class at Dartmouth in 1771, studied theology under the Rev. Eleazar Wheelock at Hanover, and was ordained there in 1772. He at once engaged in missionary service among the Delaware Indians, and afterward labored with the Canadian tribes, and among those in Maine. The mission was ended by the Revolutionary war, and in 1776 he was installed pastor of the 1st Congregationalist church at Ipswich, Mass. He published "Sermons and Orations" (1783–1804).—His son, **Levi,** scholar, b. in Ipswich, Mass., 15 Sept., 1783; d. in Cambridge, 9 July, 1822, was graduated at Harvard in 1802, and in 1803 began the study of law, which he was compelled to abandon on account of the failure of his eyesight. Mr. Frisbie was appointed Latin tutor at Harvard in 1805, and in 1817 became professor of natural religion, moral philosophy, and civil polity. His writings were collected and published by his friend and fellow-professor, Andrew Norton (Boston, 1823). They contain classical and literary papers, previously published in various reviews, a version of Horace's epistle, "Ad Julium Florum," and a popular poem called "Castle in the Air."

FRISBY, Edgar, astronomer, b. in Great Easton, Leicestershire, England, 22 May, 1837. He was graduated at the University of Toronto in 1863, and until 1867 was engaged in teaching in Canada. Subsequently he was acting professor of mathematics in the Northwestern university, and later assistant astronomer at the U. S. naval observatory in Washington. In 1878 he became full professor of mathematics in the U. S. navy, with the relative rank of lieutenant. He was sent to California by the U. S. government to observe the total solar eclipse on 11 Jan., 1880. Prof. Frisby is a member of scientific societies, to whose proceedings he contributes occasional papers. His principal work is the computation of the orbit of the great comet of 1882, with observations extending over a period of six or seven months.

FRISTOE, Edward T., educator, b. in Rappahannock county, Va., 16 Dec., 1830. He was graduated at the Virginia military institute in 1849, and, after spending three years in teaching, was graduated at the University of Virginia in 1855 with the degree of A. M. While yet an undergraduate he was elected to the chair of mathematics in Columbian university in Washington, D. C., where he remained until 1860, when he was called to the professorship of mathematics and astronomy in the State university of Missouri. Two years later he entered the Confederate army as assistant adjutant-general, ranking as captain, and subsequently became colonel in the cavalry, serving under Gen. Sterling Price. In 1865 he returned to Columbian university as professor of chemistry, becoming also, in 1871, occupant of a similar chair in the National medical college, and in 1844 dean of the Corcoran scientific school of the Columbian university in Washington, D. C. From 1872 till 1884 he was professor of chemistry of the National college of pharmacy in Washington. In 1868 he received the degree of LL. D. from William Jewell college, and in 1872 the degree of doctor of pharmacy from the National college of pharmacy. Prof. Fristoe has published scientific addresses.

FRITSCHEL, Conrad Sigmund, clergyman, b. in Nuremberg, Bavaria, 2 Dec., 1833. He was educated in the gymnasium and mission institute of his native place, and graduated at the mission institute of Neuendettelsau, Bavaria, in 1854. He was ordained to the ministry, 23 April, 1854, and in the same year emigrated to the United States. In 1879 he received the degree of D. D. from Muhlenberg college, Allentown, Pa. He was professor in the Evangelical Lutheran theological seminary, Dubuque, Iowa, in 1854–'5, pastor of a Lutheran congregation in Wisconsin in 1855–'6, and of one in Detroit, Mich., in 1856–'8, and professor of theology at Wartburg seminary, St. Sebald, Iowa, in 1858–'74. In 1860, 1866, and 1870 he travelled extensively in Germany and Russia. He has published (in German) "Iowa and Missouri," a controversial pamphlet (Mendota, Ill., 1878), and a number of essays, sermons, etc. With his brother, he has edited, since 1876, "Kirchliche Zeitschrift," a theological bimonthly magazine published at Mendota, Iowa.—His brother, **Gottfried Leonhard Wilhelm,** clergyman, b. in Nuremberg, Bavaria, 19 Dec., 1836, was graduated at the university at Erlangen in 1856, and came to the United States in 1857. Since that date he has been professor of theology in the theological seminary of the Iowa synod at Mendota, Ill. In 1879 he received the degree of D. D. from Muhlenberg college, Allentown, Pa. He has published (in German) "Meditations on the Passion of Christ" (Nuremberg, 1868); "History of Protestant Missionary Operations among the North American Indians in the 17th and 18th Centuries" (1870); "The Teachings of Missouri Synod on the Doctrine of Predestination" (1883), and other pamphlets. These two brothers, working together in the same institution and synod, have done much to advance Lutheran interests in Illinois, Iowa, and adjacent states. Their institution, from small beginnings, has attained large dimensions, as also has the synod of Iowa, which they organized.

FRITZ, Samuel, missionary, b. in Bohemia in 1653; d. in the mission of Xeberos, near Laguna, Peru, 20 March, 1728. He became a member of the Jesuit order, and went as missionary to Peru in 1685. His constitution was not able to resist the unhealthfulness of the climate, and his weakness became so great that he had to be transported to Pará, a Portuguese colony at the mouth of the river, where he arrived on 11 Sept., 1689. The governor of this city took him for a spy and imprisoned him until July, 1691. After repeated orders from the court of Lisbon he was liberated, and finally arrived in Lima, where he laid before the viceroy of Peru the observations that he had made on his journey. In 1693 he returned to his missionary labors on the Amazon. He afterward took several laborious journeys to Quito and other places in the interest of his converts, and became superior-general of the mission. He had great aptitude for the

arts, and in a comparatively short period had become a skilful architect, carpenter, sculptor, and painter. Several churches of the missions were adorned with pictures by his hand. He passed forty-two years among the tribes that he had converted. His great map of the Amazon was engraved on a small scale at Quito in 1707, and appeared for the first time in France in vol. xii. of the "Lettres édifiantes" (1st ed., 1717). It is also found in vol. viii. of the second edition, with an abridgment of his "Memoirs" on the river whose course he traces.

FROBISHER, Sir **Martin,** English navigator, b. in Doncaster, Yorkshire, England, about 1536; d. in Plymouth, England, 7 Nov., 1594. He was bred to the sea. In search of a northwest passage to India, and under the patronage of the Earl of Warwick and other noblemen, he sailed with a fleet of three vessels from the port of Deptford in 1576. After exploring different parts of the Arctic coast, and entering the strait that bears his name, he returned to England, carrying with him some black ore which is said to have contained gold. In consequence of this discovery, he was encouraged to make two more voyages, which proved fruitless. In 1585 he accompanied Drake to the West Indies. On board the "Triumph" he took part in the destruction of the Spanish armada in 1588, and was honored with knighthood for his bravery. In 1594 he lent a helping hand to Henry IV. of France against the Leaguers and Philip II. of Spain, and while attacking a fort near Brest received a mortal wound.

FRŒBEL, Julius, author, b. in Greisheim, Germany, in 1806. He was a nephew of the founder of the kindergarten system, Friedrich Frœbel. Julius was educated at the universities of Jena, Munich, and Berlin, and in 1833 became a naturalized citizen of Switzerland. He joined the extreme radical party, edited the "Swiss Republican," and issued several scientific works and political pamphlets, many of which were suppressed in Germany. In 1848 he was elected a member of the German parliament that met at Frankfort, and afterward accompanied the radical Robert Blum to Vienna, where he was arrested and condemned to death by the court-martial that convicted Blum, but was pardoned before the date fixed for the execution. On the dissolution of the parliament he visited the United States, where he became editor of a German newspaper, lectured in New York city, and in 1850 went to Nicaragua, Santa Fé, and Chihuahua as correspondent of the New York "Tribune." He returned to Germany in 1857, and efforts were made to expel him from Frankfort, but he was protected on the ground of his naturalization as a citizen of the United States. In 1862 he went to Vienna, took an active part in liberal politics, and became a leader of the Federalist party. In 1873 he was appointed consul of the German empire at Smyrna, Asia Minor. His works are "System of Social Politics" (London, 1847); "The Republican," an historical drama (1848); "Seven Years' Travel in Central America, Northern Mexico, and the Far West of the United States" (1859); "Theory of Politics" (1861); and "Political Addresses" (1870).

FROELIGH, Solomon, clergyman, b. at Red Hook, Dutchess co., N. Y., 29 May, 1750; d. in New Jersey, 8 Oct., 1827. He was early impressed with the religious teaching of the pastor of the Dutch Reformed church that he attended, and induced his father, who was a farmer, to give him an education that he might fit himself to be a clergyman. His patriotism was ardent, and during the Revolution, when the British occupied Long Island in 1775, he narrowly escaped with his life. He received his education under Dirck Romeyn and Johannes H. Goetschius, and was licensed to preach by the general meeting of ministers and elders in 1774. In 1786 he settled in Hackensack, N. J., and attempted to bring together the conservative and independent branches of the church there, but the members were divided by the political controversies arising from the Revolution, and his efforts were fruitless. For a time he succeeded in uniting the two congregations, but dissensions soon broke out afresh in their midst, the church was struck by lightning, and the stone over the entrance on which were inscribed the words "Union makes Strength" was broken in two. So great an effect did this occurrence have on the superstitious congregation that the churches disunited, and not even the efforts of the synod could bring them together. From 1795 till 1800 Mr. Froeligh passed his life in ecclesiastical discussion, and in 1822, with that portion of the church that favored independent American organization, effected a schism under the name of the "True Reformed Dutch Church." Dr. Froeligh was arraigned before his synod, and was suspended in 1822 for secession and contempt of ecclesiastical authority. He printed various sermons, most of them in the "Banner of Truth," including "Sermon on Occasion of the Lightning rending the Church Steeple" (1795), and published "The Trial of Universal Charity by a Jury" (New York, 1824), and "Reasons assigned by a Number of Ministers, Elders, and Deacons for declaring themselves the True Reformed Dutch Church in the United States" (Hackensack, 1822).

FROMENTIN, Eligius, jurist, b. in France; d. in New Orleans, La., 6 Oct., 1822. He was a Roman Catholic priest and a member of the Jesuit order, but, after removing to the United States, married and settled in New Orleans. He studied law, was admitted to the bar, and practised there. Mr. Fromentin was elected to the U. S. senate, and served from 1813 till 1819. He was appointed judge of the criminal court in New Orleans in 1821, and presided over the same court in the western district of Florida in January, 1822, while Jackson was governor, for a short time only, afterward resuming the practice of law in New Orleans. His wife died of yellow fever in October, 1822, and he followed her within twenty-four hours. He published "Observations on a Bill respecting Land-Titles in Orleans and Dominique."

FRONTENAC, Louis de Buade, Comte de, governor of New France, b. in France in 1620; d. in Quebec in 1698. His father held a high post in the household of Louis XIII., who became the child's godfather. At fifteen, young Louis, who had shown an uncontrollable passion for military life, was sent to serve in Holland, under the Prince of Orange. He distinguished himself in various battles and sieges, and at twenty-three was made colonel of the regiment of Normandy. Three years

later, after being several times wounded, he was raised to the rank of brigadier. He soon afterward became enamored of Mademoiselle de la Grange-Trianon, and married her at Paris in spite of the opposition of her relatives. Madame de Frontenac conceived an aversion for her husband, who was self-willed and violent, and she presently left him to follow the fortunes of the famous Mademoiselle de Montpensier. Being, however, almost as wilful as Frontenac himself, she at last quarrelled with the princess, and was dismissed from her service. A partial reconciliation followed between her husband and her self.

In 1672, having gained a high military reputation, Frontenac was made governor of Canada, with all the other countries thus included under the name of New France. Some say that he sought the appointment because he could not endure his wife; others, that his wife, unable to tolerate him, used her influence at court to send him into an honorable banishment; others, again, that the king, jealous of his attentions to Madame de Montespan, who is said to have smiled upon him, sent him to Canada to get rid of a rival. On arriving at Quebec he proceeded to model his government after the old feudal pattern. This revival of by-gone liberties excited the ire of Louis XIV., and Frontenac was sharply rebuked. He next quarrelled with the Jesuits, then all-powerful in Canada, and soon afterward fell into a dispute with Perrot, the governor of Montreal, whom he charged with insubordination, rebellion, and unlawful trade in furs. This brought him into collision with the priests of St. Sulpice, feudal proprietors of Montreal, and scenes ensued that were more lively than edifying. He had thus far ruled alone, but the court now sent him a colleague in the person of Duchesneau. The government of Canada was of a dual nature; the governor held the place of honor and the military command, while the civil administration was the proper function of the intendant, who was designed as a check, and even as a spy, upon his military partner. Hence their relations were always critical, and on this occasion they quarrelled bitterly. Duchesneau sought support from the bishop and the priests. Frontenac set at defiance intendant, bishop, and ecclesiastics alike. Sometimes the contest was for precedence at church and in public ceremonies; sometimes it took the form of charges of maladministration and mutual accusations of illegal trade in furs, accusations well founded on both sides. Rebukes and warnings proving useless, the king in 1682 recalled both contestants. In spite of his outrageous temper, Frontenac had shown great abilities and gained the confidence of the Canadian people; for, while quarrelling with those in power, he was considerate and friendly toward the humbler classes of the colonists. In his dealings with the Indians he mingled haughtiness with conciliation, and showed an extraordinary power of commanding both their respect and their affection. Never, probably, was any white man at once so much feared and loved by them.

He was succeeded by Le Febvre de la Barre, followed by the Marquis de Denonville. The government of the former was disastrous to the colony, and that of the latter brought it to the brink of ruin. Denonville waged against the Iroquois a war meant to humble, but which served only to enrage them. In 1689 they descended in force on the colony, burned and ravaged all the upper part of the island of Montreal, threatened the town itself, and spread blood and havoc everywhere. Canada seemed paralyzed, and terror turned almost to despair when it became known that war with England had begun, and that both white men and red men were arming for her destruction. Since his recall Frontenac had lived in France, poor and half forgotten. The crisis drew him from his obscurity. It was plain that he, and he alone, was the man for the hour. He was summoned before the king and charged once more with the government of New France. In spite of his sixty-nine years, he did not hesitate, accepted the burden and the peril, sailed for the St. Lawrence, and, reaching Quebec, found the whole colony plunged in dejection and distress. The first necessity was to revive the courage of the colonists and impose respect on the haughty and triumphant Iroquois. To these ends he sent three war parties of French and Indians against the English borders. The first advanced on snowshoes, in the dead of winter, against Schenectady, approached it toward midnight during a snowstorm, entered it undiscovered, roused the sleeping villagers with the war-whoop, killed sixty on the spot, captured ninety, and burned the place to the ground. The second party, after toiling for three months in the snow-clogged forests, fell by night on the hamlet of Salmon Falls, and surprised, captured, and destroyed it. The third attacked a small wooden fort that stood within the limits of what is now the city of Portland, Me., and, after an obstinate defence, captured and burned it. These successes compelled the respect of the Iroquois, but were far from daunting the English. On the contrary, they roused them to reprisals which placed Canada in imminent danger. Sir William Phips sailed up the St. Lawrence with thirty-two vessels and twenty-two hundred men, anchored before Quebec, and sent an officer with a summons to surrender. Frontenac received him in the hall of the Château St. Louis, and, enraged by his peremptory tone, the fiery old man bade him return whence he came, and tell those who sent him that his cannon should give them his answer. Phips opened fire, but, as his guns were light, his ammunition scanty, and the fortifications of Quebec, from their lofty position, impregnable to artillery from the river, the bombardment did little harm. At the same time he landed fifteen hundred men below the town, but, after spirited efforts, they were unable to cross the river St. Charles, and were forced to re-embark. Frontenac triumphed, and Phips retired discomfited.

Meanwhile the governor did not neglect his Indian allies, and, at a grand council of the friendly tribes, took up a hatchet, brandished it in the air, and sang the war song, his officers following his example. The Christian Indians of the neighboring missions rose and joined them, and so also did the Hurons and the Algonquins of Lake Nipissing, stamping and screeching like a troop of mad men, while Frontenac led the dance, whooping like the rest. The delighted savages, roused to martial frenzy, promised war to the death, and several years of conflict followed. The sufferings of the colony, infested by Iroquois war parties, were extreme. The fur-trade, which formed its only resource for subsistence, was completely cut off, and a great accumulation of furs remained in the trading posts of the upper lakes, prevented from descending by the watchful enemy. At length, after three years of destitution and misery, Frontenac broke the blockade of the Ottawa; the coveted treasure came safely to Montreal, and the colonists hailed him as their father and deliverer. In 1696, when seventy-six years old, he led in person an invasion of the Iroquois country. At

his approach the warriors burned their chief town, Onondaga, and fled into the forests. After destroying the town of Oneida the expedition returned. The Iroquois were never again a peril to the colony which, during the past half century, they had repeatedly threatened with destruction. But Frontenac was near his end. Overcome at last by age, toils, and passions, he closed his stormy life in 1698, beloved by the Canadian peasantry and hated by the ecclesiastics, except always, his favorites and protégés, the Recollet friars. With all his faults, he had done priceless service to the colony, and his name stands in its annals as that of the most remarkable man who ever represented the crown of France in America.

FROST, Charles, soldier, b. in Tiverton, England, in 1632; d. 14 July, 1697. About 1636 he accompanied his father, Nicholas, to the Piscataqua river, and settled at the head of Sturgeon creek. He was a member of the general court from 1658 till 1669, and assistant in 1680, and in 1693–'7 a councillor. He was also a colonel of the Maine regiment, and participated in the Indian wars. He was ambushed and killed by Indians in consequence of his having treacherously seized some of them, who were either hanged or sold into slavery in a time of peace.

FROST, Charles Christopher, botanist, b. in Brattleboro, Vt., in 1806; d. in 1880. He received his early instruction at a common school of his native village, excelled in mathematics, and studied it several years after he had left school and begun to work at his trade as a shoemaker, making himself familiar with algebra, geometry, the calculus, and kindred branches. Later he devoted his leisure hours to astronomy, geology, mineralogy, meteorology, and botany, especially the last-named study, to which he gave the last half of his life. He contributed to periodicals and was a member of scientific societies in the United States and Europe. During all these years he continued his business in his native town. He was joint author with Edward Tuckerman of a "Catalogue of Plants growing without Cultivation within Thirty Miles of Amherst College" (Amherst, 1875).

FROST, George, jurist, b. in New Castle, N. H., 26 April, 1720; d. in Durham, N. H., 21 June, 1796. He was a son of John Frost, a commander in the British navy, who died in 1732. The son received a public-school education, and was brought up in the counting-house of his uncle, Sir William Pepperell, at Kittery Point, near Portsmouth, N. H. About 1740 he entered one of his uncle's vessels as supercargo and captain, and was a seaman for about twenty years, becoming a partner with George Richards, of London. About 1760 he returned to his old home in New Castle, and resided there until his marriage in 1764 in Durham, N. H., where he removed in 1769. He was judge of common pleas of Stafford county from 1773 till 1791, and for many years chief justice. He was a delegate to the Continental congress in 1777–'9, and was executive councillor in 1781–'4.

FROST, James Henry Paine, physician, b. in Bethel, Me., in 1825; d. in Danville, Pa., in 1875. He was educated at Bowdoin and Amherst, where he was graduated in 1846 and took his medical degree at the Homœopathic college at Philadelphia in 1849. He practised for several years at Wilmington, N. C., but in 1853–'5 he studied theology at Bangor seminary, Me., and preached one summer in Richmond, Me. The failure of his voice forced him to leave the ministry, and he returned to medicine, which he practised for fifteen years in Bangor, Me. He was a professor in the Philadelphia Homœopathic college in 1865–'8, and during this period was one of the founders and editors of the "Hahnemanian Monthly." After living for some time at Bethlehem, Pa., he removed to Danville, Pa., where he remained and continued his residence till his death. He contributed largely to current medical literature.

FROST, John, soldier, b. in Kittery, Me., 5 May, 1738; d. there in July, 1810. He served as captain in the Canadian campaign of 1759, and in 1775 was a lieutenant-colonel at the siege of Boston. When the campaign of 1776 began, he was promoted to the rank of colonel, and he won distinction in the severe engagements that preceded the retreat of Washington to Philadelphia. When Burgoyne invaded New York, Col. Frost's regiment became an adjunct to the army under Gen. Gates, and, after Burgoyne's surrender, Col. Frost joined Washington's central division, and participated in the action of Monmouth and other engagements. Until the close of the war he served in the middle and southern states, and left the army with the rank of brigadier-general. He then returned to Kittery, was appointed judge of the court of sessions for York county, Me., and was subsequently a member of the governor's council in Massachusetts, of which Maine was then part.

FROST, John, compiler, b. in Kennebunk, Me., 26 Jan., 1800; d. in Philadelphia, Pa., 28 Dec., 1859. After one year in Bowdoin he entered Harvard, where he was graduated in 1822. He was principal of Mayhew school, Boston, in 1823–'7, and conducted a school for young ladies in Philadelphia till 1838, when he was appointed professor of English literature in the central high-school of that city. He resigned this post in 1845, and devoted himself to the compilation of histories and biographies, of which, assisted by a corps of writers, he published over 300. Marietta college, Ohio, gave him the degree of LL. D. in 1843. His publications include "History of the World" (3 vols.); "Pictorial History of the United States" (2 vols., Philadelphia, 1844); "Beauties of English History"; "Wild Scenes of a Hunter's Life"; "Illustrious Mechanics"; "Book of Heroes"; "Book of the Army"; and "Book of the Navy."

FROST, Rufus Smith, philanthropist, b. in Marlborough, N. H., 18 July, 1826. He removed in 1833 to Boston, was educated in the public schools there and in Newton academy, and began mercantile life as a clerk. He afterward engaged in business on his own account, and also became a manufacturer. He was elected mayor of Chelsea in 1867 and 1868, was a member of the state senate in 1871–'2, and of the governor's council in 1873–'4. He built a fire-proof building in his native town in 1867, placed in it a valuable library, and presented it to the town on condition that it should be for the free use of the people. He claimed to have been elected to congress as a Republican in 1874, but the house gave the seat on a technicality to J. G. Abbott, Democrat, who had contested the election. During the contest Mr. Frost retained his seat, serving from 6 Dec., 1875, till 28 July, 1876. Mr. Frost was president of the Boston board of trade in 1879–'81, has been a trustee of Wellesley college since 1876, and president of the New England conservatory of music since 1882.

FROST, Thomas, clergyman, b. in Pulham, near Norwich, England, in 1759; d. in Charleston, S. C., 18 July, 1804. He was graduated at Cambridge university in 1780, and was ordained deacon, 11 March, 1781, and priest, 6 June, 1784, by the bishop of Norwich. Putting aside prospects of advancement in the established church, Mr. Frost

accepted an invitation to labor in the Protestant Episcopal church in South Carolina. He was elected assistant minister of St. Philip's church, Charleston, 5 Jan., 1786, and, on the death of the rector, Bishop Robert Smith, in 1801, he was chosen to fill the vacancy. He served for eighteen years, and was noted as being an able preacher and a faithful pastor.—His son, **Thomas Downs,** b. in Charleston, S. C., 24 Feb., 1794; d. in the West Indies, 16 May, 1819, was graduated at Yale in 1813. His theological studies were pursued under Bishop Dehon's direction, and he was ordained, 21 Feb., 1815. He was immediately elected assistant minister of St. Philip's church, Charleston. In 1817 he was compelled to suspend his labors on account of failing health. He was benefited by a visit to Cuba, and resumed his parochial duties in May, 1818; but a renewal of the attack next year proved fatal, and he died suddenly. Mr. Frost was esteemed for many noble qualities, and was regarded as a highly attractive preacher.

FROTHINGHAM, James, painter, b. in Charlestown, Mass., in 1786. He began life as a chaise-painter in his father's chaise manufactory. With meagre instruction in colors, he finally began a successful career as a portrait-painter, and obtained recognition as a truthful and painstaking artist. His works had sale chiefly in New York and Salem. His copy of Stuart's "Washington" was much admired, and his original portraits were praised for fidelity of coloring.

FROTHINGHAM, Nathaniel Langdon, clergyman, b. in Boston, Mass., 23 July, 1793; d. there, 3 April, 1870. He was graduated at Harvard in 1811, and, after teaching in the Boston Latin-school, became in 1812 instructor in rhetoric and oratory at Harvard, which office he was the first to hold. He also studied theology, and on 15 March, 1815, was ordained pastor of the 1st Congregational church (Unitarian) in Boston. He resigned his charge, on account of feeble health, in 1850. He contributed largely to religious periodicals, chiefly to the "Christian Examiner," and published, besides nearly fifty occasional sermons, "Deism or Christianity," in four discourses (Boston, 1845); "Sermons in the Order of a Twelvemonth" (1852); and "Metrical Pieces, Translated and Original," a collection of verses contributed to magazines (1855). These are distinguished, like his prose writings, for refinement and grace. His first notable poem was delivered at the installation of President Kirkland, of Harvard, while its author was a student there; his principal one is a version of the "Phenomena of the Stars," from the Greek of Aratus.—His son, **Octavius Brooks,** author, b. in Boston, 26 Nov., 1822, was graduated at Harvard in 1843, and, after three years in the divinity school, was ordained pastor of the North church (Unitarian) at Salem, Mass., 10 March, 1847. He preached in Jersey City, N. J., in 1855–'9, then removed to New York, and became pastor of a congregation that in 1860 was organized as the "Third Unitarian Congregational church," and represented the most radical branch of his denomination. He dissolved this society in 1879 and went to Europe, and on his return in 1881 formally withdrew from specific connection with any church, and devoted himself to literature in Boston. He has been a leader in the movement that has for its object the promotion of rationalist ideas in theology, and has contributed largely to various journals and reviews. In 1867 he became first president of the Free religious association. He was for a time art-critic of the "New York Tribune." Mr. Frothingham has published more than 150 sermons, and is the author of the following works: "Stories from the Lips of the Teacher" (Boston, 1863); "Stories from the Old Testament" (1864); "Child's Book of Religion" (1866); "The Religion of Humanity" (New York, 1873); "Life of Theodore Parker" (Boston, 1874); "Transcendentalism in New England" (New York, 1876); "The Cradle of the Christ" (1877); "Life of Gerrit Smith" (1878); "Life of George Ripley" (Boston, 1882); and "Memoir of William Henry Channing" (1886). — Nathaniel Langdon's daughter, **Ellen,** b. in Boston, 25 March, 1835, has devoted herself to German literature, and has translated Lessing's "Nathan der Weise" (1868); Goethe's "Hermann und Dorothea" (1870); Lessing's "Laokoon" (1874); and Grillparzer's "Sappho" (1876).

FROTHINGHAM, Richard, historian, b. in Charlestown, Mass., 31 Jan., 1812; d. there, 29 Jan., 1880. He was for many years a proprietor of the Boston "Post," and in 1852–'65 served as its managing editor. He was a member of the legislature in 1839, 1840, 1842, 1849, and 1850, and a delegate to the Democratic national convention of 1852, and in 1853 to the State constitutional convention. He served as mayor of Charlestown in 1851–'3, and was for several years treasurer of the Massachusetts historical society. He published a "History of Charlestown" (1848); "History of the Siege of Boston" (Boston, 1849); "The Command in the Battle of Bunker Hill" (1850); "Life of Gen. Joseph Warren" (1865); "Tribute to Thomas Starr King" (1865); "Rise of the Republic" (1871); and many pamphlets and addresses including "The Centennial: Battle of Bunker Hill" (1875).

FROTHINGHAM, Washington, clergyman, b. in Fonda, N. Y., 28 Feb., 1822. He received an academic education, became a clerk for Edwin D. Morgan in New York, afterward established himself in wholesale trade, and met with a moderate success. He then studied theology at Princeton, and entered the Presbyterian ministry in 1855. His most important work as a clergyman has been the establishment of the West Side Presbyterian church in Albany, N. Y. Beginning in 1862, he has built up a system of New York correspondence, which now forms a prominent and popular feature of journals in Hartford, Rochester, Scranton, Troy, Utica, and other inland cities. His pen-names "Martel," "Macaulay," "Rosicrucian," and "Hermit of New York" are familiar to the reading public, because under them he deals with topics that are seldom treated by other correspondents. He has published in book-form "Atheos, or Tragedies of Unbelief" (New York, 1863); "The Martel Papers: Life-Scenes in the Reign of Terror" (1865); and other works, all anonymous.

FRUITS, George, soldier, b. near Baltimore, Md., in 1762; d. near Crawfordsville, Ind., 6 Aug., 1876. He served in the latter part of the Revolutionary war, went to Virginia in 1787, and was afterward with Daniel Boone in Kentucky. He served against the Indians in 1791–'6, and also in the war of 1812. Four generations of his descendants followed him to the grave.

FRY, Benjamin St. James, journalist, b. in Rutledge, Granger co., Tenn., 16 June, 1824. He was educated at Woodward college, Cincinnati, began to contribute to the Cincinnati "Times" in 1840, and in 1844 was joint editor and publisher of the "Western Rambler." He became a clergyman of the Methodist Episcopal church in 1847, was president of Worthington college for young women in 1856–'60, and in 1861–'4 was chaplain of the 63d Ohio regiment. In 1872 he was elected editor of the St. Louis "Central Christian Advocate," and

re-elected in 1876, 1880, and 1884. In the last-named year he was a member of the Methodist ecumenical conference in London, England, and of the Baltimore Centennial conference, before which he read an essay on the "Methodist Press." Quincy college, Ill., gave him the degree of D. D. in 1871. Dr. Fry has contributed to various periodicals, and published several Sunday-school books, including lives of Bishops Whatcoat (New York, 1854), McKendree (1855), Roberts (1856), and George (1856); and "Property Consecrated," a prize essay (New York, 1856).

FRY, Cary Harrison, soldier, b. in Garrard county, Ky., 20 Aug., 1813; d. in San Francisco, Cal., 5 March, 1873. He was graduated at the U. S. military academy in 1834, and served in the 3d infantry at Fort Towson, Indian Territory, but resigned on 31 Oct., 1836, studied medicine, and practised in Louisville, Ky., in 1845–'6. In the Mexican war he served as major in the 2d Kentucky volunteers, commanding the regiment after the fall of its colonel and lieutenant-colonel in the battle of Buena Vista, where he distinguished himself. He practised medicine in Danville and Louisville, Ky., in 1847–'53, and on 7 Feb. of the latter year re-entered the regular army as paymaster, with the staff rank of major. During the civil war he served at Washington, being acting paymaster-general in 1862, and becoming deputy paymaster-general in 1866. He was brevetted brigadier-general, U. S. army, on 15 Oct., 1867, and from 1869 till his death was chief paymaster of various military divisions.—His cousin, **Speed Smith,** soldier, b. in Mercer (now Boyle) county, Ky., 9 Sept., 1817, after studying at Centre college, Danville, Ky., completed his education at Wabash college, Crawfordsville, Ind. He organized a company of the 2d Kentucky volunteer infantry in 1846, commanded it during the Mexican war, and after his return was county judge of Boyle county, 1857–'61. At the beginning of the civil war he organized the 4th Kentucky regiment in the National army, and served as its colonel till 21 March, 1862, when he was promoted to brigadier-general of volunteers. He was mustered out of service on 24 Aug., 1865, and in 1869–'72 was a supervisor of internal revenue in his native state.

FRY, James Barnet, soldier, b. in Carrollton, Greene co., Ill., 22 Feb., 1827. He was graduated at the U. S. military academy in 1847, and assigned to the 3d artillery. After serving for a short time as assistant instructor of artillery at West Point, he joined his regiment at the city of Mexico, where he remained in 1847–'8. After doing frontier and garrison duty at various posts, he was again instructor at West Point in 1853–'4, and adjutant of the academy in 1854–'9. He was made assistant adjutant-general on 16 March, 1861, was chief of staff to Gen. Irwin McDowell in that year, and to Gen. Don Carlos Buell in 1861–'2, taking part in the battles of Bull Run, Shiloh, and Corinth, the movement to Louisville, Ky., and the pursuit of Gen. Bragg through the southeastern part of that state. He was made provost-marshal-general of the United States, with headquarters at Washington, on 17 March, 1863, and given the staff rank of brigadier-general, 21 April, 1864. Both these commissions expired on the abolition of the office of provost-marshal-general on 30 Aug., 1866; during that time Gen. Fry put in the army 1,120,621 men, arrested 76,562 deserters, collected $26,366,316.78, and made an exact enrolment of the National forces. On 13 March, 1865, he was brevetted major-general, U. S. army, for "faithful, meritorious, and distinguished services." He was adjutant-general, with the rank of colonel, of the divisions of the Pacific in 1866–'9, the South in 1869–'71, the Missouri in 1871–'3, and the Atlantic from 1873 till 1 June, 1881, when he was retired from active service at his own request. He is now (1887) a resident of New York city. Gen Fry's "Final Report of the Operations of the Bureau of the Provost-Marshal-General in 1863–'6" was issued as a congressional document (2 parts, Washington, 1866). He has also published "Sketch of the Adjutant-General's Department, U. S. Army, from 1775 to 1875" (New York, 1875); "History and Legal Effects of Brevets in the Armies of Great Britain and the United States, from their Origin, in 1692, to the Present Time" (1877); "Army Sacrifices," illustrating army life on the frontier (1879); "McDowell and Tyler in the Campaign of Bull Run" (1884); "Operations of the Army under Buell" (1884); and "New York and Conscription" (1885).

FRY, Joseph, naval officer, b. in Louisiana about 1828; d. in Santiago de Cuba, 7 Nov., 1873. He entered the navy as midshipman in 1841, and became passed midshipman, 10 Aug., 1847. In that year he fought a duel with Midshipman Brown, of Mississippi, near Washington, in which, after drawing his antagonist's fire, he refused to return it. He was promoted to master, 14 Sept., 1855, to lieutenant on the following day, and resigned, 1 Feb., 1861, after the secession of his native state. He was unable to secure a commission in the Confederate navy owing to its limited size, and was given a command in the army. After serving in the southwest through the war, he removed to Albany, N. Y. He accepted the command of the filibustering steamer "Virginius" in 1873, and with thirty-six of his crew was shot as a pirate by the authorities in Cuba, after the capture of his vessel by a Spanish man-of-war.

FRY, Joshua, soldier, b. in Somersetshire, England; d. at the mouth of Wills' creek, Md., 31 May, 1754. He was educated at Oxford, and, after coming to this country, was made professor of mathematics in William and Mary college, Virginia. He was afterward a member of the house of burgesses, and served on the commission appointed to determine the Virginia and North Carolina boundary-line. He was a colonel of militia and a member of the governor's council in 1750, and in 1752 was a commissioner to treat with the Indians at Logtown. In company with Peter Jefferson, he had made a map of Virginia, and his acquaintance of the frontier gained in this employment, together with his knowledge of the Indian character, secured his appointment to the command of the expedition against the French in 1754. Col. Fry died while he was conducting his troops to the Ohio, and was succeeded by George Washington, who had been second in command.

FRY, William Henry, musician, b. in Philadelphia, Pa., 10 Aug., 1815; d. in Santa Cruz, West Indies, 21 Dec., 1864. He was educated in the schools of his native place and at Emmettsburg, Md. In 1839 he became editorially connected with his father's newspaper, the Philadelphia "Gazette." Soon afterward, in 1835, he went through a course of musical study and wrote four orchestral overtures, which were publicly performed. While he was partly occupied as a writer for several newspapers, and as correspondent for eastern journals, he produced in 1845 an English opera, entitled "Leonora." This was given in Philadelphia, and later in New York city, and much discussed. The general public commended the composer for his ambition and energy, but

musical people were chary of approbation and withheld their patronage. In 1846 Fry went to Europe for study and observation, being engaged as a regular correspondent of the New York "Tribune" and other newspapers. He remained abroad six years, and on his return to New York city, in 1852, became musical editor of the "Tribune." Soon afterward he wrote the music to an ode for the opening of the New York industrial exhibition of 1853, and delivered a course of ten lectures on the history of music, with illustrations on a gigantic scale, which were pecuniarily unsuccessful. On this occasion Fry brought forward two of his own symphonies, "The Breaking Heart" and "A Day in the Country." In 1854 and 1855 were also written other symphonies, a "Stabat Mater, and "Eleven Violin Quartets." In 1858 the Italian opera company in New York city unsuccessfully produced a reconstructed Italian version of his "Leonora." Another opera, "Notre Dame," brought out in 1864, won no attention. Fry was an occasional political speaker, a lecturer on topics of the day, and altogether an accomplished man. For several years he suffered from lingering consumption and unsuccessfully sought relief in a milder climate. When he was lying bedridden in a house near the New York Academy of Music he asked permission to have a "lover's telephone" placed so that he could hear something of the music. During the last two years of his life he was accustomed to sit propped up in bed while opera was going on at the Academy, his telephone in one hand and the libretto of the opera in the other. At the foot of the bed, standing against the foot-board, were the photographs of the chief singers engaged in the performance. He was one who thoroughly believed in himself, but he had not the divine faculty in music; his compositions neither charmed the many nor satisfied the demands of a just criticism. As a musical reviewer he was a determined, honest partisan, an acute analyst, and trenchant writer. He held the theory that all true melody was evolved only in the minds of Italians, that the voice should always be paramount in operatic representations, and the orchestra serve as an accompaniment to the singers. These convictions, ably presented and partly justified, were caused by the reaction against the poverty of melodic invention and overloaded orchestral devices of Halevy, Meyerbeer, Spohr, and Spontini. Fry published a volume entitled "Artificial Fish Breeding" (New York, 1854). —His brother, **Joseph Reese,** banker, d. in Philadelphia, Pa., in June, 1865, wrote the words of his brother's opera, "Leonora," and translated others. He was largely instrumental in organizing the Union League brigade of Philadelphia during the civil war. Jointly with Robert T. Conrad he wrote a "Life of Zachary Taylor" (Philadelphia, 1848).

FRYE, James, soldier, b. in Andover, Mass., in 1709; d. 8 Jan., 1776. He filled several local offices, served at the capture of Louisburg in 1745, and commanded the Essex regiment at the beginning of the Revolution, taking an active part in the battle of Bunker Hill. He afterward commanded the 6th brigade of the army investing Boston.

FRYE, Joseph, soldier, b. in Andover, Mass., in April, 1711; d. in Fryeburg, Me., in 1794. He was a second cousin of James Frye, noticed above. He was a justice of the peace and a member of the general court of Massachusetts, and was an ensign in Hale's regiment at the capture of Louisburg in 1745. He was a colonel when Montcalm captured Fort William Henry in 1757, and escaped by killing the Indian that had charge of him. He was appointed major-general by the Massachusetts provincial congress on 21 June, 1775, and was commissioned brigadier-general by the Continental congress on 10 Jan., 1776, but resigned on account of infirmity on 23 April. He was an early settler of Fryeburg, Me.—His great grandson, **William Pierce,** senator, b. in Lewiston, Me., 2 Sept., 1830, was graduated at Bowdoin in 1850, studied law with William P. Fessenden, and, after practising for a few years in Rockland, Me., removed to Lewiston, Me., where he has since resided. He was a member of the legislature in 1861–'2 and 1867, a presidential elector on the Lincoln ticket in 1864, mayor of Lewiston in 1866–'7, and attorney-general of Maine in 1867–'9. He was then elected to congress as a Republican six times in succession, serving from 1871 till 1881, when he took his seat as U. S. senator, having been chosen to fill the vacancy caused by the resignation of James G. Blaine. He was re-elected in 1883 for a full term. Mr. Frye has interested himself especially in the distribution of the Geneva award, in commercial legislation, and in the fishery question. He has been a member of the Republican national committee since 1872, and earnestly supported James G. Blaine for the presidency in 1884. He was made a trustee of Bowdoin in 1880, and received the degree of LL. D. from Bates in 1881.

FUENLEAL, Sebastián Ramirez (fwen-lay'-al), Spanish R. C. bishop, b. in Villaescusa, Spain, in the last quarter of the 15th century; d. in Valladolid, 22 Jan., 1547. He studied at the college of Santa Cruz de Valladolid, and in 1525 became bishop of Santo Domingo, and president of the royal audiencia of that island. When the first audiencia of Mexico began to quarrel with Cortes, the empress, during the absence of Charles V. in Germany in 1529, appointed Fuenleal president of the new audiencia, and by his tact and prudence he soon restored order and public confidence. Fuenleal was an admirer of Cortes, and assisted him in all his enterprises and new conquests, at the same time protecting the Indians. He prohibited slavery, established mining laws, founded many churches, convents, and public buildings, and in fact organized New Spain in every branch of administration. He also divided the country into four dioceses and had bishops appointed over them. In 1534 Fuenleal returned to Spain, where he became successively bishop of Tuy, Leon, and Cuenca, and president of the chancery of Valladolid. According to Herrera and Pinelo, Fuenleal wrote a "Relación de la Nueva España."

FUENSALIDA, Luis (foo-en-sal-e'-da), Spanish missionary, b. in Estremadura, Spain, about 1490; d. in Puerto Rico in 1545. He entered the order of St. Francis in early life, and about 1528 went to Mexico to preach the gospel and convert the Indians. He was the first missionary to preach in the Aztec language, and, according to his contemporaries, was the one who spoke it best. In 1535 he became provincial of his order in Mexico, and returned in 1538 to Spain to inform Charles V. about the condition of the Indians. He was offered the bishopric of Michoacan by Charles, but declined it and retired to the convent of San Gabriel du Estremadura. He afterward asked to be sent to Africa, but was refused, and when his brethren tried to make him abandon his peaceful retreat by electing him provincial, he fled from this honor and returned to the New World. In the National library in Mexico are preserved the manuscripts of two curious works of Fuensalida, "Sermones en Lengua Mexicana," and "Coloquios en Mexicano entre el Arcangel San Gabriel y la Vírgen María."

FUENTES, or **FONTE, Bartolomé de,** Spanish or Portuguese navigator, supposed to have lived in the 17th century. His real or imaginary voyages have been the subject of much controversy, and even his existence has been called in question. The story of the voyages of Fuentes, who is said to have been an admiral in the service of Spain, is contained in a letter of seven pages, which was first published in a work entitled "The Monthly Miscellany, or Memoirs of the Various" (London, 1708). It is not known how the letter fell into the hands of the editors of this work. According to the narrative, he sailed from the port of Lima, 3 April, 1640, took a northwesterly course, and, after reaching lat. 53° N., discovered an archipelago, which he called the archipelago of St. Lazarus. He entered a river in one of the islands of the archipelago, flowing from the east, and sailed eastward through other rivers and lakes of vast extent, until he fell in with the ship of Capt. Shapely, who was coming from Boston, and consequently from the east, all of which showed clearly that there was a communication between the two oceans north of America. The letter of Fuentes was republished by Sir Arthur Dobbs in his account of the countries that border on Hudson bay (London, 1744). Sir Arthur Dobbs says that, from information that he had gathered in America, there was a Capt. Shapely living in Boston at the date of the voyage of Admiral Fuentes. Another narrative of the same event was published in a "Voyage to Hudson's Bay" (London, 1749). The letter of Fuentes was translated into French by the distinguished geographer, Joseph Nicholas Delisle, who read two learned dissertations on the subject in presence of the Academy of sciences in 1750. He attaches considerable importance to the letter of Fuentes, and endeavors to reconcile his statements with what he had learned of the discoveries of the Russians. Spanish authors have generally kept silent on the voyage of Fuentes. The author of the "Noticia de California," however (Madrid, 1757), formally denies that such a person existed. Dr. Forster, also, in his work on the discoveries in the north, considers Fuentes a mythical personage. On the other hand, Fleurieu, in his "Introduction au voyage de Marchand," leans to the opinion that he was a real person, and this opinion acquires still more probability since the publication of the voyages of Maldonado, although in the "Quarterly Review" of February, 1817, strong objections are urged against the reality of either voyage. The fact of the existence at least of a navigator of the name of Fonte, or Fuentes, would seem to receive confirmation from the work of the Hollander, Witsen, on Tartary, entitled "Nord en oost Tartarye" (1705), quoted in Burney's "Chronological History of the Discoveries of South Sea." Vancouver, although frequently opposing the statements of Fuentes, declares that he could not deny them positively.

FUENTES, Laureano, Cuban musician, b. in Santiago de Cuba in 1825. From his youth he gave himself to musical studies, and obtained a reputation for skill with the violin. He founded in his native city a conservatory of music, and is the author of many musical compositions, including "La Sombra de Bellini," a fantasia (1857); "Galatea," a symphony (1858); an "Ave María," a "Stabat Mater," and "María" (Paris, 1872). He has composed also the music for the several zarzuelas (a kind of comic opera), including "El dó de Pecho" and "Me lo ha dicho la Portera" (1858); and "Las dos Máscaras" (1866). His last musical work is the opera "La fille de Jefté" (1875).

FUENTES, Manuel Atanasio, Peruvian author, b. in Lima in 1820. He studied law at the University of San Marcos in his native city, and was graduated in 1841, but he soon left the practice of law to become a journalist. He contributed to the "Heraldo" of Lima, and afterward successively established "El Monitor de la Moda," "La Crónica," and "Semanario de los Niños." His most successful paper was "El Murciélago," which he founded in 1855, and called by a name under which he had been writing. This paper, by its trenchant wit and its fearlessness, soon became known throughout Peru. As Fuentes never temporized, the journal was often suppressed and its editor exiled. Of his numerous works on law, statistics, and literature, the most noteworthy are "Estadistica de Lima"; "Elementos de Higiene Privada"; "Higiene de la Infancia"; "Medicina Legal"; "Tratado de Higiene Publica y Aplicada"; "Manual de Autópsias y Exhumaciones"; "Formulario de Jueces de Paz"; "Derecho Constitucional Universal"; "Reglas parlamentarias"; "Guia del Viajero en Lima"; and "Aletazos del Murciélago."

FUERO, Francisco Fabian (foo-ay'-ro), Spanish R. C. bishop, b. in Terzaga, Aragon, 7 Aug., 1719; d. in Torre Hermosa, 3 Aug., 1801. He studied in Calatayud and Alcala, and was at different times rector of the colleges of San Antonio de Siguenza and Santa Cruz, in Valladolid. He was appointed bishop of Puebla, Mexico, in 1764, was present at the fourth Mexican council in 1771, and resigned his bishopric in 1773. On his return to Spain he was promoted archbishop of Valencia, and retired in 1795 to the place of his birth. At Puebla he introduced many improvements; founded in the seminary of that city several chairs of learning, organized an academy of literature, and founded a fine library, which he enriched with select works and a printing-press. He reorganized the discipline of the convents, and established a college to educate Indian youths. Fuero left many interesting manuscripts, and published a volume on scientific subjects (1772).

FUERO, Joaquín, Mexican soldier, b. in Guadalupe Hidalgo, 21 Aug., 1814; d. in the city of Mexico, 21 April, 1861. His father was a lieutenant-colonel in the Spanish army. The son was sent to the city of Mexico for his primary education, but the family had to leave the country toward the close of 1821, as his father refused to serve the cause of Mexican independence. Young Fuero entered the military college of Segovia, and on leaving it entered the army as ensign. He was promoted to captain for gallantry in 1836, and in 1838 accompanied his father to the island of Cuba, where the latter soon died. Fuero then returned to Mexico, where he entered the army, with the rank of captain, in 1839, was appointed professor in the military college in 1840, and soon established a regular course of practical line-drill, military tactics, and topographical design. When Gen. Urréa pronounced against the government, on 15 July, 1840, Fuero attacked him in the citadel at the head of a column of his scholars, and drove him back. He was then given command of several companies of regular troops, with which he aided in suppressing the insurrection, after a fortnight of street-fighting. In 1841 Fuero was promoted major and resigned the vice-presidency of the military college. In 1843 he was appointed chief of staff of the army of operations in Tamaulipas, and as such designed all the plans of the campaign. During the war with the United States Fuero took part in all the battles, till the defeat at Padierna, after which he protected the retreat

of the army at the head of a small force, and received a wound that ultimately caused his death. After the peace of Guadalupe Hidalgo he was retired as an invalid on full pay, with the rank of colonel, and opened a private college, but during the latter years of his life he had to abandon this pursuit, as his wound caused a gradual softening of the brain. Fuero published "Manual del Militar, ó Tratado completo de Instrucción en la Ordenanza" (2 vols., 1842), and a translation of Gen. Makenna's "Treatise on Military Tactics" (1844).

FULFORD, Francis, Canadian Anglican bishop, b. in Sidmouth, England, in 1803; d. in Montreal, 9 Sept., 1868. He was educated at Teverton grammar-school and at Exeter college, Oxford, where he was graduated in 1824. He was elected a fellow in June, 1825, and received the degree of D. D. in 1850. He was rector of Trowbridge, Wilts, from 1832 till 1842, of Croydon from 1842 till 1845, and was minister of Curzon chapel, Hanover square, London, from 1845 till his consecration as Anglican bishop of Montreal in 1850. In 1859 he was appointed by royal letters-patent metropolitan bishop of Canada. Bishop Fulford was at one time chaplain to the Duchess of Gloucester. In administrative power he had few equals. He was noted for his learning, took an active part in the promotion of education throughout his diocese, and was popular with all classes in Canada. He published a work on "The Progress of the Reformation."

FULLER, George, artist, b. in Deerfield, Mass., in 1822; d. in Brookline, Mass., 21 March, 1884. He went to Illinois in 1836, and, having developed a taste for painting, studied in 1842 under Henry Kirke Brown, at Albany, N. Y. After working in Boston for a few years, he went to New York, where in 1857 his portrait of his former teacher, Mr. Brown, the first of his works to attract notice, gained him an election as associate of the National academy. He spent eight months in European study and travel in 1859, and then retired to his farm at Deerfield, using his art only for recreation, till financial reverses in 1873 forced him to take it up again as a profession. About 1876 his pictures began to be noticed for peculiar handling, richness of tone, and a dreaminess of conception which, when admired at all, was admired very thoroughly. He was a member of the Boston art club, the St. Botolph, and the Paint and clay club. A memorial exhibition of his works was held at the Boston museum of the fine arts in 1884. His contributions to the National academy exhibitions include "The Turkey-Pasture, Kentucky" (1878), "The Dandelion Girl," "The Romany Girl" (1879), and "The Quadroon" (1880). He sent to the exhibitions of the Society of American artists "Priscilla Fauntleroy" (1882) and "Nydia" (1883). Other pictures from his hand are "Cupid" (1854); "Negro Nurse, with a Child" (1861); "At the Bars" (1865); "Shearing the Donkey" (1877–'9); "And She was a Witch" (1879); "The Gatherer of Simples" (1880); "Winifred Dysart" (1881); "Psyche" (1882); "November" (1882–'4); "Fedalma" (1883–'4); "Arethusa" (1884); and numerous portraits. He left an unfinished picture representing a trial for witchcraft in the early days of New England.

FULLER, Hiram, journalist, b. in Halifax, Plymouth co., Mass., about 1815; d. in 1880. After teaching in Plympton, he was principal of the Green street seminary in Providence, R. I., where he had Margaret Fuller for his assistant. He afterward became a bookseller in Providence, and in 1843 associated himself with N. P. Willis and George P. Morris in the publication of the "New Mirror." The three afterward established the "Daily Mirror," of which Fuller became sole proprietor, and edited it for fourteen years. He wrote for it a series of clever society letters from Newport, under the pen-name of "Belle Brittan." Under Taylor's administration Fuller had a place in the navy department. He went abroad at the beginning of the civil war, espoused the Confederate cause, and established the "Cosmopolitan" newspaper in London. After being twice a bankrupt, he became a journalist and adventurer in Paris. He published "The Groton Letters" (1845); "Belle Brittan on a Tour" (New York, 1858); "Sparks from a Locomotive, by Belle Brittan" (1859); and "Grand Transformation Scenes in the United States, or Glimpses of Home after Thirteen Years Abroad" (1875).

FULLER, John Wallace, soldier, b. in Cambridge, England, 28 July, 1827. He came to New York in 1833 with his father, a Baptist clergyman, and became a bookseller, first in Utica, N. Y., and then in Toledo, Ohio. He was treasurer of the former city in 1852–'4, and in May, 1861, was appointed assistant adjutant-general of Ohio. He became colonel of the 27th Ohio regiment in August of that year, served under Pope at New Madrid and Island Number Ten, and commanded the "Ohio brigade" at Iuka and at Corinth in October, 1862, where he distinguished himself. He was promoted to brigadier-general of volunteers on 5 Jan., 1864, captured Decatur, Ala., in March, and commanded a brigade in the Atlanta campaign, doing brilliant service at the Chattahoochee river on 21 July. His division opened the battle of Atlanta, and won the approbation of Gen. McPherson. He fought Hood at Snake Creek Gap in October, commanded the 1st division of the 17th corps in Sherman's march to the sea, and was present at Johnston's surrender. He was brevetted major-general of volunteers on 13 March, 1865, and resigned on 15 Aug. Gen. Fuller was appointed collector of the port of Toledo, Ohio, by President Grant in 1874, and reappointed in 1878.

FULLER, Richard, clergyman, b. in Beaufort, S. C., 22 April, 1804; d. in Baltimore, Md., 20 Oct., 1876. He entered Harvard in 1820, and achieved a high standing in his class, but was obliged, on account of feeble health, to leave during his junior year. He then studied law in Beaufort, was admitted to the bar, and soon rose to eminence in his profession. During a period of great religious interest in Beaufort he felt it his duty to abandon the law and devote himself to the Christian ministry. At the same time he was constrained to leave the Protestant Episcopal church, in which he had been brought up. He was at once ordained, and called to the pastorate of the Baptist church in Beaufort. His reputation as a preacher soon became national, and his services were widely sought in promoting religious revivals. During his residence in Beaufort he was engaged in two memorable controversies—one with Bishop England, of Charleston, on the claims of the Roman Catholic church, and the other with President Wayland, of Brown university, Providence, R. I., on the subject of slavery. In both he displayed abilities of the highest order, united with a spirit of Christian courtesy and manliness. In the year 1836 he travelled in Europe for the benefit of his health. In 1846 he accepted a call to the pastorate of a Baptist church in Baltimore, Md., where he spent the remainder of his life. He received the degree of D. D. from Columbian university, Washington, in 1844, and from Harvard in 1853. Dr. Fuller was one of the most effective pulpit orators of his day. His sermons, both in style and delivery, were

framed upon the models of the great French preachers, and of their kind have seldom been equalled. He was more than once president of the southern Baptist convention. In addition to pamphlets containing his debates with Bishop England (Baltimore, 1840), and Dr. Wayland (1845), and various sermons published separately, he was the author of volumes of "Sermons" (New York), and "Letters," an "Argument on Baptist and Close Communion" (Richmond, 1849), and a "Psalmist," which has been much used in his denomination. A memoir of Dr. Fuller was written by his nephew, Dr. James H. Cuthbert (New York, 1879).

FULLER, Richard Henry, artist, b. in Bradford, N. H., 19 Oct., 1822; d. in Chelsea, Mass., 24 Dec., 1871. He was left an orphan when seven years of age, and in 1840 went to Boston, and afterward to Chelsea, working at the trade of a cigar-maker, but soon began to teach himself to draw and paint. His health failing from overwork in 1854, he spent two years in Minnesota, and on his return obtained a place on the Chelsea police force, where he was on duty at night, and painted during the day. He had excellent natural gifts, and such a retentive memory that he is said to have made a clever copy of a Lambinet, which he had seen only for a few moments. He painted landscapes exclusively. His works are represented in some of the finest collections in Boston.

FULLER, Timothy, congressman, b. in Chilmark, Martha's Vineyard, Mass., 11 July, 1778; d. in Groton, Mass., 1 Oct., 1835. His father, Timothy, the first settled minister of Princeton, Mass., was third in descent from Thomas, who emigrated from England in 1638. The younger Timothy was graduated at Harvard in 1801 with the second honors. After teaching in Leicester academy, he studied law with Levi Lincoln, and practised successfully in Boston. He was a state senator in 1813–'6, and was then elected to congress as an antifederalist, serving from 2 Jan., 1818, till 3 March, 1825. He was speaker of the state house of representatives in 1825, a member of the executive council in 1828, and in 1831 was a member of the legislature from Groton, whither he had removed about 1826. While in congress, he was chairman of the committee on naval affairs, and was distinguished as an orator, making effective speeches in behalf of the Seminole Indians, and against the Missouri compromise. He was an ardent supporter of John Quincy Adams, and published a pamphlet entitled "The Election for the Presidency Considered," which was widely circulated. Mr. Fuller was a hard-working lawyer, and an active and public-spirited man. He died suddenly of cholera, intestate and insolvent. Besides the works mentioned above, he published an oration delivered at Watertown, 4 July, 1809, and an address before the Massachusetts peace society (1826).—His daughter, **Sarah Margaret,** Marchioness Ossoli, author, b. in Cambridgeport, Mass., 23 May, 1810; d. off Fire Island beach, 16 July, 1850, was the eldest of eight children. She derived her first teaching from her father, studied Latin at the age of six, and injured her health by over-application. At thirteen she was a pupil at the famous school of Dr. Park, in Boston, where she began the study of Greek. Thence she went to a school in Groton, kept by the Misses Prescott. On the sudden death of her father, Margaret vowed that she would do her whole duty toward her brothers and sisters, and she faithfully kept the vow, teaching school in Boston and Providence, and afterward taking private pupils, for whom she was paid at the rate of two dollars an hour. During the transcendental period she knew intimately the leading minds of the time—Emerson, Hawthorne, Ripley, Channing, Clarke, Hedge—and in the company of such was very brilliant, meeting them as equals. She first met Emerson in 1835, and the next year visited him at Concord. She went occasionally to Brook Farm, though never fully believing in the success of that experiment, and never living there. She held conversations in Boston, conducted the "Dial," translated from the German, projected works, and wrote the "Summer on the Lakes," the record of a season spent in travelling from June to September, 1843. In December, 1844, she went to New York as literary critic of the "Tribune," then under the management of Horace Greeley, in whose household she at first lived. While in New York, she visited the prisons, penitentiaries, asylums, theatres, opera-houses, music-halls, picture-galleries, and lecture-rooms, writing about everything in the "Tribune," and doing much to move the level of thought on philanthropic, literary, and artistic matters. Her intimacies here were mainly with practical, honest, striving people. Even William H. Channing was a minister at large, C. P. Cranch received boarders, and Lydia Maria Child was connected with the press. This she called her "business life," and she pursued it unremittingly for about twenty months, after which, having saved a little money, she went to Europe on the invitation of Mr. and Mrs. Francis Spring. This was in 1846. In Europe she saw the foremost people in the literary, social, political, and reformatory world, spent the late summer and autumn in travelling, established herself for a time at Rome in the spring of 1847, passed that summer in Switzerland and the more northern Italian cities, and returned to Rome in October. She was married in December to Giovanni Angelo, Marquis Ossoli, was a mother in 1848, and entered with zeal into the Italian struggle for independence in 1849. Her conduct during the siege of the city by the French was of the most heroic, disinterested, humane, and tender kind. Her service in the hospitals won the heartiest praise. She was a friend of Mazzini. Though racked with anxiety for her husband and child, she appeared entirely oblivious of herself. On the capture of Rome by the French in June, 1849, and the consequent dispersal of the leaders in the defence, she and her husband took refuge in Rieti, a village in the mountains of Abruzzi, where the child had been left in charge of a confidential nurse, and after some months removed to Florence, which, after a delightful sojourn, they left for Leghorn, whence passage for America was taken on the "Elizabeth," a merchant vessel that sailed 17 May, 1850. Horace Sumner, a younger brother of Charles Sumner, and Celeste Paolini, a young Italian girl, were the only other passengers. The voyage began disastrously. The captain died of small-pox, and was buried at sea in the waters off Gibraltar. Head winds kept them there a week. The boy was dangerously seized with small-pox soon afterward. As the voyage neared its ending, a violent southeast wind became in the evening a gale, by midnight a

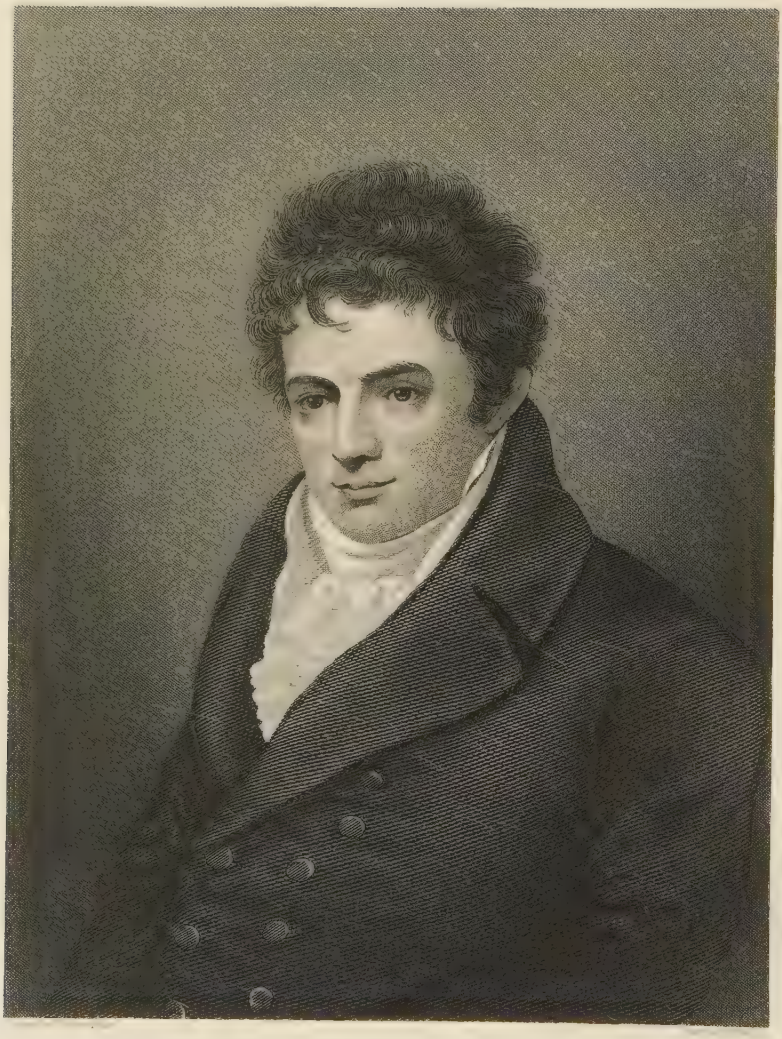
S. M. Fuller.

hurricane, and the vessel was driven on the shore at Fire Island in the early morning at four o'clock. The wreck was complete. A great wave swept the deck, and carried all before it. The boy was drowned in the arms of the steward while the latter was trying to reach the land, and the lifeless body was carried on the beach. Neither mother nor father was heard of more. Of Ossoli little is known. It is not strange that to most people he should be a name only, for he was married but a short time, he was not seen out of his native country, and there was known but slightly save to a small number of friends, while his inability to speak any language except his own naturally prevented his mingling with Americans. But he was a gentleman, sincere, true, and self-respecting. All we know of him is to his credit. He was sufficiently educated for his rank in society. That he was a devoted husband is certain, ready to share his wife's fortune whatever it might be, and in all respects thoughtful of her happiness, believing in her entirely. His future in this country would have been melancholy. He must have been dependent on the efforts of his wife, and those efforts, even though incessant and reasonably successful, might not have availed to support a family. It will be seen that her career naturally fell into three divisions. The first period lasted till her life in New York in 1844. The second included her experience there. The third embraced her activity in Rome. The first, which may be called the transcendental epoch, could not be repeated. It was extremely interesting, exciting, stimulating to the mind. She was under stimulating influences. Self-culture was then the key-note of her endeavor. The third could not be reproduced. That extraordinary episode, with its raptures of self-devotion, was as exceptional, in its way, as the first. The second epoch—that of literary production—was still open to her, enlarged and simplified. She was essentially a critic. She was not a reformer, and could not have been, had her means been ever so ample. She lived by her pen, and her livelihood must have been precarious—so much so that some of her admirers looked on the final catastrophe as a deliverance for her. What she might have become if she had lived, it is useless to conjecture. She possessed brilliant gifts of many kinds. She had a warm heart, but her natural talent was for literature. She wrote a great deal for magazines, various papers, a complete account of which may be found in Higginson's "Life." Her collected works, including "Summer on the Lakes" (1843), "Woman in the Nineteenth Century" (1844), and "Papers on Literature and Art" (1846), were edited by her brother, Rev. Arthur B. Fuller (Boston, 1855). Her book on the Roman republic was lost with her. The life of Margaret Fuller has been written by Emerson, Clarke, and Channing, edited for the most part by William Henry Channing (1852). This is strongest on the transcendental side. There is also a memoir of her by Julia Ward Howe, in the "Eminent Women" series (Boston, 1883), and one by Thomas Wentworth Higginson in the "American Men of Letters" series (Boston, 1884). The last is the most complete, though somewhat warped by the author's idea that Margaret Fuller's career culminated in philanthropy. —Her brother, **Richard Frederick,** author, b. in Cambridge, Mass., 15 May, 1821; d. in Wayland, Mass., 30 May, 1869, was graduated at Harvard in 1844, and became a lawyer in Boston. Besides the life of his brother, mentioned below, he published "Visions in Verse" (Boston, 1864). — Another brother, **Arthur Buckminster,** clergyman, b. in Cambridgeport, Mass., 10 Aug., 1822; d. in Fredericksburg, Va., 11 Dec., 1862, was fitted for college by his sister Margaret, and graduated at Harvard in 1843. He then studied theology at Cambridge divinity-school, and was for some years a teacher and missionary in Illinois. He was pastor of a Unitarian church in Manchester, N. H., in 1848–'53, of the new North church in Boston in 1853–'9, and of a church in Watertown, Mass., till 1 Aug., 1861, when he became chaplain of the 16th Massachusetts regiment. He was honorably discharged on 10 Dec., 1863, on account of failing health: but, being present at the battle of Fredericksburg on the following day, he volunteered to join a detachment in crossing the Rappahannock, and fell while attempting to drive the Confederate sharpshooters out of the city. His courage, enthusiasm, and sympathy for the men of his regiment had greatly endeared him to them. He edited several of his sister's works (1855), and published "Sabbath-School Manual of Christian Doctrine and Institutions" (Boston, 1850); "Historical Discourse delivered in the New North Church, Boston, 1 Oct., 1854," and "Liberty versus Romanism," two discourses (1859). His life was published by his brother, Richard F. Fuller (Boston, 1863). See also a sketch by T. W. Higginson in "Harvard Memorial Biographies," vol. i.

FULLER, Thomas Brock, Canadian Anglican bishop, b. in Kingston, Canada, 16 July, 1810. He was educated at Hamilton, Canada, and at Chambly theological seminary, and in 1835 was ordained in the Anglican church at Toronto. After holding pastorates in Chatham, Thorold, and Toronto, where he was rector of St. George's church for fourteen years, he was appointed archdeacon of Toronto in 1867, and in 1875 became bishop of the newly created diocese of Niagara.

FULTON, John, clergyman, b. in Glasgow, Scotland, 2 April, 1834. He studied in the Channel Islands and at Aberdeen, removed in 1853 to the United States, and took priest's orders in the Protestant Episcopal church at New Orleans in 1858. He has devoted much time to researches regarding the canon law, and is considered one of the ablest canonists in his denomination. He has received the degree of D. D. and LL. D., and at present (1887) resides in St. Louis. His principal works are "Letters on Christian Unity" (1868); "Index Canonum," including those of the general and provincial councils in Greek and English (New York, 1872); "Laws of Marriage" (1883); and "Documentary History of the Protestant Episcopal Church in the Confederate States."

FULTON, Justin Dewey, clergyman, b. in Earlville, N. Y., 1 March, 1828. He was graduated at the University of Rochester in 1851, spent one year at the Rochester theological seminary, and in 1853 became pastor of a Baptist church in St. Louis, Mo. In 1855 he removed to Sandusky, Ohio, and in 1859 to Albany, N. Y., where the Tabernacle Baptist church was established under his ministry. In 1863 he was called to the Tremont Temple in Boston, where he labored for nine years. In 1873 he became a pastor in Brooklyn, N. Y., but resigned in 1887, and announced his intention of endeavoring to convert Roman Catholics to Protestantism. The degree of D. D. was conferred upon him by the University of Rochester in 1871. Dr. Fulton is a voluminous author. Among his works are "The Roman Catholic Element in American History" (1859); "Life of Timothy Gilbert" (1864); "Woman as God Made Her" (1867); "The Way Out" (1870); "Show Your Colors" (1881); and "Rome in America" (1884).



R. Fulton

FULTON, Robert, inventor, b. in Little Britain township (now Fulton), Lancaster co., Pa., in 1765; d. in New York, 24 Feb., 1815. His father came from Kilkenny, Ireland, early in the 18th century, and settled at Little Britain. At the age of thirteen Robert constructed paddle-wheels, which he applied with success to a fishing-boat. The years 1782–'5 were spent in painting miniature portraits and landscapes, mechanical and architectural drawing, and whatever came in his way in the line of artistic work, at Philadelphia, where he numbered Benjamin Franklin among his friends. In 1786 Fulton went to London, and was received into the family of Benjamin West, under whose instruction he studied for several years. Afterward he practised his art in Devonshire, under the patronage of wealthy persons, among whom were the Duke of Bridgewater and Earl Stanhope. With his acquaintanceship with these persons begins his experiments in mechanics. Francis Egerton Bridgewater (last duke of that name) had become famous by the construction of a navigable canal from Worsley to Manchester, and Charles, Earl Stanhope (third of that title), was the inventor of the Stanhope printing-press, and a student of mechanics and engineering. In 1793 Fulton actively engaged in a project for the improvement of canal navigation, and in the following year obtained from the British government a patent for a double-inclined plane for raising or lowering boats from one level to another on a system of small canals. An account of this patent is in the "Repertory of Arts," vol. xvii. In 1794 he patented a mill for sawing marble. Some time in 1796 he made plans for the construction of cast-iron aqueducts, and a great work of this kind was built for crossing the river Dee. A bridge built upon his plans was erected at Wandsworth, and others at several points on the Surrey railway. He also patented in England a machine for spinning flax, a dredging-machine, a market or passage-boat, a despatch-boat, and a trader or amphibious boat to be used on canals. In 1796 he published his "Treatise on the Improvement of Canal Navigation," having previously published some articles on the subject in the London "Morning Star," advocating small canals. Copies were sent by the author to the president of the United States and other officials, each accompanied by a letter emphasizing the advantages to be derived by the United States from canal navigation. In 1798 he addressed letters, or rather essays, to Lord Stanhope, which were apparently intended for publication—one aiming to arouse English interest in internal improvements, and the other to promote the interests of education in France. Among his manuscripts was found a work, probably written about the same time with the above, advocating free-trade. In 1794 he became a member of the family of Joel Barlow, author of the "Columbiad," in Paris. Here he painted a panorama, the first ever shown in the French capital. In December, 1797, Fulton made an experiment on the Seine with a boat for submarine navigation, to be used in torpedo warfare. In 1801 he conducted some experiments at Brest with his submarine or plunging boat, under the auspices of the French government, which, however, on Fulton's failure to blow up the British ships that sailed along the coast, became disaffected with the undertaking. The government of England, at the instigation of Lord Stanhope, determined to secure Fulton's services for that country, and accordingly he went to London in May, 1804, after a short sojourn in Holland. The submarine boat was finally reported by the British commission to be impracticable; but the torpedo they thought of some value, and Fulton was taken out with an expedition to try it against the French fleet at Boulogne, where the torpedoes burst harmlessly beside the French ships. An experiment in October, 1805, with an improved apparatus, on a brig of 200 tons, provided for the purpose by the government, resulted in the destruction of the ship. In 1806 Fulton had returned to the United States, and renewed his experiments with torpedoes. His system was never adopted, though in 1810 congress appropriated $5,000 for testing the torpedoes and submarine explosions. About this period Fulton invented a machine to cut the cables of ships at anchor. In 1813 he took out a patent for "Several Improvements in Maritime Warfare, and Means for injuring and destroying Ships and Vessels of War by igniting Gunpowder under Water." A letter from him to Jefferson, describing his submarine gunnery, was printed from his manuscript in "Scribner's Monthly," vol. xxii, with the reproduction of his rough sketches. Fulton began to turn his attention to the subject of steam navigation as early as 1793, as is shown in a letter to Lord Stanhope, dated 30 Sept. of that year. In 1803, having the financial assistance of Chancellor Livingston, Fulton launched a steamboat on the Seine, which, owing to faulty construction of the frame, imme-

diately sank. Another boat was soon built, with the old machinery, and a trial-trip was made, but no great speed was attained. Encouraged with this partial success, Fulton shortly afterward ordered an engine of Watt & Boulton, to be sent to the United States. Early in the spring of 1807 the boat that was to navigate the Hudson and establish the system of steam navigation was completed at a ship-yard on the East river. (See accompanying illustration.) The engine was put in later, and on 11 Aug., 1807, the "Clermont" steamed up the Hudson to Albany, the voyage occupying thirty-two hours. During the autumn of 1807 the "Clermont" was run as a packet between New York and Albany. The success of Fulton's enterprise excited much jealousy and rivalry, and a number of persons disputed his claim to originality. Litigation and competition threatened to rob him of all profit from his invention. Fulton's first patent for improvements in navigation by steam was taken out on 11 Feb., 1809, and another, with fuller provisions, on 9 Feb., 1811. The first attempt to connect a steam-engine with the screw-propeller was made by Joseph Bramah, of Piccadilly, who on 9 May, 1795, patented the application of a paddle-wheel to the stem of a vessel, driven by a steam-engine. A brief list of those who used steam on boats of any description includes Rumsey, on the Potomac, in 1785; John Fitch, first in September, 1785, again in August, 1787; Patrick Millar, in 1787; Nathan Read.

at Danvers, in 1789. John Fitch, in 1788, built another boat, propelled by steam from Philadelphia to Burlington, twenty miles, being the longest trip ever made by a boat under steam at that time. In October, 1788, Millar, Taylor, and Symington put a steamboat on Lake Dalwinston, Scotland. In 1789 a steamboat built under Fitch's directions attained a speed of eight miles an hour on the river at Philadelphia. In 1790, William Longstreet had a small boat on Savannah river; the same year Lord Stanhope patented an ambi-navigator with a propeller in the form of a duck's foot. John C. Stevens, of Hoboken, N. J., constructed boats sailing with a speed of five or six miles an hour. In 1794, Samuel Morey took a boat by steam from Hartford to New York city. Robert L. Stevens sailed a paddle-wheel steamer on the Hudson only a few days later than Fulton's "Clermont." This boat was afterward taken by sea to Philadelphia, thus making the first steamship voyage on the ocean. Fitch and Stevens are Fulton's most formidable competitors for the honor of demonstrating the feasibility of steam navigation, although many other claimants have had partisans. So late as 1871, John H. B. Latrobe, in an address before the Maryland historical society, entitled "A Lost Chapter in the History of the Steamboat," urged the claims of Nicholas J. Roosevelt as the inventor of vertical wheels over the sides of the boat, which produced, in Fulton's hands, when propelled by steam, the first practical result. Fitch's boat was propelled by vertical paddles, and Rumsey's by the expulsion, at the stern, of water that had been drawn in at the bow; Fulton, in his Paris experiments, as set forth by Colden, his biographer, preferred endless chains with resisting boards or floats. Whatever may have been Fulton's honors as to the invention, he undoubtedly deserves the credit of first bringing into practical use the steamboat as a conveyance for passengers and freight, all earlier undertakings having been inefficient practically. The success of the "Clermont" was followed by the rapid multiplication of steamboats. A list of those built under Fulton's superintendence comprises the "Car of Neptune," the "Paragon," the "Fire-fly," the "Richmond," the "Washington," the "Vesuvius," the "Olive Branch," the "Emperor of Russia," and the "Chancellor Livingston," as well as several ferry-boats. He described his first ferry-boat in an article published in the "American Medical and Philosophical Register" for October, 1812. In 1814, Fulton submitted to the coast and harbor defence committee plans for a steam war-ship to carry 44 guns, and in October of that year a boat of this description, called the "Demologos" (subsequently named "Fulton the First"), was successfully launched. The war of 1812 terminated before the effectiveness of the "Fulton" as a war-vessel could be tested, and she afterward became a receiving-ship. The last subject to which Fulton's energies were devoted was a modification of his submarine boat the "Nautilus," but only the hull of the projected craft was completed before his death. Exposure in crossing the Hudson, after testifying in New Jersey in a steamboat case, laid the foundation of Fulton's last illness. He left a widow (daughter of Walter Livingston) and one son and three daughters. The literature of the steamboat controversy is extensive. The fullest list on the subject is afforded by Preble's "History of Steam Navigation." Fulton's published works are "A Treatise on the Improvement of Canal Navigation" (London, 1796; French translation, Paris, 1799); the New York historical society has a unique copy containing the original drawings from which the engravings were made; "Letters on Submarine Navigation" (London, 1806; French translation, Paris, 1811); "Torpedo War" (New York, 1810); "Letter to the Secretary of the Navy on the Practical use of the Torpedo" (Washington, 1811); "Report on the Practicability of Navigating with Steamboats on the Southern Waters of the United States" (New York, 1813); "Memorial of Robert Fulton and Edward P. Livingston in regard to Steamboats" (Albany, 1814); "Advantages of the Proposed Canal from Lake Erie to the Hudson River" (New York, 1814). Copies of Fulton's original drawings, including the illustrations to the "Columbiad," which he designed or superintended, are contained in Reigart's "Life of Fulton" (Philadelphia, 1856). Fulton's paintings seem to have gone out of existence. Smith, in his catalogue of portraits, catalogues a fancy picture of Lady Jane Grey, painted by Fulton about 1793. Fulton's life has been written by Cadwallader D. Colden (New York, 1817), and by James Renwick in Sparks's "American Biography."

FULTON, William S., senator, b. in Cecil county, Md., 2 June, 1795; d. in Rosewood, near Little Rock, Ark., 15 Aug., 1844. He was graduated at Baltimore college in 1813, and began to study law with William Pinckney. Before coming of age he served with credit as a volunteer for the defence of Fort McHenry in the war of 1812. At the conclusion of peace he removed, with his father's family, to Tennessee, where he resumed the study of law with Felix Grundy. In 1818 he volunteered with the Nashville guards, and subsequently acted as military secretary to Gen. Jackson during the Florida campaign. At its close he settled in Alabama for the practice of the law, having been admitted to the bar. He was appointed, in 1829, by Gen. Jackson, secretary of the territory of Arkansas, and in 1835 its governor, which office he held until the territory became a state. He was then chosen as one of its first U. S. senators, serving from 5 Dec., 1836, until his death.

FUNES, Gregorio, South American author, b. in Cordova de Tucuman, Buenos Ayres, about the middle of the 18th century; d. about 1820. He studied under the Jesuits in the university of his native city, and, after the expulsion of that order, under the Franciscans. He was afterward ordained priest, received the title of doctor of theology, and became dean of the church of Cordova. When the colonies of Spain revolted he took an active part in the cause of independence. He was named deputy to the congress which assembled in the city of Tucuman in 1816 to elect a president of the united provinces of the Rio de la Plata, but declined on account of his infirmities. The work which has gained him a high reputation in Spanish America is entitled "Ensayo de la historia civil del Paraguay, Buenos Ayres y Tucuman" (3 vols., Buenos Ayres, 1816–'17). His work, which comprises the period of the revolution in Peru by Tupac-Amaru, ends with a "Sketch of the Revolution, from 25 May, 1810, to the Opening of the National Congress on the 25th of March, 1816."

FURMAN, Charles M., financier, b. in Charleston, S. C., in 1797; d. there, 3 July, 1872. He was admitted to the bar of South Carolina in 1819, and practised until 1832, when he was elected by the legislature treasurer of the lower division of the state. In this office he gave evidence of that financial ability for which in after years he became distinguished, and was subsequently chosen to be the comptroller-general of the state. Later he was elected one of the masters in equity for the Charles-

ton district. He was for several years cashier of the state bank, and in 1850 was chosen its president, which office he retained until the close of the civil war. Mr. Furman had previously been called to fill other places of honor and trust. In 1824 he was elected a member of the lower branch of the legislature, and afterward represented his native city in all the municipal boards. He was for many years a director of the South Carolina railroad, and visited England on an important mission in behalf of that corporation. He sat in the secession convention of 1860, and was a member of the National democratic convention that nominated Mr. Seymour for president in 1868.

FURMAN, Gabriel, lawyer, b. in Brooklyn, N. Y., 23 Jan., 1800; d. there, 11 Nov., 1834. He studied law and early showed a taste for literature, especially in antiquarian lines. In 1827 he was appointed a justice of the Brooklyn municipal court, which office he held for three years. He served as state senator in 1839–'42, and in the latter year became the Whig nominee for lieutenant-governor, but was not elected. In either politics or law he might have attained eminence, but the fascination of books and study, and the opium-habit, quenched all ambition, withdrew him gradually from the activities of political and professional life, and finally brought him to a clouded end in the Brooklyn city hospital. He was a man of pure character and genial nature, an acceptable lecturer, and possessed a cultivated taste and a wide range of information. Later historians of Long Island and of Brooklyn have profited largely by his minute and extensive antiquarian researches, contained in numerous manuscript volumes. His only published work was "Notes, Geographical and Historical, relative to the Town of Brooklyn" (1824).

FURMAN, Richard, clergyman, b. in Æsopus, N. Y., in 1755; d. in Charleston, S. C., in August, 1825. While he was an infant his father removed to Sumter district, S. C. His education, though obtained in an irregular way, became considerable, including a knowledge of the Latin, Greek, and Hebrew languages. He was converted at an early age, and soon began to preach, and when nineteen years old was ordained pastor of the High Hills Baptist church. On one occasion he was not allowed by the sheriff to preach in the court-house at Camden because he was not a member of the established (Episcopal) church. At the beginning of the Revolution he actively promoted measures for removing the disabilities under which dissenters labored. During that struggle he became so conspicuous as a patriot that Lord Cornwallis offered a reward for his apprehension, and for a while he retired to Virginia, where Patrick Henry was a regular attendant on his ministry. In 1787 he became pastor of the 1st Baptist church in Charleston, S. C., in which relation he continued for thirty-seven years. He was a member of the convention that framed the first constitution of South Carolina, and vigorously opposed in that body the provision which excluded ministers from certain offices. He was unanimously elected in 1814 the first president of the triennial convention, a representative organization of all the Baptists of the country. For several years he was president of the South Carolina Baptist convention. In various ways he promoted the establishment of schools and colleges for ministerial and general education among the Baptists. Furman university, of South Carolina, was named in his honor. In 1800 he received the degree of D. D. from Brown university. He published several sermons and discourses, including one commemorative of George Washington, delivered by appointment of the Society of Cincinnati.—His son, **James Clement,** educator, b. in Charleston, S. C., 5 Dec., 1809, was educated at Charleston college, but was not graduated, owing to a severe illness in his senior year. He entered the Baptist ministry in 1828, serving as pastor of churches in Camden and Fairfield till 1834, and in Society Hill, with an interval of fifteen months at Charleston, till 1843. In that year he accepted a professorship in the Furman theological institution, and has ever since been connected with its faculty, teaching mental and moral philosophy, rhetoric, and logic. When the institution was expanded into Furman university at Greenville, S. C., he was made its president, and still (1887) remains in that office. He has published various sermons and addresses, and has for several years been one of the editors of the "Baptist Courier," of Greenville.

FURNESS, William Henry (fur'-ness), clergyman, b. in Boston, Mass., 20 April, 1802. He was graduated at Harvard in 1820, and completed his theological studies at Cambridge in 1823. In January, 1825, he was ordained pastor of the 1st Congregational Unitarian church in Philadelphia, where he remained until he retired from the ministry, in 1875. He received the degree of D. D. from Harvard in 1847, and that of Doctor of Letters from Columbia at its centennial anniversary in 1887. The theological position of Dr. Furness is peculiar, belonging as he does to the extreme humanitarian school, as distinguished from that of Canning, Peabody, and Norton. He accepts, for the most part, the miraculous facts of the New Testament, yet accounts for them by the moral and spiritual forces resulting from the pre-eminent character of the Saviour, who, in his view, is an exalted form of humanity. One of his constant labors as a preacher and an author has been to ascertain the historical truth and develop the spiritual ideas of the records of the life of Christ. His books reveal a highly cultivated intellect, impelled by enthusiastic ardor, and enriched by a glowing fancy. "Æsthetic considerations," remarks a writer of his own denomination, "weigh more with him than historical proofs, and vividness of conception than demonstration." In the anti-slavery movement Dr. Furness took an intense interest, preaching frequently on the subject. From 1845 till 1847 he edited an annual entitled "The Diadem." Besides many occasional sermons he is the author of "Remarks on the Four Gospels" (Philadelphia, 1835; London, 1837); "Jesus and His Biographers" (Philadelphia, 1838); "Domestic Worship," a volume of prayers (1842; 2d ed., Boston, 1850); "A History of Jesus" (Philadelphia and London, 1850; new ed., Boston, 1853); "Discourses" (Philadelphia, 1855); "Thoughts on the Life and Character of Jesus of Nazareth" (Boston, 1859); "The Veil partly Lifted and Jesus becoming Visible" (Boston, 1864); "The Unconscious Truth of the Four Gospels" (Philadelphia, 1868); "Jesus" (1871); "The Power of Spirit Manifest in Jesus of Nazareth" (1877); "The Story of the Resurrection Told Once More" (1885); and "Verses: Translations and Hymns" (Boston, 1886). He has also translated from the German Schubert's "Mirror of Nature" (1849); "Gems of German Verse" (1851); "Julius and Other Tales" (1856; enlarged ed., 1859); and translated and edited Dr. Daniel Schenkel's "Characterbild Jesu," an elaborate essay written as a reply to Renan's work, under the title of "Character of Jesus Portrayed" (2 vols., Boston, 1866). His version of Schiller's "Song of the Bell" is considered the best that has been made. Mrs. Annis Lee Wister,

the translator, is his daughter.—His son, **William Henry**, artist, b. in Philadelphia, Pa., 21 May, 1828; d. in Cambridge, Mass., 4 March, 1867, left school at the age of sixteen, and entered a counting-house, but a year later devoted himself to art. After spending two years studying in Düsseldorf, Munich, Dresden, Venice, and Paris, he settled at first in Philadelphia, but afterward removed his studio to Boston, residing in Cambridge. His improvement as an artist was rapid, and at the time of his death he held high rank as a painter of portraits, his best work being marked by firmness of drawing, truth of color, fidelity to characteristic traits, and a fine feeling for expression. He was fortunate in his subjects—Charles Sumner, Lucretia Mott, his father, Dr. Furness, and other well-known persons having sat to him. His most successful achievements, however, but gave promise of what he might have accomplished had he lived.—Another son, **Horace Howard**, author, b. in Philadelphia, 2 Nov., 1833, was graduated at Harvard in 1854. He spent three years in Europe, returned to his native city, studied law, and was admitted to the bar in 1859. He has been a diligent student of Shakespeare, and undertook the editing of a new variorum edition, the first volume of which appeared in 1871, and six volumes have been issued up to this date (1887).—**Helen Kate**, author, b. in Philadelphia, Pa., 26 July, 1837; d. 30 Oct., 1883, was the wife of Horace Howard. Her maiden name was Rogers. Mrs. Furness published a "Concordance to Shakespeare's Poems," intended as a supplement to Mrs. Clarke's concordance to the plays (Philadelphia, 1873), and also compiled an index to William Sidney Walker's "Text of Shakespeare," which was printed privately.

FURTADO, Francisco José (foor-tah'-do), Brazilian statesman, b. in Oeiras, 13 Aug., 1818; d. in Rio Janeiro, 23 June, 1870. He was graduated at the academy of law of Caxias in 1838, and admitted to the bar in the following year. He was appointed city judge of Caxias in 1840, elected president of the municipality in 1841, and in 1844 member of the provincial assembly of Piauhi. In 1847 he was elected deputy to the imperial legislature that convened in Rio Janeiro in 1848, but the legislature was dissolved, 19 Feb., 1849, and in December Furtado returned to Caxias, and was judge of the superior court of Pará till 1856. In that year the government appointed Furtado president of Amazonas. In a few years the province, owing to his efforts, became flourishing and productive, and in 1859 he resigned. He was elected deputy to the national legislature in 1861, soon became known as an orator, and on 24 May, 1862, was given the portfolio of justice by the president of the new liberal ministry, but the latter was overthrown after a few days by the Conservative party. In 1863 Furtado was re-elected, chosen life-senator by the emperor on 24 July, 1864, and on 31 Aug. was called upon to form a new cabinet. He assumed the government under difficult circumstances, principally through a general commercial crisis. His energetic and somewhat arbitrary measures, although criticised by many, saved the situation, and, the public confidence restored, all government obligations were soon paid and a new loan floated. After the surrender of Montevideo in February, 1865, Furtado applied himself to interior improvements, and took the first energetic steps toward the emancipation of the slaves, but the questions stirred up by the triple alliance in May, 1865, occasioned the resignation of the cabinet. In the senate Furtado, in 1870, proposed and carried through a law taking the first steps for the abolition of slavery. In April of that year, as counsel of the city of Rio Janeiro, he was making argument in court, when he was seized with an illness which terminated in his death. He died poor, but the provinces of the empire subscribed $24,000 to enable his widow to educate their children.

FURTADO DE MENDOÇA, Hipólito J. da Costa (foor-tah'-do), Brazilian journalist, b. in Colonia de Sacramento (now Uruguay) in 1773; d. in London, England, 11 Sept., 1823. He was graduated in philosophy and law at the University of Coimbra, Portugal, in 1795, and began practice at the bar in Lisbon. He was first Portuguese minister to the United States in 1798–1800, and in 1803 was sent to London on a secret mission. But his liberal ideas, confirmed during his stay in the United States, had made him enemies at court, and on his return to Portugal in 1804 he was thrown into the dungeons of the Inquisition, where he remained for nearly three years. Early in 1807, assisted by Freemasons, he managed to escape, and sailed for London. As all his property had been confiscated by the Inquisition, he was reduced to poverty, and gained a living by his pen. He began in London the publication of the "Correio Brazilienense," and notwithstanding that the circulation of the paper was repeatedly prohibited under severe penalties, in 1815 and 1817, it continued to be clandestinely introduced and read in Portugal as well as Brazil. In 1821 and 1822 the "Correio" became the open champion of Brazil, first advocating a constitution and afterward independence, and Furtado was at the same time secret agent of the liberal committee with the British government. After the independence of Brazil had been established in 1822, Furtado was appointed early in 1823 minister to the English, Prussian, and Austrian governments, with residence in London. Among other works, Furtado published "Memoria da America Septentrional"; "Historia de Portugal"; "Nova gramatica Portugueza é Ingleza"; "Descripção da arvore assucarina"; and "Descripção de una machina para tocar a bomba á bordo dos navíos sem o travalho de homeus."

FUTHEY, John Smith, author, b. in Chester county, Pa., 3 Sept., 1820. His ancestors lived in Arbroath, Forfar co., Scotland. Members of the family went to County Antrim, Ireland, and about 1720 Henry Futhey came thence to Chester county, Pa. The subject of this sketch is the fifth in descent from him. He was educated at local academies, and at the law-school of Dickinson college, Pa. He was admitted to the bar of Chester county in 1843, and was district attorney for five years. In 1879 he was appointed president judge of the district, and the same year was elected for the full term of ten years. Judge Futhey is an excellent historical scholar, is a member of many historical societies, and has published much valuable historical and antiquarian matter. His principal publications are "Historical Collections of Chester County," a series of 160 papers contributed to a local journal; "History of Upper Octorara Presbyterian Church" (1870); "History of Educational Institutions of Chester County" (1877); "Historical Address on the One Hundredth Anniversary of the Paoli Massacre" (1877); "History of Chester County," in Egle's "History of Pennsylvania" (1876); "History of Chester County," in connection with Gilbert Cope (1881). He also published, in connection with Dr. Wm. Darlington, "Notæ Cestrienses," a series of papers contributed to a local journal (1858–'61). He is now (1887) preparing a genealogy of the Futhey family.

G

GABARET, Jean de (gah-bah-ray), governor of Martinique, b. in the island of Ré in 1620; d. in Rochefort, 31 March, 1697. He entered the navy at the age of sixteen years, and in 1653 had already obtained the rank of commodore. In 1677 he commanded the vanguard of d'Estrée's fleet in the West Indies, entered the port of Tobago at its head, amid the cross-fire of the forts and the Dutch fleet, on 27 Feb., and in 1678 captured the same island, and, after destroying Granada, returned to Europe and participated in the battle of La Hogue, 29 May, 1692. In 1693 he was appointed governor-general of Martinique. Although he found the island in a defenceless state, he soon organized troops and armed the forts. An English fleet of twenty-eight men-of-war and eight transports, with 4,200 landing troops under Sir Francis Wheeler, anchored in Port Royal on 1 April, and landed 1,600 men under Col. Foulke, which were defeated and forced to re-embark, while Sir Francis landed with 2,600 men at Diamond bay. On 15 April he received a re-enforcement from Antigua under Gen. Codrington, and concentrating all his forces, over 5,000, at Front Cananville, he marched on the capital, Saint Pierre. Gabaret had only 400 disciplined troops and 1,500 armed slaves, but met the invaders on 31 May, 1693, at Précheurs, defeated, and forced them to re-embark. He even attacked, in 1694, the port of Kingston, Jamaica, and sunk some English ships. After his return he organized the administration, introduced many useful reforms, embellished the capital, built the city-hall, and made improvements in the port in 1695–'6. Out of gratitude to the negroes who had helped him to defeat the English, he reformed the so-called "black code," and presented, in 1696, to Louis XIV. a project for gradual emancipation, which was printed under the title of "Memoire presenté à Sa Majesté par le comte de Gabaret, gouverneur de la Martinique sur l'émancipation graduelle des esclaves." In this he suggested the colonization of the slaves in Cayenne and Patagonia, which would encourage the immigration of white settlers to Martinique, and form new and useful French colonies in South America. The minister of war, marquis of Chamillard, favored the project, and reported it to the king, who called Gabaret to France. He sailed in January, 1697, but shortly after his arrival died of exposure to the cold, to which he had not been accustomed.

GABB, William More, paleontologist, b. in Philadelphia, Pa., 16 Jan., 1839; d. there, 30 May, 1878. He was educated in Philadelphia, and acquired his knowledge of geology in the Academy of natural sciences of that city. In 1862 he was appointed paleontologist to the geological survey of California, under Prof. Josiah D. Whitney, and continued actively engaged in that work until 1865. The cretaceous and tertiary fossils were classified by him, and the portion devoted to that subject in the first volume on paleontology of the "Geological Survey of California" (1864), and the entire second volume, were written by him. In 1868 he undertook a survey in Santo Domingo for the Santo Domingo land and mining company, remaining on the island from 1869 till 1872. Subsequently he published an extended memoir "On the Topography and Geology of Santo Domingo," in the "Transactions of the American Philosophical Society," vol. xiv. (Philadelphia, 1873). He then went to Costa Rica under an appointment from the government, and engaged in a topographical and geological survey of that country, where he also made extensive ethnological and natural history collections for the Smithsonian institution. Mr. Gabb published a memoir "On the Topography of Costa Rica," with a map, in "Petermann's Mittheilungen," and also one on the "Ethnology of Costa Rica," in the "Transactions of the American Philosophical Society." His report on the geology and paleontology he left unpublished at the time of his death. Besides the foregoing publications he contributed frequent papers to the scientific journals and proceedings of societies. He received an election to the National academy of sciences, was also a member of other scientific societies, and ultimately gained a reputation for greater knowledge of American invertebrate paleontology of the cretaceous and tertiary age than any other scientist of his time.

GABRIAC, Paul Joseph de Cadoine, Marquis de, French diplomatist, b. in Heidelberg, Baden, 1 March, 1792; d. in Paris, 12 June, 1865. He entered the diplomatic corps in 1811 as secretary of the embassy at Naples, and in 1812–'14 was consul-general at New York, and temporarily in charge as minister in Washington. Under the restoration he was appointed secretary of legation at Turin in 1815, chief secretary at St. Petersburg in 1820, and minister plenipotentiary at Stockholm in 1823. In 1826 he was appointed by the prime minister, Count Villèle, to the Brazilian mission, which had been refused by different diplomatists on account of the difficult situation of affairs, as the emperor, Pedro I., refused to accede to the desires of the European governments to establish an independent government in Portugal. Gabriac seconded the demands of England and Austria so effectually that at last the emperor appointed, in 1827, his brother Miguel regent of Portugal in the name of his daughter, Dona María da Gloria. He also renewed the commercial treaty with the empire, signed 10 Aug., 1828, a convention by which Brazil adopted the French maritime law, and in the same year had the same law adopted by all the South American republics. In 1829 he was sent as minister to Switzerland, but returned when the July revolution of 1830 made his special mission superfluous. In 1837 he was sent on a special mission to Mexico, and in 1839 to Washington; he was in 1841 made a peer of France, and in 1853 life senator by Napoleon III. He is the author of "La question Brésilienne" (Paris, 1829); "Les républiques de l'Amérique du Sud considérées dans leur avenir" (1851); and "Dom Pedro I., notes et souvenirs personnels" (1854).

GADSDEN, Christopher, patriot, b. in Charleston, S. C., in 1724; d. there, 28 Aug., 1805. He was sent at an early age to England, where he received his education. He returned to Charleston in 1741, and shortly afterward became a clerk in a counting-house in Philadelphia, where he remained till he was twenty-one years of age. After a second visit to England he began business on his own account in Philadelphia, and such was his success that he was soon able to buy back the estate which his father, in 1733, had lost at play with Admiral Lord Anson. He was one of the first to appreciate the full measure of the difficulty with Great Britain, and from the outset he was sympathetic and resolute on the popular side. He was the friend and correspondent of Samuel

Adams, and was a delegate to the first Colonial congress, which met in New York in October, 1765, and at which was adopted a "Declaration of the Rights and Grievances of the Colonies." He was a member also of the first Continental congress, which met in Philadelphia in September, 1774. When the Revolutionary war broke out he took the field with the rank of colonel, and was actively engaged in the defence of Charleston in 1776. In September of the same year he was promoted to the rank of brigadier-general. He was one of the framers of the state constitution in 1778. As lieutenant-governor of South Carolina, he signed the capitulation when Charleston was taken by Sir Henry Clinton in May, 1780. He was arrested somewhat later, by order of Lord Cornwallis, and carried to Fort Augustine, where, a parole having been offered and refused, he was detained for forty-two weeks. He was exchanged in 1781, and in the following year he was elected governor of South Carolina, but declined the office on account of age and infirmity. He continued, however, to take a deep interest in public affairs, and gave his services both in the assembly and in the council.—His grandson, **Christopher Edwards,** P. E. bishop, b. in Charleston, S. C., 25 Nov., 1785; d. there, 24 June, 1852, obtained his early education in the "Associate Academy" in Charleston. In 1802 he entered the junior class in Yale college, and was graduated with honor in 1804. John C. Calhoun was a member of the same class, and the friendship formed with young Gadsden continued through life. He was ordained deacon by Bishop Benjamin Moore, in St. Paul's chapel, New York city, 25 July, 1807, and priest by Bishop Madison, in Williamsburg, Va., 14 April, 1810. In January, 1808, he took charge of the ancient parish of Berkeley, S. C., but in February, 1810, he was chosen to be assistant minister of St. Philip's church, Charleston. On the death of the rector, in 1814, Mr. Gadsden was elected to fill his place. He received the degree of D. D. from South Carolina college in 1815. After the death of Bishop Bowen in 1839, Dr. Gadsden was elected bishop, and was consecrated in Trinity church, Boston, Mass., 21 June, 1840. Bishop Gadsden's episcopate of twelve years was marked by great devotion, energy, prudence, and discretion, and he displayed noble qualities which endeared him to both clergy and laity. On his visitations he was particularly attentive to the colored people, often collecting them for purposes of devotion and instruction. He confirmed more than twenty of them on the first occasion when he administered the rites. He edited for several years the "Gospel Messenger," published several occasional sermons, a tract on "The Prayer-Book as it Is," and three valuable charges to the clergy, and an essay on the life of Bishop Dehon (1833).—His brother, **John,** lawyer, b. 4 March, 1787; d. 31 Jan., 1831, was graduated at Yale in 1804, and was admitted to the bar. He was a member of the South Carolina legislature, and also held the office of U. S. district attorney.—Another brother, **James,** statesman, b. in Charleston, S. C., 15 May, 1788; d. there, 25 Dec., 1858, was graduated at Yale in 1806. After engaging in commercial pursuits, he joined the army, and was appointed lieutenant-colonel of engineers. He served with distinction during the war of 1812 with Great Britain, and after the peace was Jackson's aide in the expedition to examine the military defences of the Gulf of Mexico and the southwestern frontier. In the following year, with Gen. Simon Bernard, he was appointed to review the examinations, and made a separate report, in which his conclusions differed from those of that officer. In 1818, as aide-de-camp to Gen. Jackson, he took part in the campaign against the Seminole Indians, aiding in the capture of their leaders, Arbuthnot and Ambrister, and personally intercepting a schooner bearing the correspondence that led to the execution of these men. Later he was constructor of works for the defence of the Gulf, and when engaged in the fortification of Mobile bay, in 1820, was made inspector-general of the southern division. He went with Jackson to Pensacola when the latter took possession of Florida, and was active in settling a dispute between him and the Spanish governor. On the reduction of the army in 1822, he was employed as adjutant-general, in aid of John C. Calhoun, who was reorganizing the war department, but his name was rejected by the senate for political reasons. After his retirement from the army he became a planter in Florida, and was a member of the legislative council of that territory. Under a commission from President Monroe, he removed the Seminoles from northern to southern Florida, and was the first white man that crossed the peninsula from the Atlantic to the Gulf. Later he returned to his native state, became president of the South Carolina railroad, and engaged in commerce and in rice-culture. In 1853 President Pierce made him minister to Mexico, and on 30 Dec. of that year he negotiated a treaty by which a new boundary between the two countries was agreed upon, and which considerably modified the provisions of the treaty of Guadalupe Hidalgo. By the Gadsden treaty the United States became possessed of territory now forming part of Arizona and New Mexico, for which $10,000,000 was to be paid. The treaty was confirmed by the senate, but with such modifications that Gen. Gadsden was obliged to renew his negotiations in Mexico. These were interrupted by a revolution, and Gadsden was superseded before the conclusion of the treaty. He then retired to private life.

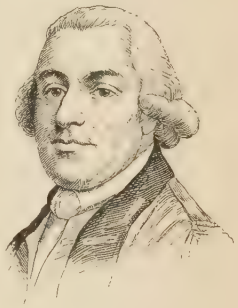
GAGE, Frances Dana, reformer, b. in Marietta, Ohio, 12 Oct., 1808; d. in Greenwich, Conn., 10 Nov., 1884. Her father, Col. Joseph Barker, went from New Hampshire with the first company of pioneers that settled Ohio. Miss Barker married in 1829 James L. Gage, a lawyer of McConnellsville, Ohio. She early became an active worker in the temperance, anti-slavery, and woman's-rights movements, and in 1851 presided over a woman's-rights convention in Akron, Ohio, where her opening speech attracted much attention. She removed in 1853 to St. Louis, where she was often threatened with violence on account of her anti-slavery views, and twice suffered from incendiarism. In 1857–'8 she visited Cuba, St. Thomas, and Santo Domingo, and on her return wrote and lectured on her travels. She afterward edited an agricultural paper in Ohio; but when the civil war began she went south, ministered to the soldiers, taught the freedmen, and, without pay, acted as an agent of the Sanitary commission at Memphis, Vicksburg, and Natchez. In 1863–'4 she was superintendent, under Gen. Rufus Saxton, of Paris island, S. C., a refuge for over 500 freedmen. She was afterward crippled by the overturning of a carriage in Galesburg, Ill., but continued to lecture on temperance till August, 1867, when she was disabled by a paralytic shock. Mrs. Gage was the mother of eight children, all of whom lived to maturity. Four of her sons served in the National army in the civil war. Mrs. Gage wrote many stories for children, and verses, under the pen-name of "Aunt Fanny." She was an early contributor to the "Saturday Review," and

published "Poems" (Philadelphia, 1872); "Elsie Magoon, or the Old Still-House" (1872); "Steps Upward" (1873); and "Gertie's Sacrifice."

GAGE, Matilda Joslyn, reformer, b. in Cicero, N. Y., 24 March, 1826. Her father, Dr. H. Joslyn, was an active abolitionist, and she inherited from him an interest in the questions of woman suffrage and slavery. She was educated in De Peyster and Hamilton, N. Y., and in 1845 was married to Henry H. Gage, a merchant in Cicero. From 1852 till 1861 she wrote and spoke on reform measures, and was an eager advocate of the abolition of slavery at any cost. In 1862, on the presentation of colors to a company of the 122d New York regiment, Mrs. Gage made an address in which she prophesied the failure of any course that did not abolish slavery. In 1872 she was elected president of the National woman suffrage association, and of the New York state woman's suffrage society, and she is now (1887) vice-president of each, and one of a special committee to arrange for an international council of women to meet in Washington in 1888. From 1878 till 1881 Mrs. Gage edited and published the "The National Citizen" in Syracuse, N. Y. She is the author of "Woman as an Inventor" (New York, 1870), and "The History of Woman Suffrage," with Susan B. Anthony and Elizabeth Cady Stanton (3 vols., New York, 1881–'6).

GAGE, Thomas, Irish traveller, b. in Limerick, Ireland, in 1597; d. in Kingston, Jamaica, in 1655. His father sent him in 1612 to Spain to study in the Jesuit college, but he was filled with a great aversion to the Jesuits, and joined the Dominicans in 1621. He was afterward professor of rhetoric in the convent of Jerez, and later asked and obtained leave to join a party of missionaries to the Philippine islands, but before his departure a royal decree was promulgated forbidding any foreigner, under severe penalties, to go to the Spanish colonies. But the president of the mission, Jacinto Calvo, hid Gage in a hogshead, and they sailed from Cadiz, 2 July, 1627, with twenty-seven Dominican friars. After various adventures the party reached Mexico, where Gage decided to remain, and he taught Latin for some time in the convent school. In 1626 he was employed as Indian teacher and missionary in Guatemala, and afterward obtained the rich parish of San José de Amatitlan, where he occupied himself more in amassing wealth than in caring for his flock. When, in 1636, he obtained from the general of the order permission to return to Europe, he had 9,000 ducats in his possession. As the provincial put difficulties in his way, he turned his wealth into pearls and precious stones, and on 7 Jan., 1637, left his parish secretly, and, making his way through the province of Nicaragua, sailed from the gulf-coast of Costa Rica on 4 Feb. After losing most of his fortune in an adventure with Dutch corsairs, he finally reached Spain on 28 Nov., 1637, and in 1638 arrived in England, after an absence of twenty-six years. After a visit to Italy in 1639, he took an active part in the parliamentary troubles in England, and publicly abjured Roman Catholicism in the cathedral of St. Paul in 1644. He was rewarded with the rectory of Deal, and there prepared for publication his work, "New Description of the West Indies, and a Journey of 3,300 Miles on the Mainland of Mexico and Central America, with a Residence of Eleven Years in the Indian Cities of Guatemala, with a Grammar of the Poconchi Language" (London, 1648), which he dedicated to Oliver Cromwell. This book made a sensation, as, although it was full of gross exaggerations and some flagrant untruth, it laid for the first time before the public a description of the Spanish possessions in America, the knowledge of which so far had been jealously guarded by the authorities. The work passed through several editions, and was translated into the principal languages of Europe. As Gage in his work had treated of the great riches of Mexico and Central America, Cromwell's attention was attracted, and, after many consultations with the author, an expedition against the Spanish colonies was resolved upon. On 11 March, 1655, a fleet of twenty-three sail, under Vice-Admiral Penn, having on board 6,550 troops and marines, left Bristol, with Gage on board as guide. The fleet arrived before Havana on 15 April, but, as the expedition had been reported beforehand, the Spaniards had taken measures of defence. After taking some booty on the coast of Santo Domingo, the fleet anchored on 9 May before Spanish Town, Jamaica, landed the troops of Gen. Venables, and, after a desperate resistance by the Spaniards, captured the whole island, which has since remained a British colony. Before the conquest was concluded, Gage died of dysentery.

GAGE, Thomas, British soldier, b. in Firle, Sussex, in 1721; d. in England, 2 April, 1787. He was the second son of Thomas Gage, Viscount Gage of Castle Island, and Baron Gage of Castlebar. He was appointed major of the 44th regiment in February, 1747, and at the time of Braddock's expedition had risen to the rank of lieutenant-colonel. His command was the first to receive the onslaught of the French and Indians at Monongahela, 9 Sept., 1755. Although himself injured, he rallied the troops to aid in taking Braddock, who was mortally wounded, to a place of safety. His account of the battle, made in a statement to Chalmers for his "Annals," is printed in the "Massachusetts Historical Society Collections," vol. 34.



Tho.s Gage

He accompanied Gen. Abercrombie on his Ticonderoga expedition in 1758, as colonel of the 80th regiment of light-infantry. Gen. Amherst, in August, 1759, gave him command of the Ontario department, and as a brigadier-general he participated in the campaign for the conquest of Canada in 1759. On the capitulation of Montreal in September, 1760, he was appointed military governor of the city, and his mild administration of this department contrasted favorably with the severity of Murray's government of the Quebec district. The 22d regiment was assigned to him in June, 1762, and in December, 1763, he succeeded Amherst as commander-in-chief in America, with headquarters at New York. In 1765 he surrendered the stamped paper to the municipality. He directed the affairs of the army until February, 1773, when he sailed for England, leaving Gen. Haldimand in command, that officer coming from the southern, or Florida, department, where he had been in control since 1766. Gage's correspondence with Haldimand during this period is contained in the "Haldimand Collection" in the British museum, copies of which have been made

for the Canadian archives, and calendered in the annual report of the archive department. In a letter to Haldimand from London, 4 April, 1774, Gage writes that he has been ordered to Boston with four regiments, to bring the people to submission and enforce the coercive measures of the government. He arrived in Boston on 13 May, 1774, and on the 17th, having spent four days with Hutchinson at Castle William, was received with ceremony by the council and civil officers, and the proclamation of his commission was signalized by volleys of musketry and cheers of the populace. In a public dinner in Faneuil Hall he proposed "the prosperity of the town of Boston." But the hopes entertained of his acting as an adjuster of the differences between the colonies and the mother country were short-lived. He came to Boston as the civil, but in reality military, governor of the province. He had some acquaintance with the Bostonians on a visit in 1768, when he came at the request of the king to quell the disturbances in regard to quartering of the British troops. The results of his observations are given in two publications, entitled "Letters to the Ministry from Governor Barnard, General Gage, and Commodore Hood," and "Letters to the Earl of Hillsborough from Governor Barnard, General Gage, and the Council of the Province of Massachusetts Bay" (Boston, 1769). The aspersions on the people of Boston in those letters drew out an "Appeal to the World" by Samuel Adams. Immediately upon receiving official notice of their passage, Gage proceeded to put into effect the Boston port bill, and the offensive measures of the regulation act. On 30 June, 1774, he issued a proclamation denouncing the solemn league and covenant as unwarrantable, hostile, and traitorous, and threatening its promoters with arrest. The text of this document is printed in the "Massachusetts Historical Society's Collections," vol. 12. During the summer months of 1774, Gage had his headquarters at Salem, that being, under the port bill, the capital, and the *mandamus* council being held there. Early in 1775 he sent expeditions to Marshfield, Jamaica Plains, and Salem, to seize military stores and disperse the militia. On the night of 18 April a large force departed from Boston, on what Gage intended to be a secret expedition to Concord and Lexington, to get possession of cannon and ammunition belonging to the Provincials, and on the following day took place the memorable conflict between the minute-men and Gage's soldiers, which resulted in the discomfiture of the British. Gage's account of the battle of 19 April is printed in fac-simile in the "Memorial History of Boston." On 12 June he gave vent to his displeasure at the state of affairs in another proclamation, characterizing those in arms as rebels and traitors, but promising pardon to all on submission, excepting Samuel Adams and John Hancock. The Americans fortified Breed's (Bunker) Hill on the night of 16 June, and on the following day Gage sent Gen. Howe with a large force to dislodge them. In spite of contrary advice, Gage determined that the works should be attacked in front. A Tory historian relates that he told his advisers he was going "to take the bull by the horns," and adds: "It is remarkable that the general, during the continuance of his command in America, never once ventured an attack upon American intrenchments; he had fatally experienced the consequences of taking the bull by the horns." Immediately upon receiving Gage's account of the battle of Bunker Hill, the government ordered his recall, and he sailed for England, 10 Oct., 1775. A brief review of his services in America, in his own words, is given in "Queries of George Chalmers, with the Answers of Gen. Gage, in Relation to Braddock's Expedition, Stamp Act, and Gage's Administration of the Government of Massachusetts Bay," published in the "Massachusetts Historical Society's Collections," vol. 34. His subsequent career was uneventful. In April, 1782, he was appointed colonel of the 17th light dragoons, promoted to the rank of general in November, 1783, and in 1785 was transferred to the 11th dragoons. He married, 8 Dec., 1758, Margaret, daughter of Peter Kemble, president of the council of New Jersey. One of his sons became third Viscount Gage. The following works represent contemporaneous publications relative to his conduct of affairs at the opening of the Revolution: "General Gage's Instructions of 22 Feb., 1775, to Captain Brown, whom he ordered to take a Sketch of the Roads, etc., from Boston to Worcester" (Boston, 1775; reprinted in the Collections of the Massachusetts historical society, vol. 14); "Narrative of the Excursions and Ravages of the King's Forces, under Command of General Gage, 19 April, 1775" (Worcester, 1775); "Lord Ch——m's Prophecy, an Ode to Lieutenant-General Gage" (London, 1776); "Letters of the Two Commanders-in-Chief, Generals Gage and Washington" (New York, 1775); "Detail and Conduct of the American War, under Gen. Gage" (London, 1780).
